HERITAGE

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS

JANUARY - FEBRUARY 2009 ISSUE No. 1

ARCHAEOLOGY TEAM SURVEYS MINING CAMP

A historical archaeology team from Sydney University has begun a field survey of the mining camp site in the valley below Scenic World's complex at Katoomba.

The project follows a meeting of the Blue Mountains Association of Cultural Heritage Organisations committee hosted by Mr Philip Hammon the managing director of Scenic World in its boardroom at Katoomba.

Prior to the meeting, Mr Hammon took the committee on a tour of the complex including the 415 metre descent on the Scenic Railway which passes through a cliff side tunnel, a walk along the 2 kilometre elevated boardwalk past the site of the mining camp and then a climb back to the top in the 545 metre long Cableway transporter.

During the meeting he asked for advice on the best way to catalogue the mining objects retrieved from the site.

Within days, BMACHO secretary, Professor Barrie Reynolds had arranged and attended a meeting with Dr Martin Gibbs of the Historical Archaeology Department at Sydney University and Annie Clark (SU) of Bullaburra and Mr Hammon when it was agreed that students from Sydney University would carry out a field survey for relics and other objects in ashes of camp fires at the site.

The first inspection and site mapping commenced in late November last year.

At right...This 1890s image of the mining village from the top of the cliff around Katoomba Falls shows a number of huts and an unexpectedly large building in the lower part .The image has been provided by Dr Ian Jack (vice president BMACHO) to the university team for part of the project documentation.The photograph taken by Henry King is part of a Mitchell Library album (PXA 61/70) *Cont page 2*

WOODFORD ACADEMY AN 1830S INN

A BRIEF HISTORY see page 7

BLUE MOUNTAINS COUNCIL APPOINTS 2 HERITAGE ADVISERS

Blue Mountains City Council has engaged two consultants on a part time basis as heritage advisers. This program is being funded solely by council.

BMACHO which has been pressing council for several years for the appointment of a heritage adviser and the re-establishment of a community heritage advisory committee welcomed the recent announcement. It is now hoped the advisory committee will be established by the end of 2009.

Mr Christo Aitken is to provide advice to the council and the community in heritage matters such as development applications, policy development and other heritage related projects. Dr Peter Kabaila is to provide advice to council on specific projects.

Appointments with the advisers are to be made through council staff. Advice for development assessment advice is to be provided on a fee basis and appointments are to be made through Deborah d'Avigdor on 47805738. Appointments for other advice are to be made through Christine Jones on 47805609.

Council's manager of city planning, Mr Andy Turner, has indicated the advisers' work will include the computerisation of heritage site records produced some years ago, by Dr Ian Jack and reviewing various models for the establishment of a heritage advisory committee.

Meanwhile, regular meetings are being held between BMACHO secretary, Barrie Reynolds and Andy Turner, which are facilitating a useful exchange on the heritage work currently being undertaken by council and BMACHO.

From the president's pen.....

NEED FOR IMPROVED COMMUNICATIONS

Some time ago, the committee of BMACHO identified as a major issue, the need to improve communications in the local heritage sector.

Across a broad range of issues it was considered that various organisations were not sharing information which could not only make their operations more effective, but would also make life easier and more pleasant in the bid to achieve goals of conserving, researching, recording, preserving and promoting our heritage.

The executive has spent considerable energy and time, with some success in opening up communication with Blue Mountains City Council, the former Federal Member for Macquarie, Kerry Bartlett, the State Member for Blue Mountains and now the Federal Member, the Hon. Bob Debus and the new Member for Blue Mountains, Phil Koperberg.

In discussions with these community leaders they have generally displayed more than a cursory interest and knowledge of the diversity of heritage in the Blue Mountains, Lithgow and Hawkesbury regions. However, what they were not aware of was the large number of individuals, which includes amateur enthusiasts, academics and professionals who are active within the local heritage sector.

Community leaders have accepted the need to improve two-way communication and BMACHO's executive has seen some tangible improvement at government level.

Many of those active in the heritage sector appear to have operated in isolation for many years — sometimes, totally unaware of the importance they play in the fabric of Australian society.

For more than five decades societies in this region have been party to hosting most informative historic talks and presentations and yet there has been very little done in the way of publishing these interesting dissertations.

There have been some excellent books produced by local authors on very well researched material, but little effort in promoting these publications. Even some of the newsletters which have been produced are in their own right worthy of commendation as sound historical documents.

While there is an urgent need to promote publications in print, there is an even greater need to share information between like organisations. It is imperative that organisations, if they are to succeed in maintaining membership, become more proactive in selling their group to the public. One of the best ways of doing this is to communicate and share ideas with like minded bodies.

To participate in the process of improving communications, BMACHO's executive has initiated this newsletter, **HERITAGE** which currently it is proposed to publish every couple of months. The newsletter is designed to reach as many individuals as possible.

Too often communications addressed to busy secretaries do not seem to go any further down the line. It is hoped that secretaries on receipt of **HERITAGE** on their e-mail will simply forward it on to those members who have registered their e-mail.

Hopefully those who do not have e-mail will be provided with hard copies by other members of their organisation.

John K Leary, OAM - President and newsletter editor, Blue Mountains Association of Cultural Heritage Organisations.

KATOOMBA MINING CAMP DIG

Continued from page 1

Coal and shale oil mining began in the Blue Mountains during the latter part of the 1800s.

By 1870 kerosene shale had been discovered in Megalong Valley.

John Britty North opened a coal mine at Katoomba in 1881 and kerosene shale was being mined in the Jamieson Valley by 1890 and Megalong by 1891.

According to GH Eardley and EM Stephens in their book *The Shale Railways of NSW,* John Britty North had acquired 640 acres of land forming the high-level water-shed of Katoomba Falls Creek with the intention of exploiting the coal seams which outcropped at the base of the cliff many hundreds of feet below.

The discovery of two payable seams of kerosene shale at the base of the massive sandstone cliffs ranged along the eastern and western sides of the lengthy Narrow Neck Peninsula, embracing the upper regions of the Jamieson Valley, the Ruined Castle dividing ridge and the adjacent valley of Cedar Creek, has been credited to Campbell Mitchell.

However, although he acquired some land under MCP he made no effort to work this new shale deposit area, presumably because of the difficult nature of the terrain.

A close examination of the Ruined Castle area of the Jamieson Valley made by John Britty North's manager, Garbutt, during 1880 revealed two out-crops of kerosene shale and on the strength of this find North was instrumental in forming the Katoomba Coal and Shale Company Limited

A number of cable haulage, aerial ropeways and horse tramways were used to bring the mined minerals eventually to the NSW Government Railway line near Katoomba.

Our place in space -- Under the Southern Cross

As part of the National Trust Heritage Festival, Blue Mountains Association of Cultural Heritage Organisations will host an afternoon of heritage lectures on Saturday, April 4.

The National Trust Heritage Festival has been operating very successfully for 29 years and hundreds of historical and like minded heritage groups have staged a wide range of events over 14 days in April.

This year's festival theme is 'Our Place in Space - Under the Southern Cross'.

Two eminent speakers have been engaged, Dr Nick Lomb who is the curator of astronomy at the Power House Museum. Dr Lomb has chosen the title, the "History of Australian Astronomy", in which he will make reference to the observations of the Transit of Venus at Woodford Academy in 1874.

The other speaker is Mr John Sarkissian an Operations Scientist at the CSIRO Parkes Radio Observatory. Mr Sarkissian has chosen as his subject, "Australian Radio Astronomy: From a Brilliant Past to a Bright Future".

Radio astronomy is the only science in which Australia leads the world. From its beginnings at Dover Heights, Sydney, through the development of the Parkes Radio Telescope in the 1960s and to the new generation instruments planned for the next decade, the world has always looked to Australia for leadership in this exciting field.

This talk will detail the establishment of the science in the immediate post-war years, and the reasons which led to Australia taking the lead in this new field. It will bring to light the brilliant advances and discoveries that have shaped its development and why it continues to have a bright future in Australia.

Mr Sarkissian is responsibile for the operation and systems development at the radio telescope, and the support of visiting astronomers with their observations. In addition, he is involved in Pulsar research - an exciting field of radio astronomy.

John is a member of the Parkes Pulsar Timing Array team which is endeavouring to use precision pulsar timing to make the first direct detection of gravitational waves. He is also a member of the small, informal team searching for the missing Apollo 11 slow-scan TV tapes. From 1998-1999, John acted as a technical adviser for the feature film, "The Dish". He came to Parkes in 1996 to support the Galileo Mission to Jupiter. He managed the Galileo spacecraft tracking operations at the observatory and performed 1/3 of the daily tracking duties. From 1988 to 1996, John was a Guide Lecturer and Education Officer at Sydney Observatory.

Each illustrated lecture will be for 45 minutes with 15 minutes being allowed for questions and answers from the audience

The lectures will be accompanied by entertainment by a trio from the Blue Mountains Opera Group, Ron Goldsmith, Maureen Stuart and Tina Banasiak with songs about the sun, moon and stars.

The afternoon will be conducted at the Blue Mountains Grammar College commencing at 2pm and admission will cost $20 per person and include afternoon tea and a glass of wine.

Bookings are essential and can be made by telephoning John Leary on 4758 8584 or e-mail johnnanette@optusnet.com.au

Pictured at the Woodford Academy site is the canvas "tent city" including observatory domes and telescopes set up for the observation of the Transit of Venus on December 9, 1874. The property was then known as Woodford House and owned by Sydney businessman Alfred Fairfax

Lee-Enfield rifle No 1.

Ask a man if he remembers dates of wedding anniversaries and spouse's birthday and most men will have a difficulty. Ask a former soldier his regimental number or his rifle number and most will reel off the number without hesitation.

Imagine however, if your rifle had been No 1. Well, .303 Lee-Enfield rifle number 1 does exist and can be found in the Lithgow Small Arms Factory Museum. **HERITAGE** is indebted to Donna White, president of the museum for the material and picture in this article.

Prior to 1900 practically all defence equipment had been supplied to Australia by the United Kingdom. During the South African Boer War campaign it became apparent that Australia's isolation from its armament source could lead to serious supply problems in future conflicts.

After federation of the states and establishment of the Commonwealth in 1901 the new government faced responsibility for the country's defence.

In 1907 the decision was made to establish a factory for the manufacture of small arms in Australia.

After much deliberation amongst government officials, Lithgow, situated on the western foothills of the Great Dividing Range, was approved as the site for the new factory.

Influencing this choice was the town's steel works, a thriving coal industry; access by rail and road; protection from bombardment afforded by the Blue Mountains; and intense lobbying by the Lithgow Progress Association.

Tenders were invited from England, Europe and America for the supply of a complete plant to manufacture the .303 inch Lee-Enfield rifle (the rifle used by the British Army) at the rate of 250 per week.

Four tenders were received; three from British arms manufacturers for around £150,000, £100,000 and £69,000, and one from an American machine tool company Pratt & Whitney Co. for a bit under £69,000.

In a very controversial decision Pratt & Whitney were chosen because, amongst other things, they guaranteed interchangeability of components straight off the machine whereas the English tenders could not guarantee interchangeability.

They also offered to train six Australian tradesmen at their works in America to return to Lithgow as foremen.

On arrival in America the trainees were located at the Pratt & Whitney Works at Hartford, Connecticut, where they worked on the production of tools, fixtures and gauges and the operation of the various machines.

One hundred test rifles and bayonets were produced to prove the machinery that was destined for the Lithgow Factory, a few of which were sent to England to test for interchangeability with British produced rifles. (The Lithgow Small Arms Factory Museum holds No 2 and No 28 complete with bayonet).

Operation of the Factory commenced early in 1912 with 190 employees. Little was known in Australia about production engineering before the commencement of the Small Arms Factory.

The men who were selected to go to the Pratt & Whitney plant to gain experience, pioneered the manufacture of interchangeable parts in Australia.

Some of the Pratt & Whitney supplied machines were still being used in the 1960s.

There are 170 different component parts in the rifle and its accessories. It required 2,250 separate operations upon these parts before a rifle would be ready for final inspection.

In May 1913, 40 rifles and bayonets from a process-proving batch were delivered to the Australian Army for testing. By December 1913 - 1500 rifles had been produced. Following the outbreak of World War I in 1914 production rose to 1600 rifles per week.

During February 1914, members of a Rifle Qualifying Course at the Army's School of Musketry in Sydney used Lithgow rifles for a month.

The commanding officer reported that accuracy was excellent, calibration of the sights being better than the general run of British-made rifles.

There were a few problems, such as the bolt action becoming stiff after firing a number of rounds, but these were considered easily rectified.

During World War II various experimental and modified versions were manufactured including the No 1 Shortened & Lightened, the No 6, EY grenade launcher, and HT sniper models. The SMLE remained as the Australian and Commonwealth service rifle through both world wars and the Korean War. After facing massed attacks in Korea it became clear that the SMLE had had its day. Production of the SMLE ceased in Lithgow in 1956 with approximately 640,000 in total being produced.

BICENTENNARY OF NATURALIST CHARLES DARWIN'S BIRTH

This year marks the bicentenary of the birth of Charles Darwin. He was born on February 12, 1809 in Shewsbury, England.

Darwin one of the great thinkers of all time was the British naturalist who became famous for his theories of evolution and natural selection.

Like several scientists before him, Darwin believed all the life on earth evolved over millions of years from a few common ancestors.

Darwin developed his interest in natural history while studying medicine at Edinburgh University then theology at Cambridge.

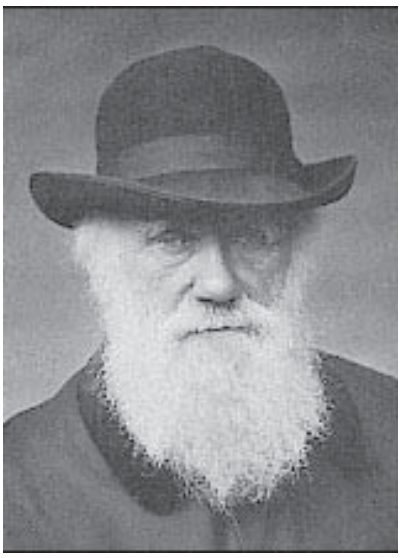
His five year voyage of the Beagle established him as an eminent geologist whose observations and theories supported Charles Lyell's uniformitarian ideas, and publication of his journal of the voyage made him famous as a popular author.

Puzzled by the geographical distribution of wildlife and fossils collected on the voyage, Darwin investigated the transmutation of species and conceived his theory of natural selection in 1838

His 1859 book *On the Origin of Species* established evolution by common descent and the dominant scientific explanation of diversification in nature. He examined human evolution and sexual selection in *The Descent of Man and Selection and Relation to Sex.*

Darwin's theories on evolution are as relevant today as they were when he first published, *Origin of the Species*, 150 years ago.

On the Origin of Species by Means of Natural Selection, or The Preservation of Favoured Races in the Struggle for Life (usually abbreviated to *On the Origin of the Species* proved unexpectedly popular, with the entire stock of 1,250 copies oversubscribed when it went on sale to booksellers on November 22, 1859. In the book, Darwin set out "one long argument" of detailed observations, inferences



Darwin in 1880, still working on his contribution to evolutionary thought that had an enormous effect on many fields of science

and consideration of anticipated objections. His only allusion to human evolution was the understatement that "light will be thrown on the origin of man and his history".

He visited the Blue Mountains of NSW in 1836 while travelling around the world in HMS *Beagle*.

He stopped off at Wentworth Falls (then known as Weatherboard), travelling on to Bathurst, sighting a platypus as he passed through Wallerawang

In Australia, the marsupial rat-kangaroo and the platypus seemed so unusual that Darwin thought it was almost as though two distinct creators had been at work.

He found the Aborigines good-humoured and pleasant", and noted their depletion by European settlement.

Local celebrations

Celebrations to mark the 200th anniversary of Darwin's birthday will be held around the world in 2009.

BMACHO has applied for a federal government grant to conduct local celebrations.

Subject to grant funding, a series of lectures and a guided walk along the Darwin path at Wentworth Falls are planned for later this year.

Already Dr Peter Stanbury who was involved in the planning and construction of the Darwin path has agreed to conduct a guided tour and several eminent speakers are expected to give lectures at Wentworth Falls and Lithgow.

HERITAGE PUBLICATIONS SEMINAR SUCCESS

Local historians, academics and heritage book writers from the Blue Mountains region including Lithgow, late last year participated in a day-long "Heritage Publications" seminar at Everglades, Leura.

The seminar organised by the Blue Mountains Association of Cultural Heritage Organisations (BMACHO) was designed for participants to improve their knowledge and share experiences in publishing ranging from books to newsletters and promotional material.

Feedback indicated because of the quality of speakers, participants went away from the seminar with many new ideas making them more confident about self publishing as well as promoting their own organisations.

The speakers included Professor Barrie Reynolds who gave the keynote address titled 'Why Publish?' Dr Ian Jack, president of the RAHS who presented a paper titled 'Making Historical Society Newsletters and Journals More Accessible', John Leary who presented a paper titled 'A newsletter -- its editorial content and design', several individuals who had published their own books and Wendy Dollin from Blue Mountains Tourism.

What is the history of these chimneys?

These two chimneys stand on a property in Springwood Road near its intersection with Castlereagh Road, Agnes Banks.John Leary who is writing a book about chimneys took the phorograph and is having difficulty tracing the history of this property.

He would appreciate anyone who has knowledge of these buildings of which the chimneys were part making contact with him on e-mail johnnanette@optusnet.com.au

In the book he will accompany images of chimneys with the structure of which they are a part.

These images range from the stack atop Stephenson's *Rocket,* to chimneys on the unusual architectural structure of Walter Burley Griffins garbage disposal incinerators' chimney, to vents constructed to take the gases from Sydney's early sewerage systems.

In the opening paragraphs of his manuscript John writes - *There is something nostalgic about a brick or sandstone chimney standing like a sentinel on guard in a country paddock where once stood, a fine home long since destroyed by the ravages of bushfire roaring through the parched Australian landscape*.

The lone chimney and fireplace seem to stand forever, perhaps hopeful that the homestead will one day be rebuilt so that generations will again gather around the open fire to swap yarns or stand, hands clasped behind their backs, warming themselves on a cold wintry night.

Many a yarn has been told, sometimes over a glass of wine as young and old sit before the hearth gazing into the enigmatic flames.

When the forest fires and bushfires' ferocious thirst is quenched, there is nothing more poignant than blackened chimneys standing among the ruins of homes which before the fiery holocaust struck were scenes of excitement and happiness.

But continue to stand they do, while all around them lies the clutter of devastation.

GUEST SPEAKER FOR BMACHO ANNUAL GENERAL MEETING

The Blue Mountains Association of Cultural Heritage Organisations will conduct its fourth annual general meeting on Saturday, March 21 in the Blue Mountains Historical Society's meeting room at Tarella, Blaxland Road Wentworth Falls. commencing at 2pm

The meeting will be followed by a guest speaker, Dr Ian Jack, president Royal Australian Historical Society whose subject will be: "From the Hawkesbury and Nepean to the Cudgegong: the Historical and Cultural Character of BMACHO's constituency".

It is important that the incoming committee be balanced with a mix of existing members and new blood and all organisations are asked to consider nominating for any of the following positions: president, vice president, secretary, treasurer, or one of the ordinary committee members.

There is also a need to share the load which has been carried entirely by the management committee for the past three years and it is hoped that volunteers might come forward to take on responsibility for membership (both recruitment and service), overall coordination of projects, planning and coordinating workshops, represesenting BMACHO at political level, grant applications, managements of new books and bibliographies project.

THE OLDEST BUILDING ON THE BLUE MOUNTAINS

Now known as Woodford Academy, this historic property has had a multi-layered use with parts of the building dating back to the 1830s.

It is the oldest collection of buildings on the Blue Mountains, the basic structure being of sandstone.

Among its many uses, it has been The Woodman Inn, The King's Arms, Buss's Inn, a gentleman's residence, school for young gentlemen, day school for local children, guest house, boarding house and private residence.

Thomas Pembroke, some years after release from his sentence completed the first buildings on the site, circa 1834 after he was granted two acres and later a further 48 acres.

He used stone masons and timber splitters to construct a building which may have later become the schoolroom, Fairfax sitting room and the three small adjoining rooms.

Woodford Academy stands close to the place where William and Mary James ran a "sly grog" shop for people travelling through the mountains on their way to Bathurst and further inland to settle on the land.

In the 1850s it became a stopover for people on their way to the goldfields in search of their fortunes.

While Pembroke was the licensee, on October 12, 1835, Mary James was discovered hanging and her husband was charged with her murder.

The case against him was subsequently dismissed and after a second trial he was freed. Thomas Pembroke owned the inn from 1834 to 1839.

In 1839, Thomas Pembroke sold the heavily mortgaged inn to Michael Hogan of Penrith.

The name of the inn was then changed to The King's Arms and a number of other licencees ran the inn for Hogan.

The kitchen at Woodford is an excellent example of a colonial kitchen.

The lath and plaster ceiling is a typical example of colonial architecture.

William Buss acquired the inn in 1855 which then became popularly known as Buss's Inn.

In 1868 Buss's widow sold the inn to Alfred Fairfax and he in turn built further rooms onto the building and turned it into a gentleman's residence.

He added a two story building for housing his guests, a ballroom and altered the taproom by building an entrance hall between it and the sitting room.

Evidence of the use of the taproom can be seen by the markings of the shelves on the northern wall of the room as well as a distinctive cartouche which dates from that time.

In the cartouche are painted grapes, peaches and corn, the fruits of fermentation which were used in the making of spirits.

Continued page 8

Woodford Academy

Continued from page 7

The taproom would be the equivalent of today's hotel bar and the busiest part of the building.

Probably built during the mid 1850s the dairy wing contained a meat room, (used for storing and curing meat with salt which caused much of the stone walls to corrode); a servants room; a dairy where milk, cream and other perishables would have been kept as well as a loft for storing animal fodder.

When John McManamey conducted Woodford Academy from 1907 to 1925 the large room downstairs was used both as a chapel and dining room for the students. Upstairs were the dormitories where the boys slept.

The courtyard surface is stone flagging, in the centre of which is a fine convict-built, barrel-vaulted underground water tank large enough to provide a plentiful water supply for the inn.

In 1979 Woodford Academy was gifted to the National Trust of Australia (NSW) which has renovated and maintained this heritage property. In 2001 the Trust obtained an Australian Government grant of $1 million from the Centenary of Federation fund.

The property is regularly open to public viewing and from time to time the Blue Mountains Branch of the National Trust conducts special functions on the site.

COUNCILLORS BRIEFING

BMACHO's executive has had informal discussions with several Blue Mountains City Council members elected at last September's local government elections who have indicated an interest in having a briefing on heritage issues.

Council's planning manager, Andy Turner has indicated that he will attempt to include formal briefings by BMACHO during general briefings of new councillors scheduled for early in 2009.

Colonial kitchen evokes memories of hardships of 19th century cooking

The colonial kitchen at Woodford Academy evokes images of the hardships of those who had to provide the meals in mid 19th century.

The large fireplace and oven are among the finest surviving in NSW, the segmental stone arch over the fireplace being quite rare.

There is also a carved stone sink with a large plug which when removed allowed the water that had to be carried in from the well outside to be drained out through a hole in the wall.

It would appear that it has been built following the typical plan of an English kitchen circa 1850's. According to *The illustrated history of the housewife, 1650-1950, Robertson, Una A.,New York, St Martin's Press 1997, pp 93-94." "*Well-to-do households would possess a separately fired bread oven in which all the household's baking of breads, pies, cakes and other items would be done on a set day. Most were constructed of brick or stone but some were made in cast iron before the introduction of the kitchen range with its integral oven. The oven was roughly circular or oval in shape, lined with brick or stone, and the entrance was closed with a tight-fitting door of some hardened wood, replaced latterly by one of iron.

When baking day came round, once a week or once a fortnight, a fire was lit inside the oven itself and allowed to burn until all the surfaces were hot. The embers were then raked out, the oven floor swabbed with a damp mop and the door closed until the heat evened itself out, after which the first items were inserted with an oven-peel and the door fitted into place.

As the day progressed, so cooked items were taken out and other items requiring diminishing amounts of heat were put in: "I have known a very large brick oven, heated in the middle of the day with a load of wood, still warm enough at 8 or 9 o'clock in the evening to bake various delicate small cakes such as macaroons and meringues."

Although in later days this kitchen became part of the extensions known as the east wing it would originally have been a separate building.

The Clampett family visit Kurrajong

This article by Valerie Holland which appeared in The Millstone, newsletter is published with the kind permission of the Kurrajong-Comleroy Historical Society Inc. Photo: Frank Holland.

The hillbilly Clampett family of scarecrows assembled in style in the back of Bryan Wyborn's A Model Ford utility outside the CWA Hall in Kurrajong and greeted and amused visitors of the society's annual display as part of the Kurrajong Scarecrow Festival held over the weekend of Saturday, October 25 and Sunday October 26.

Anne and Les Dollin created these excellent likenesses of the former television and film family and the car was kindly loaned by Bryan Wyborn.

This year our exhibition was entitled 'Uncovering your property's heritage' and was a two day event. Frank Holland had suggested that we involve members and visitors in the process of collecting documentary evidence of early landholdings which members had donated.

Arthur Cooper displayed two large folders of fascinating images of Glossodia, formerly known as Currency Creek, and shared stories of their history, while Garth Smith projected mapping images.

Another highlight was our photographic display. Joy Shepherd delighted visitors by providing the opportunity for them to view and purchase copies of images from the society's archives.

The exhibition has provided us with positive outcomes. We were given historical information from members of the community to include in our collection and have received an invitation to visit historic properties and record related information.

Bryan Wyborn, his A Model Ford ute and the Clampett family drew much interest at the society's annual display

We extend our sincere thanks to North Richmond Community Bank branch Bendigo Bank for providing a community grant which enabled us to purchase the parish maps.

Thanks also to many willing members of the society and wider community who provided their assistance and forwarded their knowledge during the course of the exhibition.

Photos and videos of the Kurrajong Strawbillies – www.scarecrows-in-motion.com.au

Branching out: Stories from the Blue Mountains - an online gallery exhibition

The Blue Mountains World Heritage Institute (BMWHI) has brought together a group of community people to develop a mixed media exhibition for online access.

The exhibition will use the eucalypt as the catalyst for exploring people's stories of people from the Blue Mountains, reflections, and experiences for both historical and contemporary perspectives.

The exhibition will be from a cross cultural perspective combining social history, archival material and contemporary artworks – drawing on private, public and community collections. A section about bushfires will also be incorporated

The project is being undertaken between January and April 2009.

The project has the potential to enhance cultural tourism opportunities through increasing dynamic and new interpretations of the people and environment of this region.

It could also stimulate long term benefits in providing a catalyst for contemporary presentations of Indigenous and non-Indigenous natural and cultural heritage.

The project is seeking permission to photograph or access images for loan of cultural material such as: archival material, drawings, poems, photographs, sculptures, memorabilia, ceramics, textiles, paintings, prints, stories etc.

For more information or to discuss ideas and contributions contact Cheryle Yin-Lo, project co-ordinator at Blue Mountains World Heritage Institute, phone 4782 4657 or c.yin-lo@bmwhi.org.au .

Copyright of cultural material indentified will be negotiated with lenders and acknowledged .

Society's heritage grant

The Blue Mountains Historical Society has been awarded a $4000 federal Community Heritage Grant to fund a Significance Assessment.

The grant was announced at the National Library of Australia, Canberra

In 2008, grants worth $366,800 were distributed to 70 community groups and organisations from around Australia to assist in the identification and preservation of community owned but nationally significant heritage collections.

In addition, Susan Warmbath, curator from Blue Mountains Historical Society, attended a three-day intensive preservation and collection management workshop held in Canberra.

Mrs Warmbath said the grant was important in supporting the effort to preserve the society's collection records and the cottage Tarella at the grassroots level.

CONSERVATION AWARDS

The National Trust of Australia (NSW) is seeking nominations for the 2009 Energy Australia National Trust Heritage Awards.

Individuals, government departments, commercial organisations and community groups who have completed an outstanding conservation project in the last year are encouraged to enter the awards.

Trust executive director, John Neish, said, " the heritage awards are an important way the National Trust can foster and reward conservation efforts at both community and industry level".

Categories include Conservation – Built Heritage and Landscape Conservation projects, Interpretation and Presentation, Tourism and Cultural Heritage.

Energy Australia will once again offer a special Lifetime Achievement Award, to be presented to an individual for his or her outstanding contribution to heritage or environmental conservation.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 40 Hume Avenue, Wentworth Falls 2782
E-mail: bmacho.heritage@gmail.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist the cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group, Friends of Everglades, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society, Kurrajong-Comleroy Historical Society Inc, Llilianfels Blue Mountains Resort, Lithgow Mining Museum, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society (including Mt Wilson Turkish Bath House Museum), Mudgee Historical Society, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch), Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians, Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway. The following are individual members: Ms Wendy Carlson, Ray Christison, Ms Pamela Hubert, Associate Professor Ian Jack, John Leary OAM, John Low, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2008-9 is: John Leary, (president) Ian Jack (vice president), Barrie Reynolds (secretary and public officer)), Peter Stanbury, (treasurer), Florence Smart, Ray Christison, Pamela Hubert and Dick Morony.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE is BMACHO's official newsletter.

MARCH - APRIL 2009 ISSUE No. 2

TURKISH BATH IN MOUNTAINS SURPRISES MANY

Many people are surprised to find a 19th century Turkish bath on full display in the small village of Mt Wilson.

The building is listed on the Register of the National Estate as 'an unusually fine example of late Victorian boom style architecture with polychrome brickwork and Italianate details.'

Sydney architect Ernest Bonney built the Turkish bath for Richard Wynne, one of the first settlers to buy land in Mt Wilson in 1875. It is sited within the extensive Wynstay Estate, looking out across the Wollangambe wilderness to the Wollemi National Park and beyond.

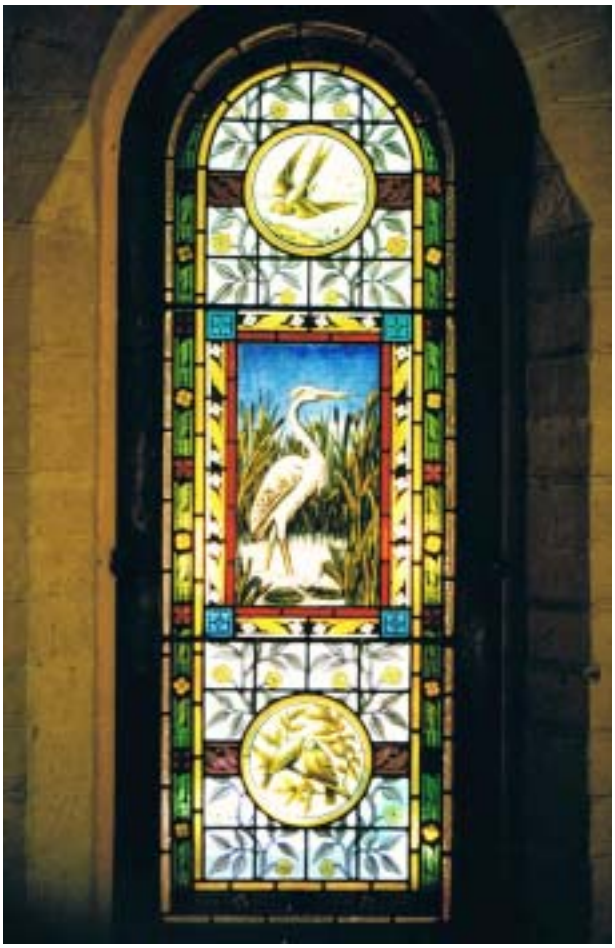
Among the building's many unusual and attractive architectural features, none is more striking than its windows.

Originally nine arched wooden framed ornate windows of stained and hand-painted glass were commissioned by Richard Wynne to be designed and made by Scottish craftsmen in England and transported by ship for installation in this building in the 1880s.

Each window is quite unique in its design, with different patterns on the ornate borders and medallions of stained glass, and each has a central image or scene making a delicate, colourful picture.

Some show large water birds hunting among the rushes, and two are finely detailed scenes of waterfalls. These last two have captions etched in the corners, reading 'Rydall, Westmoreland' and 'Falls of Muick Ballater Scotland'. (The Falls of Muick are located within Balmoral Estate.)

Seven of the windows remain in place in the Turkish bath, in excellent condition. The other two were



replaced by the construction of two doorways when the building was adapted for use as accommodation for stonemasons brought from Scotland to build the present Wynstay house in the early 1920s.

Since 1995 the Turkish bath and its precinct has been leased at a peppercorn rent to the Mt Wilson and Mt Irvine Historical Society who maintain and operate it as a museum of local history.

The museum is open to the public, staffed by volunteer guides, every weekend during April and May.

The building itself, its glorious windows and the exhibitions of local history housed within make a worthwhile destination for visitors to Mt Wilson during the autumn season. ***This article and window image have been kindly contributed by Florence Smart***

From the president's pen.....

FINDING NEW WAYS IS REALLY IMPORTANT

Finding new ways of doing things is really important particularly at a time when our heritage is facing increased environmental, management and financial challenges.

However, looking for new or different ways does not necessarily imply that the way things have been done in the past did not produce good results.

An incredible amount of voluntary work has been devoted over many years by individuals who belong to associations such as those which make up the membership of BMACHO.

Add to this, the work of heritage academics and professionals, we find there has been accumulated, a wealth of material and knowledge of our cultural heritage.

There is no doubt that these heritage enthusiasts are quite adept at interpreting our history.

But to preserve this knowledge and the heritage sites which abound in such a relatively young country as Australia, needs increased government support in the future.

Most arms of government have never been very active in conserving and protecting our cultural, built or natural heritage, particularly when it comes to funding.

In the next decade, government will no doubt blame the current financial melt down for failing to come to terms with the need for Australia's heritage to be adequately funded. If government continues to ignore our heritage then much of our history will be placed at peril for future generations.

It is appropriate at this stage of my report to pay tribute to those volunteers and members of historical societies and other heritage groups for the outstanding work they have done over many decades.

Sure some may say that things could be done better and probably they could be, in some parts, but these efforts have brought many successes.

Many of the people who provide this effort are older people and we tend to forget, that what we do, is for the love of it, not for personal gain.

I even venture to suggest that often what we achieve is far superior to what the bureaucrats in government and those in private enterprise achieve when it comes to heritage.

Although during the past three years we have achieved considerable benchmarks, there has also been some frustration experienced and towards the end of last year the committee has been looking towards future directions of the organisation.

The incoming committee will need to spend some time examining the level of service BAMCHO can provide.

At the suggestion of Barrie Reynolds, the focus of the program for 2009 will be on communication.

This will allow the association to concentrate a public awareness of the cultural heritage in the region and on the work of BMACHO.

To do this successfully the committee must rely on individuals and organisational members to provide increased input.

John Leary, OAM - President, Blue Mountains Association of Cultural Heritage Organisations

(This is an extract from the president's report to the annual general meeting held at Wentworth Falls on March 21, 2009. The whole report is available by request by e-mailing: johnnanette@optusnet.com.au or by telephoning 4758 8584)

Money for heritage - huge boost for jobs

The $60 million secured for national heritage by the Greens as part of the Commonwealth's stimulus package has been hailed as a massive boost for jobs, heritage and Australian history by The National Trust of Australia (New South Wales).

The Australian Council of National Trusts (ACNT), with input from each of the National Trusts across the country, was proactive in discussing the need for heritage investment with the Green Party before the final stimulus package was agreed on February 13.

Executive director, John Neish said, "The benefits of this injection of money will be felt across Australia as we work to conserve our heritage. The National Trust in New South Wales has opportunities to begin works across all of our properties from the Blue Mountains and Armidale to Yass, from Dubbo to Hunters Hill.

"This boost will allow us to create local jobs for local people at short notice. We will be working with the Commonwealth to discuss how some of this heritage stimulus can be diverted to employ skilled and unskilled people to conserve our historic properties."

"The Greens must be congratulated on their effort in helping us continue to keep the fabric of Australian history alive and to create employment across the regions. As an independent charity we are mostly reliant on public donation."

"A man who dares to waste one hour of time has not discovered the value of life."
..Charles Darwin

Ancient rain forest saved at Mt Tomah

For the second time in 80 years the same slice of ancient rainforest at Mt Tomah has been saved.

Perched almost 1000 metres high in the Blue Mountains, The Jungle, as it has long been known, is a survivor from 120 million years ago when Australia was part of a super continent called Gondwanaland.

State governor, Marie Bashir recently declared the luxurious forest of sassafras and coachwood trees, and the tangle of pandorea vine, open to the public – 80 years to the day since the last time it was pronounced rescued.

This time The Jungle, now officially part of the neighbouring Mount Tomah Botanic Garden, seems secure.

In the 1920s the farmer who owned the then 280-hectare forest was made an offer by a timber company wanting the trees. Concerned citizens decided to act.

They formed a company, The Jungle Limited, to buy the forest for 5000 pounds half of which would be raised through 25 - 100 pound shares. The rest would be used by using a mortgage to be repaid using revenue from a tea house.

On March 23, 1929 the governor, Sir Dudley de Chair, unveiled a plaque declaring open the Fairfax Walk (the late Sir James Fairfax owner of the *Sydney Morning Herald* had been a major backer of the project). The Fairfax Walk was a track winding from the tea room to what was dubbed "The Temple of Nature."

"It was," said Rob Smith, the head of Mt Tomah Botanic Garden, "a really generous, far sighted conservation investment."

In 1987 the 28 hectare Mount Tomah Garden opened. "When I came here 16 years ago, "Mr Smith said, "I was given instructions to keep an eye on The Jungle in case it came on the market."

Although parts were cleared long ago, for farming, The Jungle still has 10 hectares of pristine warm temperate forest, and several dry sclerophyll.

In the Jungle on the Lady Fairfax Walk: From right: Botanic Gardens Foundation chairman Clive Austin (speaking), executive director of the Botanic Gardens Trust Tim Entwisle (blocked out), donor John B. Fairfax, Governor of New South Wales Professor Marie Bashir, deputy premier and Minister for Climate Change and the Environment Carmel Tebutt MP, and donor Elizabeth Fairfax with staff of Mount Tomah Botanic Garden and members of the community. Photograph courtesy Simone Cottrell RBG.

In 2007, Sir James Fairfax's grand-nephew, John B Fairfax was asked for help. He donated $1 million. With another $250,000 from a government trust, 30 hectares from the Jungle have been bought and added to Mt Tomah.

By 2016 a canopy walkway will be added to The Jungle, allowing visitors to explore tree tops 45 metres high, and watch its wildlife, marsupial gliders and diamond pythons. (This is an extract from a report by Richard Macey published in *The Sydney Morning Herald)*

Experienced team elected at annual general meeting

At the annual general meeting tribute was paid to the many people who had worked on various tasks.

Among these projects was the heritage site review for which a pilot run had been successfully completed. The review at Mt Wilson and Mt Irvine co-ordinated by Florence Smart will lay the foundation for similar reviews across the Blue Mountains local government area once council completes the processing of the 1000 or more site records.

The calendar of events has been ably co-ordinated by Dick Morony while Valerie Holland is co-ordinating the collation of valuable basic administrative financial information on members societies.

The management committee for 2009-10 was announced at the annual general meeting and is: president - John Leary OAM, vice president – Associate Professor Ian Jack, secretary – Professor Barrie Reynolds, committee members – Jean Arthur (Mt Victoria Historical Society), Ray Christison (Lithgow Mining Museum), Lyn Fowler (National Trust of Australia – Lithgow Branch), Doug Knowles (Glenbrook Historical Society), Kathie McMahon (Kurrajong-Comleroy Historical Society), Dick Morony (Springwood Historical Society) and Dr Peter Stanbury, OAM (individual member).

Museums - Teachers of experience

Museums are a means of expression, not only to the community they serve but also to the individuals that serve in them. Volunteering encourages us to communicate and involves us with places other than home, and people other than family. Museums are a doorway to knowledge about past ways of life. The volunteer experience teaches much about the way people interact . An understanding of other people's needs and drives is one of the factors in a museum's success or stagnation.

Cultural differences make volunteering in museums overseas an interesting challenge and a strong learning experience. Organisations such as Australian Business Volunteers that welcome and assign volunteers stress that the aim of the game is skills exchange and capacity building.

For the volunteer concerned, however, the real gain is the experience of having to work with others to obtain results in a given time. Every nerve is attuned to interpreting phrases and customs to break through misunderstandings and obstacles, especially if the language is not one's own.

This attentive attitude can be a refreshing experience when one has known one's co-workers for months or years and can guess their forthcoming comment; or when one has been used to a permanent job, or an unpaid one in a local museum, in which deadlines are elastic.

The results achieved overseas can often be applied to to one's own museums after returning home.

The examples that follow are experiences learned while volunteering in Peru, Cambodia and Egypt that may be useful in Australia.

How do visitors feel as they approach a museum?

Any strange building, even a small one, can be forebidding to a stranger. Visitors need a plan of the building so they can understand the size and layout of the museum.

Fig 1

Fig 2

This can be on paper or better still on a welcoming board as they approach the museum (Fig 1).

Visitors looking at unfamilar objects (for example, many representations of Buddha or *quipu* – coloured knots in strings that represent Inca accounts, Fig 2) need a who's who of the range of gods, or a simple explanation of the Inca's accounting methods (Fig 3), so readers can appreciate and begin to understand what they are seeing (which is different from just seeing).

There are many objects - a danger to themselves?

It's a bit like going to the shops and buying luscious fruit, but, seduced by the colour and the unusual size, one buys too much. The bags rub against each other as you walk to the car, move around in the boot and one bag falls as you walk into the kitchen. When unwrapped only a few pieces look like they did in the greengrocer's display and are worth putting in the fruit bowl.

The moral is never crowd objects, especially in storage but also in displays.

Fig 3

Fig 4

Fig 5

Fig 6

Continued page 5

Museums Teachers of experience

Continued from page 4

An object on display needs space around it to allow the visitor's eye to concentrate without distraction.

Crowded objects in storage are a disaster, damaging each other, attracting pests or rust or tumbling out on the floor when you are trying to locate a specimen.

Figs 4 – 6 show before and after the reorganisation of the storage of silk hip wrappers (Cambodian skirts) in the National Museum of Cambodia.

Why use complex solutions when simple ones work?

In this technological world we are often unnecessarily tempted into complexity and expense. The walls of Egyptian tombs were decorated to commemorate the achievements of the deceased.

Some of the Theban tombs near Luxor were re-used by early Christians as cave dwellings 1400 - 1600 years ago. The smoke from their fires blackened the wall decorations, covering them with carbon.

Archaeologists were reluctant to excavate these tombs because of the difficulty of removing the carbon without damaging the underlying paintings until it was realised that the best treatment was to repeatedly apply tissues damped with 99.5% distilled water caused the carbon to be transferred to the tissue, leaving the Egyptian paintings intact.

Fig 7 shows how effectively this simple treatment works. The experienced museum volunteer keeps the KISS principle in mind (**K**eep **I**t **S**imple **S**tupid).

Fig. 7

Fig 1 Whether it is an external notice board informing visitors of the layout of the museum or a sign indicating the whereabouts of the toilets the message should attract attention. (Sign at McCrossins Mill Museum, Uralla, NSW.)

Fig 2 Ancient quipu in the Centro Malliqui Museum at Leymebamba in Northern Peru.

Fig 3 Explanation of quipu: the size of the knots indicate numbers and the colours of the objects being counted.

Fig 4 An excessive number (>60)of silk hip wrappers individually wrapped in plastic bags all stored in a large plastic bag. Storage of objects of dissimilar materials in the one space is not recommended because each material usually requires specific, disimilar, storage conditions.

Fig 5 Silk costumes individually wrapped in washed cotton allows air circulation but deters insect attack. Note the specimens are piled no more than three high.

Fig 6 shows damaged silk resulting excess pressure and micro-climates in crowded storage: pressure damage to the fibres along a fold and erosion caused by the changes in the dye in a humid micro-climate.

Fig 7 Volunteer working in the New Kingdom Tomb 147 at Luxor. The simplest, but painstaking, treatment proved to be the most effective for the removal of carbon baked onto the original tomb decoration (difference between foreground and background).

Contributed by Dr Peter Stanbury, OAM a committee member of BMACHO and board member UMAC (International Committee for University Museums)

"At some future period, not very distant as measured by centuries, the civilized races of man will almost certainly exterminate, and replace the savage races throughout the world." ...*Charles Darwin*

MUSEUM DISASTER PLANNING

Natural disasters are very much in all our minds at the present time.

Naturally, we are conscious of what could happen to our own homes and possessions and will have given thought to the precautions we need to take.

But what of the museums and collections for which a number of us are responsible? The risks are mainly fire, flood and theft. What are we doing to prevent or at least minimise these risks?

Besides the obvious precaution of ensuring our buildings are secure, there are a few simple steps that can be taken. These need not be costly nor too time-consuming.

If curators are interested in exploring these in a seminar, please contact Barrie Reynolds at <barrie.r@bigpond.net.au> or on 4757 4727.

KURRAJONG NOTCHES UP 200 YEARS

This piece is an extract from Kurrajong-Comleroy Historical Sociey's newsletter, *The Millstone.*

President Frank Holland writes: This year is very significant for the Kurrajong district as it was 200 years ago in 1809 that the first land grants, close to the site of the current village were made. Of course, it is not strictly accurate as no doubt people were living in the area prior to those land grants. In fact settlement closer to the Hawkesbury had occurred much earlier.

An interesting point about the land grants is that they were made by Johnston and Patterson after the deposition of Governor Bligh and as a result were deemed to be illegal.

However, Macquarie did reinstate the grants after his arrival in 1810.

From the Hawkesbury/Nepean to the Cudgegong: the Historical and Heritage Character of BMACHO's Constituency

The text of an illustrated presentation by Dr Ian Jack, president of the Royal Australian Historical Society to the annual general meeting of BMACHO on March 21, 2009.

From the very beginning of European settlement, the Blue Mountains have offered both a challenge and an opportunity. Within months of the First Fleet anchoring in 1788, the colonists were aware that a major barrier lay to the west, just beyond the Hawkesbury-Nepean River. For these first Europeans, the Blue Mountains constituted the west wall of the big detention centre on the Cumberland Plain. The building of the first road across the Mountains in 1814-5 by William Cox's convicts and the unlocking of inland Australia which was its corollary had symbolism as well as practicality. The western road was a necessary step in the transition from penal settlement to free colony. And it was the necessary step towards making this country the biggest sheep-paddock in the English-speaking world. The Mountains held out promise: otherwise Blaxland, Lawson and Wentworth would not have bothered to cross them in 1813. Otherwise Governor Macquarie would not have recalled George William Evans from Tasmania to mark out an appropriate dray-road. But the Mountains still seemed to be primarily an obstacle after Macquarie opened up the Bathurst Plains to settlement.

To see the mountains as a barrier was, however, a very European construct. For Aboriginal people for millennia before 1788 the Blue Mountains, though a self-evident demarcator, were not so much a divider as a meeting-place. As I remarked on a similar occasion two years ago, the very name the Great Dividing Range is profoundly revealing of an exclusively European outlook.

For the folk who had been enjoying the area for many millennia, the Wiradjuri, the Gundungurra and the Darug people, the mountains were not a divide at all, but a natural point of contact. The mountains lay on the periphery of several indigenous language groups and trade routes inevitably led across the plateau. The result was that there was widespread Aboriginal knowledge of how to attain the table-top from the plains and valleys on all sides, north, south, east and west, and there was detailed information about how to cross the climactic landscape of the table-top without abruptly terminating one's journey. For everyone on the mountains, indigenous or European, travel in the region was at bottom a 'negotiation with the perpendicular', in Martin Thomas's memorable phrase.[1]

But for the indigenous people it was country like any other, and the mountains with their abysses had their fair share of Dreamtime stories of ancestral creation. To the Europeans the Mountains were for a long time an infernal nuisance full of 'impassable chasms'[2], with the plateau an arid and unattractive area to hurry across to get to the other side. It was only gradually in the 19th century that the mystique of the sublime gathered force and, as Kate Hartig felicitously observed: the aesthetic appraisal of the mountain landscape was cloaked in a romantic image and was expressed by sentiments of exaltation and delight.[3]

Albert Fullwood, 'Ladies on a Pathway Looking across the Blue Mountains' 1888. H. Speirs, *Landscape Art and the Blue Mountains,* 1981, 23.

Albert Fullwood's painting of 1888 with well-dressed ladies admiring the wilderness which was not a wilderness, showing a little daring but not too much, helps to sum up the ways in which artists had been influencing popular European perceptions over the previous half century.

It is during this central sixty years of the nineteenth century, from the 1820s to the 1880s, that the themes were established which give some homogeneity to the heritage of the expansive area of the BMACHO constituency. This Association of Cultural Organisations now has among its members the Mudgee Historical Society, the Cudgegong Museums Group, the Kurrajong-Comleroy Historical Society and four of Lithgow's outstanding cultural institutions, the Regional

Library, the State Mine Museum, the Small Arms Factory Museum and the local branch of the National Trust. But BMACHO started life within the local government area called the City of the Blue Mountains, and enjoyed from the outset a good relationship with the City Council and its officers, for which we are all most grateful. Institutional membership of the umbrella association was at first restricted to organisations within the city boundaries.

I have had a personally productive relationship with the city administration for more than a decade, but I have always jibbed a little at the term city, though I understand the aspirations of local politicians to outdo a mere shire. The City of the Blue Mountains is, however, the most absurd of names for a straggle of small settlements planted within a World Heritage environment. Those of us who were inaugural members of BMACHO saw from the outset that bureaucratic boundaries did not coincide with historical reality nor with self-evident geographical imperatives.

The lines of communication are not only basic heritage items, but they also by definition break the artificial bounds of local government arrangements. Bells Line of Road, starting from North Richmond, is in Hawkesbury City until after it passes through Bilpin and Berambing, but it is in Blue Mountains City from Mount Tomah to the Darling Causeway and when it descends into Hartley Vale becomes part of Lithgow City's assets.

Of all the heritage assets of this region, the roads, and there are six significant ones, cannot possibly be claimed by one local government area alone.

Coxs Road, the foundation heritage item of the mountains for Europeans, did not stop at Mount York, but went on down into Hartley Valley and on to the Bathurst Plains.

When Thomas Mitchell, the great Surveyor-General, designed and constructed his new western road in the 1830s, he gave scant attention

Auguste Earle, c 1826 View west from Mount York.

to the traverse of the plateau of the mountains: that was the dull and easy part. Evans had already found all the right ridges. What really turned Mitchell on was the challenge of getting up to the plateau from the east and getting off again on the west. As a result, Mitchell's road from Emu Plains to Bathurst has two memorable features, one at each end.

On the way up from the Cumberland Plain there is the elegant stone-arched bridge constructed by David Lennox:

This beautifully proportioned bridge is halfway up Mitchells Pass, and that pass is wholly within the modern City of the Blue Mountains, but Mitchell's comparable bravura achievement at the other side of the plateau, Victoria Pass, is different.

In 1932 the Royal Australian Historical Society put up a plaque to celebrate the centenary of Victoria Pass.This plaque and the larger monument of which it is a part are within the city of the Blue Mountains.

About a third of the way down the escarpment on this route, there was a frightening gap in the descending ridge, which can be seen best from Coxs Road along Mount York.

To bridge this gap, Mitchell's convicts had to build a causeway, with high retaining walls and buttresses reminiscent of Devines Hill on the Great North Road.

There was a nasty accident on the causeway in 1835, captured in a painting, 'Accident on Victoria Pass causeway, 1835' by the surveyor Govett, whose name is enshrined in Govetts Leap: part of the buttressing and parapet had collapsed soon after construction of the causeway in 1832. Mitchell was apoplectic but the problem was not finally fixed until 1838, so what we see today is not what was put up in 1832.

The scene of all this drama is not part of the Blue Mountains City. Almost all of the causeway is in the City of Lithgow. The lower part of Victoria Pass, including the causeway, is in one jurisdiction (Lithgow), while the upper part, including the monuments, is in another (Blue Mountains).

All this is slightly messy, though not as inconvenient as Mitchell's Old Northern Road, where, as it goes towards Wisemans Ferry, one side of the road is controlled by Baulkham Hills Shire and the other side by Hawkesbury City, which does not make for good planning. At least no one, yet, has tried to build a house or develop acreage along Victoria Pass, and, in any case, the road itself is not under the jurisdiction of either Lithgow or Blue Mountains, but is under the Roads and Traffic Authority, which may or may not be a good thing (though the Hartley Highway Action Group, not yet affiliated with BMACHO, has no doubt at all). *Continued page 8*

Continued from page 7

I am emphasising the heritage of the roads because they are fundamental. And they all exist not because anyone in Sydney wanted desperately to get to the Blue Mountains, but because every grazier on the Cumberland Plains wanted to get beyond the Mountains. For the first fifty years of the road system, up to the late 1860s, the trip across the mountain plateau was merely something to be endured. Louisa Meredith summed up a general feeling in 1839 that the Mountain scenery was 'wild, monotonous, … dreary, desolate grandeur,… a world of desolation'.[1]

So the descent into Hartley Valley seemed to many early travellers as arrival in 'the promised land … after the wilderness of the Blue Mountains', as Judge Barron Field described it in 1822.[2]

And until the railway in the mid 1860s changed so much on the plateau, the traveller was better served with hostelries once he or she reached the other side. Right at the bottom of Victoria Pass, for example, was the most elegant of Georgian inns, built in 1839, and called, of course, the Victoria Inn.

And if Victoria Inn was not open – it was a private house for a while in mid-century -then there was the Glasgow Arms and its handsome successor, the Royal Hotel, in Old Bowenfels. Both were built in 1838 by a stonemason, one of Mitchell's road inspectors, a fellow Scot, Alexander Binning, but only the Royal survives: it was originally Binning's private house.

The Glasgow Arms, Binning's inn just across the highway from the Royal, has been comprehensively demolished and replaced by a petrol station, another sort of utility. The Glasgow Arms had been praised by Colonel Mundy in 1846 as 'decidedly the best on the line, with active and obliging people, good plain cookery and clean beds'.[1]

And a string of accommodation houses operated along the roads to Bathurst and Mudgee, at small service centres like Rydal, Capertee or Ilford or just beside a convenient creek.

The provision of reliable and more than reliable accommodation on the mountains had to wait for the coming of the railway and with the train came the city tourist and the wealthy seeking cool summer retreats. Before 1865 there were more residents in Hartley Vale than in the entire Blue Mountains City area. After 1870, because of reliable, cheap transport, there was a growing transient population of holiday-makers and honeymooners in the villages which sprang up along the train line from Springwood to Mount Victoria. So the phenomenon of the guesthouse appeared and the architectural character of Katoomba and Leura in particular was indelibly stamped with these Victorian and Edwardian establishments, a fair number still in business today. They range from the modest federation house available for lease, like Cheltondale, 314 Katoomba Street, Katoomba, through respectable guesthouses, like Rubystone, also in Katoomba to fairly grand hotels like the first Coffee Palace on the mountains, opened in Leura in 1892, and ambitiously rechristened The Ritz in 1914. And then, of course, there was the really grand hotel like the Hydro Majestic at Medlow Bath and the Carrington, which still dominates the skyline of Katoomba today.

The other determining feature of the way in which the mountain plateau developed quite separately from the plains beyond was the hill-station or the country retreat, where well-to-do dwellers on the Cumberland Plain could seek out a cooler refuge in the heat of summer. Mount Wilson is, of course the supreme example, but Kurrajong Heights, at the other end of Bells Line of Road was also something of a hill-station, and there were private retreats scattered right along the western railway from Glenbrook to Mount Victoria.

All this happened quite late in Victoria's reign up on the mountains. Relatively little heritage had been generated on the plateau by Europeans in the half century from 1820 to 1870. On the other hand, the purpose of building the successive roads, Cox's, Lawson's, Bell's, Lockyer's, Mitchell's, was to populate the plains beyond with men, women and children, heavily outnumbered by cattle and especially by sheep. So while the mountain top slept, new service centres grew up among the new farming properties during that initial fifty years: Little Hartley, with two or three inns; Hartley with a Mortimer Lewis court-house in honey-coloured stone;Old Bowenfels with

Rosedale today. Photograph Ian Jack, 1997.

Continued from page 8
the earliest National School over the Mountains in 1851.There were Rydal, Capertee, Ilford and Rylstone while, of course, by 1870 Mudgee was a thriving country town, with municipal status in 1860, before the railway over the Mountains was even begun.The graziers modified the landscape over the Mountains long before comparable changes were made to the mountain plateau environment. Despite the distances to the coastal markets over indifferent roads, Hartley, the Bathurst Plain and all the expanse of country out along the Macquarie and Cudgegong Rivers were well settled between 1820 and the 1860s.

There is a wonderful pastoral heritage in the inner Central West, reflecting this first wave of expansion by European animals and European people beyond the Mountains. The earliest surviving homestead over the Mountains was built by John Grant in Kanimbla valley in 1822.Collits' Inn in Hartley Vale gets all the popular interest, but Grant's intensely private farmhouse, which cannot even be glimpsed from any public vantage point, is older and just as significant. Moyne Farm has not only a striking early homestead, but it has outbuildings, archaeological sites and a private cemetery as well, set in a lovely rolling landscape, cleared of most trees for 180 years.

On the Cudgegong, north-west of Mudgee, there are the two Rouse properties, Guntewang and Biraganbil. Although the two-storey homestead at Biraganbil has gone, the Rouses' farm-town of the 1840s survives and the outbuildings are really more important than the demolished homestead.Biraganbil farm-town is certainly far rarer than a decent homestead. I took this photograph in 1985 and I don't know what has changed over the last twenty-four years. But when I was there, the whole square was intact: a wooden store on the front left; in the middle distance shops and huts; in the central foreground the wooden stables and to the left beside the trees the fine brick stables.

The other side of Mudgee is Cox country and George Cox, son of the road-builder, built up his family's holdings, and made a statement with his new homestead of Burrundulla in 1864.The Central West also contains suites of more modest country buildings. There is a great variety and there is no time to do them justice. Just a few quick examples. The original Suttor homestead at Triambil was built of red-box slabs in 1833.

The wooden house was replaced by a stone homestead in 1851, but the old one was retained. A century ago, the slabs were rearranged horizontally instead of vertically, so it gives a misleading impression of early building techniques.

Slab huts do, however, survive intact with the slabs still vertical. They were built conservatively by their owners, using traditional methods, right into the twentieth century. But to find these one usually needs to go to more marginal land.

My favourite slab hut is the one in Kanimbla Valley built by Peter O'Reilly, and immortalized in his son's book, named, like the hut, *Cullenbenbong***.** The beautiful thing about Cullenbenbong today is that the interior is still intact, with tools still hanging on the slab walls and the fireplace waiting for kindling.It is this continuity of purpose and preservation of character which makes some of these special places extra-special.

I have also an extra-specially soft spot for Billy Maxwell's hut in Kedumba Valley. I like this hut because it was built as recently as 1925, but reflects all the techniques learnt by Billy's father, William Maxwell, in the 1850s and we have a wonderful photographic record of the 1890s farm close by. William Maxwell's subsistence holding in the remotest corner of Kedumba is no less complex or extensive than the farm-town at Biraganbil but it represents a different social world.

As well as slab buildings, there are exceptional collections of rammed-earth houses and barns in the area, particularly but not exclusively in Kanimbla and Megalong Valleys. They make an interesting subject for a talk in themselves, but perhaps some other time.

Pastoralism is, of course, only part of the heritage of BMACHO's interest area.

The impact of the train on the land over the Mountains after 1870 enabled access to coastal markets for all heavy goods produced in the west. And as well as sheep and cattle and their by-products, wool and tanned hides, there were minerals over the Mountains: most notoriously gold, of course, but also copper, silver, lead, marble, oil-shale and coal. None of these was exploited in the area which is now the City of the Blue Mountains, except for some coal and oil-shale on both sides of Narrow Neck at Katoomba, as we all know from the enlightened tourism activities of the Hammon family at the Scenic Railway. But I have to omit the rich and vital heritage of the diverse forms of mineral extraction, processing and manufacture just over the mountains.

HERITAGE WEBSITE LAUNCHED

A new Internet website www.bluemountains.heritage for the Blue Mountains Association of Cultural Heritage Organisations has been launched.

The committee towards the end of last year decided to develop a website and sought quotations for this work.

Thanks to a not insignificant amount of work by Barrie Reynolds and a local resident, Peter Hughes who has demonstrated the IT expertise required for this project, a website is now online.

There is still more work to be done for this to be completed with some member organisations not yet having provided information about their activities and objectives.

The home page is a heritage photograph of Katoomba's main street.

BMACHO affiliated organisations will have direct links to their own website while there will be membership and contact details.

There is a page for a brief history of the Blue Mountains region, west to Lithgow and north to the Hawkesbury area.

An icon will open up past editions of **HERITAGE**, BMACHO's newsletter while the events calendar will also be easily accessible

Character of BMACHO's Constituency

Continued from page 9

That exclusion zone, I'm afraid, includes the industrial towns first of Lithgow, then Portland and finally Kandos, with all their rich panoply of workers' housing as well as their industrial complexes and their industrial archaeology. That is another and different talk, very close to my heart.

The relationship of the heritage of the Blue Mountains plateau to the heritage of the land beyond is intense. The two areas have intertwining and inseparable histories.

But the themes are different or develop differently. The pastoralism of the central west in the Georgian and Victorian period has no parallel on the mountain plateau, but was nonetheless dependent for its existence and its success on the roads across the mountains.

The industrial and extractive activity in the west after the railway came in the 1870s and 1880s has virtually no equivalent on the plateau in this later period.

But the railway had a greater influence on the occupancy and exploitation of the mountains than the earlier roads had had, for it brought tourism and all its attendant services.

And tourism in its turn used the roads in the twentieth century on the mountains alongside the continuing use of the train.

The charabancs went on down Berghofers Pass in the 1920s or down Victoria Pass thereafter and brought tourism to the central west: there is a charming photograph of another charabanc parked outside Hartley court-house in the 1930s. Everywhere one looks, one notices that the mountains are enmeshed with the west, and especially with the inner central west. The heritage of the mountain plateau in one way stands alone. The heritage of the adjacent local government areas to the west, Lithgow, Rylstone, Greater Bathurst, Mudgee, Oberon, bears more similarities one to the other than it does to the mountain plateau. But the heritage of the central west is a reflection of the communication system across the mountains from 1813 onwards. The road and the railway had different impacts on the two areas, so there are different aspects to the heritage strengths of the constituent parts of BMACHO. Common interest, common needs and common threats to heritage give our mini-federation a *raison d'être*. We are stronger together than we can be separately and we have all much to learn from each other. May BMACHO flourish.

WALKS AND TALKS

Glenbrook Historical Society conducts an interesting program of "Walks n Talks" each month.

A copy of the 2009 program is available by contacting Doug Knowles on 4751 3276 (let the phone ring – he's probably in the garden). Doug will provide details for meeting place, time and grade of walk.

The April 22 walk takes in the Glenbrook Lakes precinct, rediscovering early campsites and railway works.

Unique Darwiniana in the Blue Mountains

2009 is the bicentenary of Charles Darwin's birth and the 150th anniversary of the publication of *The Origin of the Species*. And for many years tourists have walked along the banks of Jamison Creek at Wentworth Falls (Weatherboard in Darwin's time) to view the stupendous views of the Falls and Jamison Valley. That story will be retold many times this year in lectures and articles across the world.

Darwin is known mainly for his industrious note taking, his books and for his ill health. He was fond of hydropathic baths to allieviate the latter – a curious relevance for Medlow Bath and other institutions of the Blue Mountains health industry.

It is also known that he married into the Wedgwood family – marrying Emma in 1839. It is perhaps less well known that they had 10 children, 6 boys and 4 girls.

The fifth child, George Howard, was born in 1845. George, like his brothers and indeed, his grandfathers, had scientific enquiry in his blood. He excelled at school, winning a scholarship to Cambridge, obtained a first class degree, became a lawyer for a short time before turning his remarkable brain to astromony. Here's another coincidence – what is 2009 the international year of…….?

But to go back to the time when George was maybe six to ten….. His mother wrote to Catherine, Charles Darwin's younger sister, enclosing a letter from George written in pictogram style (see Fig. 1), a form that has delighted children over the ages and adults such as Lewis Carroll (Charles Lutwidge Dodgson). Can you read it? Here is a start:

Eye (I) ham (am) going to the Crystal Palace (?) next moon

(Mon) day hand (and) the fountains (rain) s r (are) going 2 (to) flowing liquid (pour)…….

Later on he says the baby is vomiting and we have sent for the doctor to give medicine to him……..you can work out the rest yourself!

On the reverse of this original letter there is a note signed E(mma) D(arwin) :

My dear Catherine

Etty or I will write soon

Yours

E. D.'

Etty is Henrietta Emma , who was born two years before George. Etty married Richard Buckley Litchfield in 1871. Richard wrote a biography of Thomas Wedgwood, who was a relatively unknown pioneer of photography. Etty, however, not only wrote a memoir of her husband, but also a privately printed two volume collection of her mother's letters published by Cambridge University Press in 1904.

This and another rare item of Darwiniana held in the Blue Mountains will be discussed in the next issue of *Heritage*

Contributed by Dr Peter Stanbury, OAM a committee member of BMACHO and board member UMAC (International Committee for University Museums)

Zig Zag to launch Footplate Experience project

The Zig Zag Railway is planning to launch a Footplate Experience program at the beginning of 2010.

The Footplate Experience would see you driving and firing a steam train for the day.

You will get to experience lighting up the engine and preparing the engine over the pit, before departing up the steep grades that are the Great Zig Zag Railway.

The cost for this once in a lifetime experience will be approximately $1,000.

The Railway still has a great deal of regulatory and operational work to complete before the Footplate Experience Program can begin.

If you would like to keep informed of the progress of the Footplate Experience to www.zigzagrailway.com.au to register your e-mail address.

Open everyday except ChristmasDay the Zig Zag is a full size, narrow gauge tourist railway located at Clarence, 10 km east of Lithgow.

Built in the 1860s, the line was constructed to transport people and produce from the western plains of NSW to Sydney. It was replaced in 1910 by a 10 tunnel deviation.

The trains, track and rolling stock are maintained and operated by the Zig Zag Railway Co-op Ltd, a voluntary, "not for profit' co-operative.

Mt Wilson in autumn

To raise funds for the activities of the Mt Wilson and Mt Irvine Historical Society, a market weekend will be held at the Mt Wilson Village Hall during the ANZAC weekend.

The activity will take place between 10am and 4pm on Saturday and Sunday, April 25 and 26.

Books, plants, household items, toys, clothes, china, handmade items, glassware, pottery, old wares, new wares, jams and cakes will be on sale.

Devonshire teas, hot food, cakes and drinks will be available.

For more information, telephone 4756 2063.

'When the Trumpet Calls'-

A new exhibition 'When the Trumpet Calls'- Norman Lindsay and WW1: at the National Trust's Norman Lindsay Gallery at Faulconbridge, open from March to June, 2009 is attracting considerable interest.

Original posters, handbills and recruiting material with a selection of reproductions of cartoons from 'The Bulletin' are displayed.

Norman Lindsay's cartoons and recruiting material of World War 1 were powerful images to encourage enlistment and vilify the enemy.

Scandals, crime and corruption

History Week 2009 which will run from September 5-13 will be a wild journey through the dark shadows of our past. Discover the scandals, crime and corruption that have shocked us over time.

Registrations for History Week 2009 are now open and will close April 9, 2009. Free online registration of local events can be made by e-mail to office@historycouncilnsw.org.au

History Week was initiated by the HistoryCouncil in 1997 to showcase the rich, diverse history being produced by organisations and individuals across the state. With over 200 events across NSW, History Week is about celebrating the best in community and professional history, highlighting its role in our cultural life and inviting people to get involved.

During History Week, community groups, local councils, libraries, archives, museums, universities, cultural institutions, professional and amateur historians across NSW open their doors to present the latest in today's historical research - fascinating stories, artifacts and experiences about both our past and ourselves today.

School Holiday Family Entertainment -

The Acting Factory will be presenting 'Little Red Riding Hood' in the April school holidays at Norman Lindsay Gallery.

Seven performances of The Acting Factory's 'Hansel and Gretel' were held in the grounds of the Norman Lindsay Gallery during January.

Altogether just over 1,000 people attended the shows, which were aimed at families and many enjoyed picnicking under the trees after the show.

Call Norman Lindsay Gallery on 02 4751 1067 for details of performance

HERITAGE SITE MONITORING PROJECT

The Blue Mountains City Council (BMCC) has responsibility for maintaining a register of heritage listed sites within the region. In their *Cultural Strategy 2006 – 2016* council stated their intention to develop a monitoring program for heritage listed sites.

At BMACHO's request, in 2007 Mt Wilson and Mt Irvine Historical Society agreed to undertake a pilot project to develop and trial a mechanism for recording changes to local heritage listed sites as they happen.

It is hoped a simple ongoing record of changes will be useful when a major review is undertaken every 10 years or so to update information on both the BMCC register and the State Heritage Register.

A simple database was established, listing the 44 local sites, using the council's ID number, the name and location of each site and with space for recording any changes.

As a baseline volunteers from Mt Wilson and Mt Irvine Historical Society were able to use the draft report from Dr Ian Jack's review of heritage sites in 2004.

It has become a relatively simple matter to record changes which have been observed. Volunteers have used lay terms, simply noting what has happened and what year. The pilot phase of this project is completed and an ongoing record is being maintained.

In due course when council's information on heritage listed sites is available on line BMACHO will negotiate the transfer of current information onto their database and that of the NSW Heritage Branch so that all lists are up-to-date.

"Once the BMCC list of heritage sites becomes available on line, we will happily share what we have done should other groups be interested in a similar project," said Florence Smart, secretary of Mt Wilson and Mt Irvine Society Inc.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 40 Hume Avenue, Wentworth Falls 2782
E-mail: bmacho.heritage@gmail.com
Website: www.bluemountains.heritage

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are

:i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist the cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group, Friends of Everglades, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society, Kurrajong-Comleroy Historical Society Inc, Llilianfels Blue Mountains Resort, Lithgow Mining Museum, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society (including Turkish Bath Museum), Mudgee Historical Society, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch), Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians, Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway. The following are individual members: Ms Wendy Carlson, Ray Christison, Ms Pamela Hubert, Associate Professor Ian Jack, John Leary OAM, John Low, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2009-10 is: John Leary, (president) Ian Jack (vice president), Barrie Reynolds (secretary), Jean Arthur, Ray Christison, Lyn Fowler, Doug Knowles, Kathie McMahon and Dick Morony (public officer), Peter Stanbury.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE is BMACHO's official newsletter.

CONVICTS BUILT LENNOX BRIDGE

The earliest arched stone bridge on mainland Australia

by John Low

Work began on Surveyor-General Thomas Mitchell's "Pass at Emu" in August 1832. About half way up the proposed route it was found necessary to take the road across a creek, a plan that required the bridging of a 30 foot deep gully with a span of 20 feet.

Mitchell, who considered well-designed bridges a sign of civilised society, seized the opportunity to experiment with a bridge designed to stand the test of time, unlike the flimsy wooden structures that characterised the colony's roads at the time. For this he needed the services of someone who posssessed both the necessary technical knowledge and the experience of building stone bridges, a difficult request in a land where the art of bridge construction was virtually unknown.

The right man did, however, appear in the person of David Lennox, a recently arrived master mason of 20 years experience who had worked on a number of major bridges in Britain. Legend has it that Mitchell discovered him working as a day labourer constructing a stone wall in Macquarie Street, Sydney.

By November 1832, much of the stone for the bridge had been quarried and cut and, obtaining lime from Windsor, Lennox began the laying process. He selected his work party personally and carefully from the larger road gang working on the Pass.

The party consisted of about 20 convicts, an overseer, a constable and an armed sentry and worked at the site from about 7am until 4pm, when it returned to the stockade at Emu Plains.

Despite the absconding of one convict, which held up the sawing of timber for the arch centering, Lennox's relationship with his convict workers appears to have been a good one. Assistant Surveyor John Abbott described Lennox to Mitchell as "indefatigable in instructing them how to work". Indeed, so effective was he that Governor Bourke let it be known that he would try to prevent the services of these newly skilled workers from being lost to the Department of Roads & Bridges after the Lapstone job was finished.

Lennox's confidence in his men was apparent later when, in May 1833, he was beginning to transfer operations to his next job. He petitioned the Governor to remit the remainder of the iron gang sentences of 8 convicts he wished to take with him. Although some of the sentences were, he said, "for heavy crimes, it appears to me to have been more the effect of a bad system at that time in regard to prisoners than any particular depravity of the prisoners themselves".

The convicts in question were: William Brady; John Carsons; Robert Hyams; John Johnson; Patrick Malowney (or Maloney); Thomas Nelson; James Randall; Daniel Williams (an "American black").

The sentences of Brady, Carsons, Malowney and Nelson were remitted while Randall and Williams were promised remittal of their sentences after a further 6 months good behaviour.

From the president's pen.....

THE BUILDER WHO MADE AUSTRALIA

The Australia Day 2009 address by the Governor Marie Bashir, nominating Lachlan Macquarie as the founder of modern Australia, has boosted plans to recognise Macquarie next year, the bicentenary of his swearing in.

Macquarie arrived in a primitive, near starving, largely drunken and divided colony and turned it into a community with bright hopes for the future and the making of a nation's economy.

Macquarie was sworn in on January 1, 1810.

Arthur Phillip had left office dispirited and exhausted and William Bligh was overthrown by the military.

Macquarie was also to leave unhappily. Yet, Professor Bashir said, "He stands today as one of the greatest of Australian governors, a true pioneer of the nation, unmatched for vision, magnanimity, compassion and zest for accomplishment."

He was many believe the founder of modern Australia. Certainly, he was the first governor to refer officially to Australia by that name, in 1817, endorsing the name used by Matthew Flinders.

He instituted a period of unprecedented progress. In many ways he set the pattern and defined the priorities of enlightened public administration in the modern era.

He built schools, hospitals, roads on a scale not seen before. He instituted our system of public and private education, introduced currency, the nation's first bank, and public health care.

Macquarie encouraged the establishment of the country's first independent newspaper and libraries.

Before he left in 1821, NSW had its first court houses and first magistrates. There were roads to Parramatta, the Blue Mountains and further west.

There were five planned towns including Richmond, Windsor Castlereagh, Pitt Town, Wilberforce and Windsor. Bathurst was largely his creation as was Liverpool while Campbelltown was named after his wife whose maiden name was Campbell of Airds (the Scottish district now a suburb of Campbelltown).

Today's legacy from Macquarie are the public works and buildings, carried out with the assistance of Francis Greemway, a former convict appointed civil architect

His treatment of convicts, free settlers and the Aboriginals was more than humane. He encouraged well-behaved convicts into the wider community through tickets of leave.

Macquarie encouraged exploration to expand the pastoral land available and so improved the agricultural production and livestock numbers.

In her address Governor Bashir asked, "Can we not see in Macquarie's example of tolerance and humanity the beginning of the great Australian tradition of the 'fair go' play that many regard as our defining characteristic as a people?"

Macquarie, a Scot of energy and vision, ruled from 1810 until 1821 restoring order and bringing stability to a colony whose interests he did much to promote.

It is appropriate that the many activities being planned throughout NSW and the region have the support of the heritage sector and community at large.

John Leary, OAM - President, Blue Mountains Association of Cultural Heritage Organisation

CONVICT OVERSEES FINISHED OFF BRIDGE

Continued from page 1

When Lennox moved his headquarters to the site of his next assignment - construction of a stone bridge over Prospect Creek on the Great Southern Road near Liverpool - he left the completion of the Lapstone Bridge in the hands of his young overseer, George Neilson, to whom he paid periodic visits until the work was finished. Lennox reported the bridge completed in early July 1833.

John Low is the former local history librarian, Blue Mountains City Council and an individual member of BMACHO. Photograph of Lennox Bridge - April 2009 by John Leary, OAM.

Federal funding for cultural centre

The Australian Government will provide $1.98 million towards the construction of the Blue Mountains Cultural Centre in Katoomba, Federal Member for Macquarie has announced.

Mr Debus said the construction of the Blue Mountains Cultural Centre will create an iconic new attraction with regional and national significance.

The project involves construction and fit-out of cultural facilities including the City Art Gallery, World Heritage Interpretive Centre and a viewing platform.

The Blue Mountains City Council, NSW Government and the local community have invested 10 years of planning and consultation to make this happen, said Mr Debus

"I love fools' experiments. I am always making them"...*Charles Darwin*

“Beneath the Southern Cross” - A significant exhibition at the State Mine

A partnership between the City of Greater Lithgow Mining Museum Inc. and Unions NSW has provided the people of Lithgow and surrounding districts with a unique opportunity to experience historic artefacts related to the Trade Union movement in New South Wales.

An exhibition of union banners, badges and other artefacts has been installed at the State Mine Museum, State Mine Gully Road, Lithgow.

This exhibition will be in place until the end of October 2009.

It includes large banners used in street parades that form part of the Sydney Trades Hall collection.

Many of these items have not been accessible to the public before as there has been no space large enough to exhibit them.

It is appropriate that the former State Mine Bath House is the main venue for this exhibition.

This was a place in which the employees of the State Mine gathered to change for work and to shower at the end of their shifts.

A companion exhibition of Lithgow’s union memorabilia was on display at the Lithgow Regional Library from April 4 to May 5, 2009.

The Sydney Trades Hall collection exhibition will be open to the public during museum opening hours between April 4 and October 31 2009.

The museum is open from 10:00am to 4:00pm on Saturday and Sunday, and school and public holidays.

Access to the exhibition is included in the museum’s standard entry fee of $5 per adult, $3 concession, $2 per child or $12 per family.

Booked tours can be arranged at any time by contacting the museum on 6353 1513 or through the website: www.statemine.org.au

Pictured above are two of the trade union banners on display. The banners often made of silk, depicted the tools and processes of the trade. Below are banners on display at the State Mine Museum.

TARELLA, AN 1890s COTTAGE PRESERVED AS AN EXAMPLE OF A BYGONE AGE

Tarella was built in 1890 by John McLaughlin, a Sydney solicitor, on a 50 acre grant of land awarded to him for his service in the Volunteer Reserve.

The house continued to be owned by the McLaughlin family until the estate was left to the Blue Mountains Historical Society on the death of the last member of the family, Beryl McLaughlin the Society's benefactor.

The cottage stands in its original state, and is set up in the period of the early 1900s.

John McLaughlin

John McLaughlin was born in 1850 in Mulligar, Westmeath, Ireland and was one of four boys to Anne and Daniel McLaughlin. Daniel was a tenant farmer and took his family to Australia in 1852 for a better life. They settled in Millers Forest in the Hunter District where four further children were born.

Daniel was insistent on a good education and so John was educated first in Maitland and later at Lyndhurst College in Sydney. At Lyndhurst College he was awarded a prize for French and was school captain. The rest of the family moved to Rockhampton in Queensland after the death of Daniel in 1866.

After college John was articled to the legal firm of WC Curtis and remained there until 1869. On completion of his articles, John became managing clerk for the leading law firm, Allen, Bowden and Allen. He later went into partnership with Frederick Gannon under the name of Gannon and McLaughlin.

During this period John joined the Volunteer Force. After five years' service in this Force every officer and non commissioned officer was entitled to a free grant of 50 acres of land. John was awarded his grant of 50 acres in 1870 and after a surveying trip to the Blue Mountains in 1879, led by GM Pitt a licensed surveyor, John chose 50 acres at Wentworth Falls on a site he considered to be '*the most beautiful in the mountains'.*

Similar to other land owners he did not build until later as there was a proposal to build a large township at Wentworth Falls and land owners hoped they would be able to sell at a later date with great advantage to themselves. The township was later built at Katoomba.

In1880 John entered the NSW parliament as the Member for Upper Hunter and in 1882 he married Ada Amanda Moore. In this year he also subdivided his land holding into 8 plots and sold one.

They had four children, two boys and two girls, the last girl Beryl was born in 1888, who, on her death in 1988 two months short of her 100th birthday, became the benefactor of the Blue Mountains Historical Society.

Over the years John mortgaged his land presumably to finance the schooling of his children all of whom went to private Catholic schools.

John built Tarella around 1890 as a holiday cottage for the family to have relief from the summer heat and to escape the smells that pervaded the air in Sydney.

The cottage stands on Cox's original road on a stretch constructed under the watch of Lt Thomas Hobby which Cox observed on his return, *'at the 29th mile is a very handsome long reach, quite strait, which I call, from the layer of it out, Hobby's Reach'.* (Hobby's Reach is the name used for the Research Centre of the Blue Mountains Historical Society).

The cottage is constructed of weatherboards under a pitched roof with the parents' bedroom, parlour, dining room and spare bedroom down stairs and two small bedrooms upstairs.

The kitchen was a separate building constructed of corrugated iron in which the caretaker and his wife lived, caring for chickens, house cow and fruit trees during the family's absence. Over the years, until 1920, there were alterations which joined the original kitchen to the house

The water supply for the house came from a 60 foot deep storage well that still exists on the property.

Tarella cottage as it now stands

VALLEY HEIGHTS LOCOMOTIVE DEPOT MUSEUM GETS HERITAGE GRANT

The Valley Heights Locomotive Depot Heritage Museum has received a grant of $20,600 from the NSW Heritage Office to repair the windows at the rear of the Roundhouse.

The depot, completed in 1913, was built to service steam locomotives which provided extra power to enable the trains to climb the steep rise from Valley Heights to Katoomba.

The depot was closed in 1989 and vacated by the then State Rail Authority in 1993. The museum now looks after the site.

Most of the glass panes were broken before the window sashes were removed in the mid 90s because of termite damage to the surrounding jambs and sills.

The grant has enabled the museum to purchase the glass panes, timber and associated incidentals. The museum has to provide $87,000 in labour.

The 95-year old sashes require many hours of patient repair work and cleaning before the panes are fitted and the sashes installed.This volunteer work is being carried out by the Museum's Retirees' Group — these fellows meet for one week every month (the week after the second Saturday), starting at 8am and finishing at 3pm.

This group is a big 'Men's Shed' where the members perform a valuable community service in a good humoured atmosphere.

Members work on tasks that suit their abilities and some come for the full week while others are able to be there for a day or two.

The museum is always looking for extra volunteers to help in the varied track work, machine operation, shops assistants).

For further information visit the website at http://infobluemountains.net.au/locodepot/ or phone 4751 4638.

TARELLA COTTAGE

Continued from page 4

The family lived in a very imposing house called Yanko in Evans Street, Waverley and on John's death in 1918, Ada, his wife and the two daughters came to live permanently at Tarella. In 1922, Ada died and her elder daughter, Ida married.

Beryl, who was a qualified architect, designed several houses for Ida and her husband, later moving to live in a flat attached to one of these houses.

Tarella was then rented out to visitors who used the Wentworth Falls Golf and Recreation Club opposite Tarella for their meals. The club house was burnt down in the 1957 bushfires.

Beryl and her sister Ida, who was now widowed, were very early members of the Blue Mountains Historical Society formed in 1946 by the Blue Mountains City Council. In 1955 when the society was looking for premises Beryl transferred Tarella to the council.

This arrangement soon proved unsatisfactory and an agreement was made with the council to have the property transferred back to the sisters.

In 1968 Beryl had built at her own expense a building on the property to house a museum for the society. Beryl and Ida continued to live at Tarella for the rest of their independent lives, Ida dying in 1980 and Beryl in 1988.

Before her death, Beryl transferred the cottage and the remaining 3.5 acres of land to the society. To these sisters and especially the benevolence of Beryl, the society owes a great debt of gratitude. The society has been able to preserve an 1890s cottage, an example of a bygone age, for future generations.

EVERGLADES AT LEURA

Modernism, Art Deco and pristine wilderness

By Angela le Sueur

Photography: Christopher Shain

The National Trust-owned property, Everglades, at Leura is one of Australia's foremost cold climate gardens and arboreta. It is also an expression of a special partnership between the wealthy businessman, Henri Van de Velde, and the Danish horticulturalist and landscape designer, Paul Sorensen, whose legendary skills created many gardens of note in Leura and Katoomba.

The creation of Everglades was as much a feat of engineering as a triumph of horticulture. There had been two successive houses, an orchard and a developed garden at Everglades before Van de Velde bought the property from Mrs Stonier.

It was extremely steep and rocky with thin, sandy soil – but Van de Velde saw the potential, and Sorensen knew how to achieve it. Steep slopes were levelled by the creation of a series of flat terraces which were underpinned by massive drystone walls hand hewn from rocks on the site.

Planting beds were hand dug to a depth of 600 to 900mm and filled with soil transported from the grotto pool and other excavations, enriched with humus. The Great Depression was in full swing and there was no shortage of labour; men were glad to be able to work.

Modern Movement and Art Deco influences with a backdrop of pristine wilderness combine to create the magic of the site.

Massive drystone walls underpin the terraces

The studio terrace with its rectilinear planes and cubist squash racquet courts building has been cited as one of the most significant pieces of Australian Modernist garden designs.

At the opposite end however, the eye is drawn to a brick edged 'window' which in spring is purple with cascading wisteria, framing the blue-green and russet hues of the Jamison Valley and escarpments beyond.

Leading off the studio terrace is the garden theatre, carefully concealed behind trees and shrubs so that it becomes a special surprise. This was a technique much favoured by Sorensen, who concealed and revealed vistas and other features to layer the experience of the garden.

At Everglades the special character of each terrace 'room' is enjoyed on its own terms, as are the spectacular vistas beyond.

Flowers were originally planted as bright swathes of colour, but Sorensen also planned for the future – a time when his signature trees and shrubs would grow to overshadow the first mass planting beds.

Brightly coloured bulbs are still a feature of the upper terraces but, as you move down the slope, the emphasis changes – to rhododendrons and azaleas – and on the lower perimeters, to native plants. *Continued page 7*

Everglades House

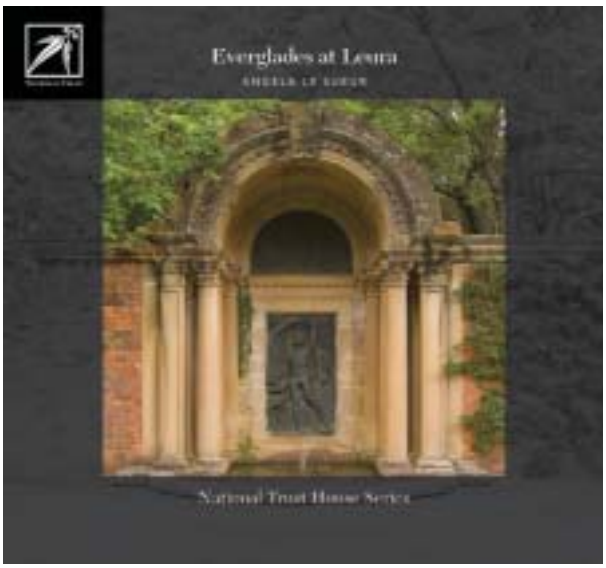
The magic of Everglades

Many of the statues and artefacts which Van de Velde collected to embellish the gardens on his visits to Europe have long gone, however 'The Wrestler', a reproduction of a Roman bronze unearthed at Herculaneum, survives at the top of the steps from the Cherry to the Agapanthus Terrace. Whimsical wrought iron panels in the courtyard tell the story of a bad dog – one of Van de Velde's Sealyhams - and his punishment for chasing an Everglades peacock.

Although it looks hard-edged by today's standards, in the 1930s the house was the epitome of comfort and style with its large windows, sophisticated heating and Hollywood-style bathrooms.

A mix of Functionalism, Modernism, Mediterranean and Art Deco styles, it was a talking point of its time, featured extensively in the April 1938 issue of *The Australian Home Beautiful* and photographed by the legendary Harold Cazneaux.

Today, seventy years on, Everglades is a highlight of any visit to the Blue Mountains; a place for people of all ages to gather and enjoy its special events – or to wander and contemplate alone.



Everglades at Leura by Angela le Sueur. The cover features the garden theatre with its arch, rescued from the demolished London Chartered Bank of Australia in Sydney

For more information on Everglades, purchase the National Trust House Series book, *Everglades at Leura* from the property or from the National Trust direct;

SCENIC WORLD'S STAR AWARD

Scenic World has become the first business in the Blue Mountains to be accredited as a STAR workplace.

The award recognises Scenic World's commitment to engaging with its employees to build a sustainable business with high levels of satisfaction.

"We want to share with out visitors what makes Scenic World a special place and to do that we need a team of dedicated people who are continually striving to improve what we do," said human resources manager, Geoff Stodart in accepting the award.

Scenic World is a member of BMACHO.

"It is not the strongest of the species that survives, nor the most intelligent that survives.

It is the one that is most adaptable to change."..... *Charles Darwin.*

DISPLAY SCREENS AVAILABLE TO BMACHO MEMBERS

Blue Mountains City Council has up to five sets of portable screens available for use by organisations such as members of BMACHO.

One set is the museum set and there are four others which council's environmental team has in store.

They are available for use by historical associations and museums in BMCC area (subject to availability).

A number of organisations have already borrowed them for displays.

The panels can checked out on the Toucan website: http://www.toucan.com.au/panels.html

Dimensions are 1800mm high overall made up of 8 panels of approximately 770 x 900 mm.

Each panel will hold a poster of approximately 600 x 800mm. Colour: neutral blues.

Items can be attached to panels by Velcro or pins.

The screens come in a carry bag which fits fairly easily into a car boot or back seat and can be easily set up on site.

Display screens can be booked by contacting Christine Jones on 4780 5609 or cjones@bmcc.nsw.gov.au or Janne Yardy on 4780 5448 jyardy@bmcc.nsw.gov.au

There is no charge for use but they need to be booked in advance and picked up and returned in good condition to the Council HQ building in Katoomba.

WINTER SOLSTICE AT EVERGLADES

Everglades will be holding a spooky story telling for children of all ages on Sunday, June 21.

Those who visit Everglades for the winter solstice are encouraged to dress up in the spookiest outfits.

For further information telephone Nick on 4784 1938 or everglades@bigpond.com

FAMILY HISTORY GROUP FINDS WORLD WAR 1 HERO BURIED AT LAWSON

The article published on this page is an edited version of an interesting article written by Blue Mountains Family History (BMFHS) member, Suzanne Voytas. The discovery came about following work by Suzanne and another member Lyn Tocher who discovered a neglected grave in Lawson Cemetery (pictured below) while working on a BMFHS project

Formed in 1986 BMFHS is a true family history society with interests back to our roots - in England, Scotland, Ireland, Germany, France, in fact anywhere in the world, how and where our ancestral families lived and worked and where they travelled. BMFHS has a close association with the local studies librarians of BMCC - but the main focus is facilitating the family history research needs of the local residents, not local studies.

Members of Blue Mountains Family History Society (BMHS) are helping the descendants of a World War 1 hero to piece together the history of their ancestor buried at Lawson.

In June 2008, Lynne Tocher and Suzanne Voytas were recording and checking information on headstones at the Lawson Cemetery as part of the project to update the Blue Mountains Family History Society's transcripts for all Blue Mountains cemeteries.

During this work they came across a very neglected grave. The headstone stated the person was an ANZAC. The researchers felt that if this claim was correct, then the person should be entitled to the AIF insignia on his headstone.

Firstly they needed to prove the person named was indeed an Anzac, and so began the search for the story of Henry James Hunter, who died at Linden in November 16, 1923.

Using the National Archives of Australia's website, a copy of his enlistment papers, which included his medical and promotions history, was obtained. Together with other details from the AIF and AWM websites it was revealed that: Henry James Hunter voluntarily enlisted September 24, 1914 and stated he was 43 years 9 months. His enlistment number was 1066 assigned to the 1st Battalion, C Company.

He left Australia on board Transport A19 *Afric* on October, 18 1914. Maybe he didn't need basic training as he was a member of the Victorian Rifle Club!

His AIF file revealed he was at Gallipoli on April 25, 1915, was evacuated from Lone Pine on August 16, 1915, and subsequently evacuated to hospital in England. He rejoined his unit in December 1915.

In May 1916 he was serving with the 1st Anzac Entrenching Battalion seeing service at the Somme and battlefields near Ypres.

During his service Hunter was promoted a number of times in the field. In July 1915 he was promoted to corporal, with various other promotions until December 1917 when he was promoted to T/RSM (Temporary Regimental Sergeant Major). This reverted back to corporal on his discharge.

On November 6, 1917 he was recommended for the Meritorious Service Medal, the citation read – *For devotion to duty and disregard of personal safety during intermittent shelling of Bapaume for two months and energetic meritorious service in the organization of a) Brickfields area. b) Bapaume area. c) Blequin area. d) Reinforcement Camps area. His conduct and bearing in A.I.F. since September 1914 has set a fine example.* Signed by E M Waters, 2nd Col, CO 1st Anzac Entrenchment Battalion.

In February 1918 Hunter applied for a discharge for personal reasons.

He was married and had two children – Eileen and Keith. His wife and children were living at Neutral Bay, NSW together with his elderly mother.

He was discharged on June 6, 1918

There is no living memory of Henry James Hunter being discussed within the family.

Having found his history and obtaining the family's permission to proceed, Lyn Tocher and Susanne Voyta thought it would only be a matter of applying to the appropriate department and the insignia would be granted. Not so.

The guidelines for receiving the AIF insignia state that the serviceman must have died from war related causes. Henry James' death certificate states the cause of death was *Cardiac Valvular Degeneration, Atheroma and Aneurysmal Dilatation of the Aorta.*

At present there is no clear cut evidence to link his cause of death to his war service and the medical problems he suffered while on active duty even though he died within 5 years of being discharged.

However, an application has been lodged with Department of Veteran Affairs (DVA), stating the reasons for the request on behalf of the family.

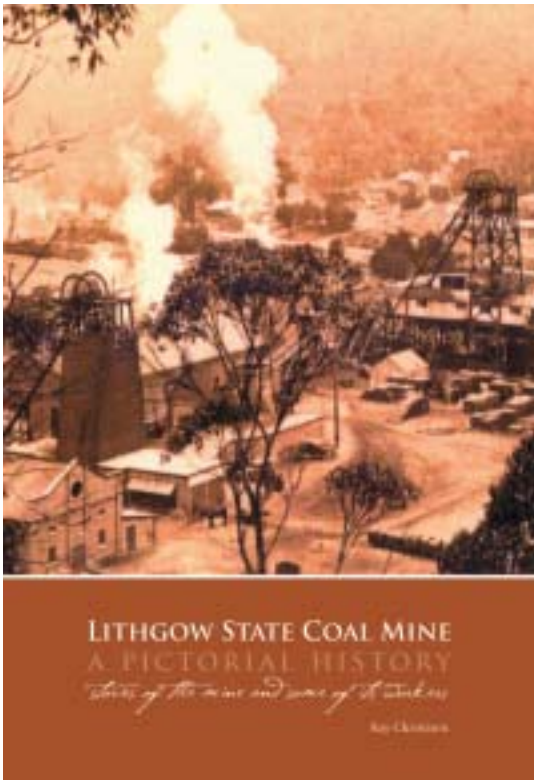
Lithgow State Coal Mine a pictorial history.....



The book *Lithgow State Coal Mine a pictorial history* was launched at the Lithgow State Mine Heritage Park on Wednesday 6 May 2009 by Neville Castle, Mayor of Lithgow.

In launching the book Neville Castle noted that the Lithgow State Coal Mine operated from 1916 to 1964.

It was the largest coal mine on the Western Coalfield and the first coal mine established by the New South Wales Government. At the height of production in 1930 the mine employed 734 men.

This book was written to provide an overview of the story of the Lithgow State Coal Mine and to support interpretation at the State Mine Museum.

It draws on records held by the museum and memories of former workers to weave stories of the place.

When speaking at the launch the author Ray Christison stated that his intention in writing it was to create a record that was engaging and accessible to the widest possible audience.

He said that: 'As much as possible I have endeavoured to represent the story of the mine through the stories of individuals who worked there."

Ray also recognized the many people who had contributed to the development of the book, including museum volunteers, staff of the Lithgow Library Learning Centre and the many former miners who had contributed photographs and stories. He also gave special thanks to Dick Austen and Joe Butta who most generously sponsored the first print run.

The book was printed by Industrial Printing in Lithgow.

It is available through the Lithgow State Mine Heritage Park at a price of $29.95 per copy.
Resellers may purchase orders of five books or more at the discounted price of $21.00. Order forms can be downloaded from www.statemine.org.au

'.....stories of individuals who worked there.'

HERO BURIED AT LAWSON

Continued from page 8

The one hope is that, as he applied for a war service pension just before he died and if his wife did receive a war widow's pension, it means that his medical condition was recognised as war related.

The Springwood RSL sub-branch president, Mr Joe Elkusck, has indicated that if the insignia is granted, they will be prepared to rededicate the grave, with the Last Post and the Ode being recited with the association's chaplain.

As for the reasons he died in Linden, away from his immediate family and no oral history of him through the generations will possible remain a mystery but the family have decided to try and piece the puzzle together.

However, it is not hard to imagine the horrors of war that the men were subjected to, so returning to civilian life would be difficult.

Many would have physical wounds but just as many would have been broken psychologically.

BLUE MOUNTAINS VINTAGE FASHION COLLECTION WITHOUT EQUAL

One of the more unusual cultural heritage collections in the Blue Mountains comprises 3500 items of Victorian and Edwardian clothing and accessories, known as the Darnell Collection.

In 2003, Blue Mountains resident, Charlotte Smith was bequeathed a vast vintage clothing collection belonging to her godmother, Doris Darnell, a Quaker from Pennsylvania, USA.

For over seventy years, Mrs. Darnell accepted family heirlooms given to her 'in love and in trust' by people wanting to ensure the garment and their story lived on. Her collection grew along with her international reputation as a collector and preserver of fine garments and accessories.

Initially, Charlotte had no immediate plans about what she would do with the collection, but upon opening the 70 boxes she realised she had inherited not only a unique collection recording 200 years of social history, but she also had a fashion resource unequalled in Australia.

"I opened the boxes of exquisite treasures and held in my hands the precious clothing worn by Victorian and Edwardian ladies, Flappers of the 1920s and ladies of the 1950s cocktail set.

Cotton day dress 1865

"There were dresses of silk, wool, printed cotton, linen, velvet and lace by famous and influential designers who helped revolutionise fashion to adapt to the changing role of women in society. Designers like Lucile, Madeline Vionnet, Gabrielle Chanel, Christian Dior, Jean Muir and James Galanos," recalls Charlotte.

She found cocktail and debutante dresses, wedding gowns, swimsuits, hats, handbags, shoes and gloves, undergarments including rare cage crinolines and bustles, outerwear and exquisite fans among an array of wardrobe necessities. Most intriguingly, many of the pieces are well documented with marvellous light hearted anecdotes about the people who wore them and the customs and foibles of their time. (HarperCollins Australia is producing a book about the collection and these wonderful stories. The book will be published in November this year.

In the past five years, The Darnell Collection has grown significantly. It now totals over 5000 items. Added to the long list of designers recently acquired are Hardy Amies, Norman Hartnell, Zandra Rhodes and Vivienne Westwood from England, Christobel Balenciaga from Spain, Ceil Chapman from America and Gianni Versace from Italy. The collection represents 27 different countries, given by 287 donors. A diverse selection of garments and accessories from Australia is an important addition to the collection.

Over the past five years, The Darnell Collection has been displayed at Woodford Academy, the QVB in Sydney, at Bendigo Regional Gallery in Victoria, at the Sydney Royal Easter Show and in Lithgow, Bathurst, Cowra, Armidale, Parkes and Orange. It has also been featured twice on ABC television's program Collectors.

Early last year, ESMOD Australia, a French fashion school founded in Paris in 1841, and The Darnell Collection joined forces. ESMOD is now one of only two schools in the world with their own fashion archive and their own museum. (F.I.T. in NYC is the other). Students, teachers, researchers and historians can access the collection privately while the general public is welcome to view changing exhibitions in The Fashion Gallery, located in the lobby. Five exhibitions a year will showcase the glamour and upheaval of fashion over the past 200 years.

Unique Darwiniana in the Blue Mountains

This is the second article in a series marking the bicentennary of Charles Darwin's birth.

Charles Darwin published many books; most people can name one; most biologists can name five or more. The majority of his books were published by John Murray and are instantly recognisable by their green blind stamped boards and gilt decorated spines, to say nothing of their dark, almost black endpapers.

One first edition, however, had covers of plum coloured cloth, an innovation never repeated, but one which sends bibliophiles into raptures. (*Fertilisation of Orchids*, May 15, 1862).

An interesting piece of Darwiniana, scarcely known, is his contribution to *A Manual of Scientific Enquiry, prepared for the Use of Her Majesty's Navy and adapted for Travellers in General,* published by John Murray in 1849 in appropriate sea-green cloth with a gilt anchor on the outer cover (Fig 1).

Contributors included, as well as Darwin: Herschel (Meteorology), Owen (Zoology) and Hooker (Botany) . Herschel was the editor as well as contributor; Owen wrote *Fossil Mammalia* in *The Zoology of the Voyage of HMS Beagle* that Darwin edited in 1838. Hooker later wrote *On the Flora of Australia* in *The Botany of the Antarctic Voyage of HM Discovery Ships Erebus & Terror* which was published in that fateful year 1859.

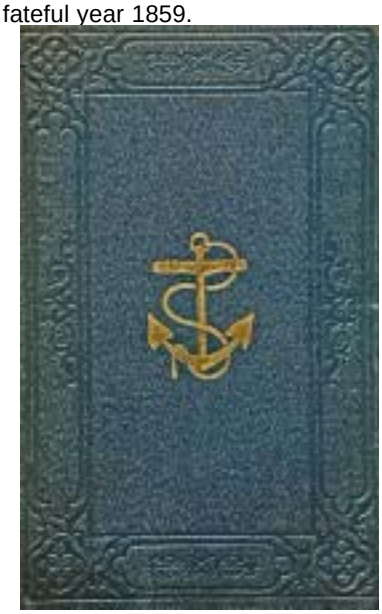

Fig.1

1859 was, of course, the year of publication of *On the Origin of Species* which was far outsold by Samuel Smiles' *Self Help*, that appeared in the same year. 'How to' books were popular even then!

The first issue of the first edition of *A Manual of Scientific Enquiry* has a transposition of Darwin's text caused by the typesetter misplacing some of Darwin's hand written text. Corrected in later issues, the article gives practical advice: number specimens and put a dot after the number if it is 6 or 9 to avoid confusion; collect suites of specimens rather than individual pieces to help elucidate strata; label separately every fossil, wrap it in paper and mark its location on the outside and make accurate sectional diagrams. Darwin ends by writing that by following the advice the reader…. 'will, even if without any previous knowledge, in a short time infallibly become a good geologist, and as certainly will he enjoy the high satisfaction of contributing to the perfection of the history of this wonderful world'.

Charles Darwin's family were writers. Erasmus Darwin, Charles's grandfather had written of Sydney in his *The Botanic Garden (see next column).*

He was inspired by Josiah Wedgwood's medallion that was made from the clay of Sydney Harbour collected by Sir Joseph Banks.

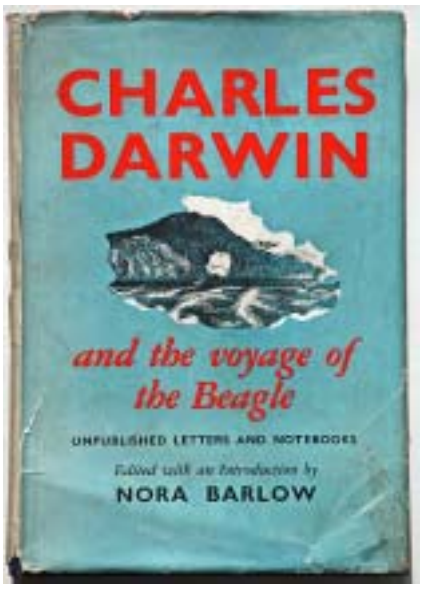

Fig.2

VISIT OF HOPE TO SIDNEY COVE, NEAR BOTANY BAY

Where Sydney Cove her lucid bosom swells,
And with wide arms the indignant storm repels;
High on a rock amid the troubled air
Hope stood sublime, and waved her golden hair;
Calm'd with her rosy smile the tossing deep,
And with sweet accents charm'd the windss to sleep;
To each wild plain she stretch'd her snowy hand,
High-waving wood, and sea-encircled strand.
"Hear me," she cried, "ye rising realms record
Time's opening scenes, and Truth's prophetic word.
There shall broad streets their stately walls extend,
The circus widen, and the crescent bend;
There, ray'd from cities o'er the cultured land,
Shall bright canals, and solid roads expand.
There the proud arch, colossus-like, bestride
Yon glittering streams, and bound the chafing tide;
Embellish'd villas crown the landscape-scene,
Farms wave with gold, and orchards blush between.
There shall tall spires, and dome-capt towers ascend,
And piers and quays their massy structures blend;
While with each breeze approaching vessels glide,
And northern treasures dance on every tide!"
Then ceased the nymph-tumultuous echoes roar,
And Joy's loud voice was heard from shore to shore
Her graceful steps descending press'd the plain,
And Peace, and Art, and Labour, join'd her train.

Editor's note: Spelling and punctuation as written and published in the 19th century.

Fig. 3

DARWINIANA

Continued from page 11

Coincidentally, Charles' wife, Emma was Wedgwood's granddaughter.

Charles' second son, Francis, assembled five volumes of his father's life and letters.

They were published in 1887-1903. Charles' granddaughter, Nora, wrote an account of the voyage of the *Beagle* (Fig 2). It was published in 1945 and includes letters and some material hitherto unpublished from Darwin's notebooks.

Charles' fourth daughter, Henrietta Emma, wrote a two volume account of her mother which reveals much about the Darwin's day-to-day life. It also includes letters from Charles to his wife. It was printed by Cambridge Press though privately published in blue cloth in 1904 in a run of 250 copies. A few copies were elaborately bound for presentation (Fig 4).

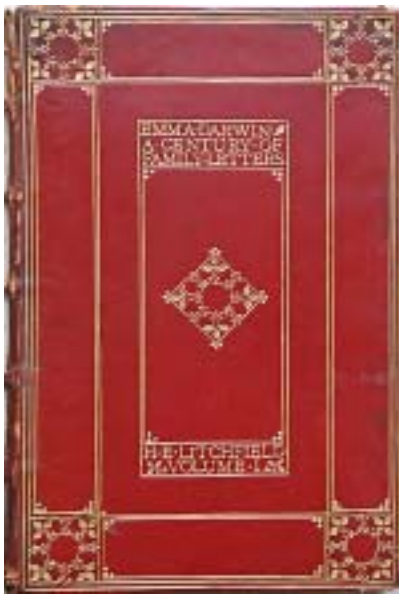

Fig.4

Mountains police sent to quell Maori uprising

The first police to be stationed in the Blue Mountains were detachments of the Military Mounted Police Force.

This force, of a semi-military character, was created by Governor Brisbane in 1825 and operated until 1850 for the purposes of apprehending marauding convicts who had escaped to the bush as well as protecting travellers on the roads that radiated from Sydney to the widely scattered settlements.

It was made up of soldiers seconded from the British regiments stationed in New South Wales who served usually only for a few years until their units ended their tour of duty. While the force was controlled by the civil authorities the police remained under military discipline.

In 1846, as a result of Maori uprisings in New Zealand, Earl Grey, Secretary of State for the Colonies issued a directive sending "the whole of the disposable force [in NSW] to Wellington [New Zealand]."

He observed that the colony "may be regarded as being perfectly safe, for the present at least, from any attack from a Foreign enemy; there are no native tribes capable of engaging in serious hostilities with Colonists; and the convict establishment is now reduced so low, while so great an increase has taken place in the numbers of the free population, that there is no longer the necessity which some years ago existed for maintaining a considerable Military Force to guard against the risk of an attempt to rise on the part of the convicts".

He added: "Under these circumstances, there is no part of Her Majesty's Dominions in which there is less occasion for a large body of troops.

Accordingly, I find that, with the exception of those at Sydney, the Troops now serving in New South Wales are broken up into small detachments, and obviously performing duties more analogous to those of a Police Corps than of a part of Her Majesty's regular Army; but these are duties which the heavy demands upon the services of British Army do not admit that it should be called upon any longer to undertake.

Her Majesty's confidential servants will consider it their duty to take care that Her Naval and Military Forces shall afford efficient protection from the attacks of any Foreign enemy to so important a part of Her Dominions as New South Wales; but for the maintenance of internal order and tranquillity, it is only reasonable that the Colonists should themselves be called upon to provide by the formation of an adequate force of Police, or if necessary, of Militia….."[Despatch dated 24 November 1846 vide Historical Records of Australia Vol. XXV p.264]

By this time the only military presence between the Nepean and Cox's Rivers was the detachment at the Blackheath Stockade.

The consequences of Grey's decision was to divert the colonial government's lingering reliance on the military as an arm of law enforcement to enhancing the several civilian police forces already serving the colony.

It was not until 1870 that the British Army units left Australia -- a protracted departure despite Grey's observations, due no doubt to the fears of Russian invasion during the Crimean War of 1854-56 and the requirements from the ongoing Maori Wars through the 1860s.

This article is an extract from Peter Chinn's "The Thin Red and Blue Lines," a history of the military and police presence in the Blue Mountains 1814-2005, published by the Springwood Historical Society Inc.

Peter Chinn is currently the society's president.

Australia's first industrial site

There may be no archaeological relics such as a crumbling brick smoke stack, rusting industrial machinery or even remnants of toxic waste left in the ground, but the river bank on the estuary, a short distance upstream from where the holiday township of Cooktown, Queensland now stands, must surely be the place of Australia's first industrial site.

Captain James Cook as painted by John Webber in 1782

It was here that Cook after running aground on a coral reef, beached the *Endeavour* to repair the damage to his ship.

Professor Geoffrey Blainey in his book *Sea of Dangers* writing about James Cook's voyage along the east coast of Australia in 1770 suggests, 'it was here arose a ship-building yard, along with a timber workshop and blacksmith's forge.'

The *Endeavour* 'was moved to the chosen position by the use of ropes and by sheer physical strength of the men working the capstan.'

'Near the mangrove bushes she lay, her bow on the bank and her stern sloping well into the water.

'Melted iron was converted into iron nails, of which thousands and thousands were needed for repairs. Sailmakers were active, their work spread out in front of them.

'The carpenters were soon at work replacing the damaged timbers, and it was a favourable time to make repairs to the rigging. Seamen were scraping the ship's bottom to remove the marine life that had clung to it.'

The first industrial activity in Australiia by Europeans occurred between June 17 and August 3, 1770. It was during this period that Australia's most well known animal name, the kangaru (kangaroo) was interpreted by Joseph Banks.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 40 Hume Avenue, Wentworth Falls 2782
E-mail: bmacho.heritage@gmail.com
Website: www.bluemountains.heritage

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are

:i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group, Friends of Everglades, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society (including Turkish Bath Museum), Mudgee Historical Society, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch), Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians, Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway. The following are individual members: Ms Wendy Carlson, Ray Christison, Ms Pamela Hubert, Associate Professor Ian Jack, John Leary OAM, John Low, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2009-10 is: John Leary, (president) Ian Jack (vice president), Barrie Reynolds (secretary), Jean Arthur, Ray Christison, Lyn Fowler, Doug Knowles, Kathie McMahon and Dick Morony (public officer), Peter Stanbury.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE is BMACHO's official newsletter.

JULY - AUGUST 2009 ISSUE No. 4

HIGHWAY HERITAGE PRESERVED

As motorists well know, oil companies and their petrol prices are popular whipping posts but in the past some have been conscious of our heritage.

The restored Pointsman's Cottage at Glenbrook today, probably owes its preservation to the Australian oil company Ampol.

The Pointsman's Cottage at Glenbrook was built in 1871 and became the station master's house in 1879.

It was built to house the pointsman who changed the points to the siding on the railway's single line.

Thomas Hall was the first stationmaster. He immigrated to Australia on March 29, 1856 at the age of nine with his parents as sponsored immigrants aboard the ship Ben Nevis. He married Katherine (Katie) Davidson. They had a family of ten children.

Although New South Wales' first train line reached Parramatta in 1855 crossing the Blue Mountains proved an engineering challenge.

The outhouses of the 19th century were built to last.

The first railway line across the Blue Mountains was built between 1863 and 1867. Glenbrook was the first railway station on the line.

The engineer, John Whitton, wanted to excavate a tunnel but limited funds meant he had to design a zig zag at Lapstone with a sandstone viaduct over Knapsack Gully.

The line opened to Weatherboard (Wentworth Falls) on July 13, 1867.

After the 1913 deviation of the rail line was complete the stationmaster continued to live in the house.

In 1926 the Main Roads Board built the Western Highway on the old railway bed. In 1927 Charlie Forrester bought the Pointsman's Cottage and opened up the Glenbrook Garage. There were many owners over the years.

Ampol then bought it having many tenants. It was restored in 1996 when the new service station was developed.The property is now owned by Caltex.

The nearby Macquarie Street Store which is now Jim Aitken's Real Estate served refreshments to train travellers. A house on the corner of Euroka Road and Park Street owned by the Hamment family was rented out to railway workers.

ORDER OF AUSTRALIA AWARD

Well known, Blue Mountains archaeologist, Dr Siobhan Lavelle has been awarded the Order of Australia Medal which was announced in the Queens Birthday Honours list last month.

The award is for service to historic archaeology and heritage conservation, particularly the preservation of colonial roads and cemeteries.

From the president's pen.....

GLOBAL ECONOMIC CRISIS TO BENEFIT OUR HERITAGE

Those interested in our heritage, both professionals and amateur enthusiasts, have long been concerned about the apathy of government at all levels. It is fair to say, has paid only lip service to Australia's heritage.

Funding for the preservation and conservation of the natural, built and cultural heritage has been abysmal when compared with other fields of endeavour in our community.

Recent federal government announcements of grants to benefit heritage projects, however, have been most encouraging, not only in the amount of funding, but in the obvious attempts by bureaucrats to better understand and accommodate the needs of the heritage sector.

The need to maintain employment has been an objective of all political parties, but credit needs to be given to those who have ensured that heritage has been afforded portion of the government's largesse.

It is to be hoped that this direction will continue long past the global economic crisis.

One thing that will help this to occur is that historical societies and others in the heritage sector need to prepare well developed programs so that when grant applications are announced, there is no last minute inadequately prepared proposal going forward.

Unfortunately while the federal government is acknowledging the importance of our heritage by linking funding to grants to keep people in the workforce the state government appears to have given those in the heritage sector a smart slap in the face by watering down of legislation which in the past gave some protection to our heritage.

Significant amendments to the NSW Heritage Act which have now been enacted without effective consultation with the heritage sector tip the balance strongly towards destruction through development rather than preservation and conservation.

Under the amended act, the role of history and archaeology in heritage is threatened and there has been a dilution of statutory protection of heritage in a variety of ways.

For the first time there will be no requirement for a historian to be a member of the State Heritage Council.

'Minister's power to remove items from State Heritage Register'

There will be a shift of balance from the Heritage Council to the Minister for Planning who will have the power to remove items from the State Heritage Register.

Heritage items listed on Local Environmental Plans will be subject to review by assessment panels and regional panels, with powers overriding those of local government areas. There will be a change to definition of archaeological 'relics' under the Act.

Heritage has always been a thorn in the side of property developers and these amendments are very much in favour of the developer albeit some earlier deals might require retrospective legislation to keep them out of the courts.

If ever there was a need for ministerial responsibility for heritage to be separated from planning and/or other functions such as the arts or environment now is the time.

The relevance of having heritage included as the poor relation in a portfolio for planning coherently for future development is beyond comprehension.

As Chris Upton writes in *The Millstone* newsletter of the Kurrajong-Comleroy Historical Society, "there could be no better example of conflict of interest". There needs to be stand-alone heritage ministry.

BMACHO has decided to develop a strategy for ensuring a better understanding by government at all levels and within the community of the treatment of heritage. As part of this strategy it is proposed to conduct public forums to allow political leaders to outline future policies

In adopting this strategy, BMACHO recognises the outstanding efforts of bodies like the Royal Australian Historical Society and National Trust of Australia over many decades.

John Leary, OAM - president, Blue Mountains Association of Cultural Heritage Organisations

BMACHO HAS NEW TREASURER

BMACHO has accepted the offer of Mrs Kathie McMahon to become treasurer. Dr Peter Stanbury has been filling the role after not seeking re-election at this year's annual general meeting, but will be working overseas for the next 3 months.

Kathie a long time member of Kurrajong-Comelroy Historical Society, was elected to BMACHO's management committee earlier this year.

Her family links to Kurrajong go back to the early1800s.

Volunteer groups to receive grants

Five local volunteer heritage and environmental organisations will receive funding under the Grants to Voluntary Environment and Heritage Organisations (GVEO) program.

Federal member for Macquarie, Bob Debus has announced the successful groups which are:

* Mt Wilson and Mt Irvine Historical Society Inc $1500,

* Blue Mountains Association of Cultural Heritage Organisations Inc (BMACHO) $2300,

* Zig Zag Railway Cooperative Ltd $3600

* The City of Greater Lithgow Mining Museum Inc $2300,

* Blue Mountains Conservation Society Inc $5000 pa for 3 years.

Mr Debus said volunteer organisations that help protect and conserve Australia's unique environment and heritage have received almost $1.5 million in federal government grants – doubling the amount received in 2007-08 round.

"The funding made available under the program, benefited 184 environmental and 65 heritage organisations nationally.

'The funds are provided for administration costs to ensure that groups can use more of their budget to achieve their aims of conserving and protecting Australia's natural environment and historic heritage.

"In these difficult times we need to support the vital work of volunteer organisations, who are working to protect some of Australia's greatest assets – our unique environment and heritage, and ultimately this is in every Australian's best interest," Mr Debus said.

JENOLAN CAVES MEDAL MYSTERY

Pictured at right is an unusual medallion from Jenolan Caves and was probably a tourist piece.

Scratched into one surface is the date, 1913, and the medallion appears to be made from an Australian or English silver threepence of that period.

The medallion was acquired by its present owner from an Australian coin dealer in the 1990s. Jenolan colleagues have a memory of similar medallions but are unable at present to provide any further information. It would be great to learn whether any other examples are still held in private collections.

Do any of our readers know the history of these Jenolan medallions and why they were produced? Does anybody still have one of them?

BMACHO is most grateful to Peter Lane of Adelaide for bringing this medallion to our notice and particularly for his excellent photographs.

Face side, about twice actual size.

Obverse side

BMACHO TO PRODUCE PUBLICATIONS JOURNAL

Dr Peter Rickwood, president of the Blue Mountains Historical Society has proposed to BMACHO that consideration be given to publishing a journal of referenced articles relating to the Blue Mountains.

These would be articles not sufficiently brief for newsletters or necessarily likely to be published in the RAHS Journal.

At BMACHO's management committee's July meeting it was decided to approve in principle the proposal to develop such a journal to be published electronically to a dedicated website.

The refereed journal will be published annually to include subjects pertaining to cultural heritage of the Greater Blue Mountains and neighbouring areas.

This new service will be available free of charge to all those seriously interested in the history of the region. It is anticipated the first volume will be published in early 2010.

A limited number of hard copies will be printed for deposit in the NSW State, National Library of Austrailia and local libraries.

Dr Rickwood has accepted the position of inaugural editor and an editorial committee to advise and assist the editor has been appointed. Dr Ian Jack, John Leary, Prof Barrie Reynolds, Dr Peter Stanbury and Dr Peter Rickwood have accepted positions on the committee. An invitation is to be extended to Dr Carol Liston of the University of Western Sydney to also be a member of this group.

THE BURNING MISTS OF TIME

"The Burning Mists of Time" is the fascinating story of the establishment of the town of Katoomba in the Blue Mountains of NSW, including the history of the Scenic Railway.

This book launched last month, was written and compiled by Philip Hammon and Dr Philip Pells. Philip Hammon is managing director, Scenic World, Blue Mountains and Dr Philip Pells, CE principal of Pells Consulting, Fellow of the Australian Academy of Technological Sciences and Engineering and Adjunct Professor of Civil Engineering at UNSW.

The book traces the people who lived here in the late 1800s, the pioneering developers who were drawn by the world's richest oil shale deposits and associated coal seams, and the roles of those people and their works in the rise of Katoomba to touristic fame.

To provide background to the central story, and to help in understanding the motivations and limitations of our central characters, it also describes the society in which this all happened, the aboriginal influences, and the bureaucratic and financial systems within which the developments had to take place.

The technical descriptions of the amazing infrastructure needed to recover the rich oil shale from the vastness of the Jamieson and Megalong Valleys, are written to be understood by the non-technical person; Cecil will be your friend for life.

The research needed to bring this book to publication has been undertaken over many years, both by professional researchers, and amateur dirt scratchers. The latter ask the questions; "why is this here?" and the former try to help answer them.

Envisioning the 19th century engineering solutions from the scant remains of abandoned worn cables, and eroded earthworks, takes a wealth of experience, in wire rope workings, steam haulage, mining practices, underground and surface surveying, and even pony management.

Phillip and Philip have put all this together in a very readable and well illustrated book, with many previously unpublished historic photographs, with sketches and diagrams to clearly explain what was a quite complex operation.

Those purchasing a copy of the book at Scenic World, will receive a presentation box containing a piece of oil shale and a souvenir box of matches, with which you can test the claim that Katoomba's oil shale was the highest quality in the world by setting fire to it in the privacy and safety of your own home.

For the serious researcher, the book has a comprehensive index, and is filled with references to the sources of the information that have been gathered.

For information that has yet to be clarified, or photographs that have yet to be found, or explanations that have yet to be made, there will be a page on Scenic World's website, which will provide updated information to keep this book the living research tool that it is intended to be.

Contributions or corrections from readers are welcomed, and will be applied to the appropriate chapter headings, or if a new strand of investigation emerges, a new chapter can be created for the next edition with appropriate credits to the contributors, of course.

The book is also available from Megalong Books, Leura at $60 r.r.p

Pictured from left is Dr Philip Pells, Professor Ian Jack who launched the book and Philip Hammon. *Photograph courtesy Dr Peter Stanbury, OAM*

Everglades get works funding

With a contribution of $112,000 from the Australian government's Jobs Fund, National Trust of Australia will upgrade the walking paths and carry out repairs to the interior of Everglades at Leura and the Paul Sorensen designed gardens.

Announcing the grant the Member for Macquarie, Bob Debus said, "Everglades includes one of Australia's foremost heritage gardens and this new funding will ensure the visitors will have improved access to its spectacular surroundings".

Constructed in the 1930s by Danish-born landscape gardener Paul Sorensen in conjunction with owner Henri van de Velde, Everglades gardens is Australia's most spectacular inter-war period garden and has received acclaim from garden lovers worldwide.

More Darwiniana in the Blue Mountains

As is well known 2009 is the 200th anniversary of Charles Darwin's birth and the 150th anniversary of the *Origin of the Species*. Rather more obscurely, although maybe not for trivia buffs, 2009 also marks the 278th year since his famous grandfather Erasmus was born.

Erasmus, in his time, was just as significant a thinker. His life is celebrated in the literature and on a memorial tablet in Lichfield Cathedral, Staffordshire.

Of some pride for residents of the Blue Mountains was the 150th anniversary of Charles Darwin's journey through the region.

That event took place 23 years ago; in 1986 in mid January and was not forgotten by locals. It was celebrated by Blackheath Rotary and Edgar Penzig who lead walkers through the hamlet of Blackheath, along Pope's Glen Nature Trail to Horseshoe Falls and on to the lookout at Govett's leap, followed by a celebratory dinner at the local pub.

Darwin noted in his diary on January 18,1836: '*So early in the day the gulf was filled with a thin blue haze, which, although destroying the general effect, added to the apparent depth of the forest below, from the country on which we were standing.'*

The day before, on January 17, Darwin had visited the Wentworth Falls.

He wrote: '…..*walked mile & 1/2 to see Cascade: most magnificent astounding & unique view, small valley not lead to expect such scene……..Certainly most stupendous cliffs I have ever seen.'*

This is the third in a series of articles contributed by Dr Peter Stanbury, OAM a committee member of BMACHO and board member UMAC (International Committee for University Museums)

It is to be hoped that the site of the original inn, the Weatherboard, which gave its name to the area before it was changed to Wentworth Falls, will soon be similarly recognised, upgraded and signposted, for at present it is sadly neglected and unrecognised, even by locals. Darwin lunched at the Weatherboard and left his horse there while visiting the falls.

Preparations for an appropriate way for locals to celebrate were taken in hand by a local artist of renown, a Latvian, Renis Zusters, and a staff member of the Macleay Museum at the University of Sydney, which in 1985 had produced an exhibition and associated publication, *The Blue Mountains; Grand Adventure for All*.

Their contribution was to physically re-open with machetes the path along Jamieson Creek to Wentworth Falls that had become overgrown and impassable.

They invited the then mayor of the Blue Mountains City Council, Peter Quirk, to inspect their work and asked him to officially commemorate the occasion.

He agreed, and a brass plaque was installed bearing the simple inscription: *Charles Darwin passed this way in 1836, remembered by his friends in 1986*. The plaque was situated on a large rock just before the "astounding, stupendous" view that so surprised Darwin. (At the time of writing, some judicious pruning is necessary to preserve this surprise.)

Mayor, Peter Quirk, speaking to the assembled 'friends of Charles Darwin'

The ceremony actually took place a day late, on January 18, which being a Saturday allowed a group of biologists, locals and well wishers to attend.

Charles Darwin (Tim Elliot) suprises the audience

After the plaque had been affixed and the mayor had made a speech, three cheers burst from the audience. Unknown to them this was the signal for a local actor, Tim Elliot, to spring from the bush dressed as Darwin to quote his thoughts on the discoveries of the day.

Among those attending were Frank and Jan Nicholas, whose well researched book, *Charles Darwin in Australia*, was in preparation.

Renis and his wife, Venita, invited the participants to lunch in their home above the walk, after which Frank gave a lecture illustrated by Conrad Marten's paintings of the area.

BOILING FOR OIL - A BLUE MOUNTAINS BUSH INDUSTRY

The Blue Mountains World Heritage Institute (BMWHI) has brought together a group of community people to develop a mixed media exhibition for online access.

The creation of the exhibition now nearing completion has used the eucalypt as the catalyst for exploring people's stories of people from the Blue Mountains, reflections and experiences for both historical and contemporary perspectives.

The exhibition will be from a cross cultural perspective combining social history, archival material and contemporary artworks – drawing on private, public and community collections.

During research by the curatorium, early film footage has been discovered of a little known industry in the region, that of eucalyptus oil extraction.

John and June Deane of Blackheath who loaned the film now on DVD to researchers at BMWHI, are documenting the lives of June's father Colin Ralph who made the film and was involved in the distilling process. June and John accepted HERITAGE's invitation to write this article, 'Boiling for Oil'. The images on this page are taken from a 16mm documenatry made by Colin Ralph.

Oil collected from the leaves of the eucalypt, the ubiquitous tree of the Australian bush, has been used for a very long time.

The first European settlers learned of its medicinal properties from indigenous people and it was one of the first natural raw products exported from Australia.

Extracting the oil did not require masses of equipment or manpower and in the 1940s field stills were built across the continent.

A number of industrial sites existed round Oberon where local workers could fill drums with the crude distillate confident in the knowledge that agents from Sydney refineries would want to buy their product.

Such an industry involved harvesting of relatively young growth from trees, a process that could continue almost indefinitely as after three years the regrowth would supply another harvest.

Harvesting the eucalyptus leaves

The branches were trimmed and the leaves trampled down into a large vat such as an old water tank, a heavy lid swung into place and then sealed with mud worked from any nearby creek and clamped to be steam-tight.

Steam was usually generated in a separate boiler then fed into the vat and as the leaves were cooked, vapour rose to condensing pipes attached to the tank and was led away to be cooled.

Again the local creek proved useful, supplying a handy source of cooling for the pipes.

At the end of the run a tea-coloured liquid of water and oil flowed out into collecting tins where it settled and, because the water was heavier, the oil was left floating on the surface.

Finally this precious product was skimmed off and transferred to drums to be sent to the refiner.

Eucalyptus oil is still a valuable product and its uses are many and varied though its production is no longer carried out by the colourful characters that worked on it in the '40s.

Filling the boiling vats

Water conservation projects

Three National Trust projects have been successful in obtaining $140,000 in federal government funding for water savings initiatives. Woodford Academy, ($41,000) Everglades at Leura ($49,600) and the Norman Lindsay Gallery ($50,000) will benefit from the program.

At Woodford Academy the funding will help recommission the building's original well, dating back to the mid 1800s by directing rainwater from the roof to the underground storage. Historically the well's water is significant for the property. When Woodford was an inn for travellers, people would gather in the courtyard around the well to water themselves and their horses.

The new water tanks at Everglades and Norman Lindsay Gallery will provide for rainwater to be used for gardens and bathrooms. The water supplies at the three properties will provide a reserve for bushfire fighting.

RESTORATION OF NORMAN LINDSAY'S SEAHORSE FOUNTAIN

National Trust of Australia (NSW) is seeking financial support from the public to restore the Seahorse Fountain and garden sculptures in the gardens of Norman Lindsay gallery and museum at Faulconbridge

"Lindsay's legacy is a wonderful cultural asset, a gift to current and future generations," says Norman Lindsay Gallery manager, Amanda Trevillion

"The garden is an outdoor gallery, Lindsay's sculptures and fountains feature satyrs, nymphs, sirens and sphinx, created out of his love of classical mythology and cement.

"Some date from as early as 1913 and are almost 100 years old and very fragile. Our aim is to keep them preserved, with maintenance and conservation work, long into the future."

The Seahorse Fountain, one of 15 garden artworks, is the main feature of the garden and the most photographed view of the gallery.

The continued battle with tree roots and the aging cement of the pool walls and floor necessitates major restoration work should be carried out urgently in order to preserve this important Lindsay creation.

Other garden artworks have been subject to weather, making conservation imperative in the short term to preserve the integrity of these cherished artefacts.

Norman Lindsay and his Seahorse Fountain c 1960

Everybody benefits from the wonderful grounds - artists groups use the grounds for sketching, painting and photography, visitors enjoy picnics in the garden with family and friends.

The garden sculptures are very much part of the overall experience when visiting the Gallery, however visitation fees only cover a portion of the costs involved in maintaining such a substantial gallery, and it is hoped supporters will help with the shortfall.

The Trust is committed to our cultural heritage and to ensuring the fascinating stories of our heritage are alive and well for future generations.

Inside Norman Lindsay Gallery

Chinese in the Blue Mountains

The first Chinese are believed to have crossed the Blue Mountains in 1855 on their way to the New South gold rushes, to places like Hill End.

The first reference to Chinese settlers in the area was an article in the *Blue Mountains Echo* in 1891 about Ah Poy.

They generally established themselves as market gardeners.

Most are believed to have left the area in the 1930s and 1940s when bigger market gardening co-operatives began cornering the market. No Chinese names show up in the Blue Mountains cemeteries.

However, a number of Chinese families are known to have fled Sydney in 1942 because they were concerned about Japanese invasion. These included the Mar family and also the families of CP Ting, SC Ting, CC Chen, D.Chia. The Mar family also had relatives who travelled further west as far as Tinga.

This item was prepared by Sophie Couchman, La Trobe University. Sources used to compile this piece: Colin Slade, *'Investigating the Chinese community', Locality*: *Bulletin of the Community History Program, vol 4 no.2, July-August 2004;* Personal communication with Colin Slade, July 2004.

SECRETARY MEETS CHIEF PLANNER

BMACHO's secretary, Professor Barrie Reynolds, for some time has been regularly meeting with Blue Mountains City Council's head of planning, Andy Turner to exchange information on current heritage activities.

Barrie Reynolds advised a recent meeting of BMACHO's management committee that he was most encouraged by the positive actions now being undertaken by council's planning staff responsible for heritage issues.

Council has appointed two heritage consultants: one is working on development applications matters and the other has just completed a report to Blue Mountains City Council on Aboriginal heritage.

Work is progressing on the computerisation of all heritage sites in the Blue Mountains, but completion is not expected for some time.

Andy Turner said his staff were still examining BMACHO's proposal for the re-establishment of a community advisory heritage committee

Council is also examining the possibility of an application for JobStart funding for heritage site projects which involves council providing 50 percent funding.

FOOTNOTES

Dick Morony, secretary of Springwood Historical Society Inc sent **HERITAGE** this piece which is worth republishing.

"The time has come when we must incite readers to violence against all authors - certainly all historians - who do not provide a decent minimum of footnotes. (A place should also be made in the quicklime for the carcasses of publishers who think that footnotes hurt sales.)" — John Kenneth Galbraith, 1957, in a book review of "How to become an International Swindler", quoted by Frank Partnoy: The Match King. Mr Partnoy took Galbraith's advice - his book has around 220 pages of text and 26 pages of notes.

VOLUNTEER VACANCIES ADVERTISING

Advertising job vacancies is often difficult in small organisations.

BMACHO is now offering member organisations the opportunity to use three of its facilities for this purpose free of charge.

Volunteers are often needed for specific events or regular guiding at museums or properties etc.

Entries for specific event volunteers would be included in BMACHO's monthly calendar of events. Organisations need to add an extra line to the information supplied for promotion of the event. This needs to be sent to Dick Morony at richardmorony@optusnet.com.au .

This would then automatically appear on the website.

For societies attempting to fill job vacancies with specific ongoing responsibilities such as treasurer, secretary or newsletter editor etc., entries in the newsletter and website for member organisations will be accepted.

Member organisations need to provide a single line entry which would only include the designated position, name of society and the phone/e-mail address for further information. For the website these entries should be submitted to Barrie Reynolds at barrie.r@bigpond.net.au and the newsletter entries John Leary at johnnanette@optusnet.com.au .

Respondents to advertisements must contact the organisation seeking the assistance as BMACHO will not take any responsibility for the applicants or their selection.

"Currency Lasses and Beyond" – *Women of Australia's Past*

The Blue Mountains Family History Society is holding a seminar on Saturday, August 8, 2009 at the end of National Family History Week.

It will be held in the Springwood Baptist Church Hall, 313 Macquarie Road, Springwood. A program/registration form can be downloaded from the BMFHS website at http://www.rootsweb.ancestry.com/~nswbmfhs/

The subjects will be: Currency Lasses; The convict women of the "Elizabeth" 1828; London Immigration Committee's female immigration of the 1830; The sources available for researching the work and roles of women from early 19th century and beyond; Immigration from late 19th century/early 20th century – the affects on women and how they assimilated; Recital of Australian Bush Poetry; and Women's roles during the wars, since Federation.

Bursaries for the "Working Spaces 3 for Museum Volunteers" Conference

M&G NSW is offering a number of bursaries for the *Working Spaces for Museum Volunteers* Conference, hosted by Museums Australia – Lachlan Chapter. Funded through M&G NSW VIM Grant Program, these bursaries will contribute to registration, meals, accommodation and travel costs for the three-day conference, to be held in Galong from Friday to Sunday October 16-18, 2009.

The conference aims to provide volunteers with "hands-on" practical experience on topics such as storage conservation solutions, oral history, working with the media and conserving old photographs to name a few.

For more information on the conference and venue, or to download a registration form, visit the *Working Spaces 3 for Museum Volunteers* website http://www.lachlanmuseums.com.au/

THE GOLDEN GUMTREE POSTAL RUN

The Blue Mountains National Park this year will celebrate 50 years since it was gazetted as a national park.

The Blue Mountains World Heritage Institute with Blue Mountains City Council, the Blue Mountains National Parks Service and Blue Mountains Conservation Society are planning an event centring on the more than 100 eucalypt species that occur in the World Heritage area.

The celebration hopes to engender in school students a sense of place, a positive connection with the natural environment and cultural landscapes, and to develop knowledge, skills and understanding that will foster responsible stewardship of their local environment and the earth.

The community event "The Golden Gum Tree Postal Run" is to be staged in two parts.

As part of stage 1, "Bush Rooms" have been established at local schools, or in the national park or council reserves where students are observing and monitoring the daily weather and keeping a diary on the natural events occurring in their bush patch.

The diaries will provide the stories and information on plants and animals found in the "Bush Rooms". This information will be used for the creation of postcards to be collected during the "postal run"

"The Golden Gum Tree Postal Run" (stage 2) is a walk in September from Penrith to Lithgow via each school in towns adjoining the Blue Mountains National Park. A group of experienced adult bushwalkers led by Wyn Jones will endeavour to visit each school collecting and delivering postcards made by the children.

*Photograph of Eucalyptus trees in Blue Mountains National P*ark, *Blackheath by John Leary, OAM.*

BMACHO's secretary visits Mt Wilson meeting

"I always enjoy going to Mount Wilson for the general meetings of the historical society. There is always a good turn-out, a friendly atmosphere and interesting people to meet. The meeting on Saturday, June 27 was a good example.

"An audience of about 50 Mt Wilson and Mt Irvine members, together with a sprinkling of people from further afield came to hear the mid-year report of the society and then a fascinating talk on the unlikely subject of 'Trees of History and Romance'. Of this more anon.

"The half-yearly report discussed the various activities (tours, exhibitions, working bees etc.) in which all societies engage.

"It was encouraging to note the success of Mt Wilson in obtaining grants, both to help towards the cost of replacing the roof of the Turkish Bath building, and for general purposes.

"The autumn market held on Anzac Day weekend proved particularly successful and raised over $5,000. A commendable result.

"Many people will recall the excellent and very professional exhibition the society put together a few years ago on the early surveyor, Charles Scrivener. This was most successful at the time and I was always a little disappointed that it did not continue to be shown for the benefit of the public.

"I was therefore especially pleased to learn that there is strong interest from surveyor groups in borrowing the society's exhibition for display at venues in Canberra and Sydney, on the occasion of the centenaries of the ACT-NSW border survey and the early survey of Canberra itself.

"The guest speaker, Michael Pembroke, spoke on his ongoing interest in trees and particularly on his forthcoming book on the subject. Michael not only explained this interest in all aspects of the 21 different species of trees, botanical and cultural, that he had selected but also outlined his experiences as an author in the preparation of the book. The illustrations by Libby Raines are delightful and add greatly to Michael[1]s text.

"The book is due to appear in August and I do hope that other societies, both historical and garden, will invite this accomplished writer to speak at their own meetings. They would not be disappointed.

"On a more mundane level, I spoke about the work of BMACHO and the progress that is being made. This is covered in our own newsletters."

Barrie Reynolds

H.A. MacLeod Morgan and the Blue Mountains Association of Cultural Heritage Organisations

by Associate Professor Ian Jack, president, Royal Australian Historical Society and vice president, Blue Mountains Association of Cultural Heritage Organisations

(This is an abbreviated version of the presidential address to the Royal Australian Historical Society on April 28, 2009)

When I was attending a meeting of the executive of the Blue Mountains Association of Cultural Heritage Organisations, one of my fellow members, Florence Smart from Mount Wilson, handed me a small box of papers to add to the archives of the Royal Australian Historical Society. This box had been found among the effects of her sister, Wilga Smart, who died in August 2008 at the age of 85. Wilga had kept these papers for 44 years throughout her migrations from Australia to America, then to England and ultimately back to New South Wales. Just as Florence had found them after Wilga's death, so Wilga had found them in 1964 on the death of her fiancé, seven weeks before she was to be married in Mount Wilson.

Wilga was an expert plant propagator, first in the Smart family nursery at Eastwood and after 1946 at Carisbrook on Mount Irvine until her parents died. She then returned to Sydney and propagated first for Cohen's nursery at Turramurra and then for Tomkin's nursery at Enfield. She had already been collecting books, particularly about the Blue Mountains, and she joined the Royal Australian Historical Society.[1]

Her fiancé was president of the RAHS and an outstanding research scholar of the Blue Mountains and the Hawkesbury. His name was MacLeod Morgan. Despite Morgan's distinction, there is no easy way of getting to know this quietly-spoken man who died too soon.[2] When I did get to know him, Harold Arthur MacLeod Morgan has turned out to share my own enthusiasms and priorities in ways which I had not anticipated and, more important, his legacy is lasting and substantial.

He was ahead of his time in writing localized history both from a wide range of contemporary evidence and from an intimate knowledge of the area. His long-term interest in the Putty Road stemmed from his wartime experience as a major at Singleton army base, at the northern end of the old Bulga Road.[3] He had a passion not just for geography but for the evidence of the built environment: he was deeply concerned with the challenges facing Australia's cultural heritage in the 1950s and 1960s.

At the same time, he recognized the critical value of local historical societies and, along with Doug Bowd, the formidable secretary of the Hawkesbury Historical Society, he was responsible for the first major meeting which brought together the societies affiliated to the RAHS.

Although the president was too ill to attend the first conference in July 1961 and the chair was taken by Rae Else-Mitchell,[4] it had been MacLeod Morgan at his first meeting of the council as president, in March 1961, who had declared as his policy priority the organisation of: an initial week-end congress of representatives [from affiliated societies] to 'show' them History House, and to discuss the mutual problems in the operations of our and their societies.[5]

MacLeod Morgan's concern for local historical societies and heritage issues seems first to have taken practical public expression in the mid-1950s. In 1955 he was elected a founding member of the Blue Mountains History House management committee, which managed Tarella at Wentworth Falls, presented to the Blue Mountains Historical Society by Beryl McLaughlin.

From 1957 until 1961 he was a vigorous vice-president of the Blue Mountains society.[6]

He was a foundation member of the Hawkesbury Historical Society when it was founded in 1956. Although he was not present at the inaugural meeting in September 1956, that meeting invited him to be the society's first guest lecturer and he duly delivered the inaugural lecture on October 19, talking about George Meares Countess Bowen.

He figured in Hawkesbury's first full annual programme in 1957, talking on Bells Line of Road, and a MacLeod Morgan lecture was an annual event until 1961. In September 1957, he was elected to the Hawkesbury Society's council and served conscientiously for five years until in 1962 the constitution was altered to eliminate ordinary councillors.[7]

He was one of those who paid for the set of *Historical Records of Australia*, the first major enterprise of the new society, donated by them to the municipal library of Windsor for the greater benefit of the neighbourhood. He was the judge for the inaugural local historical essay competition in 1957 and led his first excursion of many to Kurrajong and Mount Tomah in 1958, followed by one to the Colo Valley in 1959 and one to Lithgow in 1960. He and Doug Bowd between them launched the public appeal in 1960 to restore the remarkable gravestone erected in St Matthew's cemetery in Windsor by Governor Macquarie in memory of Andrew Thompson.[8]

It was in conjunction with Doug Bowd that MacLeod Morgan inaugurated the affiliated societies' conference in the following year.

Hawkesbury's foundation treasurer, who served with MacLeod Morgan both on the Hawkesbury Society's council and on the small committee planning the sesquicentenary of the five Macquarie towns in 1959, recalls him well after fifty years, with his trim person, reticent manner, gentle, dry sense of humour and punctilious regularity.[9]

This all helped to give something of the flavour of the man and his motivation. Although many of his energies were directed towards the Hawkesbury and the Blue Mountains, he was also by 1963 a member of at least three other country societies, Illawarra, Lithgow and Nepean, as well as Hunters Hill, Parramatta and Manly.[10]

MacLeod Morgan did not live in the Mountains nor on the Hawkesbury. A bachelor, he lived with his mother in Cremorne and Neutral Bay until she died in 1961. Mrs Morgan had accompanied him to historical meetings and an eye-witness told me that 'she seemed to be guarding him'. After her death, he moved to a flat in Mosman.[11] So his contributions to history in Wentworth Falls and Windsor, in Wollongong and Emu Plains, involved an indefatigable zeal for travel.

In the box which I was given by Florence Smart, there are his last two diaries, for 1963 and 1964. They show how virtually every weekend was occupied with historical excursions or preparations for excursions. The diaries do not survive before 1963, but they would surely have shown that in the 1950s he was combining this outdoor activity with painstaking research in the Mitchell Library, which at that time contained also the state archives.

The evidence for this impressive documentary research is in the thorough annotation of his eight major articles, all published between 1956 and 1959, as well as four substantial, unpublished but fully footnoted papers which are in the manuscript collection of the RAHS.[12]

The substance of these articles was aired in lectures given to local societies, usually but not always prior to publication,[13] but it is significant that MacLeod Morgan sought out the *JRAHS* and *The Australian Genealogist* as his means of communication with the wider circle of those interested in the nineteenth-century history of Australia.

Alongside his commitments to local historical groups, MacLeod Morgan threw himself energetically into the running of both the Society of Australian Genealogists and the RAHS. He joined SAG as a life member in November 1954. He was elected to the council of SAG at the end of 1956, succeeded Colin Berckelman as director of SAG excursions in 1957 and became joint director of lectures in the following year.[14] At the same time, he was treasurer of the RAHS from 1955 until 1959, and in 1960 he took over the treasurership of SAG, where he also served as assistant treasurer in 1962 and 1963.[15]

Now accepting the position of treasurer was very natural, for MacLeod Morgan was an accountant and a company secretary. His interest in the Illawarra Historical Society came from his position as secretary to coal companies serving Port Kembla steel works and he was flying to Melbourne regularly in 1963 and 1964 to attend the board meetings of Broken Hill Associated Smelters.[16] Like many good historians, he did not have a university degree and was the best sort of dedicated amateur.

But while he freely gave his professional services as an accountant to both SAG and the RAHS, he had wider leadership ambitions.

Figure 1 Macleod Morgan (centre) opening the Hawkesbury Museum. Courtesy of Hawkesbury Historical Society

In 1960 he became vice president of SAG and continued in that role when he was elected to the presidency of the RAHS in 1961.

MacLeod Morgan had a difficult year in 1961. He fell ill in May, had a major operation and was unable to attend the RAHS council meetings for four consecutive months. And just as he was convalescing in August, his mother died.

His father was dead and MacLeod's only sibling, a sister, lived in Canada. A relapse into ill-health in October 1961 is very understandable, but before his doctor restricted his activities, he had signed the letter appointing Alex Chisholm, his predecessor as president, to the part-time salaried position of general secretary of the RAHS, which had been vacant for six years.[17] This far-sighted action led directly to the appointment of Harry Harper on a full-time basis in 1963 and lasting changes to the running of the RAHS. Mari Metzke is an unwitting part of MacLeod Morgan's legacy to the society.

In November 1961 MacLeod Morgan seemed to recover his health and at once took a leading role in brokering useful contacts among historical societies. Under the guise of an excursion organized by the Nepean District Historical Society, an interesting group of local societies, including Blue Mountains, Hawkesbury and Lithgow, met at Glenroy near Hartley. MacLeod Morgan attended, wearing as his principal hat the presidency of the RAHS. When 'proposals were made for some joint association of the represented bodies for advancing historical interests', MacLeod Morgan assured the delegates of the Royal's interest and asked to be kept informed.[18]

Figure 2 The inscription on Macleod Morgan's gravemarker erected by Wilga Smart at St Stephen's Anglican graveyard, Kurrajong. Photograph by Ian Jack April 26, 2009.

This was quite separate from the annual conference, although clearly related to that meeting four months earlier. Although the Glenroy initiative of 1961 did not immediately prosper, it did encourage the same local societies and two others to meet again in Springwood in March 1962. The agenda was now more specific, announcing the aim of sharing speakers, arranging excursions and generally assisting each other.[19]

MacLeod Morgan was certainly aware of this meeting: he signed the minutes of the Hawkesbury Historical Society which recorded it. Although this initiative did not lead anywhere in particular in the 1960s, it bears a strong resemblance to the creation forty-five years later of the Blue Mountains Association of Cultural Heritage Organisations. And at the Katoomba meeting in 2006 which created BMACHO I played the role which MacLeod Morgan had played at Glenroy on behalf of the RAHS.

Early in 1962 MacLeod Morgan was re-elected unopposed as president of the RAHS, with Rae Else-Mitchell as his vice-president. As president, Morgan had the great pleasure of opening the new Hawkesbury Historical Society's Museum in March 1962 and he was able to resume his successful excursions: those were the days when a drawcard visit to Kurrajong under MacLeod Morgan could bring out 100 members in two buses and numerous cars.

Early in 1963 a recurrence of illness prevented MacLeod Morgan from seeking re-election to the RAHS council in any capacity and he was succeeded as president by Allan Bax, whom he had challenged successfully in 1961.[1] Although his interest in history did not abate, after February 1963 his only executive role in any society was his minor involvement with SAG as its assistant treasurer.

Instead his private life became much more impelling. He had been close to his mother. But she had died in 1961 and was buried in the cemetery of St Stephen's Anglican church outside Kurrajong in a grave which enjoys one of the great views of the Cumberland Plain from the mountain foothills. Her son's diaries of 1963 and 1964 show an equally strong absorption in his relationship with Wilga Smart, who lived and worked in Sydney, and his friendship with her family in Mount Irvine and her associates in Mount Wilson. As on so many weekends, he drove up to Mount Irvine on Friday, February 21; next day he and Wilga sent out wedding invitations; he came back to Manly on the Sunday.[2] When he did not appear for work on the Monday, his fiancée was informed and she found him quietly dead in his favourite armchair. They were to have been married in Mount Wilson seven weeks later.[3]

MacLeod Morgan was buried in a grave adjacent to his mother's at St Stephen's, Kurrajong. I am glad to have been impelled through the tragic story which brought a box of his papers into my hands to have made the acquaintance of Harold Arthur MacLeod Morgan, historian and gentleman, a progenitor of BMACHO. Footnotes for this paper appear on the next page.

OLD MAPS

A workshop is being planned by BMACHO to look at various aspects of old maps. The activity will include advice on how historians extract information from maps, who has old maps, the proper techniques for restoring damaged maps, and methods of storing and cataloguing maps etc. Details of this workshop will be announced late in the year.

GLENBROOK THROUGH THE YEARS

"Having a long time interest in Nepean area history, but moving to Glenbrook to live some years ago, resulted in me trying to learn the history of this area.

"I joined the Glenbrook Historical Society, but found it hard to follow the routes of the roads, rails and ridges in the area. So I turned to an old local newspaper, the Nepean Times, to see if I could find out more about Glenbrook from the correspondent reports in it.

The Nepean Times was published from 1882 to 1962 and contains many items about people, places and events in Glenbrook .

"I have been copying these articles and collating an information index from them for some time now.

Overall they build a picture of Glenbrook through the years, reporting on its natural beauty; its schools and churches; its roads and railways, its social groups; and its residents' lives.

"I hope to make the reports in 'Glenbrook through the years: From the Nepean Times' available to Glenbrook Historical Society, and its index available to any other groups who might like to have it."

Pat Curry, member Glenbrook Historical Society

Old Government House receives government stimulus

Peter Garrett, Federal Minister for the Environment, Heritage and the Arts, has announced $2 million in funding for Old Government House(OGH) at Parramatta.

The grant, coming from the Federal Government's Jobs Fund, will enable important conservation work to be carried out at OGH including the upgrading of visitor facilities and the restoration of Governor Macquarie's study.

This news was welcomed by National Trust NSW executive director, John Neish, who said the government was investing in a 'legacy project' that will bring good economic returns.

"By granting this funding, Minister Garrett is working to ensure that future generations of Australians will be able to experience our rich history, first hand.

"Old Government House has become a major focus for tourism in western Sydney and a great benefit for Parramatta's economy.

"This funding will enable the Trust to further develop Old Government House's historical interpretation and enhance visitors' cultural experience.

"The funding will also provide a boost to local employment enabling the National Trust to establish 26 short term, and 40 longer term new jobs," Mr Neish said.

This $2 million in funding comes on the eve of Governor Lachlan Macquarie's Bicentenary, celebrating his appointment as colonial Governor in January 1810.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 40 Hume Avenue, Wentworth Falls 2782
E-mail: bmacho.heritage@gmail.com
Website: www.bluemountains.heritage

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group, Friends of Everglades, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society (including Turkish Bath Museum), Mudgee Historical Society, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch), Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians, Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway. The following are individual members: Ms Wendy Carlson, Ray Christison, Ms Pamela Hubert, Associate Professor Ian Jack, John Leary OAM, John Low, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2009-10 is: John Leary, (president) Ian Jack (vice president), Barrie Reynolds (secretary), Kathie McMahon (treasurer), Jean Arthur, Ray Christison, Lyn Fowler, Doug Knowles, and Dick Morony (public officer), Peter Stanbury.

AUDITOR: Sue McMahon, B Comm CPA

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE is BMACHO's official newsletter.

Norman Lindsay and the 'Magic Pudding'

. ***The Magic Pudding characters, Bunyip Bluegum, Bill Barnacle, the Magic Pudding and Sam Sawnoff***

ARTICLE BY HELEN GLAD

Norman Lindsay is the author of one of Australia's best-loved stories, 'The Magic Pudding', however his talent was not limited to writing for children. His early career started at the *Bulletin* where he was principal cartoonist; he also wrote novels and produced a torrent of pen drawings, etchings, watercolours and oil paintings. Lindsay's story is told by his grand daughter, Helen Glad, who was a constant visitor at 'Springwood', the house her grandparents established in the Blue Mountains.

Norman Lindsay wrote his classic Australian children's story *The Magic Pudding* in 1918. Since then generations of Australian children have been reading the adventures of Albert, Bunyip Bluegum, Sam Sawnoff, Bill Barnacle and the Puddin' thieves.

Lindsay had a wager that children were more interested in reading about food than fairies - and it is a bet that Lindsay clearly won. Albert, the gravy-voiced Pudding, has the extraordinary talent of never ending as well as transforming into all sorts of delicious sweet and savoury treats.

Albert's ability to be thoroughly rude as well as escaping at the drop of a basin has made him a hero for many a young boy.

Adventure is as important as food in *The Magic Pudding* with the Puddin' owners wandering the long bush tracks of Australia - either seeking or fleeing from Puddin Thieves. There are archetypal characters, reminiscent of Lawson who inhabit a bush landscape of crackling gum leaves and bright skies. Perhaps we now think of these as stereotypes of the Australian male character, but then they were the norm and the bush somehow seemed a lot closer to the city.

And let us not forget that the Pudding began its long steaming life at a time of the worst devastation the world had known.

Millions of young men were dying in the mud and filth of a war very distant from the sun and blue sky of home. Heroes were genuinely forged in that conflict, and mateship was not an abstract emotion but often a means of survival.

The origin of the Magic Pudding can be traced to Lindsay's childhood.

From the president's pen.....

GETTYSBURG ADDRESS ETHIC NEEDED FOR AUSTRALIA'S CULTURAL HERITAGE

When Abraham Lincoln delivered his Gettysburg Address which encapsulated the words "government of the people, by the people, for the people", he did so on a battlefield.

While no one wants to emulate the battlefields of the American Civil War, which brought rise to Lincoln's address, there is a need for Australians to go on to a war footing with government at all levels when it comes to our cultural heritage.

For too long successive governments in this country have ignored the Lincoln ethic of those immortal words and instead have pandered to ideology and lobby groups which serve only their own narrow needs often based on making a "big buck".

The heritage sector has in the past achieved some success by its quiet and thoughtful approach, but far more could perhaps have been accomplished had the causes been more widely articulated, bringing on board the community at large.

With some 14 declared world heritage sites in Australia, intent has been declared, without real funding.

Research facilities and museums operate on shoestring budgets. Heritage buildings crumble into dust, priceless artefacts have no suitable accommodation, volumes of archive material disintegrate or fall victim to mites or mould. Funding for our maritime and industrial heritage is a disgrace.

Be it the unique village of Hartley, the little-known farm relic of 'Browntown', the etchings of Norman Lindsay or the surveyor's notes and maps of the surveyor George William Evans which made feasible the route taken by William Cox who constructed the great western road from Emu Plains to Bathurst two centuries ago, all are part of our cultural heritage and deserve to attract better funding for conservation, restoration, housing and management.

Although bodies such as the RAHS and National Trust have been keeping heritage prominently before our politicians, government needs to understand the importance of our cultural heritage and take advice from the heritage sector

The clarion call has come with the NSW government announcement earlier this year giving the minister for planning unfettered power in relation to heritage properties. In so doing it has weakened the influence of heritage organisations.

BMACHO has embarked on a strategy for ensuring a better understanding of the treatment of cultural heritage by government at all levels and within the community at large.

One of the ways of grabbing the attention of decision-makers is by face to face dialogue. But unrepresented opinion has little effect on politicians.

To ensure the best impression on politicians such as the shadow minister who will address a public meeting organised by BMACHO on September 25, the largest possible attendance will help to make at least the alternative government in this state realise that people are concerned about heritage issues. BMACHO will create other opportunities to express community concern to politicians of all persuasions.

Those interested in our heritage are urged to encourage others to attend the meeting at Wentworth Falls, for if we fail to make government better understand the heritage sector's concerns then the war will be lost. A society which ignores its heritage does so at peril to future generations.

John Leary, OAM - president, Blue Mountains Association of Cultural Heritage Organisations

KEEPING INFORMATION ON ACTIVITIES BEFORE MEMBERS

BMACHO's committee is concerned that ordinary society members are not being made aware of information regularly passed down to organisations.

BMACHO's secretary regularly communicates information, on decisions and objectives discussed at committee meetings, the newsletter HERITAGE is published every two months, individual members of the executive regularly communicate with contact persons for all association members and visit affiliated societies.

It is now proposed that secretary Barrie Reynolds will e-mail a brief report of the committee's monthly meeting to each society. The report will outline what work has been completed or is in train.

It is requested that this brief report be transmitted to individual society members through newsletters and/or placing it on notice boards.

The committee is also urging individual societies to include in their AGM agendas, space for their appointed BMACHO representative to report on BMACHO activities.

Meantime, the committee has decided to have a mid-year general meeting to give the opportunity for BMACHO committee members to hear a progress report and for members to raise any matters of concern.

The next mid-year meeting will be on Saturday, November 21 at a venue and time to be advised.

SHADOW MINISTER TO DISCUSS HERITAGE ISSUES WITH BMACHO

The NSW coalition spokesman for heritage, the Hon Catherine Cusack, MLC, B Ec has accepted BMACHO's invitation to discuss heritage issues at a meeting later this month.

Representatives from BMACHO affiliated organisation have been invited to participate in the meeting and others interested in heritage will be welcome to attend.

BMACHO has embarked on a program to better inform the community and government about the need for more adequate government funding for the preservation and conservation of our cultural heritage.

As part of this strategy, meetings are to be held with leading politicians from all political parties. The objective of these meetings is to discuss with each political party their heritage policies and hopefully have some input into future policies.

At the first of these meetings the guest speaker will be NSW Shadow Minister for Climate Change and Environmental Sustainability, and Liberal spokesperson for Heritage, The Hon. Catherine Cusack, B Ec, MLC.

Speaking in opposition to the Heritage Amendment Bill 2009, the shadow minister, said: "the bill is part of a long war against our state's heritage. "The independence of the State Heritage Council under a Coalition is offering the people of NSW a renaissance in heritage protection.

"Our policy will establish important structural separation between the Heritage Council and the Minister for Planning."

Catherine Cusack joined the National Trust in 1982 and has been active in heritage campaigns over many years, including the Wintergarden at Rose Bay, the anti-monorail rallies, the Royal Hospital for Women, the Florence Bartley Library in Kings Cross, the "Save White City" campaign to preserve the historic centre courts and the continuing effort to preserve the Yasmar Estate at Haberfield.

Catherine was elected to the NSW Legislative Council in 2003 and immediately appointed to Shadow Cabinet as Shadow Minister for Juvenile Justice and Shadow Minister for Women.

In 2007 she was appointed Shadow Minister for Fair Trading and recently Shadow Minister for Climate Change and Environmental Sustainability and is the Coalition's spokesperson for Heritage

The meeting will to be held at the Grand View Hotel, Wentworth Falls commencing at 10am on Friday, September 25, 2009.

Morning tea will be served from 9.45am and a light buffet lunch (sandwiches, coffee etc) will be available at the conclusion of the meeting expected to be at 12 noon.

To cover the cost of the meeting room, morning tea and luncheon, a charge of $18 per person for members of societies affiliated with BMACHO or $25 for non-members will be charged.

Bookings are essential and cheques payable to BMACHO should be mailed to Prof. Barrie Reynolds at 40 Hume Avenue, Wentworth Falls 2781.

For further information contact John Leary at johnnanette@optusnet.com.au or Barrie Reynolds at barrie.r@bigpond.com.net.au

The making of our nation

National Trust Heritage Festival 2010's theme will be *'The making of our nation',* recognising Lachlan Macquarie's swearing in as the 5th governor of NSW 200 years ago.

Historical societies and community groups can register free of charge, their own events and take advantage of national promotion of the festival now in its 30th year.

The festival runs between April 9 and 24, 2010 and last year included over 400 community hosted events.

To register local events, complete the online form at www.nationaltrust.com.au/events/festival/registration2010 by Friday, November 13 or telephone Natalie Goss on (02) 9258 0181. Suggestions for events include talks/lectures, exhibitions and historical displays, tours, educational competitions, open days etc.

RAHS GRANT FOR BMACHO

The Royal Australian Historical Society has advised BMACHO it has been successful in a bid for a grant towards the cost of producing the Journal of Blue Mountains History. The RAHS has made a grant of $850.

Peter Rickwood has volunteered to be the editor of the Journal.

He will be assisted by an editorial board consisting of John Leary, Ian Jack, Peter Stanbury, Barrie Reynolds and Dr. Carol Liston of the Universityof Western Sydney.

The Webmaster will be Peter Hughes, who created BMACHO's Website.

Publication of the Journal is planned for mid-2010

Lindsay brushed away the ‘wowsers’

Continued from page 1

To a boy growing up in the gold mining town of Creswick, Victoria, the lure of adventures on the high seas in sailing ships must have been appealing. This early fascination with the sea would later translate into paintings of swashbuckling pirates and the ship models made by Lindsay. The roistering and rollicking adventures of the pudding begin when Bill Barnacle and Sam Sawnoff become the Pudding’s owners by stealing Albert and doing away with the cook, Curry n Rice. This action takes place on an iceberg after the *Saltjunk Sarah* is shipwrecked. Once back on dry land the old salts proceed to find adventure after adventure.

In 1918 Angus and Robertson published *The Magic Pudding* at an issue price of 1 guinea - a price Lindsay felt too high for young people. At that time Norman Lindsay was renowned as the pre-eminent black and white artist for *The Bulletin.* He was also the creator of art full of nudes which to many people showed his moral decrepitude.

Lindsay brushed aside any criticism - he was far too busy an artist to be concerned about the ‘wowsers”. That he was also the creator of a book which captured the imagination of children must have raised the eyebrows of many and caused concern in some circles.

Lindsay was an extraordinarily prolific artist, working in diverse mediums. His black and white art included cartoons for *The Bulletin* for over fifty years, completing his last in 1956. His pen and ink drawings were keenly sought by institutions and private collectors.

His etchings were also eagerly sought and his output in this most difficult and taxing of print mediums was prodigious. He entrusted the printing of his plates to his wife Rose, who became a master printer essential to the high quality of his etchings. In all they produced over 370 different etched images. Rose not only printed the etchings but handled their sales throughout the world.

His water-colour and oil paintings remain as popular as they ever were with artlovers. For some Lindsay’s classical themes have little connection with a modern Australia and they find the notion of satyrs pursuing nymphs in a bluegum Arcadia somewhat incongruous.

However, as an advocate for a vigorous Australian artistic culture - so long as it included no modernists - Lindsay’s contribution cannot be ignored. The subject of his art saw him identified with the freeing of attitudes which was still overshadowed by the tight moral corsets of Victorian society.

Lindsay was also the author of thirteen novels, many of which he illustrated. His support of many young writers and poets was crucial to their future successes.

He was a prolific writer of articles and wrote some seven non-fiction books. Books of his art were usually beautifully produced volumes which have become collector’s items.

To consider Lindsay having any spare time after the constant making of art seems impossible.

But he relaxed by building fine ship models and decorating the grounds of his house at Springwood with sculptures of nymphs, fauns and satyrs fashioned from cement. The house and grounds of his home, which are visited annually by thousands of visitors, are now run by the National Trust of Australia (NSW).

Perhaps Lindsay viewed himself a little like Albert – the more he made the more you got. Throughout his long life he remained enthusiastically creating art which still captures our imagination.

The Magic Pudding is now over 90 years old. In that time the recipe has changed little. Occasionally it is published in Spanish, French, Portuguese and even Japanese. Other variations to the recipe include radio adaptations, serialisation in school magazines and marionette and rod puppets.

The Magic Pudding has become part of the Australian vernacular - with everything from the economy to Sydney real estate being described as “a magic pudding”.

Lindsay would have been pleased knowing that he baked an artistic pudding big enough for everyone to enjoy and to inspire others further creations.

BMACHO gratefully acknowledges the efforts of Amanda Llewellyn, manager of the Norman Lindsay Gallery and Museum who arranged for the reproduction of this article by Helen Glad and for approval to reprint the drawings on this and page 1. Norman Lindsay Gallery and Museum is a member of BMACHO

LITHGOW’S CRIMES SCANDALS, & CORRUPTION

The *Scandals, Crime and Corruption* exhibition being staged in the Lithgow Library Learning Centre until September 30 has already attracted considerable interest.

The exhibition features historic photographs, newspaper articles and artefacts of local interest, including convict and Cold War material related to the gaol, migrant hostel and landholdings in Lithgow.

Open Monday to Friday 9am to 6pm and on Saturdays from 9am to 12 noon admission is free. For further details

www.learningcentre.lithgow.com

WIELDING THE WILLOW

An historical reflection by John Low

Recently, in the peaceful late hours of the evening while listening to the ABC coverage of the current Test series between Australia and England, I have found myself thinking about the old house in Springwood in which, for almost all of 20 years, I spent my working life.

'Braemar' is one of Springwood's finest surviving 19th century buildings and an important part of the town's architectural heritage.

Built in 1892 by Scottish immigrant and successful Sydney businessman James Hunter Lawson, it was restored as an Australian Bicentennial project and opened as a public art gallery and local history centre in 1988.

As local studies librarian my office was in the front right-hand room, once a drawing room according to the original plans.

Though I became very familiar with the building over a long period of time, I tried not to take it for granted. It was indeed a pleasant place to work and as I learnt the details of its history I enjoyed a growing familiarity with the people who had occupied its rooms and given them life.

'Braemar' in the 1890s courtesy the Blue Mountains City Library's Local Studies Collection.

Erected initially as a private residence, the Lawson family eventually built several neighbouring homes and James Hunter and his wife Emma moved next door sometime in the mid 1890s.

'Braemar' was then leased and subsequently experienced a variety of uses, including hospital, private home, doctor's surgery and guesthouse.

There was one tenant however who, though residing there only briefly, particularly attracted my attention.

Sometimes when work got a bit tiresome, I would sit at my desk and reflect on the possibility that this man who had participated in events at a crucial moment in our sporting history might have relaxed in this very room, looking out at his garden and beyond the white picket fence to the far less regular and noisy traffic passing along the Western Road.

The man I am referring to was Thomas William Garrett (1858 - 1943), one of our early Test cricketers who had taken part in the metaphorical 'cremation' of English cricket at The Oval in August 1882.

It was about sixteen years later that Garrett, his wife Helen and their family of three girls and four boys arrived in Springwood, probably during the first half of 1898 after his retirement from first-class cricket. In August of that year the *Nepean Times* recorded his election as a vice-president of the Springwood Cricket Club.

Thomas Garrett was born in Wollongong on July 26, 1858, the son of a politician and newspaper proprietor.

In this lovely old photograph of the Australian team, from the collection of the Mitchell Library in Sydney, Garrett is seated fourth from the left in the front row.

WIELDING THE WILLOW

Continued from page 5

Educated at Newington College, he later studied law and was admitted as a solicitor in the Supreme Court, eventually becoming registrar of probates in 1890, curator of intestate estates in 1896 and public trustee in 1914.

It was, however, his talent as a cricketer that brought him to a wider public notice. After showing early ability at school, he went on to play with distinction for both New South Wales and Australia.

In 1877 the 18-year-old Garrett was chosen to play for Australia in Melbourne against James Lillywhite's team of professionals, a match that has come to be considered the first Test against England.

He went on to tour England three times – in 1878, 1882 and 1886 – and represented Australia in seven Test series at home, scoring 339 runs and taking 36 wickets.

On the 1882 tour of England Garrett played in the famous Test at The Oval that saw Australia defeat England for the first time on English soil.

Fellow participants in that match included the legendary W. G. Grace (England) and 'the Demon bowler' F. R. Spofforth (Australia). August company indeed!

During the tense final overs, as the game swung Australia's way, a heart attack claimed one spectator and when the last wicket fell the crowd was stunned. England was seven runs short of victory!

In its next issue the *Sporting Times* reported the death of English cricket. "The body", it declared, "will be cremated and the ashes taken to Australia."

It was during the subsequent English tour of Australia in the southern summer of 1882-83 that the actual 'Ashes' were created from the burning of a wicket bail. The embroidered velvet bag that held the small pottery urn in which they were kept was made by Anne Fletcher whose husband later established a boys' school in Katoomba. But that's another story!

A recent image of 'Braemar' courtesy Marika Low

Bearded, tall and lean, Garrett was primarily recognised as a right-arm, slightly more than medium pace bowler with an ability to swing the ball either way.

But he was no slouch with the bat and also proved a shrewd and successful captain of New South Wales. At the age of 38 in 1897 he scored 131 runs against a South Australian team that included the champion fast bowler Ernest Jones.

Thomas Garrett and his family appear to have resided in Springwood for a period of about ten years.

When they first arrived in 1898 they occupied 'Braemar', on what was then the Western Road east of the town centre. By 1908, they had moved to the western end of the town, to another small but substantial country villa named 'Stanway'.

During their time in Springwood, judging by reports of their activities in the Springwood news columns of the *Nepean Times*, the Garretts were actively involved in the life of the community.

Father and sons were members of both the cricket and rugby football clubs. Thomas served as a vice president of both and also helped to establish a golf club in the town in 1905. In 1909-10, when Springwood Cricket Club won the Nepean District premiership, three of Thomas's sons were in the team, one of them as captain.

Mother and daughters, too, were reported in various capacities at fetes organised by both Christ Church (Anglican) and Springwood Ladies College where the girls attended school.

Thomas Garrett also acted as honorary auditor for a number of local organisations including the Anglican Church, the Progress Association and the School of Arts.

The family left Springwood and returned to Sydney sometime around 1912. Garrett, the last survivor of the 1882 Australian team, died at Warrawee on August 6,1943 at the age of 85.

Springwood's associations with cricket go back to its earliest days, with the first matches being played there probably in the 1870s.

Over the years the town's cricket ground at Lomatia Park has been the focus of some intense and spirited sporting contests.

Nor was Thomas Garrett the last of the town's links with the wider world of cricket for Nathan Bracken, a product of Springwood High School, now plays regularly for Australia in the 'One-Day' and '20-20' versions of the game.

John Low is the former local history librarian, Blue Mountains City Council and an individual member of BMACHO.

A model T Ford gives way to historic steam tram at Valley Heights Loco Depot Museum

Members of the Model T Ford Club posed for a staged level crossing scene under controlled conditions at Valley Heights during a visit earlier in the year. Photograph courtesy Peter Butler

The former Sydney steam tram motor no. 103A, a Baldwin 11676 pictured above is one of a number of restored historic transport relics to be found at the Valley Heights Locomotive Depot Heritage Museum.

It was the last steam tram motor in service on the NSW government tramways when withdrawn from service in 1937.

It then had an extended period in industrial service. It served on the Sydney Ferries Redbank Wharf tramway from 1937 to 1943, then became a shunter at Waddington Limited (later Commonwealth Engineering Ltd) works at Granville from 1943 to 1953.

Sydney steam tram motor 103A, built 1891, operated at the Parramatta Park Steam Tramway until the arson attack at the museum in June 1993.

The fire destroyed most rolling stock, and 103A's wooden cab was incinerated at this time but the remainder of the loco was salvaged for restoration and moved to Valley Heights, where a new cab has been built.

Following the fire, the society was unable to gain approval to re-establish in Parramatta Park. In 1997 the society was invited to move into the Valley Heights Locomotive Depot Heritage Museum and again took the initiative to complete the task of ensuring the steam tram preservation project would continue.

It was a special day for members of the Steam Tram and Railway Preservation Society, on September 16, 2005 when tram motor no 103A was officially returned to service following a 12-year rebuild.

Since 1954 the society has laboured long to ensure the remaining relics of the once extensive NSW steam tram network were saved from neglect. That legacy for future generations will be a genuine operating steam tram.

In 1879, steam operated tramways were introduced in Sydney, under the control of the Railway Commissioner.

Similarly operated systems were later used in Newcastle, Maitland, Broken Hill and between East Maitland-Morpeth, Parramatta-Castle Hill, Campbelltown-Camden and Sutherland-Cronulla.

The Sydney and Newcastle systems were eventually electrified but the others, including three isolated lines in Sydney, Sutherland-Cronulla, Arncliffe-Bexley and Kogarah-Sans Souci, were steam worked until their closure.

The Campbelltown-Camden and East Maitland-Morpeth lines were eventually operated as light railways and used steam tram motors for a period of their existence.

The "motors" as the locomotives are called were of a standard design, introduced by the Baldwin Locomotive Works and 100 came from that firm. The remainder were built locally, either by contractors or in the Tramway Department's workshops.

The Valley Heights Locomotive Depot Heritage Museum is the Blue Mountains Division of the NSW Rail Transport Museum. The museum is located in the former Locomotive Depot at Valley Heights.

Continued page 8

VALLEY HEIGHTS STEAM LOCO DEPOT

Continued from page 7

The museum preserves the depot buildings, the rail heritage of the Blue Mountains, and at the same time providing historical, educational and recreational facilities for the benefit of the Blue Mountains community and visitors to the region.

The society's goal is to operate the Steam Tramway in conjunction with the activities of the Valley Heights Locomotive Depot Heritage Museum, Tusculum Road, Valley Heights.

The society is also custodian of two small steam shunting locomotives and railway carriages. Some of this rolling stock is in various stages of restoration, while some is available for operation.

The museum's open days are the second and fourth Sundays of each month (except Mothers Day and the last Sunday in December) between 10am and 4pm. Information regarding the society can be obtained from our website: www.infobluemountains.net.au/locodepot/tram

Valley Heights steam locomotive depot circa 1950. Black coal smoke from the depot could be seen for miles

According to Valley Heights resident Mr. Clyde Bruce, fledgling pilots in the late 1940s and early 1950s used the depot as a bearing on their flight path as they headed west from Sydney. Smoke from the depot could easily be seen from a height of a few thousand feet and was an ideal location to be used as a sight for their bearings

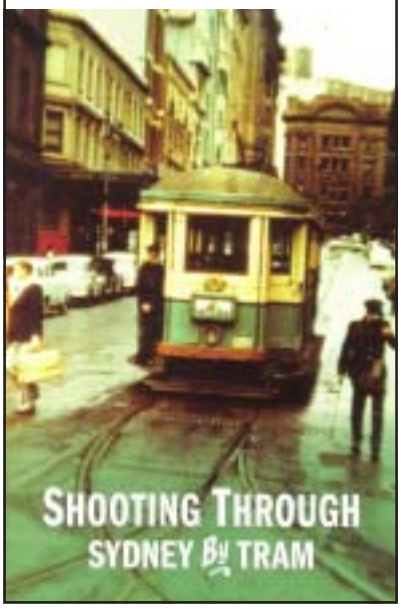
BMACHO gratefully acknowledges the assistance of the Valley Heights Locomotive Depot Heritage Museum, Andrew Tester, Peter Stock, Valley Heights Springwood Historical Society and Steam Tram and Railway Preservation (Co-op) Society Limited in the preparation of this article.

Shooting through Sydney by Tram exhibition

The Sydney Museum located on the corner of Bridge and Phillip Streets, Sydney is staging, "Shooting through Sydney by Tram" an exhibition depicting the 100 year history of Sydney's trams from 1861 to 1961.

The exhibition runs until October 18, 2009.

The museum opens daily from 9.30am to 5pm. Admission costs $10 for adults, $5 for a child or concession and $20 for a family.



EDITOR'S ANECDOTE.....

THE IRON MONSTER….

Probably my oldest memory, was of an "iron monster" – a steam tram motor on a street somewhere in Sydney when I was probably about 4 or 5 years old.

Most of my life, I have had this vivid image in my mind of a scary iron monster, which my father had taken me to see for a Sunday family outing.

Try as I might for many years I had tried to find anyone who could give me an explanation of this iron monster, which I knew ran on rails down the middle of the street, shrouded in steam and as a youngster had scared the' living daylights' out of me

Then all those years later in June 2006, I picked up a copy of the Springwood Historical Society Bulletin in which was published a photograph and story of my "iron monster", exactly like my memory.

The Springwood Historical Society Bulletin recorded that this "monster" was the last steam tram motor in service on the government tramways when withdrawn in 1937.

I recall my fathers words were: "Come on Johnny don't be scared , you'll never see this monster again," and so it was; as apparently it was the last day the service would run. Although not on the last run, the 103A was the last to leave Kogarah before the motors were returned to Randwick workshops.

This grand old survivor, the "iron monster" of my boyhood days has come back into my life in my twilight years. John Leary, OAM.

MULGOA BICENTENARY

This year marks the 200th anniversary of the grant of land at Mulgoa by Lt Governor Paterson to 4 year old Edward Cox on November 1, 1809, confirmed by Governor Macquarie on January1, 1810.

The settlement of the Mulgoa Valley began with the building of *The Cottage* in 1810. William Cox's three sons George, Henry and Edward lived at *The Cottage* before developing their own properties: *Winbourne* (1824), *Glenmore* (1825) and *Fernhill* (1842). With St. Thomas' Church (1836-1838), these buildings reflect the early pioneering phase of prosperity, evolution of architectural styles and the social and religious aspirations of the Cox family.

To celebrate the bicentenary of the first land grants in the Mulgoa Valley, various activities have been planned by Mulgoa Progress Association for Saturday, November 7, commencing at 10 am.

The festivities will be opened by Her Excellency Professor Marie Bashir AC CVO, Governor of New South Wales at 11 am in Mulgoa Park.

There will be activities in Mulgoa Park (Mulgoa Road, Mulgoa) including displays of vintage cars, old motor bikes, antique machinery, Sydney Colonial Muzzle Loading Club, Nepean Historical Society and activities by local schools.

The Mulgoa Progress Association will conduct tours to the grounds of *Fernhill, Winbourne, Fairlight* and *Glenleig*h (garden and interior). Buses will leave from the Mulgoa Hall in Mulgoa Park, Littlefields Road, Mulgoa (10 km south of Penrith) at 1 pm. Inspections by bus only. Cost: $25 per person. Bookings: Send cheques, made payable to Mulgoa Progress Association, PO Box 71, Mulgoa 2745, with a stamped addressed return envelope and telephone contact details. For further information contact Kerry Spurrett, kspurrett@internode.on.net

GRANT FOR WORK ON TURKISH BATH

Restoration work on the Turkish Bath at Mt Wilson will be carried out during 2010 as a result of a successful grant application to the NSW Department of Planning, Heritage Branch by Mt Wilson and Mt Irvine Historical Society.

The society will contribute $16,000 towards the project to match the $16,000 grant. The work will involve the replacement of galvanised corrugated roof sheeting; and the painting of four timber louvers on the decorative roof tower located on the eastern side of the Turkish Bath.

The work is scheduled to take place between June and August 2010 and it is planned to close the museum during the period of construction.

Work to install lead moulding flashing at the base of the original entrance doorway has recently been completed.

BOOK REVIEW

The Burning Mists of Time: A Technological and Social History of Mining at Katoomba

by Philip J.Pells & Philip J.Hammon

WriteLight Pty Ltd, Sydney, 2009. $60.

ISBN 978 09775639 6 8

This book covers the geological and technological aspects of early shale mining in the Katoomba region and the history of the people involved. It also provides fascinating information on early life in Katoomba, as well as elsewhere in New South Wales, and an interesting account of the emergence of Scenic World, now the outstanding tourism attraction that occupies the site.

The book will be welcomed as a valuable contribution to the history of the region and is also easy to read.

There are absorbing excursions into byways, such as accounts of cooking recipes and medicine in mid-19th century Katoomba, that add to the work.

An attractively presented book, profusely illustrated with excellent colour and black & white historical and recent photographs as well as careful plans and maps to explain the geology and mining activities. Well worth buying.

Barrie Reynolds

DESCENDANTS HAVE LIVED ON KURRAJONG SITE FOR 184 YEARS

This article and images have been contributed by Mrs Kathie McMahon-Noff who was born on the same property that she now lives on and which has been owned by her ancestors since 1838.

Kathie and Louise McMahon were founding members of Kurrajong-Comleroy Historical Society originally formed to document the history of Kurrajong. The society now has a website and nearly 5000 images of the district.

Her "first love" is the history of Australian music. Kathie who is currently BMACHO's treasurer has had a very interesting life including working in leprosy colonies in New Guinea, after completing her training at Royal Prince Alfred Hospital.

Kathie McMahon, a descendant of a convict, Thomas Higgins, lives on land which has been continuously in the ownership of her ancestors for 184 years.

On June 30, 1823,Thomas Hinton, also a convict, was granted 50 acres at Kurrajong known as Portion 161 which he sold to Higgins on May 9, 1825 for twenty pounds.

Born in 1791, Thomas Higgins was convicted of shooting a British soldier and was sentenced to 7 years servitude. He arrived on the "Surry" in November, 1816. He was later proved innocent of the offence.

In about 1831, Higgins donated 2 acres of Portion 161 to the Church of England. This was on the corner of Bells Line of Road and Hermitage Rd. and it became the first denominational church and school in the Kurrajong Brush.

Thomas Higgins also owned several other properties. He willed the farm Portion 161 together with 3 cows in calf, a black horse "Captain" and a cart and harness at Kurrajong to his sister Mary McMahon in 1839. By then the estate was valued at one hundred pounds.

John and Mary McMahon who were free settlers sailed on the "Charles Kerr" from Limerick, Ireland on September 15, 1838 and arrived in Sydney on January 8, 1839.

They originally settled on Portion 161 near the creek close to Mill Road. With the formation of Bells Line of Road they moved up beside the road and built a small slab house called Luckenough

John and Mary McMahon's eldest daughter stayed on at Luckenough. John and Mary's youngest son Thomas moved onto 100 acres at "Dural View" on Comleroy Road. Thomas's third child James Edward moved back to Luckenough when he married Marie Norris. Here they raised 5 children and they built the Bellbird Echo Guest House in the late 1920's during the depression.

The guest house was a place where people enjoyed horse riding, tennis, moonlight hikes and great food. It was noted for its fresh cream, butter and milk all produced on this property.

Throughout the years produce had always been sold at Bellbird Echo. It started in the 1920s when the McMahon's neighbour D'arcy Douglas started selling fruit on the side of Bells Line of Road, Kurrajong Hills.

Mrs Marie McMahon in the 1930s and 1940s always had a stall at the weekends selling the fruit and vegetables from the farm.

Her husband Kevin tells a story of how in 1947, his neighbour, Les Taylor brought him 4 half cases and four full cases of oranges to sell and they were all sold by the end of the day.

This Bellbird Echo Fruit Shop became a landmark for travellers from Sydney to purchase local fruit and vegetables.

In the late 1940s Kevin planted an orchard of oranges, lemons, apricots, peaches, nectarines and plums to supplement the shop. Kevin also purchased produce from local farmers.

Mr McMahon also had a wattle bark business. The black wattles which thrive in the Kurrajong area had a very high tannin content and the bark was much sought after by the leather tanneries. Kevin McMahon with Brian Dunston and dogs took the wattle bark to the tannery every Thursday and stopped at the Parramatta fruit and vegetable markets on the way home to supplement their fruit supply for the shop. ***Continued page 7***

D'arcy Douglas selling fruit on his Kurrajong roadside stall with helpers including Kevin McMahon (the author's father) then aged about 10 years. All the fruit is in old type heavy wooden fruit boxes.

THINKING HERITAGE:

Many members will recall that BMACHO was created in response to concerns expressed at the Local History Conference held in Katoomba in 2005 regarding the parlous state of heritage services within the City of Blue Mountains As a direct result of this concern, the new City Cultural Strategy (2006-2011) included, for the first time ever, a substantial heritage component (30%).

"This was only made possible by BMACHO working in close cooperation with the different historical societies across the city and we are grateful for their help",BMACHO secretary, Prof Barrie Reynolds said this week.

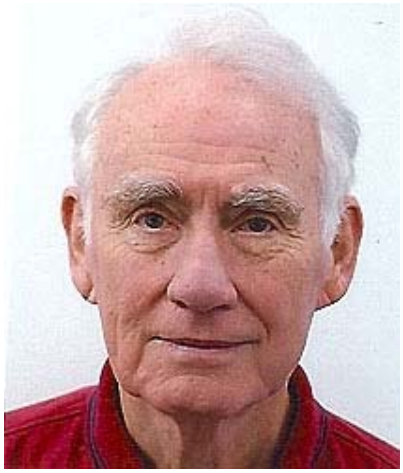
"Understandably, over the past three years BMACHO has devoted much time and effort to pressing council to rebuild and strengthen its heritage services. As a result:

- There is now one council staff member designated to handle any queries on heritage.
- The heritage advisor position has been reinstated (the advisor deals with development applications).
- The placing on-line of the substantial backlog of heritage site records is very close to completion and, we understand, is almost ready to be forwarded to State Heritage; it should then become available to the public. This backlog had built up over many years.

"Two important tasks remain: the formation of a community heritage advisory committee and the creation of the post of heritage officer, Barrie Reynolds said.

"We do not understand why there has been such reluctance on the part of council staff to move on the first issue. There is little cost involved. Action was approved by the general manager two years ago and council staff has even agreed on a planning meeting for the drafting of the terms of reference of the committee.

"Numerous successive 'reasons' have been given us during 2008 and 2009 for postponement of any action on the matter. Indeed, more time has probably been spent on these 'reasons' than would be involved in the planning meeting itself. We have now requested the meeting take place within September.



Barrie Reynolds

BMACHO's view is that the committee should involve the different societies, museums and similar bodies thus enabling them to have a direct input into council heritage matters.

"The other key task is the appointment of a heritage officer. Obviously, this would involve costs. At the same time, it is evident that a qualified and committed heritage officer is essential if council is to have a dynamic heritage unit and provide the Blue Mountains community with effective heritage services.

"Most of the matters mentioned above should be completed by the end of 2009. This would then free us to concentrate on the matter of the heritage officer as our prime concern in dealings with council during 2010."

First school in the Kurrajong Brush built in 1837

In about 1831 Thomas Higgins either sold or donated 2 acres of Portion 161 to the Church of England.

This land was on the corner of Bells Line of Road and Hermitage Road and it became the first denominational church and school in the Kurrajong Brush.

Vivienne Webb describes the history of the Church of England Denominational School[1]:

Application was made to the Government in1831 by Bishop Broughton for a Parochial School for boys and girls in the Curryjong: "In all these cases it will be requisite that some expense *should be incurred in the erection of Huts containing two rooms and a skelling each, to be occupied as places of instruction for the children and as Residences for the Teachers: it will also be reasonable that about 1/2 acre of land to be employed as a garden should be attached to each Dwelling House and fenced with a substantial three rail fence.*

The salary of the Masters according to the present Regulations will be £30 per annum with an allowance of three pence per week for each child actually in attendance and of £10 per annum to each school Mistress for instructing the Girls in Needlework.'[2]

The school was built in 1836 at Hermitage Rd, Kurrajong Heights by E.E. Lord at a cost of £200. The building also served as a church and school until St Stephens Church was built in 1873 at Kurrajong'.[3]

Surveyors Institute members impressed by Mt Wilson's Scrivener exhibition material

Kathy and Ray Harrington recently found the photograph in the National Library of Australia of Charles Robert Scrivener sitting by the steam engine at the Mt Irvine sawmill.

Material used in the *Charles Robert Scrivener, 1855-1923, Capital Surveyor* exhibition at Mt Wilson is being sought for displays in Canberra and Sydney.

In 2001, the Mt Wilson & Mt Irvine Historical Society mounted a major exhibition on the life and work of CR Scrivener who is best known for his work in surveying numerous sites in NSW for the selection of a site for the Australian Capital Territory and Canberra.

He also surveyed the Mt Irvine area as well as the access road across Bowen's Creek from Bilpin.

Between 2002 and 2004 the exhibition travelled to the RTA headquarters at Parramatta, Mt Tomah Gardens and the Fossil and Mineral Museum in Bathurst.

The material has been in storage at Mt Wilson for some time now as the Society has been negotiating with a number of groups with the aim of having the exhibition on permanent display in Canberra.

Born in Canterbury in south west of Sydney, Scrivener was appointed the first director of Commonwealth Lands and Surveys in 1910 and retired in 1915.

The Scrivener Dam on Lake Burley Griffin is named in his honour.

Reporting to members of Mt Wilson & Mt Irvine Historical Society, president Des Barrett stated that members of the Institution of Surveyors NSW as well as their Seniors Group and the Canberra Division of the Institution were all delighted with what they saw of the exhibition material and expressed their wish to see the material displayed both in Canberra and Sydney.

The display will be used, subject to a number of conditions being met, in a number of important milestones leading up to the centenaries of the ACT-NSW border survey and the survey of Canberra itself.

The above image appeared in the August 2009 Newsletter No 20 of the Mt Historical & Mt IrvineSociety.

WALKS & TALKS

Glenbrook and District Historical Society's Walks and Talks program for Saturday, September 26 is titled *Dunn's Sawmill site, Lennox Bridge*. For further information

pplinden@yahoo.co.au

Welcome to Mid Mountains Historical Society

The Mid Mountains Historical Society is the latest organisation to join the Blue Mountains Association of Cultural Heritage Organisations. This society has done considerable historical research on the township of Lawson. It has also been involved over a number of years in negotiations with the RTA and Blue Mountains City Council in a bid to save the Lawson's Mechanics Institute threatened by highway widening.

POSITIONS VACANT

Volunteer Required

Valley Heights Locomotive Depot Heritage Museum

Volunteers are required to work in the Valley Heights Locomotive Depot Museum shop.

Some experience with Cash handling, Catering, Food handling or Customer Service experience would be an advantage but is not essential. All training will be provided.

The role involves ticket sales to customers, retail sales of the museum's range of souvenirs and memorabilia, as well as refreshments including coffee/tea and light snacks. We are looking for diligent and reliable people with a friendly, outgoing nature who like dealing with people.

The museum is open on the second and fourth Sundays of each month, as well as additional Sundays during public holidays from 10am to 4pm. Volunteers working in the shop would be expected to be available from 8.30am to approximately 4.30pm on open days. You will be expected to be available to be rostered every 2nd or 3rd open day.

If you feel you could fulfill this voluntary opportunity and would be interested in trying something new, please contact our Retail Manager, Steve Corrigan on 4759 1980 or sjc_alco@pnc.com.au

Wallerawang and Charles Darwin

The visit of Charles Darwin to Wallerawang is thought so important that the Lithgow branch of the National Trust of Australia (NSW) has built a memorial to the acclaimed scientist, Charles Darwin. Darwin was a diligent man who kept extensive diaries and note books. From these it is possible to appreciate much of his journey and the locations that he described.

Within the context of a five year voyage in the *Beagle* , the few days he spent at Wallerawang may seem insignificant. However, they had a profound influence on Darwin's thinking about evolution.

He collected a range of specimens and samples at the location and when Darwin first saw the platypus it prompted one of the most significant entries in his diary. *"Earlier in the evening I had been lying on a sunny bank [of the Cox's River] and was reflecting on the strange character of the animals of this country as compared to the rest of the world. A disbeliever in everything beyond his reason, might exclaim, 'Surely two distinct Creators must have been [at] work; their object however has been the same and certainly in each case the end is complete".*

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 40 Hume Avenue, Wentworth Falls 2782
E-mail: bmacho.heritage@gmail.com
Website: www.bluemountains.heritage

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group, Friends of Everglades, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum, Mid-Mountains Historical Society, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society (including Turkish Bath Museum), Mudgee Historical Society, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch), Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians, Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway. The following are individual members: Ms Wendy Carlson, Ray Christison, Ms Pamela Hubert, Associate Professor Ian Jack, John Leary OAM, John Low, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2009-10 is: John Leary, (president) Ian Jack (vice president), Barrie Reynolds (secretary), Kathie McMahon (treasurer), Jean Arthur, Ray Christison, Lyn Fowler, Doug Knowles, and Dick Morony (public officer), Peter Stanbury.

AUDITOR: Sue McMahon, B Comm CPA

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

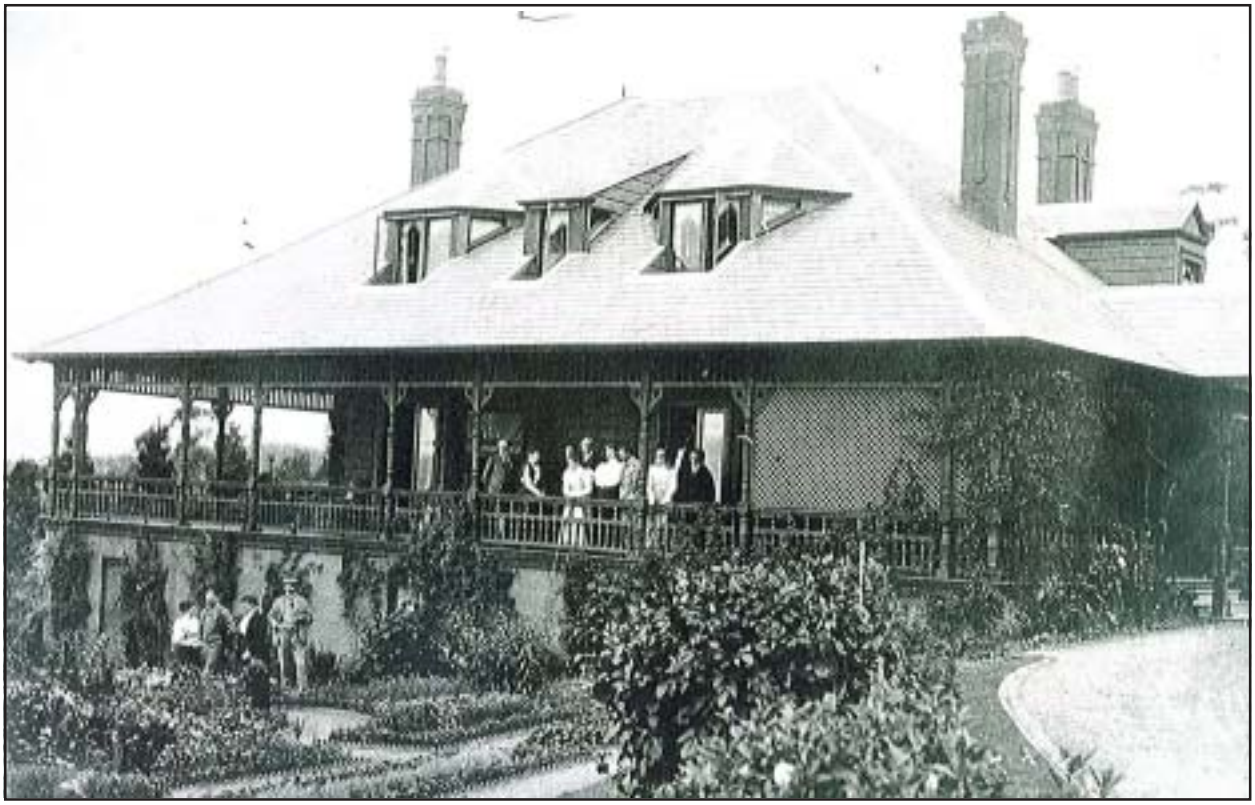
HERITAGE is BMACHO's official newsletter.

HERITAGE

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS

NOVEMBER-DECEMBER 2009 ISSUE No. 6

Heritage celebrated at Lilianfels



"Katoomba will in the future be historic from having as a resident one eminent Chief Justice, Sir Frederick Darley and his family at Lilianfels. Sir Frederick has spared no pains in laying the foundation of a fine garden and is said to have trenched a large portion of his property in order to grow fruit successfully." Illustrated Sydney News 1890

From the period in which this article excerpt was published in the *Sydney News* 1890 to the current day, Lilianfels has enjoyed a prestigious and historically important past that today, thankfully, is not lost but protected and moreover, truly celebrated. The original owner, Sir Frederick Darley, it is believed would be more than gratified to learn.

Sir Frederick Matthew Darley was born on September 18, 1830 in Dublin, Ireland. The first child of Henry Darley of Wingfield, Bray County Wicklow and his wife Maria Louise nee West.

At Hunsdon, Hertfordshire on December 13, 1860, Darley married Lucy Forest Brown, from Melbourne, a daughter of Captain Sylvester Brown (master mariner) and his wife Eliza Angell nee Alexander.

The novelist, T A Brown(e) who was to become a well known author in Australia writing the bush ranging classic "Robbery Under Arms" as Rolf Boldrewood, was the eldest brother of Lucy. It was while travelling with her brother to England that she originally met Sir Frederick.

Darley and his wife came to Australia in 1862, on the advice of Sir Alfred Stephen (the Chief Justice of NSW) who convinced him that he would further his career in the colony. Sir Frederick was knighted in 1887 and served five times as the Lieutenant Governor of NSW. The longest and most important being from January 24, 1900 to May 27, 1902, spanning the creation of the Commonwealth of Australia in 1901.

In August 1888, Sir Frederick Darley purchased more than 11 acres of land adjacent to Echo Point in Katoomba and enlisted Varney Parkes, the architect son of close friend, Sir Henry Parkes to design Lilianfels as a summer home.

Pictured above Sir Frederick and Lady Darley, family and friends with NSW State Governor Duff and Lady Duff on the verandah of Lilianfels in 1893.

Continued on page 2

Lilianfels of yesteryear restored

The Darleys had seven children, six daughters and two sons and it was Lilian, who died at age 22 suffering tuberculosis, for whom the Katoomba property was named: the ending 'fels' is German meaning, 'rocky ground'.

During the years in which Sir Frederick and Lady Darley resided near Echo Point, nearly every noted visitor to Australia accepted their hospitality and enjoyed the magnificent outlook.

Royalty, vice-royalty and princes of statesmanship, jurisprudence, science and art came in turn to view the mountains from the magnificent vantage point of Lilianfels.

Dine indoors or on Darley's balcony. Darley's Restaurant, boasts richly appointed fittings, stained glass windows, open fireplaces and magnificent views

Before his death, Sir Frederick sold Lilianfels in October 1908 to George Begg Vickery on a walk out, walk in basis. Vickery was a partner in E. Vickery & Sons, merchants and colliery proprietors who owned warehouses in Sydney, the Coal Cliff and Mount Keira coal mines near Wollongong.

Like the Darleys, the Vickerys maintained Lilianfels as a summer residence. Joyce Vickery, one of George's daughters, became a well known and distinguished botanist attached to the Herbarium of the Sydney Royal Botanic Gardens.

Lilianfels was sold by George Vickery in March 1912 to Mr Albert A Kemp of Sydney. This was to be the first time that Lilianfels was used as a permanent residence, Mr Kemp and his wife Eliza Jane were prominent in the activities of the Presbyterian Church and the Red Cross in Katoomba. They opened the grounds to the public for fetes and charitable fundraising.

Between 1915 and 1920, the Kemps subdivided and sold about 2 acres of the land parcel, and in November 1920 sold the remaining property to the Hon James Joynton Smith Trust.

Again, the land was subdivided into separate lots, sold by auction on January 26, 1921. Lilianfels was retained on approximately 2 acres of land.

A Sydney manufacturer, Samuel George Baker, bought Lilianfels in 1923 and between this time to around 1952, he leased the property to various people as a guest house.

Darley's house balcony circa 1893

Lilianfels quickly became a popular Blue Mountains retreat with many guests returning year after year for their annual holiday.

Baker sold Lilianfels in 1952 to Wladislaw Ujma, a Polish water construction engineer who continued to lease Lilianfels as a guest house.

After his death in 1964, the property was passed to his wife, Zofia who, unfortunately, had little funds for upkeep and both the house and grounds fell into a state of disrepair.

'.....Gwen Silvey, the then research officer of Blue Mountains istorical Society saw the plight of Zofia.....'

Thankfully, Mrs Gwen Silvey, OAM the then research officer of the Blue Mountains Historical Society, saw the plight of Zofia and rallied for the Heritage Section of the Department of Environment and Planning to place a conservation order on the house and grounds under the Heritage Act (Gazetted July 27, 1984), along with a classification by the National Trust.

A grant was made for the restoration of the roof and other stabilising repairs. ***Continue page 3***

Lilianfels today -- a heritage indulgence

Lilianfels was purchased in December 1987 by an Australian company, Derani Pty Ltd, which immediately addressed the security of the house and the restoration of the grounds by hiring caretaker and qualified horticulturist, Colin Slade.

Under his care and expertise, the gardens were restored and with new owners Nara, purchasing Lilianfels in 1992, the plans for a country-style guest house on the adjoining property, was quickly undertaken.

The new complex's architect, Ron Edgar took many features of the old Lilianfels House and incorporated it into the new Country House with both the ceiling structure of many rooms and the roof line echoing the shape and form of the original summer home.

Orient-Express purchased Lilianfels in 2000 and the company, along with the hotel manager, Grant Raubenheimer, are committed to the protection and celebration of Lilianfels' heritage while promoting the property as a premier luxury property within the World Heritage listed Blue Mountains area.

Today, the Country House consists of: 81 guest rooms and 4 suites with a 19th century-styled décor, reading room, billiards room, lobby lounge overlooking the Jamison Valley, Darley's restaurant located within the original summer home, indoor and outdoor swimming pools, tennis court and a spa and health club featuring a herbal bath, which is the original deep sided bath taken from Lilianfels House during the restoration with the words 'Macfarlane Patent, Glasgow' engraved on the side.

From December 1, Lilianfels will host a weekly 'historical high tea' which will offer guests the chance to join a guided tour to learn about the property's history following the old historic Garden Amble route. The tour ends with an indulgent high tea in the lounge of the Country House.

For more information about Lilianfels or the new Historical High Teas, please visit www.lilianfels.com.au

HERITAGE is grateful to Grant Raubenheimer, Hotel Manager at Lilianfels who with Ms Kim Salt, Orient Express' Marketing Communications Manager (Australia) has provided us with material and images for this article. Mr Raubenheimer has been in the hospitality industry for 25 years and is a great believer in the importance of the preservation of past eras, as well as protecting our own current story for our children's children to admire and enjoy as much as we do and have done.

At Lilianfels, Grant has a philosophy of delivering guests with a truly unique experience and the hotel's heritage coupled with the convenience of modern technology and attentive staff make this possible. Lilianfels is a founding member of BMACHO.

Grant Raubenheimer

MINISTERS' COUNCIL CUTS COLLECTION FUNDING

The Cultural Ministers Council has decided funding of the Collections Council of Australia will cease in June 2010.

Established by the Cultural Ministers Council in 2004, the Collections Council has worked to bring the collections sector - archives, galleries, libraries and museums - together.

Last month it released plans to develop and promote a new model for sustainable scientific and cultural collections in Australia.

The Collections Council's chair, Noel Turnbull, said that abolishing the CCA would not help solve significant fundamental problems facing the collections sector.

The Collections Council's operations over four and half years with its four person staff have been supported by the Cultural Ministers' Council and the Australian Government with grants totalling$2.1 million.

Mr Turnbull said: "Australia's Arts Ministers say they won't spend $500,000 on keeping the Collections Council going, yet our equivalent organisation in Norway, a country smaller in area and population than Australia, has 70 employees and an annual budget of 23.5 million Euros."

From the president's pen.....

HERITAGE PHILANTHROPY

The heritage sector is constantly on the alert for threats to Australia's built heritage and hopefully, the "midnight bulldozing tactics" of developers is now something in the past.

But the threat today is lack of funding which if not arrested will see more and more properties fall as they decay and become piles of sandstone rubble or termite eaten timbers turned to dust.

While government in recent years has contributed towards the cost of acquiring, restoring and maintaining some heritage properties, there is still a dearth of funding available from the public purse.

One of the exceptions perhaps is the iconic group of 10 or so historic buildings under the management of the NSW Government funded Historic Houses Trust which has a respectable income from the State Government ($19.3 million in 2007-8) supplemented by limited resources from philanthropists.

By comparison the National Trust of Australia (NSW) with ownership of 38 priceless properties across NSW including three in the Blue Mountains has no ongoing government funding relying mainly on bequests, membership, partnership sponsors and fund raising by an army of volunteers.

Very occasionally, the corporate sector comes along as has happened at Lilianfels now owned by Orient-Express, where vast sums of money have been spent to conserve the historic and original homestead built for the sixth Chief Justice of NSW in 1889.

In nearby Wolgan Valley rich in historical and environmental significance, the $125 million Emirates Resort has through its conservation management plan taken its architectural cue from a nearby homestead built in 1832, which has been restored. Charles Darwin was a visitor to the property in 1836.

It could be argued that both developments although available to the public have limited access because of commercial restraints. But what is undeniable is that without funding from these corporate groups this conservation would have been of a lesser quality.

Some fund raising and donations is tax deductable but this is not sufficient to encourage large scale support from developers and the entrepreneurs.

In other parts of the world, notably Britain and USA there is a different approach to heritage funding. In these countries the community through the corporate sector and philanthropists plays a much bigger part in funding conservation.

But the key to this overseas success seems to be in a better system of tax relief for heritage conservation.

The recently released Productivity Commission's draft report, *Contribution of the Not-for-Profit Sector* claims there has been a considerable growth in corporate philanthropy in Australia in recent years.

It is perhaps time that the heritage sector started to engage the Federal Government in debate as to how government support such as taxation breaks might see an increase of this philanthropic support being dircected to the conservation of Australia's built, natural and cultural heritage.

John Leary, OAM - President, Blue Mountains Association of Cultural Heritage Organisations

VISITORS TO MUSEUMS AND HISTORIC VENUES: ARE THEY WORTH IT?

The Journal of the Museums Association in the United Kingdom is a mine of interesting information on what is going on in the museum field.

The February edition was no exception. It contained a summary of a survey of visitors to English museums, broken down by city and region.

I was fascinated to learn that more than half the population of England visit museums at least once each year. The borough of Kensington and Chelsea in London was the top-scorer at 77.8%.

Even the worst, Barking and Dagenham, to the east of London scored 36.6%. The figures for other Western European countries and for North America would I am sure be comparable.

Tourism Australia produces annual figures on our cultural and heritage visitors. These comprise 52% of the total overseas visitors and the top two cultural and heritage activities, for both overseas and domestic Australian visitors, were visiting museums and art galleries and visiting heritage buildings, sites or monuments.

In 2008, these overseas visitors spent $17 billion in the course of their visits.

Obviously, museums and other heritage venues are popular with internationa l visitors and are of substantial financial benefit to Australia.

Perhaps we should be giving more thought to the economic potential of sites and museums.

Barrie Reynolds

DIRECTOR OF HERITAGE TO SPEAK AT BMACHO MEETING THIS MONTH

Director of NSW Heritage Branch, Petula Samios has accepted an invitation to be the guest speaker at a special meeting of BMACHO to be held on Friday, November 20.

The meeting will be held at the Glenbrook Bowling Club commencing at 2pm. A charge of $10 per person will be made to cover the cost of afternoon tea. Bookings are advisable and cheques made payable to BMACHO should be mailed to Barrie Reynolds, 40 Hume Avenue, Wentworth Falls 2782 before November 13.

Ms Samios will speak on the workings of the Heritage Branch and where it fits within the Planning Department. She will also speak on recent changes to the Heritage Act.

Ms Samios has worked for the Department of Planning for nearly 30 years in variety of roles and functions: regional planning, property and development, urban consolidation, heritage, executive support, planning co-ordination, policy and strategic development.

Prior to her joining the Heritage Branch in March 2008, she was the Director of Metropolitan Strategy Development which oversaw the implementation of the Metropolitan Strategy and the production of the ten metropolitan subregional strategies, and implementation of Senior Living SEPP, SEPP 70 and SEPP 10. She also held regional director positions in the Sydney North regional team and the Sydney East r egional team.

Her current focus has been to integrate the former Heritage Office into the Department of Planning ensuring that there is a strong synergy between heritage and planning.

The Branch is also working closely with the regional planning Branches and the assessment teams which are responsible for thePart 3A applications.

A new Thematic Listings program has been initiated with a strong focus for identifying new items on the State Heritage Register which are part of NSW history.

Ms Samios is also responsible for overseeing the recent amendments to the Heritage Act.

This is the second in a series of public lectures on Heritage policies, organised by the BMACHO.

Heritage minister promised by Coalition

A promise to give heritage matters an independent voice in a future Coalition State government was well received by about 30 members of the heritage sector who attended a recent meeting at Wentworth Falls.

The Shadow Minister for Climate Change and Environmental Sustainability, Catherine Cusack, MLC said a Coalition government in NSW would appoint a minister for heritage separate from the minister for planning and the minister for environment and climate change.

“We will also move the Heritage Council out of the Department of Planning where its voice is silenced.

“Our positive, practical plans will empower communities and ensure heritage issues receive the strong advocacy they deserve.”

Ms Cusack was the first of a number of politicians from all parties to be invited by BMACHO to speak about their policies on heritage and hear first-hand about local heritage concerns.

The association has embarked on a program to better inform the community and government at all levels about the need for a more strategic approach to preservation and conservation of Australia’s cultural heritage.

“The Blue Mountains has a beautiful inheritance of natural, built and cultural heritage — we need to make sure the heritage of places like the Blue Mountains has an advocate in cabinet,” Ms Cusack told the meeting.

“Heritage items are today and tomorrow’s links to our community’s yesterday.

“Conserving them and experiencing them connects our community and future communities to our history – and we are culturally and educationally richer for it.

“Currently the cause of heritage conservation lacks an independent advocate within government.”

In 2007, the Heritage Office was relocated into the Department of Planning compounding the conflict of interest faced by the planning minister and adding to the perceived lack of independence surrounding heritage conservation in NSW.

With one exception, every other state and territory ensures heritage has an advocate at the cabinet table by appointing someone other than the minister for planning as the minister responsible for heritage.

In most jurisdictions, including federally, heritage is located within the environment portfolio.

The NSW Liberal Nationals have promised to ensure that heritage conservation will be given a strong voice in government and strength through Independence.

Catherine Cusack, MLC

CUSTOMS IN THE BLUE MOUNTAINS

by Peter Chinn

Mention customs to anyone and they'll automatically connect with the modern image of the organisation so successfully portrayed in the television series "Border Security".

Control of our borders and economic zone to prevent smuggling and entry of illegal immigrants is undoubtedly the principal function of the organisation which is now known as the Australian Customs and Border Protection Service but up until fairly recent times there were many other operational responsibilities away from the traditional customs areas of seaports and airports. One such was excise.

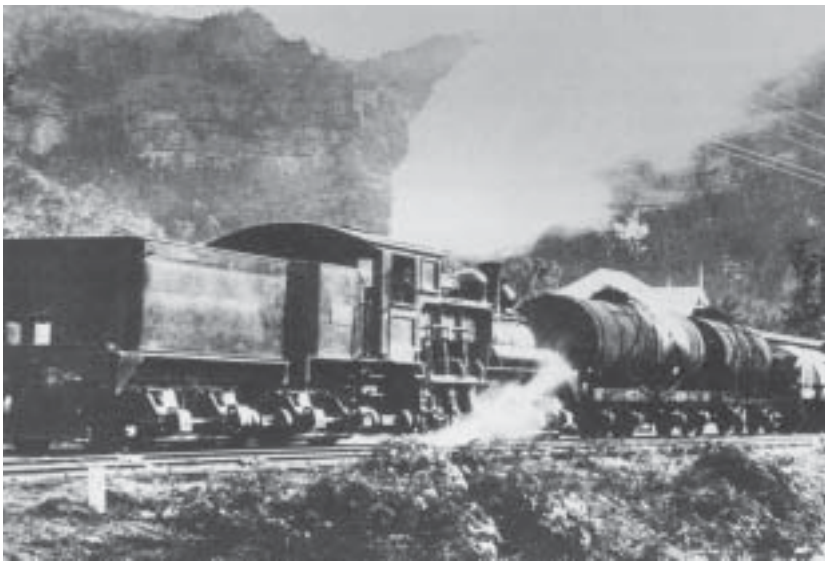
Excise, at least so far as Australia is concerned, has its origins in England when it was introduced as a temporary tax to help fund the Civil War in the 1640s. Samuel Johnson, in his 1755 dictionary described excise as: 'A hateful tax levied upon commodities, and adjudged not by the common judges of property, but by wretches hired by those to whom excise is paid.'

Excise is a duty levied on certain locally-produced goods intended for home consumption. The main sources of this revenue today are petroleum products, beer, spirits and tobacco but in times past it was also payable on coal, playing cards, matches and sugar – to name but a few items – indeed a motley assortment.

The collection of customs and excise duties has commonly been the responsibility of the one government agency in many countries of the world including Australia until 1998 when the excise function was transferred to the Australian Taxation Office.

In the United Kingdom, Australia's sister organisation was Her Majesty's Customs and Excise and in Australia excise was specifically acknowledged in the title from 1956 to 1975: the Department of Customs and Excise.

In Australia, until about forty years ago, goods subject to customs or excise duties were under the physical control of officers of the Customs Department. Premises where customable goods were kept or excisable goods were manufactured were required to be licensed in accordance with the relevant acts and regulations.



A steam engine pulls tankers of fuel oil from Newnes shale oil refinery on the Wolan Valley railway line circa 1910. Photograph courtesy Peter Chinn.

If an importer did not wish to immediately pay customs duty at the time of importation the goods would go into a bonded warehouse where a customs officer, known as "locker" was stationed. This officer kept the keys and controlled all the secured areas of the bond (as these premises are known) and would release the goods when duty was paid.

In establishments producing excisable goods such as breweries, distilleries and oil refineries there was an excise officer, similarly having custody of the keys to all storage places, who would authorise release of goods when duty was paid.

Which is by way of introduction to the reason for the stationing of a customs officer at Newnes Junction, near Bell, in the early 1940s.

In 1938 with war on the horizon the Commonwealth and New South Wales governments saw the need for ensuring local supplies of fuel oil and backed National Oil Pty. Ltd. in their project to establish an oil refinery in the Capertee Valley. Petroleum products were to be extracted from the abundant shale deposits found there, as had been previously been done at the large refinery in the adjacent Wolgan Valley at Newnes which had finally ceased production in 1934.

A town – Glen Davis - was established in the Capertee Valley and the refinery built, commencing operations in 1940.

As Glen Davis was remote from the nearest railhead on the Mudgee line, fuel was pumped 65 kilometres to storage tanks at Newnes Junction via a five centimetre pipeline that ran from the refinery across the mountain range to the site of the abandoned Newnes refinery and then along the route of the long-disused Wolgan Valley railway line.

At Newnes Junction there were two 2,000,000 gallon tanks as well as several smaller tanks where fuel was stored until shipped to Sydney by rail tank wagons. During World War II five armed soldiers guarded this facility.

It appears that the need for the military presence was not dictated by the threat of imminent Japanese invasion of this remote place but because of previous attempts (and some successes) by thieves tapping into the pipeline to steal the precious rationed fuel.

Customs officer at Newnes Junction

However, ultimate control of under bond fuel lay with the Department of Trade and Customs not only to ensure that the correct duties were collected but also in enforcement of the wartime regulations governing the rationing of petroleum products.

For these reasons the bulk storage facility at Newnes Junction was licensed as a warehouse under the Customs Act and a locker had to be stationed there.

Nowadays, Newnes Junction consists of the old railway station, officially abandoned as a station, without any identifying signage but which seems to serve some control function in relation to the nearby heavily-used coal-loading loop line. There are one or two houses in the nearby road and it would seem that the situation has probably not altered much over all the years. It could be scarcely called a settlement.

The early years for the Customs officer stationed at Newnes Junction could only be described as "Spartan" from reports contained in official records. Early in 1942 the officer was impelled to request the Collector of Customs (chief officer of Customs for NSW) for provision of a departmental residence.

The bureaucratic protocol of the time necessitated the Collector's representations to the Comptroller-General of Customs in Canberra for approval.

The Collector reported on the locker's deplorable situation as follows: '...first he had to camp, then he got board for a period and later obtained a furnished house, which he has had to vacate as the owner has returned to Newnes Junction.'

Added to this the locker's wife had been obliged to return to Sydney to live alone as their son had been called up for military service.

Not surprisingly, due to the exigencies of the war effort, no action was taken to improve the locker's accommodation there in 1942 or indeed during the succeeding years of the war.

Subsequently, in a document dated August 2, 1945 relating to Post War Public Works and proposing the provision of accommodation at Newnes Junction the officer in charge of Customs warehouses had this to say: 'The climate of Newnes Junction is one of extremes from exceptionally cold weather in the winter to very hot days in the summer.

'During the summer months blowflies and other flies and mosquitoes are very prevalent and gauze protection to windows is essential.

'The bond [licensed warehouse] is situated at a small siding in the bush about 12 miles from Mt. Victoria and 8 from Lithgow with a very limited train service to either shopping centre… electric light and power are available but as storms are a frequent occurrence during some seasons the power service sometimes breaks down and recourse would have to be made to fuel stoves and fire places for cooking and warmth.

'If slow combustion heaters were provided instead of fire places for warmth provision would have to be made for coke supplies.

'With no fuel merchants in close proximity and firewood scarce and hard to collect an officer would find it difficult but not absolutely impossible to obtain necessary supplies of fuel.'

The file also noted: '...the bond is situated at an altitude of 3500 feet and weather conditions run to extremes. If an officer is to be stationed at such an isolated place, a fair degree of comfort is essential.'

Petrol rationing was abolished when the Menzies Government was elected in 1949 and the need for heavily subsidised local fuel declined in the face of free availability of the imported product.

The government withdrew its assistance to Glen Davis refinery and amid considerable controversy the operation closed in 1952.

Today, Newnes Junction in its splendid isolation and anonymity slumbers on. There are no old local identities around to tell tales of the customs officer unlocking fuel tanks, checking the loaded rail tank wagons or complaining about blowflies and mosquitoes.

Newnes railway station circa 1938, after the line had closed. Photograph courtesy Peter Chinn.

Peter Chinn is President of the Springwood Historical Society Inc and author of "The Thin Blue and Red Line" - A history of the military and police presence in the Blue Mountains between the Nepean and Cox's Rivers 1814-2005.

After a 40 year career with Customs, Peter retired then soon after returned as History Officer for Australian Customs and Border Protection Service where he now works part time.

ANZAC HERO GET NEW HEADSTONE

The Lawson Cemetery grave of Henry James Hunter a World War 1 veteran is to be re-dedicated with the headstone reflecting his war service record service.

Recently members of the Blue Mountains Family History Society, Lynne Tocher and Suzanne Voytas were involved with the project of updating the cemetery records at the Lawson Public Cemetery.

While checking data they came across a badly neglected grave and the inscription on the headstone stated that the person was an ANZAC. There was no official emblem displayed and the researchers felt that if the person was an ANZAC he deserved a better memorial.

When they contacted the Office of the Australian War Graves Commission, they were told that before any work could be done to restore the grave, it was necessary to find any living descendants and obtain their permission.

For family history researchers that was easy.

It was found that Henry James Hunter had three grandchildren. Sadly his descendants were not aware of their grandfather, let alone any knowledge of his World War 1 service record.

Henry James Hunter enlisted on September 24, 1914 at the age of 46 years and his service number was 1066, with a rank of private. His unit 1st Battalion, C Company embarked from Sydney on Transport A19 Afric on October, 18 1914.

Henry James Hunter was at Gallipoli on April 25, 1915 and was evacuated from Lone Pine August 16, 1915 suffering from fever and pulmonary TB.

In December 1915 he was discharged cured from hospital and in May 1916 he joined the 1st ANZAC Entrenching Battalion serving with this unit at the Somme, near Ypres.

While serving with this unit he received the Meritorious Service Medal. The citation read;-

For devotion to duty and disregard of personal safety during intermittent shelling of Bapaume for two months and energetic meritorious service in the organization of a) Brickfields area, b) Bapaume area, c) Blequin area, and d) Reinforcement Camps area. His conduct and bearing in the A.I.F. since September 1914 has set a fine example.

He was promoted several times in the field and was Temporary Regimental Sergeant Major when he applied for discharge. On his return to Australia he was discharged on June 6, 1918 with the rank of corporal.

Henry James Hunter was living at Linden Lodge, Linden when he died on November 16, 1923.

The Office of the Australian War Graves Commission found that he met the criteria to have his grave maintained by the department.

On November 7, 2009, the grave will be rededicated, with his grandchildren and great grandchildren present. One person will be travelling from Alice Springs, NT.

Pictured above is a plaque bearing the AIF Rising Sun badge and the inscription 1066 [his army service No.] Corporal HJ Hunter 1 ANZAC Entrenching Battalion 16 November 1923 Age 53 has been set in the headstone. Pictured at left the original grave. Photographs John Leary, OAM and Lynne Tocher.

Peter Stanbury volunteers for Cambodian museum work

BMACHO committee member, Dr Peter Stanbury, recently spent over two months working in the National Museum of Cambodia in Phnom Penh as a volunteer in the Australian Business Volunteers scheme (see website http://www.abv.org.au/).

One of his tasks was to assess and provide conservation advice about their photographic collections. These consist of about 4000 glass negatives of whole plate size dating from about 1890 - 1920; 5000 21/4 square film negatives dating from 1930 - 50 and many thousands of prints.

The glass in the glass plates appeared to be breaking down. On some of the plates a white powdery substance was being deposited and many other plates appeared damp.

Both manifestations appeared on the glass side; by and large the emulsion side was not affected. The plates had been stored horizontally in boxes containing about 8 - 12 plates.

Pictured is Dr Stanbury stacking the glass plates, cleaned, rewrapped and boxed.

UNESCO Australian *Memory of the World* Register contribution

Congratulations are due to Lois Sabine of Springwood who after beavering away for over a year on a project, on October 16, 2009, saw it added to the UNESCO Australian *Memory of the World* Register where it will accompany just 30 carefully selected items incuding James Cook's *Endeavour* Journal and the Mabo case manuscripts. (http://www.amw.org.au/register/amw_reg06.htm)

Working full-time for the Department of Lands, Lois has indexed the 'Old Register 1-9' which are nine volumes of assorted records of agreements made between 1798 and 1825.

Those agreements range through sales of land, division of property between individuals, powers of attorney, promissory notes, sales of articles including live-stock and crops, hire of ships, building contracts, leases, apprenticeships as well as pre-nuptial and separation agreements.

President of Blue Mountains Historical Society Inc., Dr Peter Rickwood in alerting **HERITAGE** to Ms Sabine's achievement said, "What a variety and all to be found within a single DVD containing pdf files of indexes and images of scanned pages from the original registers.

Image No. 1 is from Book 5, Page 10, Entries 402 to 404 are from 1811 and include a bill of Sale, Bargain and Sale and a Deed of Gift from William Packer to his son William James Packer.

Reproduced with the permission of Land and Property Management Authority.

"What a treasure trove for historians interested in the founding years of the Colony! Moreover, the files can be electronically searched for a particular person – maybe an ancestor!" , said Dr Rickwood

Ms Sabine said, when she was asked by the Department of Lands to create an entirely new and complete index for these most important historical records she was thrilled.

"The original index was misplaced when the Old Register was transferred from the custody of the Supreme Court to the re-established office of the Registrar General in 1857.

"Despite the Registers being thought of as showing land transactions only, I was aware of the wealth of other personal information concerning the lives of our earliest settlers held within them.

"Almost a year later, on completion of my work transcribing and indexing the entries from the original registers, the work was transformed by the Department of Lands into a searchable DVD, covering registration dates which range from 1802 to 1825.

"It is important to note that the dates in the Register are those of document registration only, not necessarily the date on which the agreement took place which could be years earlier."

The DVD is in two parts. Part one is the index to the complete nine volumes. Part two repeats the index, but a click on the entry slowly reveals the image of the original page.

Index columns 'From', 'To' and 'Details' are listed alphabetically. To get an overview of the wealth of information available, a search of the 'Details' column will be found very rewarding. All streets, townships and locations are listed.

Lois Sabine is a member of the Blue Mountains Historical Society, the Society of Australian Genealogists and the NSW Writers Centre.

She has worked weekly for the past 8 years as a volunteer indexing all kinds of records at the City of Sydney Archives. In addition for the past seven years she has volunteered at State Records at Kingswood working on Soldier Settlement Records.

Lois does research for others. Lois has recently concluded the very large index for Jan'Barkley Jack's new book "Hawkesbury Revealed" which has just been launched.

When the City of Sydney Council boundaries were extended Shirley Fitzgerald's book "Sydney's Streets" became out of date.

Lois was invited to research and index all of the additional suburbs.

Lois Sabine

This work is now available on the council website.

It was due to her connection with that publication that the Dept of Lands became aware of her work and asked her to do the index for the Old Registers.

Australian *Memory of the World* Register

Continued from page 9

Slotted in between are Affidavits, Agreements, Arbitrations Bonds, Articles of Agreements, Assignments, Debts, Deeds of Trust, Letters and Powers of Attorney, Gifts, Indenture of Apprenticeships, Marriage and Separation Agreements, Promissory Notes, Sealing, Shipping, with all Public Houses easily found under 'Sign of —'

While many of the entries are connected to land, the following entries are some of the more personal examples**.**

Agreements. William Nash agreed to give Eleanor Logan one half of all that he possessed in this country. Bk 1, P 154, entry 1177.

Bonds. Edward Wills signed a Bond to William Bennett for Wills to keep the peace. Bk 1, P 83, entry 426.

Debt. William Gore, Provost Marshall, sold John Bowman's farm Archerfield to John Reddington for debt. Bk 5, P 230, entry 998.

Gifts. Thomas Rickerby gave to his godson William Gray an allotment of land of 054½ rods, part of Catherine Farm [Windsor]. It was to be held in Trust by William's father John Gray until William's maturity. Bk 8, P 29, entry 39.

John Coffee gave to Ann Kinsela No 4 Cumberland Street, skillion and ground on condition that she did not annoy him. Bk 5, P 248, entry 1047.

Indenture of Apprenticeships. These were given for blacksmiths, cabinet makers, pipe makers, rope makers, seamen, shipwrights, shoemakers, engineers, wheelwrights and navigators.

Marriage Agreements. Thomas Broadhurst acted as Trustee for Sarah Packer, widow, to make arrangements for her to retain her property left to her by her late husband William upon her marriage to Robert Waples. Bk 8, P 161, entry 237.

Marriage Separations. Trustees for Robert Waples and Trustees for Sarah Waples [nee Packer]

Image No 2 is from Book 1, Page 76, entries 358 to 365. They include Agreements, a Will, Power of Attorney and an Assignment to sell a house.

Reproduced with the permission of Land and Property Management Authority.

arranged for her to regain her dwelling house and coach house occupied by Sarah prior to her marriage to Waples. Bk 8, P 294, entry 469.

Power of Attorney. Eber Bunker gave Margaret Bunker and William Broughton Power of Attorney to be used in the case of Eber Bunker's death. Bk 6, P 24, entry 1335.

Shipping. William Freeman was engaged by Henry Kable & Co as a cooper to King Island in the schooner Governor King to cooper for 300 tons of oil. Bk 1. P 63a. entry 289

Wills. Joseph Hatton bequeathed his wife Rosamond Hatton one shilling. His Jones Farm of 30 acres at Kissing Point together with the house, goods & chattels and stock he left to Ann Smith. Bk 9, P 69, entry 113.

Lois Sabine writes, "If my school history lessons had been based on the stories in the Registers, I would not have been numb with boredom.

"The entries reflect everything in an emerging, stratified society containing violence, greed, guilt, matrimonial infidelities, family love and separation, sudden death, oh yes, and land.

"Recognition of the Old Register One to Nine for inclusion for inscription on the UNESCO Australian *Memory of the World* Register shows these records, at last fully revealed, to be of national and international importance.

"A copy of the DVD should be in every local library, historical society, family history society, university library, and school library," Ms Sabine said.

Pictured from left: Lois Sabine, Tony Kelly, NSW Minister for Lands with Madi Maclean and Nicola Forbes, both from the Land and Property Management Authority on the presentation of the inscription of The Old Register One to Nine to the UNESCO Memory of the World Register.

Hawkesbury Settlement Revealed

by Jan Barkley-Jack

Thousands of present-day Australians, including many in the Blue Mountains, trace their forebears to the early farmers on the banks of the Upper Hawkesbury River.

The European settlement there, known initially as the District of Mulgrave Place, began in the eighteenth century.

In my latest book I seek to transport readers to an intimate experience of that first decade.

Hawkesbury Settlement Revealed: a new look at Australia's third mainland settlement, 1793-1802 is a re-evaluation of the early Hawkesbury farms, dismantling the cultural bias evident in most of the contemporary chroniclers.

As I explore the conventional contention that the settlers as a group created and earned their own notoriety, the stereotypical image of them as lazy, lawless drunkards is severely modified.

Exciting new material from witness statements in court cases, from land transaction records and from the settlers' own writings has been used to produce an original and at times startling re-evaluation.

The evidence used comprehensively for the first time allows the people to inhabit the book's pages and to emerge as personalities, a lively and for the most part likeable parade, in which the achievements of high-flying transportees stand alongside those of the ordinary impoverished ex-convicts and free settlers.

Characters can be given, for example, to the eleven, hitherto invisible female landholders. One of their number, Sarah Cooley, was at home both in Sydney and on the Hawkesbury.

She emerges not just as the long-time partner of the military commandant, Neil McKellar, but also as the person who ran McKellar's farm, raised their children and made wide and astute business dealings.

'Saunderson's Farm. Looking down the River', engraving by William Lowry, apparently from original by Thomas Watling, in D. Collins, An Account of the English Colony in New South Wales vol.I, 1798. This is the only picture of 1794 Hawkesbury farms in existence, thought to have been sketched in 1795 or 1796. By courtesy of Royal Australian Historical Society.

Sarah developed the highest profile of all the early Hawkesbury female ex-convicts.

Part of the local significance of Margaret Catchpole (a well-known name) and the less familiar Sarah Cobcroft and Ann Blady comes from their role as midwives, while Mary Archer deserves to be remembered for her bravery in speaking out against the European men who murdered two Aboriginal youths.

The instability and violence which arose from the new European farms impinging on Aboriginal lands and traditional food supplies created threats for the Indigenous people and settlers alike.

The women of both cultures knew fear while also displaying fortitude, and many cases of both Indigenous people and European settlers showing humanity and compassion have been documented.

Recurrent floods created misery. William Aspinall wrote of his family being left 'helpless spectators only of our stacks, barns, houses and stock swimming down the current'. Patrick Hynes had had 'to go in Debt to seed and crop his ground … and before …[he] could Discharge his Debt all … would be sweepted away … his grain, pigs, fowls, his furniture, Beds, Beding and wearing Aperal'.

Careful selection of coloured prints and modern photographs illustrate graphically how these and other farms were periodically almost totally submerged under the flood waters.

Yet despite adversity, 58% of the earliest settler families were still farming on the Hawkesbury as the first decade of the nineteenth century dawned and over 70% were cultivating at least the six acres that constituted John Macarthur's definition of a sustainable family farm.

I have resurrected a forgotten ex-convict, the most successful of all the early Hawkesbury settlers, John Stogdell, rich in his own right, who was the agent for the powerful Commissary General, John Palmer.

Stogdell met an untimely end in the 1801 flood, but he had already established consolidated farms previously thought impossibly grand for the early frontier and had also supervised the completion of Palmer's handsome Sydney estate of 'Woollomooloo'.

One hundred pages of court proceedings have revealed all this in startling detail, which is presented as a separate case study.

Continued page 12

Hawkesbury Settlement Revealed

Continued from page 11

The emancipist John Harris may have escaped floods but he did not escape the wrath of another military commandant, Anthony Fenn Kemp.

Harris set his dogs on trespassing pigs belonging to the irascible commandant and later in court claimed to be a 'free man … and a Citizen of the World', using the terminology of the French Revolution.

Samuel Marsden's evidence is shown to have kept Harris's good character intact, whilst demonstrating that early Hawkesbury politics were more sophisticated than is currently believed.

One of the features of this book is the full and detailed listing, including map locations, of the land promised in 1794 to 1796, tied to appendices which recite every land title granted in the district up to 1802.

To illustrate the localised domain of these first Hawkesburyites, I have ransacked the drawings, paintings and prints surviving from the period before 1820 and especially before 1805.

Detail of 'A View of Part of the Town of Windsor', drawn and engraved by Philip Slager or Slaeger, published by Absalom West, Sydney 4 June 1813. The detail shows retailing activity and delivery of stores in what is now Thompson Square, Windsor, typical of the river trade on the Upper Hawkesbury in the 1790s. The cottage is likely to have been occupied by Andrew Thompson up to 1800. Taken from the author's copy of the original print.

Modern digital technology makes it possible for the first time to make legible enlargements of tiny incidental images of individual farm buildings and ordinary people going about their work in the first two decades of settlement.

The illustrations in the book are unhackneyed and are presented in colour wherever appropriate.

They are an important part of the revelation of the earliest Hawkesbury settlement.

The author - Jan Barkley-Jack, BA (Hons)

Jan Barkley Jack, BA (Hons) is a historian who was educated in Sydney and at the University of New England, obtaining a major in both history and archaeology in her degree.

She co-authored the Hawkesbury City Council's Bicentennial history and has written articles and chapters in publications on a variety of historical topics relating to the Hawkesbury and other areas.

As a resident of Windsor, she has been actively involved there in promoting history through being on Hawkesbury Historical Society, National Trust and Hawkesbury City Council Heritage and celebration committees, and as Hon. Curator of Hawkesbury Museum between the mid-1980s and 2001(unofficially carrying out that role for ten years previously). Jan has presented Community Link courses for the University of Western Sydney and was a recipient of a Commonwealth Centenary Medal in 2003 for 'service to the community through the history and heritage of the Hawkesbury'.

In 2005 she was an advisor to SBS Television on historical content in their Living History series 'The Colony'. For her current PhD, being undertaken with the University of Western Sydney, she is seeking to extend understanding of the dynamics of early farming settlement in New South Wales, especially in frontier districts like the Hawkesbury, in the years that led up to the Macquarie period.

MAP CARE AND CONSERVATION

Plans are now well advanced for a workshop to be held at the Land and Property Management Authority of NSW at Bathurst on Friday, February 19, 2010.

The workshop will look at the techniques for restoring damaged maps, and methods of storing and catologuing maps.

Participants in the workshop will visit the scanning and restoration area, cadastral, topographic and surveying sections.

Time will be spent in the graphic services section which includes bookbinding, digital imagery and pre digital mapping.

Participants will also see the latest technology and glimpse of historical map making.

Railway station home for Mt Victoria Historical Society's museum

Historical societies often are located in heritage buildings and some even end up in railway properties, which is the case for Mt Victoria Historical Society Inc. which has operated a museum in the former railway dining and refreshment rooms part of the Mt Victoria railway station for almost 40 years.

The station building itself is a heritage listed building, and collected railway material is nationally significant

It is one of the few sandstone buildings of State Rail. It was opened in 1868 as a very small station, and significant additions built in 1872, 1884 including the first floor, and 1911.

Numerous photographs and research material are held of staff, and stories documented of their work and social life. At least four people still living in the village, worked when they were young, in the dining rooms.

Early freight was sent to Sydney for supplies and export - livestock, meat, and wool, because the early mountain roads were too steep for trucks so animals were herded up to Mt Victoria.

In 1971 the historical society opened its museum under a lease agreement with State Rail.

More recently the old manager's flat on the first floor and the old ground floor kitchen have been added to the lease. All society activities, monthly meetings etc. are held on these premises.

The society, then named Mt York Historical Society was formed in 1966 by residents of the Blue Mountains villages of Mt Victoria, Blackheath and Hartley.

The collections were initially housed in members' homes, where regular meetings were held, often with a guest speaker.

For a time some were also held in Mr Rienits Private School in Montgomery St, Mt Victoria which may have been called, *Glen Ogie* by then.

Outings to places of local interest were organised. In the late 1960s the name was changed to Mt Victoria Historical Society, following confusion with the Mt York Natural History Museum which operated in the "Kiosk" building at Mt York.

The railway station premises have provided the museum with a range of room sizes. The dining room has mostly glass display cabinets, vertical and horizontal, for smaller items and documents. The large refreshment room has been used for a wide range of medium to large objects from farm machinery, tools, horse buggy, furniture display etc. arranged in subject groups.

There are 11 smaller rooms, most used for displays and most of these have a specific theme; - Mel Ward Natural History; Photographic - items and notable photographers pictures; Gowns; Trains; Mt Victoria; Osborne Ladies College Blackheath - Ron Brasier collection and the Old- time school room.

The collections include; about 2600 artefacts 350 books 700 historic photographs, of which 500 are copied and are organised in folders, 230 framed pictures, 260 research files,160 maps, survey plans, drawings etc.

The old kitchen which has been only recently cleared out by State Rail is currently being set up for research.

Some years ago curators embarked on spread-sheet data entries for much of the accession collection - some 1700 items each under approx 20 headings- donor, origin, details ; and much of the photographic collection - some 500, again under numerous headings.

After a lull in updating the data, this has been re-commenced. Material held relates primarily, but not exclusively to the villages and area between Katoomba and Hartley.

It has been suggested the collection is significant it being possibly, the only collection recording the exploration, surveying and building of the first roads and railway across the Blue Mountains.

It is significant in encompassing the story of convict labour, the development of farms, villages and towns, and the extensive number of

Continued page 14

A phaeton (buggy) circa early 1900s. This carriage is 2-seater, pulled by two horse for light duties in country or town.

The volcanic geology of Mt Wilson and Mt Irvine

Mt Wilson and Mt Irvine Historical Society Inc. will hold its annual general meeting on Saturday, November 14, 2009 at the Mt Wilson Village Hall, The Avenue, Mt Wilson, to which members and friends are invited.

The guest speaker will be Dr Peter Rickwood who arguably knows more than anyone about the geology of the Mt Wilson and Mt Irvine area.

"A connection with Mt Wilson commenced shortly after buying a house at Blackheath in 1979," says Dr Peter Rickwood

"Our neighbour was the daughter of Peter and Johnny Kirk and they were quickly 'adopted' by our children as surrogate grandparents in lieu of the real ones who were resident in England and seldom seen.

"Accordingly visits to Mt Wilson became frequent and Peter verbally directed me to various places to get samples of basalt.

"Revision of the geology courses at UNSW in the late 1970s brought to me the need to find a field area for the Year 4 students who needed to get samples for a geochemistry project.

"What better than to take them to a place that I was starting to know quite well so in 1981 the first group collected from sites ranging from Mt Hay to Mt Tootie.

"Later the groups worked at either Mt Wilson or Mt Irvine and the collecting became an annual event until 1997 when I retired.

"The students worked in small groups of 3 or 4 and each group was accompanied by a qualified geologist; on many occasions Bill Smart alsoaccompanied one of the groups and his guidance to concealed access routes was invaluable.

"While the students were still investigating these rocks it was not possible to write up the outcome of their various projects and since then a book on Blackheath and other topics of historical research have not given me adequate time to mull over this material - until now!

"The talk will dwell on the volcanic geology of the area and the wonderful welcome given to the students by many of the landowners," said Peter.

Dr Rickwood is a visiting senior research fellow at the School of Biological, Earth & Environmental Science at the University of NSW and president of the Blue Mountains Historical Society Inc.

Morning tea will be served at 10.30am, the annual meeting will commence at 11am followed by an address by Dr Rickwood. A light lunch will be served following the presentation.

For catering purposes please advise Mary Reynolds 4756 2006 Florence Smart 4756 2063 or Helen Cardy 9871 3661 or e-mail westring@bigpond.com

Mt Victoria station museum home to bush tools

Continued from page 13

early agricultural implements. Most of these were gifted from the descendents of people who made and used them, and individual accounts have also been recorded.

After the first convict colony was established in Sydney, early farming for food was started on the Sydney basin plains, (often unsuccessful) and travel beyond not encouraged or allowed without permission.

The Blue Mountains were a natural barrier welcomed by authority, especially for the convicts. When food became a problem, farm animals began arriving, broader plains with better soil was needed and explorers, surveyors including Wentworth, Blaxland, Lawson, Evans came to Mt Victoria, and nearby.

Information for this article has been provided by Roy Bennett, curator of the Mt Victoria Historical Society Museum.

Roy moved from Sydney to Mt Victoria about 4 years ago soon after joining the society, its committee and became its voluntary curator 2 or 3 years ago. Most of the information comes from an application he prepared for an application for a National Library Special Significance grant.

Bush saws and other farm tools used in timber getting and land clearing.

Tyldesley the village that disappeared

The spine of the Great Dividing Range leading north from Wallerawang to Mudgee is rich in minerals. Since the late 19th century the region along the "Mudgee Line" has seen gold, coal and oil shale mining, limestone quarrying, and the manufacture of petroleum products and cement. Following the construction of the Wallerawang to Mudgee branch line railway from the early 1880s coal mining commenced at various places including Cullen Bullen.

Between 1888 and 1960 the area around Cullen Bullen hosted six underground coal mines. Two of these mines, Tyldesley and Invincible were major producers and employers in the early to mid 20th century. To alleviate coal shortages experienced immediately after World War II the Joint Coal Board encouraged the development of open cut coal mining in the area. The open cut mines were worked by the army and air force during the 1949 coal strike.

The village of Tyldesley grew around the headworks of the Great Western Colliery and its successor Tyldesley Colliery from 1904.

Like many coal communities the village consisted of shanties built on colliery land using a mixture of traditional building methods such as wattle and daub and found materials including sacking, kerosene tins and explosives boxes.

Tyldesley Colliery ceased operation in 1960 and the village was largely abandoned by the mid 1960s. Little remained of the village by the time a new open cut mine was developed on the site from 2001. The village has all but disappeared from the landscape.

The City of Greater Lithgow Mining Museum Inc is preparing to print Ray Christison's latest book on the history of coalmining in the Western Coalfield. This book will be in a similar format to *Lithgow State Coal Mine a pictorial history* published in May this year.

The book uses a mixture of historical records, newspaper reports and the memories of former residents to present the story of coal mining around Cullen Bullen and Tyldesley. The book is illustrated with 19 maps and plans, and over 70 photographs of the district's mines and the village of Tyldesley.

Pictured is water bailer, Harry McAlpine, colliery engineer, James Wilson and the colliery dog Rex at Tyldesley in the early 1950s. Harry and his wife Annie also ran the post office and general store at Tyldesley.

The new book, focuses on the story of the Great Western/Tyldesley Colliery that operated from 1904 to 1960 and the village that grew around the mine's headworks.

It also includes a brief history of the neighbouring village of Cullen Bullen and the collieries that operated in the Cullen Bullen district, including:

Cullen Bullen Colliery 1888-1900, Shepherd and Massey's Mine1888, Invincible Colliery 1905-1957, Renown Colliery 1921-1929, 1940-1954, Invincible No.2 Colliery 1925-1931, Ben Bullen Colliery 1926-1929, Wattle Mount Colliery 1929, 1949-1950s, Ben Bullen Open Cut 1946-1955,
Red Springs Open Cut 1947-1955, Cullen Main Open Cut 1948-1952 , Beaumaris Open Cut 1949-1953.

It is planned to release the book by November 30, 2009.

The City of Greater Lithgow Mining Museum is offering a pre-publication discount for orders placed before this date.

Pre-publication order form and a reseller order form can be downloaded from the City of Greater Lithgow Mining Museum website www.statemine.org.au

BULL'S CAMP MYTHS DEBUNKED

When Major Thomas Mitchell began his road deviation works a depot was set up in the 1830s at a site known as Twenty-Mile Hollow [now Woodford]. Convicts engaged in road construction were camped here, as well as their military guards.

In 1842 Captain Bull was placed in charge of the camp. Two store rooms were excavated in the soft sandstone; these were not cells, as the popular notion has it.

Nor were parallel grooves in the nearby rock surface cut to give the flagellator a foothold [or to drain away the blood of the convict being flogged]; they were on a path to a nearby kitchen and were most likely put there to prevent slipping on the sloping rock surface. *Source: Places of Historic Interest on the Blue Mountains published by the Springwood Historical Society from data provided the Society's researcher Allan Searle 1977.*

ADVENTURE CHALLENGE

Everglades at Leura and the Norman Lindsay Gallery at Faulconbridge are among National Trust of Australia (NSW) properties participating in the Premier's Adventure Challenge.

The idea of the challenge is to encourage children and their families to visit and enjoy the state's museums and galleries which will provide free entry to primary students participating on weekends, public and school holidays until January 27, 2010.

Their adventure begins when they pick up their free Kid's Adventure Passport from any participating museum or gallery in NSW.

They can then explore the many treasures found within the listed properties.

Once the students have collected three stamps they can apply for an official certificate from the Premier's Department, which recognises their achievement.

For details on where to collect a passport and start the challenge go to www.arts.nsw.gov.au

Historic Mt. York cemetery

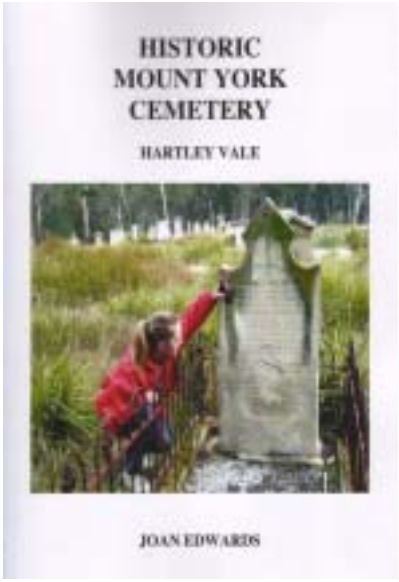
The Blue Mountains Family History Society's latest publication, *Historic Mount York Cemetery, Hartley Vale*, was launched on September 18, 2009 at the annual conference of the NSW & ACT Association of Family History Societies at Wyong. It is not the usual cemetery update, but a compilation from four known lists, no two of which are identical.

The cemetery dates from the early 1830s, on Pierce Collit's land, not far from the base of Lawson's Long Alley, the steep western descent from Mt. York.

President of the Blue Mountains Family History Society, Joan Edwards writes that the closed cemetery has a Lithgow LGA Heritage Order, and is controlled by the Hartley Vale and Mt Blaxland Trust. It is no longer on private land, but accessible on foot in daylight hours.

"Time, vandalism and neglect have played their part in destroying tangible evidence. Many burials were prior to civil registrations and not listed in NSW BDMs," claims Ms Edwards.

"Early burials include Pierce and Mary Collit, family members, local workers and travellers.



Later many were families associated with the local shale oil mine."

One conference delegate provided evidence that one of her family was one of the unknown, unrecorded burials. "Hopefully with this publication, evidence of more of the unrecorded will be added to our knowledge," Ms Edwards stated.

The book of known burials includes inscriptions, some recorded 45 years ago and no longer legible, and illustrated with 50 B & W photos. It is available from the Blue Mountains Family History Society PO Box 97 Springwood 2777 or xploretree@yahoo.com.au. at a cost of $20 plus postage.

All the president's pennies

One day in 1791 George Washington received a bill for 60 pounds, 1 shilling and 7 pence from his friend Dr James Craik.

The invoice ran to two pages: *["Anodyne Pills for Breachy… Laxative pills for Ruth…syphilic Pills for Maria…oz Antiphlogistie Anodyne Tincture… Bleeding Charlotte……oz 4 Powdered Rhubarb… Extracting one of your Negroes tooth… A Mercurial Purge for Cook Jack…"]*

Washington was extraordinarily careful with his accounts detailing every penny in ledgers using double entry bookeeping.

This brief glimpse is contained in what historians say is a vast cache of financial documents from the life of the first US president. Documenting lives of ordinary people – merchants, tradesmen, servants and slaves are scattered around institutions in the US. In most cases they have never been transcribed or published in accessible form.

That archival quandary lured 25 scholars, some of them 'forensic accountants" to Mt Vernon, recently for a workshop to plan how to get records on-line.

Joyce Chaplin, Harvard historian, said the papers offered a picture of "material culture".

Among the papers are chilling passages for the modern reader for example, Washington recorded buying, at public auction *"Ned a girl "Murria"", "Old Abner" "a Wench Dinah" and her four children.*

As Washington aged, he was increasingly repulsed by slavery.
The Washington Times

BMACHO MEETING CO-ORDINATORS

The former secretary of Lithgow Branch National Trust, Lyn Fowler, and Doug Knowles of Glenbrook Historical Society both members of BMACHO's committee have taken on the role of meeting coordinators.

Secretary, Barrie Reynolds said this would spread the work load of the committee.

They will take on the administrative and management of meetings, such as annual general meeting, mid year meetings and various seminars and workshops. The selection of speakers will continue to be a responsibility of the whole committee.

National Trust registers industrial past

In a quiet show of support for the appreciation of Sydney's industrial heritage, the National Trust has added one of Sydney Harbour's mightiest tools to its register – an 85 year old shipyard crane.

The colossal machine spent much of its working life at the now-defunct Mort's Dockyard in Balmain, hauling ferries and World War 2 navy ships from the sea for repair, but was later moved to its present location on Goat Island.

Mort's Dock at Balmain was opened in 1856. Thomas Sutcliffe Mort came to Australia in 1838 as a clerk and soon became involved in a wide range of commerce. Among these ventures was refrigerated transport of produce for which he built one of the earliest chilling works at Bowenfels near Lithgow.

The Trust listing coincides with calls for a return to harbour open spaces including Goat Island, to their pre-colonial state and the demolition of the industrial features.

The industrial heritage officer at the National Trust, Tony Brassil, said that there is always a tendency to see heritage in terms of its beauty.

"These are not necessarily things of classical beauty, but they certainly things of engineering beauty, " Mr Brassil said.

A mighty tool the 85-year old shipyard crane

While a listing on the Trust's register has no legal force, Mr Brassil said he hoped it would underscore the crane's significance.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 40 Hume Avenue, Wentworth Falls 2782
E-mail: bmacho.heritage@gmail.com
Website: www.bluemountains.heritage

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group, Friends of Everglades, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum, Mid-Mountains Historical Society, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society (including Turkish Bath Museum), Mudgee Historical Society, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch), Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians, Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway. The following are individual members: Wendy Carlson, Ray Christison, Ms Pamela Hubert, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2009-10 is: John Leary, (president) Ian Jack (vice president), Barrie Reynolds (secretary), Kathie McMahon (treasurer), Jean Arthur, Ray Christison, Lyn Fowler, Doug Knowles, and Dick Morony (public officer), Peter Stanbury.

AUDITOR: Sue McMahon, B Comm CPA

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE is BMACHO's official newsletter.

JANUARY-FEBRUARY 2010 ISSUE No. 7

Governor Macquarie 200-years on

Lachlan Macquarie assumed the reins of government in New South Wales on New Year's Day, 1810, and remained responsible for the colony until the end of November 1821.

His achievements in restoring public administration after the unrest which had unseated Governor Bligh, his ambitious programme of public works and his attempts to create an effective society in which most landholders were ex-convicts or the children of convicts will be recognised in a variety of bicentenary events during 2010.

Macquarie's colony consisted primarily of eastern New South Wales and Tasmania, so his bicentenary is less emotive to modern Australians whose affiliations do not lie in these parts. Within New South Wales, interest is keenest in Sydney itself, across the Cumberland Plain (not least in the Hawkesbury towns) and along the Great Western Highway as far as Bathurst.

The aspects of Macquarie's administration which resonate in these separate parts of the state do not, of course, relate solely to 1810.

The town-sites along the Hawkesbury-Nepean, as well as Liverpool, were indeed selected and named before 1810 ended, but an urban reality in Windsor, Richmond, Wilberforce, Pitt Town, Castlereagh and Liverpool was realised only gradually over the twelve years of Macquarie's governorship and beyond.

The first professional survey of a viable route across the Blue Mountains was not undertaken on Macquarie's orders until late in 1813 and William Cox's convicts did not complete the construction of the first road from Emu Plains to the future Bathurst until January 1815.

The public works, like Hyde Park Barracks and St Mathew's Anglican Church in Windsor, which aroused so much criticism at the end of Macquarie's reign, were built over a number of years and some were incomplete when Macquarie returned to Britain in February 1822.

So what will be celebrated in the various functions, symposia, lectures and exhibitions, together with the erection or re-erection of statues and plaques, planned for 2010, will inevitably relate to the totality of Macquarie's governorship and cannot be restricted to the events of 1810 alone.

At the same time, it is clear that over the next few years after 2010 there will be significant efforts in the Blue Mountains to commemorate the exploration, surveying and road-making of 1813 to 1814 and it is likely that Bathurst will seek to celebrate Macquarie's journey over the Mountains culminating in his declaration of the new town in May 1815.

Individual buildings and sites associated with Macquarie are, moreover, being assessed for inclusion on the State Heritage Register during 2010 and over the next decade recognition will no doubt be made on appropriate dates, publicising the significance of each individual place.

So, however crowded the Macquarie calendar for 2010 is becoming, this year will not and should not be the end of the interest in this critically important governor.

The articulate and welcome enthusiasm for Governor Lachlan Macquarie expressed by our present Governor Marie Bashir has helped to ensure that there is potent patronage for the planned events.
Continued page 2.

This article has been written by Associate Professor Ian Jack, president, Royal Australian Historical Society and vice president, Blue Mountains Association of Cultural Heritage Organisations.

The age of Macquarie.....

Continued from page 1

It is to be hoped, however, that the commemorative impulse will not simply be adulatory. Macquarie's policies deserve the most serious reappraisal both in their immediate effects and in their long-term results in shaping the colony as it expanded beyond the constraints of the coastal plain. Macquarie was not all white, nor was Commissioner Bigge all black: the facile tag dubbing Macquarie 'Father of Australia' is at best only a suggestive half-truth.

Macquarie's biographers, Malcolm Ellis, Noel McLachlan and John Ritchie, in 1947, 1967 and 1986 respectively, together with Manning Clark in 1962, and James Broadbent, Joy Hughes and the others responsible for the great exhibition called *The Age of Macquarie* mounted at Hyde Park Barracks in 1992, have given a wide public increasingly more ample data on which to reappraise the man and his times.

The plaque which Macquarie erected on the south wall of St Matthew's Anglican church in Windsor in 1820. Photograph taken by Ian Jack on July 18, 2009.

It is hoped that the impetus of the bicentary events of 2010 will lead not just to triumphalism and a few more plaques, but also to an intense historical evaluation which revisits both the rich documentary evidence and the physical testimony of the buildings, the roads and the planned towns. Macquarie, for all his faults, was a great governor who presided over a decade of critical importance to the young colony. I hope that we rise to the challenge of memorialisation.

Macquarie bicentenary commemorations

The 200th anniversary of Macquarie's swearing in as the 5th governor of NSW will be commemorated with a state-wide celebration program to acknowledge the significant contribution and achievements of Governor Macquarie and his wife Elizabeth during their 12 year tenure.

The Macquarie 2010 Bicentenary Commemorations Committee was established to coordinate the NSW State Government's involvement in the bicentenary.

The committee is encouraging state and local government agencies, community organisations, businesses and individuals to be part of the commemorations by organising a new activity or reorganising an existing event under the 'Macquarie' theme and applying for endorsement.

The Endorsement Program provides an opportunity for initiatives to be part of the calendar of events listed on the official website.

Endorsees will also gain permission to use the logo and be given access to on-line resources and opportunities to expand the potential audience for their bicentenary activities.

The official calendar will be an historical record of how the Bicentenary was commemorated - so why not register your initiative and be part of history!

DARLEY HOUSE WINS TWO CHEFS HATS' AWARD

The heritage property Darley House now operating as Darley's Restaurant as part of the Lilianfels complex at Katoomba has won a coveted Sydney Morning Herald Food Guide Award 2010.

The property was featured in the November-December 2009 edition of ***HERITAGE.***

The property was originally built for Frederick Darley and his wife who came to Australia in 1862, on the advice of Sir Alfred Stephen (the Chief Justice of NSW) who convinced Darley that he would further his career in the colony. Darley was knighted in 1887, served as the Chief Justice of NSW and five times as the Lieutenant Governor of NSW.

Orient-Express purchased Lilianfels in 2000 and the company, along with the hotel manager, Grant Raubenheimer, are committed to the protection and celebration of Lilianfels' heritage while promoting the property as a premier luxury resort within the World Heritage listed Blue Mountains area.

Lilianfels is a founding member of BMACHO.

From the president's pen.....

Protection for heritage – What protection?

In recent times there has been considerable media coverage expressing concern about the NSW Government's decision to absorb the Heritage Office into the Department of Planning as well as giving the Planning Minister power over both development and heritage protection. (*Global economic crisis to benefit our heritage – HERITAGE July-August 2009).*

This column is indebted to Steve Rawling AM, who is chair of the Hawkesbury Branch of National Trust for detailing just how little protection our heritage has under various existing listings, in his article in the December 2009 edition of Kurrajong-Comleroy Historical Society's newsletter *The Millstone.*

People often do not realise that even before the changes introduced by the NSW Government, many buildings and other items of real heritage value had virtually no protection. It is useful to look at the various levels of 'heritage listings'.

Listing by the National Trust of Australia. The Trust has done a wonderful job for five decades in identifying items of heritage value, and 'listed by the National Trust' is taken by many to indicate some level of protection.

Unfortunately, this listing affords no legal or statutory protection at all. It simply means that the Trust has established its heritage value and by this listing it is hoped it may influence state and local government decisions about possible developments affecting the item.

Council Local Environment Plans. Local government authorities are required to list in their Local Environment Plans (LEPs) those items of heritage value which they have been able to identify.

Councils have a responsibility to take heritage values into account when assessing development applications and to take steps to ensure that items are maintained in a secure way.

Blue Mountains City Council only last month sent to the Heritage Branch a record of some 800 sites, the list having been compiled by a highly regarded heritage professional consultant way back between 1999 and 2005.

Although there are some notable exceptions, most councils do not have a good record with anecdotal evidence that development has taken precedence over preservation. The worrying aspect of this is that the policy of 'demolition by neglect' is a major limitation to the requirement on local government.

State Heritage Inventory. This is merely a record at state level of what is on a council's LEPs without adding any further protection.

State Heritage Register. Inclusion on the register of items of 'State significance' means that items are protected under the NSW Heritage Act and cannot be demolished or damaged without making an application to the Heritage Branch of the NSW Department of Planning.

Under Frank Sartor, then Minister for Planning, the Heritage Office, an independent government agency became a mere Heritage Branch within the Department of Planning. When the Heritage Amendment Act came into force in 2009, the powers of the Heritage Council were substantially reduced by various legislative changes, so that greater power now resides in the hands of the Minister for Planning.

There is no doubt that most groups concerned with heritage and history, including the Royal Australian Historical Society (RAHS), the History Council of NSW, the National Trust of Australia and Blue Mountains Association of Cultural Heritage Organisation (BMACHO) regard the present situation as unsatisfactory.

National Heritage List. A national heritage system was established in 2004 under the *Environment Protection and Biodiversity Conservation Act 1999* .

This led to the introduction of the National Heritage List, which is designed to recognise and protect places of outstanding heritage to the nation, and the Commonwealth Heritage List, which includes Commonwealth owned or leased places of significant heritage value.

The establishment of this national system was in line with a 1997 agreement by the Council of Australian Governments that each level of government should be responsible for protecting heritage at the appropriate level.

World Heritage Listing. Australia is party to the UNESCO Convention of 1972 which administers the World Heritage List. There are 890 items world-wide of which 17 are in Australia including the Greater Blue Mountains Area, Sydney Opera House and the Great Barrier Reef.

It is indeed sad that much of what is considered as our heritage has little or no legal protection in the face of development proposals or from demolition by neglect.

Australia's heritage depends on the vigilance of the community and the willingness of federal, state and local government to place a higher priority on heritage values.

John Leary, OAM - President, Blue Mountains Association of Cultural Heritage Organisations

Mapping workshop at Bathurst

An outstanding workshop covering a wide range of topics associated with map making, surveying and restoration of maps has been arranged for BMACHO members.

The workshop to be held at the Land and Property Management Authority's complex at Bathurst will be held on Friday, February 19, 2010.

A limited number of 20 can be accommodated by the Authority and this number will be broken into two groups to tour the complex, see the various processes and talk with senior staff.

Arrangements have been made to hire a small bus to take the party to and from Bathurst. The cost including morning tea on arrival and lunch will cost $20

Doug Knowles a member of Glenbrook and District Historical Society Inc. will drive the bus which will reduce the hire cost and allow for a number of stops to be made to pick up and drop off passengers on the way home.

Booking may be made by telephone to Doug Knowles on 4751 3275 (let phone ring a long time). Bookings will require payment within 7 days as it is expected more people will wish to participate in this activity than can be accommodated.

The bus will leave from Macquarie Street opposite Springwood railway station entrance at 7.45am The number of stops will depend on the locations from which participants come, but at this stage it is expected to be Wentworth Falls, Mt Victoria and Lithgow. Exact pick-up locations will be advised when bookings are made.

Participants will arrive at Bathurst at 10am for morning tea before being addressed by Warrick Beacroft, executive manager of the Land and Property Management Authority then touring the complex.

Participants will see the historic surveying equipment, discuss the activities of the Geographical Names Board, inspect imagery and elevation programs, graphic services; conversion and preservation operations.

After lunch at 12.30pm there will be demonstrations of LPMA internet based applications for mapping and surveying.

After a half hour wind-up session, participants will depart Bathurst for the return trip.

Pictured is Sir Thomas Mitchell's theodolite dated 1828 atop a hand drawn map part of the heritage collection at the Land and Property Management Authority at Bathurst and which will be among items to be viewed during the February workshop. Mitchell is believed to have used the theodolite in surveying across the Blue Mountains.

Director provides insight into work of Heritage Branch

BMACHO hosted a general meeting at the Glenbrook Bowls Club on Friday, November 20 which attracted 29 participants. The meeting was organised by Doug Knowles and Barrie Reynolds. In the unavoidable absence of the president, Barrie chaired the meeting.

Mrs Petula Samios, director of the State Heritage Branch, spoke on the work of the branch, outlining its responsibilities and the main aspects of recent changes to the Heritage Act.

The branch provides support to the Heritage Advisory Council and gives practical information to people enquiring about their heritage properties.

The branch also maintains the Register of Sites, is responsible for advising the minister on the heritage implications of development proposals, and has a program of heritage grants.

There were numerous questions from the audience, many focused on individual properties and their protection under the Act.

While the director understandably could not advise off the cuff on these, she offered to do so in response to written enquiry.

Ms Samios also explained how the main thrust of the registration of sites is now theme-based although a number of urgent cases are considered even where they fall outside these themes.

The meeting provided a valuable insight into the way in which heritage matters are dealt with at State level and some of the constraints under which the branch works. ***Barrie Reynolds***

World Heritage Institute launches on-line exhibition

The Blue Mountains World Heritage Institute has launched on-line a mixed media exhibition developed to share the stories, reflections and memories of the Blue Mountains community. The eucalypt is used as a catalyst and symbol of recording and interpreting the community's inspiration and connection to this region from historical and contemporary perspectives drawing from private, community and public collections.

It brings together contemporary artists and community contributions sharing their archival material, social history and contemporary artworks from cross cultural perspectives highlighting the different and changing social, environmental, geographical and cultural landscapes. It highlights the different perspectives through people, places and events that have shaped our attitudes, values and lifestyles of living in a unique World Heritage area and our vision for the future.

"This exhibition provides the opportunity to reflect on the complex relationship between nature and people from a local and global perspective and the impact of fire for both current and future generations," BMWHI's project convenor Cheryl Yin-Lo said.

Ms Yin-Lo brought together a community curatorium of Helen Deane, Graham Davis King, John Leary OAM, Anitra Nelson and Suzann Victor to research and develop the exhibition and involved residents and artists who contributed and loaned their works and cultural material.

Ms Yin-Lo also thanked Roland Hemmert, John Low, Bronwen Maxwell, Judy (nee Ralph) Deane and John Deane for their assistance to the project; and to the Centre for Cultural Research, University of Western Sydney for their support; and to Sarah Terkes for helping create the online gallery. The project was funded by Arts NSW.The exhibition can be viewed on http://bmwhi.org.au/what/projects/BranchingOut/2/

One of my favourite eucalypts in the Blue Mountains is the one which is about 70 years old, growing beside the oldest building on the Blue Mountains - Woodford Academy.

Woodford Academy originally was a wayside inn built by a ticket of leave convict, Thomas Pembroke in the 1830s.

It must have been surrounded by eucalypts such as this specimen. Travellers who stopped off at the sandstone building to quench their thirst with a glass of ale, take a meal or stay overnight must have seen these majestic trees being cut down to make sleepers for the Great Western Railway's dual ribbon of steel as its construction in the 1860s pressed relentlessly on to open up much of the country to the west for rural settlement.

No doubt the Dharug and Gundungurra people who passed through this country sheltered under these eucalyptus trees, for not less than 50 metres from this tree are sandstone engravings believed to be timelines.

Just as the built heritage of European settlement is important, so too is the natural heritage bound up in the eucalypts perhaps for tens of thousands of years.

This image of the eucalypt brings together the natural and built heritage while invoking the country's cultural heritage going back perhaps 40,000 years. *Text and photograph by John Leary, OAM.*

Lithgow hosts Australian Mining History Association conference

Pictured are participants in the 2009 Australian Mining History Association annual conference, the final sessions being hosted by State Mines at Lithgow.

The conference included presentations on the mining history of the region and tours of important mining sites.

A pre-conference tour explored the gold mining heritage of Hill End and a post-conference tour experienced the abandoned oil shale town of Glen Davis.

Conference participants were also given the opportunity to visit Scenic World Katoomba, Lithgow Zig Zag Railway and the Western Mines Rescue Station with its world-leading virtual underground coal mine.

The morning spent at the State Mine was considered by many to be a highlight of the conference.

Participants were amazed at the Unions NSW display of historic trade union banners and entertainment provided by local folk singers Martin Doherty and Leigh Birkett of local group *Roisin*. Martin and Leigh gave the first public performance of Martin's new song about the Lithgow State Coal Mine and its horses.*Photograph courtesy Lithgow Mercury*

The Blue Mountains History Journal launched

Invitations are now being issued seeking contributions of articles to the inaugural issue of *The Blue Mountains History Journal* which is to be published online under the auspices of Blue Mountains Association of Cultural Heritage Organisations Inc. (BMACHO).

The aim of this publication is to provide an outlet for fully referenced articles on any aspect of the human history, and related subjects, of the Greater Blue Mountains and neighbouring areas.

It is the intention to publish articles that are 'intermediate' in size between those that can go into newsletters and those that could be chapters in books.

The text should be between 3 and 12 A4 pages, single spaced, 12 point, (c.1,500-6,000 words); illustrations being additional.

All submissions will be refereed.

The journal will be freely available in electronic form via a dedicated website, to which there will be unrestricted access.

Articles may be submitted by anyone.

The Blue Mountains History Journal editor, Dr Peter Rickwood

To ensure that authors get value for their efforts, hard copies of all published articles will be archived in the National Library of Australia, the State Library of NSW, the Royal Australian Historical Society, the Springwood Library, the Lithgow Regional Library and with the Blue Mountains Historical Society Inc.

It is intended to publish the first issue on or about June 1, 2010 and subsequent issues will be up-loaded either annually or bi-annually. 'Author Guidelines' are available on the website http://www.bluemountainsheritage.com.au/journal

Manuscripts for the inaugural issue need to reach the editor Dr PC Rickwood by e-mail to p.rickwood@unsw.ed.au by March 1, 2010.

Mt Wilson stalwarts stand down

Two long standing members the Mt Wilson and Mt Irvine Historical Society did not seek re-election to the committee at its annual general meeting last November.

Mr Des Barrett, president of the society paid tribute to both men, Emeritus Professor Arthur Delbridge and Bruce Wright.

"Arthur was a member of the committee from the time of the formation of the society in 1997, which was then known as The Mount Wilson Historical Society. He became Chairman later in that year. Bruce joined the society in 1997 and early in 1998 became project director.

"Both men were accustomed to the many demands placed upon them through committee work. Our society receives an extraordinary number of requests that eventually come before the management committee. Decisions are required, there are meetings to attend and museum exhibits to produce, ideas and opinions are expressed, and a host of practical matters need to be implemented.

"Arthur and Bruce made a substantial contribution and served the society with distinction through their work on the management committee.

"More broadly, Arthur will be known to all members through his very moving Remembrance Day talks and publications, his obituary for the late Luigi Strano, and his engaging talk at last year's AGM *Our Words: The History of an Enterprise*, which was about the origins and development of the *Macquarie Dictionary*.

Who better to tell us all about the making of the *Dictionary*, than the Foundation Professor of Linguistics at the university?

"I did my first day of museum duty shortly after I joined the society and became its president. It didn't take too long before I became aware that many visitors were puzzled by the notion of a Turkish bath (they were expecting something between a large bath and a sizeable bathing pool!) and how the place would have been heated.

Bruce Wright and Arthur Delbridge AO, pictured after a meeting at Mt Wilson in 2002

"Not knowing the answers to their intriguing questions, I quickly guided them to the basement and told the story of the Turkish bath's 'heating technology' as best I could.

But I knew there remained large gaps in my knowledge. Bruce told me of his interest in this matter and we agreed to collaborate.

"So, over several months we exchanged ideas and compiled rough notes that are to become working notes for others to use when they are on museum duty and facing curly questions about the production and distribution of the heat in the Turkish bath.

"Bruce has produced *The Turkish Bath Design Investigation*: *Preliminary Notes Towards an Investigation of the Original Mechanics and Functioning of the Turkish Bath* (October, 2007). I'm hopeful that the document will see the light of day, but for the present can I simply say, that we're off to a solid start through Bruce's fine work.

"Arthur and Bruce, thank you for a job well done," said Mr Barrett.

Organic garden workshops at Norman Lindsay Gallery

A series of one day gardening workshops will be held at Norman Lindsay Gallery and Museum at Faulconbridge.

Subjects include weed control, mulching, compost making, preparing vegetable and herb gardens, health and safety, organic pest control and tool selection and maintenance.

The workshops will run on Saturdays February 13, 27 and March 6, 2010.

Cost: $50. **Bookings:** essential to 4751 1067.
Pictured is Norman Lindsay Gallery gardener Will Smith, conducting an earlier Organic Gardening Workshop

Indigenous people knew of basalt at Mt Wilson long before Europeans

This article is an abridged version of an address given by Dr Peter Rickwood to the annual general meeting of Mt Wilson and Mt Irvine on November 14, 2009.

Peter is a visiting senior research fellow at the School of Biological, Earth & Environmental Science at the University of NSW and president of the Blue Mountains Historical Society Inc. He is also the inaugural editor of BMACHO's Blue Mountains History Journal, the first edition of which is to be published online in June 2010.

The areas of Mt Wilson and Mt Irvine surveyed over a century ago, roughly delineate the extent of the basalt which gives an excellent soil that provides nutrient for luxuriant botanical growth.

Implements made from basalt have been found in the Grose Valley, and elsewhere in the Blue Mountains, so indigenous occupants undoubtedly knew of the existence of basalt long before the period of recorded history.

But who first wrote of basalt at Mount Wilson?

George Caley was the first European to get a reasonably close view of Mt Wilson when on November 14, 1804 he and his party reached Mt Banks; but although he had passed over much basalt he described the rock using other terms.

It was Surveyor General, TL Mitchell who made the first specific mention of basalt in the Blue Mountains during a visit in November 1827 and he even collected samples! - but not from Mt Wilson.

In 1832 Surveyor WR Govett became the first European known to have stepped on land later called Mt Wilson but he, and many after him, failed to record basalt.

Indeed, it was not until 1875 that the presence of basalt *per se* was recorded on the ridge at Mt Wilson by C.S. Wilkinson, the government geologist .

The present distribution of basalt on the Blue Mountains is unusual for a single flow, yet the surface area (c.115 km^2), and the total volume (roughly estimated at 0.5km^3), are not excessive for a single eruption.

For nearly a century it was thought that the Blue Mountains basalt came from a single fissure located somewhere near Mt Wilson, yet Mt Banks is at a comparable height so presenting an impossible flow situation for that proposal to be true.

A reconnaissance geochemical survey by UNSW students in 1981 revealed a most striking subdivision of basalt samples into a western group (Mt Hay and Mt Wilson) of older (c.18 million years) and more primitive rock and an eastern group (Mt Tootie, Mt Tomah and Mt Irvine) that are younger (c. 15 Ma) and more chemically evolved .

Annually for over a decade, subsequent students undertook closer sampling of the Mt Wilson-Mt Irvine outcrops. Groups of 3 or 4, each group accompanied by a qualified geologist, spent a day swinging sledge hammers so that each student could find 5-6 basalt boulders that were 'fresh' enough for the project - but even the 'best' had some degree of alteration.

A lot of boulders were rejected in the field, and of those taken back to the University about 40% were rejected on the basis of examination of thin sections with a microscope. Each student crushed and analysed their three 'freshest' samples and then reported on their findings.

One outcome was that the basalt on Smiths Hill was found to be layered with the lowest layer having the highest SiO_2 and the highest layer having the least, thus the top of the reservoir was tapped first so progressively the silica and Zr diminished whereas Mg and Ni increased.

In over 400 basalt samples, only one large zircon crystal (c.1 cm diameter) was found and that was seen in a sample collected on the south-western side of Smiths Hill.
Continued page 9.

Pale zircons found in the Mt Wilson area

Zircon Creek gives up its gems

Continued from page 8

The host rock is not unusual in any other way; it did not have the highest Zr content of the samples from Smiths Hill, and a value 88% higher was found in one sample from Mt Irvine! Primary zircons are very rare in basalts, and usually are very small, so it is probable that this large zircon was fortuitously derived from rocks pierced by the magma on its way to the surface.

Panning sediment collected in Zircon Creek confirmed the justification for the name with the recovered zircons being both honey-pink and red-brown in colour and of three basic shapes - rounded, angular fragments and doubly terminated.

But where did they come from?

All of the creeks that drain Smiths Hill go into the Wollangambe River and it is topographically impossible for the basalt at Field Selection to have contributed to sediment in the creek upstream of Mt Irvine Road! So the panned zircons came from the basalt on Farrer Road, or from the underlying sediment, or both.

The Farrer Road basalt is unlikely to be a prime source of sediment into Zircon Creek for it is relatively thin, the remaining boulders are robust, and the soil seems to be well fixed by vegetation.

But between the basalt and the panning site are 65m of sedimentary rocks. The lower sandstones are unlikely to have contributed a great deal to the sediment in the creek for the Burralow formation does not exceed 6m in thickness anywhere, and here the outcrop of the Banks wall sandstone may be even thinner.

The dominant sediment is the Hawkesbury sandstone which has a heavy mineral assemblage with an 8:5 ratio of rounded zircon to angular zircon – about the proportions that were panned from Zircon Creek.

But where were the vents from which the basalt came?

Nowhere in the deeply eroded gorges has there been found a patch of basalt so the vent or vents have to be hidden beneath existing patches of basalt that lie on the ridges.

Only one of these places has been found to have features that may indicate it to have been a source site; it lies within a small valley on Edgeworth David Head that has never been properly explored. So the mystery remains although today it is suspected that eruptions occurred at various times somewhere on the western end of the Mt Wilson ridge, at Smiths Hill, maybe at Field Selection, at Mt Irvine, at Mt Tomah, at Mt Caley, at Mt Banks and possibly elsewhere. At one time this has been a volcanically active area!

ANOTHER GOVT. GRANT FOR BMACHO

BMACHO has been successful in its application for another grant.

The association has received advice from the Member for Macquarie, Bob Debus, that $3127 will be provided from the Federal Government's, Department of Families, Housing, Community Services and Indigenous Affairs Volunteers Grants 2009.

The grant is for BMACHO to purchase computer projection equipment to allow for the use of PowerPoint presentations.

PowerPoint is a presentation program developed by Microsoft .

It is part of the Microsoft Office suite, and runs on Microsoft Windows and Apple's Mac, Apple's Mac OS X computer operating systems.

PowerPoint is widely used by business people, educators, students, and trainers.

PowerPoint presentations consist of a number of individual pages or "slides". The "slide" analogy is a reference to the slide projector that has become obsolete with the use of PowerPoint and other presentation software.

The presentation can be printed, displayed live on a computer, or navigated through at the command of the presenter.

For larger audiences the computer display is often projected using a video projector.

The equipment when purchased will be used for visual presentations at lectures and meetings .

Secretary Barrie Reynolds has advised that a total of $8100 has so far been obtained in grants in recent years.

Family History Society has new committee

The Blue Mountains Family History Society Inc has announced it office bearers for 2009-2010:

They are: president, Joan Edwards; vice president, Jan Koperberg; secretary, John Arnold; treasurer, Ian Kendall committee members; Pat Carruthers, Terry Flowers, Pixie Hallinan, Pauline Hincksman Audrey King, Rosemary Phillips and Alison Tissington.

Mt Wilson and Mt Irvine Historical Society's officers

At recent annual general meeting of Mt Irvine and Mt Wilson Historical Society the following were elected to the management committee for 2009-10:

Des Barrett, Helen Cardy, Darrel Conybeare, Kathy Harrington, Anne Myall, Kathleen Oakes and Florence Smart; with Mary Reynolds as research officer and public officer being ex-officio.

Good, Better, Best -Improving volunteer experience

by Peter Stanbury, OAM, Ph.D.

Dr Peter Stanbury, OAM has been a volunteer in various organisations for many years and has been an executive member of BMACHO since its inception. He has been a volunteer with Australian Business Volunteers (ABV) for a number of years and has worked as a volunteer in many countries including Egypt, Cambodia and Peru. He was formerly the director of Macleay Museum at Sydney University. He was recently awarded the ABV's annual Altruism Award for 2009.

It is rarely enough to advertise for (more) volunteers and expect people to come along and fulfil your expectations, especially if you haven't worked out what it is that you want and how they might fit into your environment.

The principal part of your environment if you already have volunteers (or staff) is those volunteers (or staff). They must understand the need and role of the newcomers and be prepared to make a special effort to assist them to become an integral part of the organisation.

It is not so much the welcome that counts; more importantly, they should understand and feel part of the organisation within the first few days and feel accepted by all members of the volunteer community.

To achieve this needs forethought, planning and a special effort during the first days of the new volunteer's active duty.

Peter Stanbury speaking at the annual Gala function of Australian Business Volunteers (ABV), which is based in Canberra. ABV send approximately 300 volunteers annually to 15 Asia Pacific countries including: Vietnam, Philippines, Papua New Guinea, Solomon Islands, Cambodia, Fiji, Indonesia, Laos and Vanuatu. Also pictured from left to right: David Moore, ABV chairman; Suzanna Edwards, volunteer; Robyn Wood, Andrew Jones Travel; and Michael Lynch,ABV chief executive officer. On screen: staff of the National Museum of Cambodia discussing an exhibition display with Peter Stanbury.

Forethought and Planning
Although one cannot predict the talents of the people who will enquire about volunteering, there should at least be a list of skills required, prepared before any advertising for volunteers is commenced.

What jobs need doing? What experience is necessary to carry out those jobs efficiently?

Volunteers do not receive a salary but potential workers should be given a written statement, that covers such matters as workers' insurance, personal, data and building contents security, an outline of any training or experience based learning that may be given, the expected hours or days of work, and some information about the background, passions and skills of the people already working.

It is important that the potential volunteer feels able to relate to those already there and understands that basic working precautions are in place.

While pay is not offered it may be possible in some circumstances to receive reimbursement for necessary train or bus fares, or to partake in an annual excursion free of charge and certainly to expect to have morning and afternoon tea supplied. Tea time and excursions are an important vehicle for discussing improvements and future developments.

A Volunteer's Responsibilities
A volunteer works to benefit the organisation, not to benefit him or herself.

That is not to say there are no rewards (for example: fulfilment, companionship, leadership or exercise of talent) for the volunteer: there are, or few would volunteer. But volunteering must be done willingly, enthusiastically and without obvious hidden agendas.

It is of the utmost importance to be reliable, punctual, show respect to fellow workers, and be understanding of their views. Leave your personal worries behind and be cheerful and optimistic when you are at work.

Volunteers award presentations

Continued from page 10

You should also understand that any activities that you engage in away from work should not bring discredit or reflect poorly on the organisation for which you volunteer.

None of the above should stop you from offering occasional well thought out clearly expressed opinions about current practice or future developments. Do not criticise present practice but explain how things could be done in less time, more cheaply or more efficiently.

Treat people as you would like to be treated, expect to compromise from time to time and never allow a situation to escalate. There is no point scoring points if they are going to escalate bad feelings that linger and corrupt work practice.

Remember time is on your side - if an idea doesn't get up today, there is always next week, next month or next year when you have had more time to think about it and perhaps modify and improve it.

Duty statements

A person who has been doing a certain job for some time will have no difficulty writing down what they do every day. This document will be a great help for anyone who takes over the job and is the simplest way of writing a duty statement.

Such statements build good practice as they are modified from time to time. The "what I do and why" ensures correct procedure in much the same way as writing down the potential significance of an object when it is offered to the collection. If there is nothing to write down - if you can't think of anything to write, then the action or the object is not relevant to the organisation.

Think before you volunteer

There are many opportunities to volunteer. The place nearest home is not necessarily the right choice. Where do your interest lie? What obvious jobs are there within the organisation? What jobs could be developed? Which organisation is actively looking for people? Do you know anyone else who volunteers in a specific organisation? Are you offering a specific skill or common sense, practicality and dedication? What hours or days are you prepared to offer? If things go well can you afford to increase the hours you offer? How will this extra absence affect your family?

Suzanna Edwards and Peter Stanbury shared ABV's annual Altruism Award for 2009. Altruism is defined as the deliberate pursuit of the interests or welfare of others and is one of the key components of successful volunteering.

Privileged Volunteering

Volunteering abroad brings special rewards but requires special arrangements. Who will look after your house, garden and pets? Will you have to learn at least basic words in another language? What are the weather conditions like? Where will you live? Can you enjoy local food, meal after meal? Do you need special funding? What do you know about the local customs and outlook?

The in-organisation culture and rules will be quite different. What is a 'no-no' there and what is acceptable though it may seem curious to you? How do you deal with culture shock both on arrival and on coming home?

The best volunteer organisations will have information about these potential problems and will reassure and train you before you go so fears are minimised. Some such as Australian Business Volunteers (see ABV at www.abv.org.au/) not only have training courses before you go but make special arrangements for your safety while you are abroad. In addition they will provide a return airfare, find you reasonable local accommodation as well as giving you a small daily allowance (enough for local meals). In return you must write some reports, but these are simple and straight forward.

Wherever you volunteer, the rewards can change your life for the better. Organisations seeking volunteers can, by careful preparation and forethought, initiate and quickly effect desired changes toward the future.

HERITAGE SITE RECORDS

Blue Mountains City Council has recently sent to the State Heritage Branch, a record of some 800 heritage sites, the list having been compiled by a highly regarded heritage professional consultant way back between 1999 and 2005.

In due course these records will be available to the public on the Heritage Branch's website.

BMACHO has been pressing for a number of years to have these records available to the public.

This would allow for the development of the monitoring program successfully initiated by Mt Wilson and Mt Irvine Historical Society Inc.

BOOK REVIEWS

Dr William Bell's SETTLERS' GUIDE or Modern Domestic Medicine and Surgery, Windsor NSW 1849

"The Settlers' Guide" was advertised in the Maitland Mercury on the November 28, 1849 as "soon to be published", and contained a request for subscribers.

It is remarkable that it took one hundred and sixty years to the day from the original advertisement appearing, to be finally published and launched recently at the Hawkesbury Regional Museum.

It was discovered accidentally by Lois Sabine in a box of uncatalogued Windsor solicitor's papers in the Mitchell Library some years ago. It had been placed with the solicitor as collateral for a loan, but never retrieved.

The Guide has proved to be a fascinating insight into the medical practices of the period.

It is now believed to be unique as being the very first complete medical book written in laymen's terms for Settlers in the Colony.

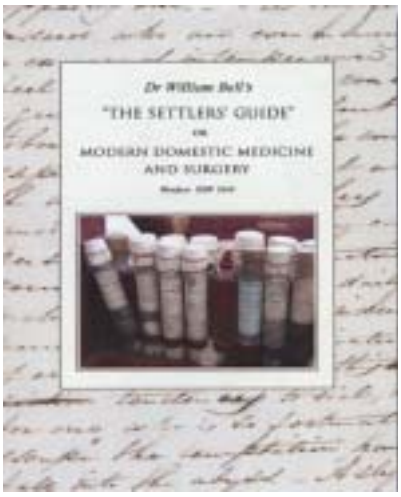
Dr Bell is never boring and uses many examples from his medical practice, some of them quite hair raising.

It is in two parts, the first section devoted to common diseases and their treatment.

This is followed by Forms of Medicine, [please don't try these] and illustrations.

The second part is devoted to ailments of women and children etc.

Now fully transcribed, The "Settlers' Guide", priced at $30 plus postage and can be obtained from Lois Sabine at lsabine@bigpond.com



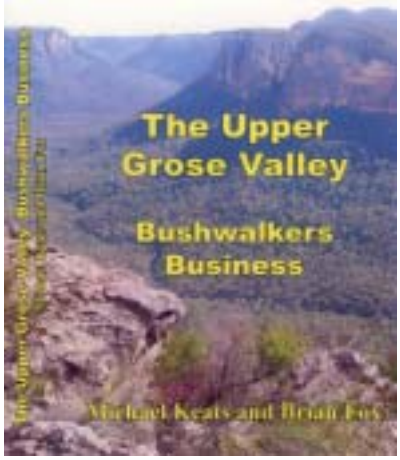
The Upper Grose Valley - Bushwalkers Business

Among the greatest panoramic views in the Blue Mountains National Park is that seen of the Grose Valley east of Blackheath.

As the viewer stands on the cliff edge at Govetts Leap the yawning void of space beneath the feet, and stretching to the eastern horizon is one of the wonders of the natural world.

Most visitors seem content to stop, take in this view and then jump back into their transport and mentally tick off another iconic destination. For those visitors who want to explore the vastness of this valley there is now a comprehensive text available.

Committed bushwalkers and co-authors, Michael Keats and Brian Fox have produced a researched guide to the Upper Grose Valley that will stand the deepest scrutiny.



The text of more than 560 pages includes detailed maps and descriptions of 59 walks; the origin of every place name; European history of the valley since it was first discovered, comprehensive notes on flora and fauna, climate, fires and floods and much more

Illustrated in full colour throughout "The Upper Grose Valley - Bushwalkers Business" is a must have volume for every Blue Mountaineer. A comprehensive index enables rapid retrieval of information about any person or locality connected with the Upper Grose Valley.

Produced in A5 format, the book is compact enough for the backpack but is equally at home on the reference bookshelf as a planning tool. At $44.50 plus postage and handling this is an investment every bushwalker will want to make. Postage and handling costs: Sydney area $9.00, NSW $10.00

Payment by cheque or money order to: Keats Holdings Pty Ltd 33 Livingstone AvenuePymble, NSW 2073 Tel: 9144 2096 for further details: mjmkeats@easy.com.au and/or Brian Fox Tel: 6332 2590 Brian.Fox@lpma.nsw.gov.au

MACQUARIE ERRED

Caley's Repulse a cairn of stones on the north side of the railway line at Linden known as Caley's Repulse for almost 200 years was erroneously named by Lachlan Macquarie.

The original cairns stood beside Cox's Road. It was sighted by Blaxland, Wentworth and Lawson in 1813.

When Macquarie passed by on his way to Bathurst in 1815 he named the area Caley's Repulse in the erroneous belief that the pile of stones had been erected by George Caley the botanist, who made an attempt to cross the Blue Mountains on a route further to the north.

The builder of the original cairn is unknown but it is probably an Aboriginal construction.

The present cairn was made up from scattered stones discovered by members of the Australian Historical Society in 1912 and claimed by them to be the remains of the cairn seen by Blaxland, Wentworth and Lawson.

Source: *Places of Historic Interest on the Lower Blue Mountains* published in 1977 by Springwood Historical Society from data provided by the Society's research officer, Allan Searle

$200,000 grant for Carcoar court house makeover

Carcoar Court House - 1882

The historic Carcoar Court House is undergoing a much needed makeover thanks to a grant of $217,000 from the Federal Government's Jobs Fund.

President of the Carcoar and District Historical Society Inc. John Burke said the village received the funding from the Department of Environment, Water, Heritage and Arts because they were "able to demonstrate Community activity and support for the project".

He said the court house built was a rarity because it has most of the original court house furniture and fittings including the furniture in the judge's room.

The funding will cover extensive internal and external work on the building including repairs to the roof, floor and clock tower. Some funds will be used for furniture restoration. The work is expected to be finished by mid 2010.

It was not Carcoar's first court house when on April 27, 1840, Carcoar was proclaimed as a place for the holding of courts of petty sessions. The first court house was actually the police office.

The local justices or police magistrates presided in presumably what was a timber building but within 9 years the district had grown and it became inadequate for court sittings.

The then colonial architect, Mortimer Lewis, was directed to prepare plans and specifications for a new court house and on March 7, 1849 the plans of a court and watch house were approved by Sir Charles Fitzroy.

Tenders for the erection of a court house to be built of brick with a shingle roof were called and that of John Hunter Kirkpatrick was accepted in April 1849.

The accepted tender did not include a watch house it having been dropped in favour of a court house only.

The building was completed in 1850 under the supervision of Edmund Blacket and survived for 30 years.

However, its days were numbered and a new court house was built in 1882 at a cost of four thousand three hundred and eighty pounds.

The new court house was opened on November 10, 1882.

Its Italianate design is indicative of the interest in revival styles at that time. Internally the building contains a fine intact court room with polished cedar joinery and elaborate painted frieze.

It ceased operating as a court house in the late 1950s and in 1994 the Carcoar and District Historical Society took on the trusteeship of the court house and now has its research and archive room situated within the building.

WELCOME TO NEW MEMBER

Welcome to new member the Transport Signal & Communications Museum Inc. at Kurrajong.

The museum has been created by John Cooper who was the founding chairman of the Zig Zag Railway Co-op and his wife Carolynne Cooper when they saw the need and desire to show the public, the behind the scenes, items used by the railways.

Items such as signalling equipment, safe working, tickets, clocks, telephones, badges to name a few all played an intricate part of any railway system.

Formed as a small group of collectors the TSCM was first housed in a leased railway electrical sub station at Cabramatta.

Since moving the museum to Kurrajong there has been an effort to establish more complex and complete exhibits of particular applications such as the 'safe working' on the Richmond Line and the miniature lever frame

The charter of the Transport Signal and Communications Museum Inc. has been to collect, restore and exhibit as many of these items as possible.

John and Carolynne can be contacted at signalbox@iprimus.com.au

Further information can also been found on website www.tscm.rha-nsw.org.au

'...for the relief of horses and other dumb animals..'

Horse troughs were a common sight on the roadside in the 19th and early 20th century before motorised transport took over the roads and highway.

They still remain in many towns throughout Australia as a reminder of heritage and times when things were a bit slower and perhaps more peaceful.

Many of the troughs were financed by a trust fund established through the will of George Bills. About 700 troughs were distributed by the trust in Australia and 50 in several other countries.

George and Annis had no children, and following the death of George in 1927, a trust fund was set up, believed to be around 70,000 to 80,000 Australian pounds.

One of the purposes of the trust, as set out in George Bills' will, was to: *"..construct and erect and pay for horse troughs wherever they may be of the opinion that such horse troughs are desirable for the relief of horses and other dumb animals either in Australasia, in the British Islands or in any other part of the world subject to the consent of the proper authorities being obtained."*

Each trough cost 13 Australian pounds ($26) plus transport and installation. The majority of the troughs were installed in Victoria and NSW between 1930 and 1939.

Initially the troughs were individually designed and constructed, however by the early 1930s, J.B. Phillips, a relative of the Bills, became the head contractor. Working to a standard design he produced the troughs in Hawthorn Victoria.

The troughs were pre-cast concrete with a curved pediment with the inscription "Donated by Annis & George Bills Australia".

Manufacture was subsequently handled by Rocla, who produced troughs to the same design in Victoria and later in Junee, NSW.

With the rise of motorised transport, demand for the troughs declined and production had ceased by the end of World War II.

This Bills horse trough located at Glenbrook has a plaque attached which reads: 'This trough was donated in rememberance of those horses that did not return from the First World War 1914-1918

Aside from the horse troughs, the trust was involved with other animal welfare projects. George became a life governor of the RSPCA in 1924.

George Bills was born in Brighton, England in 1859. He migrated with his family to New Zealand and subsequently to Echuca, Victoria in 1873.

In 1882 he opened a bird dealers shop in Brisbane, where he met and married Annis Swann who had emigrated from Sheffield, England.

In 1884 the couple moved to Sydney and George Bills went into business with his brothers, manufacturing innerspring mattresses.

In 1908, George retired to Hawthorn, Victoria and in 1910, Annis died while the couple were visiting England.

PROTECTING POSSESSIONS AGAINST BUSHFIRE

The Australian Institute for the Conservation of Cultural Material has released an information sheet *STORING COLLECTIONS IN HIGH BUSHFIRE RISK AREAS*, aimed at assisting individuals and those working with cultural collections to reduce the risks of fire when storing their precious possessions.

It is being distributed to arts and cultural heritage organizations, local councils, emergency service providers and the media.

For more details, the information sheet and press release can be found on AICCM's website at www.aiccm.org.au.

Since Black Saturday, most people recognise that fires of a catastrophic degree can cause damage on a scale previously unimagined. However, stories have emerged that some treasures did survive, even paper items.

While not a guarantee that items will not suffer damage, minimising risk through the storage methods recommended in the information sheet may offer some hope for items that have to be left behind on evacuation.

The AICCM website contains further information about the handling and care of salvaged items, particularly those damaged by fire or water. If you are affected by fires, you should retain damaged keepsakes that are still recognisable, even if damaged and dirty, as they may be salvageable.

Consult a conservator before you throw them away. Conservators can be contacted via the AICCM website or through state and national cultural institutions.

Museums scoured for looted relics

The British Museum has been asked to open its archives to allow Chinese investigators to document 'lost' imperial treasures that China claims were taken from Beijing's Old Summer Palace when it was burned and looted almost 150 years ago.

China has indicated that the intention of the scheme is to document archives, but it is raising fears that Britain and France could be asked to return some treasures.

Researchers are being sent to museums, libraries and private collections in an attempt to build a comprehensive catalogue of artefacts China claims were stolen in 1860 following the Second Opium War.

The pavilion and stone arch are among few of the only remaining buildings in the Old Summer Palace

The Old Summer Palace was sacked by British and French troops as punishment for the torture and execution of 18 emissaries sent by Western powers to Beijing.

The issue remains an emotive subject in China where it is still viewed as one of the nation's great humiliations.

Construction began on the Old Summer Palace in 1707 during the reign of Emperor Kangxi.

It is thought, about 1.5 million relics are housed in more than 2000 museums in 47 countries.

China's sensitivity towards such 'looted' treasures was demonstrated last year when a Chinese collector sabotaged the auctioning of two bronze heads taken from the Old Summer Palace, bidding 13.9 million English pounds then refused to pay.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 40 Hume Avenue, Wentworth Falls 2782
E-mail: bmacho.heritage@gmail.com
Website: www.bluemountains.heritage

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc, Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc, Friends of Everglades, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum Inc, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc, Mt Wilson and Mt Irvine History Society Inc (including Turkish Bath Museum), Mudgee Historical Society Inc, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch), Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians inc, Transport Signal and Communication Museum Inc., Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Wendy Carlson, Ray Christison, Ms Pamela Hubert, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2009-10 is: John Leary, (president) Ian Jack (vice president), Barrie Reynolds (secretary), Kathie McMahon-Nolf (treasurer), Jean Arthur, Ray Christison, Lyn Fowler, Doug Knowles, and Dick Morony (public officer), Peter Stanbury.
AUDITOR: Sue McMahon, B Comm CPA

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.
HERITAGE is BMACHO's official newsletter.

HERITAGE

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS

MARCH - APRIL 2010 ISSUE No. 8

LINDEN OBSERVATORY ADDED TO STATE HERITAGE REGISTER

By Rev. Robert Evans

The Linden Observatory was last month added to the State Heritage Register and preserves the legacy of amateur astronomer and telescope maker, Ken Beames.

Ken Beames founded what is now known as Linden Observatory soon after the Second World War as a location for his proposed large telescope where there would be good quality conditions for observing the night skies.

After earlier experiences in making smaller telescopes, he had purchased a glass disc blank 24 inches (61cm) in diameter and several inches thick, and, during the war years, had ground the mirror to have a parabolic curve with a focal length of about ten feet.

He wanted to set up the telescope permanently, and have it housed in a dome. But he also needed a good location where he could keep on producing the various artifacts which constituted his method of earning his livelihood, which he had previously done from his home in Fivedock.

The telescope and observatory building were designed and constructed by Beames, and the necessary drawings are still held at Linden, but are now in need of preservation.

When it became operational in the early 1950s, the telescope was the second largest optical telescope in Australia, amateur or professional, and would have been one of the largest amateur telescopes in the world.

The Beames telescope is housed in the Linden Observatory. Photograph courtesy Western Sydney Amateur Asrtronomy Group.

What had in the past been the largest telescope in Australia since the 1880s, the 48 inch Great Melbourne Telescope, had been in storage for many years because its design was such that the slightest wind vibration made it unusable. It had speculum metal mirrors which were very hard to keep shiny and accurate.

The largest telescope in operation in Australia in 1950 was the 30 inch Reynolds telescope on Mount Stromlo. This status of being the second largest telescope continued for about eight years until the 74 inch telescope was built for Mount Stromlo Observatory in the late 1950s.

The Beames' telescope is an equatorial telescope, designed to follow the stars across the sky. Generally speaking, Beames' telescope is a masterpiece of engineering design and machining for the time in which it was built, especially seeing that it was essentially the work of one man.

The primary mirror of the Beames telescope has a focal ratio of five, but the overall design of the telescope gives it a very long operational focus, which provides a fairly small field of vision, and makes it best suited for observing the planets and double stars, and for parallax work.

Optically, the main telescope seems to be very good, although the auxiliary telescopes attached to the main telescope are not currently operational. ***Continued page 2***

Beames had a genius for design

Contued from page 1

It is a visual telescope with filters available.

To make it usable with modern electronic detectors, and modern electrical driving technology, would involve making a number of substantial changes to its present abilities, which, even if this was desirable, would cost a lot of money.

The whole electrical system, and the eyepiece areas would have to be totally reconstructed, and the telescope would have to be married to a computer. In such situations, professional astronomers always say they prefer to build new ones, and it is usually cheaper in the end.

Beames then turned his endless supply of energy, and his genius for design, towards constructing a planetarium projector, following the Zeiss design which was then commonly in use.

He wanted the results of his labour to be used for educational purposes, and a planetarium would succeed at this very substantially. The projector was never finished, even after nearly forty years.

Beames died in March, 1989. Shortly beforehand he had made a new will. This will created a Trust which had the purpose of preserving his telescope and observatory, and using his property for education in astronomy, especially for younger people.

The trustees specified in the will were his solicitor, Mr. Darryl Browne, and the media personality, Dr Karl Kruselnicki. This will was challenged by his daughter, Barbara Beames, and the costs were taken from the estate, leaving not enough money to process the will. It was 1992 before some land could be sold and the will could be finalized. The Reverend Robert Evans became trustee instead of Dr Kruselnicki.

The Trust was faced with the task of preserving what remained of Mr Beams' possessions, using the property as specified in the will, with almost no income.

Inside the dome at Linden Observatory. Photograph courtesy of Western Sydeny Amateur Astronomy Group.

Because the Beames' telescope was based upon electrical technology which had become outdated, and because the public could not be allowed to use the telescope at night for safety reasons, it was decided to purchase another large telescope which would be much easier and safer to use.

A 76cm (30 inches) visual telescope was purchased from manufacturers in the United States of America.

The building of a shelter for this telescope, however, required a development application to the Blue Mountains City Council, and this application proved to be such an excruciatingly slow and expensive exercise that a debt had to be incurred in order to finish the project.

So the main tasks facing the Trust have been the need to preserve, catalogue and display the various artefacts, documents and items of interest which belonged to Mr Beames. Also, the property has to be used for educational purposes, as the will specifies.

Security and threats from bush fires have been continual factors as well. But these needs have all had to be viewed through the spectacles of having almost no financial income, and almost no reserves, a situation that many heritage and cultural places in Australia and around the world, have to face continually.

Lack of income has been the main cause for whatever lack of progress the Trust may have suffered. As friends have often said, there was nothing at Linden Observatory that a million dollars could not have fixed.

William Charles Wentworth's biographer as guest speaker for AGM

Andrew Tink the former NSW Shadow Attorney General who has written the biography of William Charles Wentworth will be guest speaker at BMACHO's annual general meeting to be held at the Grandview Hotel, Wentworth Falls on Saturday, March 13, commencing at 2pm.

Andrew Tink

Recently published by Allen and Unwin, this book is the story of the man Manning Clark described as 'Australia's greatest native son'.

Best known as one of the first Europeans to cross the Blue Mountains, Wentworth led a life full of firsts.

One of the first born Australians of European parents, the first Australian author to be published and co-founder of Australia's first independent newspaper, Wentworth gave the colonists an Australian voice.

One of Australia's first barristers who fought for trial by jury, for the first Parliament in Australia and for self-government in an Act the British called 'a legislative declaration of independence' Wentworth was a physical and intellectual giant.

Ruthless when it suited him, he purchased the South Island of New Zealand for a pittance until a furious governor made him give it back.

With his rough charm, colonial cunning and English education, Wentworth was equally at ease addressing a rowdy meeting of ex-convicts as he was lobbying ministers in the corridors of Whitehall.

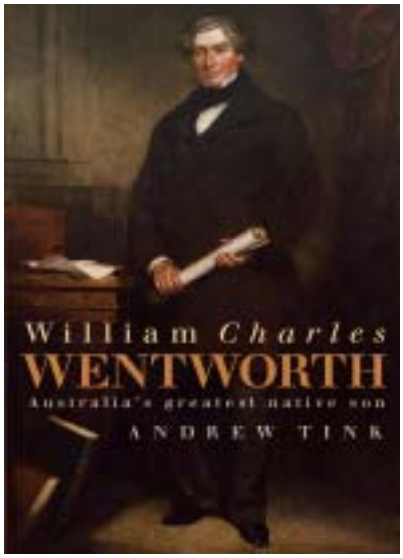
The son of a convict mother and a father who was the black sheep of a family which included a British Prime Minister, Wentworth was the first parliament's undoubted leader.

More than once in his fight for self government, Wentworth threatened to block the governor's budget until the British Government gave in.

Almost half a century before the Commonwealth was created, Wentworth led the fight for an inter-colonial legislature. Indeed Henry Parkes, the 'Father of Federation', later acknowledged Wentworth as his inspiration.

Despite his achievements and his volcanic personality which was capable of deceiving friend and foe alike, this is the first comprehensive biography of Wentworth to be published.

Following eight years at the Bar, Andrew Tink spent nineteen years in the New South Wales Parliament, including eleven as a Shadow Minister and three as Shadow Leader of the House.



The dust cover of Andrew Tink's biographyof William Charles Wentworth is from a portrait hanging in the NSW Parliament

After stepping down in 2007, Andrew became a Visiting Fellow at Macquarie University's Law School,

Most of Mr Tink's political career was spent on the same side of the lower house chamber where a huge portrait of Wentworth - who led the fight for self-government, trial by jury and a free press - hangs.

So when the former barrister decided to quit politics he chose to write about Wentworth's life and times.

BMACHO NEEDS A NEW SECRETARY

With the retirement of Barrie Reynolds from the position of BMACHO's secretary the organisation is searching for someone to take on this challenging role.

Barrie will stay with the committee and provide assistance to the incoming secretary. The secretary is one of the executive officers of the committee and will be required to prepare agendas, take minutes of monthly meetings and deal with a limited amount of correspondence. A computer and an internet connection are essential.

Working with both dedicated enthusiasts, professionals and academics, she or he will be at the cutting edge of the heritage sector in this region.

The committee of 10 has developed a work ethic that sees each member share in the burden of duties associated with the organisation.

For further details call John Leary on 4758 8584 or e-mail: johnnanette@optusnet.com.au

From the president's pen.....

Let's not squander the opportunites of a Blue Mountains crossing bicentenary commemoration

The first European crossing of the Blue Mountains represents an important milestone in the history of Australia and has significance at local, regional, state and federal levels.

A number of organizations including Blue Mountains City Council have rightly considered that there should be a commemoration of the bicentenary of the crossing during 2013.

The Royal Australian Historical Society has offered support in the co-ordination of commemorative activities and has appointed its senior vice president, Emeritus Professor David Carment to liaise with various organisations.

It is important in planning activities that they be developed having in mind that the crossing was only the start of events. George William Evans began his survey of a roadway which went as far as the future Bathurst, in November, 1813; William Cox then supervised the construction of the road from 1814 to 1815; and then Governor Macquarie travelled along the road to select the site of Bathurst, in 1815. All of these events are of cumulative historical significance.

BMACHO and the RAHS strongly believe the commemoration should include projects that are of a long-term benefit. Although, to capture the imagination of the public there will need to be some celebratory activity; care must be taken to ensure that public funding is not frittered away on parades, plaque placements, partying and pyrotechnics.

It is possible because of the significance of the event that an application to the federal and state governments might well attract funding for projects which will remain long after the event.

Possibilities for lasting projects could include walking trails based on parts of the route blazed in 1813-1815; publications including websites, school education kits and provision of interpretive signage.

Blue Mountains City Council is to be congratulated following representation from BMACHO and others for having amended its earlier "terms of reference" for the proposed committee of council, called the Blue Mountains Bi-Centenary of Crossing Committee (BOCOC) which now sees the inclusion of representatives from historical/heritage societies in its membership.

The inclusion of representation from historical socities will allow dedicated community volunteers to have imput which will ultimately benfit the commemoration

It is now hoped council will give serious consideration to adopting objectives which include programs of long-term benefit

It would be a great shame if at the end of the commemoration that the occasion was but a pleasant memory and that a new plaque on a monument was the only tangible evidence with little benefit to the community other than the politician, councillor or official who had unveiled it.

This commemoration could be of wonderful benefit to present and future generations. Let's not squander the opportunity.

THANK YOU BARRIE REYNOLDS

Professor Barrie Reynolds, who since its inception has been BMACHO's honorary secretary, has announced he will not seek re-election as secretary at the coming annual general meeting.

The idea of BMACHO was conceived by Barrie and enthusiastically embraced by those who attended the 2004 Blue Mountains Local History Conference at the Carrington Hotel in Katoomba at which he was stressing the importance of having a cultural heritage strategy for the city.

Barrie had the ability to gather around him individuals, both professional and amateur as well as heritage organisations and it is now history that council's cultural heritage is seen as an important aspect of the city's strategy. There is also a greater awareness of the importance of our cultural heritage.

Although in no way wishing to diminish the value of many individuals who have worked tirelessly for the recognition of cultural heritage, it has been the motivation, contagious enthusiasm, academic expertise and professional acumen displayed by Barrie that has driven much of what has been achieved by BMACHO in its formative years.

Although seldom swayed from his objective, and often frustrated in his effort, he nevertheless has empathised with those with whom he has worked encouraging them to strive for excellence.

Barrie has agreed to accept nomination to the management committee with a view to offering assistance to an incoming secretary and for this I and the committee are indeed grateful.

On behalf of all who have worked with Barrie and benefitted from his expertise, we say thank you to a man who has served the heritage sector and future generations well beyond what anyone could have reasonably expected.

John Leary, OAM - President, Blue Mountains Association of Cultural Heritage Organisations

‘TAMBAROORA GOLD’: A FOLK SONG AND ITS LINK WITH THE BLUE MOUNTAINS

By John Low

One of the characteristics of a ‘folk song’, whether or not its origins can be traced, is that it is adopted by the community (‘the folk’) and survives and evolves through the living memory of that community. The story of ‘Tambaroora Gold’ provides an interesting demonstration of this process.

When I arrived at the Blue Mountains City Library in 1982 to establish a local history collection I found, tucked away in a cupboard, a battered manila folder containing copies of an assortment of poems (some typed, some handwritten) and a couple of songs printed as broadsides.

They were the work of an old Katoomba identity, Harry Peckman, known during his lifetime as ‘The Blue Mountains Poet’.

Though many were mediocre, sentimental and conventional, there were some that captured my imagination and others that offered insights into the region’s history that could be important irrespective of literary quality.

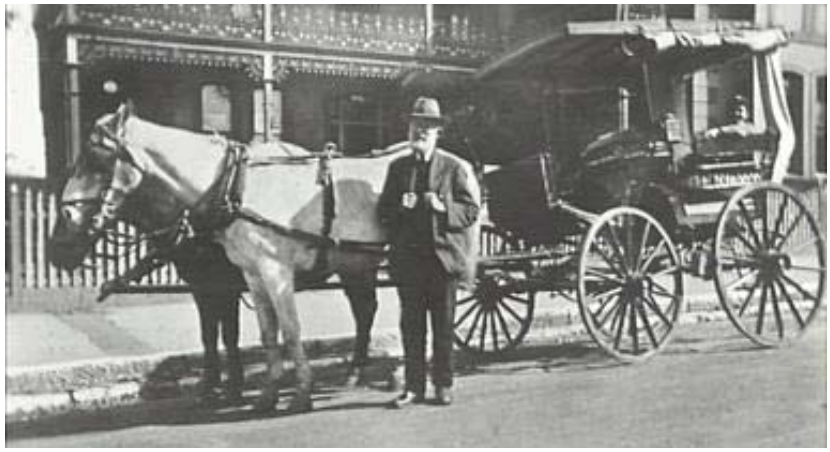
As time went on I gathered more information about him and the texts of further poems and songs.

By 1982 Harry Peckman had been dead for nearly 50 years. Born at Kurrajong in 1846, he lived the whole of his life in the Blue Mountains region and died in Katoomba in 1934.

As a young man, in the days before the western railway line was built, he drove wagons and coaches on the road between Penrith and Hartley. Then, when the Blue Mountains developed its reputation as a tourist destination, he began taking visitors to the local scenic attractions.

In the early 1880s he and his brother, John, established livery stables in Parke Street, Katoomba, at the back of the Carrington Hotel.

Their business flourished. Both men were expert horsemen and knew the Blue Mountains intimately and their patrons soon included a growing number of holidaying dignitaries and their families.



Peckman and his coach and horses (in later life, in the 1920s). Photograph courtesy Local Studies Section, Blue Mountains City Library.

In 1887 Lord and Lady Carrington were taken over the newly opened Six-Foot Track to Jenolan Caves while, in 1893 the Duchess of Buckingham and Chandos was entertained with billy tea and damper, accompanied by song and recitation, at Govetts Leap.[1]

To the many visitors who engaged him Harry became known as ‘the poetical whip’, a coachman who would take them to places off the beaten track and entertain them *en route* with selections from his repertoire of mostly self-penned songs and recitations.

In his verses, performed in the midst of a grand, open landscape, visitors were given a glimpse into the heart of the Mountains that no other driver could offer.

While no one could claim that Peckman was a great poet, his skills as a performer clearly made up for any deficiencies in craft. “No free verse for this poet”, observed cartoonist and journalist Hal Eyre in 1922, “but rhymes tuned to the beat of his horses’ hoofs.”[2]

Like many self-educated bush men, Peckman was a wide reader and his verses are spiced with literary and Biblical allusions.

His subjects ranged from the Blue Mountains itself to dramatic and patriotic war ballads and heart-felt ‘farewells’ to friends who had died.

There were also tributes to popular heroes like the sculler Edward Trickett, the first Australian to win a world sporting title (in 1876), and the popular aviatrix Amy Johnson who visited Katoomba in June 1930.

Though he performed for the gentry his audience was in the main a popular one and his work, when published, appeared almost exclusively on privately printed broadsheets and later, when a newspaper was established in Katoomba, in the local press.

He was also acquainted with a number of Sydney literary figures who sought him out when they visited Katoomba, among these the poets Roderick Quinn and Henry Lawson.

My discovery of one particular broadsheet was especially exciting.

I was visiting the Mount Victoria & District Historical Society’s museum in the old refreshment rooms at Mount Victoria Railway Station, when their research officer brought out an original Peckman broadside to show me.

The ten-verse song with chorus was headed “Tambaroora Gold / By Harry Peckman, Hartley” and that title certainly rang a bell.

Harry recited his poems for the last time on his 88th birthday

Continued from page 5

Several fragments of this song were published in 1961 in the magazine of the Bush Music Club (Sydney)[3], the least fragmentary of these obtained by the historian Russell Ward from a 70 year-old resident of the NSW north coast.

This version was later 'completed' by John Manifold and not surprisingly differed markedly from the Peckman broadsheet. Names of people had changed, for example, and there was no chorus.[4]

The remaining fragments were all collected by the folklorist John Meredith. One, later published by Meredith in his important collection of Australian folk songs[5], came from Muriel Whalan of Katoomba who remembered learning it from her mother during her childhood at Sunny Corner, west of Lithgow.

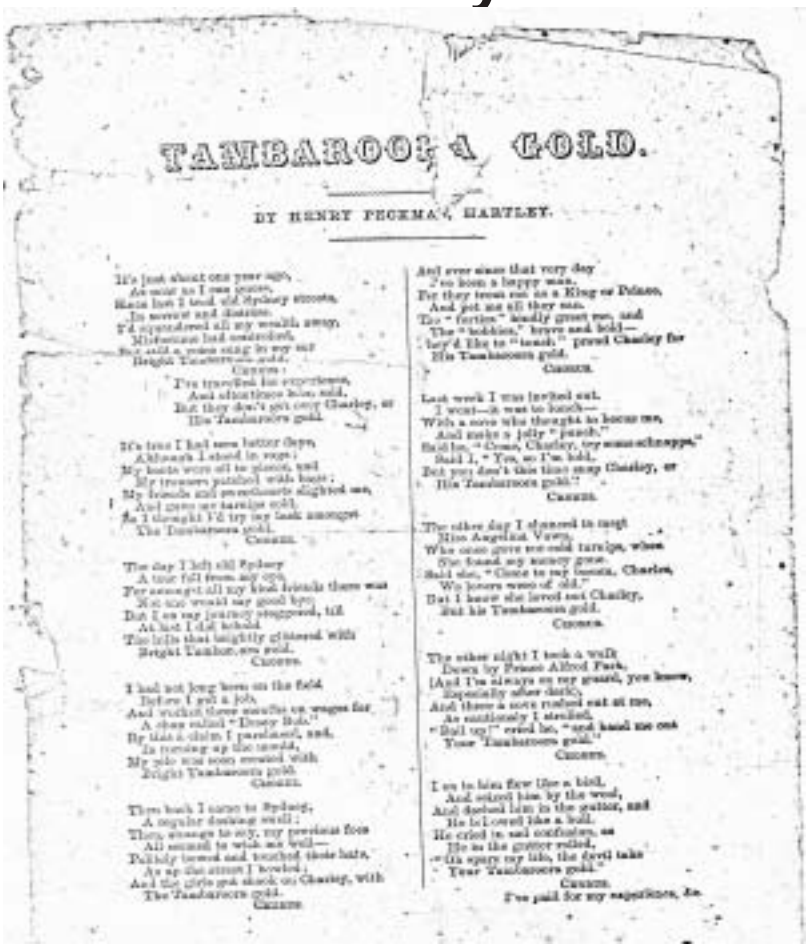
The others came from an informant who had grown up in the Springhill district of NSW and from the famous bush singer H. P. 'Duke' Tritton. It seemed to be the chorus that stuck in their memory.

Was Harry Peckman's broadsheet version the original? Though, of course, one can never be absolutely certain with folk song, even when authorship is claimed, I'm inclined to think it is.

There is no printing date on the broadsheet but Peckman went to Hartley in the early 1860s as a very young man to work for local hotelkeeper John Louis Meads.

He was living in the Hartley - Mount Victoria district when Tambaroora, just north of Bathurst NSW, was still a prosperous gold mining town (along with its better known neighbour Hill End) and news and gossip from the gold fields was travelling regularly down the Western Road.

It would appear that the young bush poet was performing his songs and poems and peddling his broadsheets quite widely during the 1860s and 1870s.



TAMBAROOR A GOLD.

BY HENRY PECKMAN, HARTLEY.

It's just about one year ago,
As near as I can guess,
Since I took old Sydney streets,
In sorrow and distress.
I'd squandered all my wealth away,
Misfortune had overtook,
But still a voice sang in my ear
Bright Tambaroora gold.

Chorus:
I've travelled for experience,
And oftentimes been told,
But they don't get over Charley, or
His Tambaroora gold.

It's true I had some better days,
Although I stood in rags;
My boots were all to pieces, and
My trousers patched with bags;
My friends and sweethearts slighted me,
And even my lassie sold,
As I thought I'd try my luck amongst
The Tambaroora gold.
Chorus.

The day I left old Sydney
A tear fell from my eye,
For amongst all my kind friends there was
Not one would say good bye.
But I on my journey staggered, till
At last I did behold,
The hills that brightly glistened with
Bright Tambaroora gold.
Chorus.

I had not long been on the field
Before I got a job,
And worked three months on wages for
A chap called "Dusty Bob."
By this a claim I purchased, and,
In turning up the mould,
My pile was soon crowned with
Bright Tambaroora gold.
Chorus.

Then back I came to Sydney,
A regular dashing swell;
Then, strange to say, my previous foes
All seemed to wish me well—
Politely bowed and touched their hats,
As up the street I bowled;
And the girls got stuck on Charley, with
The Tambaroora gold.
Chorus.

And ever since that very day
I've been a happy man,
For they treat me as a King or Prince,
And get me all they can.
The "ladies," bravo and bold—
I beg'd like to "tarnal," proud Charley for
His Tambaroora gold.
Chorus.

Last week I was invited out.
I went—it was to lunch—
With a miss who thought to honor me,
And make a jolly "punch."
Said he, "Come, Charley, try some schnapps,"
Said I, "Yes, so I'm told,
But you don't this time stop Charley, or
His Tambaroora gold."
Chorus.

The other day I glanced in regt
Miss Angelina Vane,
Who once gave me cold tarnips, when
She found my money gone.
Said she, "Come to my house, Charles,
We have some of old."
But I knew she loved not Charley,
But his Tambaroora gold.
Chorus.

The other night I took a walk
Down by Prince Alfred Park,
[And I've always an eye ground, you know,
Especially after dark],
And there a note rushed out at me,
As cautiously I strolled,
"Bail up!" cried he, "and hand me out
Your Tambaroora gold."
Chorus.

I ran to him flew like a bird,
And seized him by the wrist,
And fetched him in the gutter, and
He lo'l cursed like a fool.
He cried in sad confusion, as
He in the gutter rolled,
"To spare my life, the devil take
Your Tambaroora gold."
Chorus.
I've paid for my experience, &c.

Pictured is the original broadsheet of Tambaroora Gold by Harry Peck

In some of his reminiscences, recorded later by local journalists, he mentions the lively sessions of song and recitation he participated in during his youth, particularly at 'Kelly's in the Glen' halfway to Jenolan Caves.

It seems that some of his work attained for him what is possibly the highest accolade a popular audience can bestow, a passage into the anonymous oral or 'folk' tradition that carried it to places far removed from the Blue Mountains.

While we have Peckman's complete text for 'Tambaroora Gold' we don't know what tune he used when he originally sang the song in the 1860s. However, two fragmentary tunes collected by Meredith were adapted by Manifold who suggested that both be used, one after the other. The band Franklyn B. Paverty, who recorded the song in 1987, set it to the tune 'Sweets of May'.[6]

Towards the end of his life Harry Peckman experienced hard times and, though visitors still often sought him out even in the late 1920s, he watched as the motor car gradually rendered his coach and pair of aging horses obsolete.

At the time of his death he had become something of an icon, a symbol of a past era. On a slow news day the local journalists would seek him out and trawl his still alert mind for reminiscences of the 'old days'.

For his 88th birthday, in August 1934, his friends organised a party. He performed his poems for the last time and, some seven weeks later, died. His grave in Katoomba Cemetery looks out over the tributaries of the Grose River that flow into what he once described as "the Hawkesb'ry silver Rhine".

Continued page 7

Tambaroora Gold

Continued from page 6

Since 1982 I've come to know him well. I've learnt from him something about the Blue Mountains where I live and something of the way folk songs are created.

In 1993, nearly 60 years after his death, a small biography and collection of his surviving poems and songs was published.[7] Belated and long overdue recognition for the 'Blue Mountains Poet', a man of his place who knew its stories!

End notes

BMACHO AGM AT GRANDVIEW HOTEL, WENTWORTH FALLS
Saturday March 13, 2010 at 2pm
For further information johnnanette@optusnet.com.au

BLACK & WHITE IN THE BLUE MOUNTAINS

Historian and ecologist Jim Smith will deliver the Blue Mountains Historical Society's Beryl McLaughlin lecture, which he has titled *Black & White in the Blue Mountains* .

Jim Smith has been travelling through and documenting the country of the Gundungurra speaking people of the southern Blue Mountains for over 20 years.

He will give a presentation of his research at the Wentworth Falls School of Arts on Saturday March 6 commencing at 10.30am. Some of the topics covered will include his mapping of Dreaming Journeys, Aboriginal travel routes and significant landmarks.

He will explain the web of biological and spiritual kinship that developed between Aboriginal and non-Aboriginal people of the Burragorang Valley and how the memories of black and white people about the shared past have become entangled.

The true spellings, meanings and locations of local Aboriginal place names and the healing practices of Gundungurra people will also be explored.

Previously untold stories of Katoomba's "Gully Aboriginal community will be revealed.

The talk is open to interested members of the public. No booking is required and it is free of charge.

For further information contact: (02) 4782 3751 or (02) 4757 3824 (Tuesdays and Fridays) or e-mail bmhs@email.com

Macquarie named "Spring-Wood"

With William Cox having established a road across the Blue Mountains, Governor Macquarie journeyed across the Blue Mountains to Bathurst in 1815.

Macquarie camped on a site located near what is now Macquarie Road, between Homedale and Short Street, Springwood naming the place "Spring-Wood" on April 26, 1815.

The Royal Australian Historical Society has marked the site by erecting a small monument and plaque.

In 1816 the 1st Military Depot was moved to this site from it original location beside the Glenbrook Lagoon.

The military post was set up to protect travellers from being attacked by the Aborigines.

PRIME MINISTERS CORRIDOR OF OAKS

The Norse legend that Thor sheltered from a thunderstorm under an oak tree has led to the belief that having an acorn on a window sill will prevent a house from being struck by lightning hence the popularity of window blind pulls decorated as acorns.

With most prime ministers at some stage in their career having to weather political thunderstorms, a corridor of oaks from which grows the acorn seems a fitting living memory for a prime minister.

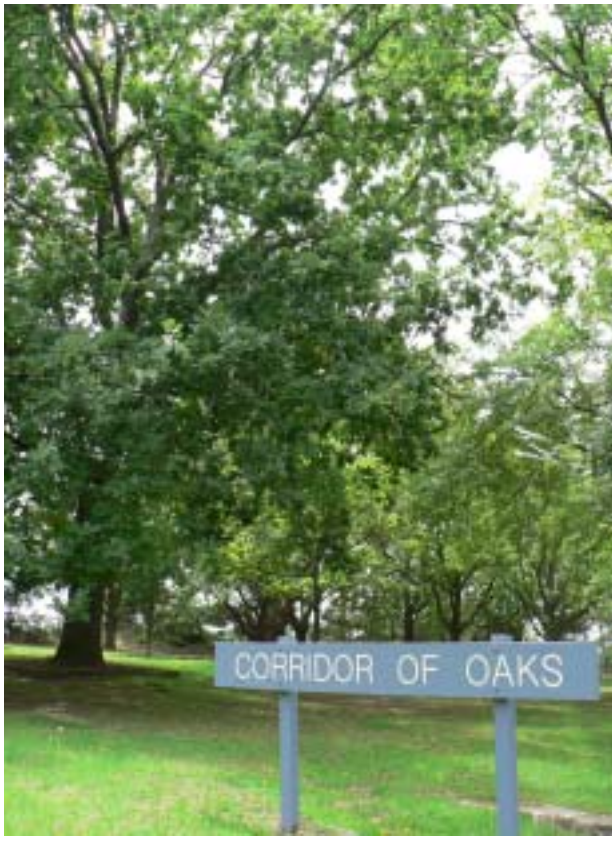
There have been 26 Australian Prime Ministers since Federation and over the years an oak tree for each has been planted in Jackson Park on Sir Henry's Parade, Faulconbridge.

Joseph Jackson (1874-1961) represented the electoral district of Nepean in the NSW Legislative Assembly for 33 years being the Minister for Local Government for 8 months between 1932 and 1933.

He donated the land on which Jackson Park sits to the people of the Blue Mountains in 1933 for use as a public park.

At that time Jackson owned the former home of Sir Henry Parkes and was an ardent admirer of his.

He conceived the idea of an avenue of oak trees to be planted by all the Prime Ministers of Australia or their nearest surviving relative.



There are a number of varieties of oak trees planted in Jackson Park

He hoped that the avenue, growing opposite the Parkes home, would become a national memorial.

It was at Faulconbridge during the 1880s that Sir Henry Parkes, in the company of many of his parliamentary colleagues, was able to come to conclusions about the framework of the Australian Constitution.

Planting of the oak trees commenced in 1934.

Edmund Barton was appointed Prime Minister by the Governor-General, Lord Hopetoun, in December 1900. In what is known as the "Hopetoun Blunder", the Governor-General had originally asked the Premier of NSW, William Lyne to form a ministry. Lyne was unable to garner enough support, mainly because of his previous opposition to Federation.

Mr WM Hughes Prime Minister of Australia (1915-23) planting the 6th tree in the Corridor of Oaks was reported in *The Sydney Morning Herald* of August 19, 1935 which stated: "These trees will live when all whose name they symbolise are gone; and after we are gone will come another generation whose pleasure and duty it will be to serve this great Commonwealth and this great Empire as the men whose names are being written in the hearts and souls of these young oak trees have done.

"Australia will one day make pilgrimage to see these growing oaks and to do honour to the Father of our Federation, Sir Henry Parkes who sleeps almost in the shadows of these trees."

The plantings on the north row from east to west are for Keating, Fraser, McMahon, McEwan, Forde, Fadden, Menzies, Page, Lyons, Scullin, Bruce, Hughes and Howard. On the south row from east to west they are for Hawke, Whitlam, Gorton, Holt, Chifley, Curtin, Barton, Deakin, Watson, Reid, Fisher and Cook.

A plaque in in the park recalls the desires of Joseph Jackson in donating the land.

Acorn cure

In the 17th century, a juice extracted from acorns was administered to habitual drunkards to cure them of their condition or else to give them the strength to resist another bout of drinking.

Article researched and written by John Leary, OAM who also produced the photographs.

The plaque under Australia's first Prime Minister, Edmund Barton's oak tree.

Heritage locomotive's new home at Valley Heights Museum

The heritage 3214 locomotive built in 1892 has been moved to the NSW Rail Transport Heritage Museum at Valley Heights.

The 32 class locomotive with two items of rolling stock have been transferred from Thirlmere as part of the extensive exhibit relocation that has been taking place in conjunction with the redevelopment of the Thirlmere Rail Heritage Centre.

Accompanying the 3214 were carriages RBR 1049 and an EHO Brake Van. The 32 class locomotive and RBR Carriage were originally identified as exhibits which the museum would like to incorporate in the Valley Heights collection, as both have significance for the Blue Mountains.

Built by Beyer Peacock, the 32 class is an early express passenger locomotive.

There were 191 of these locomotives built. Two of this class were permanently based at Valley Heights between 1913 and 1957 to perform shunting and to haul "The Chips" which at the time started from Valley Heights.

Today only four of this locomotive class 32 are preserved. Those being 3203 (RTM Thirlmere), 3214 (RTM – Valley Heights) 3237 (owned and operated by Lachlan Valley Railway at Cowra but currently stored at Eveleigh) and 3265 (recently fully rebuilt and restored, this locomotive is operated by the Powerhouse Museum in Sydney but is stored at Thirlmere)

The RBR 1049 is a first class compartment car with buffet at one end. RBRs could seat 30 passengers and formed part of the composition of "The Fish".

Museum wins RailCorp's heritage awards

The Office of Rail Heritage has recognised the work of volunteers at the Valley Heights Loco Depot Heritage Museum.

The Retirees Group at Valley Heights has won the award in the category of Rail Heritage Conservation, Preservation, Restoration or Reconstruction for its work restoring the Roundhouse windows.

Col Burne represented the Retirees Group on behalf of the Group's leader Dave Torr at the awards presentation ceremony last year accepting the award from RailCorp chairperson, Elizabeth Crouch.

This is not the first time volunteers at Valley Heights have been recognised by RailCorp, with the Museum's president, Ted Mullett, receiving an award in the category of Leadership, Management or Organisation in the previous year.

Col Burne with Elizabeth Crouch. Photograph courtesy Office of Rail Heritage

The certificate presented to the Retirees Group

Conservation Volunteers Australia take on 2 projects at Valley Heights Museum

The NSW Rail Heritage Museum at Valley Heights last year benefited from the assistance of Conservation Volunteers Australia (CVA) by employing them on two very different projects.

CVA is the same group that provided invaluable service in exterior painting at Woodford Academy early last year, saving the National Trust considerable funding and at the same time providing the volunteers from around Australia and overseas the opportunity of being exposed to heritage projects.

CVA has a strong association with heritage organisations in Victoria and only recently offered its services to community based projects in NSW.

With assistance from the Office of Rail Heritage, the Valley Heights Museum employed volunteers in the preparation and painting of the locomotive turntable while another team was engaged in sorting and cataloguing the Museum's library collection.

The turntable painting entailed working under the platform of the table and rubbing back the old blue paintwork on the table side to remove the loose paint and rust and then repainting.

Because of the size of the table walls the team spread out along the length of the table with each person concentrating on one section.

A spokesman for the Museum said, the team worked for a week and what was achieved saved the Museum resources. The work was undertaken during a week of extreme heat.

Starting in November 2009, CVA is providing six regular volunteers working two days a week for a six month period sorting and cataloguing the Museum's library collection.

A start had been made on the work by two Museum members Nick and Judith Hill, but unfortunately Nick has fallen ill and the work ceased.

Members of the CVA team hard at work on the turnrable painting project. Photograph courtesy Peter Butler.

A database has been prepared by another member, Andrew Tester, and has been downloaded to the library's computer with a series of spreadsheets for each magazine title, books, plans, photographs and videos.

Further information about the work of Conservation Volunteers Australia is available from John Leary, OAM at johnnanette@optusnet.com.au

Crossing of Blue Mountains bicentenary commemoration

Blue Mountains City Council has advertised for expressions of interest from chambers of commerce and local community members to form part of the Blue Mountains Bicentenary of Crossing Organising Committee. Expressions of interest close on March 22.

The committee will be chaired by the mayor or his nominee. Also included in the committee will be 3 representatives from historical and heritage societies, and 1 representative from each of the Gundungurra, Darug and Wirdjuri communities.

The committee will develop and manage a program of events.

Historian Thomas Whitely lecture subject

Lyn Kelly has chosen, *Thomas Whitely a Blue Mountains historian* as the subject for a Blue Mountains Historical Society lecture at Hobby's Reach, on Saturday April 3.

Among Whitely's many collections are 2 volumes of newspaper articles on the exploration of the Blue Moutains for the period 1789-1813 in the State Library.

For more details contact John Low grizzlybear3au@hahoo.com .

Mt Wilson Community Market Weekend

Saturday & Sunday 24- 25 April 2010
10.00am – 4.00pm
Mt Wilson Village Hall, The AvenueMt Wilson
(off Bell's Line of Road)

Multiple vendors, great variety of goods, bric-a-brac, handmade items, books, old and new wares, jams, hot & cold food served all day, Devonshire teas.

Autumn colours at their peak, open gardens, Turkish Bath Museum, Chimney Cottage Heritage café, chestnut farms, rainforest walks, picnic areas.

Free entry, free parking. Enquiries: 4756 2063 or 9871 3661

JOURNEYS

By Shirley Evans

The Local Studies Collection of the Blue Mountains City Library housed in Braemar House, Springwood, has a wide variety of books relating to all things Blue Mountains, including the literature of Blue Mountains writers.

It also has an extensive pamphlet collection (called vertical files), Not included with the main library holdings, but on card systems within Braemar.

Shirley Evans, a one-time indexer of pamphlets for the Blue Mountains City Library Local Studies Collection has contributed this article which describes some of the stories and material to be found in the collection.

A recent acquisition is about to be added to the file titled, “Journeys”.

The material in this file is fascinating

Pictured is the arrival in Katoomba of five young Leeton women who were cycling from their home to Sydney. Also in the photograph are (left to right) Jack Maddock, reporter on *the Blue Mountain Times*, possibly Bill Coventry, Speedwell’s agent in Katoomba, Harry Drake, reporter on the *Blue Mountains Times* and Jim Tyley, linotype operator and part-time reporter for the *Katoomba Daily*. The identity of the young boy is unknown. Image courtesy Blue Mountains Library Local Stdies Collection.

In the early days of the colony, after a way across the Blue Mountains had been discovered by the new settlers and Cox’s Road had been built, our intrepid colonials set out to explore for themselves and often to make a new life in Bathurst and beyond.

Journeys has copies of journals including that of Governor Macquarie kept on his inaugural trip over the Blue Mountains and of Captain Henry Antill one the officials who accompanied him.

There are also journals and reports of naturalists and scientists, letters and memoirs of an artist, an early photographer and some missionaries.

The ladies have their place in the collection too, mostly in the form of letters.

Mrs Sophia Stanger was travelling to Bathurst with her husband, Joseph, in search of work. They had five children including an infant, about three months old.[1] Her letter was addressed to”My Own Beloved Mother”.

The indefatigable Mrs Elizabeth Hawkins whose husband was to work in Bathurst was accompanied by eight children and her mother and she was writing to her sister.

Another of the ladies, Louisa Anne Meredith, writer and botanist, was pregnant and going with her husband to visit his sheep property near Bathurst.

One of my favourites is the journal of Baron Field - his was a wonderful name for a colourful character. He was a judge in the Supreme Court of NSW from 1817 to 1824 and he included what he called *An Excursion Across the Blue Mountains* during his stay in the colony.

He spoke of “the eternal eucalyptus, with its white bark and its scanty tin-like foliage” and “the dark casuarina tall and exocarpus funeral [sic]”, although he did deign to admire the beautiful flowers and shrubs – “the exquisite epacris, the curious grevillea, xanthorrhoea, the sceptre of Flora, Telopea the magnificent and thysanotis [2] the lovely.”

And there are many more – a real treasure house of reading. Fascinating are some early examples of travel writing published in 1890s journals such as *The Illustrated Sydney News* and *Town and Country Journal.*

They not only promote the scenic beauty spots of the Blue Mountains, but give useful advice for accommodation on the journey.

They also provide a vehicle for the advertising of inns, guest houses and boarding schools.

Accommodation by this time, of course, was infinitely more comfortable than the sleazy inns available to the early travellers.

The new addition is a story of more recent origin and concerns five adventurous country girls, Alma and Joyce Eurell, Molly Dunn, Beryl Burns and Daisy Transton, aged about 21 to23, who cycled from Leeton in the Murrumbidgee Irrigation Area to Sydney in 1935.

Continued page 12

Journeys - journals from the earliest to 20th century crossings of the Blue Mountains

The previous year they had spent two months planning to cycle to Melbourne for the Centenary Celebrations and remarkably they accomplished this in four days, despite headwinds for part of the way.

Leeton is a pretty town designed by Walter Burley Griffin with a circular design of avenues and streets which were later mostly given names of trees. It is 585 kms from Sydney and in 1933 had a district population of 7,803 and a population of 5,351.

In 1935 the Letona Cannery was the largest industrial undertaking in the Leeton district and the greatest single employer. It became a fruitgrowers co-operative in 1935.

The cannery building covered 17.5 acres which included a building for canning and jam making. In 1932 over 500 women came for the season.

Our adventurous girls all worked at the cannery. They loved cycling, all had Speedwell bicycles and spent their holidays on these excursions. In 1935 they set out on Tuesday, September 17. Their departure was not described in the local newspaper, *The Murrumbidgee Irrigator* but in 1934 it was reported that co-workers lined the railway siding to cheer them on their way to Melbourne and there were also people along the Leeton streets to farewell them. I would think this happened again in 1935.

They made good time to Temora, arriving at tea time, despite Daisy feeling unwell all the way. On Wednesday she had completely recovered but they found the next leg, aiming for Cowra, difficult, plagued by bad roads and Mollie's bicycle suffering five punctures along the way.

The last one occurred at night and they were unable to mend it. They did not have a torch and vowed to bring one on their next journey. They walked in the darkness for three miles to Koorawatha, 10 miles from Cowra.

The next day they really pushed on over one hill after another, sometimes having to walk and reached Bathurst at midnight. Daisy and Alma went straight to bed but Mollie, Joyce and Beryl tucked into steak and eggs.

The next day they found the Great Western Highway "like a speedway with a billiard-table surface' and were able to spend the night in Lithgow, reaching Katoomba on Saturday at 11.30am. The Katoomba Speedwell agent, Bill Coventry, met them at the office of the *Katoomba Daily* and there the photograph on the previous page was taken.

It was said that a Speedwell agent met them at nearly every town on the route although present day family members believe their trip was not sponsored.

We know the five girls had packed their swimming costumes and planned to spend a month in Sydney, looking for a happy time on the surfing beaches. They told Katoomba journalists that the road to Melbourne was better but "the scenery could not be compared with what they had witnessed". We have no further information about their journey but we may yet acquire some and it can easily be added to the vertical file.

FOOTNOTES

[1.] George Mackaness in *Fourteen Journeys Over the Blue Mountains of New South Wales* wrote that Sophia was travelling with triplets. It seems likely that he was misinterpreting something Sophia included in her letter to her mother where she referred to all the advice she received from interested onlookers. Some, she said, "were utterly astonished the young girl should have so many children, and especially three at birth!" John Low and I feel she was writing humorously to her mother. Sophia, at the time of the journey would have been 27 years old, she married Joseph in 1836 and they had a baby each year until 1841. The three youngest were very young for such a journey in the winter and would have been very warmly swaddled against the cold making the casual observer believe they were all tiny babies.

[2] Thysanotis – fringed violet (Family Lilaceae)

Lachlan Macquarie's tomb in Scotland cared for by National Trust of Australia

Lachlan Macquarie was born on the Island of Ulva, off the west coast of Mull, Scotland in 1761. He would become one of the most recognisable characters of Colonial Australia and was later described as "The Father of Australia," thanks to his work as Governor of New South Wales from 1810-1821.

The American War of Independence (1775-83) prompted Macquarie, aged 16, to enroll in active military service with his father in 1775. By 1781 he was promoted to Lieutenant. This signaled the beginning of an impressive military career that would span over 30 years and see him achieve the rank of Major General.

His service not only earned him a small fortune but provided him with the opportunity to travel. He visited North America, Jamaica and Egypt before beginning a long period of association with India.

While in Bombay, he met and married Jane Jarvis, the heiress daughter of a former Chief Justice of Antigua. Sadly, three years into their marriage, Jane died of tuberculosis.

Jane's death resulted in Macquarie sinking into a deep depression that led him back to Mull where he met Elizabeth Campbell, who later became his second wife.

Married in 1807, Macquarie was offered the position of Governor of NSW by the British Crown and arrived in the Colony in 1809. In March 1814, Elizabeth gave birth to Lachlan Jr., heir to the Mull estate.

Macquarie took office in 1810 and set about improving the morale and the physical infrastructure of the Colony. The Governor and Elizabeth toured widely, forging strong relationships and establishing a positive, progressive tone that soon saw the creation of a civilised and stable society.

Ill health led Macquarie to tender his resignation three times during his term in office; his third offer was accepted and the family returned to Great Britain in 1822.

A tour of the continent followed and afterwards the family retreated to Mull. In 1824, sensing his death approaching, Lachlan put his affairs in order and chose a burial site on the Gruline Estate in Mull. He died on July 1, 1824.

For many years the mausoleum was sadly neglected. But in 1948, Lady Yarborough, the owner of a nearby estate, gifted the mausoleum site to the people of New South Wales.

Today, the tomb is preserved and protected by both The National Trust of Scotland and The National Trust of Australia (NSW).

In 1851 the Drummond family, a socially prominent family, built a final mausoleum on the site. Set in a grassed area surrounded by a circular stone wall with wrought iron gates, the Macquarie Mausoleum is a plain sandstone structure with two marble panels enclosing the entrance doorways.

It holds the remains of Governor Macquarie, wife Elizabeth, their son Lachlan and their daughter Jane, who passed away in early infancy.

There are two inscriptions on the tomb, the first and oldest is dedicated to Lachlan Macquarie

The epitaph was prepared by Elizabeth Macquarie, with assistance from the Reverend David Bell of Fifeshire. The text is based on a notice published by Lachlan Macquarie's old friend, Sir Charles Forbes, and on a sermon preached by the Reverend William Cowper at a memorial service held at St Philip's Church, Sydney on November 14, 1824. The gravestone was laid over Macquarie's resting place by Elizabeth c.1832. At a later date [c.1851] the mausoleum was erected over the burial site and the memorial stone fixed to the exterior of the south-eastern wall.

The second inscription, records the interment of Lachlan and Elizabeth Macquarie, and their two children Jane and Lachlan. This inscription dates from after 1845 and is mounted on the north-western face of the mausoleum.

This is the third in a series of articles to be published in ***HERITAGE*** this year as part of the commemoration of 200th anniversary of the year of Lachlan Macquarie's swearing in as the 5th governor of NSW

The series will acknowledge the significant contribution and achievements of Governor Macquarie and his wife Elizabeth during their 12 year tenure.

Transport, Signal & Communications Museum developed at Kurrajong

By John Cooper

For many years the main stream railway enthusiast groups were very single minded in regards to railway preservation. The Australian Railway Historical Society for example was solely dedicated to the preservation of paper records.

Following the dieselisation program which commenced in the late 1950s when steam locomotives started to be withdrawn, poorly performing locomotives were the first to be retired.

When no effort was made to preserve a 58 class or 34 class locomotive, society members became irate, which led to the creation of the Rail Transport Museum. Now at least there was a society in NSW, interested in preserving our railway history.

The Railway Commissioner, Mr Neil McCusker at that time was of the view that locomotives sitting in parks were usually left and neglected and this reflected poorly on the railways.

He decided that the RTM could have almost anything they wanted under 'deed of gift' and all other items were to be destroyed.

Around 1974 I became involved in the proposal to create a steam tourist railway on the old Zig Zag formation east of Lithgow.

I was chairman of the Zig Zag Railway (ZZR) for almost 12 years and in that time a friend and I started collecting items we thought could be used in a museum there.

We believed that passengers needed something to keep them occupied while waiting on the next train.

But that wasn't to be as other the board members at that time considered ZZR was a tourist railway, not a museum!

It was at this time that I became aware of the lack of interest in preserving behind the scene items of the railways, such as the railway

Train control desk

refreshment rooms, signalling and all the ancillary items that made up the history of the working of the rail

Early in1990 with the aid of a few friends who shared my views, we set up the Transport Signal & Communications Museum.

We leased the old railway electrical substation at Cabramatta in the beginning but as time went by, the property being located between two working lines caused too many problems and so I thought I'd start looking for somewhere else.

We had big visions back then; the museum would be housed in the substation with the entrance being the front of the Silver City Comet. Outside would be a typical train set up of the 1950s headed by a 44 class locomotive 4420.

In 1992, I looked for some property to shift the Museum to and found one at Kurrajong, our present site. With the relocation to Kurrajong, we found we lost a number of members who thought the move was not the right way to go.

The next challenge was to convince the Hawkesbury City Council to allow us to bring the carriages on site. We wore them down but we had to house the carriages undercover and that is what we have today.

The museum has a large building, which houses most of the collection and also two carriages.

In the building there are displays of badge crockery, safe working items, such as diagrams, different types of frames out of signal boxes.

Of course clocks are a big part of the display as well as the pocket watches. A room is set aside for telecommunications as well as a ticketing display.

As time goes on it is hoped to set up rooms for each subject.The Christmas Day 2001 bushfires were a very bad time, with the TSCM loosing a good part of its historical collection.

Looking back on what was lost; we realized we had saved the main building and four carriages.

We then made the decision we had to go on, so we concentrated our efforts on building better and more interesting displays in the main building.

BLUE MOUTAINS HERITAGE SITES LISTED

Some 800 heritage sight records in the Blue Mountains have now been placed online and are accessible to the public through the NSW Heritage Branch's website.

Late last year Blue Mountains City Council completed the task of computerising these records following continued pressure from BMACHO to have the records checked and digitalized using material provided to council by consultants some years ago.

The State Heritage Inventory (SHI) or online database contains more than 20,000 heritage items on statutory lists in NSW.

This information is mainly provided by local councils and most records have basic identification information such as name, address and listings.

The SHI also includes items listed on the State Heritage Register.

Local councils play an important role in heritage management by identifying, assessing and managing heritage places and objects in a local area.

All councils are required to identify items of local heritage significance in a heritage schedule to the local environmental plan. A local environmental plan (LEP) is a planning instrument that councils prepare under the Environmental Planning and Assessment Act 1979.

To access the complete listing, Google www.heritagensw.gov.au When the NSW Heritage Office site opens the following procedure is suggested:
(1.) click on 'Listings',
(2.) click on 'Heritage Database'
(3.) insert 'Blue Mountains' under local government area, leaving the other rows blank. [If you put in 'LEP', no state-listed item will appear in Section 1.]
4.) click on 'search' on the bottom of the screen
(5.) then view Section 1. (the 26 items which are already State-listed) and Section 2. (the numerous local items identified in the Heritage Review awaiting Blue Mountains City Council listing on the LEP in this revised form: these include a fair number which have been assessed as of State significance, but have not yet been put forward for State Heritage Register listing).

Commenting on the long awaited listing, Dr Ian Jack who with his consultancy team was responsible for most of the research and text of the Blue Mountains City Council heritage listings, said, "the information available on the website includes the full statement of significance, description and history of each item.

Associate Professor Ian Jack

"The photographs, maps and plans which accompanied each item are still not available in this format.

"With the unfortunate exception of the images, the presentation is of outstanding utility and very user friendly, Dr Jack said.

Pictured above is Chimney Cottage at Mt Wilson and Woodford Academy, two of more than 800 listed heritage sites. Pictures by John Leary, OAM

Hands on displays at Kurrajong

Continued from page 14

A lot of displays are hands-on, and what better way to display something, than by demonstrating with a member of the public helping.

The aim for the future is to further develop the displays into working exhibits, with a large amount of history coming from the local Richmond / Kurrajong Branch line. This line was of course the state's first real branch line, and in 2014 will be celebrating its 150th anniversary.

Station master's display

Holy See's secrets revealed in letters from famous faces of history

Mary, Queen of Scots from 1542 to 1567

A 13th century letter from Genghis Khan's grandson demanding homage from Pope Innocent IV is among a collection of documents from the Vatican's Secret Archives that has just been published for the first time.

The Holy See's archives contain scrolls, parchments and leather bound volumes with correspondence dating back more than 1000 years.

High-quality reproductions of 105 documents, 19 of which have never been seen before in public, have been published in a book.

The Vatican Secret Archives features a papal letter to Hitler, an entreaty to Rome written on birch bark by a tribe of North American Indians and a plea from Mary Queen of Scots.

In 1586 Mary, Queen of Scots wrote to Pope Sixtus V, a few months before she was beheaded for plotting against her cousin Queen Elizabeth I, pledging her eternal allegiance to Rome.

In a letter dated 1246 from Grand Khan Guyuk to Pope Innocent IV, Genghis Khan's grandson demands that the pontiff travel to central Asia in person – with all of his "kings" in tow "to pay service to us" as an act of "submission", threatening that otherwise "you shall be our enemy".

Another parchment letter by English peers to Pope Clement VII in 1530, calls for Henry VIII's marriage to Catherine of Aragon to be annulled.

Although scholars have always had access to the archives since1881, they remain closed to the public

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 40 Hume Avenue, Wentworth Falls 2782
E-mail: bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc, Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc, Friends of Everglades, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum Inc, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc, Mt Wilson and Mt Irvine History Society Inc (including Turkish Bath Museum), Mudgee Historical Society Inc, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians inc, Transport Signal and Communication Museum Inc., Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Wendy Carlson, Ray Christison, Ms Pamela Hubert, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2009-10 is: John Leary, (president) Ian Jack (vice president), Barrie Reynolds (secretary), Kathie McMahon-Nolf (treasurer), Jean Arthur, Ray Christison, Lyn Fowler, Doug Knowles, and Dick Morony (public officer), Peter Stanbury.
AUDITOR: Sue McMahon, B Comm CPA

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.
HERITAGE is BMACHO's official newsletter.

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS

MAY - JUNE 2010 ISSUE No. 9

Eskbank House: bringing an 1840s house museum into the 21st century

by Naomi Parry, Cultural Development Officer, Lithgow City Council

Although I have lived in the Blue Mountains for 10 years, I did not know about Eskbank House and Museum, or even where it was, until I was appointed Cultural Development Officer at Lithgow City Council late last year.

The term 'house museum' is rather broad and while I knew Eskbank would not be of the scale of Elizabeth Bay House, I was a little worried that it would be like the folk museums of my Tasmanian childhood, filled with horsehair lounges and fusty mannequins with sewn-in eyelashes and the inevitable 'convict man-trap' attached to their ankles.

Happily, Eskbank House is a beautiful little museum with many stories to tell. As I work through its remarkable collections I now understand that these stories are not only about Lithgow, but about core elements of Australian industrial and social history.

The History of Eskbank House

The house was built in 1842 by Alexander Binning in Georgian-style, with a hipped roof extending over a wrap-around verandah.

Its ashlar cut sandstone walls have remained straight and solid, with barely a crack to show for the 170 years the house has stood on the floor of this valley.

The fortunes of the house however have waxed and waned, according to the rhythms of Lithgow's industries.

Eskbank was built for Thomas Brown, an ambitious young Dumfries Shire man.

Stables and blacksmithing courtyard at Eskbank House

The presence of coal appears to have motivated Brown to acquire the 295 hectare estate, although initially he farmed and served as Hartley Bench Magistrate.

In 1869, with the advent of rail, Brown established the first railway siding in Lithgow and the first of two collieries on his estate.

In 1872 Brown entered the Legislative Assembly as the Member for Hartley and Eskbank Colliery secured lucrative contracts to supply the railways with coal.

At this time Eskbank was the political and social hub of Lithgow, but by 1876 it had become apparent that Brown had interfered with the tendering processes and he was disqualified from the Legislative Assembly. He was widowed in 1878 and retired to St Leonards in 1881.

Eskbank was sold to Bathurst businessman and Cobb and Co manager James Rutherford, and the house became a rental property known as 'The Grange', serving as a girls' school for a time, and as a home for high-ranking employees in local enterprises.

Rutherford subdivided large portions of the estate for residential development and established Eskbank Blast Furnace a few hundred metres northwest from the house.

His blast furnace was not successful and it is rumoured he staged a flamboyant protest against the lack of government support by driving cartloads of explosives into it before selling to William Sandford in 1892.

Continued page 2

A new blast furnace built nearby

Continued from page 1

Sandford established a much more successful blast furnace, on a new site to the east of the house, but over reached and in 1908 was obliged to sell to his friend Charles Hoskins, whose company became Australian Iron and Steel.

In the early 20th century 'The Grange' was, once more, the centre of the estate, serving as the manager's residence for the blast furnace.

In the 1920s William Mortlock, the first Australian-born manager, enclosed the rear of the house, creating a skylit courtyard and a gabled breakfast room.

This action, as it turned out, provided the space Eskbank needed to serve as a museum into the 21st century.

In the 1930s the blast furnace, located too far from both ore and ports, was dismantled.

Eskbank House, now sitting on a remnant hectare of land, was divided into flats to accommodate the manufacturing workers who flooded into Lithgow during World War II.

However, the Lithgow Historical Committee lobbied the Hoskins' family company Australian Iron and Steel, asking that they donate 'The Grange' to Lithgow Council as a 'museum of historical record being in itself probably the most important of all relics which may be housed therein.'

Lithgow retailer Eric Bracey stepped in, purchasing the house in 1948 and deeding it to council, on condition it remained in the control of the Lithgow Historical Society.

The history of the Museum

Bracey then spent 18 years collecting antiques to restore Eskbank House to a state he thought (perhaps erroneously) worthy of a man of Brown's station.

The house, and its substantial collection of antiques, was transferred to the local history society and opened to the public in 1966, although it remained a home to live-in caretakers until 2003, when council assumed responsibility for managing the property.

Thomas Brown's garden houses

In almost 40 years of running Eskbank, the local history society received donations of textiles, china, locomotives, fine furniture from local homes, including a circa 1847 John Broadwood & Sons cottage piano, photographs and artwork, tools for blacksmithing and wheel making, flat irons, bottles, typewriters, washing machines, telephone equipment, butter churns and even the plants in the garden, which date from a 1967 donations drive.

This means the collections are rich. The museum holds mementos of the family of former Prime Minister Joseph Cook, of HMAS Lithgow, the Lithgow Woollen Mills, of friendly societies and trade unions, of the Lithgow Co-operative and local families.

It also holds Lithgow's 'black roses', which are made of steel from the blast furnace; a nationally significant collection of rare Lithgow pottery and the Sutton-Leake family crazy quilt, made in Maryland in 1893 and brought to Lithgow in the 1920s as a wedding gift.

Eskbank House in the 21st century

Eskbank is valuable for its advanced age and architecture; continuous occupation; links with industry and diverse collections. But it can also be read as a museum of what Eric Bracey and the sadly defunct historical society thought a museum should be like. It is a place of memory.

The challenge of Eskbank is finding ways to keep telling its stories to new audiences.

House museums are not renowned for their high visitation, but the enclosed courtyard offers exhibition space that is sorely needed in Lithgow and the Blue Mountains, and an opportunity to link the house and its collections with cultural activity in the region.

This space also means Eskbank can host travelling shows. A major event in 2010 will be the Australian War Memorial travelling exhibition 'A Digger's Best Friend: An A-Z of animals in war', which will be at Eskbank from May 14 to July 25.

Eskbank House also needs people to help tell its stories. We have vacancies for volunteers who are interested in collection management, research, conservation and guiding.

The house is also a rich resource for students of all heritage disciplines.

Teachers interested in hands-on involvement with this lovely site should contact Naomi Parry at Lithgow City Council.

GREENS STATE MP TO OUTLINE HERITAGE POLICY

As the third in a series of meetings to which the Blue Mountains Association of Cultural Heritage Organisations (BMACHO) has invited major political parties to outline their heritage policies, Ms Sylvia Hale, MLC will address a meeting at Springwood to outline the Greens Party policy.

At the conclusion of her address, time will be allowed for questions and this will enable participants to have input into future policy.

Members, friends and associates, are invited to attend this meeting to commence at 2pm in the Springwood Sports Club, 83 Macquarie Road, Springwood on Friday, June 18 2010.

Afternoon tea will be served and to cover this cost a charge of $5 per head is being made.

Bookings before June 10 are essential to Doug Knowles

telephone 4751 3275 (please allow phone to ring for some time) with cheques payable to BMACHO to Doug Knowles 2 Sun Valley Road, Sun Valley 2777. For further information: John Leary, OAM johnnanette@optusnet.com.au

Speaking in parliament last year against the Heritage Amendment Bill, Ms Hale said "the bill was an attack on our heritage, an attack on community participation, and the latest step in the ceaseless march by this Government to centralize all planning powers in the hand of the Minister, either directly or through hand-picked panels appointed by and answerable to the Minister for Planning.

Heritage is not just about old buildings. It is about natural, cultural and built treasures that have made and continue to make a unique contribution to defining who we are and where and how we live.

"These unique treasures have been handed to us by previous generations in safekeeping for future generations.

"The preservation and enhancement of our heritage is a central component of the Greens' philosophy because the protection of our natural, cultural and built environments is a central tenet of ecological sustainability," Ms Hale said.

Ms Hale went on to say, "The Greens recognise that heritage protection is a balancing act. Human societies must not only respect and learn from their past, they must also continue to evolve to stay healthy and to thrive in both social and economic terms.

"It is important therefore that heritage assessment is rigorous and that heritage sites meet that general broad definition of having a significant contribution to make to our understanding of ourselves and from where we have come.

"Adaptive re-use is an important part of any heritage system and we must be willing to consider how best to achieve a balance of maintaining heritage values while allowing heritage sites to continue being a living part of society," Ms Hale said.

Eskbank House at Lithgow

Continued from page 2

Eskbank House is situated on Bennett Street, Lithgow near the Workingmen's Club, and an easy walk from the station. It is open Wednesday to Sunday from 10am to 4pm, although if you are making a special trip it is a good idea to call ahead to be sure the house is open.

Group and school tours are available, and the grounds and courtyard gallery are also available for hire, by calling 02 6351 3557 or emailing eskbank@lithgow.nsw.gov.au.

NEW PRESIDENT

Blue Mountains Historical Society has a new president with Graham Warmbath being elected to the office at last month's annual general meeting.

From the president's pen.....

The ladies of Australian history inspirations oft forgotten

It was a man's world, by the numbers and by tradition, in those early days of the Colony, and women were expected to commit to a domestic life outside of the public view.

But one woman bucked the trend and there are others who would set examples for the inspiration of those who would follow in the next two hundred years as the Colony grew to a nation of 22 million.

Born Caroline Jones and reared in the tradition of Evangelical philanthropy she married an army officer on condition her philanthropic work should continue.

One might wonder the fate of the wife of an army officer who came to the Colony on leave of absence, but who shortly after his arrival was recalled to his regiment when it was ordered to China on active service and was consequently forced to leave her in Sydney or rather Windsor.

From all accounts this lady, Caroline Chisholm was a shy but determined housewife who was so sickened by the pimping and exploitation of boatloads of immigrant girls that she talked her way in to see Governor Gipps to win his support in what was to become her life's work.

The perseverance which she exhibited to ensure that female immigrants were provided with meaningful employment and dignity upon their arrival in the Colony would have disheartened anyone less zealous than her.

She met almost every immigrant ship and became a familiar figure on the wharves, sheltering many of the young girls in her home.

When her husband retired from the army and returned to New South Wales he joined his wife in her work.

By now, Mrs Chisholm had been led away from alleviating immediate distress to expounding reforms and to promoting her own colonisation scheme.

In London her eloquent arguments won the sympathy of Earl Grey and she achieved her objectives of that meeting to gain free passage to New South Wales for emancipists' wives and 75 children. She gave evidence before two House of Lords committees, on the execution of the criminal law and on colonisation from Ireland, a rare tribute to a woman in those days.

Her comments on shipboard conditions ensured the passing of the Passenger Act of 1852

Caroline Chisholm's scorn for material reward and public position contributed to the obscurity of her last years in Australia.

Sweet Caroline, the formidable Mrs Chisholm assisted thousands of female immigrants, but this was only part of her philanthropic work for almost 50 years.

Herself a devoted wife and mother, she helped to give dignity to woman and family in a harsh colonial society. Her achievement was made possible by idealism and courage allied to her ability and personal charm.

Another was Elizabeth Veale who was born and educated in England. In 1788 she married an ambitious young army officer, John Macarthur and a year later sailed with the Second Fleet to New South Wales.

In 1793 John Macarthur was granted 100 acres of prime farming land in Parramatta. The couple settled there and John named it 'Elizabeth Farm' in honour of his wife.

As well as bringing 8 children into the world, Elizabeth took a keen interest in the farm and was to eventually help influence a wool export industry in the colony.

In 1801, John Macarthur found himself in trouble and was back in England, not to return until 1805. In his absence, Elizabeth successfully managed the property, which by that time was the largest of its kind in what was to become Australia.

Elizabeth became an expert in fleeces and set up the infra-structure to export colonial wool.She was the first to breed the world-renowned Merino which became the foundation of the Australian wool industry – significantly increasing the yield of fine wool.

Elizabeth Macarthur pioneered the colonial sheep industry, an industry that was to have a profound effect on the economic growth of Australia.

There were many others such as Eliza Fraser the survivor of a shipwreck off the north east coast of Australia in 1836.

Although accounts of her ordeal vary, there is little doubt as to her courage when within a few days of leaving the wreck she gave birth to a baby who died nor the trauma of witnessing her husband, the ship's captain speared to death by Aboriginals.

Some of these women have been recognised, but far too often history seems to have passed them by in favour of their husbands or other men.

Historians have produced the research material. Perhaps, it might not be too much to ask that contemporary writers consider some of these heroines as fine subjects for research.

John Leary, OAM - President, Blue Mountains Association of Cultural Heritage Organisations

The tale of two oak trees

By Cathy McHardy

Two lovely oak trees planted by the Arthur family in the 1920s still stand sentinel on the front boundary of 954 East Kurrajong Road, East Kurrajong.

The focus of my local history research over the last few years has been my own backyard, of East Kurrajong and adjoining localities of Glossodia, Blaxlands Ridge and Wilberforce.

The land surrounding my family home once consisted of 40 acre portions which were made available for conditional purchase from the 1870s.

Tracing the chain of title for the portion next to my own (Portion 152, Parish of Currency, County of Cook), I encountered the surname of Arthur who owned the block from 1920 to 1961.

One of the older residents further along the road, Ken Whalan suggested I might contact Jean Arthur as he believed she was presently living in the Blue Mountains.

Drafting a letter of introduction to this hitherto unknown Jean Arthur I surmised what age might she be, would she be at all interested in my research and who planted the two lovely oak trees standing sentinel at the front boundary of the block?

Sometimes things just happen in the most serendipitous way.

Two lovely oak trees planted by the Arthur family in the 1920s still standing sentinel on the front boundary of 954 East Kurrajong Road, East Kurrajong. Photograph by Cathy McHardy May 2007

Receiving the BMACHO newsletter via the Kurrajong-Comleroy Historical Society my eyes zoomed in to an article offering a tour of the mapping section of the Department of Land and Property Management Authority at Bathurst.

As one obsessed with maps of all kinds, I felt impelled not to miss out on this opportunity. I telephoned Doug Knowles immediately, took the day off work and did not imagine what a great adventure I was to have.

The tour of the LPMA facility very much increased my understanding and appreciation of the functions and services of the department but that was not the only interesting thing to happen that day.

Parish of Concord, County of Cumberland, 22 January 1915 3rd Edition Department of Land and Property Management Authority

On our way to Bathurst, a fellow member of the Kurrajong-Comleroy Historical Society, Kathy McMahon, mentioned to me that I must meet Jean Arthur as she had a connection with East Kurrajong and she was, coincidentally, on the same excursion.

The return journey from Bathurst was spent in concentrated and pleasurable conversation with Jean, pen and paper in hand. Her father James, mother Jane (Jean) and sister Francis aged 7 had emigrated from Scotland in early 1920.

Jean was born in Australia several years later. Her father was an engineer in the drawing office of John Brown and Company, Clydebank, Scotland, famous for building the Lusitania and the Queen Mary amongst other ships. In Sydney, James Arthur worked for the engineering firm of Babcock and Wilcox.

The Arthur family settled in Burwood on part of the grounds of a sandstone mansion known as 'Tahlee' which at that time had been recently subdivided into more than fifty suburban blocks.

The curtilage of the house had been very much reduced as may be seen from an aerial photograph taken in 1943

Continued page 6

Seedlings from Burwood to Kurrajong

Continued from page 5

'Tahlee' was constructed (by persons as yet unknown) on part of a thousand acre grant to William Faithful who arrived in the colony as a private in the New South Wales Corps aboard the Pitt in February 1792. The land had been previously granted to Alexander Riley. (As an aside, Faithful also has a Hawkesbury connection being granted land in the Richmond area).

According to Burwood and District Historical Society, it was home to Josiah Mullen for many years, later being occupied by W H Pigott, the MLA for Canterbury (1880-84) and his family. In about 1947 the house and remaining land was resumed by Burwood Council and subsequently demolished.

'Tahlee' was part of a cluster of houses south of the railway line from Croydon Station to Burwood Station. Next door was another large home known as 'Weldon'.

These two houses are remembered in the naming of nearby streets. James Arthur purchased one of these suburban blocks in the early 1920s and built their family home.

A grand avenue of oak trees had once lined the entrance drive from Murray Street, Croydon to 'Tahlee' house property which extended to the Liverpool Road. In the backyard of the Arthur's house at Burwood sprouted several oak tree seedlings from the avenue.

Dreaming of being the gentleman farmer, Arthur purchased the fifty-three acre property at East Kurrajong from Ernest George Hassell in 1920.

The Arthur family spent many happy weekends and school holidays at East Kurrajong and Jean Arthur has a keen and vivid memory of those times.

The farm included bountiful fruit trees and passionfruit vines and her mother kept lots of chooks.

Rabbit traps were set each evening but Jean aimed to let the rabbits get away before her father had time to check the night's catch in the morning.

The curtilage of the house had been very much reduced.Sydney Aerial photograph 1943 Department of Land and Property Management Authority

Two of the seedlings from the backyard at Burwood were transplanted to East Kurrajong in front of the neat cottage.

Jean remembers the home constructed of timber slabs resplendent with whitewashed walls and prettily furnished interior. The old slab home is sadly no longer standing but the oak trees continue to flourish.

THE AUTHOR

A member of several Hawkesbury local history organisations, Cathy McHardy has contributed numerous articles to local journals, newspapers and magazines since moving to the area with a young family in 1976.

Cathy has formal qualifications in Local & Applied History, Library & Information Science and Archives & Records Management and in her professional life holds the position of Information and Lending Services Librarian at Hawkesbury Library.

Having researched and published several histories including Wilberforce Cemetery and Glossodia, Cathy is currently working on republishing *Reminiscences of Richmond* by Sam Boughton originally published in 1903 and a local history of the East Kurrajong area.

Consider joining the Australian Historical Societies Support Group

The online Australian Historical Societies Support Group, through an arrangement between the Federation of Australian Historical Societies (FAHS) and the Royal Historical Society of Victoria, is one of the *My Connected Community* (mc^2)

The Australian Historical Societies Support Group offers participating historical societies, like minded bodies and their members a variety of free, easy to use web-based services which they can use to communicate with each other across the nation and the world on any topic that is of interest or concern to their organisations.

The mc^2 provides easy access to online technologies now available for communicating between member groups. Features of mc^2 include a forum, and events list space for sharing files, space for sharing photographs, a link page and a chat room.

Details on how to join the Group are available at the FAHS website at hhtp://www.history.org.au. Follow the "Support" and "Support Group" links from the home page.

BMACHO members visit Bathurst for mapping seminar

Twenty people from BMACHO organisations at Kurrajong, Glenbrook, Wentworth Falls, Woodford, Mt Victoria and Lithgow travelled to Bathurst for the mapping workshop conducted by the Land and Property Management Authority (L&PMA) earlier this year.

An outstanding workshop covering a wide range of topics associated with map making, surveying and restoration of maps was provided by staff of the Authority.

During the visit participants covered a wide range of L&PMA's operation including the Geographical Names Board, imagery and elevation programs, graphic services and the conversion and preservation of maps and documents.

The latest technology, LiDAR which is Light, Detection and Ranging using the same principle as radar was demonstrated. A beam of light is transmitted from an aircraft to the ground and the time taken for the beam to echo back is measured allowing the height or altitude to be calculated for mapping.

Digital World combines LiDAR, GPS, and INS in an airborne data acquisition system that produces highly accurate post-processed terrain model for a multitude of applications.

Of particular interest was the viewing of Sir Thomas Mitchell's theodolite dated 1828. Mitchell is believed to have used the theodolite in surveying across the Blue Mountains.

The techniques in restoration of early and rare maps and the restoration of certificates of title were also of interest. There were some interesting stories including one which happened in the old Sydney office of the Lands Department when the basement holding early land title records was flooded. Quick thinking saved further damage when refrigerated vans were used to snap freeze the documents.

Kevin Volk explaining the workings of the Geographical Names Board with Brian Fox and Jill Williams, (L&PMA staff), Peter Meir, Roy, Peter Evans, Lyn Fowler,Doug Knowles, Nanette and John Leary (both with back to cameras)

Land & Property Management Authority project manager, Eric Sharpham explaining map conservation techniques, and scanning of survey and certificate of titles operations. Also pictured left to right are Doug Knowles, Roy Bennett, Jean Arthur and Lyn Fowler.

In the graphic service printing area, clockwise from print manager is Peter Rickwood, Joan Smith, Doug Knowles, Jean Arthur and Nanette Leary, both with backs to camera. Photographs courtesy Dr Peter Stanbury, OAM.

In the final session, the group was given a demonstration of how to access the official sources of NSW's geospatial information known as SIX. Although there is a charge for accessing information, there is a wealth of material which could be of interest to historians and researchers including current and historical topographic maps, medium resolution satellite imagery and 1943 historical ariel photography over Sydney suburbs.

The story behind the Springwood Macquarie monument

By Springwood Historians

BMACHO is grateful to the Springwood Historians, three of whom, Pamela Smith, John Low and Shirley Evans are pictured below for this article which follows the photograph of the monument and caption which appeared in the last edition of *HERITAGE.*

In 1937, His Honour Judge Curlewis, the Hon TD Mutch and Mr Surveyor JF Campbell FRHS, at the request of the Springwood Development League, visited Springwood to locate the site of the original Springwood Military Barracks and the spring after which Macquarie named Springwood in 1815.

They decided that the barracks were located adjacent to the residence of Mr WG Gibbs of Railway Parade (now Macquarie Road) Springwood and the spring was in Madeline Gully off Boomerang Road.

A decision was made to mark these important sites with monuments and Mr William Gibbs, retired Gulgong Shire Clerk, agreed to donate a small part of his land (9ft 1in) to the Blue Mountains Shire Council to accommodate the Macquarie monument in Railway Parade.

The deeds for this portion of land were duly forwarded by solicitors Lawson, Waldron, Edwards and Nicholls to the Council.

In March 1939, Blue Mountains Shire Council and the Springwood Development League invited members of the Royal Australian Historical Society to witness the unveiling of the monument by their president Mr KR Cramp.

Also present were Judge Backhouse, Mr Joseph Jackson MLA, Councillor W. Mathews, president of Blue Mountains Shire Council and Councillorrs A Hodgson and B Honeysett.

The party enjoyed afternoon tea at the Royal Hotel and a trip to Hawkesbury Lookout after the unveiling.

There was an immediate challenge to the accuracy of the inscription on the monument's tablet at a Royal Historical Society meeting. Mr WL Havard contended that it was not really known where Macquarie and his party had camped and that the Military Barracks were transferred from Glenbrook to Springwood in 1815 not 1816. Mr Havard also felt it should have stated that Macquarie and not Macquarie and his party "named the place *Spring Wood.*"

Mr Cramp agreed that there were some inaccuracies but felt that they were of a minor nature and stated "we do endeavour to convey to the public something of the historical significance of an event."

Peter Chinn, in his book, *The Thin Red and Blue Lines,* said "the role of the military was to ensure that travellers to the west had the written permission of the governor, to guard government carts and provisions for Bathurst and to forward letters."

Protection of the travelling public was another important responsibility. There had never been any report of problems with the Aborigines but there was a concern that escaped convicts or bushrangers could cause trouble and the barracks provided a safe overnight stopping place for travellers.

The inscription on the tablet reads:

"Governor Macquarie and his party camped here on their way to Bathurst on April 27, 1815,and named the place "Springwood."William Cox erected here a military depot early in 1816. R.A.H.S., 1938."

Fifty attend BMACO's AGM

At the annual general meeting of BMACHO attended by about 50 people at the Grandview Hotel, Wentworth Falls in March, office bearers and members of the management committee were elected for the 2010-11 year.

In his annual president, John Leary reported on the past year's activities and made particular mention of the tremendous number of hours served each year by volunteers in the heritage sector.

The report in part stated: 'Until now there has been no reliable measure of this worth. Last month, the Australian Government Productivity Commission published a research report titled *Contribution of the Not-for-Profit Sector* which indicated that from the latest figures available (2006-7) a total of 4.8 million people volunteered for 623 million hours or the equivalent of 317,000 full time positions.

On average, heritage and arts sector volunteers donated 148 hours per year which is similar to that provided by emergency service volunteers. "Of course, there are many including some in this room who contribute almost that amount each month," Mr Leary said..

Recognition and continual reinforcement of the contribution of volunteers is important. Although 80 percent of volunteers in a recent survey reported that 'knowing that my contribution would make a difference' was the most important factor in the decision to volunteer.'

Mr Leary said, "thanks to many hundreds of people in this region who volunteer their valuable time, effort and often finances to ensure our priceless heritage will live on for future generations."

Those elected to office were president, John Leary; vice president, Ian Jack; secretary, Jan Koperberg; treasurer, Kathie McMahon-Nolf; committee members, Jean Arthur, Doug Knowles, Dick Morony, Barrie Reynolds and Peter Stanbury. Joan Kent of Lithgow has since accepted an invitation to fill the vacancy not filled at the meeting.

A presentation was made to the retiring and founding secretary Barrie Reynolds and Mrs Reynolds.

The story behind the Springwood Macquarie monument

Continued from page 8

In May, 1965, the site of the monument was chosen to commemorate the 150th anniversary of the naming of Springwood and the Springwood Historical Society accepted the Springwood coat of arms drawn by Norman Lindsay.

A monument to mark the location of the spring was never erected.

Springwood Historians, *The Making of a Mountain Community: A Biographical Dictionary of the Springwood District.*

SPRINGWOOD HISTORIANS are a group of independent history researchers concerned mainly, but not exclusively, with the history of the Springwood district. The group has produced two books – *The Making of a Mountain Community: A Biographical Dictionary of the Springwood District* and *Remembrance: Springwood District Honor Roll 1914-1919.*

They research queries from various sources and their research papers are deposited in the Local Studies Collection of Blue Mountains City Council. They are presently researching the commercial history of Macquarie Road Springwood. Its members are: Shirley Evans, Pamela Smith, Lindsay Paish, John Low, Peter Chinn and Kate Santleben

Christmas Swamp

Today's township of Lawson was in 1817 known as "Christmas Swamp".

The name was shown on John Oxley's elevations above the ocean of points on the road over the Blue Mountains to Bathurst.

The *Sydney Gazette* dated October 14, 1826: 'The following elevations above the level of ocean, of points on the road over the Blue Mountains to Bathurst and to the interior to the westward of the meridian, have been computed by John Oxley, Esquire, Surveyor General, taken simultaneously in Sydney and at the respective stations, in the year 1817 which barometrical measurements have since that period fully verified by others.'

Springwood (Military Post) 12 ½ miles from Emu Ford 1297 feet ; Bridge over ravine17 miles from Emu Ford 1814 feet; Caley's Repulse 18 miles from Emu Ford 2110 feet; Christmas Swamp 24 miles from Emu Ford 2466 feet; King's Tableland 26 ½ miles from Emu Ford 2798 feet.

When first constructed, the Bathurst Road followed the crest of ridges. There were many rises with lower sections between. These lower sections were in a number of places referred to as 'hollows'

In the 1830s to distinguish one from the other, the sites were identified by the number of miles from Emu Ford on the Nepean River, e.g. 17 Mile Hollow (now Linden), 20 mile Hollow (Woodford) and 24 mile Hollow (Lawson)

This was to remain the name of the area until the 1840s when Henry Wilson named his inn "The Blue Mountain", the locality then becoming known as Blue Mountains.

On July 21, 1879 the name was changed to Lawson

Source: SJ Bentley, *Christmas Swamp a History of Lawson* *Sydney Gazette* October 14, 1826.

The streets of Springwood

by Pamela Smith BA (Hons.)
History , Springwood Historians

Have you ever wondered how streets, parks and other landmarks acquire their names?

Fels Avenue, located in the vicinity of Springwood Public School, for example, was named for Frederick Fels who purchased land there in the latter part of the 1890s.

Fels, born in Warsaw Poland in 1858, travelled to England then to America in the 1880s, on the pretext of buying goods for his business.

He left behind a wife, who he subsequently divorced, and several children when he married his second wife, Dora.

Relatives consider the pair had been previously acquainted before Dora left Poland destined for America and marriage.

Frederick wed Dora when her first marriage arrangement did not take place.

The couple arrived in Australia in 1889 where Frederick manufactured butter coolers and canvas bags before moving into the more lucrative market of money lending initially financed by his wife.

Dora, an enterprising lady, set up her own dressmaking business which perhaps gained her the title of Madame Fels.

It seems that Frederick was ever mindful of his debt to the deserted family in Warsaw because he sent money back when he was financially able.

Son Stanley migrated to Australia in 1896, and moved in with Frederick and Dora when they lived at Annandale.

Stanley's arrival - and perhaps the financial position of Dora and Frederick - encouraged the migration of the remaining Fels family.

The Springwood property purchased by Frederick and Dora in 1899 comprised of several acres of land forming the border between Valley Heights and Springwood.

Frederick Somers had been the original owner of a conditional purchase in the 1880s. The property had been put in Dora's name which was common practice for that time because it safeguarded the wife in the event of her husband's bankruptcy or eluded death duties if he died.

In 1900, the Fels moved into their newly built Springwood home. Fels Ridge/ Felsridge, as it was known, was a stunning example of early uncluttered Federation-style architecture. As the photograph below illustrates, several tall chimneys soared high above the tiled roofline of the commodious brick home, while the front veranda and upper storey balcony overlooked a wonderful circular driveway.

The driveway and remnants of what had been a well-attended garden (although greatly reduced in size) were still intact when an inspection of the property was made in 2000, as was part of the original house.

Financially comfortable, the Fels were able to employ Thomas Jones and George Mills as gardeners and to attend to any maintenance of Felsridge. Double gates located on Bathurst (now Macquarie Road) once marked the entrance to the property.

Dora and Frederick continued in their separate businesses and Frederick, who was described as a 'financier,' occupied rooms at 295 Pitt Street, Sydney.

In a move that would prove unfortunate the childless couple adopted Dora's niece and Frederick's granddaughter.

In 1907, Frederick was a trustee of Martins Lookout. He is said to have had a great fondness for the local flora and fauna of the area and - at his own expense - put a man to work clearing a track some two or three miles out from Springwood.

The *Nepean Times* newspaper later regaled the splendour of hidden streams, tumbling clear pristine waterfalls and stalactites, unhindered and undisturbed, which formed from the minerals in the water. Rare ferns grew in great profusion along the track and great stacks of giant logs lay petrified on the wilderness floor.

A public spirited man, Frederick donated a sum of money to the Springwood School of Arts building fund in 1907.

In 1908, he was elected vice president along with Messrs. Charles Rosenthal, Grant and Foster and retained the position the following year.

He was elected to the committee when the first annual general meeting was held in the newly erected Springwood School of Arts building, in 1913.

Jean Arthur wins Seniors award

Long-time secretary, Mt Victoria and District Historical Society Inc., Jean Arthur was one of a number of local residents to receive the 2010 Seniors Week Recognition Award presented by Blue Mountains deputy mayor, Cr Janet May.

Jean was recognized for her work as a key figure in the community for her work with the Mt Victoria and District Historical Museum.

The citation stated, 'Jean had been over many years a dedicated secretary, volunteer, occasional speaker and hands-on worker for the museum ensuring that museum continued to be operational.

Jean Arthur with Cr Janet May

'Her knowledge of the Blue Mountains history and the manner in which she shares her knowledge and love of history with the residents of the mountains is truly inspiring.'

Jean is definitely a lifelong learner and teacher to admire', the citation concluded.

Jean was recently re-elected for a second term as a member of BMACHO's management committee and having been involved in the 175th anniversary commemoration of the first European crossing of the Blue Mountains hopes to be involved in the bi-centenary event in 2013.

Fels remembered in Springwood street name

Continued from page 10

Fels was also a member of the Springwood Progress Association.

During 1908, Frederick - with the assistance of Mr Maidment, proprietor of the Royal Hotel - installed a Rider-Eriksson hot air engine on the Springwood property to pump water for domestic and irrigation purposes from the gullies below the house.

There is no evidence to suggest if they were successful.

In 1914, Frederick founded the Mortgage and Loan Finance Company of Australia.

Sadly, he died the following year. The years following Frederick's death were troubled and turbulent for Dora and the trouble stemmed from the earlier adoptions.

Frederick's first wife appealed his will because most of his estate had been bequeathed to their mutual granddaughter, Miss Blessing Fels-Stuckgold.

Eventually the Supreme Court overturned the terms of Frederick's will and the estate was divided between Blessing and Frederick's first wife.

The latter died five years later and rests, perhaps somewhat uncomfortably, with Frederick in Rookwood Cemetery.

The name of Miss Blessing Fels-Stuckgold appeared in local newspapers around 1915, along with other young ladies who raised funds for wounded soldiers during the First World War.

Like most of the other large estates in the area the Fels estate was subsequently subdivided and Dora, or Madame Fels, left the mountains around 1920.

Family information suggested she lived in Mosman during the early 1930s, however, the date and place of her death are unknown.

Local myth had the house burnt to the ground in the 1968 fires, however, the inspection in 2000 revealed that the central spine of the house remained intact along with the driveway, a well in the garden and plants from the original garden.

Today the property is known as Blue Gum Lodge and functions as an Anglican Youthworks Outdoor Centre.

PowerPoint computer equipment available

BMACHO has now purchased computer projection equipment to allow for the use of PowerPoint presentations. This was funded from the Australian Government's Volunteers Grants 2009.

The equipment which is housed at Woodford is now available to BMACHO member organisations. Bookings for its use can can be made by contacting John Leary johnnanette@optusnet.com.au or 4758 8584

For those not familiar with the equipment, the BMACHO's management committee is considering a workshop. Any person interested in participating in a workshop should contact either John Leary or Jan Koperberg.

PowerPoint is a presentation program developed by Microsoft.

PowerPoint presentations consist of a number of individual pages or "slides". The "slide" analogy is a reference to the slide projector that has become obsolete with the use of PowerPoint and other presentation software.

The presentation can be printed, displayed live on a computer, or navigated through at the command of the presenter.

For larger audiences the computer display is often projected using a video projector.

LITHGOW RESEARCH CENTRE, A LEGACY OF JOHN WRAY

The Research Centre of the Lithgow Small Arms Factory Museum has been dedicated to John Wray, past custodian and a major driving force behind the museum.

John showed deep interest in the factory's heritage and firearms collection.

He impressed upon factory management the significance of the collection.

Without his prompting and behind the scenes work this museum may never have developed and it is unlikely that the firearms would exist as a collection today.

John brought to the museum a level of expertise about firearms, their history and lineage of which many had little understanding.

With his extensive range of contacts among collectors, dealers, museum curators, authors and acquaintances, if volunteers at the museum did not know the answer to a technical question, John would know someone who did.

He took the museum to a whole new height when he negotiated the donation of the Ron Hayes collection of handguns to the museum.

Overnight the size of the collection doubled and the Lithgow Small Arms Factory Museum was thrust into the spotlight as one of the great international firearms collections.

All this was achieved by John Wray in virtually the last decade of his life – while his health was failing him. John's unwavering commitment was that the Small Arms Factory heritage and firearms collection should be preserved, and made available for future generations to see. This was John's legacy to not only Lithgow, but Australia as a whole.

The John Wray Memorial Research Centre will be an invaluable source of information and precision mass production to technical information about items produced at the factory.
Pictured below is the late John Wray working on a gun at the museum.

Welcome to new member

BMACHO welcomes a new individual member Ian Milliss of Wallerawang whose first job was in the pictures section of the Mitchell Library.

Although he became an artist and designer rather than a librarian it was the beginning of a lifetime of active involvement in heritage issues that has included the Green Ban and inner city resident action movement, publishing labour and industrial history and the revival of traditional trade union art forms such as banner making.

In recent years he has been involved in a broad range of heritage and collection management consultancy with an emphasis on IT systems and data management for clients ranging from the RTA and local councils to private and corporate collections such as the Commonwealth Bank.

He is increasingly obsessed with the issues involved in the adaptive reuse of buildings and technologies and will go anywhere to view an interesting building in original condition.

Australian heritage information website launched

The Heritage Chairs and Officials of Australia and New Zealand (HCOANZ) at its February meeting agreed to launch the Australian Heritage Information (AHI) website.

The AHI webpage, a Commonwealth led project under the Cooperative National Heritage Agenda (CNHA), is now online and can be found at http://www.heritageinfo.gov.au/index.html

Hosted on the DEWHA website, this portal has been developed to provide a central point of access to the wealth of useful heritage tools, guidelines, heritage registers, other resources and publications that jurisdictions, including the Commonwealth, have produced individually or collaboratively.

Targeted audiences include heritage place owners and managers, students/teachers, researchers and local governments.

Thieves loot Laos Buddha statue heritage

More than a 10th of the Buddha statues in Luang Prabang, an ancient city in north-central Laos whose urban district is a World Heritage site, have gone missing in the past few years.

Minobusan University in Minobucho, Japan, whose students help restore statues in Luang Prabang, says 120 Buddha statues are missing.

In 2001 the Buddhist university began a survey of the statues, the number of which was unknown, and in 2007 it reported to the Laotian government that it had confirmed the presence of 1174 statues.

However, a survey conducted in 2009 revealed that 100 statues were missing from 35 temples. In 2010, another 20 statues were found to be missing.

Laotian authorities suspect the statues are stolen for resale, and have begun conservation efforts with support from the Japanese university.

Luang Prabang, on the Mekong River about 425 kilometres north of Vientiane, was the capital city of Lan Xang kingdom, which was established in the 14th century.

The statues there are wooden Theravada Buddhism statues made in the 14th century or later, and are of high historical value.

While monks at the temples have begun keeping guard over the statues by sleeping at the temples, Minobusan University students have distributed brochures at the Luang Prabang National Museum to sound the alarm over the property loss and to call for increased security in the city.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Avenue, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc, Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum Inc, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc, Mt Wilson and Mt Irvine History Society Inc (including Turkish Bath Museum), Mudgee Historical Society Inc, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians inc, Transport Signal and Communication Museum Inc., Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2010-11 is: John Leary, (president), Ian Jack (vice president), Jan Koperberg (secretary), Kathie McMahon-Nolf (treasurer), Jean Arthur, Joan Kent, Doug Knowles, Dick Morony (public officer), Barrie Reynolds and Peter Stanbury. **AUDITOR:** Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.
HERITAGE is BMACHO's official newsletter.

HERITAGE

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS

JULY - AUGUST 2010 ISSUE No. 10

LIEUT. WILLIAM DAWES

.....First recorded white man on the Blue Mountains

by Lindsay Paish, Springwood Historians

In December 1789, Governor Phillip charged Lieutenant William Dawes with the task of reaching the western mountains.

This was the first recorded exploration of the area, followed by a series of adventurers like Tench, Hacking, Bass, Paterson, Wilson, Barrallier and Caley.

All those explorations failed to cross the mountains, but their knowledge was the real reason that Blaxland, Lawson and Wentworth succeeded.

There is no known journal of Lieutenant Dawes journey, the only record was a map dated 1791, signed by Dawes.

There is no doubt that Dawes, with his superior skill at "compass and pace" could produce a traverse of his journeys with comparative accuracy.

The actual line of Dawes' march, as per his inscribed map, can be located on the modern ordnance maps prepared by the Army Survey Corps.

The details of the creeks on Dawes' traverse favourably compare with the ordnance sheets.

To the "line of march." The first day he headed due west from Emu Ford to the crest of the first ridge, in the vicinity of Mount Riverview, and from here he had a direct view of Round Hill.

Dawes moved his "line of march" to a straight traverse and made a bee line for Round Hill crossing the now line of the highway just near the Sydney side of Warrimoo.

Keeping on, he crossed a series of creeks draining to the south side of Valley Heights, the ridge to the south of Springwood at Farm Road, the next ridge south of Bee Farm Road near the rifle range, into Sassafras Gully, then across the Main Ridge close to Faulconbridge Station.

By now "the line of march" was half way through their total route. The country was rougher on the west side of Faulconbridge. Most of the creeks and gullies they had crossed were precipitous with average grades being close to 1 in 2.

Further on, they encountered a series of deeper gullies – including Linden and Woodford Creeks – about 900ft [275 m] deep. The western flank of Woodford Creek is a long unscaleable cliff, which forced a deviation around the head of the ridge. Back to the ridge top, located north of Linden, they returned to their "line of march."

An extensive view of the scene ahead appeared even rougher than that they had already negotiated. Immediately west was the deep Wentworth Creek, the roughest gully on the mountains and further ahead, the chasm of the Grose River.

Dawes and his party were near exhaustion and short of provisions, and considering the country they had already travelled, the prospect of a further, rougher portage, forced the party homeward.

Continued page 10

Pictured is former Forestry Department cartographer, Lindsay Paish now 85 years of age, looking at the map he drew in 1959 from overlays of Dawes 1789 traverses on to Australian Army Survey Corps maps which lend credibility to the claim Dawes was the first white man on the Blue Mountains. Photograph by John Leary, OAM May 2010

From the president's pen.....

The magnificent Mitchell Library a researcher's dream

The front page piece by Lindsay Paish in this edition of ***HERITAGE*** like so many historical and heritage based stories is in part written as a result of research in Sydney's magnificent Mitchell Library which earlier this year celebrated its centenary.

On following pages, John Low also writes about a Blue Mountains connection among the *One Hundred* treasures on display at the Mitchell.

It is all but impossible to write or read about Australia, the Pacific and the Antarctic without incurring debts of gratitude to the Mitchell.

Libraries are the most personal public institutions. History never forgives those who destroy them and it remembers those who are book donors such as David Scott Mitchell.

The State Library of New South Wales traces its origins to 1826, with the opening of the Australian Subscription Library. In 1869, the New South Wales Government took over responsibility for the Library and created the Sydney Free Public Library. In 1895 it was renamed the Public Library of New South Wales, and in 1975 it became the State Library of New South Wales.

The Australian Subscription Library soon outgrew its premises, and a new wing was built in the mid-1880s. By the turn of the century this too was outgrown, and plans were prepared for a completely new 'national' library building.

The stimulus for this was David Scott Mitchell's offer of his immense and unrivalled collection of Australiana to the people of New South Wales. One condition of his offer was that a new building be erected to house the collection as a separate library.

Mitchell, book collector and national benefactor, became one of the first undergraduates of the University of Sydney (BA, 1856; MA 1859). In December 1858 he was admitted to the Bar but never practised though he is said to have later declined appointment as attorney-general.

Mitchell had been reared in a cultivated household; never robust, he preferred books and intellectual interests to business or politics.

By 1866 he had won some repute for scholarship in English literature and for the next 20 years he collected mainly English literary works, including many fine editions which in 1900 exceeded 10,000 volumes.

From about 1886, he turned almost solely to the record of Australia and its surrounding region.

Book-collecting, which had been an intellectual pastime in youth and a scholarly vocation in maturity, became his all-absorbing purpose.

Perhaps it could be said, Mitchell was favoured: he had wealth, leisure and position, with useful social connections yet was free from outside distractions.

His scholarly knowledge of books, coupled with education, experience and a talent for book-collecting, approached genius.

After 1895 he was aided and encouraged by HCL Anderson, the principal librarian, who had seen Mitchell as the chief rival of the Public Library of New South Wales and set out to combine forces.

Apart from Mitchell, the library had the best Australasian collection and had demonstrated a capacity and will to develop it. Mitchell was aging and in poor health, with no relations of like interests to his own.

In 1898 he offered to bequeath his collection to the library trustees. The offer was immediately accepted and eventually his conditions were met: the trustees were incorporated in 1899 and the Mitchell wing of the new library building was begun in 1906.

Mitchell died in 1907 and bequeathed to the library trustees his entire collection with an endowment of £70,000. Despite his fine memory and erudition he wrote nothing and left as his one main memorial the Mitchell Library.

When opened in March 1910 it had some 60,000 volumes and much other material. It remains unrivalled in its field and is one of the great national collections in the world.

John Leary, OAM
President, Blue Mountains Association of Cultural Heritage Organisations Inc.

Pinchgut

Pinchgut Island (now Fort Denison) once boasted Sydney's finest weight loss cure – if you could stomach a week's solitary confinement.

As early as 1788, convicts were put onto Pinchgut for petty crimes such as stealing food. Back then, the place was little more than a desolate rocky outcrop in Sydney Harbour.

The history of the name Pinchgut is a little hazy. It was named Pinchgut by Governor John Hunter, It is both an old nautical term for the point where a stream channel narrows and a word for being hungry.

Greens Party heritage policy to ensure Heritage Council's independence

At a meeting organized by BMACHO in Springwood last month Ms Sylvia Hale, MLC (pictured) outlined the Greens Party policy on heritage which it will take to the next state election.

The meeting was the third in a series organized by BMACHO to learn of heritage policies of the major political parties.

The Greens will

- Ensure the independence of the NSW Heritage Council by guaranteeing its funding and making it directly accountable to the NSW Parliament in a similar fashion to the Ombudsman's Office, rather than to a minister.
- Reconstitute the Heritage Council to ensure the appropriate representation of community and professional organisations.
- Provide adequate resources to permit an increase in the rate of assessment of items for inclusion on the State Heritage Register.
- Facilitate the extension of Interim Heritage Protection Orders to items not on the State Heritage Register.
- Remove economic disadvantage as a reason to delist a heritage item.
- Remove the right of a minister to unilaterally delist a heritage item.
- Require the Heritage Council to approve any recommendation to de-list any item on the State Heritage Register
- Require local councils to notify the Heritage Council of any item that may be of State Heritage significance and to seek the Heritage Council's advice prior to approving demolition or alteration to an item.
- Encourage and fund local councils to revise and extend their local heritage registers.
- Require any application to demolish a heritage item to demonstrate why alternatives such as adaptation of existing structures are not feasible, and forbid the demolition of any heritage item without prior approval of the relevant authority.

Thanking Ms Hale for her address and for answering question from the meeting, BMACHO president, John Leary, OAM said many in the community especially those in the heritage sector would welcome the proposed policies.

Mr Leary said that it was farcical to believe that heritage could be adequately protected with the powers which had been given to the Minister for Planning under Part 3A of the Planning Act 2005.

Professor Ian Jack president of the RAHS who has had a long association with the former Heritage Council also welcomed the proposed policies.

SUPPORT FOR HERITAGE ADVISORY COMMITTEE

New support has recently come from a number of elected representatives including Blue Mountains City Council's deputy mayor Cr Janet May and Greens Crs Eleanor Gibbs and Howard McCallum

Heritage advisory committees have been established by many NSW local government units and are in fact widely used throughout Australia to allow councillors and staff to avail themselves of local and expert knowledge on a wide range of heritage and historical issues.

Formed under Section 377 of the Local Government Act 1993 these committees usually comprise one councillor and a number of community members, selected by council after newspaper advertisements calling for expression of interest from members of the community.

Those selected often include members of heritage or history societies and people either working in or retired from the heritage sector including academics.

For some time BMACHO has been seeking to have Blue Mountains City Council re-establish a heritage advisory committee and for several years BMACHO's executive has been meeting with council's senior staff.

The suggested objectives of a heritage advisory committee are:
a. To advise council in relation to reviews of local heritage listings;
b. To advise council about increasing the community's awareness of heritage matters;
c. To advise council on heritage matters relating to development applications before council;
d. To advise council about heritage assistance, grant applications, review and recommendations;
e. To advise council on improvements to the care of, public access to and site information for existing historic sites, buildings etc. and how these improvements might be achieved;
f. To advise council in relation to long term planning of significant heritage cemeteries.

There is no shortage of people in this region who are eminently qualified to serve on a local heritage advisory committee.

They comprise long-term enthusiastic and experienced researchers of heritage and history or professionals and academics in the heritage sector including several with local government experience. BMACHO is confident that they would be prepared to serve on such a committee.

‘He fought six rounds with the horse police’ --- the shooting of Bold Jack Donahoe

by John Low, Blue Mountains Historical Society Inc.

In the current exhibition at the State Library of NSW, celebrating the centenary of the Mitchell Library, there are a number of items of interest to Blue Mountains historians among the *One Hundred* treasures on display.

The original journals of Blaxland, Lawson and Wentworth are featured as is a 1930s journal of bushwalker Myles Dunphy.

One item, however, that caught my attention, the relevance of which may not at first be evident, was a lithograph portrait of the dead bushranger Jack Donahoe attributed to Thomas Mitchell.

While Donahoe died at Bringelly, his death has a slight but interesting connection with Wentworth Falls (or The Weatherboard).

In 1902 the *Warren Herald* published a series of reminiscences by Edward Readford whose father, Thomas, had been the licensee of the Weatherboard Inn during the years 1833 to 1837.

At the time, the innkeeper’s only neighbours were a small troop of mounted policemen housed in a ‘Police Military Barrack’ opposite.

Readford makes particular mention of one of these, a quiet young Scotsman named John Muggleston, who was stationed there “nearly the whole time my father kept the hotel” and regularly frequented his father’s establishment.

Fate had given Muggleston a degree of notoriety among his fellows.

John Muggleston (also spelt Mugglestone, Muckelstone, Muccleston, etc.) was born ca. 1804 in the Scottish agricultural and

A lithograph portrait of the dead Jack Donahoe

cotton milling town of Neilston in the Levern Valley south of Glasgow. While nothing is known of his family or early life other than that he had worked as a groom, by the beginning of 1827 he had travelled south into England and had taken the king’s shilling, joining the 39th (Dorsetshire) Regiment at Coventry.

His decision to become a soldier would take him even further from his birthplace for, in June 1827, the 39th Regiment embarked as part of the convict guard on board the ‘Champion’ and arrived in Sydney a little over four months later.

Following a twelve month tour of duty in Norfolk Island, Muggleston joined the mounted police in March 1829.

The mounted police had been established by Governor Brisbane in 1825 in response to a general increase in bushranging activities, a state of affairs that continued to worsen under his successor, Governor Darling.

Its principal role was to combat this and to pursue escaped convicts who contributed mightily to the membership of the bushranging gangs.

In these early years the mounted police had a strong military character, its officers and men being volunteers seconded from the regiments garrisoned in the colony and generally returning when these were transferred elsewhere.

Their uniform also reflected the military connection with ‘full dress’ resembling the 14th Light Dragoons, though their ‘bush uniform’ included a cabbage-tree hat along with the patrol jacket and trousers.

They were armed with a sabre, carbine and horse pistols. By 1830 there were about 100 mounted policemen in the colony.

One of the most troublesome bushrangers operating at the time Muggleston joined the ‘horse police’ was a young Irish convict escapee who, following a conviction for highway robbery on the Sydney-Windsor Road, had dramatically avoided the hangman and fled into to the bush.

This was the “wild colonial boy, Jack Donahoe by name” whose depredations and continued evasion of the authorities in the Hawkesbury-Nepean and other districts around Sydney were notorious.

In the repressive climate of Darling’s administration John Donahoe (sometimes spelt Donohoe) was rapidly becoming something of a folk hero among the ‘lower orders’ of society.

Born in Dublin ca. 1806, details of Donahoe’s early life and family are as vague as those of his Scottish contemporary.

Continued page 5

The shooting of of bushranger, Jack Donahoe

Continued from page 4

A couple of years younger than Muggleston, he was sentenced to transportation for life in 1823 after being found guilty of "intent to commit felonry", a rather vague charge that has been interpreted by some to refer to 'political' crimes.

As the child of a country exploited economically and repressed politically, he had good cause to dislike the English. Donohoe arrived in Australia on board the 'Ann and Amelia' in early 1825, not long before Brisbane's departure and the advent of Governor Darling.

In 1830 Muggleston's commanding officer and fellow Scot, Lieutenant Lachlan McAlister, devised a new strategy for his mounted police unit based at Goulburn.

Instead of the usual reactionary pursuit from place to place, allowing the villains greater options for escape, his troopers now conducted regular and systematic patrols of the known haunts of the Donahoe gang. It was a good plan and on Wednesday, September 1, 1830, it brought results.

As an early spring evening settled on the Bringelly bush, Muggleston and six other troopers unsaddled their horses and prepared to make camp.

In the dusk they spied, some distance away, three men riding slowly through the trees leading a packhorse.

These were soon identified as Donahoe, William Webber and John Walmsley.

At the later inquest Muggleston described the situation: "The bushrangers were in a hollow surrounded by bush, by which means they were prevented from observing our approach.

When Donahoe saw us he took his hat off, and waved it three times, threw it in the air, and bid us defiance ..." Both sides took cover and the bushrangers, with a reckless confidence borne of their earlier successes, began taunting the troopers with insults, obscenities and shooting.

What followed was described in detail in the *Sydney Gazette*: "Muggleston, who is reckoned one of the best shots, kept his eye steadily fixed on Donahoe, and when the latter peeped from behind his tree, shewing (sic) only his head and part of his breast, the wary soldier took aim, fired, and though a hundred yards distant, in less than a minute the vaunting hero was in eternity."

The 'troublesome' Jack Donahoe was dead but his memory would fuel a legend and inspire numerous popular ballads that circulated throughout Australia and overseas in places as diverse as Ireland, England, the USA, Canada, Nova Scotia and Newfoundland.

His nemesis, the young Scottish soldier, on the other hand, slipped quietly into obscurity.

Prior to his transfer to The Weatherboard, there are references to Muggleston's involvement in skirmishes with bushranging gangs in the Oberon area and near the Fish River (Jenolan) Caves in 1831.

He clearly preferred the life of a mounted trooper to that of a foot soldier and twice transferred to other regiments (the 4th in 1832 and the 80th in 1837) in order to remain in Australia.

By the end of the 1830s he was stationed at Newcastle and was probably involved in the pursuit of the 'Jew Boy' Gang (led by Edward Davis, the only Jewish bushranger on record) who were operating throughout the Hunter region between 1839 and the end of 1840.

John Muggleston died in Newcastle Hospital on January 13, 1841 at the early age of 37 and was buried in the Christ Church Cathedral Cemetery. I have not, however, been able to establish the cause of his death.

His colleagues in the mounted police erected a substantial headstone to his memory and, while no longer marking the spot where his body lies, this still exists.

On its face are inscribed the words: "Sacred to the memory of John Muggleston who died January 1841 aged about 40 years. This stone is erected by the officers, non-commissioned officers and troopers of the Mounted Police Force".

MOUNTAIN MURDERS

Glenbrook & District Historical Society Inc. will conduct a walk "The Mountain Murders – Lee Weller's Grave" on Saturday, August 28.
For further details
pplinden@yahoo.com.au

NATIONAL TRUST WALK

The Blue Mountains Branch of National Trust is organising a walk on the lower Blue Mountains eastern escarpment for Saturday, July 24.

The walk will visit Elizabeth's Lookout, Knapsack Gully and railway viaduct built in 1867, then traverse the original Lapstone Zig-Zag, cross the portal of the original Lapstone Hill railway tunnel, the subject of Arthur Streeton's painting 'Fires on'.

Morning tea and lunch will be provided.

For further enquiries Rhona Leach 4757 2424.

Woodford's memorial for those who for king and empire enlisted from this village

In the aftermath of the Great War, communities across Australia built war memorials to perpetuate the memory of those who served their country and who lie buried in foreign soil or beneath the seas. Their memory must not be diminished by the passage of time.

Woodford like so many other towns was to see the creation of a Memorial Park in which was included a war memorial housed in a pavilion.

Often the memorials were built at the instigation of local residents who banded together in organisations such as progress, citizens and/or ratepayers associations.

In his book *Hazelbrook & Woodford –A story of two Blue Mountains towns* local historian Ken Goodlet, records: In February 1917, 'it was unanimously decided to form a local progress association, the object being to formulate plans for the enhancement of the district'.

The committee included such local identities as Gustavus Waterhouse (president), Thomas Thomas, Aubrey Murphy and Herbert Dakin[1].

The local press saw this as marking 'an epoch in the history of this charming town'[2].

The war memorial is described in the State Heritage Inventory as a square pavilion with an intersecting gable roof.

A rock faced stone balustrade with bullneck brick capping spans between the piers.

On the north side a terrazzo stair with stone spandrels provides access to the shelter.

On a monument in the centre of the pavilion is a rockfaced sandstone monument with tapered sides. Marble plaques at the base commemorate those who enlisted from the village in World War 1. Granite plaques commemorate World War II [3].

In 1919 details of Woodford Memorial Park appeared in the Government Gazette and the Woodford War Memorial and pavilion was designed and constructed in 1920 by local stonemason and master builder Thomas Thomas. The memorial and pavilion was built on a sandstone outcrop on the south east portion of the park between the train line and the highway.

Thomas Owen Thomas had built his home in Woodford in 1909 soon after he emigrated from Wales.

At the time of his death in 1973 his contribution to the Blue Mountains community was considered to be one of the most important in the development of this district.

He served as an alderman on Blue Mountains Shire Council, was a long term president of Woodford Progress Association, a chairman of Woodford Sights and Reserves Trust, and a member of the 530A Committee [of council] caring for the Woodford parks and reserves at the time of his death.

In 1921, the Woodford Group of the Blue Mountains Sights Reserves was established, most of the early attention going into Woodford Memorial Park and much of the cost being paid as a loan by Gustav Waterhouse [4].

It was not until 1962 that Memorial Park was transferred to Blue Mountains Council.

In recent times Woodford Memorial Park has been difficult to access from the Great Western Highway or the footbridge over the rail line. However, there is expected to be some enhancement of the park and memorial which will not be affected by construction work to upgrade the Great Western Highway.

ACKNOWLEDGEMENT

ELIZABETH MACQUARIE: ‘so young a campaigner’

by Jan Barkley Jack

As a twenty-six year old, Miss Elizabeth Henrietta Campbell of Airds, had met Lachlan Macquarie in their native Scotland in 1804.

Two years later, Elizabeth and her officer exchanged locks of hair as tokens of their joint affection before Macquarie returned to his military duties in India.

The youngest daughter of Macquarie’s second cousin, Elizabeth had grown up on her father’s estate in Appin, Scotland and attended school near London.

Elizabeth seems to have been a particularly capable, friendly and good-looking young woman who retained a sprightliness and humour, even in trying situations.

Her sensibility and sensibleness attracted Lachlan to his second marriage. The pair wed in November 1807 in Devonshire, as Macquarie took command of the 73rd Regiment.[1]

Late in 1808, whilst the Regiment was at Perth, the Macquaries began re-organising the Gruline estate Macquarie had bought on the island of Mull. It was on the estate, that Macquarie planned his first model township at Salen, to include tradesmen tenants (as with his founding of Liverpool, New South Wales).

Remains of the quay whose construction Lachlan Macquarie supervised at Fishnish on Mull, Scotland, c. 1786. Source: taken by Jan Barkley Jack, 1997

The town was situated west of Fishnish where more than twenty years before he had supervised the building of a stone quay for his uncle.[2]

Elizabeth’s first child, a daughter, died in infancy in December 1808.[3] Elizabeth was to have six miscarriages before their only child who lived, Lachlan jr, was born a little over five years later in Sydney.

Though a sickly child he lived until 1845. Both children are buried in the large family vault at Gruline, as were Lachlan in 1824 and Elizabeth on her death in 1835.

After their return from Australia in 1822, for much of the time Elizabeth lived in the house they had prepared on the Gruline estate beside the tranquil Loch Ba.[4]

The Macquarie vault [pictured at right] is today under the care of the National Trust of Australia (NSW) in tribute to the couple.[5]

It was Elizabeth’s blending of a genteel upbringing with a love of beauty and nature that made her popular and happy in the colony of New South Wales where she was first lady from 1810.[6]

At Airds, Scotland, before her marriage, she had planned and directed construction of a new walkway in the grounds of the estate which Macquarie felt ‘showed the good taste of this young lady for ornamental improvements of this kind’[7]- a skill Elizabeth extended in her well-debated contribution to the design and aesthetics of some colonial buildings and surrounds.[8]

An important but less discussed essence of Elizabeth is how the ruggedness of the landscape of her youth allowed her to embrace travel in the colony.

She was the first wife of a New South Wales governor to brave the colonial frontiers so extensively.

She was prepared to ride happily for long periods, sometimes up to seven hours on horseback in the bush with leeches attacking her ankles, and she felt at home sleeping in a tent. [9]

The Macquarie mausoleum in Scotland maintained by the National Trust of Australia (NSW)

From the frontier Hawkesbury to Van Diemen’s Land and Newcastle,[10] Elizabeth took an acute interest in the scenery and the Indigenous peoples.

When the governor’s forays became too energetic, Elizabeth could be found, with a soldier escort, exploring a closer hill and delighting in ‘the beautiful prospect she had from the top’.[11]

On one official excursion in 1815, as the only woman in a large party of men, Elizabeth accompanied Macquarie on his April-May journey across the Blue Mountains to the newly discovered plains where Bathurst was to be founded.

Continued page 8

Mrs Macquarie on horse-back bush excursions

Continued from page 7

Riding in the carriage gave way to horseback on just the second day until the Nepean was forded, and then resumed on and off.

Accommodation that night at Springwood, as for the next 22 nights, was in tents, the couple sometimes relaxing with a game of cards after dinner.

The pass that William Cox had constructed down Mount York stunned the Macquaries, the road being so steep that Elizabeth and Lachlan had to walk the whole way down on foot, whilst three hours of struggle elapsed before the carriages and baggage came down safely.

A special halt was called by Elizabeth elsewhere, so she could sketch 'Mount Evans' [Evans Crown].[12]

Lachlan was proud of Elizabeth's fortitude and pleased with her companionship:

> Mrs M. I am happy to say, has bore [sic] the fatiguing journey over the Blue Mountains to [Bathurst Plains]… wonderfully well indeed …[13]

An earlier comment, written in the wilds of the Cowpastures, summed up Macquarie's affection and Elizabeth's varied talents succinctly. While needing fires and guards to encircle their camp site from fear of the wild cattle, her husband could note of Elizabeth:

> we sat down eight at table to a most comfortable dinner; Mrs. M. tho' so young a campaigner having provided every requisite to make our tour easy, pleasant and happy…[14]

THE AUTHOR. Jan Barkley Jack is a historian, educated at the University of New England, with a BA (Hons.) from the University of Western Sydney.

She co-authored the Hawkesbury City Council's Bicentennial book and has written many articles.

She has promoted history through being on Hawkesbury Historical Society, National Trust and Hawkesbury City Council heritage and celebration committees, and as honorary curator of Hawkesbury Museum for over twenty years.

Jan has presented Community Link courses for the University of Western Sydney and was a recipient of a Commonwealth Centenary Medal in 2003 for 'service to the community through the history and heritage of the Hawkesbury'.

In 2005 she was an advisor to SBS Television on historical content in their Living History series The Colony. Her latest book, *Hawkesbury Settlement Revealed* was published in 2009.

Governor Macquarie exhibition

One of Governor Lachlan Macquarie's most enduring legacies was the setting out of five towns on the Hawkesbury River.

They were named Richmond, Windsor, Wilberforce, Pitt Town and Castlereagh, and, according to Hawkesbury Regional Museum director, Kath von Witt, they guaranteed the survival of the colony of New South Wales.

"Attempts to farm at Sydney and Parramatta had not produced enough food to support the population, and although the Hawkesbury had the rich alluvial soil needed to grow crops and raise livestock, regular flooding had swept much of it away," says Kath.

"With his five towns, Macquarie changed all that — by situating towns above flood level, grain and livestock could be protected from flooding and Sydney's food supply was assured.

"At the same time, Macquarie created settlements that, 200 years later, continue to reflect his town planning ability, his belief in the civilising influence of British institutions, and his willingness to spend public money on infrastructure."

On show throughout 2010 at the award-winning museum in Windsor, itself located on a town allotment granted by Macquarie to John Howe in 1811, is a display about Macquarie's achievements.

It includes information about the time he spent in the area, and the thinking that went into the siting and naming of the towns.

Hawkesbury Regional Museum is at 8 Baker Street Windsor. Open daily 10am - 4pm except Tuesdays (pre-booked groups only) Selected public holidays 10am - 4pm. Closed Christmas Day, Boxing Day and Good Friday.

THE OLD COMMUNITY HALL - THE HEART OF THE LAWSON TOWNSHIP

by Nance Cooper, Mid Mountains Historical Society Inc.

Although the place that was to become the modern Lawson had appeared under its first name of Christmas Swamp on John Oxley's 1817 survey, it was not until 1867 and the arrival of a single-track railway line that the township had its real beginnings.

Up to this time its major function had been to serve the needs of the steadily increasing movement of people and trade both ways across the mountains. The Blue Mountain Inn and an official stock resting area (now Douglass Square) together with a good water supply had made Blue Mountain as it came to be known a major stopping place.

After 1867 a settled community began to appear. The name Lawson appeared in 1879 as part of a government clean-up of place names.

The Blue Mountain Inn was moved from its original site on what is now the public school playground finally ending up where the Blue Mountains Hotel now stands and a flourishing small shopping centre grew up to serve the needs of both the permanent residents and the increasing numbers of holiday makers.

By World War I, Lawson was one of the major holiday resorts of the Blue Mountains. By the end of the 19th century when the story of Lawson's Old Community Hall begins many forces were having an impact even on a quiet mountain township.

The development of the Mechanics Institute movement as a social and educational force was under way throughout NSW and within the Lawson community new needs were being felt.

The result was at first a small venture called the Lawson Literary and Debating Society that was set up in 1896 with eight members and no money.

It met in what had been the second Blue Mountain Inn (on the present school playground).

A small library encouraged more members, so a move was made across the railway line to the Coffee Palace (later Stratford School of which only the tower still remains) in San Jose Avenue.

The purchase of a small billiard table against much opposition encouraged younger members so a permanent home was sought by the Progress Association.

In 1899 the state government came into the picture and set aside Lot 17 Section 1 of the Village of Lawson for a mechanics institute and the society with library and billiard table moved back across the railway line to a home in a temporary wooden building.

A more substantial masonry building was erected on the site in 1903 at the cost of £400 paid for by community subscription.

About 40,000 bricks from the old Lawson railway station were used as well as some from Mount Victoria station, all becoming available as the result of the upgrading of the railway line and the need for new stations.

Once again the community was directly involved in providing the transport for such a major movement of building material.

The new Lawson Mechanics Institute building was officially opened in December 1903.

The needs of current highway widening have had the effect of restoring the old community hall to its original appearance as created by the Lawson community.

The portico that provided a covered front entry to the building was not to appear until at least 30 years after the original building was completed.

A 1905 photograph shows a set of steps from the footpath to the doorway that still faces the highway. Exactly when the portico was added is a matter of question but photographic evidence shows the hall without portico up to the time of World War II.

In all probability its appearance coincided with the use of the building on a regular basis as a cinema up to the advent of television.

The new building was put to immediate use. By 1905 the library, now a circulating library, had reached 1000 volumes and membership continued to grow. A permanent caretaker was needed and the library and billiard room were open all day in the holiday season.

Continued page 10

Lawson Mechanics Institute a venue for university lectures in 1906

Continued from page 9

It became a venue for young men and women for Christian conferences with up to 200 in attendance and was also used in 1906 as the site of university lectures for students from NSW and Victoria.

It provided a venue for the new Blue Mountains Shire Council that took over the building temporarily in 1907 before relocating to San Jose Avenue, first to *Avon* on the corner of Park Street, then into its permanent home in what is now the library building where it stayed until 1947.

A major change occurred in 1911 when the Lawson Mechanics Institute was renamed the Lawson Literary Institute reflecting a changing attitude to the building and its use.

In 1909 its move to becoming Lawson's entertainment centre accelerated. The stage was enlarged and wings were added. Moving pictures were first exhibited in the hall by a travelling show and skating appeared as a hall activity in 1912.

The connection of electricity in 1931 increased its availability for a wide range of social activities. There are newspaper reports of dances, bazaars, lectures, school prize-giving functions and billiard competitions and until the early 1960s it was the local cinema.

In 1991 the building was renamed the Mid Mountains Youth Centre but was vacated in 2004 for its future to be determined.

While at one stage demolition seemed inevitable to meet the needs of highway widening, a realignment of the new line of highway coupled with the removal of the portico has made the retention of the building possible.

The Mid Mountains Historical Society was set up in 2000 at a community meeting to give a voice to the much neglected heritage and history of this forgotten part of the Blue Mountains.

Preservation, recording and publicising of material relating to the area is a paramount object which is reflected in the Society's website and various published documents

Lt William Dawes named Mt Twiss

Continued from page 1

Mount Twiss, named after an officer of the Royal Engineers, and Dawes Ridge are enshrined on the Register of the Geographic Names Board.

There have been numerous attempts to pinpoint their exact location but there is no backing in any journals so their position will slip into the realm of mythology.

STRANGE DOINGS AT SPRINGWOOD

By Shirley Evans

For more than 400 years, since the first ever newspaper, the *Relation aller Fürnemmen und gedenckwürdigen Historien* was printed in Strassburg, Germany by Johnann Carolus in 1605; newspaper reporting has undergone many changes in literary styles.

From the early 18th century up until recent times it was not uncommon for provincial and even some metropolitan newspapers to supplement crafted writings of journalists with contributions from correspondents or as they were sometimes called 'stringers' who provided news from outlying areas.

The writings of these correspondents varied from the bland to the beguiling, the storyline sometimes quaint, sometimes questionable. The authors were sometimes humble, sometimes hostile while some tried homespun humour to get their story read. Unquestionably for future researchers and historians these correspondents have left a first-hand account sometimes complete with hyperbole of lifestyles of yesteryear.

The *Nepean Times* seems to have employed a 'stringer' in the then outlying township of Springwood. Springwood Historian, Shirley Evans in her ongoing research of old newspapers has contributed this interesting article. It is well worth the space given to it in this edition of ***HERITAGE.*** The editor.

***Nepean Times*, February 1, 1890**
"Petty Thieving. – Petty thieving in and around Springwood seems to be the popular amusement – mean despicable appropriation of other people's goods – one of our hardworking neighbours has to pick his ripening fruit every morning before he goes to work; if not it is sure to go during his absence – another one left a few tools where he had been working some little distance from his house, the next day they were missing – and on Tuesday we met our road maintenance man plodding towards Springwood with a very doleful countenance, his road repairing tools having been left between two days – we believe some people would steal a dog-leg fence if they could get it on their shoulders – O Tempore ! O Moses! "

***Nepean Times*, May 3, 1890**
"More petty thieving and wanton mischief in the back blocks, one poor fellow loses five of his best hens, and another has his wire fence cut in various places and some of the wire stolen – this is beyond a joke. Another had a few (a case or so) late apples on the tree one night – the next morning they had disappeared . We shall have to interview the war office and have a detachment of mounted infantry sent up here. They could make a dear little camp on peach tree flat, and it would be such fun for the girls. We are sure they would be just as useful in the country (even more so) than displaying their roosters' feathers in the neighbourhood of Sydney, and if our liberal government would supply them with a little ammunition, we might get rid of our flying foxes without trying to blow them up with dynamite. Lor! what a scare the wallabies would get."

***Nepean Times*, May 10, 1890**
"The operations of our Springwood thieves are extending and taking a higher tone. A few days back they took advantage of Mrs Hoare's absence and forced an entrance into her house[1], but they were evidently new at this branch of the trade for they decamped without taking anything of much value[2]. Their entrance was effected very clumsily as they had roughly bored holes in the front door and burst a panel in sufficiently wide to get their hands in and undo the fastenings of the door. This is certainly an upward tendency in the style of theft from robbing orchards, making a raid amongst the hen roosts, stealing and cutting wire fences to barefaced robbery. We shall next hear of them sticking up our local bank or stopping the mail train. We are as far too go-ahead in villainy as we are slow in other natures."

***Nepean Times*, June 28, 1890**
"I daresay you have heard of the nefarious proceedings of certain unknown "gentry" in the district of Springwood. Truly, we are in bad case. No one when he retires for the night can say he will have a peaceful time of it. He may examine under his bed with his rushlight to see if anyone is there, and he may perchance keep his revolver loaded too under his pillow; but for all those precautions he may find the next morning that his fowls have been stolen, or his beehives disappeared – the very wires of his fence may have been cut and taken away, or worse still his house may be broken into and many of his favourite articles gone.
If he has goods consigned to him by rail and leaves them or his luggage on the Springwood platform, part or the whole may disappear in the twinkling of an eye without his authority. These are not fanciful cases. These things have happened and that lately. Some no less than last week. You may say the remedy lies in having one policeman stationed here, whose district extends from about Blaxland right away to Lawson and beyond. Well he is no doubt a very worthy constable, but so far has been unable to afford us any relief. He cannot even find one offender, and I fear it is hopeless to expect that he will be able to unless ably assisted by the Inspector General of Police's instructions.

A pair of antique silver cruets, probably not unlike the set stolen from Miss Todd's Springwood home in 1890. Photograph courtesy of John Leary, OAM

Continued page 12

From Springwood burglar to Peak Hill murderer

Continued from page 11

It is plain to me that we want more police here if only as a temporary expedient, then there may be some hope of being able to keep one's goods intact. If no help is afforded, and more burglaries and thefts occur it will have but one ending – somebody will be made a target of; perhaps the wrong man which would be a lamentable result. Revolvers are to be brought into requisition by several of our folk who are determined to use them too if occasion demand it. Perhaps our Progress Committee will make a move in the desired direction, for at present "our" policeman's lot is not a happy one."

***Nepean Times*, July 19, 1890**
"Another petty robbery has occurred in the district. Miss Todd upon returning home, near the railway bridge, after a short absence, found it broken into and some blankets and a cruet stand abstracted. It is a curious thing that in all the late cases of robbery about Springwood, the thieves have appropriated a cruet-stand. It does not seem to matter much whether the stand is electro or silver it is all the same to them, it is taken. We wonder whether he, she or they are going to set up a dining saloon, and are thus commencing to appropriate the necessary stock. It's a risky game; and for our part we would rather buy the articles on terms, and leave before payment was required – with the articles, if not too bulky.

***Nepean Times*, July 26, 1890**
"Theft. – In the midst of life we are in theft, at least we find it so this side of the Zig-Zag, and a consignment of tower muskets will have to be forwarded to the district. Neither our cruet stands or our clothes lines are safe. In fact this system of petty fogging appropriation of other people's underlinen is the meanest type of kleptomania. Last Saturday our two hotels had their clothes lines stripped in a most barefaced manner, and the night before Mr Humphries, a quiet hard working man, had his home broken into and a quantity of wearing apparel and papers taken. We can understand a starving homeless wretch filching from the super-abundance of a rich man's house, the temptation being so great, but for thieves to break in and steal from a hard working tiller of the soil seems the very poorest kind of employment.

We would just as soon work for our living and take our natural rest at night."

***Nepean Times*, August 2,1890**
"No more robberies. – Since the stirring events of the last week have transpired, our village has returned to its usual placid serenity. We carefully take in all our washed clothes at night, lock the back gate with a six inch nail, and shove the cruet stand as far up the chimney as possible. Having made these preparations, we chain the dog up to the grind-stone, and feel easy for the night."

***Nepean Times*, August 16, 1890**
"Mr Parker's house on Single's Ridge was entered the other day in the absence of the owner, but nothing much was appropriated, but there has been an increased demand for shot, caps and powder at Mr Rayner's store. We pity the marauders if the vengeance is carried out that we have heard threatened them. Life will be a burden and death a happy release to them."

***Nepean Times*, October 11, 1890**
"A sensation is now being experienced through some discoveries made this week by Constable Illingworth. It will be recollected that our little community was moved by feelings of alarm and indignation some few months ago in consequence of the numerous burglaries and robberies which took place in our midst, some which 'took the cake' for barefacedness. Well the secret is being unearthed at last, much to our relief of mind, and very much to those who were unfortunately wrongly suspected of being participants in the proceedings. It is an old saying that 'murder will out', and it looks as if it is going to prove in our case. It appears that Mr Larsen[3] had in his employ as caretaker and gardener a man named Lars Peter Hansen. This individual enjoyed the confidence of his employer for over a year and left for 'fresh fields and pastures new"'about a month since. The next news we heard of Hansen was that he had been arrested for supposed complicity in the murder of a man named Charles Duncker in the Peak Hill district. Opinions began to be expressed here that he might have been guilty of some of the crimes in this district. Then did our constable arise to the dignity of his profession. Without further ado he considered it advisable to make a little search for himself[4] in the house and grounds of Mr Larsen, and was well rewarded for his trouble by finding a 'plant'. A waterhole in the grounds was 'fished' with the result that two tin trunks and part of a leather portmanteau were found, minus the contents, the said packages being those which were mysteriously conveyed away from the station here in June last. Heaps of rubbish were overturned, resulting in the discovery of sundry articles, all of which have been already identified as stolen goods belonging to our villagers. In a cooking stove were found some lumps of white metal which had evidently been melted down in the hope of it being silver, but which it is probable is something baser. Much therefore has been done towards clearing up a great mystery. The circumstantial evidence thus afforded points strongly towards Hansen as the perpetrator of at least some of the robberies. As at present he is suspected of the most serious crime of murder, we can afford to wait and see how he gets on with that charge."

A tomahawk like this missing from Springwood crime scene. Photograph by John Leary, OAM

***Nepean Times*, October 25, 1890**
"Since Hansen's departure from our district we have been free from robberies, for which much thanks. The various goods found on Mr Larsen's premises, after Hansen's arrest for the Peak Hill murder, which is believed to have been stolen by Hansen, have all been identified; some as belonging to some ladies at Miss Hooper's school [5] at North Springwood, and others as the property of Mrs Hoare.

Murder of the little German on the Peak Hill road

Continued from page 12

The only article missed by Mr Larsen is a tomahawk which that gentleman states he could identify. It is hoped he may have an opportunity of seeing the tomahawk which is said to have been in Hansen's possession about the time of the murder."

***Nepean Times*, January 24, 1891**

"Murder will out! We note that Hansen has confessed to the murder of the little German on the Peak Hill Road. Who in our little community would have suspected that so quiet a man as Hansen would have been guilty of the several robberies here, much less the serious crime of murder."

****

Lars Peter Hansen, 30 years of age, was born in Denmark and arrived in Australia in about 1889. After leaving Springwood (probably with some of his purloined pieces), he went to Sydney where he stayed in lodgings with a German man, Charles Duncker, aged 23, and a Swedish man called Peter Petersen.

In 1889 gold was discovered in Peak Hill in Central New South Wales between Parkes and Dubbo, hundreds of people rushed there to seek their fortune, and the area rapidly expanded into a thriving town.

Hansen and Duncker decided to try their hand at prospecting but rapidly reached the conclusion that it was not for them – as Hansen put it to several people he met, "the diggings are all duffered out" and "there were too many people". [This was not exactly correct as gold mining is still continuing in Peak Hill] They decided to return to Sydney although Hansen told one man he was going to catch a train to Springwood.

In September, 1890, Hansen and Duncker walked along the road from Peak Hill to Dubbo where they intended to catch a train. Several people remembered seeing the two men, describing Hansen as a tall stout man about 6 feet 7 or 8 inches [200cm] high with a thick accent and carrying a heavy swag with a tomahawk strapped to it. One man said he looked fierce and frightening. Duncker, a short distance behind him and hurrying to catch up, was described as small and slight and carrying a light swag. The next morning some of these witnesses found the body of a man they believed was Duncker, lying on the remains of a fire with a knife nearby.

Hansen was immediately suspected of murdering Duncker and they finally found him working on the docks at Port Kembla.

He was known to be trying to earn enough money for his passage to Germany. He was wearing a cap he claimed to have bought from Duncker and admitted to the possession of a revolver, also bought from Duncker, which was in his box in Market Street. In the box they also found a number of pawn tickets for Duncker's clothes.

When arrested he said, "I no murder the little German". He was taken to Dubbo for the inquest and, on arrival at the railway station, was greeted with booing and hissing from the crowd. Duncker's body was officially identified by the Swede, Peter Petersen.

The knife was also identified as belonging to Hansen. The inquest into the little German's death concluded that "he was murdered by person or persons unknown". However, Hansen was immediately charged with the murder.

At the trial he pleaded not guilty and said in his defence, "I no guilty. I kill him to save myself". Mr Justice Stephen [son of Sir Alfred Stephen] passed sentence of death on him.

On June 2, 1891, Lars Peter Hansen, attended by Archdeacon Wilson, was led to the gallows of Dubbo Gaol[6] showing little anxiety or fear. When asked if he felt safe he replied, "Yes", shook hands and said, "Goodbye". He was asked if he had anything to say and he replied in his broken English, "I am not guilty of this murder. I die an innocent man and a Christian, and trust myself to Jesus Christ." Although death appeared to be instantaneous, the doctor said the heart had continued for some minutes after the drop.

ENDNOTES

[1] Mrs Alice Hoare, a wealthy widow, owned "Homedale", a handsome villa, valued at £5,600.0.0 in 1884, located at the corner of Homedale and Railway Parade. Mrs Hoare was the sister of John Frazer, benefactor of the Frazer Memorial Church. Edward Deane established the Blue Mountains Grammar School in Homedale in 1918. The house was demolished in 1975 to make way for Wingara, an aged persons' complex.

[2] "A cruet stand is a small stand of metal, ceramic or glass which holds condiments. Typically these include salt and pepper shakers, and often cruets or bottles of vinegar and olive oil." Wikipedia

[3] Gustav Larsen and his nephew Axel Bech were tobacconists in Balmain. They had come from Denmark and their country house in Springwood was "Elsinore" situated on the Bathurst Road on 4 acres of land with a frontage of 550ft stretching eastward from the first Public School (now the Springwood northern car park).

[4] Constable Illingworth's decision to search the grounds of "Elsinore" was prompted by Axel Bech's daughter falling in the water hole in the grounds. In retrieving the child Bech found portions of three empty trunks. He immediately reported this to the Constable.

[5] Miss Hooper's school for girls was "Hartlands" (now "Hartfields") on the Hawkesbury Road, Springwood.

[6] Dubbo Gaol 1871-1966 Eight men were hanged at Dubbo Gaol including Jacky Underwood who inspired Thomas Keneally's "Chant of Jimmy Blacksmith.

Blue Mountains Bi-centenary of Crossing Organisation Committee appointed

Blue Mountains City Council has now decided on the composition of the Bicentenary of Crossing Organisation Committee which is as follows:
Aboriginal community - Gai Marheine (Darug Community)

Chambers of Commerce - Graham Reibelt (Lawson), Tom Colless (Katoomba) and Lew Hird (Wentworth Falls)

Historical/Heritage sector - Susan Warmbath (Blue Mountains Historical Society), Robert Clarke (BM Branch National Trust of Australia) and Jean Arthur (Mt Victoria and District Historical Society).

Community representatives - Bruce Ferrier, Dr Siobhan Lavelle, OAM, John O'Sullivan, John Wakefield, OAM and Kerrin O'Grady

Heritage Identification and Protection – Revision of FAHS Heritage Handbook

Originally published in 2002 by the Federation of Australian Historical Societies (FAHS), this guide to heritage identification and protection is intended to provide a practical guide for local historical societies that wish to identify and protect local heritage places, objects and records. The revision is available from the web only: www.history.org.au/Heritage <http://www.history.org.au/Heritage> identification and protection.html

NATIONAL TRUST APPOINTMENT

National Trust of Australia (NSW) has announced the appointment of Maisy Stapleton as a new deputy executive director.

Joan Kent comes on board

Joan Kent of Little Hartley has accepted an offer to fill a vacancy on BMACHO's management committee.

Following an honours degree in history at Macquarie University, Joan spent five years as research assistant to Professor John Ward, then Vice-Chancellor and Challis Professor of History at Sydney University, followed by some years as a consultant historian engaged in the preparation of thematic studies and conservation plans.

An interesting period as the research historian at National Parks and Wildlife Service developed her interest in the conservation of the built environment, industrial archaeology and social history.

While living in the UK in the early 1990s she advanced this interest by completing a masters degree in social science (industrial archaeology) which, in between breeding alpacas is now utilised in assisting residents in the Hartley area in attempting to protect this highly significant region from the ravages of four-laned highways and concrete flyovers.

Joan and husband Tom have been members of the National Trust of Australia (NSW) for 30 years and she has served as secretary of the Lithgow Branch.

2.1 million Torrens Titles online

The system of Torrens Title is named after its creator, Sir Robert Richard Torrens who in the 1850s developed this unique method of registering land ownership.

Robert Torrens' experience in merchant shipping law stood him in good stead when it came to developing a way of replacing the English land law of the time that was complex, inefficient, time consuming and expensive.

Before the Torrens Title was formulated, a rather inaccurate chain of documents existed that meant all land dealings had to be examined and registered, then placed on public record.

With the Torrens Title system title to a property is created simply by registering or recording this ownership in a central government register.

This simple system proved to be so revolutionary that the Registrar General of NSW at the time, Christopher Rolleston, travelled all the way from NSW to South Australia to learn about it.

Although he was shipwrecked on his return trip he managed to survive and on his return formulated the new titling legislation for NSW.

In January 1853 the Real Property Act came in operation introducing the Torrens system of Title to NSW. Today, even though Australia is a federation of sovereign states, each state having a different system of land law, all are based on the same Torrens Title system.

After the first Torrens Title (Volume 1) was issued in 1863, it took 33 years to register the next 250,000 titles made up of 100 volumes. The next 1,875,000 titles (7500 volumes took 65 years to register.

There are 2.1 million records now available online and can be accessed on the SIX portal at: www.six.nsw.gov.au

The Torrens system of title is also one of Australia's most famous legal services exports operating in many overseas countries.

Mt Victoria exhibit recalls eccentric educator at Osborne Ladies' College

A collection of memorabilia, claimed as unique in the world, from Osborne Ladies' College formerly of Blackheath has been curated as an exhibition at the Mt Victoria and District Historical Society's museum.

The college was developed by Miss Gibbins in 1923 on 40 acres at Blackheath overlooking the Kanimbla and Megalong Valleys. It was renowned for being run in the tradition of the Royal Navy.

Miss Gibbins started a school at Bondi in 1910 initially for boys, but the school was later changed to girls. She later moved the school to Epping, changing the name of her school from the Epping Ladies' College to Osborne Ladies' College after the Royal Naval College, Osborne on the Isle of Wight.

The school uniform was in naval blue worn with Royal Navy Buttons.

Junior girls of the school were known as "Middies" from the term midshipman, with prefects being addressed as lieutenant and the head girl as captain.

Military courtesies applied with the senior girls being saluted. Miss Gibbins was known as "the admiral" while her governess, Miss Violet Everingham was known as 'the commander".

The rooms of the school were known by names of Royal Navy ships such as HMS Dreadnought, HMS Nelson, HMS Neptune, HMS Pelican, HMS Rodney, HMS Sirius HMS Sydney and others..

An emphasis was placed on physical fitness, Spartan living (only one room was heated at the school, the library) archery, shooting and dramatic arts.

The school was closed in 1958 following the illness and death of Miss Gibbins. The original building a hotel built in 1883 was destroyed by fire in 1963.

The exhibition curated by Mr Ron Brasier will be officially opened by Dr Peter Rickwood on Saturday, July 10.

The exhibition will be open to the public at the museum Railway Station, Station Street, Mt Victoria every Saturday and Sunday and public holidays and school holidays between 2 and 5 pm

National Family History Week

Blue Mountains Family History Society is planning a display in the Springwood Library for National Family History Week, from Friday, July 31, to Saturday, August 7, 2010. In addition, there will be two volunteers on duty each day to give personal assistance to members of the public wishing to research their family history world- wide.

Family History is not just family trees; the exciting part of family history is finding the stories behind the ancestors or putting "the flesh on the bones".

It is far more interesting finding out about the history and geography of the area/s your family came from, their occupations, anything that can be found to "bring them to life", so that they are not just a name, but a person. Of course, if there is a convict in the family, there is a wealth of information to be found and usually an easy trail to follow.

For further information, please contact Jan Koperberg jank@eftel.com.au or 02 4754 1544.

TAFE students to prepare marketing plan for Blue Mountains Historical Society

Blue Mountains Historical Society has enlisted the aid of students from two TAFE colleges to look at aspects of the future of the society.

Advanced Diploma in Marketing students are working on a marketing plan to grow the society. These mature students have already completed 3 years part-time study and are currently employed in the relevant sphere.

Another group, Diploma and Certificate IV TAFE students are creating a garden master plan for the future development of the Wentworth Falls site previously developed by Colin Slade in 1991.

These works will take a year to complete, under supervision of their tutors and the two master plans are expected to be completed by the end of this year.

To engage private professionals for these plans, the cost would be considerable. And as the society is gaining the enthusiasm of multiple, bright, young students it can be expected that the plans might be better than perhaps those of a single professional.

World War II in the Blue Mountains

In the 1920s and 1930s the Blue Mountains had a relatively small population in the townships along the highway and railway.

There were service centres, many guesthouses and holiday cottages, TB Sanatoria, etc. World War II saw many families and schools, including SCEGGS and Cranbrook evacuating from Sydney and relocating boarders in private homes, guesthouses, hotels, etc.

Workers from the Lithgow Small Arms Factory also occupied guesthouses on the Blue Mountains. Other guest houses were taken over as service hospitals, such as the Hydro Majestic for US servicemen and Sans Souci for the Brits. In Term 1 in 1942, Katoomba school had 350 new enrolments.

Blue Mountains Family History Society is compiling information about the Blue Mountains in this period and is seeking any personal stories, photographs and relevant information that can be used in the book that will be published. Please contact Joan Edwards joan.geofocus@gmail.com or Jan Koperberg jank@eftel.com.au

A Digger's Best Friend arrives at Eskbank House

The Australian War Memorial's travelling exhibition, *A Digger's Best Friend* will be open to the public every day until Sunday, July 25, 2010 at Eskbank House, Lithgow.

Opening hours are 10am to 4pm, Wednesday to Sunday. Group and school bookings are welcome.

"Lithgow City Council is delighted to host this exhibition", Neville Castle, Mayor of Lithgow Council said. "Curators of the exhibition have drawn together a fascinating array of images from the Memorial's National Collection, which have been specially chosen to suit the learning needs of children."

A Digger's Best Friend offers an A to Z of animals in war, from mascots and messengers to creepy-crawlies.

Animals are put to many uses in war. Sometimes they have jobs to do: the horses, camels, mules, and donkeys used to transport soldiers and equipment, as well as carrier pigeons and tracker dogs with their special talents.

While animals are often used as mascots and pets, or as symbols on badges and flags, *A Digger's Best Friend* also looks at those unwelcome animals, such as insects, rats, and wild creatures that make life in the field even more difficult and dangerous.

The exhibition has been developed with a young audience in mind, but visitors of all ages will enjoy its fascinating and moving stories.

The Australian War Memorial's Travelling Exhibitions Program is funded by the Australian Government's Commemorations Program.

For further information contact Naomi Parry, Lithgow City Council's Cultural Development Officer on 6354 9999 or e-mail: naomi.parry@lithgow.nsw.gov.au

Mt Wilson & Mt Irvine Historical Society Inc.

Notice of mid-year general meeting

A warm invitation is extended to all members and friends to the Society's mid-year general meeting with guest speaker, Associate Professor Ian Jack.

Saturday, 31st July 2010 at 10.30am at the Mt Wilson Village Hall, The Avenue, Mt Wilson

11.00am **General meeting** with committee reports and an update on the Society's ongoing projects and activities. We are especially pleased to announce the awarding of Honorary Life Memberships to Arthur Delbridge and Bruce Wright.

12.00noon **Guest speaker** Associate Professor Ian Jack, President of the Royal Australian Historical Society will tell us about his recent research on the history of ***Fernmount*** at Kurrajong. This historic property was created in the 19th Century by William Scott, the very interesting Government Astronomer, Warden of St Paul's College and maverick clergyman. It seems that ***Fernmount*** attracted similarly unusual owners in the twentieth century.

Members and guests are invited to enjoy a warming lunch after the presentation. There will be a gold coin donation at the door to cover costs.

FOR CATERING PURPOSES, PLEASE LET US KNOW IF YOU ARE COMING MARY REYNOLDS: 4756 2006 / HELEN CARDY: 9871 3661 OR FLORENCE SMART: 4756 2063 EMAIL: westring@bigpond.com

MILITARY MEMORABILIA DISPLAY

Blue Mountains Historical Society Inc. is organising a display of military memorabilia at Tarella, Wentworth Falls for Saturday, September 18.

The society is seeking additional material from members and anyone who may have items of interest is asked to contact Susan Warmbath on 4757 3402.

Dig finds world's oldest leather shoe

It is size six, has lace up design, and was worn more than 1000 years before the pyramids were built in Egypt.

Dated at 5500 years old, it is the world's most ancient leather shoe.

Its owner apparently cared enough about it to stuff it with grass to keep it in shape while in storage.

The well-preserved shoe made from a single piece of cow hide and worn on the right foot was unearthed in a cave in Armenia and studied by a team led by Dr Ron Pinhasi of University College Cork in Ireland.

While the shoe is small, about a woman's size six, it was not known whether it belonged to a woman or man. Dr Pinhasi said. "The shoe could have well fitted a man from that era."

It was discovered along with household goods, including large containers, many of which held wheat, barley and apricots. A bone from a deer, with some meat still attached, two horns of a wild goat and fish bones were also found near the shoe.

The contents of the cave had been covered with a thick layer of sheep dung, which had kept them dried and preserved for thousands of years, said the researchers, whose study is published in the science journal PLoS ONE.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Avenue, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Prof. Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Historical Society Inc, Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum Inc, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc, Mt Wilson and Mt Irvine History Society Inc (including Turkish Bath Museum), Mudgee Historical Society Inc, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians inc, Transport Signal and Communication Museum Inc., Two Centuries of Elegance, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2010-11 is: John Leary, (president), Ian Jack (vice president), Jan Koperberg (secretary), Kathie McMahon-Nolf (treasurer), Jean Arthur, Joan Kent, Doug Knowles, Dick Morony (public officer), Barrie Reynolds and Peter Stanbury. **AUDITOR:** Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.
HERITAGE is BMACHO's official newsletter.

Some heritage links of Mount Tomah Botanic Garden

by Rob Smith, Mount Tomah Botanic Garden Director

Situated on a mountain top in the Blue Mountains, Mount Tomah Botanic Garden has many links with the long history of this region. This article will discuss only some of these links.

Mount Tomah has been covered in luxuriant rainforest from earliest times. George Caley, Sir Joseph Banks's collector in Sydney crossed the Devils Wilderness[1] and camped on Mount Tomah in 1804.

He described the tree ferns and rainforest vegetation in his journal and called the massif, Tree Fern Hill.

Tomah is the Darug word for tree fern[2]. The mountain is thought to have special significance to Darug people and there are many signs of occupation around the springs, rainforest and associated sandstone cliffs.

Mount Tomah was also part of the network of trails Aboriginal people used to traverse this rugged country now known as the Blue Mountains.

Pictured is the pencil orchid Dendrobium fairfaxii. Photograph courtesy Tracey Armstrong, Mt Annan Botanic Garden.

On the Bells Line of Road approaching Mt Tomah circa 1920s. Photograph courtesy NSW Government Printing Office.

There are sites in the area recorded with occupation dates of about 9,000[3] years ago.

In 1871, Robert Ftizgerald visited Mount Tomah and collected a new species of orchid. Baron Ferdinand Von Mueller and Robert Fitzgerald named this orchid species in honour of the work of the Fairfax family in supporting science, and the arts. They named the pencil Orchid *Dendrobium fairfaxii*.[4]

This species of orchid is growing in the Jungle today. This type description was published in the *Sydney Mail* of 1871 and the holotype is held in Melbourne Botanic Garden Herbarium.

By the 1920s the farmer who owned the then 280-hectares of warm temperate rainforest, adjacent to what is now the botanic garden, was made an offer by a timber company wanting the trees for timber. Concerned citizens decided to act.

They formed a company, The Jungle Limited[5] to buy the forest for £5000 half of which would be raised through £25 - £100 shares.

The rest would be raised by using a mortgage to be repaid from the expected revenue from a tea house to be built and operated on the site.

In 1929, 91 cars a day traversed the unsealed Bells Line of Road.

The above photograph taken at the now entrance to the botanic garden shows the look of the forested and fairly rough track that Bells Line was then.

From the president's pen.....

Macquarie's convict sites featured in additions to World Heritage Listing

The recent addition of 11 more Australian sites to UNESCO's World Heritage Listing should be seen by all conservationist and heritage enthusiasts as a welcome and truly aspirational achievement.

Together the sites represent the global phenomenon of convictism - the forced migration of convicts to penal colonies in the 18th and 19th centuries - and global developments in the punishment of crime in modern times.

The *Australian Convict Sites* are the preeminent examples of our rich convict history, with more than 3,000 convict sites remaining around Australia.

This is unique in the world today. In 2007 the importance of the Australian convict memory to all humankind was recognised when some of Australia's convict records were included in *UNESCO's Memory of the World Register*.

Of the 11 sites that make up the World Heritage *Australian Convict Sites*, four are in NSW with several having links to Lachlan Macquarie, so often called the "nation's builder" and whose 200th anniversary of his swearing-in as Governor of NSW is being celebrated this year. The sites are:

*** Old Government House and Domain, Parramatta**
This site is made up of five buildings and extensive archaeological remains set in 55 hectares of parkland (the Domain). Old Government House is a two-storey rendered brick building in Georgian style, restored to represent the Macquarie period. Around 100 convicts lived in huts and worked there during the convict era.

The site is a powerful symbol of the penal colony of NSW and is closely associated with efforts to reform and rehabilitate convicts during the Macquarie era. It had been occupied by governors from Captain Arthur Phillip in 1788 to Governor Denison in 1856.

***Hyde Park Barracks, Sydney**
Hyde Park Barracks is Australia's first government-built convict barracks, and the only remaining barracks building and complex from the Macquarie era of convict administration. It marked a turning point in Australia's management of transported convicts from Britain. It is also significant because it was designed by Australia's first architect Francis Greenway, and is regarded as one of his best works.

***Cockatoo Island convict site, Sydney Harbour**
Cockatoo Island was created as a penal settlement in 1839 for re-offending convicts. It was an ideal location for hard labour - isolated and secure, easy to provision, yet close to the heart of the colony's major population centre.

Convicts and colonial prisoners quarried massive areas of sandstone, excavated and helped to build a dockyard and constructed about 20 underground grain silos. Some were sentenced to solitary confinement in underground cells built into the sheer sandstone cliffs. After the abolition of transportation to NSW in 1840, Cockatoo Island operated as a penal settlement for convicts completing their sentences and for ex-convict and other colonial prisoners.

*** Old Great North Road, near Wiseman's Ferry adjacent to the Hawkesbury River**
The Great North Road was built from Sydney to the Hunter Valley by convicts between 1826 and 1836. It was part of an ambitious road building program to open up fertile farming land for free settlement and improve transport and overland communication in the colony. Convicts worked in gangs on the Great North Road - some in leg irons - quarrying, excavating and building in laborious and tedious work that created a major engineering structure in the rugged landscape.

The Old Great North Road site is made up of a small portion of around seven and a half kilometres of the original 250 kilometre road. The site incorporates the Devine's Hill section (built 1829-32) and the Finch's Line section (built 1828 and subsequently abandoned).

It is an impressive landscape that retains qualities of the physical environment in which the convict road builders laboured. Still visible are the massive retaining walls of large sandstone blocks, quarried cliffs with triangular shaped marks from the hand-driven drill for blasting holes and stretches of chiselled gutters and remains of around 40 stone culverts. Convicts left their mark with graffiti, and some of this can still be seen on sandstone blocks today.

The other sites are: Kingston and Arthur's Vale historic area (Norfolk Island), Port Arthur historic site (on Tasmania's Tasman Peninsula), Cascades Female Factory (Hobart), Darlington Probabation Station (Maria Island –Tasmania), Coal Mines historic site (Premadeyna – Tasmania), Brickendon Woolmers Estates (Longford – Tasmania) and Freemantle Prison (Western Australia).

Botanic Gardens Trust buys Jungle

Continued from page 1

On March 23, 1929 the Governor, Sir Dudley de Chair, unveiled a plaque alongside the Fairfax Walk (the late Sir James Fairfax owner of the Sydney Morning Herald had been a major backer of the project).

The Fairfax Walk was a set of paths winding from the tea room to what was dubbed 'The Temple of Nature'. With the depressed economy of that time the business closed 1934 and the land was resumed.

In 1972 Alfred and Effie Brunet donated 33 hectares of land to Royal Botanic Gardens to make a cool climate botanic garden at Mount Tomah. They had managed the property as a cut flower farm and nursery at Mount Tomah since 1934.

When they donated their property to the Royal Botanic Gardens in 1972, many of the original buildings were demolished or moved.

A large corrugated iron shed was moved to the adjacent property, the Jungle.

In 2009 the Jungle Property was purchased by the Botanic Gardens Trust, funded by a generous donation from John and Libby Fairfax as well as the NSW Environmental Trust.

After much work, a part of the original path system was reinstated and linked to paths from the Botanic Garden.

This was re-opened to the public exactly 80 years to the day by Professor Marie Bashir AC, Governor of NSW, on March 23, 2009 and named the Lady Vincent Fairfax Walk

Effie ad Alfred Brunet with George Townsend in front of their cottage.

This also meant the heritage building the Brunets had owned and used for 34 years as a nursery building was returned to public ownership.

Now visitors to the botanic garden can see this fine example of nursery buildings of the period. It will soon be interpreted for visitors to Mount Tomah Botanic Garden and can be seen when visitors take a stroll on the Lady Vincent Fairfax Walk.

The acquisition of the Jungle, so it is now part of Mount Tomah Botanic Garden through the generosity of John and Libby Fairfax marked the completion of the first Botanic Bicentenary Project for Botanic Gardens Trust at Mount Tomah.

State Governor opens Hobby's Reach Research Centre

Her Excellency, Professor Marie Bashir, AC,CVO, Governor of NSW officialy opened the Sadler Wing of the Blue Mountains Historical Society's Hobby's Reach Centre on Saturday, September 11, 2010.

The wing named after the late Geoff Sadler, a local historian and former treasurer of the society was built with the assistance of a grant from Arts NSW, a grant which Geoff had worked hard to obtain.

The late Geoff Sadler left his considerable library to the society which will be housed in the new extension.

A pictorial archive of the Blue Mountains

by Graham Warmbath - President, Blue Mountains Historical Society Inc.

To the historian, a photograph is a story without words.

The Blue Mountains Historical Society has a collection of 7000 photographic images in Hobby's Reach Research Centre at Wentworth Falls. Each one is a historical document - visual evidence to help place people, events and buildings at a moment in time.

While the collection is predominantly a local history archive, it includes photographs of national significance and examples of early photographic techniques. To shed light on the latter, calls for a little historical context:

In Persia around 1000AD, the Father of Optics, Alhazen, described a 'dark chamber' with an aperture through which sunlight can project an image from the outside onto a 'screen' within - the camera obscura.

Moving on, in 1727 a German anatomist, JH Schulze, noticed that light darkened silver salts. Then the French inventor Nicéphore Niépce, used a camera to make a view from his window on a pewter plate.

Centennial Cottage gardener, William Wright (with friend), H Phillips. 1909. - Blue Mountains Historical Society Collection

"Sometime ago, ***HERITAGE*** asked the author of this article,Graham Warmbath how he became interested in history and the following was his reply :

"You ask me how I became interested in heritage? My answer is 'over time'! I learnt from Scottish ghost stories and English antiques.

"On Blaxland Road, a green road sign inscribed 'museum' led me to Hobby's Reach. What did that mean? I had to find out.

"Visit Hobby's Reach Research Centre and more than one new tale unfolds -Lieutenant Hobby's 'long reach, quite straight' road for a start; how Mr Vaniman photographed Katoomba with his immense camera from the top of a twenty five foot pole - and even more from the three-dimensional evidence of 1890s Tarella cottage in the grounds outside.

"Histories and things that have been valued are keys to a proper understanding of today, because they unlock circumstances that have given rise to today.Without understanding this, it is impossible to see a way forward."

It was 1822 and Niépce called his image, a heliograph. In 1839, another Frenchman and a chemist, L-JM Daguerre, also used a camera to expose a silver-coated copper plate which, once developed and fixed, produced a one-off, no negative, lasting image:

'You are aware that iodine is used in Daguerre's process for getting the solar drawing on his silvered plate. Who could have anticipated that the discovery of a violet-coloured gas in the refuse of kelp would lead to such important results?' asked Sir John Franklin in the Tasmanian Journal of Natural Science of 1842.

Finally in 1840, a British inventor, WH Fox Talbot, achieved a negative-to-positive image and produced the first coated-paper photographs - he did not explain how 'coated' - but he used a camera to expose a sensitised paper, developed a negative image and then, by contact printing to another sensitised paper, a positive. This realised the potential of producing multiple positive images, and popular photography was born.

It was 1841 when Captain Lucas of the French barque *Justine* took Australia's first photograph (of Bridge and George Streets, Sydney) using Daguerre's process.

In the following year, George Goodman, Australia's first professional photographer, advertised 'Photographic Portraits taken by the reflection of light'.

The earliest image in the Blue Mountains Historical Society's collection is the portrait of a lady, a daguerreotype, the process favoured by richer people because its image was unique, dated around 1850.

Next is a carte-de-visite print on albumen-coated card, dated around 1853. The pièce de résistance is a portrait of Queen Victoria's second son, Prince Alfred (the royal visitor who was shot at Clontarf on March 12, 1868), on glass. Mitchell Library Curator of Photographs, Alan Davies, has identified this as a unique wet collodion image of around 1864.

The collection's earliest black and white image on paper is of solitary One Tree Hill, taken by an unknown photographer around 1869.

By the way, John William Berghofer - after whom the Pass is named and who initiated the 1913 celebrations of the crossing of the Blue Mountains - reputedly said that the name One Tree Hill 'attracts tourists'.The society holds an elegant portfolio of Joseph Bischoff's large-scale prints of the Grose Valley and surrounds.

Continued page 5

Earliest image dates back to 1869

Continued from page 4
These were taken during Frederick Eccleston Du Faur's 1875 expedition, designed to entice artists and photographers to record Blue Mountains' scenery for display at the Philadelphia Exhibition of 1876.

To get these photographs, the expedition relied on donkeys to carry camping and cumbersome photographic equipment down the Engineer's Track and into the Valley.

HMAS Australia entering Sutherland Dry Dock, Cockatoo Island 1919. - Blue Mountains Historical Society Collection

Also held by the society is an original collection of Mount Victoria photographer Ebenezer Caney's sepia toned albumen prints of Jenolan Caves scenery, dated about 1882; a tintype album of around 1880, containing thirty six postage stamp size individual portraits - the technique was extremely popular in America and not expensive; a photograph of the Explorer's Marked Tree by Charles Kerry, dated 1885 - Kerry made photographs into postcards which are much valued by collectors today; a stereograph by Judge Docker of his daughters Muriel and Rosamund with Mrs Vivian viewing the Three Sisters, dated 1898; and a Frank Hurley montage of Ross and Keith Smith's biplane flight over the Three Sisters, dated 1920.

There is also Melvin Vaniman's two framed, nationally significant panoramic photographs by this American photographer hung at Hobby's Reach Research Centre. *The Mountaineer*'s report of November 27, 1903 follows:

'For some time past a pole 80 feet high has been standing in the high part of the Katoomba Park, and all that was known of it was that it was for taking a photograph of Katoomba.

'It has been standing for some time waiting for an opportune day, and was utilised on Wednesday last.

'We saw the photographer, Mr Melvin Vaniman from San Francisco, USA, who is under special assignment with the New South Wales government and railway commissioners, and had the pleasure of seeing some of his unique work.

'These are panoramic pictures taken on one plate 48 x 16 inches, and embracing a panorama of over 190 degrees.

'Some idea of the vastness of the panorama can be obtained when we explain that a picture was obtained of Katoomba Falls and the surroundings which take in the top Lookout, the Falls, the Three Sisters, the Broken Wall, Mount Solitary and round to the Orphan Rock. This will be the finest view of Katoomba Falls in existence'. But it is the profusion of Harry Phillips' work from 1909 now held by the society which perhaps outweighs that of other photographers of mountains scenery.

Phillips fell in love with the Blue Mountains during convalescence after a hand injury prevented him continuing a printing career.

The society has a prized store of his glass photographic plates, several fine albums and many of the distinctive overwide brochures with which he publicised the mountains.

Phillips was inspired by the seas of mists periodically rising from the valleys, temporarily marooning the ridges, and also by the drama of cloud formations. Even so, his pastoral picture of wildflowers at Mt Wilson, dated 1920, remains one of my favourites.

Here I must pause, knowing that I have not mentioned such magical images as those of the gold prospector at Lithgow, the *Cutty Sark* at Circular Quay, Sydney's ratcatchers, the Pickwick Club on a bushwalk, or the first train over the mountains. While historians evaluate content and photographers process, I have applied but one empirical criterion in selecting images for description here: 'does the image please?'.

Hobby's Reach is open to all on Tuesday and Friday mornings throughout the year.

Crossing of the Blue Mountains and opening up the west 1813 - 1815 commemoration

The Royal Australian Historical Society earlier this year offered to co-ordinate activities to commemorate the bicentenary of the first European crossing of the Blue Mountains and appointed its senior vice president Professor David Carment to oversee this role.

At a meeting of BMACHO's management committee in June it was suggested that the RAHS might convene a meeting of interested parties from Penrith through the Blue Mountains and Lithgow to Bathurst so that the commemoration could have lasting benefit.

It was also strongly felt that the commemoration should not only be of the period of the first crossing but should include recognition of the surveying and road construction which opened the way to the west and ultimately Macquarie's visit to Bathurst and his proclamation of that town in 1815

President of the RAHS, Associate Professor Ian Jack convened a meeting in Sydney in late July which was attended by representatives from local government, historical societies, the Land & Property Management Authority (Bathurst) and BMACHO.

A number of representatives at the meeting indicated consideration was being given to various ideas while it was noted that the RTA had been surveying Cox's route as a possible walking trail.

Penrith's mayor, Cr Kevin Crameri and Penrith City Council's local studies librarian, Lorraine Stacker indicated a number of activities were already being planned to commemorate the start of the first crossing from Emu Plains.

The president of Hartley District Progress Association, Ramsay Moodie also indicated a public meeting had recently been held to discuss commemoration activities.

RAHS manager, Mari Metzke commented on the concept of the Great North Walk from Sydney Harbour to the Hunter Valley which could be used for a western walk including the various crossings and descents.

National Trust branches at Lithgow and Blue Mountain have been discussing for some years commemorations of the completion of Cox's Road.

The next meeting of the RAHS group will be held in Penrith later this month and those societies or heritage groups interested in proposing ideas for the commemoration will be invited to this meeting.

Neolithic beer

An American brewery has re-created a 9000-year-old beer after claiming to have analysed Neolithic pottery found in China.

Chateau Jiahu was brewed from wildflower honey, Muscat grapes, barley malt, hawthorn fruit and chrysanthemums.

Dr Patrick McGovern, a biomolecular archaeologist, came across the pottery shards on a trip to China 10 years ago. *Telegraph* London

National Library Australia calling for contributions to Australian newspaper service

The National Library of Australia is now inviting contributions to its Australian newspapers service.

This service provides free online access to digitised Australian newspapers through Trove trove.nla.gov.au, the national resource discovery service.

With 40 million articles from over 100 newspaper titles representing every Australian state and territory scheduled to be in the service by June 2011, Australian newspapers will enable users to explore online an unprecedented quantity and range of Australia's newspaper heritage.

From July 2011, the National Library will be implementing a model which enables other libraries and institutions to fund digitisation of specific newspaper titles.

The Australian newspapers service is part of the Australian Newspaper Plan <http://www.nla.gov.au/anplan>), a cooperative endeavour through which Australian libraries collect, preserve and provide access to Australian newspapers.

For further information about how to contribute to the Australian newspapers service, please see the Contributor Guidelines (http://www.nla.gov.au/ndp/get_involved/documents/ANScontributorguidelines2010final.pdf) and Factsheet (http://www.nla.gov.au/anplan/documents/Benefits_of_ANDP_Model_for_Contributors_000.pdf), or call the National Library on 02 6262 1685.

COUNCIL TO GET HERITAGE ADVISORY COMMITTEE REPORT

There has been considerable discussion in recent years between BMACHO and senior staff at Blue Mountains Ciity Council concerning the establishment of a heritage advisory committee.

Last month following a preliminary report, council resolved that the staff produce a further report on BMACHO's proposal before the end of March 2011.

JOHN ROSS, CONVICT LABOURER ON THE COX'S ROAD IN 1814

By Jan Koperberg

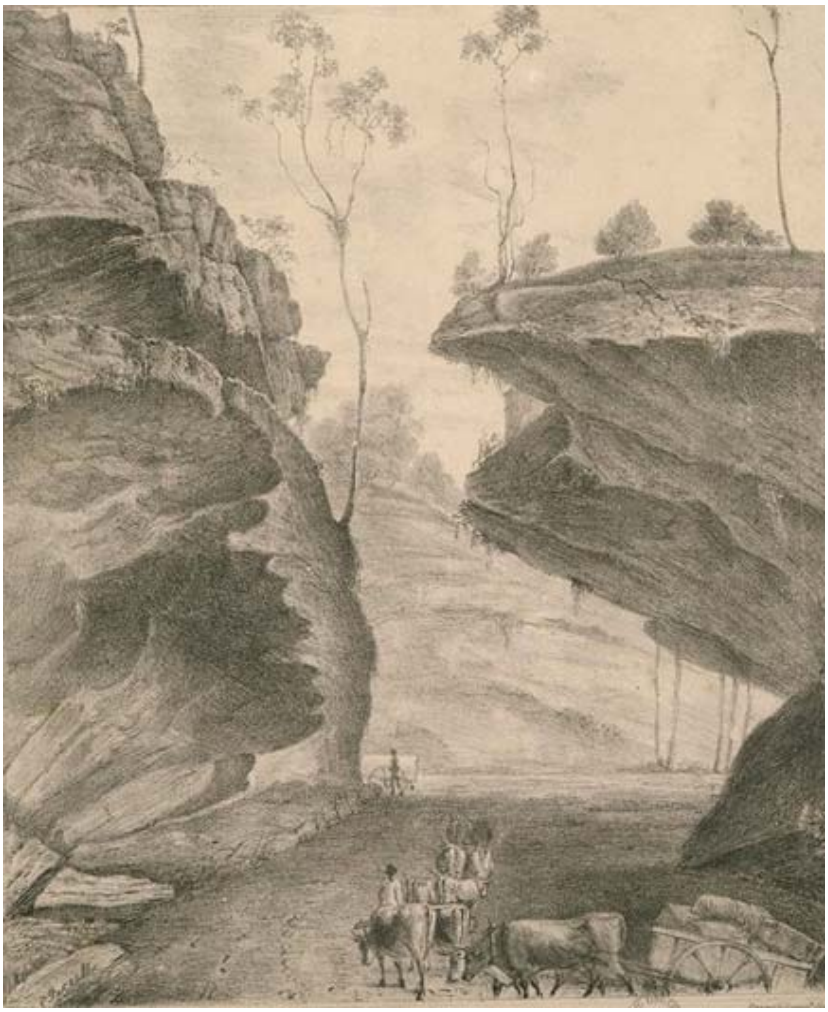
When I first started to research my family history little did I expect to find an ancestor who had been found guilty of highway robbery, sentenced to hang, later to be commuted and transported to the colony of New South Wales finally ending up as a labourer on the first road over the Blue Mountains in 1814.

Searches into my ancestry found that my third great grandfather was John Ross born c.1784, in County Tyrone, Ireland.[1.]

In 1805, he was charged with highway robbery, which led him to be tried at Salop Assizes, Shrewsbury in County Shropshire, England.

John pleaded not guilty, but was found guilty, to be hanged, no goods. No goods meant John had no possessions to confiscate. On March 23, 1805 he was sentenced to death, but this was commuted.[2.] John Ross was sentenced on October 8, 1805 to transportation for the term of his natural life.[3.]

The Shropshire Lent Assize, March 23, 1805, No 112, A Calendar of The Criminal Prisoners, In the Custody of Richard Cartwright, Keeper of his Majesty's Gaol for the County of Salop, Thomas Whitmore, Esquire, Sheriff records: *"No 20. John Ross, aged 22, In his Majesty's Army of Reserve, born in Ireland. Condemned and reprieved."*



Reproduced above with permission of Mitchell Library, State Library of New South Wales is a watercolour by E.Purcell titled -Part of Cox's Pass, New South Wales, 1821 (Ref: SV1B/Blu M/21.)

"Charged upon the oath of John Edwards, of the Parish of Oldbury, in the said County of Salop, labourer, with having in the night between the 12th and 13th days of February, 1805, violently assaulted him the said John Edwards, on the king's highway, in the Parish of St. Mary Magdalen, in the town of Bridgnorth, in the said County of Salop, put him in fear, and taken from his person about thirteen shillings and sixpence in money: committed until the next assizes to beholden in and for the said County of Salop, or until he shall be thence discharged by due course of law, the 13th day of February, 1805, by Thomas Carter, Gentleman, Bailiff."

Continued page 8

ABOUT THE AUTHOR AND RESEARCHER

The author and researcher of this article, Jan Koperberg has lived in the Blue Mountains since 1967, where she raised her family and worked in a medical practice for 30 years.

She retired from full time work at the end of 2005, which is when she started family history research in earnest.

Research into family lines have produced links to England, Ireland, Scotland, Denmark and Sweden, with a distant cousin in Chile.

Jan is the vice president and former secretary of Blue Mountains Family History Society Inc., a committee member NSW & ACT Association of Family History Societies Inc. and is currently secretary of BMACHO.

Convicts praised in 'Memoirs of William Cox'

Continued from page 7

From the Shropshire General Quarter Sessions, October 8, 1805, No 110, A Calendar of the Criminal Prisoners, In the Custody of Richard Cartwright, Keeper of His Majesty's Gaol for the County of Salop, Thomas Whitemore, Esq. Sheriff records:

"Sentenced to be Transsported [sic]: *No 24. John Ross, aged 22, During the term of his natural life."* [4]

The Convict Indent states that John Ross was transported on the *Duke of Portland* and arrived in the colony in 1807.

His native place was given as Co Tyrone, his trade as weaver, his hair colour brown, his eye colour hazel, his height 5ft 5 in tall and his complexion ruddy.[5]

The ship *Duke of Portland* departed London on February 26, 1807 and arrived in Sydney NSW on July 27, 1807. The ship's master was John Clark Spence. The voyage took 189 days.[6]

John Ross was to survive the sea journey and in the General Muster of NSW, Norfolk Island and Van Diemen's Land 1811, John Ross is recorded as being a resident of NSW with the status of 'convict; having arrived on board the *Duke of Portland* after his trial Shrewsbury' where he had been sentenced in February 1805 to 7 years imprisonment, although in fact it had been for life.[7]

On January 24, 1812 a son, William, was born to John Ross and Elizabeth Bennett, in Windsor, NSW.

There is no birth registered with NSW Registry of Births, Death and Marriages. However, St Matthew's Church of England, Windsor records William's birth January 24, 1812 and his baptism August 15, 1813, The minister at the time was Rev Robt Cartwright.[8]

Elizabeth Bennett had been tried at the Devon Assizes, Exeter, County Devonshire. She pleaded not guilty, but was found guilty of grand larceny, to be transported for a term of 7 years.

Cox's Pass site of railing which stretched across the drop to the rock in background. This was in place to keep stock on the road. Photograph by Jan Koperberg, May 2010.

She arrived in the colony on the *Canada* on September 8, 1810. [9]

On July 5, 1813, the marriage of John Ross and Elizabeth Bennett, by Banns, is recorded in the register of St Matthew's Church of England, Windsor.

They were married by the Rev Cartwright and the witnesses to the marriage were James Vincent, Thos Holding and John Holden. Both John and Elizabeth put an X mark, so neither could write.[10]

On July 10, 1814, a daughter, Mary, was born to John and Elizabeth Ross, at Windsor, NSW.[11] Mary married Isaac Perrett, at Christ Church, Newcastle, NSW, on October 11, 1831. [12] Isaac was transported to Australia on the *Hadlow* in 1818.

He was a native of Gloucestershire, England.[13] Isaac was later recorded as a Constable, Bush Constable and Farmer at Patricks Plains. [14]

The General Muster of NSW 1814 records John Ross of Windsor still with the status of convict being 'on stores at the Mountains.[15]

The men who were receiving 'stores at the Mountains', were the men building the first road and Governor Lachlan Macquarie decreed that no one else was to enter the area and interrupt their important work.

John was a labourer on 'The Road', having been selected as being accustomed to field labour and supposed to be accustomed to undergo the fatigue of hard work and sleeping on the ground. The reward – Emancipation.

The following extracts are taken from 'Memoirs of William Cox, J.P., Lieutenant and Paymaster of NSW Corps or 102nd Regiment, Late of Clarendon, Windsor':

"Dec 10 Fine day; wind west. Finished the bridge over the east branch, 22 ft long, 13 ft wide. Carpenters, etc., made a good strong job of it. The working bullocks strayed and not found till sunset. Sick: P Hanragan, J Tindall, H Morton. Ordered six married men to go back to the mountain to finish the road down it to the valley. When done, they are to be discharged – S Parker, J Ross, J Tindall, P Hanragan, P Marman and J Watkins. Also ordered J Wilson to go forward on Monday with nine others road-making.

"Dec 11 (Sunday) At 6am sent six men back to the mountain to complete the road. At 7am sent 10 men forward to encamp at Blaxland's Mountain, under Watson's charge. … …"

Continued page 9

Road work was hard - the prize, emancipation

Continued from page 8

"Dec 15 Loaded the three carts, and sent them forward at 6am At 7am went forward myself and came up with the party at the 10-mile, to which they had completed the road, except turning some rock out of it after you ascend the hill at Blaxland's Mountain. Returned at 10, and sent forward three men with crowbars, pickaxes, etc. to complete the road, and remain with the party ahead. J Allen very ill; ordered him back from Mr Hobby's party to mine. At 1pm one of the party at the mountain came to report they had finished their task. Sent Lewis back to examine it, and found it completed. Gave them their discharge (six men), and sent a cart with them as far as the Nepean, to carry their bedding. A dull, heavy day, with light rain in the afternoon. Men worked well at the bridge and causeway to it." [16.]

There is an overhanging rock on Cox's Pass, where the road builders would have been able to sleep and dry their bedding, which would have been an improvement to sleeping in the open, under all weather conditions.

That part of the rock overhang features in the sketch *Part of Cox's Pass*, by E Purcell held by the National Library of Australia at http://catalogue.nla.gov.au/Record/2034425

John Ross would have been very pleased to return to the Hawkesbury, to his wife Elizabeth and children William and Mary, who was born only 5 months earlier.

Although the work was hard, the hours long and the weather cold and wet for a good part of the time, the men were well fed, clothed and cared for by William Cox.

He knew he would benefit by treating them well and they in turn had the enticement of emancipation as encouragement. William Cox was a kind and caring man, who had great insight and understanding of human nature.

John Ross received a Conditional Pardon from Governor Lachlan Macquarie, on June 5, 1815. All the other information given on his Convict Indent was recorded on his Pardon, No 585. [17.]

On September 16, 1816, John Ross is recorded in the St Matthew's church register, as a witness to the Marriage by Banns of John Foley and Frances Johnson, performed by the Rev Samuel Marsden. Once again he witnessed with his X mark. The bride was the only member of the bridal party able to sign. [18.]

In 1817 a son, John was born to John and Elizabeth Ross and on January 24, 1819, a daughter Jane was born, both at Windsor, NSW.[19.]

The State Records of NSW holds a memorial written for John Ross to Governor Lachlan Macquarie.

Patty Lane of Newcastle and Jan Koperberg, both descendants of John Ross at Cox's Pass. Pick-marks some made by a left-handed man can be seen in the rock carved gutter.

It states: *John Ross per 'Duke of Portland' 1807 of Richmond, 1820 May 26, Memorial*

"To His Excellency Governor Macquarie
The humble memorial of John Ross Most respectfully showethThe Memorialist arrived in the Transport ship 'Duke of Portland' in the year 1807. That he lived several years with Mr G W Evans, Deputy Surveyor, at Hobart Town, then residing at Richmond, that he was emancipated for his services at Bathurst under William Cox Esquire, since which he has endeavoured to support himself and his wife and 4 children, by his honest industry and by renting a few pieces of land, but having suffered very severely by the late floods he is induced to solicit Your Excellency to be graciously pleased to grant him a portion of land, by which he may be enabled to maintain himself and family by his labor. And memorialist will ever pray John Ross

We certify to His Excellency the Governor that we consider petitioner as coming with [sic] the meaning of the General Order of the 20 May last and recommend him accordingly.

Wm Boggs
John Cross Chapn
Richmond 26th May 1820"

(1817 has been crossed out and 1820 written above) Written on left corner is '*50 acres*'. [20.]

A son, George, was born to John and Elizabeth Ross, in Windsor, NSW on July 31, 1822. [21.]

By 1822 the General Muster and Land and Stock Muster of NSW recorded John Ross as a landholder with the following property at Windsor: G L & P (Grant, Lease and Purchase), Resident on Farm. Acres in:
Wheat 2-3/4, Maize 3, Pease/Beans ¼, Pots ¼,
Cleared Ground: 13-1/2, Total held: 46-1/2.
Stock: Horses 4, Horned Cattle 12, Hogs, 10.
Bushels of grain in hand, Maize 14.[22.]

Continued page 10

John Ross, landholder, employs convict labour

Continued from page 9

In the 1823, 1824, 1825 General Muster List of NSW John Ross is recorded with the status of 'landholder' at Richmond, while his wife Elizabeth Bennett had the status of 'free by servitude'. By then the family had increased to include William, Mary, Jane and George.[24]

In the Index & Registers of Land Grants – Leases & Purchases 1820 – 1856 the listing indicates John Ross land grant at Richmond was 1 acre, 1 rood, 1perch in size.[25]

John Ross is not mentioned in the 1828 census of NSW and it is probable he may have been moving his family from the Hawkesbury district to the Hunter Valley district.

He most likely travelled the newly completed Great North Road and was probably on the road when the census was taken.

In 1829, a daughter, Elizabeth was born.

In extracts from the Baptism Register, Parish of St Peters, East Maitland, Hunter Valley, NSW, a baptism is recorded for Elizabeth Ross dated February 10, 1829, father John, mother Elizabeth, abode Darlington, (which is on the northern side of the Hunter River, Singleton), father's occupation was given as farmer. [26]

In the Convicts & Employers (NSW) Index: 1828, 1832-1833, Jan 1838-Jan 1844 by Pastkeys: *ROSS John, an employer, received on 28 August 1833, Assignment Male, at Patricks Plains, a seaman & a farming man* (Government Gazette). [27]

So John was obviously in a position to not only feed and clothe his family, but was able to feed and clothe farm help, in the way of convict labour.

The 1834 and 1837 postal directories list the family as living at Patricks Plains and receiving mail at Darlington Post Office.[28]

John Ross died intestate on March 15, 1834 and administration was granted on November 16, 1842 to Elizabeth Ross, his widow. [29]

He is buried at Whittingham Cemetery, near Singleton NSW. The headstone for John and Elizabeth Ross is engraved with the words:

> *To the memory of*
> *JOHN ROSS*
> *who departed this life*
> *March 15th 1834 50 years.*
> *Also to the memory of*
> *ELIZABETH ROSS*
> *wife of above*
> *who departed this life*
> *August 15th 1864 79 years.*
> *Therefore be ye also ready to for such an hour*
> *as ye think not the son of man cometh*

It is a sandstone headstone and the inscription is very, very worn. It is in front of the grave of Benjamin Singleton and also near the headstones and graves of Perrett relatives.

Elizabeth Ross survived her husband, John, by 30 years and is buried with him at Whittingham Cemetery. She was living at Newington, near Singleton when she died.[30]

I am in awe of the achievement of William Cox and his 30 convict workers who built the first road over the Blue Mountains in six months. John Ross was my third great grandfather in my maternal grandmother's line.

My grandmother was born at Patricks Plains in 1880, the thirteenth child of George Perrett and Amelia Leary. George Perrett was born at Patricks Plains in 1832, the son of Mary Ross and Isaac Perrett.

I am thankful that Lachlan Macquarie was governor at the time and William Cox was the road builder.

ARCHDUKE FRANZ FERDINAND'S VISIT TO THE MOUNTAINS

Contributed by Peter Chinn

Perusal of the pages of "The Nepean Times", one of our local newspapers from the 1880s to 1962, held in the Local Studies Collection at "Braemar", frequently uncovers gems of local history. One such was this item published on May 20, 1893:

"Distinguished Visitors on the Mountains

His Imperial and Royal Highness Franz Ferdinand D'Este, Archduke of Austria-Hungary, paid a visit to the mountains on Wednesday last. District Superintendent Henson had charge of the special train and he speaks in the highest terms of the treatment the officials received at the hands of the visitors. His Royal Highness expressed himself as highly pleased with the visit. He said he was very pleased that he had brought his vessel on to Sydney if only to visit such wonderful sites as Wentworth Falls, Govettt's Leap and the Zig Zag."

Franz Ferdinand was heir presumptive to the thrones of the twin kingdoms of Austria and Hungary which were ruled at the time by the aged Emperor Franz Josef.

He was undertaking a world tour with his wife, Archduchess Sophie on board *Kaiserin Elisabeth* (Empress Elizabeth) which was described as the most powerful cruiser in the Austro-Hungarian navy. (It should be remembered that unlike the small, land-locked Austria of modern times the Austro-Hungarian Empire up to its dissolution at the end of the Great War had an extensive coastline on the Adriatic Sea and possessed a powerful navy).

The pages of *The Sydney Morning Herald* recorded in great detail the royal couple's arrival and activities while in the colony.

Those of us who remember Queen Elizabeth II's first visit to Australia in 1954 and the extensive coverage of her activities in the media will have some idea of the attention given to Franz Ferdinand and Sophie.

In those days Australia's remoteness from what was then regarded as the centre of the world in Europe meant that Australians were deprived of the presence of world celebrities.

The attempted assassination of Prince Alfred, Duke of Edinburgh at Clontarf in March 1868 was probably a negative for royal visits, notwithstanding the naming of a Sydney hospital by way of assuaging ruffled royal feathers.

Then there was the visit of Queen Victoria's teen age grandsons Prince Albert and Prince George (later King George V) in May 1881. Prince George, as Duke of York, paid a second visit to Australia with his duchess in 1901.

It is therefore not surprising that our forebears treated any royalty with adulation, and as evidenced by reportage no small degree of sycophancy and grovelling.

The Sydney Morning Herald of May 17, 1893 gave a detailed report of the arrival of the *Kaiserin Elisabeth* which arrived the previous day and anchored in Farm Cove after the firing of a 21 gun salute from the Dawes Point Battery.

Many dignitaries visited the ship to pay their respects. The first aboard was the acting Consul for Austria-Hungary followed by the Lieutenant-Governor of New South Wales, Sir Frederick Darley and his entourage. As the latter departed the *Kaiserin Elisabeth* fired a 17 gun salute, which must have been quite startling.

The report mentioned that 'Crowds of persons were assembled at Man-o'-War Steps through the morning, but most of the people left shortly after 12 o'clock.'

They had collected to see the royal visitor land, and had been disappointed.

Archduke Francis Ferdinand

It was anticipated that the landing would be effected at either 11am or 12pm but both these hours went by without the expectations of the crowd being realised. Rumours were then circulated that his Highness would not come ashore until 3pm; but at 1.30pm when not more than 70 persons were present, the Archduke, accompanied by Archduke Leopold Ferdinand of Tuscany and suite, were landed by a launch.

There was no ceremony of any kind, the Archduke having expressed a wish to land incognito. The party, dressed as ordinary tourists, seated in two cabs which had been waiting about, and drove off without as much as a cheer or the waving of a single handkerchief.

At 3 o'clock in the afternoon his Imperial Highness returned the Lieutenant- Governor's visit. His Highness also visited the Australian Museum and in the evening he returned to the *Kaiserin Elisabeth.*

Continued page 12

Archduke's party viewed Wentworth Falls and Govett's Leap

Continued from page 11

Franz Ferdinand was keen on hunting – shooting game – and had indulged in this while visiting India before arriving in Australia.

While here a special train was arranged to take the Archduke and entourage to Narromine to pursue this pastime.

It was reported that the train was stopped on arriving at the top of the Lapstone Zig Zag for the party to take in the panoramic view of the plains.

At Wentworth Falls everyone alighted from the train to be driven to the falls themselves.

The beauty of the falls and the Jamison Valley appeared to make a great impression on the Archduke and suite. His Imperial Highness said it was worthwhile coming to New South Wales if it were only to see that view.

At Blackheath vehicles conveyed the party to Govett's Leap, and the magnificence of the view here also seemed to strike the Archduke.

In the Narromine district the Archduke and party were guests at a couple of properties where they had the opportunity to shoot wildlife.

It was recorded that after breakfast one day the party set off with 20 horsemen to drive the game. A number of kangaroos were shot and others were caught by the dogs.

At the first drive his Imperial Highness 'succeeded in shooting, with great rapidity, five kangaroos, so that he very soon established himself in the estimation of those present as being a first-class marksman'. (He was to find the situation somewhat reversed some years later in Sarajevo!)

The following day 'more kangaroos fell to the Archduke's rifle. Ducks of a number of varieties, as well as pelican, ibis, cranes, eagles and hawks were also secured'.

Franz Ferdinand of Austria-Este (1863-1914) with his wife, Sophie and family

On another day a flock of emus were driven past the Archduke who succeeded with the rifle in killing a very fine specimen and wounding another which was afterwards secured.

At the conclusion of the Narromine adventure the Archduke returned to Sydney in the luxury of a special carriage attached to a mail train.

The Archduke later visited the Southern Highlands for a further slaughter of wildlife, including a platypus on the Wollondilly River.

It has to be said that the Archduke's shooting was not entirely pointless blood sport.

A taxidermist and photographer accompanied his party, and animals, after being shot, were skinned and dissected, the bones numbered for the purpose of being reassembled and inclusion in a museum in his homeland.

The royal party departed Sydney early in June 1893, and with that, their brief encounter with the Blue Mountains passes into history.

On June 28, 1914 Archduke Franz Ferdinand and Archduchess Sophie were assassinated by a young Serbian nationalist while visiting Sarajevo, the capital of Bosnia and Herzegovina, half a world away from the Blue Mountains

This was the spark that precipitated the Great War.

The pages of *The Nepean Times* made no reference at the time to the fate of our erstwhile royal tourists.

However, over the next four years there were to be all too many references to young soldiers from the Blue Mountains who were killed or wounded in action in the Great War.

About the author of this article

Peter Chinn (pictured) historian and researcher, who with his wife, Joyce has lived in Springwood for 46 years, is the president and research officer of Springwood Historical Society Inc.

He retired from the Australian Custom Service in 1996 after 40 years service and was recalled in 1998 to the ideal one-day-a-week job of history officer with ACS which concluded last month.

History has been an abiding passion for Peter since early childhood.

In 2006 Peter researched and wrote for the Springwood Historical Society Inc.*The Thin Red and Blue Lines* a history of the military and police presence in the Blue Mountains between the Nepean and Cox's River 1814-2005.

Frederick Robert D'Arcy colonial surveyor, explorer and artist

a biography by Andy Macqueen

As the bicentenary of the 1813 Blue Mountains crossing approaches, local historian Andy Macqueen has produced a biography of a different explorer—probably the first white man to fully engage with the rugged Colo country, now known as the Wollemi.

A promising young man with an impressive military heritage, Frederick D'Arcy arrived in Sydney in 1828 and embarked on a long surveying career.

He soon proved his mettle in the Colo River country, now known as the Wollemi. According to Macqueen, who is a great-great-grandson of D'Arcy, and who has explored the mountains extensively himself, D'Arcy's expeditions were the most rugged of any undertaken by any early surveyor or explorer on mainland Australia.

From 1849 D'Arcy was back in the Blue Mountains, employed as clerk of court at Hartley, and as a surveyor based at Hartley and Rylstone.

He was also engaged to find a route across the Wollemi, from Mudgee to the Hawkesbury.

Meanwhile, D'Arcy and his long-suffering wives and children lurched from one disaster to another.

He was embroiled in disputes and scandals in NSW, Port Phillip, Van Diemen's Land and Queensland.

This might be blamed on a love of adventure, gambling, drinking and horses—and on his mentor the tyrannical Major Mitchell.

He was not alone. Macqueen reveals the challenges faced by the ordinary surveyor as he battled the bush, recalcitrant convicts and assistants, and enigmatic superiors.

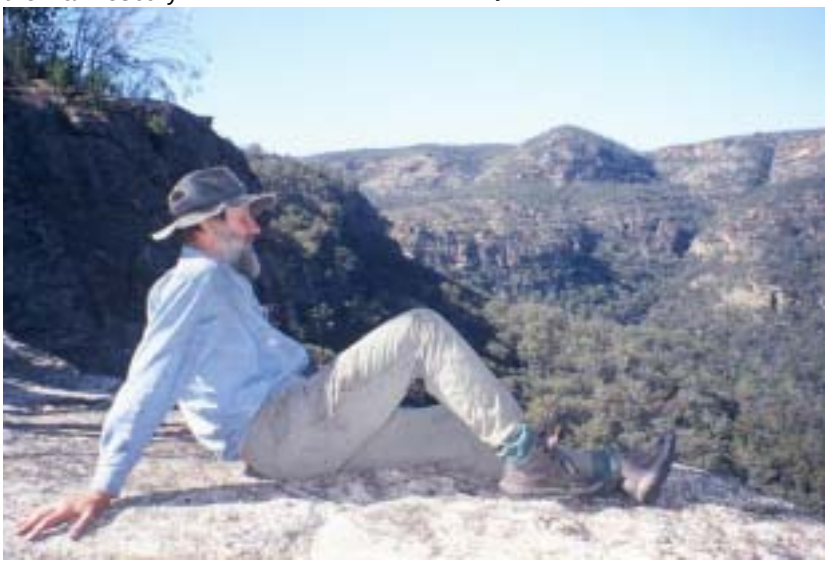
D'Arcy was a prolific artist, though few works survive. One humorously depicts the famous poet and steeplechaser Adam Lindsay Gordon on a hunt, probably with D'Arcy himself. Another is a rare portrait of a Port Phillip Aboriginal man.

The book was launched on July 27 by Surveyor General Warwick Watkins.

This was followed by a local launch by Professor Robert O'Neill at the Hartley Courthouse. This was an appropriate location given D'Arcy's role there—and the mark he made when he had a community-splitting controversy with Thomas Brown, the future 'Father of Lithgow'.

The book retails for $45, and can be obtained direct from the author at andymacqueen@gmail.com.

Hardback; 288 pages; 76 pictures and maps (19 in colour). ISBN 9780646533599. Published by the author.



The author of this biography, Andy Macqueen pictured in the 'bush on the track of his ancestor in the Colo country'. Macqueen of Wentworth Falls is a historian, former TAFE teacher of local history, a renowned bushwalker and conservationist. In 2008 he was was recognised with the NSW Government Heritage Volunteer Award for his outstanding contribution to heritage conservation.

BM HISTORY JOURNAL ONLINE

The inaugural issue of the Blue Mountains History Journal an initiative of BMACHO has been published online.

In his editorial, Journal editor Dr Peter Rickwood stated: "The first issue contains four articles but only one of the authors is a professional historian so hopefully indicating the non-restrictive intent of this publication.

"The subjects range from a large block of land to accounts of the lives of two significant individuals and then to an update on the tools and occupational sites of the indigenous people.

" This eclectic selection embraces the time span of human history from the 20th century to as far back as currently we know c.50,000 years for this part of Australia," Dr Rickwood stated.

This venture has been assisted by a grant from the Royal Australian Historical Society.

The *Blue Mountains History Journal* may be accessed at http://www.bluemountainsheritage.com.au/html/journal.html

National Trust's advocacy role

Many in the community are unaware that advocacy on heritage issues is a major role of the National Trust of Australia and that local branches of the organisation are continually monitoring heritage sites throughout the nation. In this region Blue Mountains, Lithgow, Hawkesbury and Bathurst districts have branches whose members are involved in this aspect of the Trust's work. *HERITAGE* invited David Turner, (pictured) vice chair of Blue Mountains Branch of National Trust Australia (NSW) to comment on this role specifically drawing on examples and results of it's work.

Advocacy has been an inherent part of the National Trust organisation since inception, and that is the same, of course, for the branches.

This role, apart from the internal organisation involved in management of their heritage buildings and collections with the associated community contacts, has become the most important external expression.

This article is written by David Don Turner relating to the assessment of the most important advocacy items during the past 10 years. David is currently involved in handling heritage issues for the Blue Mountains Branch, where these are raised by members, and the branch is asked by the Blue Mountains City Council to comment on development applications for listed heritage buildings.

Branch members also investigate and comment on other notified developments that we know will have effect on heritage areas or buildings. Professional advice and support comes from National Trust's, Sydney office.

Although advocacy has been a continual involvement, I have checked the records for the last 10 years to give some idea of the successes and disappointments in this area. It has to be remembered that these are always dependant on the community views and the actual strength of the local and state laws that support the resolutions. So working back from recent issues, the following give a brief resume of the issues and results of the most important items.

Medlow Bath Hydro-Majestic Hotel The branch's comment to Blue Mountains City Council on the first application, was that there was too much diverse pseudo-historic design in the new work and it should reflect current times. In the recently revised application there was a great improvement in this, so we believe a definite success.

Lawson Community (Memorial) Hall and shops This has been a long saga from when the RTA implemented the Great Western Highway duplication. Initially the hall was to be demolished, but with the objections from the local community groups which the Trust's branch supported, the hall was finally saved with the road being repositioned even though the later portico had to be removed. Branch members also supported the retention of the existing shops, but this was not successful as the council had entered into agreements for new shops before the road was changed.

Lawson Community Hall

The branch is now supporting the council to have the shop frontage on Honour Avenue restored to their original heritage appearance.

Leura Mall Originally the Colless Supermarket in the centre of the mall was to be replaced by a supermarket with flat units over the retail area which would drastically change the scale with the additional height, and car parking problems. The branch, again with the local community protested but to no avail.

However, luck was on our side, as the original developer appeared to have financial problems, so the site was taken over by another which resulted in a new plan. This plan has kept the scale of the shops on the street with a Woolworths and a new underground car park and loading access.

Katoomba Aldi Store This was one example of advocacy not being successful, being another example of fake historic appearance, as well as being poorly placed on the site, our objections were ignored. That said, supermarkets are very difficult to blend successfully into shopping streets, their separate street shops provided will probably stay empty.

Katoomba Renaissance Centre The branch was successful in supporting the local action group in having the building heritage listed, but this has not stopped the deterioration to demolition status. John Leary has also pointed out in a recent public address when he said, *"there is no point in keeping old buildings in a state of permanent vacancy and long-term neglect and decay. Adaptive re-use is an important part of any heritage system and we must be willing to consider how best to achieve a balance of maintaining heritage values while allowing heritage sites to be a living part of society".*

Cox's Road Blue Mountains Branch members have worked with the Bathurst and Lithgow branches over the last four years to produce a submission to the Heritage Commission to include significant portions still remaining of the original road on the State Heritage Register. The submission was lodged in April this year.

To conclude, advocacy on heritage issues will always continue to be an important part of the Blue Mountains Branch activities, particularly as with more than 1100 heritage sites identified in the area, being the largest number of any council in New South Wales.

‘FACES IN THE STREET’ AT LITHGOW

As part of History Week 2010, Lithgow City Library will display ‘Faces in the Street’ during normal library opening hours September 3 to 30.

This exhibition features a collection of portraits of familiar local faces by well known artist and local history author John Barnes.

These portraits are history in the making and will be available for sale by the artist, with half the sale price being donated to the Lithgow Private Hospital.

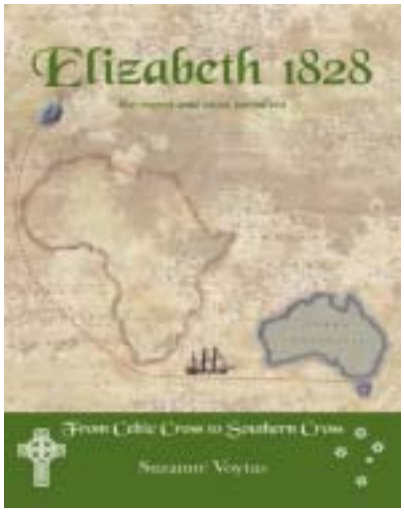
The exhibition will also showcase some of the library’s extensive historical photographic collection.

LOCAL RESEARCHER LAUNCHES LATEST BOOK IN IRELAND

Local historian, author and president of Blue Mountains Family History Society, Suzanne Voytas was in Ireland last month to launch her latest book, *Elizabeth 1828*.

The story of the voyage began before they left Ireland. While confined to the Female Convict Depot, the women became two groups and soon were fighting each other, causing extensive damage to the premises.

For everyone’s safety, the authorities decided to move one group to the Cork City Gaol. However, within weeks both groups were placed on board their transport, a 527 ton sailing ship.



The only free passengers on board were the Reverend John Vincent, his wife, four young daughters and their female servant.

On arrival, Reverend Vincent lodged a tirade of complaints regarding the women, the crew, the theft of and damage to his personal belongings. These complaints were investigated at a Naval Enquiry. During this enquiry the women were labeled, ‘the worst and most turbulent’.

The book *Elizabeth 1828* tells the women’s stories and how most of the women were to prove this so wrong, as their lives moved in many directions and they adapted to life in a strange land. Some lived long enough to know their grandchildren; a few became wealthy while some did succumb to unfortunate circumstances and bad habits.

The book cost is $35 plus postage $10.

HERITAGE ON THE ROCKS

Artists and photographers portrayed Sydney’s early slums in vastly different lights.

In 1902, the art teacher once dubbed one of “the seven greatest living Australians”, Julian Ashton persuaded the government to provide a grant of £250 for an artistic record of the streets and communities around Sydney’s Rocks.

After the lethal outbreak of the bubonic plague in 1900 the NSW government had announced plans to demolish the slums in the Rocks where disease carrying rats had carried the plague.

Ashton came up with the idea of an exhibition dedicated to ‘Old Sydney’ and 145 paintings were exhibited at the Society of Artists’ rooms in Pitt Street in March 1902.

Ashton’s *Argyle Street looking towards the Observatory Hill* was typical of the paintings, 15 of which were chosen for government collections.

Historian Dr Grace Karskens points out the *Old Sydney* artists showed “the world as it once was, a world without machines, factories or clocks, a small intimate world shaped by hand…It was of course a contrived vision.”

But if Ashton and his fellow artists were creating a myth, the official photographer must also be treated with suspicion. For the photographer was specifically commissioned by the government to show the condemned areas in as bleak a light as possible.

About 30 of the original paintings from the 1902 painting now mostly owned by the Art Gallery of NSW, the Mitchell Library or the National Library of Australia form the core of *Painting The Rocks.*

They are supplemented by other paintings, drawings and photographs that tell the story of the Rocks between 1900 and 1932.

Painting the Rocks: The Loss of Old Sydney is at the Museum of Sydney until November 28.

HERITAGE SITES WORKSHOP

A pilot scheme developed by Florence Smart and members of Mt Wilson & Mt Irvine Historical Society to record changes to heritage sites, will be used at a workshop to be held in Springwood later this month to train members of several historical societies.

Black Diamond – Development of the Western Coalfield 1815 to 1900

Following the publication of two histories of collieries located in the Lithgow region Ray Christison has commenced researching a history of the development of the coal and shale mines of the Western Coalfield from 1815 to 1900.

The year 1900 was chosen as a cut-off as this was a watershed year for the region and saw the demise of a number of significant collieries.

The coal reserves of the Western Coalfield have been identified between the Nepean River in the east and the Goulburn and Talbragar Rivers in the north and west.

In the period covered by Ray's research the principal areas of coalmining activity were centred around Lithgow/Hartley, Katoomba, Wallerawang/Blackmans Flat, Portland/Cullen Bullen and Kandos/ Rylstone and Ballimore near Dubbo.

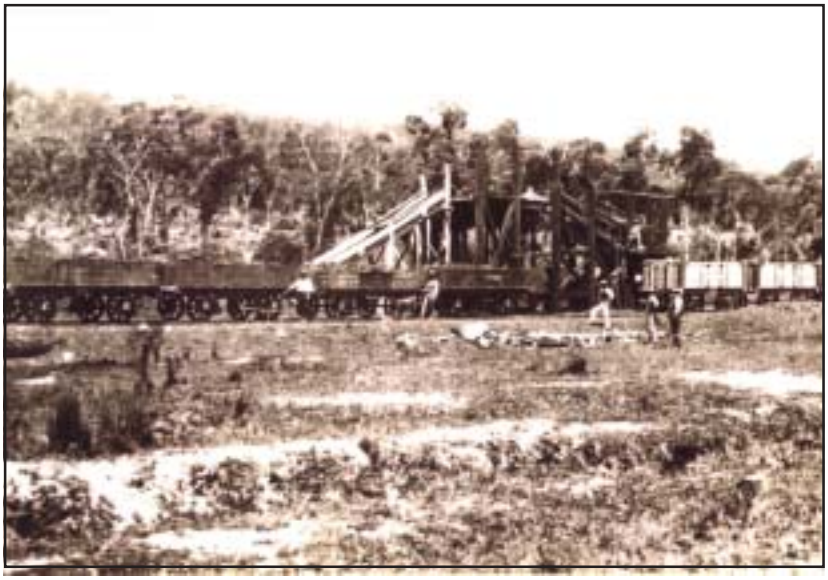
Small ventures were also undertaken in the Grose and Burragorang Valleys, and testing for payable coal undertaken as far east as Sassafras Gully at Springwood.

Ray's intention is to prepare a quality hard cover publication that covers the following areas

- A general description of the coalfield and early exploration.
- Histories of each of the collieries operating between 1838 and 1900.
- Exploration of the relationships between the entrepreneurs who developed the collieries of the region
- Discussion of the development of the mining union in the region and the major industrial disputes that occurred in the region's mines up to 1900.

The book will also contain vignettes of many of the early mine owners, mine managers and union leaders.

In a tribute to those killed in this dangerous occupation Ray also intends to tell the story of each mining death that occurred up to 1900.



Lithgow Valley Colliery c. 1877. Photograph courtesy, The City of Greater Lithgow Mining Museum Inc.

Depending on the success of this work Ray may in future expand his research to develop a second volume covering the early 20th century.

Ray Christison is an archaeologist and heritage consultant operating a heritage consulting business based in Lithgow.

He is president of the City of Greater Lithgow Mining Museum Inc., an individual member of and former member of BMACHO's management committee.

Ray has a particular interest in industrial history and archaeology. and has recently authored two histories of collieries in the Lithgow region.

THE MACQUARIES' PASSION FOR HORSE RACING

Lachlan and Elizabeth Macquarie were passionate about horses and they commissioned convict architect, Francis Greenway, to design the extravagant stables for Government House.

This neo-gothic style building would eventually become the Sydney Conservatorium of Music.

Macquarie introduced horse racing to Sydney in what is now Hyde Park in 1810.

With few social activities available in Sydney, Macquarie began a new era in Australian popular culture when he approved the establishment of an annual racing carnival.

He saw the racecourse as a perfect neutral meeting place for colonists of all classes: military, convict, emancipist and immigrant.

On Monday, October 15, 1810 crowds gathered on the Sydney Racecourse on new public land, which the governor named Hyde Park.

The race program lasted three days and D'Arcy Wentworth's horse, Gig, ridden by his son, William Charles Wentworth, won the three-mile race, marking the beginning of the Wentworth's strong involvement in the Sydney racing scene.

Macquarie letters at State Library

The Governor: Lachlan Macquarie, 1810 to 1821
State Library of NSW Exhibition of Macquarie's letters and more is open until October 10.

WINNERS

Among the winners of the 2010 Blue Mountains, Lithgow, Oberon Tourism awards announced last month was Norman Lindsay Gallery which won the award for heritage cultural tourism.

Meantime, the Hawkesbury Regional Museum has taken out the gold award for cultural and heritage tourism in the Greater Sydney Tourism awards.

The award was accepted by museum curator, Diana Robson, who thanked the many people and organisations who have made the museum such a success, including Hawkesbury Historical Society and Arts NSW, as well as the museum's 54 volunteers.

BMACHO congratulates the Norman Lindsay Gallery & Museum and the Hawkesbury Regional Museum for these well deserved awards

Books launch

The Blue Mountains Historical Society will launch two books: *The Healing Mountains: Tuberculosis in the Blue Mountains*, 1882-1959 by the late Gwen Silvey and *Shoulders of Giants: Achievements in History's War on Tuberculosis* by Brian Craven.

The books are to be launched at History House, Royal Australian Historical Society, 133 Macquarie Street, Sydney, on Wednesday September 22, 5pm for 5.30pm. RSVP by September 10 to 4757 3824 or bmhs@email.com

Gwen and Brian describe a period that contributed to the development of communities in the Blue Mountains: that of the rehabilitation of tuberculosis sufferers in rented cottages, private homes and then sanatoria during the early 1900s. That enterprise attracted professional and trades people, and their families who needed homes, schools and shops.

Gwen's work is a local history, while Brian's is a broad picture of the medical, social and economic strands in the history of TB and its treatments worldwide, which contributed to the tapestry of change in the mountains.

TEN TUNNELS 100-YEAR ANNIVERSARY CELEBRATIONS

One of the ten tunnels under construction. Photograph courtesy Lithgow City Library.

The weekend of October 16 -17, 2010 marks 100 years since the opening of the Ten Tunnel rail deviation, a major feat of rail engineering which replaced the Zig Zag Rail system as the main link between Sydney and Central NSW.

A weekend of activities for families and history buffs has been planned, including heritage steam train rides from Lithgow, Katoomba and Wallerawang.

On Saturday, October 16 a heritage diesel locomotive will leave Lithgow and travel to Tarana for dinner at the Tarana Hotel.

The main commemoration of the opening will occur on Sunday October 17, when the NSW Transport Minister, John Robertson MLC, will unveil a plaque at Eskbank House.

Later on that day, Dr Naomi Parry, Lithgow City Council's cultural development officer, will talk about the links between Eskbank House and Eskbank Station, while Mark Langdon, the author of *Conquering the Blue Mountains*, will explain the history and construction of the Ten Tunnels.

Throughout the weekend Eskbank House will display photographs of the engineering works and Lithgow Community Cinema will screen rail documentaries and movies.

The Old Wallerawang Railway Station will host an exhibition of local and regional artists, while the "coffee@thestation" café will serve delicious food and great coffee. For further details contact Lithgow Visitor Information Centre telephone 1300 760 276 or www.tourism.lithgow.com

WELCOME TO NEW MEMBER

BMACHO has a new member -- Everglades Historic House and Gardens at Leura. The former Friends of Everglades was a member until its role changed and the National Trust property has now become the member.

Everglades manager, Scott Pollack is always anxious to encourage new volunteers to work at Everglades on a range of tasks at this heritage property.

Springtime at Everglades

Naval pension for Cook's nanny goat

If James Cook felt slighted by the hero's welcome accorded Sir Joseph Banks, he appears to have left no record of it when the *Endeavour* returned to England after circumnavigating the globe a journey of discovery which took almost 3 years.

When the *Endeavour* dropped anchor on July 13, 1771 and Cook prepared to go ashore to report to his London masters, he, the ship and its crew had been away for more than 1000 days and sailed forty thousand miles.

Cook wrote a one line entry in the ship's log, *At 3 oClock in the PM Anchor'ed in the Downs, & soon after I landed in order to repair to London.*

It was the well connected botanist, Joseph Banks who was the toast of society. Ever deferential and diplomatic towards his social betters, Cook modestly accepted his own share of laurels.

Even the only female aboard, the ship's goat, which survived its second circumnavigation enjoyed modest fame. The goat had sailed with Wallis a British sailor who discovered Tahiti.[2]

Samuel Johnson, (1709 -1784) arguably one of the most distinguished men of letters in English history is said to have composed a piece of Latin doggerel for the animal to wear on its collar.

The verse translates as "The globe twice encircled, this the goat, the second of the nurse of Jove, is thus rewarded for her never-failing milk".

The goat was aboard ship to provide fresh milk for Cook and his officers.

The hardy goat was also given the privileges of a naval pensioner at the Greenwich Hospital and retired to a field near London, where she perished a month after Johnson bestowed his poetry on her.

Cook in a later voyage in Re*solution* while visiting Tonga sought to Anglicise the subtropical landscape by sowing turnip seeds from England and presenting his hosts with a veritable menagerie: goats, a bull and cow, a boar and sows, a buck and doe and rabbits.

Later, climbing a hill, he mused: *"I could not help flattering myself with the idea that some future navigator may from the very same station behold these Medos [sic] stocked with Cattle the English have planted on these islands."*

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE is BMACHO's official newsletter.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc, Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow Mining Museum Inc, Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc, Mt Wilson and Mt Irvine History Society Inc (including Turkish Bath Museum), Mudgee Historical Society Inc, Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc, Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2010-11 is: John Leary (president), Ian Jack (vice president), Jan Koperberg (secretary), Kathie McMahon-Nolf (treasurer), Jean Arthur, Joan Kent, Doug Knowles, Dick Morony (public officer), Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

NOVEMBER - DECEMBER 2010 ISSUE No. 12

STATE GOVERNOR OPENS NEW WING AT HOBBY'S REACH

The Governor of NSW, Professor Marie Bashir, AC, CVO recently officially opened the Sadler Wing at Hobby's Reach Centre, the home of Blue Mountains Historical Society.

Building of the new wing was made possible because of a bequest from the late Geoff Sadler, a former treasurer, membership secretary and public officer with the assistance of ArtsNSW.

The new wing contains Geoff's extensive book collection also gifted to the society.

Speaking at the opening, society president, Graham Warmbath, said: "Now we have a lending library as well as a dedicated research collection and interpretation of historical information.

"Hobby's Reach research centre houses local, personal and business histories, books, photographs, maps and provides information for authors, historians, students and community groups.

"It is open to the public every week of the year and is attended by a research officer and librarian, both volunteers," said Mr Warmbath.

Among the new acquisitions for the society's library are three books published as part of the celebration of 150 years of self-government in NSW.

Pictured is Professor Bashir unveiling a commemorative plaque with former Mayor, Cr Adam Searle in the background.

Council's Heritage Review of LEP 1991

by Felicity Blaxland - Senior Strategic Planner, BMCC

Firstly, I would like to introduce myself as a new team member of the City Planning Branch of Blue Mountains City Council (BMCC) to your organisation and other historical societies in the Blue Mountains who may read this newsletter.

I commenced with council in February this year as a senior strategic planner and have been working in local government for the past 10 years in various positions including both development assessment and strategic planning roles. Since joining BMCC I have become more involved with heritage related projects such as the review of heritage items under LEP 1991 and the investigations into the formation of a heritage advisory committee.

Council staff have been progressing a heritage review to support a proposed Amendment to LEP 1991. A number of items and conservation areas have been recommended to be listed as having local heritage significance through heritage studies undertaken by Associate Professor Ian Jack and Associates.

Further research on other significant areas has been completed this year by Dr Jim Smith. A grant received from the Heritage Office of the Department of Planning has assisted funding of this work. ***Continued page 12***

From the president's pen.....

We remember those who were slaughtered in battles planned by stupid generals

War is abhorrent to most decent human beings. Down through the ages there has always been and most probably always will be war.

There should never be any future attempts to glorify war.

However, we must honour those who made the supreme sacrifice on the battlefields, often in foreign lands.

We must also respect the wishes of those loved ones left behind and their descendants who may wish to recognise these heroes and ordinary soldiers with Remembrance services, marches, wreath laying ceremonies and other activities on special days.

This edition of ***HERITAGE*** features articles about World War 1.

These articles are not so much about the battlefields, but rather about local men who served – some came back and others now lay buried in foreign fields.

These articles are published near to Remembrance Day observed around the world by those nations who participated in this horrific conflict.

Traditionally these services are conducted on the 11th hour, of the 11th month of the year, the Armistice as it was then known having been signed at that time in 1918.

These well researched stories also touch on the anguish of those left behind – mothers, wives and girl friends; the emotions– the pain of separation, the grief of loss and the great joy of reunion.

They touch on the discovery of the mass grave, pinpointed through the research of a Victorian school teacher, Lambis Englezos.

The work of Englezos an amateur historian, was confirmed in 2008 by a team of archaeologists led by Dr Tony Pollard of Glasgow University.

The excavation would later provide a vivid and startling glimpse into the horror of World War 1 as the bodies had been preserved in the same position they were thrown into the mass grave.

World War 1 was a military conflict centered on Europe that began in the summer of 1914. The fighting ended in late 1918.

More than 70 million military personnel, including 60 million Europeans, were mobilised in one of the largest wars in history.

More than 9 million combatants were killed, due largely to great technological advances in firepower without corresponding ones in mobility**.**

A generation of innocent young men, their heads full of high abstractions like Honour, Glory and Country, went off to war to make the world safe for democracy.

They were slaughtered in stupid battles planned by stupid generals at the behest of egotistical politicians.

Those who survived were shocked, disillusioned and embittered by their war experiences, and saw that their real enemies were not the Germans, but the old men at home who had lied to them.

They rejected the values of the society that had sent them to war, and in doing so separated their own generation from the past and from their cultural inheritance.

Unlike many of its Allies, in World War 1, Australia did not conscript its soldiers to fight in the Great War - all Australian soldiers were volunteers.

It was to be the war to end all wars.

John Leary, OAM
President, Blue Mountains Association of Cultural Heritage Organisations Inc.

‘Only in Australia can men read their name on a war memorial’

This article is an extract from a presentation by, Arthur Delbridge at the 2007 Remembrance Day memorial service held at the war memorial in Mt Wilson. Arthur is a former president of Mt Wilson and Mt Irvine Historical Society and early this year was awarded honorary life membership of that organisation.

Professor Delbridge in 1987 was made an Officer of the Order of Australia (AO) in recognition of his service to education particularly in the field of linguistics and as editor-in chief of the Macquarie Dictionary.

The Mt Wilson, Mt Irvine and Bell Soldiers Memorial was erected in Mt Wilson in 1919 and in 2001 two societies the village’s Progress and Historical, began a series of services of remembrance.

Mt Wilson resident, Arthur Delbridge, AO presented the addresses for the first years while Alison Halliday is carrying on in Arthur’s tradition. The following is an extract from Mr Delbridge’s address in 2007.

“I believe it was a response to a feeling shared around the Australian community that war and the other faces of terror were necessarily now bulking larger and more urgently in our consciousness than they had for some time past.

“As a result the national official memorial services in our cities were becoming ever better attended, and the marches more sombre, and overseas the memorial services at ANZAC Cove and many other military cemeteries were attracting more and more visitors, with increasing numbers of young Australians making the long journey to them.

“Possibly also revisitings, especially by old soldiers, to war sites where they had fought and their mates been killed.

“Today I thought I would speak about two of our local soldiers, who did come back when the war was over.

“What effects, if any, did their war experience have on the rest of their lives? Perhaps this is, for them (and for us) an unanswerable question. Maybe no visible effect.

“But I have vivid memories of being taught Latin in high school by a returned soldier, a notable classical scholar who had been gassed in the Great War.

“He had the most cracked voice, the most awful fits of coughing, the worst temper and the sweetest smile at unexpected moments –he was a post-war wreck physically, a returned soldier who never got over his experience of war.

“Fred Mann and George Valder both came back to Mt Wilson. Both of them could have read their own names on our memorial, and possibly did.

“But Professor Inglis, in *Sacred Places* stated quite firmly that ‘Only in Australia could most men, home from the war, read their own names on its memorials’. Elsewhere, especially in Europe memorials were exclusively to the dead and the “missing”.

“And in Australia at first that seemed to be right and fair. But then a strong movement emerged in favour of listing also the names of returned soldiers. Sir John Monash, who commanded the Australian divisions in France, declared ‘We were all men of one nation—and all volunteers!’ That was the key to it.

“Of course not all volunteers were accepted when they had tried to enlist, for either health or occupation reasons. And volunteering didn’t necessarily get you into the front line, where most casualties occur.

“Behind the front lines are many lines of command and support essential to any engagement. For example, in WW1, 1800 graduates and undergrads of Sydney University went on active service and 197 of these were killed in action.

“Comparatively a smallish number. But it reflects the fact that a high proportion of those volunteers came from the faculties of medicine and engineering: they were directed to serve where their special skills were needed.

“When in the early 1920s Sydney University began to plan its memorial it was ‘for those who have given their lives...as well as for those who have voluntarily engaged in active military or naval service’.

“What the university finished up with for its WW1 memorial was a carillon of 47 bells fitted into its clock tower to be played from a rather special sort of keyboard.

“I could speak at length about the various ways, from that day to this, that the carillon has kept alive the memorial function it was intended to achieve from its first appearance.

“It’s enough now to say that its biggest bell weighs 4.2 tons, the smallest bell just a few pounds. A carillonist can play on it virtually any tune or theme, and harmonise it into two or three parts, with bells playing simultaneously. Its principal function is memorial.

“In 1938 I took lessons in playing this great instrument and became a member of the carillon family, a small group of appointed players who between them provided carillon music for occasions in the university year, particularly celebrations of national days of the allied countries of World War 1.

“So there is no limit to the structures that can serve as war memorial, be they hospital, club, park, plaque, pillar or post—or carillon! Inglis says that there are 4000+ war memorials in Australia.

The Light Horse Interchange

The Australian Light Horse has made a rich and continuing contribution to our sense of national heritage.

Perhaps the latest example of this is the Light Horse Interchange, the point at which the Westlink M7 motorway intersects with the M4, west of Sydney.

Here a great sculpture is revealed to motorists as they flash by at 100 kph: four sets of red steel poles, radiating from a tall central mast, all representing the Australian Light Horse on parade. The red colour of the poles is for sacrifice.

The steel plumage at the top of each pole represents the emu feathers of the troopers' slouch hat.

The symbolism is rich in detail, even to the significant absence of any figure of a horse, reminding us that quarantine regulations prevented the return of any of the troopers' horses.

But why put the sculpture right here? Research has established the significance of the local area in the history and recruitment and training of light horsemen. In World War II they were based at a major training camp at nearby Wallgrove.

A spokesperson for Conybeare Morrison, designers of the sculpture explained that it is designed "to let people know they are approaching a major intersection but also to

spark their interest so they want to find out more about what the sculpture represents.

MT WILSON WAR MEMORIAL

Continued from page 3

"Ours [at Mt Wilson] is one of the simplest sort, but none the worse for that. Many of them take the form of utilities — a hospital, a community hall, a church, a sports ground, that could be undertaken in the expectation of getting a government grant in terms of subsidies and tax concessions for the donors.

"But no such thing happened here. The local impetus was from generous gifts of land and material, plus determined community effort. The crucial gift was the piece of land cut off from the Dennarque estate, given for just this purpose by Flora Mann, the mother of the Fred Mann whose name is with others, engraved on our memorial."

Mt Wilson, Mt Irvine & Bell Soldiers Memorial with Gregson Memorial Obelisk to the left.

The men who made the last great wartime cavalry charge [Beersheba] were mounted infantry – Australian light horsemen. As "Bushmen" at the Boer War they had won high praise. At Gallipoli, dismounted, they fought gallantly and died tragically… *The Australian Light Horseman by Ian Jones*

Woodford Academy student survived Beersheba charge

A former Woodford Academy student John Lyons was at the Beersheba charge and survived (see story page 5).

The charge at Beersheba on October 31, 1917 is often reported as 'the last cavalary charge in history' although cavalary such as the Polish cavalary continued to exist into the early phases of World War 2 and took place in operations before being rendered obsolete.

The charge at Beersheba took place as part of the Sinai and Palestine campaign during World War 1.

The Australian 4th Light Horse Brigade under Brigadier William Grant charged more than 4 miles at the Turkish trenches, overran them and captured the water wells at Beersheba.

The battle at Beersheba was the critical element of a wider British offensive as the Third Battle of Gaza aimed at breaking the Turkish defences from Gaza on the Mediterranian shore to Beersheba an outpost 30 miles inland.

Earlier in 1917, two previous attempts to breach this line had failed.

Since the earlier failures the British forces in Palestine had undergone a major uphreaval with the replacement of General Murray with the distinguished cavalary commander General Allenby.

The Australian force was led by Lieutenant General Sir Harry Chauvel who went on to be one of Australia's most distinguished soldiers
John Leary, OAM

"The rainy season has begun and the cold cuts us through..."

by Neryl Medcalf

a past volunteer and member of the former Friends of Woodford Academy

The words used in the headlines above were in a letter written on December 12, 1917 from Palestine by Private John Lyons Gray of the 6th Light Horse Regiment to Mrs Edgeworth David of Woodford.[1]

John was a former student of Woodford Academy, a private venture boys' boarding school in the Blue Mountains.

He had just survived the battle of Beersheba at not quite 19 years of age, and was one of 48 students from Woodford Academy identified as servicemen during WWI.

Many of those students' names are on the roll of honour that is still displayed over the door to the schoolrooms.

Headmaster John MacManamey accepted boarders at the school from Sydney or from country areas mainly on the Western rail line, while others were day students living in the Blue Mountains.

Some boys intending to become doctors or lawyers came to Woodford Academy to be assisted with Latin or Greek, necessary at the time for Matriculation. Basil Kennedy, a student in 1907, matriculated, became a doctor, joined the Australian Army Medical Corps, served on *Karoola* the Australian hospital ship, then at a field ambulance hospital and by 1918 was senior medical officer with the rank of lieutenant colonel at Hurdcott Military Hospital in England.[2]

Likewise, Dr George Hay (1907)[3] from Katoomba and Sid Rosenthal (1909) - whose family changed their name to Rosebery in 1915[4] - and medical student William H Ward (1908)[5] of Springwood who with 5th Field Ambulance served as a stretcher bearer in Egypt and France before returning to Australia and completing his medical studies. Dr Ward also served in WWII. Indeed, at least eleven former students on the roll of honour went on to serve again in WW2.

The Woodford Academy World War 1 Honour Roll restored several years ago and returned to its place above the doorway to the schoolrooms.

There is evidence of army cadet training at Woodford Academy and students were quite aware of the war situation. Corporal Reg Lewin of Katoomba, was killed in action at Lone Pine Gallipoli in August 1915.

Schoolboy Bert Tom from Parkes wrote to his father *" We saw by the papers that there had been three boys killed from Parkes and several wounded including Russel Watts. Evidently the Parkes boys must have been in that great push in France or Palestine. My word it is time they brought Conscription in isn't it?"*[6]

Alan Giles[7] (1913) was another boy from Parkes who not only made his mark on the desks of Woodford Academy, but also made his mark as a stretcher bearer on the Western Front at Villers Bretonneux in April 1918 and was awarded a Military Cross for his effort... *"..he dressed and carried wounded continually for four days through extremely heavy shell and machine gun fire,"*

He went on to add a bar to his MC 3 months later at Ville Sur Ancre *"Private Giles volunteered to swim across the river with a dispatch, under an intense artillery and machine gun barrage, returning through the same barrage with an answer..."*

A second Military Cross winner was Fred Brown of Sydney [8] (1907) who was wounded in France, became a lieutenant served as an intelligence officer , was mentioned in dispatches then won his MC at Amiens in August 1918.

The Military Cross awarded for bravery

Not all the Woodford boys won medals, but many were wounded or killed

Fred Brown's brother, Douglas of 18th Battalion had died of wounds the year before.

A third award winner, Second Lieutenant Robert Murray of Wentworth Falls[9] (1907), left a copy of his will in his pay book, in which he bequeathed his microscope and five pounds to Keith Faulkiner Potts, his mate from Woodford.

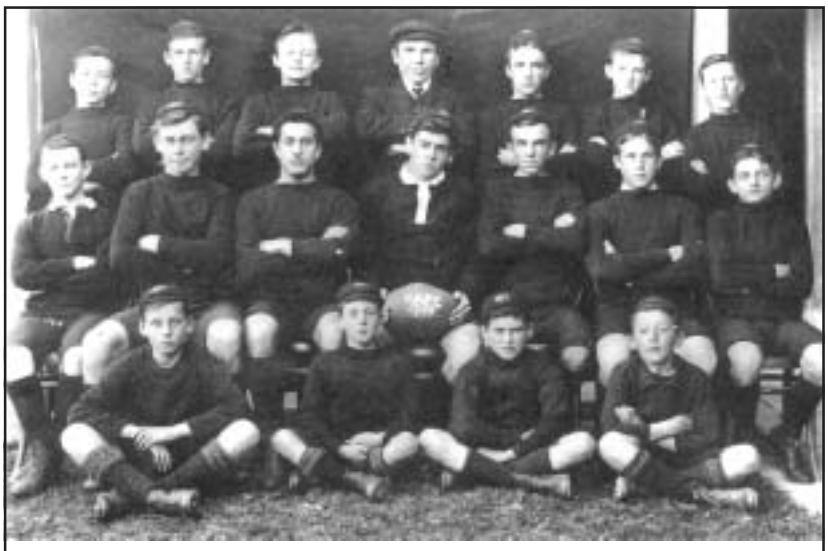
Robert won a Military Cross on the Somme in February 1917, but was killed at Messines in June of that year. Keith returned safely to Australia in January 1918.

Other boys whose names appear on the school roll of honour may not have won special medals, but they volunteered and performed their various duties in the army as bombardiers, gunners, bicycle couriers and sappers.

Many were wounded, sometimes twice, some were gassed, many spent time in hospital, some went AWOL, some caught sexually transmitted diseases, and at war's end were discharged on their return to Australia to take up civilian life once more, after serving their country well.

Only one former student, George Shaw, a radio operator in civilian life, is known to have joined the Australian Flying Corps as an air mechanic.

Walter Carroll from Katoomba, private in the 45th Battalion, was returned to Australia early in 1917, having been so affected by the cold and exposure in the trenches that he was invalided to hospital in England where both of his legs were amputated.[10]



WOODFORD ACADEMY FOOTBALL TEAM 1909
Back: K Potts, D Stuart, D Kilpatrick, Principal J MacManamey, V Hay, R Peacock, GE Botting.
Middle: B Paravacini, R Howard, S Rosenthal, K Mackey, R Lewin, A Hannam, H Hart.
Front: C Storm, K Bowden, A Harkness, W Ward. (Underlined identified as having enlisted in WW1.)

'Old Boys' kept in touch with their headmaster sending him photographs of themselves in uniform.

Frank Berry a student in 1910 from out west at Trundle, became a Sapper in the 10th Field Engineers and was one of six former students still able to attend an Old Boys reunion in 1982 at Woodford Academy with Gertrude MacManamey, daughter of their Headmaster.[11]

John Gray, the letter writer, who survived at Beersheba returned to Australia and joined up once again in WWII - as major, ending his war service in 1947 after a stint in the warmer Pacific waters of Morotai and Balikpapan.[12]

Considering the war experiences of a group of boys who shared some of their schooling in the Blue Mountains in the years before 1914 focuses us on the disruption, adventure, accidents, courage, mateship and the futility and waste of war.

An old boys reunion at Woodford Academy in 1982.

Their names are on the honour roll at Glenbrook Primary School

In his book *Comrades in Arms* the late Walter J Venn wrote: "When writing the stories of these 1914 -18 soldiers I have been reminded that the exigencies of the service influence the chance of one's survival. One simple decision at a desk in Sydney could, in some circumstances, result in the degree of a soldier's exposure to danger".

WJ Venn's research provides information about those on a World War 1 honour roll at Glenbrook Public School. The following are extracts from his publication:

Private Alexander Dick – He was assigned to the 19th Battalion. In April and June 1916 the battalion took part in the operations in and around Armentieres.

In July they played a central role in the bloody fighting at Pozieres and later that month in the attacks on Pozieres Heights.

The battalion's casualties during this period were 13 officers and 440 other ranks. Alexander Dick was killed on August 1 and is buried at the Sunken Road Cemetery, Contalmaison, France.

Lieutenant Cecil Beaumont Mills – His unit the 23rd Infantry Battalion took part in a joint raid on enemy lines near Armentieres in late June 1916.

Cecil was killed in action. Some of his personal possessions were recovered the next day and placed in a tin in a nearby trench, but were never seen again.

His body, if ever found, was not identified and his name was included on the long list of casualties suffered by his brigade.

Private Howard Keith Macpherson – A draughtsman in the Land Titles Office, NSW he enlisted in the Australian Army Medical Corps served on the hospital ships *Kanowna,* and *Karoola,* then serving in casualty clearing stations in France before transferring to the Air Flying Corps. He arrived back in Australia in August 1920.

Pictured above, courtesy Australian War Memorial is the church at Villers-Bretonneux which was all but destroyed in fighting on the Western Front.

Private Keith Douglas Robinson – Assigned to the 18th Battalion he joined his unit at Gallipoli on August 16, 1915 suffering a gun shot wound to the head six days later in the battalion's very first operation.

Surviving the wound he was sent to the Western Front, where he reported sick with a carbuncle on his neck. On July 22 he died in No. 14 Stationary Hospital at Boulogne of spinal meningitis.

Corporal Edward Hugh Oprey – He had served his apprenticeship as a blacksmith and was with the NSW Railways Commission at Glenbrook when he enlisted and was assigned to the 6th Light Horse Regiment, training in the Middle East.

Hugh ran foul of the authorities for being out of bounds (twice) and for using threatening language to the sergeant of the guard.

In March 1918 he was attached to the Desert Corps as an acting lance corporal only to be reprimanded again for filling a water bottle from a stream. A common enough practice for any Australian boy, but a No! No! in Egypt.

He was discharged in Sydney in October 1919.

Lieutenant Clarence Hansby Read – Born in 1879 he appears to have joined the Royal Australian navy as a boy in 1897 possibly as a midshipman. He was a lieutenant in the RAN Reserve when he served in the Australian Naval and Military Expeditionary Force in 1914-15. In September 1914 he was in command of the naval detachment at Madang in Kaiser-Wilhelmland (German New Guinea).

In January-February 1915 he was executive officer at Herbertshohe, the former German capital of Nu Pommern (Great Britain) on the Bismarck Archipelago.

In March 1916 he embarked on the HMAT *Ballarat* for the voyage to the Suez Canal where his unit the RAN Bridging Train carried out work in several tugs and lighters for bridge building, building of piers and wharves

For some time he was attached to the 29th Battalion, but rejoined the RAN and appears to have survived the war.

.

A Springwood soldier laid to rest at Fromelles 94 years later

by Shirley Evans, Springwood Historian

Pamela Smith and I attended the launch of Glenbrook Historical Society's *Comrades in Arms* which was composed of short biographies of Glenbrook men who had served in World War I.

We were inspired to begin researching and writing about the men who were listed on the Springwood District World War I Honor Roll.

This proved to be very much more difficult than we had thought, but in the five years it took to complete the task we became very close to our World War I veterans and mourned those who had died in that dreadful war.

In his introduction to our book, *Remembrance: Springwood District Honor Roll 1914-1919* John Low wrote: "Their research has rescued the men recorded here from the creeping anonymity that would have been their fate and given them back to their community as individuals who lived and breathed their own special human uniqueness."

These men (and they were all men, no women) were certainly to a degree anonymous with the board hung inconspicuously on a side wall in the Springwood Civic Centre, and with many of the men proving quite difficult to identify.

A very few of them bore names we recognised from our research for *The Making of a Mountain Community: a Biographical Dictionary of the Springwood District*, but quite a number we discovered in the *Nepean Time*s reports of Springwood in the war years.

One of these names was Ed Hope (proved to be Edward James Hope), born and reared in Kingswood. He was employed by the railway as a fettler at the time of his enlistment and we found that his name appeared on the St Mary's Roll of Honour in Victoria Park and also on the Blue Mountains District War Memorial Hospital, Katoomba.

The last of the exhumed soldiers being carried to his last resting place at Fromelles.

In October, 1915 the *Nepean Times* reported a farewell to new enlistees, J. Reddall and E. Hope. They were both presented with wristlet watches from the Springwood people.

Part way through our research the National Archives of Australia digitised the World War I servicemen's records making it very much easier and less expensive to access and check as they were now available on the internet.

Prior to that, we sometimes wasted time and money purchasing records for the wrong men. With only an initial for the first name shown on the honour roll it was easy to make a mistake.

Private Edward Hope

Edward was one of 17 railway employees on the Springwood Roll (by far the largest occupation group) and, as a fettler, he must have worked in various parts of the Blue Mountains.

He was born in Kingswood in 1887 and was orphaned in 1898 when his mother, father and infant sister all died within a few months of one another.

A young sister, Florence, and he were presumably cared for by relatives. He named Florence as his next of kin when he enlisted.

Edward was allotted to the 54th Battalion which was predominantly composed of men from NSW. Half of them were Gallipoli veterans .

The new recruits left Australia on the *Aeneas* on December 20, 1915 joining the rest of the battalion at Tel-El-Kebir for training on February 16, 1916.

They embarked on the Caledonian for Marseilles in June, fighting their first major battle on July 19, 1916 at Fromelles. They suffered casualties equivalent to 65 per cent of the battalion's fighting strength. It was here that Edward died either on the 19th or 20th. 1,547 British and 5,533 Australians were either killed, wounded, taken prisoner or reported missing. This was Australia's bloodiest day in military history. ***Continued page 9***

False hope that brother may not have been killed

Continued from page 8

Florence, Edward's sister, was notified that her brother had been taken prisoner. This information came from a Red Cross communication resulting from information provided by the Germans.

Later the Royal Prussian War Office Medical Section corrected this and Florence was informed of Ed's death and probable burial in the neighbourhood of Fromelles. Florence, like many grieving and bereaved relatives wrote to the Army Base Records in Melbourne:

Dear Sir -
My brother No 4188 Private Edward James Hope, 54th Batt. Is Offically reported to have been Killed in Action on July 20th (previously reported missing) – He was my nearest Relative and if you could forward me some details of the manner of his Death I would be grateful.
& Oblige
Miss F.M. Hope
Kingswood
Nr Penrith
N.S.Wales

The Australian Red Cross Society endeavoured to record eye-witness accounts of deaths and woundings and Private J. Freehan, 4775 recorded the following at Etaples on November 4, 1916: "Hope was of my Co.[company] He was seen killed by several of the Co. who reported the fact at roll-call in my hearing."

Early in 1917 the "effects" of Edward Hope were sent to Florence. They consisted of a wrist watch and cover. She wrote the following to the Officer in Charge, Base Records:

Dear Sir –
In connection with the wrist watch forwarded to me as Next-of-Kin to the Late 4188 Pte E.J. Hope 54th Battalion I have to inform you that this watch did not belong to my Brother – He had a Presentation silver wrist watch with his name inscribed on back. The one I received was a gunmetal. I managed to clean some of the rust off the back of watch – it has an inscription not very distinct, but plain enough for me to see that it belongs elsewhere. I will forward this watch to you per post.
I was so disappointed to get the wrong watch and having received nothing at all up to the present time.
Yours faithfully,
F.M. Hope (Miss)
Kingswood
Via Penrith
N. S. Wales

It was very important to the wives, parents and siblings to receive something of their loved ones back from the war – something personal, not just an official medal. We can assume that Edward's "Presentation silver wrist watch" was the one presented to him at Springwood at the time of his enlistment.

Florence was required to confirm that she was Edward's closest living relative before she received his medals and that seemed to be that.

However, in 2009 through the efforts of descendants of Fromelles soldiers lost in the battle, and with the support of the British and Australian governments and the encouragement of the French, a massive initiative began to investigate known burial trenches at Fromelles and exhume the remains of British and Australian troops, identify them by modern scientific methods and rebury them in a special military cemetery.

The Sydney Morning Herald published photographs of the first 85 diggers identified in the Weekend Edition, November 7 - 8, 2009 and Private Edward Hope was one of these. The last of these exhumed soldiers, one who had not been identified, was buried on July 19, 2010.

His remains were transported in a gun carriage drawn by horses and accompanied by military personnel, Australia's Governor General, Quentin Bryce, and Britain's Prince Charles, both of whom delivered moving addresses.

But the most moving were the short addresses given by descendants of those fallen British and Australian soldiers.

They read letters very similar to those written by Florence Hope, expressing the fears and wishes of both the soldiers and those who waited at home.

There has not been universal approval of the reburial of men buried in mass graves at battle sites.

In *The Sydney Morning Herald*, February 5, 2010, Neil McDonald, historian and film critic, stated that "Exhuming and reinterring the war dead in more 'suitable"'sites always risks distorting history". But I feel that still grieving relatives will gain great comfort from knowing that their lost loved ones have been laid reverently to rest in a beautiful place, close to where they can be visited and remembered.

ONE MAN'S DEDICATION

Determined to honour those who died on that faraway battlefield, 94 years ago, the Melbourne teacher and amateur historian, Lambis Englezos, AM set out to research documents and records of authorities around the world.

But little has been said or written about Lambis Englezos, AM whose tenacity saw him go public with his theory of a missing mass Allied grave. The Fromelles story began to emerge from the fog of history in 2002 when Englezos went public with his theory. Evidence from German archives, documenting such a burial ground, convinced Australian authorities a search was worthwhile.

It is one of the darkest, most heroic days in Australian history. Yet it barely rates a mention in our history books**.** .

... John Leary, OAM

Two Woodford brothers killed

Curiosity has lead Woodford residents of 10 years, Rhonda and Terry Flowers to research details of the four soldiers listed as killed in World War 1 on the Woodford War Memorial and *HERITAGE* thanks them for the following contribution.

“During the past ten years we became aware of a structure marooned between the railway line and the Great Western Highway at Woodford.

“We were curious but never seemed to find the time to inspect the site.

“As the juggernaut of the current highway widening was imminent we were afraid that the structure might disappear forever before we could discover what was its purpose.

“Our motivation to visit the site was curiosity and we were more than surprised to find the structure was a war memorial initially constructed by Thomas Thomas and others of the village of Woodford as a commemoration.’’

On the east face of the memorial we found the following names of those who died IN World War 1: CH Dakin, C Fiddling, J Fiddling and lJ Wheeler.

In *The Sydney Morning Herald* Saturday, August 25, 1916 under the heading MEMORIAL SERVICE AT WOODFORD the following appeared:

The memorial service for the brothers Privates Jack and Charles Fiddling, sons of Mr and Mrs W Fiddling, of Woodford, was held in the grounds of the Woodford Red Cross Convalescent Home recently, about 200 being present.

Every town from Katoomba to

Valley Heights was represented. The service was conducted by the Rev EC Robison, of Wentworth Falls. Captain Chaplain Parker read the lesson, and Captain McKoan, a returned wounded soldier, who has been fighting at ANZAC, Beauchope Hill, Fisherman’s Hut, Suvla Bay, and Hill 60, the farthest point reached by the expedition, performed the ceremony of unveiling the Woodford roll of honour.’

Woodford War Memorial - To those who for King and Empire enlisted from this village for service in the Great War 1914 - 1919.

The Australian War Memorial website reveals that Private John Fiddling (Jack) was killed in action on June 6, 1916 and his brother Private Charles Fiddling died of wounds in France the following month July 19, 1916.

Private John Fiddling is buried in France, 83 Brewery Orchard Cemetery Bois-Grenier.

Private Charles Fiddling is buried France, 768 Estaires Communal Cemetery.

Lieutenant Clarence Herbert was killed in action on April 14, 1917 near Noreuil, France and was buried where he fell. No trace of his gravesite has been found and he is commemorated on the Villers-Bretonneux Memorial, France.

Private John Edward Wheeler was killed in action October 5, 1916 and is buried Belgium 127 Railway Dugouts Burial Ground (Transport Farm) Zillebeke.

Private John Edward Wheeler brothers Stanley and Frederick also served in WW1 but returned.

In *The Sydney Morning Herald* on Thursday, May 3, 1917 the following appeared:

A cablegram has been received stating that Lieutenant Clarence Herbert Dakin has been killed in France.

The deceased was the only son of Captain H. Dakin, secretary of the National Rifle Association of N SW (NRA), who is at present engaged in the Riverina enrolling recruits for the NRA. 150 unit of reinforcements, which he proposed to take to the front.

The young officer, who was 22 years old, enlisted as a private two years ago, saw service at Gallipoli, and won his commission in France.’

“In all there are over twenty names of those who served in WW1 recorded on Woodford War Memorial. They are not just names.

“They were once the living youth of the tiny village of Woodford who worked in dairies and orchards and walked the same streets we walk today.

“In researching each name, on the Woodford War Memorial, through the National Archives of Australia, National Library of Australia online newspapers and the Australian War Memorial we hope to ensure that if one day Woodford War Memorial is destroyed by an ever widening highway the names of the youths of Woodford who served in WW1 are never lost,” Rhonda and Terry said.

More than just an old building

By John Low

Travelling by train, I've always enjoyed charting the progress of my journey to and from the flat lands by the familiar natural and historical landmarks along the way.

In recent times, however, under the relentless 'up-grade' of the Great Western Highway, the familiar has been subjected to serious disturbance. Demolition, removal and erasure have muddied meaning and context, often beyond retrieval, and it has all been very disturbing.

Decisions to alter the historical landscape, no matter what benefits may result, always bring loss. Lawson especially has been affected, losing almost completely its old commercial centre and all the intangible associations these old shops had with the village and people who worked and lived there.

This is not a matter to be taken lightly. Buildings, even largely uncelebrated ones, become part of a place and when they die more than just the bricks and mortar dies with them. I think it was John Ruskin who, speaking of old buildings, said something to the effect 'that we may be able to live without them but we can't remember without them.'

Many of us would probably feel we can live without such an old and outwardly unprepossessing building as that which bore the name of Macbrair and, until recently, accommodated several shops on the highway opposite Lawson Railway Station.

Yet, while its plain, commercially functional design may not be cause for architectural excitement, I do regret its passing and when my train pulls in to Lawson I feel its absence.

As its façade proudly declared, the building was built in 1923 for Lawrence Macbrair, a successful businessman who, following the First World War in which his two younger sons were killed, sold up his interests in North Queensland and came south with his grief.

In Lawson he found solace and a renewed zest for life through

The Macbrair Building a plain, commercially functional design which may not be cause for architectural excitement now a victim of the Great Western Highway road widening.

business and community service, being elected with a large vote to the Blue Mountains Shire Council in 1922 and purchasing that same year the block of vacant land fronting the highway.

Interestingly, when the land came into his possession it appears to have not been completely empty for the council rate books of the day record it as "vacant land and ruin". This "ruin" adds an extra layer of historical meaning that links the site to the earliest days of the town.

The recorded history of the place we know today as Lawson began on Thursday, May 20, 1813 when three gentleman farmers turned explorers – Gregory Blaxland, William Lawson and William Charles Wentworth – accompanied by four assistants, three horses and five dogs, "… encamped at 12 o'clock at the head of a swamp of about three acres covered with rushy coarse grass with water running through the middle of it."

"The horses", wrote Blaxland, "by necessity lived on the coarse swamp grass or rush. Nothing else could be got for them".

It was as a source of water and feed that 'Christmas Swamp' (so named by Surveyor-General John Oxley in 1817, probably because of a local profusion of native Christmas Bells), became one of the principal stopping places for travelers and stock using the road that was constructed across the Blue Mountains in the wake of the 1813 expedition.

As these watering places began to be named according to their distances from the Nepean River, Christmas Swamp became '24 Mile Hollow' and from the late 1820s an illegal 'hut' servicing the needs of weary travelers prospered for a number of years.

When legal inn-keepers, Henry and Sarah Wilson, formerly of the Scotch Thistle Inn at Blackheath and the Welcome Inn at The Valley near Springwood, acquired a 100 acre portion of land at 24 Mile Hollow in 1843 they built a permanent hostelry and were granted a license to operate under the sign of 'Blue Mountain'.

Such early inns became landmarks along the Western Road that measured the progress of a journey and the Blue Mountain Inn became well known to travelers.

Indeed, the location of 24 Mile Hollow was soon being referred to as 'Blue Mountain', a name it retained until the town that later evolved became Lawson in 1879.

Continued page 12

‘The Blue Mountains Parrot’ a popular local identity

Continued from page 11

The building itself survived until 1917 and was located in what is now the playground of the public school.

For a period in the 1850s and 1860s the Wilson family leased their inn at Blue Mountain and lived elsewhere but, astute business people that they were, returned when the Western Railway line arrived in 1867 and a small platform was constructed a short distance away.

Within a few years (1875) they had built another inn closer to the platform, transferring both the license and the ‘Blue Mountain’ name. It was located on the block later purchased by Laurence Macbrair.

Unlike most of the Western Road inns, the Blue Mountain prospered in association with the railway. Trains stopped opposite to take on water and passengers were glad of the opportunity for refreshments while they waited.

The Wilson’s youngest daughter Adelaide would be waiting on the station to welcome them and suggest a walk across the road to the inn or the purchase of coffee, tea and sandwiches from her stall on the platform.

She became a popular local identity, known to all as “the Blue Mountain Parrot”. Whether this related to her verbal facility or colourful dress I’m not sure!

Her brother Affriat, who lived in the de-licensed inn up the road, also attracted attention as a naturalist, being especially skilled in the capture and handling of snakes. His clients included a number of museums.

On Henry Wilson’s death in 1880 the inn’s license passed to Sarah who subsequently transferred it to a new Blue Mountain Hotel built next door by the end of the decade.

The 1875 inn ceased to trade and its condition gradually deteriorated. It was eventually demolished in 1906, though the rate book entry quoted earlier suggests that something at least, perhaps its foundations, still survived when the land was acquired by Macbrair in 1922.

Described by the local newspaper in 1923 as “one of the town’s finest”, the new building sadly was not long in Macbrair’s hands. Aged 74, he passed away in 1925 and was mourned by the town in which, his obituary recorded, “he displayed so much practical faith”.

The plain, business-like architecture of the Macbrair Building spoke of more than just small town commerce and its demolition removes another ‘footprint’ leading back to connect us with our past.

A plaque on a ‘heritage’ sandstone plinth can never be more than a makeshift recognition of what has gone but, done properly, it can preserve the significance of a site and alert passers-by to the layers of community memory that exist there.

While other lost Lawson buildings equally deserve their stories to be told in this way, I hope some such marker will eventually be erected where the Wilsons and Laurence Macbrair (and many others) did business all those years ago.

Note: While no referencing for quotes etc. has been included this can be supplied on request.

Council’s Heritage Review

Continued from page 1

Council staff are currently working with council’s heritage advisor, Christo Aitken, to complete information required to inform this heritage review.

The proposed Draft LEP Amendment will comprise three main elements being the deletion of some items from the LEP Schedule 2 (due to the fact that they are no longer considered to hold heritage significance); insertion of new items into the LEP Schedule 2 as supported by the heritage studies; and consolidation of separate sites into conservation areas in key areas such as Mt York.

The new items proposed to be listed in the Draft LEP Amendment include private residential houses, historic monuments and items of heritage significance located in natural areas such as historic walking tracks. Further details regarding the precise nature of all proposed heritage items will be provided to historical societies by council in due course.

Initially council staff will be consulting with land owners on the information developed to support the proposed listing of sites to seek their support. This includes private land owners (a small number), and state government agencies. A number of council owned and /or managed areas are also proposed for heritage listing.

Council staff will then be consulting with the various historical societies of the Blue Mountains on the proposed heritage items under the review.

A workshop will be scheduled in due course to be held at council to inform all historical societies of the review process and what input the historical societies may wish to contribute to this process. Once a date and time for the workshop are set, invitations will be forwarded to historical societies.

The extent of the review is currently limited to areas identified under LEP 1991 and does not include areas covered under LEP 2005 (main village and town areas). A review of heritage items located in LEP 2005 will be undertaken in the future, after progression of the Review of LEP 1991 items.

The Draft LEP Amendment for heritage is currently being undertaken as part of the new Part 3 ‘Gateway’ process. The city planning team is currently working with the Department of Planning in progressing this LEP through the required planning process.

I look forward to working with the various historical societies on this heritage project. Should you require any further information on the heritage review, I am available on Mon- Wed on (02) 4780 5774 or email fblaxland@bmcc.nsw.gov.au

The Cambodian exhibition

Hurry, Hurry, Hurry, No Time to Lose

By Peter Stanbury, OAM, Phd.

Force of circumstances is a powerful master. It sometimes happens that normal planning is not an option and an exhibition needs to be up and running in an impossibly short time. How to do it?

Faced with such a situation one needs confidence and a list of logical steps. The confidence is necessary to give others confidence and the list of logical steps enables one to delete a step or two without causing undue panic.

I recently undertook five weeks voluntary work at the National Museum of Cambodia. The work was arranged through Australian Business Volunteers, an organisation in Canberra that provides opportunities for Australians to exchange skills in developing Asian countries. The volunteer contributes time and expertise, the organisation contributes the airfare, accommodation and $20 per day for subsistence. For more details please see www.abv.org.au/.)

I was expecting in early July to change some textiles that had been on display for too long, to advise on suitable storage space for some recent donations and to discuss health and safety issues. I had it all worked out - a leisurely, informative month away from the usual routine and winter weather back in Australia

On arrival in Phnom Penh the assignment suddenly changed: please would I set up an exhibition of temple hangings (*pidans*).

But not just yet, because all staff were busy on an international travelling exhibition that was due to open in three weeks – all staff would be busy with that so there would be only a week or so to set up the temple hangings before the exhibition was to open at the end of the month.

And as there was no money left, consequently funds would need to be found. And another thing, staff had been working so hard on the major exhibition, some would be on leave immediately after and only a limited few would be available for the second exhibition.

Advertise your exhibition outside the Museum.

So there were three weeks to plan and find funds (no staff to help) and one week (with some limited help) to refurbish the exhibition space, physically mount the exhibition, arrange publicity and have an opening.

Pidan means ceiling in Khmer. Complex pictorial woven silk textiles, often depicting scenes in the life of the Buddha, are hung or painted above or near the principal Buddha of a temple, hence the ceiling reference.

Pidans are never worn but are designed and woven to demonstrate skill and to acquire merit by the donation.

They require months to weave and were becoming rare even before the Pol Pot regime destroyed much tradition. Very gradually NGOs and others are trying to re-aquaint weavers with the necessary skills to weave and market both wearable silk goods and items of religious or traditional significance.

I was very lucky to find a Japanese group of friends of an NGO that were prepared to invest around $1,000 in the exhibition.

The rest of the preparation time was spent planning.

It is important to plan because without a written plan it is difficult to determine which items can be omitted at a moment's notice because of resource limitations (time, availability, funding).

I hope my list of notes may be of use to others planning in a similar hurry. Don't expect to be able to do everything on the list, but at least recognise that you are skipping some items rather than forgetting them.

Items to be exhibited
Availability
Size and shape
Group compatible items
Hanging or display mechanism
Conservation requirements

Room
Hanging or display context
Security
Does room need repainting?
Lighting

Arrangement of items and scope of story
How best to tell the story
Placement of primary labels
Secondary labels
Take away information leaflets
Brochure or booklet
Posters, handouts, banner
Will you need carpet or arrows to direct visitors?

Continued page 14

The Cambodian exhibition

Continued from page 13

Research
What is the main idea behind the exhibition?
Who has told a similar story and how?
Research and writing
Focus of exhibition (in the room and visitors)
Contact those who may be able to contribute and invite participation

Education
Does the exhibition relate to primary, secondary tertiary studies?
Can the exhibition be related to special interest groups?
Is written program for such groups appropriate?
Advise groups; invite participation

Opening
Who will open – firm commitment?
Who will be invited?
Speeches: MC, director, opener
Refreshments
Gift for opener
Gift for guests (good publicity)
Invitation lists and mail out
Source tables, glasses, plates, cups, napkins for opening

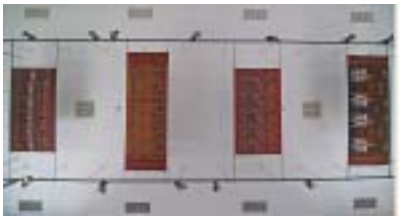
Publicity
Prepare photographs and press release
Local press and radio (photographs/ gift/novelty angle)
National press and electronic media (photographs/gift/novelty angle)
Local inhabitants, similar institutions
Free 'what's on' listings
Posters
Banner outside museum

Actual work
Clean space
Hang or mount objects
Mount and carefully position labels
Sort lighting (remember conservation issues)
Ring or visit journalists
Position / distribute posters
Hang banner
Buy flowers and food for opening

Day before
Arrange microphone
Wrap present for opener
Double check labels
Remind journalists
Ask director and opener if they require anything
Arrange cleaning of area

Two hours before
Check entrance to museum
Check museum
Check director and opener
Check exhibition, flowers, food
Change into appropriate clothes
If raining have umbrellas, towels, receptacles for wet gear handy
Calm others involved in the exhibition and allow them time to get dressed.

Explain how your objects are made or arrived at the museum.



As pidans are often found on the ceiling, we used the ceiling for display as well as the walls.

Explain the exhibition to children and devise activities.

The author

Dr Peter Stanbury, OAM (pictured at right) who last month returned from Cambodia has been a volunteer in various organisations for many years and has been an executive member of BMACHO since its inception. He has been a volunteer with Australian Business Volunteers (ABV) for a number of years and has worked as a volunteer in many countries including Egypt, Cambodia and Peru. He was formerly the director of Macleay Museum at Sydney University. He was awarded the ABV's annual Altruism Award for 2009.

Mediterranean diet for World Heritage List!!!

There is a tendency to only think of heritage buildings, wilderness areas, magnificent landscapes, ancient castles, Greek temples and monoliths such as Egypt's pyramids when one thinks of UNESCO's World Heritage List.

But the World Heritage List includes sites ranging from the birthplace of Buddha to the Tower of London and lesser-known list of "intangible" cultural heritage covering oral traditions, performing arts, social practice, rituals rock art and festivals.

Among other nominations, a submission from the Italians is being considered for listing this year of the Mediterranean diet, with its mix of fresh fruit and vegetables, grilled fish and lashings of olive oil favoured in Greece, Italy and Spain.
Guardian News & Media

WELCOME TO NEW MEMBER SOON TO CELEBRATE 25 YEARS EXISTENCE

The Lithgow and District Family History Society Inc. which will celebrate its 25th anniversary next year is the latest group to join BMACHO.

President of the society, Eleanor Martin said the group was established in 1986 to allow local people and others to research their family lines and to learn their family stories.

The society of volunteers has established a library, now situated at the Corner of Tank and Union Streets to store the extensive resources of local cemetery records, local and family histories, journals from international and national sources, many photographs, copies of Governments Gazettes and local newspapers as well as IGAs and Birth, Death and Marriage records on CDs, Fiche and reels. Convict, shipping, immigration and census records are also held.

Social gatherings and bus trips to cemeteries and archives as well as workshops and seminars are arranged to assist people to research and store their information, source identification and display their family trees.

Some records are available for sale upon request and the society produces a Journal "Lithgow Pioneer Press" three times a year.

Researchers can attend the library during open hours and receive assistance to work through the extensive indexes of much of the resources for a small fee.Open times are every Friday 10am - 4pm. Tuesday 6pm - 9pm and first Saturday 10am - 4pm of each month except January

Contact number is (02) 6353 1089 during open hours e-mail: ldfhs@lisp.com.au website http://www.lisp.com.au/~ldfhs P.O. Box 516 Lithgow NSW. 2790

Vale -- Hugh Manners Bickford (1927-2010)

Sadly, long-time member and public officer of Blue Mountains Historical Society Inc., Hugh Bickford, passed away in Katoomba Hospital September 13, 2010; he was aged 83.

Hugh was cremated at Leura on September 21, 2010 and the Blue Mountains Historical Society was strongly represented at the funeral service.

Condolences were extended to his wife Janet, who is well known to many, and to his sons Mike and Tim and their families.

Hugh had a long and distinguished career working for CSR, latterly as property manager and company valuer, and after retirement in 1986 he was asked to return as a consultant which he did for a further decade.

In 1984, while Hugh and Janet lived in West Pymble, they purchased land at Wentworth Falls – the property adjacent to Hobby's Reach and a home was built which they then used as a weekender.

In 1988 they changed the location of their Sydney residence to Pennant Hills, but in 1996, after Hugh's second retirement, they moved permanently to Wentworth Falls.

In the mountains, Hugh was active in the Wentworth Falls Probus Club becoming president as he also was for the Wentworth Falls Autumn Garden Festival.

But in recent years it has been the restoration of his treasured veteran Austin car that has consumed much of his time, that vehicle having been opportunistically acquired for the second time after a long period in the hands of another motorist.

Of his own accord, from 1986 Hugh kindly started to mow the lower slopes of Hobby's Reach, initially with a hand mower but from 1988 using a ride-on mower which he even drove until he suffered a stroke earlier this year.

However it was not until 2001 that he joined the Blue Mountains Historical Society, becoming a member of the management committee in 2004 and then president for two years between 2005 and 2007.

In 2008 he became the public officer and in August that year he was awarded an honorary life membership of the society.

For many years Hugh informally acted as a caretaker, responding to sudden activations of the security lighting and being available to admit tradesmen.

Hugh was the speaker in July 2001 when his topic was "The Wreck of the *Admella*", an event which occurred in 1859; the gist of his talk was reported in *Hobby's Outreach* (Aug/Sept. 2001, p.4).

Two years later, in June 2003, Hugh addressed the society on the subject of "Cockatoo Island Dockyard Wartime Industrial Role" being a place which he had visited frequently whilst his father was in charge of Cockatoo Island.

Hugh was a softly spoken person with a wealth of knowledge which he willingly shared with others. He was a most delightful gentleman whom all shall miss greatly.

Contributed by Peter Rickwood. Text approved by Mrs Janet Bickford.

Kung fu heritage

Shaolin temple, the Buddhist monastery that is also the birth-place of Chinese kung fu, has been added to the United Nations' list of World Heritage sites

UNESCO has named historical monuments near Dengfeng city including the Shaolin.

Doug Knowles elected to lead Glenbrook Historical Society.....

The new president of Glenbrook and District Historical Society Inc., Doug Knowles can claim that his association with Glenbrook could be said to start back in 1924 more than a decade before he was born.

His grandmother, Vera Dare came to Glenbrook on a holiday in 1924 and later purchased land and a cottage in the town.

However, Doug did not come to Glenbrook until 1946 when his parents built a new house in the mountains village.

He started his schooling at Glenbrook Primary School and went on to finish his secondary education at Hurlstone Agricultural High School, Glenfield before taking up an apprenticeship to Hazelwood's Nursery at Epping.

Completing his apprenticeship he soon found there was plenty of work in landscape construction and green keeping in the Lower Blue Mountains. In his spare time he did general cartage including bags of flour from the Glenbrook Railway Station to McCall's bakery.

Doug recalls, "clearing and lopping trees in the 1950s which provided lots of firewood which he sold for £3/10/- per ton for stove wood [people still cooked on fuel stoves in those days]."

Doug also recalls that in 1957 trees to the north of the Glenbrook Bowling Club (established a few years earlier) were casting shadows on the turf bowling greens.

As a horticulturist, he was contracted to lop the trees and settled his account when insufficient funds were available by accepting debentures in the club. He claims to be possibly the only person to have debentures in the club and not be a member.

In 1976, needing more space for his nursery at Glenbrook he purchased a 5 acre block at Valley Heights, selling his Glenbrook property ending 50 years association with the village of Glenbrook

After being involved in landscape construction for about 30 years, he made a career change accepting a job with TAFE, teaching horticultural skills including plant propagation, plant recognition and botany. Doug says this was probably the most rewarding and interesting 20 years leading up to his retirement.

Doug says he has always been interested in local history and joined the Glenbrook and District Historical Society about 8 years ago.

"I especially enjoy the society's regular 'Walks & Talks' to historic sites in Glenbrook and relating the places and events to the individuals involved; many of the people having children, grandchildren or great grandchildren living in the area.

"The society is currently negotiating with Caltex management to secure community use of the Pointsman's Cottage," Mr Knowles said.

The Pointsman's Cottage - Photograph by John Leary, OAM

Doug Knowles

"The property would be an ideal venue to stage exhibitions such as the display of railway heritage photographs. Many of the society's photographs are from the Nolan family collection and were taken before 1920.

"The society is also currently promoting Whitton Park as the 'village green' and fighting off attempts to have the land fenced for selective group use."

Doug Knowles takes over the presidency of Glenbrook and District Historical Society from Tim Miers who has held the position since the society was formed during the Glenbrook Primary School centenary in 1992.

Doug is also a management committee member of the Blue Mountains Association of Cultural Heritage Organisations Inc.

HISTORY OF LAWSON HALL SHOULD NOT BE IGNORED

Mid Mountains Historical Society Inc. has written to Blue Mountains City Council expressing the strong opinion that the past history of the Old Community Hall at Lawson must not be ignored when determining its future.

In her letter, society president Nance Cooper stated it becomes evident that for the major part of its history since its opening in 1903, it has been a centre for community activities.

"There had been 98 years of vigorous community life before its function was narrowed for approximately 3 years to that of a youth centre before its regrettable closure in 2004.

"The closure of the hall deprived societies and community groups such as the Mid Mountains Historical Society of an important conference venue.

"It has been impossible, for example, for this society to take a part in the annual History Week conducted by the History Council of NSW," said Nance Cooper.

Honorary life membership for two at Mt Wilson

Pictured are Mt Wilson & Mt Irvine Historical Society president, Des Barrett, honorary life member, Arthur Delbridge, AO and vice president, Darell Conybeare. Pictured below is Bruce Wright who now lives in West Australia and was unable to be at the presentation.

Bruce Wright

Arthur Delbridge, AO and Bruce White were honoured at a recent annual general meeting of the Mt Wilson & Mt Irvine historical Society.

Darrell Conybeare was on hand to present Arthur with his framed certificate.

The citation for Arthur stated: *In recognition and appreciation of his many years and dedicated support for the founding and continued development of the society*

His leadership and direction over several years set the society's standing in the community, ensured the preservation of significant heritage sites and established regular avenues for wide distribution of historical information.

Bruce Wright was not able to be at the meeting to receive his award.

In his absence research officer, Mary Reynolds spoke warmly of Bruce's many contributions to the development of the society and the Turkish Bath Museum over the society's first 10 years.

The citation on Bruce's certificate stated: *In recognition and appreciation of his many years of dedicated support for the restoration and establishment of the Turkish Bath Museum.*

His professional skill and commitment to archaeological research and development at the Turkish Bath building and precinct and to the administration of the society in the early years were invaluable.

Professor Reynolds takes leave

Professor Barrie Reynolds who at the annual general meeting earlier this year stood down from the position of secretary, a position he has held since BMACHO was formed, has taken 6 months leave from the organisation until the end of March 2011.

This follows his hospitalisation last month for emergency surgery. Barrie has asked that he not be contacted concerning BMACHO matters until he returns from leave.

He had accepted an executive role on BMACHO's management committee and was involved in a number of new initiatives at the time of his illness.

The idea of BMACHO was conceived by Barrie and enthusiastically embraced by those who attended the 2004 Blue Mountains Local History Conference at the Carrington Hotel in Katoomba at which he was stressing the importance of having a cultural heritage strategy for the city.

Barrie has had the ability to gather around him individuals, both professional and amateur as well as heritage organisations to provide a voice for cultural heritage and to encourage and assist cultural heritage activities of member organisations.

Barrie has worked tirelessly for the recognition of cultural heritage; it has been the motivation, contagious enthusiasm, academic expertise and professional acumen displayed by Barrie that has driven much of what has been achieved by BMACHO in its formative years.

Members of BMACHO will wish Barrie a speedy recovery and will respect his wish not to be contacted concerning BMACHO matters until he returns from leave.

GLEN DAVIS

The shale oil ghost town of National Oil Pty Ltd. Glen Davis and its people

Renowned mining historian and former Glen Davis resident Leonie Knapman has launched her much awaited history of Glen Davis.

Leonie lived at Glen Davis in the Blue Mountains from 1940 until it was auctioned off and removed by 1954.

Leonie has presented papers on the history of the township to groups and mining conferences around Australia, Tasmania, and in 2010 Greymouth in New Zealand.

After leaving Glen Davis in December 1954 Leonie thought often of the first 14 years of her life spent in the beautiful Capertee Valley and the thousands of people who lived and worked in the town.

Most of the hard times of the town's residents passed over the heads of their children and it was after researching the history of Glen Davis to write a book that Leonie appreciated their frustrations. Families were coming out of the depression into a wartime situation and a life of rationing of petrol, tyres, food and clothing. This was further compounded by drought followed by almost 30 floods.

Leonie looked at what makes people choose the mining life and live in remote areas foregoing the comforts of life in the larger towns or cities.

Men came from all walks of life searching for work and not all were familiar with the physical grind of the mining industry and its drawbacks.

While the Glen Davis works was partly a response to the unemployment of the depression years of the 1930s the works took on a greater significance with the onset of war when the vulnerability of Australia's oil supplies was clearly demonstrated. After the war Glen Davis was living on borrowed time.

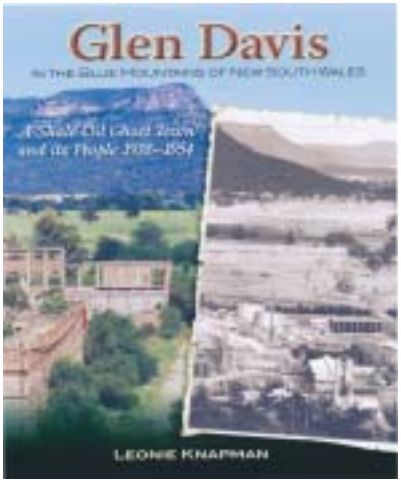
When the government mooted closure of the company it sparked state wide controversy and workers took matters into their own hands. On the night of June 12, 1952 fifty two miners began a stay-down strike lasting 26 days. It was the longest stay in strike in Australian history.

In spite of the efforts of the Commonwealth authorities to shut down the retorts they mysteriously kept working to prevent their dismantling. The authorities removed the power fuses to force the retorts out of action but they were replaced just as quickly and shale for the retorts seemed to appear from nowhere.

The day the strike ended was an emotional one. A large crowd of families and visiting miners waited as the men emerged on electric loco hauled transports. Unfortunately their efforts and discomfort were in vain.

The closure still took place. It was the last straw for the residents who thought their homes and jobs were secure.

Today, over 50 years later, the valley has returned to farming and grazing



as it had been since the 1800s, a far cry from the turbulent fourteen years of National Oil Pty Ltd.

Glen Davis has been stripped of its town status. It is as if the government had tried to wipe it off the face of the earth.

Book launched at Irish gaol

Lord Mayor of Cork, Michael O'Connell, Suzanne Voytas, Christina Henri, Roses from the Heart and Australian Ambassador to Ireland, Bruce Davis at the launch.

Blue Mountains Family History Society president, researcher and author, Suzanne Voytas has recently returned from Ireland, where her book *Elizabeth 1828, the worst and most turbulent* was launched at Cork City Gaol.

The book details the lives of the 194 Irish convict women, who together with 16 of their children were transported on the ship *Elizabeth,* which sailed from Cobb, County Cork on August 28, 1827.

The biographies of the women, detail their achievements, their struggles to live in a foreign land and to be part of a new social structure while raising their colony children.

Copies of the book can be obtained from Suzanne Voytas, details on the website: www.elizabeth1828.com RRP $35 plus $10 postage.

Elevating the emancipist ...

While Macquarie believed in the punishment of convicts he also believed in their reformation.

He saw no reason why emancipists (convicts who had served their time or been pardoned) should not be readmitted to their former rank in society if they were of good character and standing.

In fact he came to the conclusion that some of the most meritorious and public-spirited men in the colony were emancipists.

In adopting this radical policy he appointed emancipists to positions of authority and trust and even invited them to dine with him at Government House.

Although receiving qualified support from Lord Bathurst, the new Secretary of State for the Colonies, he aroused the hostility of a group of influential landholders and military officers.

Known as the exclusives, they believed convicts, even when emancipated, had no place in respectable society and to readmit them would upset the existing social order

The rising number of pardons by the Governor, and his injunction to magistrates to limit flogging as much as possible, increased their alarm.

So scandalised were the officers of the 46th Regiment that they entered a pact not to fraternise with anyone who had arrived in the colony under sentence of transportation.

Macquarie would not back down.

In 1813 he told Lord Bathurst that while most of the free settlers would undoubtedly prefer never to admit emancipists to equality with themselves, it was after all a convict colony and if they were too proud to associate with convicts they should move to another country.[1]

The first to benefit from Macquarie's liberal measures were Simeon Lord and Andrew Thompson whom he made magistrates in 1810.

Others included William Redfern who was made assistant principal surgeon, James Meehan, who became acting surveyor and Isaac Nichols who was appointed superintendent of convicts.

Extract from T*he Governor. Lachlan Macquarie 1810 to 1821*, a State Library of NSW publication. ISBN 0 7313 7203 4.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE is BMACHO's official newsletter.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Tomah Botanic Gardens, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc.., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2010-11 is: John Leary (president), Ian Jack (vice president), Jan Koperberg (secretary), Kathie McMahon-Nolf (treasurer), Jean Arthur, Joan Kent, Doug Knowles, Dick Morony (public officer), Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

JANUARY - FEBRUARY 2011 ISSUE No. 13

Lithgow's Lidsdale House gardens to be restored

By Ian Milliss

One of Paul Sorensen's most resolved but least seen gardens, surrounding Lidsdale House on the Castlereagh Highway at Lidsdale west of Lithgow, is about to undergo a much needed restoration.

The garden was designed by Sorensen shortly after the end of WWII but has been in decline for several decades until its recent purchase by Centennial Coal who are using it as their central western area offices.

In recognition of its significance to the local community they have begun a long term restoration program covering both the house and the garden.

Planted in the 1940s, the garden has suffered from neglect, over maturity and inappropriate ornamentation after passing through a number of private hands since the 1960s.

On completion of building repairs a long term plan to resuscitate and restore the garden will be implemented. It seems right that a garden that grew out of the passion of a coal mine owner should now be restored by a coal mining company.

Lower garden path at Lidsdale House

Lidsdale House east terrace

For Paul Sorensen, as for so many others, the Second World War was a tragedy in which he lost the elder two of his three sons, both in the RAF.

This was an undoubted low point in his life and a particularly poignant tragedy for a man whose hatred of war had led him to migrate to Australia from his native Denmark in 1915 to avoid the First World War.

Sorensen responded in the early post war period by reducing his expansion plans while working on a number of smaller Blue Mountains gardens but a further blow fell with the death in 1947 of his friend and patron Henri Van De Velde of Everglades.

It was round this time that he was commissioned to design a two acre garden at Lidsdale House by coal mine proprietor Frank Neubeck. Neubeck had also suffered the loss of his eldest son in the RAAF in 1945, a fact which may have drawn two very different personalities closer together. It was to be Sorensen's largest commission until 1950 when post war recovery really set in.

Neubeck was the grandson of Alois Neubeck, a Bavarian immigrant who had arrived in 1855 with his wife Clara. Settling in Wallerawang he was employed as a blacksmith by James Walker, the landowner who had hosted Charles Darwin during his 1836 visit.

The Neubeck family prospered, purchasing property in the nearby Lidsdale and Blackmans Flat area. Francis (Frank) was born in 1889 and in 1910 took a small mining lease with his brother William where he also operated a sawmill.

These enterprises grew until in 1940 he opened the first black coal open cut in Australia, the Commonwealth Colliery No. 2 at Lidsdale.

From the president's pen.....

Cox's Road the golden way west

The first European crossing of the Blue Mountains in 1813 represents an important milestone in the history of Australia and the 200th anniversary of this event has significance at local, regional, state and federal levels.

There appears to be general acceptance that any celebration of that anniversary needs to embrace the series of inter related events immediately after Lawson, Blaxland and Wentworth crossed the Mountains in May and June 1813.

George William Evans began his survey of a roadway across the Blue Mountains in November 1813 and went as far as the future Bathurst. William Cox then supervised the construction of the road from July 1814 to January 1815. Governor Macquarie travelled along the new road in April and May 1815 and selected the site of Bathurst.

More than a year ago the RAHS offered to provide co-ordination within its limited administrative capacity.

The RAHS appointed its senior vice president, the eminently qualified Professor David Carment AM to oversee this co-ordination and subsequently the council of that body gave authority for the loosely connected group of stakeholders to act as a committee of the Royal Australian Historical Society.

These actions of the RAHS in providing a first class lead to a commemoration to mark events surrounding three of the Colony's explorers' crossing of the Blue Mountains from 1813 - 1815 are indeed commendable and need to be acknowledged by stakeholders.

David Carment has now written to the Premier and Leader of the Opposition of NSW or the appropriate ministers/ shadow ministers seeking a meeting to discuss plans for the commemoration.

It is also pleasing to note that John Aquilina, representing the Macquarie Committee, is preparing a report for the Premier, with a view to re-inventing that committee to cover the period 2013 – 2015.

Already a number of local government units and historical societies are organising celebratory activities and these will be an important part of the anniversary event as they will involve the wider community.

However, there also needs to be a commemoration with a lasting benefit.

Time is fast running out to produce a worthwhile commemoration and it is a harsh reality that without state and perhaps federal funding it will be difficult to achieve a worthwhile outcome. Some might see the present 'close down' of the NSW State Parliament as an impediment. However, it should be seen as a golden opportunity to seek commitments from all sides of parliament, Labor, Liberal and Greens; in the run-up to the March elections.

One of the ideas proposed has been to develop a heritage trail from Emu Plains to Bathurst based on the line of Cox's Road. It was envisaged that at various spots along the route the public might be able to view interpretive signage outlining the events to be commemorated.

As the Cox's Road built in 1814 - 15 passed through the present day LGAs of Penrith, Blue Mountains, Oberon, Lithgow and Bathurst it is logical to consider this a heritage trail project which could well attract federal funding.

It has already attracted the interest of the RTA and Land & Property Management Authority. The National Trust and others in the heritage sector have also done considerable research into the Cox's Road alignment and remnants of this heritage roadway during the past decade.

This is a ready made and very worthwhile project and every endeavour should be made to refine and define this proposal so that it may have a solid and achievable objective.

Let's not squander a great opportunity to have a lasting commemoration.

John Leary, OAM
President, Blue Mountains Association of Cultural Heritage Organisations Inc.

Sorenson's influence lightens Lidsdale House gardens

Continued from page 1

The mine was soon resumed as a war time measure but Neubeck had by this time accumulated considerable wealth.

In 1941 he began extending his stone house built in 1920 at the time of his marriage. He continued with a two storey wing on the eastern side above a slope descending to the Cox's River.

Designed by Lithgow architect Arthur Isley it is an eclectic pastiche containing elements from Hollywood Spanish Baroque to Cape Dutch and California Mission yet overall it conveys a rather funereal gloom. Only Sorensen's surrounding garden lightens its ponderousness.

Sorensen constructed a wide platform of lawn along the eastern side of the house.

A row of pin oaks defines the eastern edge above a stone retaining wall that rivals the terrace walls of Everglades in scale and quality although constructed of regular quarried stone.

At the wall's base is a stone path edged with a hedge of golden privet backed by rhododendrons above a sloping lawn. The southern end of this path is terminated with one of Sorensen's finest staircases.

The stone circle at the path level is surmounted by concave steps on the western side leading back up to the terrace and convex steps on the eastern side leading to the sloping lawn and the tennis courts at its base.

Although this detail undoubtedly shows the influence of Lutyens and Jekyll it is carried out with uncontrived elegance.

The path to the tennis courts extends north to a pergola which overlooks a large free form swimming pool where the garden stone was quarried.

At the northern end of the terrace wall path is one of Sorensen's most amazing design features, a cascade and columned bridge topped with a rooftop planting of prostrate conifers. Curving stairs at the side of the cascade return to the terrace while the path continues over the bridge up the slope to the western side of the house where plantings of conifers and an orchard complete the garden.

A stone stairacase pictured above and a bridge (below) connect various levels of the Lidsdale House gardens

About the author

The author of this article, Ian Milliss of Wallerawang, is a partner in Carlson Milliss Art & Heritage Management

His first job was in the pictures section of the Mitchell Library. Although he became an artist and designer rather than a librarian it was the beginning of a lifetime of active involvement in heritage issues that has included the Green Ban and inner city resident action movement, publishing labour and industrial history and the revival of traditional trade union art forms such as banner making.

Loco Museum wins heritage awards

For the third consecutive year the work of volunteers at the Valley Heights Locomotive Heritage Museum has been recognised by the Office of Rail Heritage (ORH).

The 2010 awards recognising the efforts of three men who have contributed significantly to the conservation of Australia's rail heritage were presented in a ceremony at the Powerhouse Museum, Sydney.

Ted Dickson's award in the category of rail heritage conservation, preservation, restoration or reconstruction recalls Ted's efforts in the early days in ensuring that the essential service (electricity and water supplies etc) were restored.

Ted also played a key role in the perway program at the Valley Heights depot particularly with the recent reconstruction of points in the coal storage siding and negotiations with Railcorp which saw the reconstruction of the coal storage siding to the signal box completed.

Andrew Tester received the award for community relationship building for his efforts in raising the community's awareness of the museum through his role with publicity which also identifies ways in which to promote the museum.

Craig Connolly received the first award by a member of the Steam Tram and Railway Preservation Society. Craig received recognition for his service in leading the society over an extended period of time.

Andrew Tester left is presented with his award by the Minister for Transport, John Robertson, MLC and Railcorp CEO Rob Mason. Photograph courtesy Office of Rail Heritage

Will Holmes 'a Court as AGM guest speaker

Will Holmes 'a Court has accepted an invitation to be the guest speaker at the annual general meeting of the Blue Mountains Association of Cultural Heritage Organisations Inc. to be held on Saturday March 19, 2011 commencing at 2.30pm.

The meeting and afternoon tea will be held at Everglades Historic House and Gardens, 37 Everglades Avenue, Leura.

Mr Holmes 'a Court is the chief executive officer of the National Trust of Australia (New South Wales).

The subject for Mr Holmes 'a Court address is yet to be finalised however some of the provocative titles being considered are *"Will we be able to afford the cost of protecting Australia's heritage in the years ahead?"* or *"The cost of saving our heritage - is it worth preserving for future generations?"* or *"Who cares about saving our heritage?".*

He has over 30 years of business and management experience in software technology, finance and services.

For the past 10 years he has been involved in providing solutions that assist executives to drive additional value from their operations by simplifying process to reduce cost, improve revenue and enhance the performance of their people.

He worked in professional services with Ernst & Young serving in various consulting roles prior to executive roles including director of business systems and planning, finance director, then chief financial officer.

He has had senior finance positions in the insurance and superannuation industries and also with IBM various line roles in banking systems software engineering and in staff roles in pricing and planning.

Mr Holmes 'a Court has a Bachelor of Engineering from Sydney University, a Bachelor of Economics in Accounting and Post Graduate programmes in Computer Science and Professional Accounting at Macquarie University. He is a fellow of the Australian CPAs (FCPA).

He has served on the board of the National Trust since 2000.

As CEO of the National Trust of Australia (NSW) Will is charged with creating a sustainable organisation that assists its members, volunteers, staff and other stakeholders to preserve and conserve Australia's rich natural, built and cultural heritage.

"What fires my passion for the Trust above all is it is a family, formed in 1945 and driven throughout the nation by people and communities who care for their heritage," Mr Holmes 'a Court said.

Those attending the meeting may inspect the Everglades Gardens

Eskbank House at Lithgow recognised in museums awards

The author of this article Dr Naomi Parry is the curator of Lithgow's Eskbank House. Dr Parry writes: 'Radio National's regional museums awards recognise the important contribution regional museums make to local identity and memory.

'I became aware of the awards when ABC Radio Orange interviewed me about Eskbank House, which in turn encouraged me to write an entry. 'Happily, we were rewarded with a highly commended award.

'The entry process was to upload answers to questions about significant artefacts in the collection, and the ways each museum promotes itself and community history. 'This article is an abridged version of Eskbank's article, highlighting a significant artefact in the museum's collection.'

The best provenanced item in the collections of Eskbank House is the Leake-Sutton Quilt, an American crazy quilt made in Pennsylvania in 1893.

This beautiful item was brought to Lithgow by David Leake, whose sister had given it to him as a gift for his daughter Emma Sutton, to celebrate the birth of her baby girl Jean.

The quilt measures 210cm by 203cm, in nine panels of between 60cm and 65 cm. It is composed of hundreds of irregularly shaped pieces of taffeta, velvet, brocade, printed cottons and ribbons, embroidered together with silk thread in herringbone and feather patterns.

Each panel has an embroidered motif as its centrepiece, resembling Central Asian suzanis, mandalas, or baskets and it is stitched with flowers, fish, abstract designs, animals, an anchor and fans.

Bordered with a triangular pattern of mauve and yellow triangles, it has the date 1893 stitched onto the right hand side, and is edged with brown sateen.

The back is broad strips of fabric, striped in black and tan and the quilt is tacked over a checked fabric. It is fragile and faded, and many of the silk and taffeta panels have shattered, but it is still arresting and is one of only 80 crazy quilts in Australia (according to a recent Significance Assessment conducted by Kylie Winkworth).

Jean, who married Tom Hutchinson in 1942, kept the quilt for most of her life, stored in a cupboard in a small house in Hassans Walls Road in Lithgow.

Her daughter, Mrs Larraine Spice, remembers as a child that Jean would lay it on the floor and ask the children to sit on it and tell her what they could see in its fantastic embroidery and shapes.

It is extremely special for Eskbank House because it tells so many stories about Lithgow; the migration history of families like David Leake's; family bonds across oceans and women's history in a man's town. Jean herself was remarkable.

She carefully hoarded family memorabilia but was no homebody; having been the town's first postmistress during World War II, founded the Muzzle Loading Gun Club and been an active sportswoman and a bird watcher.

The Leake-Sutton quilt made in Pennsylvania, 1893

Lithgow's history captured in quilt at Eskbank House

Continued from page 5

Since her death in 2004, Museum staff have been working with Larraine Spice to capture her family memories and assist in the task of preserving Larraine's own extensive collection of letters, photographs, genealogical information and memorabilia from both sides of her family, reaching back to the 1840s, as well as Larraine's own remarkable quilts.

Everything that has happened in Lithgow is represented in the fabric of the Eskbank House, and its collections, in some way - the challenge is getting the story out there!

Participating in awards like this is an important promotional tool for museums.

The Radio National regional museums award website (www.abc.net.au/rn/museums/) contains entries from over 100 museums, in every Australian state and territory.

I particularly commend the entries for the winners! These are Lismore's Richmond River Historical Society, also awarded best volunteer-run museum, and which is notable for the way it incorporates Bundjalung Aboriginal history with pastoralist and maritime history; Bathurst Island's Patakajiyali Museum, best Indigenous Cultural Centre/Keeping Place, and Narryna Heritage Museum, in Battery Point, Tasmania, which was voted best small museum.

ABOUT THE AUTHOR

Naomi Parry completed her PhD in Australian History, "'Such a Longing': Black and white children in welfare in NSW and Tasmania 1880 - 1940" at UNSW in 2007.

She has lectured in Australian history and heritage and has worked on Aboriginal history in the Blue Mountains.

She is the cultural development officer at Lithgow City Council, and operates Eskbank House and Museum.

Bicentenary forum

A broad group of people in the Lithgow area has been discussing how best to commemorate the Bicentenary of the Crossing of the Blue Mountains.

Dr Naomi Parry has undertaken to organise a history forum, in Lithgow, at which participants might consider the crossing (and all the other crossings between 1813 and 1816) and develop a thematic framework that will guide celebrations.

It is hoped the forum will include a variety of voices and will include oral history and storytelling, about the crossing and its aftermath, as well as its effects on all the communities, Aboriginal and colonial, in the Blue Mountains and central west.

"If there is sufficient interest and enough ideas emerge we would like to continue the forum into 2012 and 2013."

The date for the first forum will be Saturday May 14, 2011, which is the weekend of Ironfest and will guarantee a large audience.

"I will be developing a program for the forum early in the New Year so would be very grateful if interested people can let me know whether they can attend and if individuals would like to present a paper or run a workshop. "It is hoped to attract students to the forum," Dr Parry said

For further information contact Naomi Parry by e-mail at Naomi.Parry@lithgow.nsw.gov.au

Shakespeare Festival returns to Everglades

Following the sold-out success of its inaugural season in 2010, The Leura Shakespeare Festival returns in January 2011 with three productions in repertory.

A brand new promontory performance of Shakespeare's delightful comedy, 'As You Like It', will join Damien Ryan's acclaimed 'Romeo & Juliet' and a re-imagined 'A Midsummer Night's Dream' for a magical month of weekends in the mountains.

The festival will begin in the National Trust's exquisite Everglades Gardens and then journey to the famous Norman Lindsay Gallery, Faulconbridge.

Everglades House and Gardens
As You Like It: January 8, 9, 15, 16, 22, 23 **(1.30pm start)**
Romeo and Juliet: January14, 22 **(7pm start)**
A Midsummer Night's Dream: January 8, 9, 16, 21, 23 **(7pm start) Norman Lindsay Gallery**
A Midsummer Night's Dream: January 29, **(1.30pm start)**
January 28,29 **(7pmstart)**

COST: $30 adult, $25 concession (seniors, students, under 16s and National Trust Members). U/6 free. Discounts for combined purchases.
INFO: www.sportforjove.com.au
TICKETS: www.foxtix.com.au or 1300 356 268. Book early to avoid disappointment.

BLUE MOUNTAINS LITERARY INDEX AND MAP PROJECT

by Kate Santleben, volunteer at Blue Mountains City Council's Springwood Library's Local Studies Section and member of Springwood Historians

The Blue Mountains has long been associated with writers who have either lived in the area or been regular visitors.

Their writing talents include fiction, poetry, screenplays, and non-fiction as well as content for newspapers and magazines, including locally produced publications. An example of the latter is the first issue of *Narrator Magazine* (Spring 2010).[1]

The appeal of the Blue Mountains lies in its proximity to, but distance from, Sydney, accessible public transport, more economic housing, healthier lifestyle and a developed infrastructure enabling ease of day-to-day living.

The natural landscape and distinctive seasons of the Blue Mountains enhance the appeal of the area. In short, 'many writers and artists have lived and worked under the spell of the Blue Mountains'.[2]

Bookshops are located in most of the villages and attract locals and visitors alike. This encouragement of writers adds to a sense of the Blue Mountains as being an environment that actively promotes the activities of writing and publishing.

The Blue Mountains has Australia's only national writers' centre, *Varuna*, located in Katoomba. It was the home of the writer Eleanor Dark and her husband, Dr Eric Dark. Since being given to the NSW government in 1989, *Varuna* has sought to '… identify and develop the best new Australian writing …'.[3]

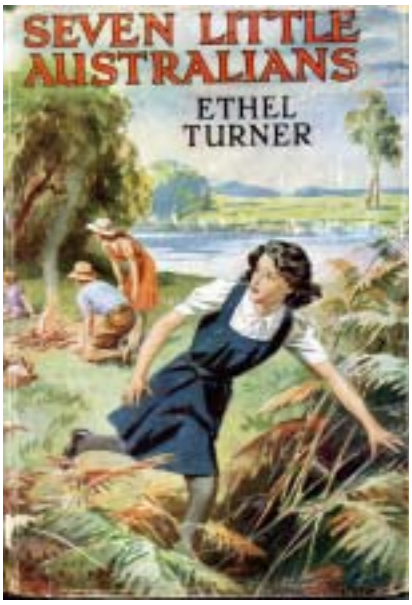
The Fellowship of Australian Writers (FAW) provides members with an opportunity to '… enjoy the friendship, support and encouragement of other writers'.[4] FAW's Blue Mountains Regional was formed in 1973[5] and meets at Springwood. Other writing-based groups meet in the Blue Mountains from time to time.

The Blue Mountains City Council local studies librarians, John Low (now retired) and John Merriman have collected, where possible, literary works of local importance. These are housed at the Springwood Library.

The work 'can reflect and document significant aspects of regional history and character and can sometimes provide an original, even unusual, perspective from which to view that history and character'.[6]

The following indicators are the criteria used for evaluating writers and literary works of local importance and their inclusion or otherwise in the library's local studies collection:

- the 'residential' indicator – is the writer a long-term or permanent part-time resident or a visitor to the region?
- the 'literary' indicator – what level of critical acclaim/ commercial success has the writer/literary work achieved? and
- the 'content' indicator – does the writer or literary work draw upon the local region for location, character, issues, etc.?[7]



In Ethel Turner's *Seven Little Australians*[11], Judy is sent to boarding school in Mt Victoria

About the author of this article

Kate Santleben (pictured with Local Studies literature files) has lived in Blaxland with her husband since 2005. Interested since her teens in writing, she seeks opportunities to learn more about writing as well as entering competitions. As her part-time employment as a membership development officer for a charity is located in Sydney's CBD, train travel provides the opportunity to catch up on reading.

An enthusiasm for history, particularly social history, led to volunteering in the Local Studies area of the Blue Mountains City Council in 2005. In 2007 Kate was invited to be a member of Springwood Historians. She is currently on leave from external studies in the Graduate Diploma in Local, Family and Applied History through University of New England. Resuming studies is a goal for 2011

Writer-in-residence started project in 1990

Continued from page 7

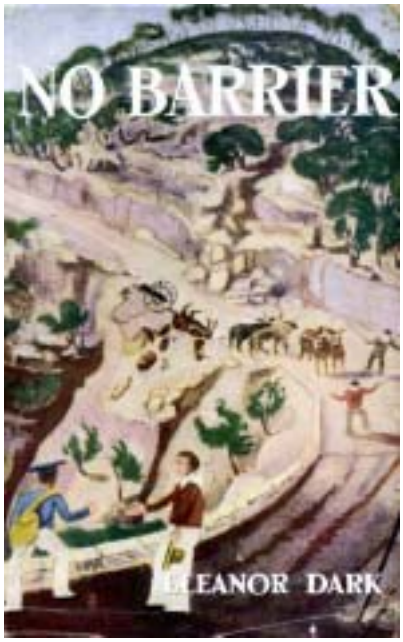
In 1990, the Blue Mountains City Library's writer-in-residence, Dr Michael Sharkey, began a project to '… establish a literary index to the Blue Mountains'. References to writers who have lived in or visited the Blue Mountains, or have written about the Blue Mountains were collected and included in an index held by the library's local studies section.

It was also hoped that with enough information a Blue Mountains Literary Map could be produced to enable locals and visitors 'to pay personal homage to the region's rich literary heritage'.[8] Dr Sharkey's three-month residence quickly passed.

However, the literary index continued to grow from then as time and information came to hand.

In 2005, Kate Santleben attained a long-held goal and moved to the Blue Mountains after being a frequent visitor of local family members.

During one of these visits, she consulted with John Low, one of the then local studies librarians on a work-in-progress that was set in the upper Blue Mountains, and discovered the rich treasure trove of social history in the local studies section.



Part three in the famous timeless land triology... the discovery of a route over the Blue Mountains

After applying to be a volunteer in the Springwood Library and subsequent discussions with John Low as to her interests in writing and social history, Kate was directed to the Blue Mountains Literary Index and Map project.

As a library technician, it was a joy to be back in a library environment and having been long familiar with the work of some of the Blue Mountains writers, e.g., Eleanor Dark, Kylie Tennant, Florence James, Dymphna Cusack and Nancy Phelan, it was a delight to work on the project. In addition, having just returned from a trip to the UK and having followed a literary map whilst there, Kate agreed with the concept being replicated in the Blue Mountains.

However, the project that Kate had initially thought 'wouldn't take long' is, five years later, still a work-in-progress.

What has been achieved so far? Whilst the aforementioned indicators are used in evaluating works to be included in the local studies collection, the literary index also seeks to record all writers who live or have spent time in the Blue Mountains and/or whose work has a Blue Mountains content.

Each writer so far identified has, in alphabetical order, an index card with their name and notes as to what newspaper cuttings, website addresses, catalogue information etc., is available.
A physical file in alphabetical order for each writer stores that information.

Additionally, a spreadsheet has been prepared and currently has 495 names. The spreadsheet summarises the names, dates of birth/death, Blue Mountains village associated with the writer (if known), the genre of their work, and any notes.

Of the recorded Blue Mountains writers, the earliest include Sir Henry Parkes (1815-1896), Henry Lawson (1867-1922) and Norman Lindsay (1879-1969). The most recent addition is Kristel Thornell.

The Blue Mountains villages from Lapstone to Mt Victoria/Mt Wilson have also been cross-referenced with the names of the writers associated with them.

The most 'writerly' village? Katoomba closely followed by Springwood and Winmalee.

The sources of information used to compile the spreadsheet include the local studies' literary index, on-line dictionaries of biography, Blue Mountains City Library catalogue as well as national and state library catalogues, local and state newspapers, local newsletters and journals, as well as writers' websites.

The following lists interesting examples of items held in the local studies collection:

- Graham Alcorn's *Windy Day, Blue Mountains*[9];
- Jennifer Rowe's *Grim Pickings*[10], a murder mystery, is set in a Blue Mountains' apple orchard
- In Ethel Turner's *Seven Little Australians*[11], Judy is sent to boarding school in Mt Victoria;
- Frank Walford, *Mists at Leura*[12] and *Twisted Clay an explosive novel of strange passions*[13]; and
- Deb Westbury's poem *Notices in the Window*[14] features Brian's Bookshop at Katoomba.

What's still to be done in the Blue Mountains Literary Index and Map Project?

Literary Index: complete spreadsheet inputting and cross-checking the spreadsheet data and continue sorting the individual physical files. As long as the Blue Mountains continues to encourage and attract writers, the literary index will continue to develop.

Literary Map: summarise the most well-known Blue Mountains writers and plot the villages associated with them. Investigate the logistics of preparing the map itself and how it is to be distributed.

William Cox's great grandson is engineer named on plaque

When the Blue Mountains Shire Council moved into its new quarters in 1915 it had already been functioning for several years in other buildings in Lawson.

In brief, the Local Government Act of 1906 had created a temporary council known as the Kanimbla Shire to cover the area from Emu Plains to Mount Victoria (excluding Katoomba which had been doing its own thing as a municipality since 1898).

The first council under this Act was elected in 1906 and proceeded to operate from a temporary home in the Mechanics Institute building in Lawson.

In 1907 the name Kanimbla Shire was officially changed by NSW government proclamation to Blue Mountains Shire which it was to remain until the establishment of the current Blue Mountains City Council on October 1, 1947.

By 1908 there was a definite need for more permanent accommodation for the shire council and a move was made across the railway line first to the house called *Avon* on the corner of Park Street and San Jose Avenue and then in May 1915 into the new purpose-built accommodation.

The plaques at the entry to the building reflect a great deal of Blue Mountains history.

The memorial to William Cox is a reminder that the shire engineer in 1915 was Harley Cox a great grandson of William.

The memorial to Percy Wilson (no relative of the equally prominent Blue Mountains Hotel Wilsons) is a reminder of a most redoubtable man, shire president for almost 20 years and responsible for much of the infrastructure that made modern Lawson.

The plaque recording the opening by Mrs JT Wall is a reminder of the tragedy of World War 1 as Douglass Square was named as a memorial to young John Douglass Wall killed in France in 1916.

The library like the council before it had several homes before finally coming to rest in its present building on June 6, 1983.

It had started as a small collection of books owned by Lawson Literary and Debating Society set up in 1896 with eight members.

With the building of the Mechanics Institute in 1903, its growth was rapid becoming in 1905 a circulating library with over 1000 books.

It stayed under the control of institutes committee until taken over by council in 1975.

It was to remain housed at the institute until 1976 then moved to premises at 303 Great Western Highway before finally moved into the original 1915 building now known as the Lawson branch library

This article has been researched and written by Nance Cooper, President, Mid Mountains Historical Society Inc.

Jan Barkley-Jack's book takes a new look at Hawkesbury

Well known and highly respected historian Jan Barkley-Jack will be the Blue Mountain's Historical Society's guest speaker on Saturday, February 5.

Her subject Hawkesbury Settlement Revealed: Australia's Third Mainland Settlement 1793-1802 is the title of one of her recently published books.

Jan's book provides an exciting new look at the history of the Hawkesbury region.

For booking and further details contact John Low on 4782 3751

Call for writers to be added to literary index

Continued from page 8

Kate Santleben would like to take this opportunity to thank the Blue Mountains City Council Library for the opportunity to work on the literary index and map project and for the encouragement and assistance of the staff.

Any suggestions for names to be included in the literary index would be appreciated. Any questions or comments arising from this article should be directed to Mr John Merriman, local studies librarian, Springwood Library, telephone: 4723 5044.

Heritage funding for Turkish Bath

The Turkish Bath, built in the 1880s, at Mt Wilson has recently undergone major restoration.

It is a rare example of a purpose built private Turkish bath, still virtually intact and possibly unique in Australia. It is situated within the *Wynstay Estate* at Mt Wilson.

The building is a particularly fine example of late Victorian boom style architecture with polychrome brickwork and Italianate details.

In 1995 the owners offered the Turkish Bath building and precinct to the community to establish a museum of local history. This generous gift prompted formation in 1996 of the Mt Wilson and Mt Irvine Historical Society which holds the 50 year lease at a peppercorn rental of $2 per year, and takes responsibility for restoration, maintenance and operation of the building, grounds and the museum.

For the past 15 years the original corrugated roof sheeting has been treated with preservative and carefully watched as encroaching rust and pinhole perforations developed, until in 2008 the decision was reached that the roof needed to be replaced.

An application to the Heritage Branch, NSW Department of Planning, for 50% funding support

The project starts

Original ridge capping folded back and iron cresting secured

The completed rennovations on the Turkish Bathouse at Mt Wilson

met with success and the roof was replaced in July / August 2010.

At the same time, timber louvres and joinery on the ornate tower were also refurbished.

This project may sound like a straightforward piece of conservation work but it was anything but straightforward!

Original lead hips, ridges and flashing were carefully lifted and folded back so that the old roofing could be removed, while the decorative iron cresting was left in place and protected from damage.

The original galvanised screws and lead washers were removed and re-used where possible. The new 0.6mm Z600 galvanised corrugated steel sheeting was barrel rolled at Fielders in South Australia to match the profile of the original roofing. All timber joinery on the tower was taken back and treated then painted to match the original colour scheme.

Timber joinery on the tower was refurbished

This expert work was carried out by staff of the Sydney Restoration Company, in consultation with heritage Architect Alan Croker from Design 5 Architects. These professionals have been involved with conservation work at *Wynstay* since 1994, and the owners have come to depend on their skills and interest in the ongoing management of this highly significant heritage estate.

“But the project would not have been possible without dollar for dollar funding from the Heritage Branch, NSW Department of Planning. The staff there has been with us throughout, and we are grateful for their ongoing interest and support,” said Ms Florence Smart a former president of Mt Wilson and Mt Irvine Historical Society Inc.

The Turkish Bath Museum houses changing exhibits of earlier times in Mt Wilson and Mt Irvine. It is open from 12.30pm to 3.30pm on the third Sunday each month throughout the year, and every Sunday during the Spring and Autumn months. Group tours are very welcome, by arrangement. Phone 4756 2006 for information.

This article and photographs were contributed by Ms Florence Smart, a fomer president and now secretary, Mt Wilson and Mt Irvine Historical Society Inc.

Dreaming of Chanel

After the stunning success of *Dreaming of Dior*, Charlotte Smith offers another irresistible glimpse inside the wardrobe every woman would love to own.

Inheriting a priceless vintage collection sounds like every woman's dream come true.

But when Charlotte Smith discovered that her American godmother, Doris Darnell, had made her custodian of more than three thousand pieces dating from 1790 to 1995, including originals by Chanel and Dior, she was more than a little daunted.

From the moment Charlotte uncovered her first treasure, an exquisite 1920s evening dress, she was enchanted.

But when she found her godmother's book of stories, the true value of her inheritance hit home.

This wasn't a mere collection of beautiful things, it was a precious collection of women's lives. Tiny glimpses of thei joys and disappointments, their entrances and exits, triumphant and tragic.

In *Dreaming of Dior*, Charlotte shared some of her treasures and the stories of the women who wore them for the first time. Now, in ***Dreaming of Chanel***, with special appearances by Chanel, Vivienne Westwood, Zandra Rhodes, Pucci, Akira and many more, Charlotte offers another unforgettable look inside the magic wardrobe every woman would love to have.

The book cover of Dreaming of Chanel launched at the Carrington Hotel, Katoomba last month

About the author: Charlotte Smith is the custodian of a priceless vintage clothing collection, The Darnell Collection, she inherited from her Quaker godmother, Doris Darnell. Born in Hong Kong and raised in the US, Charlotte has a degree in art history and has lived and worked in the US, England and France.

About the illustrator: After studying fashion design Grant Cowan moved to London to further his career and has worked as a fashion Illustrator, lecturer and commercial Illustrator for magazines including *Harper's Bazaar*, *Elle*, *Glamour*, *Teen Vogue* and *Red Magazine*.

Pictured above is Charlotte Smith of Blackheath, a principal of The Darnell Collection Pty Ltd and inaugral member of BMACHO.

Horse trainer/historian corrects Beersheba claim

HERITAGE is grateful to NSW central coast horse trainer and historian, Bob Pankhurst for drawing attention to an error in the article *The Light Horse Interchange* (*HERITAGE* November-December 2010) in which it was claimed "The men who made the last wartime cavalry charge [Beersheba] were mounted infantry – Australian light horsemen'

Bob Pankhurst writes, "…this is wrong on two counts; firstly the Australian Light Horse were mounted infantry and not armed with cavalry weapons and secondly; the Canadian Cavalry unit Lord Strathconas Horse charged the German lines of trenches at Moreuil Wood in about August 1918. This was a full cavalry charge using swords and lances carried out by about 1200 men and the unit charged twice into the German and Saxon trench lines. They were commanded by a British General who was known as Mad Jack Seeley, and at least one Victoria Cross was won during this charge by a fellow named Flowerdale. This charge was a desperate attempt to break through the German lines so as to cut off their access to the sea and it was successful."

Bob also writes… "The 6th Light Horse were regular campers at Wallgrove Army Camp, the site of the now closed Australia's Wonderland, and I think were the last Light Horse unit camped there when the Light Horse was mechanised in NSW sometime in late 1941 or early 1942 though Light Horse units operated in West Australia until 1944.

"If you look up newspaper records from the 1941 era you will see that there was a stampede of army horses at the Wallgrove camp about Easter time where hundreds of horses stampeded after being frightened by swirling newspaper blown up in the wind. The camp luckily was only occupied by the horse handlers as the rest of the boys were on Easter leave even so one trooper was killed when the toilet block was demolished by the stampeding herd.

Horses were found several days later as far away as Penrith."

BMACHO NEEDS A NEW PRESIDENT

After 5 years as president of the Blue Mountains Association of Cultural Heritage Organisations Inc, John Leary, OAM has decided because of ill health not to seek re-election at the annual general meeting in March. 2011.

Mr Leary said it has been a privilege to serve as the organisation's inaugural president and work with a very fine group of dedicated amateur enthusiasts, professionals and academics within the heritage sector of this region.

"Much has been achieved in the way of education through various workshops and speakers, while there is no doubt that BMACHO has had some influence on local government during the past 5 years.

"Among these achievements has been input which brought about a far more balanced document produced as Blue Mountains City Council's cultural heritage strategy; the listing of more than 800 sites on the State Heritage Inventory by council; the development of the newsletter *HERITAGE* and the publishing of the first volume of the online *Blue Mountains History Journal* but to mention a few.

"Probably one of the most important achievements has been to have various heritage and historical societies in the region come to understand they are not isolated and that the expertise and resources of other heritage groups may be shared for each others mutual benefit.

"The exchange of ideas and knowledge as well as inter-group promotion of activities and the BMACHO calendar has been the resulting benefit.

"It is difficult to accurately assess how many are involved in the heritage sector throughout the region.

"However, it has been suggested that there are as many as 2500 individuals who have some direct link to heritage interests in this district. BMACHO can and has filled a void in providing a "voice' for these individuals.

BMACHO president John Leary, OAM receiving a heritage award from the Premier, Kristina Keneally recognising his voluntary work in the heritage sector going back to 1975 when he was appointed by the then Premier Tom Lewis to the Berrima Court House Trust through to his work with National Trust and BMACHO over the past decade.

"The existing committee and others over the past years, worked very harmoniously, each member having valuable input based on years of experience in the heritage sector. It is difficult to mention each and every one of the committee members who have contributed to the organisation management, but three must be mentioned.

"Firstly, Professor Barrie Reynolds who conceived the idea of BMACHO and worked tirelessly as its secretary until his recent ill health; Associate Professor Ian Jack who as vice president for the past 5 years has been a tower of strength having a vast knowledge of history and in particular this region and Dr Peter Stanbury who has in his quiet unassuming way been of immense value to the organisation.

"It is now time to find a new leader for this very worthwhile organisation and although nominations for election have not yet opened, it is important that thought be given to the filling of the soon to be vacated office.

"The structure of BMACHO is very sound and many of the existing management committee have expressed an interest in seeking reelection which if these people and some 'new blood' are elected to the committee it will mean a good succession has been achieved."

Anyone interested in seeking election to the office of president is welcome to discuss the role with John Leary on 47588584 or by e-mail: johnnanete@optusnet.com.au

$10,000 GIFT

BMACHO member, Scenic World Katoomba recently celebrated the Scenic Railway turning 65 and instead of having a "normal" birthday bash, the Hammon family decided they would prefer to have a fund raising dinner with all funds raised from the evening going to Blue Mountains Cancer Help.

Guests were entertained on the night with some cool jazz and fine food in the Skyway Restaurant.

Raffles and an auction were held with locals bidding on items such as helicopter flights, a Skyway rooftop experience and other goodies.

The result of the evening saw a cheque for $10,800 presented by Phil and Peta Hammon to Robyn Yates of Blue Mountains Cancer Help.

Two Governors to dinner

Her Excellency the Governor of NSW, Professor Marie Bashir, AC, CVO being escorted to the official table by the President, Kurrajong-Comleroy Historical Society Inc., Frank Holland

Some 200 years after the fifth Governor of the Colony, Lachlan Macquarie and his vice regal party including Mrs Elizabeth Macquarie crossed the Hawkesbury on December 1, 1810 and then made their way to the summit of the 'Kurry Jung' the 37th Governor of NSW, Professor Marie Bashir sat down to a formal dinner with 120 guests.

The dinner organised by members of the Kurrajong-Comleroy Historical Society Inc. was held at Loxley on Blue Bird Hill, close to where Macquarie would have passed.

Soon after the governor arrived, guests were entertained by an audio visual presentation, the script having been written by Ron and Margaret Rozzoli.

The audio visual presentation, *Birth of a Nation* told the story of Colonel Macquarie's appointment as the fifth governor and much of Governor and Mrs Macquarie's life in the Colony starting with the sea voyage from England and then focused on the journey the vice regal couple made to the 'Kurry Jong' and then on to the naming of the five Macquarie towns.

The story continued with a brief overview of the period between 1810 and the Macquarie's departure in 1822 concluding with his death in 1824.

The script was based on the Journal of Governor Lachlan Macquarie

The production was enhanced by the appearance of actors from the Richmond Players at key moments in the story.

Later in the evening the governor provided the formal address speaking without notes for more than 40 minutes about the Macquaries. Her in-depth knowledge of the work of Governor Macquarie and his wife Elizabeth with a number of anecdotes which could only have come from her own research amazed many of the historians who listened to Professor Bashir.

After mingling with the guests, Governor Bashir and Sir Nicholas Shehadie departed with some guests staying on much later while others retired to accommodation at Loxley or found their way home.

(Editor's note: Sincere appreciation is extended to Frank and Val Holland for the many courtesies extended to me as president of BMACHO and my wife Nanette during the formal dinner and for arranging the excellent accommodation at Loxley. BMACHO's management committee was also represented at the dinner by vice president, Dr Ian Jack and Ms Jan Barkley-Jack and secretary, Ms Jan Koperberg. The proprietor of Loxley Paul Maher and his staff are also to be commended for providing excellent service and facilities. John Leary)

The fifth Governor of the Colony Lachlan Macquarie, played for the evening, by Sean Duff.

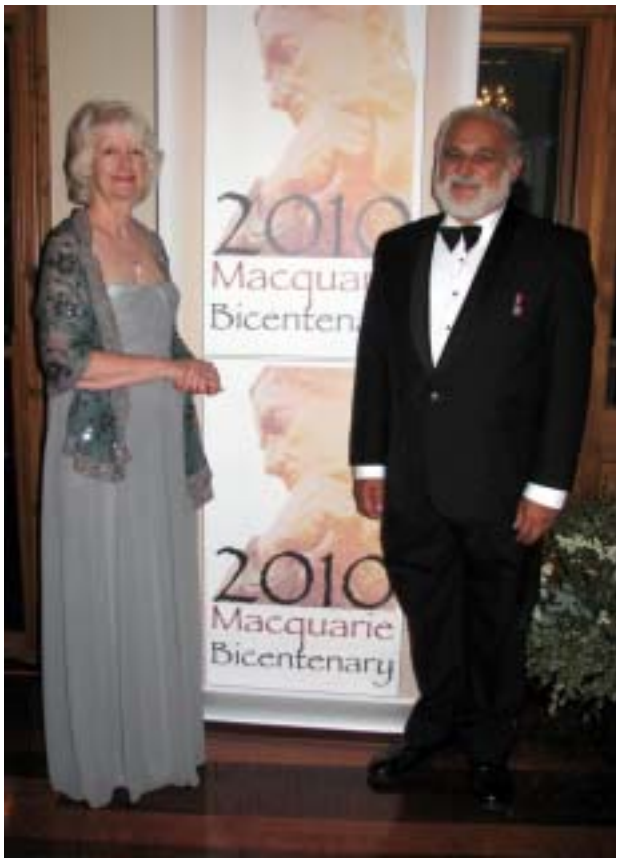
Continued page 14

Lachlan Macquarie's bicentenary dinner recalls his work as the 'builder of a nation'



Val and Frank Holland whose leadership and dedicated work did much to make the Macquarie bicentenary anniversary dinner such a succes

Most guests were dressed in formal evening wear, however John Cooper of Transportation, Signal and Comunications Museum Inc. chose to dress as Governor Macquarie's faithful servant during his 28 years as governor, Richard Fitzgerald

The Governor chats with some of the Richmond Players who included Sean Duff (Lachlan Macquarie) Anne Duff (Elizabeth Macquarie), Greg Todd (James Meehan). Nathan Zamprogno provided the narration and Tracy Stedman provided Elizabeth's voice and back stage management

'In a few years I have no doubt Sydney will be as fine and Opulent a Town as any one in His Majesty's other foreign Dominions.'

Lachand Macquarie

1815.

Jan Koperberg elected to lead Blue Mountains Family History Society Inc.

Jan Koperberg has been elected as president of the Blue Mountains Family History Society Inc. taking over from Joan Edwards.

Jan retired from full time work at the end of 2005 and joined the Blue Mountains Family History Society in the middle of 2006. At the AGM in November 2006, Jan was nominated and accepted the role of secretary, which she held till the end of 2009, when she became vice president.

Jan was nominated as NSW & ACT Association of Family History Societies' delegate for Blue Mountains in 2009 and was a committee member until September 2010, when she was nominated and accepted the role of secretary, after Kay Radford "called it a day" (Kay's words).

In March 2010, Jan was nominated and accepted the role of secretary to the Blue Mountains Association of Cultural Heritage Organisations, which she took over from Barrie Reynolds, with 'much trepidation'. Jan had no need to feel nervous however, as the organisation was very welcoming and the management committee members were, and are, very patient and willing to share their knowledge.

The positions on these committees compliment one another and Jan finds the activities of the organisations stimulating and worthwhile and still finds time to spend with family and friends.

The last three years Jan attended NSW & ACT Assoc of FHS's State Conferences, 2008 in Dubbo, 2009 in Wyong and 2010 in Bomaderry and for the first time attended the RAHS State Conference in Richmond, which was an enjoyable and informative weekend.

At all but the RAHS conference, (Jan had a rest), Joan Edwards and Jan held successful trade tables for Blue Mountains Family History Society.

They have also held trade tables and attended the Penrith History Conference for a number of years.

Jan's early years were spent living in Bondi, where she went to school, but most holidays were spent in the Blue Mountains, where the family would travel by steam train and stay in boarding houses or hotels in Lapstone, Leura, Katoomba and Medlow Bath.

Winter holidays in the Mountains were popular and reading by the open fires, bushwalking, horse riding and visiting other Blue Mountain towns were some of the activities that were enjoyed.

Jan has lived in the Mountains since 1967, first on Hawkesbury Road, North Springwood, (as it was), and now in Bunnal Avenue, Winmalee and definitely calls the Blue Mountains home.

Jan believes there is a very real need to preserve our family histories, our history natural and built and our heritage. There is a very real need to do this for our children and grandchildren, the future generations.

BERYL MCLAUGHLIN LECTURE

Blue Mountains Historical Society Inc. will conduct its annual Beryl McLaughlin lecture on Saturday, March 5, 2011 at the Wentworth Falls School of Arts.

The speaker, John Ellison has had a long association with the arts and this will be the focus of his presentation although the exact title of his lecture is still to be confirmed.

John has lived and worked as an artist in the Blue Mountains for many years.

He inspired the Winter Magic Festival and was for a period Blue Mountains City Council's community arts officer.

He has an intimate knowledge of and strong opinions about the arts and his lecture promises to be a challenging and thought provoking one.

For further information contact John Low 4782 3751.

Blue Mountains WW2 Project

Can you help?

Blue Mountains Family History Society's project on local social history during the war years is well underway.

Author, Joan Edwards, is seeking more names, photographs and/or stories of individuals and groups including aircraft spotters, businesses, SAF workers residing in the mountains, schools, evacuees, voluntary organisations and workers, Volunteer Defence Force, and anything else.

One challenge is to compile a list of known locals who joined the services and, therefore, were 'not at home'.

Assistance would be appreciated. Tiny snippets of personal or family experiences are important.

Please contact Blue Mountains WW2 Project at P.O. Box 312 Wentworth Falls 2782 or the dedicated email address jed2782@gmail.com ASAP before you forget, deadline Easter 2011.

Blue Mountains World Heritage Area showcased

An awe inspiring panoramic view of the Greater Blue Mountains Heritage Area is the focus of the World Heritage Exhibition Centre opened last year, at Mount Tomah Botanic Garden by actor and environmentalist Jack Thompson.

The centre celebrates the 10th anniversary of the area's inscription on the UNESCO World Heritage List.

It will give schoolchildren curriculum based lessons about national parks and conservation, as well as showcase the region's natural beauty.

The spellbinding views combined with the intellectual and artistic experiences at the centre deliver a strong message which had solid roots in the local community.

"The first seed of conservation was planted by the Aboriginals who took great care of this natural wonderland," Mr Thompson said.

The Mount Tomah Botanic Garden takes its name from the mountain on which it is located.

The original owners of the land were the Darug Aboriginal people. 'Tomah' is reputedly an Aboriginal word meaning tree fern.

Mount Tomah Botanic Garden director Rob Smith said the new building would provide a space where people could play in a virtual world of canyons without getting their feet wet and, in a full surround sound theatre, experience a journey through the gigantic cliffs of the one million hectares of the World Heritage Area.

Another recent addition at the Mount Tomah Botanic Garden is the Laughing Children's Garden which will become a wonderland in which children and families will take delight.

"The Gwuulya Garri Dilya Garden (Laughing Children's Garden) has soft green lawns for family picnics and shady trees to relax under while kids climb on and explore the sculpture," Mr Smith said.

"Adventures abound for children at the garden. It's a lyrical organic green space that showcases the soft shapes and textures of the Pod Pod.

"The sculpture is embossed with the images of birds, reptiles, insects and plants all to be discovered while climbing and crawling over the pieces which are shaped like acacia pods," Mr Smith said.

A generous donation by Tom Breen, managing director of Breen Holdings Pty Ltd and his family have made possible the three centrepieces called Pod Pod as a feature of the garden.

New leader for Mt Victoria and District Historical Society

Robert Cameron has been elected to the position of acting president of the Mount Victoria and District Historical Society Inc. following the death of Peter Evans.

"At the last annual general meeting at Mt Victoria former president Peter Evans was with us, I was elected to the position of vice president," Robert Cameron has said.

"Since Peter's passing, (I shall always remember Peter for his poignant sense of humour. I am sure he has the angels laughing in the aisles.....) a recent meeting of the society elected me as acting president.

"Until the next AGM and in the interim, I will endeavour to further the good work Peter has instigated.

"There are a few of Peter's visions in train, some of which some may already be aware, which we hope to complete next year.

"One is to complete the refurbishment of the former 'Plumbers Room' converting it to a research and meeting room.

"It will house our collection of maps, files on the occupants and the habitation of the district as well as our computer and hard copy research files.

"It is our intention to expand this historical information by the addition of oral history recordings from the districts' inhabitants.

"Another objective is to utilise the space we have in order to establish a more coherent visitor experience, as well as to provide additional space for proposed new exhibitions and to house those items we currently have in storage. Allied with this is a clean-up the curtilage courtyard, currently used for live displays of traditional wood-turning during 'Great Train Weekend' events, which will facilitate and enhance its future usage.

"Since becoming a member of the society some 8 years ago I have realised the uniqueness of the artifacts we have on display and their importance in the second most historical event for New South Wales, the crossing of the Blue Mountains.

Robert Cameron

"I look forward to our continued association with BMACHO and our mutual co-operation and support," said Robert Cameron.

Vale - Heather Mollenhauer

Well known Blue Mountains historian and community worker, Heather McDougal Mollenhauer (nee Ingamells) passed away on December 12, 2010 at the age of 71.

She worked as a volunteer with the Blue Mountains Historical Society, Mid-Mountains Historical Society and Blue Mountains Conservation Society and her much loved Jacktrackers Bushwalking Group.

Born in Hawthorn Victoria, where she grew up, attending the Methodist Ladies College in her senior school years, later training as a triple certified nurse.

After completing her training she began service at the Bombaderry, (NSW) Children's Home. In 1956 she was posted to Mt Margaret Mission Hospital in Western Australia as matron.

While at Mt Margaret she married Sam Mollenhauer on March 30, 1957. Heather and Sam were to have five children Kathryn, Andrew, Elizabeth, James and Brenda.

In 1969 Heather and Sam were posted to Mission Publications at La Perouse, NSW with Heather ministering to Aboriginal ladies of the area.

In 1973 they were transferred to the new Mission Publications Office and Printshop in Cascade Street, Lawson. She retired from her active missionary service in 1989.

As an early member of Lawson Baptist Church, Heather filled various roles including keeping archives right up until her passing.

President of the RAHS, Prof Ian Jack has spoken in glowing terms of Mrs Mollenhauer's knowledge of history in the Mid Mountains region and in particular her very informative walking tours in Lawson.

Terracotta warriors from China in Sydney

Discovered by villagers in 1974, the underground army of the First Emperor of China, Qin Shihuang, is one of the most significant and spectacular archaeological discoveries of modern times, while Qin Shihuang remains one of the most remarkable and intriguing figures in China's long and extraordinary history.

A magnificent exhibition organised by the Art Gallery NSW in partnership with the Shaanxi Provincial Administration for Cultural Relics Bureau and the Shaanxi Heritage Promotion Centre, People's Republic of China will continue to be on display at the Art Gallery of NSW, Sydney until March 13, 2011.

Featuring over 120 rare objects from the First Emperor's burial site and other tombs this exhibition takes one on a journey from the beginnings and rise of the Qin empire to the life and rule of the First Emperor, his quest for immortality, and his death, burial and legacy.

Born in 259BCE, Qin Shihuang became king of the small but ambitious state of Qin at the age of just 13 years and over the next 25 years defeated his neighbouring rival states to unite the realm and form China much as we know it today.

While the dynasty that he established lasted only 15 years, in that brief time he created a new political and cultural order that would endure for over 2000 years.

With brutal determination, Qin implemented a series of reforms and building works that laid the foundations for four centuries of relative peace, stability and expansion under the following Han dynasty and remained evident in the governance of China until the eary 20th century.

The name of his dynasty, Qin (pronounced 'chin'), is widely regarded as the origin of the English word China.

The statues include many of the different military units in the Emperor's army at the time

Now over 35 years after the first accidental discovery, the story of the First Emperor's brief but revolutionary reign and his quest for immortality continues to unfold through the ongoing excavation of his entombed army and burial site.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mount Tomah Botanic Garden, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc.., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2010-11 is: John Leary (president), Ian Jack (vice president), Jan Koperberg (secretary), Kathie McMahon-Nolf (treasurer), Jean Arthur, Joan Kent, Doug Knowles, Dick Morony (public officer), Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

MARCH - APRIL 2011 ISSUE No. 14

A tower all that remains of San Jose

Standing like the remnants of a medieval European watchtower from which a feudal lord could check his domain or watch for the menace of a Saracan attack, the tower on land off San Jose Avenue, Lawson conjures up many ideas as to what the original owner might have been thinking when it was constructed. *HERITAGE* is grateful to John Merriman, Local Studies Librarian, Blue Mountains City Library for the following article.

The original building with its three floor levels and tower was constructed in 1879 and named "San Jose", by Joseph (Jose) Guillermo Hay, an official in the Lands Department, who had received a grant of 300 acres at Lawson the previous year.

In the 1880s Hay took advantage of the Blue Mountains' new and growing reputation as a health and recreation retreat, and by 1882 the name "San Jose" had the words "The Blue Mountains Sanatorium" added to it and described in a local guidebook as "the best for private families" and "with grounds laid out with romantic paths in all directions".

San Jose tower which when attached to a three storey building became Stratford Girls School. Photograph by John Leary, OAM. February 2010

In 1889 Hay applied for a publican's licence for the property then known as "Hay's Family Hotel", described as having fourteen rooms for public use.

During the 1890s the property was acquired by John Ralston who ran it as a guesthouse known as "The Palace" for the next two decades until, in 1919, it eventually took the name and function for which it is best known.

The original Stratford School was founded in Lawson in 1915 by Miss Edith Townsend Wiles who began classes with six pupils in a rented cottage named Tahlia, on the Bathurst Road as the highway was then known.

By 1919 the old cottage was "bursting at the seams" and a move became imperative. The school made the move across the highway and railway line taking the name "Stratford School for Girls" with it.

OAM FOR MARY REYNOLDS

On Australia Day 2011 Mary Reynolds was awarded the Medal of the Order of Australia.

Mary is a well-known and highly respected researcher and writer of the history of her own communities of Mt Wilson and Mt Irvine, and also maintains a keen interest in the heritage of the wider Blue Mountains region.

When she and her husband Ellis came to live in Mt Wilson in 1986, Mary soon became involved as a volunteer with the Woodford Academy and also with Norman Lindsay Gallery.

Humbug and delay in way of heritage advisory committee

For almost 5 years BMACHO has been attempting to have Blue Mountains City Council reestablish a heritage advisory committee, something many would think would be a simple task.

The humbug and delay at best could be described as a frustration, while the more conspiracy minded might think council and its staff have something to hide; of which there is no obvious evidence.

Many local government units in NSW and in fact around Australia have established this type of committee which draws upon the expertise of both academics/professionals and that of volunteers in historical societies and heritage groups in the community.

The purpose of such a committee is to advise council on all matters pertaining to the heritage of this city and to promote awareness and understanding of the heritage of the region.

A fairly simple but potentially a very valuable committee to a council; particularly one such as the Blue Mountains City Council with something like 1100 heritage sites in addition to having within its municipal boundaries the UNESCO listed Blue Mountains World Heritage Area.

It is prudent for council staff to examine committee models operating in other local government areas and there is some reason to believe that local staff might have higher priorities, but surely a responsible council must give heritage some status in the community fabric.

And indeed there are many areas in council's administration where it obviously places a high regard on the heritage and history of the people it serves. Further evidence can be found in the actions of former deputy mayor Janet Mays supported by Greens councillors when they successfully moved that the possibility of re-establishing a heritage advisory committee be investigated back in June last year.

Eventually a report must come to council for decision, but it will be a disgrace if as seems likely, this is a watered down version. Other councils can find both the necessary resources to service and also see such a committee as a useful adjunct to its professional services. A committee with no real tasks, meeting as infrequently as four times a year, will not encourage those in the community to share the wealth of knowledge that exists and could be available to Blue Mountains City Council.

BMACHO's proposal is not for the creation of some watchdog that keeps an eye on council and its staff. It is simply to see the utIlisation of the great wealth of knowledge of heritage matters which abounds in the community. Already some in the heritage sector have walked away from the proposal because of the delays and frustration and if there is not some real progress in the future others are likely to do the same. Let's not squander yet another opportunity.

Thanks for the experience

As some will know, I will after 5 years at the helm, step down from the presidency of BMACHO later this month, due to ill health. I take this opportunity to thank so many who have worked with me to achieve the objectives of this organisation.There have been some real achievements and a few frustrations, but what we have done to promote heritage and to bring together like minded bodies to share ideas has been most worthwhile.

I thank everyone for the courtesies they have extended to Nanette and I over these past years – it really has been a wonderful and rewarding experience working for our heritage. The new friendships I have gained in this period will be cherished. Thank you one and all.

John Leary, OAM
President, Blue Mountains Association of Cultural Heritage Organisations Inc.

Sanatorium became Stratford Girls School

Continued from page 1

In 1924 Miss Wiles and her sister, who was also a member of staff, purchased the building from the Ralston estate and were then able to make additions and alterations to accommodate the school.

When Miss Wiles died in 1930, the enrolment was 49 girls of which 31 were boarders, five girls sat for the intermediate certificate exam and two girls sat the leaving certificate.

Control then passed to the Stratford School Council and subsequently, in 1936, to the Church of England, and the school entered its heyday as “Stratford Church of England School for Girls”.

“The development of capable Christian gentlewomen in an exceptionally healthy, bracing and invigorating climate” - that was the promise of Stratford School, to prospective students and parents in the 1940s-50s.

According to a 1950s school prospectus, boarders at Stratford enjoyed an atmosphere of individuality and co-operation. Pupils were “fitted for practical business”, whilst encouraged to regard life from the stand-point of high ideals and to further their studies at university.

Stratford’s curriculum, extending from primary to leaving certificate, included scripture, English, history, geography, French, Latin, mathematics, physiology, biology, business principles, book-keeping, art, handicrafts and speech training. Music and singing also featured as an important part of school life and students could choose to sit for Australian Music Examinations Board grade exams.

The girls wore an attractive grey uniform, but jewelry was strictly forbidden, with the gracious exception of the school badge and a wrist watch.

Money was also controlled, with all funds going to a pocket money account. Statements on expenditure for outings, church collections and incidentals were issued to parents.

Stratford ruins after the fire, photographed by Neil Billington(1983) for Blue Mountains City Library.

There were three school terms, each 13 weeks long, though the girls were allowed one weekend mid-term to visit relations or friends. Travel to and from Sydney for vacations and mid-term holidays, was always supervised by a mistress from the school.

During term, visitors were allowed, by arrangement with the headmistress, but no student could accept invitations without written permission from her parents. Non-vacation weekends were devoted to healthy activities and visits to places of interest in the district.

As with most Blue Mountains boarding schools of the era, great emphasis was placed on fresh air, healthy diet and wholesome activities. The dining room menu boasted copious quantities of fresh fruits and vegetables, home-made jams and preserves and plenty of milk. Prospectus photographs showed bright, healthy young ladies, poised with grace and decorum in the dining room, clearly enjoying their healthy, wholesome meal.

Recreation was also high on the list at Stratford with tennis, netball, vigaro and swimming at the nearby Lawson Pool offered to all pupils.

The girls were accommodated in bedrooms for two and four boarders and there is also mention of a fine glassed-in balcony with an eastern aspect which appears to have housed a few beds as well.

During the winter, swimming lessons were abandoned and wood fires were lit in the assembly hall and classrooms.

Stratford girls, unlike their counterparts at Osborne College, Blackheath, were also afforded the privilege of a hot water service.

The prospectus makes no mention of students’ academic records, but in the early 1950s, following a report by the Department of Education; the school was reduced to intermediate certificate level.

The 1957 fees brochure shows that the leaving certificate had been reinstated and announced the launch of a building fund to raise £5,000 for the erection of new and modern classrooms and to “gain help for Stratford to develop along modern lines.”

Two coaches from the Lawn Tennis Association had joined the staff to provide coaching to pupils for which a fee of £2.10.0 per term was charged.

It appears however that all this was unsuccessful, so with the buildings and furniture run down, changing trends in education and competition from public schools and other private schools such as Blue Mountains Grammar at Wentworth Falls - Stratford finally closed in 1961.

Continued page 4

Fire guts 1879 Lawson building

Continued from page 3

In 1966, the building was sold to a Sydney couple, who refurbished the interior to house wedding receptions, dinners and private parties.

The establishment lasted until the late 1970s, when in 1977, the Blue Mountains Community School moved in with 18 students, a new teacher and government grants for a library and mini-bus.

By 1980, the building was owned by brothers Lionel and Vivian Coleman of Sydney, but there would be no more tenants for Stratford.

On June 4, 1980, as the result of an electrical fault, the building was gutted by fire.

Today, the only reminder of Stratford's former glory is a large stenciled sign on the building's tower, the rest has gone.

The remains of the building, except for the tower section, were demolished by a developer in the early 1990s.

No further move has been made, at the time of writing, to develop the site, which is listed on the local heritage register.

Stratford at Tahlia and the Japanese Cherry Tree

In 1915 the first home of the school was the rented cottage Narbethong on Bathurst Road, then until 1919 at a house named Krawaree, later known as Tahlia House, situated near the Lawson Community Hall.

In 2008 Tahlia was threatened by road widening plans for Lawson and was re-sited back from the highway alignment by the RTA. While the school occupied Tahlia, in 1916, Woodford resident Toranosuki Kitamura, manager of Kinematsu (Australia) Ltd, imported a Yedoensis flowering cherry tree which he planted at the school as a token of respect for the high quality of education his three daughters, Jean, Una and Beth had received.

The tree thrived for many years but due to its age and poor health could not be moved to make way for traffic.

However over 100 young trees were successfully propagated from cuttings which are to be incorporated into landscape plans for the new highway and town centre.

In 2002 a farewell ceremony for the old cherry tree was organised by a former Stratford student from the 1940s, Mrs Kathleen Hooke nee Barwick, and attended by the Japanese Consul General, the Mayor and the Member for Blue Mountains, local councillors and the grandchildren of Mr Kitamura.

About the author

John Merriman is a professional librarian who manages the Local Studies Service and its research collection at Blue Mountains City Library.

His role involves acquiring, preserving and making accessible documentary evidence relevant to the Blue Mountains region.

This includes the historical, natural and built environments as well as the social, economic, political and cultural aspects of the community.

John's special area of interest is Blue Mountains pre-history and archaeology, in which he holds a degree from the University of New England.

He also manages the library's online image collection of several thousand photographs and writes a Local Studies blog on which this article is based.

Glenbrook Walks and Talks

March 26 – The Mountains Murders – Lee Weller's grave.

April 23 – Lennox Bridge, Mitchell's Pass and rock falls.

May 28 – The Duck Hole, Glenbrook Creek.

Further information Doug 4751 3275 or Tim 4739 2384.

“Is heritage still relevant to today’s community?”

“Is heritage relevant to today’s community?” is the title of an address to be delivered by Maisy Stapleton at BMACHO’s annual general meeting this month.

The meeting to be held on Saturday, March 19, 2011 will commence at 2.30pm.

The guest speaker Ms Stapleton, who is the deputy director, National Trust of Australia (NSW) will also speak on the grants and assistance program of the Museums and Galleries organisation and also mention the annual regional inspection and advisory program.

The National Trust-owned property Everglades, at Leura, one of Australia’s foremost cold climate gardens and arboreat will be the venue for BMACHO’s 6th annual general meeting.

Maisy Stapleton has over 30 years experience working in cultural organisations.

Those attending the meeting may inspect the Everglades Gardens

Her first job in the sector was curator of Elizabeth Bay House. Previous roles have included heading Regional Arts NSW, tourism, business and community relations development with the City of Sydney.

She has undertaken project management roles at the State Library of NSW, within a corporate exhibitions and museum development organisation and at the Australian Bicentennial Authority.

In 1988 she was the Commissioner of a pavilion at Expo 88 which featured the Captain James Cook collection from the National Maritime Museum in Greenwich, UK. She has also served on the board of the National Trust of Australia (NSW).

Maisy has a first class honours degree in Architecture and a Master of Business with a focus on marketing and maintains her interest in architectural heritage.

Everglades Historic House

Seahorse fountain spouting

Norman Lindsay Sea Horse Fountain is once again spouting water and delighting visitors.

The centrepiece of the garden at the National Trust Norman Lindsay Gallery needed extensive work to repair damage from tree roots.

An appeal raised the money for the work which also involved waterproofing the pond, re-plumbing and the installation of a root barrier to prevent future damage.

The fountain was built by Lindsay in the mid-1940s when he found the town water would finally reach the property.

He constructed the original statuary of mermaids, fish and a plunging ‘sea-horse’ from cement. Lindsay was so enthusiastic about his work that the fountain had water before the house was connected to the supply.

During the 1988 bicentennial celebrations the cement statuary was removed and replaced with the bronze casting seen today. Lindsay’s original is preserved in the gallery.

Since the property opened in 1973 the fountain has become an ‘unofficial’ symbol. *Blue Mountains Gazette*

More talks with BM Council on heritage advisory committee

BMACHO last month had further talks with staff of Blue Mountains City Council (BMCC) continuing negotiations initiated almost 5 years ago by BMACHO to see reestablished a heritage advisory committee of council.

In the latest round of talks council invited historical societies and heritage groups to consult with staff about a review of listed items under Local Environmental Plan 1991 and the investigation of the establishment of a heritage advisory committee.

BMACHO was represented at this meeting by its president John Leary, OAM, vice president Associate Professor Ian Jack, secretary Jan Koperberg, Dr Peter Stanbury and Dick Morony

BMACHO has previously discussed with council staff and individual councillors the objectives of its proposal for a heritage advisory committee and after what was considered to be a long history of unsatisfactory progress, accepted the offer last June, of then deputy mayor Janet Mays and Greens councillors to move in council for a report on the establishment of a heritage advisory committee.

The staff response to this successful motion by Cr Mays was to bring back to council another report that a report would be presented to council by the end of February 2011. The latest round of talks is in response to this undertaking by staff to the elected representatives of council.

Having discussed the staff draft proposal which was released in January 2011, BMACHO‘s management committee concluded that subject to some minor changes and clarification it could accept the staff’s 7 objectives which in principle were not unlike those which have been proposed by BMACHO for many years.

BMACHO’s representatives went away from last month’s meeting with council staff under the impression that the amended 7 objectives would form the basis of the forthcoming report to council.

However, BMACHO ‘s delegation told staff at the recent meeting that BMACHO was concerned that despite staff asking for assistance in reviewing the LEP 1991 it had failed to list as a role of the proposed committee, the BMACHO suggested objective — “to advise council in relation to reviews of local heritage listings”.

BMACHO is also concerned that staff appear opposed to another of BMACHO’s proposed roles – “to advise council on heritage matters relating to development applications” a function which is included in the NSW Planning Department Guidelines and also seen as a committee role by numerous other councils through NSW.

Other matters which are of concern to BMACHO are the proposed frequency of meetings (once every 3 months); the restriction which would preclude committee members other than councillors being elected as chair and deputy chair and the omission of BMACHO’s suggested role of advising council in relation to long term planning of significant heritage cemeteries sites.

ASSISTANCE FOR REVIEW OF LEP 1991

BMACHO went into the meeting with the view that it was at a loss to understand why there is any further need for review of the LEP 1991 particularly in view of the fact that the community at large and particularly most historical societies believe the necessary process has been carried out and any further review delays a plan first initiated some 20 years ago.

BMACHO before supporting BMCC staff proposals needs to be satisfied as to why it is necessary at this stage to seek public involvement, when LEP 1991 has gone on public exhibition from October 16 to November 13, 2002.

Members of the public responded. It is understood that the relevant council officer of the day (Elton Menday) invited the heritage consultant to comment on these responses as this was part of his brief.

It is further understood that these comments were considered, some being welcomed others for which the consultant found powerful arguments against their incorporation in the LEP being rejected.

It appears at least some of the information provided has not been included in LEP 1991.

From these inferences, BMACHO cannot find an arguable reason for revisiting the process in a different form. BMACHO also considers that if there is to be any further review of LEP 1991 it needs to take into account the expertise of heritage professionals under proper contractual arrangements.

BMACHO having been advised by council staff at last month’s meeting of some reasons for the need of another review will discuss this information at its March management committee meeting.

Council’s staff in response to a question at the meeting from BMACHO president, John Leary said it seems likely that 2013 could be an achievable date for Gazettal of LEP 1991.

Interested in looking after money?

Then we have the job for you.
BMACHO is looking for a treasurer.

Forests, timber and milling in Mt Irvine

and (later Mt Wilson) in the Northern Blue Mountains or the Carmarthen Hills

by Mary Reynolds, OAM - Research Officer, Mt Wilson and Mt Irvine Historical Society Inc.

This mountain and Mt Wilson along with Mt Tomah, Mt Banks and Mt Hay and others are especially distinguished as they are capped with a basalt rock producing a rich volcanic soil.

From this soil and the climatic conditions grew a rich and temperate rainforest covering these mountains along with magnificent Eucalypts.

European settlement came late to Mt Wilson c. 1875-6 and Mt Irvine c. 1897. These settlers were confronted with 'an impenetrable bush' or Brush as it was called.

The temperate rain forest on Mt Wilson and Mt Irvine contained in its pristine state Doryphora sassasfras, Coachwood, Black wood or Acacia melanoxylon, Quintinia siberia or Possum wood , the Lilly Pilly and many Tree ferns ranging from the Todea barbara or king fern to the Dicksonia antarctica or soft tree fern and beneath them a forest floor of many others.

Above the rain forest on the heights of the mountains were the giant Eucalypts.

There were differences between Mt Wilson and Mt Irvine where the Turpentine and the Angophora grew while in Mt Wilson there were giant Eucalyptus: The Eucalyptus oreades or Blue Mountain ash: Eucalypytus fastigata or brown barrel, a stringy bark; Eucalyptus cypellocarpa a mountain gum or yellow gum and Eucalyptus viminalis ribbon gum, manna gum or white gum to name a few.

In 1868 when ES Wyndham surveyed Mt Wilson he wrote later that he found no sign of human influence or impact.

When Richard Wynne one of the original purchasers of land during 1875 - 6 arrived to establish a small

A glimpse of the forest in Mt Wilson c 1875[1]

Gothic cottage on Portions 36 and 37 he is said to have found some timber cut.

The assumption was made that the construction of the railway which had reached Mt Victoria in 1868 and had now moved across the Darling Causeway to Bowenfels via the Zig Zag in 1869 railway builders and workers had found their way to Mt Wilson via the track created by Wyndham to Mt Wilson.

It is said that Richard Wynne cut notches in the cut timber to prevent its use as sleepers. Today those notched planks are visible in the small Gothic Cottage on Wynstay.

For the birth of a timber industry Mt Irvine is of deeper interest. Timber milling in Mt Wilson did not commence until after World War 1.

Mt Irvine's European history took place in 1897, 20 years after the settlement of Mt Wilson, when three young men from Hawkesbury Agricultural College on the advice of Charles Robert Scrivener, NSW metropolitan staff surveyor and father of one of the young men, Charles Scrivener told them to lay claim to this mountain.

Charles Robert had recently surveyed the mountain and the ridge linking it with Mt Wilson. Deeply impressed by the richness of vegetation and soil C.R.Scrivener had failed to persuade the NSW Government to declare it a National Reserve.[3]

Hence his advice to his son, Charles and his two friends, Harold Morley and Basil Knight Brown.

They were able after incredible energy and privations to gain the land they wanted about 1,000 acres in July, 1897.

Relying on the memories of Harold Morley written in 1950 we can create an outline of how timber played a role in their rugged, harsh early lives in this remote place.[4]

Charles Robert Scrivener had intended starting a saw mill and making a road to transport the timber.

But promotion altered that as he became a district surveyor and later chief of survey to the Commonwealth surveying the site that was to become Canberra.

Continued page 8

Eucalypts rising 200ft in remote areas

Continued from page 7

Already the removal of timber from the land was a mammoth task for all three young men.

"The first clearing we did was grubbing out the trees.

"This was entirely a terrific job, involving cutting up and stacking huge piles of logs."[5]

Harold Morley had giant Eucalypts, Turpentines with Sassafras in between on his clearing."

Some of the trees were 200 feet, requiring holes 24 feet across and 6 feet deep to grub them while the roots were like big logs running out yards from the trunk.

It is little wonder when the sawmill plan did not eventuate that Basil Knight Brown, the other young adventurer advertised the need for a sawmill so that the land could be cleared for orcharding.

Anderson Brothers of Coonamble took up the offer driving their outfit from The Pilliga to Mt Irvine in 1904.[7]

The first mill was established below Basil Knight Brown's clearing known as 'Painui'.

It was described as a big place with a shingle roof".[8]

The saw mill brought some helpful changes to their lives providing cheap timber and the opportunity to sell logs although they were only paid 1 shilling per 100 feet.

They also obtained fruit cases for 5 pennies each when the fruit came along.

Before the fruit trees came into bearing potatoes and onions were grown between the trees and sold to stores in Lithgow, Bathurst and Mudgee.

John Anderson and his wife Amelia lived in a small cabin with their young family close to the mill.

About 1908 a fierce bushfire started and roared across the Knight Brown property showering sparks and burning fragments onto the mill. Amelia Anderson tried desperately to save the mill but her own cabin caught alight and she and her children were saved by Miss Bessie Knight Brown.

A new mill was constructed below 'Taihoa' on the creek [Russell Creek] while John Anderson built another cabin near the gate of 'Taihoa' for the family.

The mill operated it seems quite successfully until the second decade of the 20th century.

In 1911 it appears that John Anderson turned his attention to Bilpin for he purchased Portion 23 there and built a home known as 'Woodleigh'[9] where he and Amelia were to live for the next 30 years.

Nevertheless he maintained some interest in Mt Irvine returning there from time to time.

His daughter Bessie,wrote many years later that her father had decided that 'No more trees should be taken and that the forest left [in Mt Irvine] should be allowed to grow.'[10]

According to 'Mt Irvine A History' Anderson's mill closed in 1914

Harold Morley on the right and CR Scrivener on the left at the base of a large Eucalypt c 1896.[6]

when mill employees enlisted for World War 1. It was probably not quite as simple as that reason suggests for John Anderson, returned to Mt Irvine to work after moving to Bilpin.[11]

Charles Robert Scrivener retired in 1915 from his position in Canberra as Commonwealth Director of Surveying, building the unusual and charming 'Taihoa' at Mt Irvine from local timber.

His younger sons Pedder and Tom had returned from service in World War 1.

To provide them with employment he discusssed with John Anderson the idea of setting up a mill.

" My father told him that the forest needed ten or fifteen more years of growth before milling could be viable."[12]

In 1918 Charles R. Scrivener set up a mill below 'Taihoa' for his sons, Pedder and Tom. John Anderson perhaps reluctantly, entered into a contract to cut and haul logs to the mill. ***Continued page 9***

Tallest tree

The tallest reliably documented tree ever measured was the Thorpdale Tree, a Mountain Ash (*Eucalyptus regnans*) growing at Thorpdale in Victoria.

The tree was measured at 112.8m (370 feet) standing and 114.3m (375 feet) on the ground after it was felled in 1884.

Turpentines used on Sydney wharves

Continued from page 8

Three cottages were built on the road near the mill. Timber for building and for fruit cases was milled.

The Turpentine, a very strong and hardy timber was sent to Sydney for piers for the wharves. A separate shed produced broom handles and pegs from Sassafras logs.[13]

When the new home of Colonel R.O.Wynne and Marianne Wynne was being constructed at Wynstay 1921-1923 much of the timber came from Mt Irvine, particularly the Blackwood.[14]

It was not long after that the mill was burnt down and was not restored.

A sketch of the Scrivener Mill which came originally from the Home Journal.[15]

Mary developed a vision for a musem

Continued from page 1

Mary made many friends through these endeavours at Woodford Academy and Norman Lindsay Gallery. By 1993 she was becoming recognised in her local community as a much needed researcher and writer on European settlement in Mt Wilson and the surrounding district.

Through months of discussion with the owners of *Wynstay* Mary developed a vision for a museum of local history to be set up in the Turkish Bath and remained the driving force behind the establishment of the museum and the Mt Wilson and Mt Irvine Historical Society, incorporated in 1996.

It is mainly thanks to Mary's dedication and skills that the local society is active, well supported and recognised as an important source of information and reference material on local heritage.

On hearing of this recent award, many people in the community expressed the view that we are lucky to have her, and we heartily agree!

Pictured above Mary and Ellis Reynolds.

Trust award for Norman Lindsay stalwart

Long time hard working chairperson of the Friends of Norman Lindsay Gallery and Museum, Debbie Handley has received the National Trust of Australia (NSW) Commendation award.

Mrs Handley has received the award for her work fundraising and organising events such as the annual Jazz in the Gardens in February and the Jazz and Wine Festival in May.

The award recognises her work as chairperson of the Friends of Norman Lindsay Gallery and Museum and as a member of the NLG Advisory committee.

Pictured is NLG manager Amanda Trevillion presenting on behalf of the Trust the award to Debbie Handley (right of picture).

NEW NAME FOR GARDEN

Mount Tomah Botanic Garden since March 1 is now known as the Blue Mountains Botanic Garden, Mount Tomah.

The Royal Botanic Garden and Domain Trust executive director, Dr Tim Entwisle said the change of name retains the link with Mount Tomah while highlighting the location of the garden and its role in conserving and growing native garden plants of the Blue Mountains

"We recently opened the World Heritage Exhibition Centre and this name change reflects our commitments to this unique and important part of the world," Dr Entwisle said.

During March and April, the Blue Mountains Botanic Garden at Mount Tomah will be part of the first annual *Sydney Morning Herald* Autumn of the Arts festival across all three Sydney region botanic gardens.

To open the two-month celebration of the arts, the garden will stage Garden Grooves, an afternoon jazz concert on Saturday, March 5.

For more information contact 4767 3019 or visit www.autumnofthearts.com.au

COX'S ROAD WALK

The Blue Mountains Branch of National Trust is organising its annual Cox's Road walk for Saturday, April 30.

The walk is from Mt York to Hartley Vale down the road constructed by William Cox and his band of convicts in 1814 – 15.

There are some excellent relics to be seen, the result of hard work and ingenuity which enabled the first settlers to move from the confines of Sydney basin to the western plains of NSW.

The walk being down hill is not particularly difficult but it is steep in parts and walkers need good strong footwear.

There will be a hearty lunch at the bottom and a bus to take walkers back to Mt York. Cost $30 adults, children $15, families $75. Enquiries to Rhona Leach 4757 2424

Lincoln Hall to speak at Norman Lindsay

Famed mountain climber and author, Lincoln Hall will speak about his amazing adventures at an adult literary evening at Norman Lindsay Gallery on Saturday, April 2.

'Cartoon Dave' Hackett will also talk about his life as a cartoonist.

The evening will commence at 7pm with drinks, followed by anecdotes and then questions and answers with the guest speakers and concluding with coffee and canapes.

Cost $30 per person or $25 National Trust members. Bookings essential 4751 1067.

On Sunday, April 3 Norman Lindsay Gallery will host the Festival of Children's Literature with talks by well known children's book authors and illustrators.

The program will include Duncan Bell, David Legge, Frances Watts and 'Cartoon Dave' Hackett. Stalls, book signings, story telling and entertainment and plenty of food.

Enquiries 4751 1067.
Tickets 4784 3832 Gifts n Things.

WALK THROUGH DARK'S COMMON

Blue Mountains Branch of the National Trust is conducting a walk through Dark's Common along the route of the Construction Tramway that was used to transport men and materials to the edge of the Glenbrook Gorge for the duplication of the railway completed in 1912.

This is an easy walk down an interesting bit of Glenbrook history capped off by spectacular views of Glenbrook Gorge.

Included is tea, coffee and bikkies at the end of the walk all for a cost of $5.Those interested should bring walking shoes to Lapstone Public School car park for a 9am start on May 15.

Lithgow Family History Society to celebrate silver anniversary

The Lithgow & District Family History Society Inc would like to invite all members including foundation members and guests to join in the celebration of its 25th Anniversary on Sunday, March 13, 2011 at the Zig Zag Motel, 70 Chifley Road. Lithgow, Cost is $35 per person for a three course meal.

There will be numerous family tree charts and other memorabilia and photographs on display, as well as a photographic slide show.

There will be 2 CD's for sale for $10 each. One is a photographic slide show of members and events spanning the 25 years of the society, and the other is a CD on the society's involvement in the Roses from The Heart - Female Convict Bonnets Project.

Some late bookings will be accepted. Anyone may contact the library on (02) 63531089 on Fridays from 10am - 4pm or Tuesday nights from 6pm - 9pm or Helen Taylor (02 6355 7231 or taygun@bigpond.com

President of the society, Eleanor Martin said the group was established in 1986 to allow local people and others to research their family lines and to learn their family stories.

Yvonne Jenkins founder of the society in 1986

From humble beginnings in 1986. The society's first library which was situated under the City Library and was cold and damp

The society of volunteers has established a library, now situated at the corner of Tank and Union Streets to store the extensive resources of local cemetery records, local and family histories, journals from international and national sources, many photographs, copies of Governments Gazettes and local newspapers as well as IGAs and birth, death and marriage records on CDs, fiche and reels. Convict, shipping, immigration and census records are also held.

Social gatherings and bus trips to cemeteries and archives as well as workshops and seminars are arranged to assist people to research and store their information, source identification and display their family trees.

Some records are available for sale upon request and the society produces a journal *Lithgow Pioneer Press* three times a year.

Researchers can attend the library during open hours and receive assistance to work through the extensive indexes of much of the resources for a small fee. Open times are every Friday 10am - 4pm. Tuesday 6pm - 9pm and first Saturday 10am - 4pm of each month except January

The society's premises corner of Tank and Union Streets, Lithgow

Mudgee's early links with horse racing

by John Broadley

The author of this article, John Broadley, a teacher by profession, undertook a Masters degree in Cultural Heritage Studies post retirement, and since has worked extensively on conservation management programs for numerous buildings in the Central West region of New South Wales.

Currently President of Mudgee Historical Society Inc and a member of the Gulgong-Mudgee-Rylstone branch of the National Trust of Australia (NSW), his special interests are in the early settlement of the Central West region of New South Wales and Australian colonial architecture. John is soon to publish *Historic Houses of Mudgee*, a study of nineteen significant Mudgee district homes and their owners, gardens and outbuildings. Mudgee Historical Society Inc is an inaugural member of the Blue Mountains Association of Cultural Heritage Organisations.

Isolation and the relatively late arrival of the railway in 1884, caused the Mudgee district to be long reliant on the horse.

Many of the district's pioneer pastoral families played leading roles in the establishment of the bloodstock industry and in the administration of the turf in the colony of New South Wales.

In the early days of the colony William Hayes, an emancipist who took up large tracts of land which evolved into the property now known as Havilah, was a noted breeder and importer of blood stock to Lucan Park, his property at Eastern Creek, west of Sydney.

His neighbour and son-in-law, Charles Roberts of Wallgrove at Eastern Creek, who took up the homestead portion of Havilah, was also a horse breeder of renown, owning at one stage Gratis, one of the foundation stallions of the Australian bloodstock industry.

Prominent district pioneer William Lawson was a skilled equestrian even in his middle age, winning the Governor's Cup on his own horse Spring Gun at Parramatta at the age of fifty-four.

Lawson's Mudgee properties were supervised by youngest son Nelson Simmons Lawson and managed by Nicholas Paget Bayly, who later established the Havilah merino stud.

The first race meeting in the Mudgee district was held on the flats behind Nelson Simmons Lawson's Putta Bucca homestead in 1842; later meetings were staged successively at Menah and Oakfield, before moving to the old racetrack on the site of the airport in 1861.

The Rouses of Guntawang and Biraganbil were renowned for the quality of their bloodstock, as well as for their carriage and stock horses.

The famous 'crooked R' brand, established by the first Richard Rouse, was immortalised by Banjo Paterson in the poem *A Bushman's Song*:

This old black horse I'm riding –
if you'll notice what's his brand
He wears the crooked R you see
– none better in the land.

Horse racing was one of the earliest forms of entertainment for the district's pioneer settlers; race meetings and amateur picnic races are still popular social occasions today in Mudgee.

Henry Bayly of Beaudesert, Mudgee, a son-in-law of William Lawson, operated a horse stud called Bayly Park at South Creek, and at one stage owned Australian, a noted sire, the legendary Jorrocks.

It is unclear whether Jorrocks was foaled at Bayly Park or Beaudesert, originally and confusingly also called Bayly Park.

Jorrocks later belonged to John Richard Rouse of Guntawang, and began his extensive and distinguished racing career in amateur races in the district.

One of the oldest picnic race clubs in New South Wales, the Bligh Amateur Race Club, is based in Mudgee.

The club ran its first meeting in 1874 and meetings have run regularly since then, with the exception of the war years

Continued from page 12

Many Mudgee landowners were excellent amateur riders, among whom were Richard Rouse senior of Guntawang and his cousin Richard Rouse junior of Biraganbil. Richard Rouse senior and Vincent Dowling of the Lue Estate were both experted four-in-hand drivers, a sport which was much popularised in recent years by the involvement of Prince Phillip, the Duke of Edinburgh.

Leslie Rouse and Herbert Rouse, sons of Richard Rouse junior of Biraganbil, were both extensively involved in racing.

For many years Leslie Rouse was a keeper of the Australian Stud Book and a prominent AJC administrator, while Herbert Rouse maintained the Biraganbil horse stud.

Ernest Hume, in his *History of Mudgee* compiled in the 1930s, wrote nostalgically of race meetings, when Mudgee must have been a hive of activity:

"In the early days it was a most pleasing sight to witness the entry into town of many old pioneering Bligh families with their prancing, well-groomed four-in-hand teams with coachmen in livery, and trumpeters in resplendent swing made a triumphant parade of the streets while large strings of sleek, well-groomed horses filled the hotel stables.

Among the foundation members of the club were to be found many representatives of those grand old racing families and the names of the Rouses, Lowes, Whites, Dowlings, McMasters, Watts, Bettingtons, Bowmans, Cox's, Tucklans (sic), Lawsons, Niversons (sic) and Bells are still freely spoken of."

Members of several of these families remain entrenched in the district and maintain their families' traditional association with local district racing.

Horses were also a major concern for the Cox family of Fernhill at Mulgoa and Rawdon at Rylstone. Edward King Cox, also a merino breeder, bred Yattendon, winner of the first Sydney Cup and the sire of Chester and Grand Flaneur, themselves both sires and winners of the Melbourne Cup in 1877 and 1880 respectively.

Mudgee Racecourse circa 1920s Photograph courtesy Mudgee Historical Society Inc. The race course was moved to the current site (above Lawson's Creek and not far from the northern bank of the Cudgegong River). The grandstand which appears in both pictures has been demolished.

Chester was sold in 1876 to James White, eldest brother of Henry Charles White of Havilah.

James White's winnings from bets on Chester allegedly paid for the construction of the elaborate mansion on Kirkham, now called Camelot, his racing stud at Camden.

James White also owned Martini-Henry, winner of the Melbourne Cup in 1883; Martini-Henry had the same sire, Musket, as another Melbourne Cup winner, Carbine.

James White also started the Newmarket stables at Randwick and his racing success as an owner in major racing events is still without equal in Australia.

Henry Charles White of Havilah and his son Henry Hunter White were both heavily involved with racing and the AJC and maintained an extensive horse stud at Havilah.

The Thompson family of Rylstone and Bylong has long associations with horses and remains entrenched at Widden stud in the Widden Valley, north-east of Mudgee.

Lochiel, a winning racehorse owned by James Thompson of Bylong, was commemorated by a house in Mudgee named Lochiel, formerly Annan Lodge, now the site of Mudgee Bowling Club, which was owned briefly by the Thompson family in the early 1900s.

(Sir) Hugh Denison of Guntawang at Gulgong, was a successful racing man, owning the 1906 Melbourne Cup winner, Poseidon.

Poseiden, 1906 Melbourne Cup winner

Boat People, 1788 – 1922

The Blue Mountains Family History Society will conduct a seminar at the Springwood Baptist Church Hall, 313 Macquarie Road, Springwood on Saturday, April 9.

The seminar will discuss the Boat People 1788 - 1922…Why they came, the passages on the boat and what they did when they arrived in Australia.

The following is the program:
8.45am to 9.15am Registration
9.15am to 9.30am Welcome: Ian Kendall, M.C.
9.30am to10.30am Convicts and Colonists: An overview of the boat people 1788 -1922: Christine Yeats, Manager, Public Access, State Records NSW.
10.30am to 11am Morning tea
11am to 12 noon The sweet, the sour, the seditious …and the swashbuckling: Gay Hendriksen, Curator, Parramatta Heritage Centre.

Pictured is the third class sleeping quarters and third class yard at the notorious Parramatta Female Factory where female convicts were housed after arriving by boat from England. Photograph courtesy Gay Henriksen

From British prison to the shores of NSW convict female factory women met the challenges of transportation.

A glimpse of this unique aspect of Australian history.
12 noon to 1pm Assisted Scottish Passages: Ray Thorburn is a full time family and social historian. He is to talk about the different waves of people who came from Scotland.

1pm to 2pm Lunch
2pm to 2.30pm Entertainment: Jim Lowe, Folk Singer
2.30pm to 3.30pm European Immigrants: Gary Luke is a NSW committee member of the Australian Jewish Historical Society who will talk about European and Jewish immigration in the period 1788 – 1922.
3.30pm to 4.00pm Afternoon tea and finish

For further information, please contact Jan Koperberg Phone: (02) 4754 1544 Email: jank@eftel.com.au

Other Melbourne Cup winners links with Mudgee

Continued from page 13

Born Hugh Dixon, he changed his name to Denison to avoid confusion with his uncle and namesake, Sir Hugh Dixon, a staunch Methodist who disapproved of his nephew's association with racing.

During his period of ownership of Guntawang from 1908 - 1918, the property was renamed Eumaralla.

Local newspapers regularly recorded the successes, progeny and health of the bloodstock of the district's nabobs, intermingled with social jottings:

"After going home to Guntawang Mr Rouse's Dum Dum nearly died from being overheated. The daughter of Projectile is now quite recovered." *Mudgee Guardian*, December 2, 1901.

Two other Melbourne Cup winners have indirect links with the district.

Noted sire the legendary, Jorrocks

Westcourt, the winner of the 1917 Melbourne Cup, was at one stage owned by Daniel Seaton, owner of Eurunderee at Mudgee, adjacent to Westcourt, formerly Frederickburg.

Rodney Rouse Dangar of Baroona, Singleton, a nephew of Richard Rouse senior of Guntawang, was the owner of Peter Pan, winner of the 1932 Melbourne Cup.

The Mudgee district continues its association with the horse into the present day, with large breeding, breaking and spelling establishments at Gooree and Guntawang and Havilah.

Glenbrook's horse trough - a new role in retirement

The Glenbrook horse trough

By John Low

Last year John Leary, the editor of this splendid journal, wrote a piece in *HERITAGE* about George and Annis Bills and their extraordinary horse trough legacy. (Leary, 2010)

To illustrate his article he used a photograph of the horse trough at Glenbrook, one of four Bills troughs in the Blue Mountains and located on the western side of the Glenbrook Theatre (formerly the School of Arts) facing Ross Street near its intersection with the Great Western Highway.

The other Blue Mountains troughs funded through the Bills estate can be found at Warrimoo, Wentworth Falls and Medlow Bath.

Though not in its original position, the Glenbrook trough was installed outside the School of Arts almost certainly in the 1930s.

At some stage (possibly when the building was converted into a theatre) the trough was removed by the Blue Mountains City Council and placed in storage.

It was returned to public life during the Glenbrook Centenary celebrations in 1985 and 'unveiled' by Mayor Peter Quirk on Sunday, November 10 in the presence of residents and a number of local horses. (Anonymous, 1985)

The plaque on the Glenbrook horse trough

It is currently accessible and in good condition, though missing the small dog trough usually attached to Bills funded troughs.

In his article John mentioned a unique feature of this trough that distinguishes it from other Bills troughs, both in the Mountains and elsewhere – the presence of a small brass plaque bearing the words: "This trough was donated in remembrance of those horses that did not return from the First World War 1914-1918".

Is this, however, strictly correct? While the Animal Protection Society, NSW, (of which George Bills was a 'life governor') expressed the hope at the conclusion of the war that "the services rendered by war horses and dogs" would be recognised by the erection of war memorial troughs (APSNSW, 1919) and George Bills would certainly have been in agreement with this, there is no mention in his will, drawn up in 1925, two years before his death, of the war being the reason behind his bequest.

Following legacies to family, friends and employees, the will stipulated that a trust fund be formed from the residue of his estate to fund horse troughs wherever, with the consent of the appropriate authorities, they be deemed "necessary or desirable for the relief of horses or other dumb animals" and to assist the work of societies and organisations established for the purpose of protecting and alleviating cruelty to animals. (Bills, 1925)

The trust (to be administered by his sister Daisy and her husband) was a natural outgrowth of George's long standing concern for animal welfare and ensured that his and his late wife's ideals would continue to find expression after his death.

Indeed, when the demand for horse troughs lessened in the post-war years, the Bills Trust shifted its primary concentration to the wider problems of animal welfare.

It appears that the inscription on the Glenbrook trough was added at the time of its resurrection in 1985 and though conceivably the fate of the war horses could have informed the original application to the Bills estate for funding, the plaque is more likely the result of later misunderstanding.

Though qualified somewhat in her recent publication (Aston, 2009), in her earlier history of Glenbrook, published around the time of the centenary celebrations, local historian Nell Aston certainly cites the memorial aspect as the reason behind the Bills' benefaction, writing that troughs were funded "because they [the Bills] were concerned about the hundreds of Australian horses abandoned overseas after World War I". (Aston 1986)

Continued page 16

Thousands of horses shipped off to WW1 ... one returned alive

Continued from page 15

Despite such issues of accuracy, however, the addition of the plaque has had a serendipitous effect. It has given the Glenbrook trough a new role in its 'retirement', a role not unsympathetic to the ideals behind the Bills bequest.

It has turned the old horse trough into a war memorial and, as far as I'm aware, the only war memorial in the Blue Mountains dedicated to animals and reminding us of their service and suffering through war.

When World War I began horse power was still the primary means of transporting people and goods and the military needed horses.

Thousands were required to move food, supplies and ammunition, evacuate the sick and wounded and the artillery regiments depended on them to transport their heavy guns. And then, of course, there were the mounted chargers so prized by the Light Horse, the tough, sure-footed Australian Walers with a reputation second-to-none.

Of the 135,926 Walers shipped overseas for military purposes during World War I it is generally believed that only one returned. (Yarwood, 1989)

Sandy was repatriated with the body of his rider, Major General Sir William Throsby Bridges, leading the general's funeral cortege and then being pensioned off to spend the rest of his life at the Central Remount Depot, Maribyrnong, Victoria.

Blind and sick he was put down in 1923. As for the rest, if they survived the war, quarantine issues and the cost of shipping them back to Australia saw them left behind.

They were 'humanely' slaughtered, sold locally or handed on to British units.

Despite the efforts of many, especially among the light horsemen, to secure a humane future for the horses, confirmed cases of abuse occurred.

The legendary Australian light horse regiments were the mounted infantry whose men and horses were inseparable in desert warfare.

Many light horsemen were genuinely and emotionally scarred by the enforced separation and attempts during the post-war years to raise money to buy back old war horses reflected a considerable degree of public disquiet.

In the 1920s a memorial trough dedicated to the war horses was erected in St. Kilda Road, Melbourne (relocated in 1986 to the Shrine of Remembrance Reserve) and for many years was the centre piece of an annual remembrance service.

It was funded with money raised by the Purple Cross Service of Victoria, a body formed in 1915 to work on behalf of horses employed at the front.

George Bills, retired from his Sydney business and living in Melbourne at this time and active in the Victorian Society for the Protection of Animals, may well have donated money to this trough and even attended the 'turning on the water' ceremony presided over by General Sir John Monash on May 10, 1926. (Pertzel, 2006)

What an attraction the Glenbrook trough could become as the focus of a distinct and unique memorial service on Anzac Day and/or Remembrance Day each year!

Bringing together such organisations as the RSL, the RSPCA, the historical society, the chamber of commerce and the schools and with a recounting of stories of individual war horses, dogs etc., especially of animals and their handlers associated with the Blue Mountains area, a truly individual experience of community remembrance could be fostered.

There is a recent precedent. In the South Australian town of Barmera, a horse trough erected in 1930 to honour the memory of horses who participated in World War I was rededicated by the local primary school children in 2000.

The children pledged to hold a service there on Remembrance Day each year and to lay colourful, horseshoe-shaped wreaths on the trough.

Continued page 17

Glenbrook horse trough

Continued from page 16

The local council later attached a plaque declaring that the trough had been handed over to the care of the children and featuring a poem composed by the President of the Barmera RSL. (Berri-Barmera Council, 2001)

George and Annis Bills would most certainly have approved.

INDEXES = INFORMATION

Ever spent hours hunting through old journals looking for details you remember reading, but want now? Or did you just give up?

In 2001 Suzanne Voytas, then president of Blue Mountains Family History Society Inc, and I were bemoaning the under utilisation of not only our past copies of *The Explorers' Tree*, but journals of other societies.

They held useful information and represented a considerable outlay of our limited funds. To me indexing was the dreaded chore that marked the completion of one of my textbooks, yet I agreed to start indexing the society's holdings.

To date the society has published indexes to our journal holdings for 2003, 2004-6, 2007-8, 2009-2010 ready now and 2011 is underway.

Combined total is about 18,000 entries from societies from every state and territory, as well as some overseas sources.

Family details are published where we live, not where our ancestors lived so our research interests are worldwide and, of course, local studies provide the setting in which they lived.

So indexes are essential! *BMACHO Heritage* is not included in the journal indexes as it is restricted to hard copies only, but index to 2009-2010 can be accessed on BMFHS website at http://www.rootsweb.ancestry.com/~nswbmfhs/res/bmacho.htm

Our copy of NSW edition of *All Australia* WW1 soldiers has been made accessible with an index.

Miscellaneous indexes to Blue Mountains businesses from advertisements add to our local knowledge and help enquirers.

An index to upper mountains references in Lithgow Family History Society's extracts from *The Clarion* newspaper in 1942 enabled us to find the location of an evacuated family as they were mentioned in a gossip column ... and so on.

Where there is a need, I will probably get around to compiling an index but although I admit a degree of efficiency I still do not enjoy indexing. However I do appreciate the speed with which articles can be located.

Joan Edwards
Past President, Blue Mountains Family History Society Inc.

Colonial vineyard's history salvaged

A box of documents containing rare information about the State's oldest exisiting vineyard has been donated to the State Library of NSW.

The box was salvaged by a man scavenging the Cessnock rubbish tip. He in turn gave it to his friend, coal miner Bill Chapman, an avid collector of old papers. Bill recently opened the box to find some 3500 documents dating from the 1840s to 1900 relating to the pioneer wine producers George and John Wyndham. Wyndham Estate manager Stephen Guilbaud-Oulton purchased the documents from Bill and donated the entire archive to the library.

State Library head of Manuscripts, Tracy Bradford, said this was arguably the world's largest single collection relating to the running of a colonial vineyard.

"Interestingly we can see from the collection that Australian wines were gaining international recongnition way back in the 1860s to 1880s, even though most people think the Australian wine industry came of age in the 1970s" she said.

An early image of the Wyndham cooperage

George Wyndham became the father of Australia's shiraz after planting the first commercial shiraz vineyard in 1830. He and John enjoyed great success at international competitions, with a gold award at Bordeaux in 1882 and a Diploma of Honour at the 1883 Amsterdam International Exhibition among their wins.

The box of documents includes fascinating details about the logistics of transporting wine by rail from Branxton, correspondence with clients and a letter signed by Hardy's Wines founder Thomas Hardy calling one of John Wyndham's drops, "the wine of the show." In 1886 John Wyndham commissioned photographer Harrie Ballard to record his vineyard to homestead and celebrate his viticultural achievement. Of 18 pictorial albums produced only a few survive, one in the State Library.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2010-11 is: John Leary (president), Ian Jack (vice president), Jan Koperberg (secretary), Kathie McMahon-Nolf (treasurer), Jean Arthur, Joan Kent, Doug Knowles, Dick Morony (public officer), Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

Governor visits heritage grave

A service to celebrate the completed restoration and State Heritage Listing of the 1831 grave of Eliza Rodd on the Glenroy property of Mr and Mrs Barber near Hartley saw Her Excellency, Professor Marie Bashir, AC,CVO accompanied by Sir Nicholas Shehadie once again visit the region.

The following is an extract from an article in the *Lithgow Mercury* written by its editor Len Ainsworth, OAM.

BACK on April 30, 1815 when Governor Lachlan Macquarie traversed Cox's Road and visited Hartley for the first time he wrote in his diary that the vista before him was 'one of the finest landscapes of any country I have yet visited'.

One hundred and ninety six years later the 47th Governor of NSW Dr Marie Bashir, was back at the same site, repeating his words of praise.

The ceremony marked the listing on the State Heritage Register of the relics of the military barracks that existed on the site and the recently restored grave of a child who died there while her father was in charge of the 39th Regiment of Foot [detachment].

The regiment was stationed at Hartley and charged with protecting pioneers as they made their way to the newly opened land beyond the Blue Mountains.

Dr Bashir addressed an invitation-only crowd at a monument at the Glenroy camping reserve that marks the site where Governor Macquarie attended the first Christian church service west of the Blue Mountains in 1815.

The Governor referred to the importance of the Glenroy relics, now on the property of Bradley and Rosemary Barber and family, to the colonial history of NSW.

She said that as the 47th Governor of this State she was proud to walk in the footsteps of Governor Macquarie who had brought enlightened and compassionate leadership to the colony.

He arrived to find a 'wretched and demoralised people' but was able to transform the young colony into what was described as 'the greatest appendage of the British Empire'.

Dr Bashir described how Governor Macquarie's humane treatment of the convicts and his emancipation and welfare programs raised the ire of the British establishment back home who were concerned that the colony was becoming 'too attractive' to the former soldiers and sailors out of work after the end of the Napoleonic Wars.

The Governor Prof Marie Bashir , accompanied by the Chair of Lithgow Reginal Branch of the National Trust of Australia (NSW), Mrs Marcia Osterberg-Olsen, Mr and Mrs Bradley inspect the grave site of Eliza Rodd. ***Photograph courtesy Lithgow Mercury***

She said that upon his visit to Hartley he described 'the finest landscape of any country I have yet visited'.

Dr Bashir said Governor Macquarie's vision was an encouragement to free settlers and had paved the way for the growth of NSW.

Earlier Dr Bashir was welcomed by the National Trust local branch chairperson Marcia Osterberg-Olsen and by Mr Brad and Mrs Rosemary Barber, and took part in a ceremony marking the restoration of the grave of eight month old Eliza Rodd. Descendants of the Rodd family came from Perth for the occasion and read a poignant letter from descendants in France.

Premier keeps promise to create heritage ministry

All associated with the heritage sector and those who have an interest in conserving and maintaining our heritage will welcome the early appointment of a minister for heritage by the new Premier of NSW, Barry O'Farrell.

The new government has given heritage a voice in cabinet.

The new Minister for Heritage, Robyn Parker who also has responsibility for the environment ministry has many challenges ahead of her - not the least of which is getting up to speed on the scope and range of heritage and environmental issues in NSW.

By her own admission the learning curve is steep, and we should wish her well, because, frankly, the state of our heritage needs Robyn Parker to succeed.

Prior to the March state election, the Coalition promised that heritage would receive special attention. Much of this was spelt out by the then shadow minister Catherine Cusack when she was guest speaker at a BMACHO initiated public meeting.

The pledge to appoint a heritage minister to protect historical and culturally significant items was only one of the promises made.

Among the other promises was an overhaul of the operations of the Heritage Council and to provide greater certainty and transparency in decision making.

The Coalition undertook to reverse the previous government's decision to move the Heritage Office into the Department of Planning.

The Heritage Amendment Bill 2009 significantly modified the make-up of the Heritage Council, removing representation from groups such as the History Council of NSW.

The Heritage Bill sent a chill up the spine of most in the heritage sector and gave great joy to property developers through a system which was already open to corruption more rife than it already was.

The extraordinary change to the delisting process placed in the then minister and any future minister's sole discretion the ability to delist State Heritage Register listed places.

Australia has a wide variety of heritage assets and it is vital that our natural, built and cultural heritage is conserved for future generations.

Some might wonder why the Premier decided to conjointly appoint Robyn Parker as the Minister for Heritage and the Minister for the Environment then taking on some of the responsibilities himself.

Although responsibility for the environment is an all embracing portfolio, one does not have to go very far to see the connection between the environment and our heritage

It is important to recognise we are custodians of the priceless asset of our World Heritage listed Blue Mountains National Park. An asset which is vulnerable not only because of the probability of a catastrophic fire which would completely destroy its biodiversity; but also by the over incursion of mankind with such ventures as hunting, shooting and other activities which will inevitably if permitted to occur, damage the very ecology which makes National Parks such valuable heritage assets.

The appointment by the NSW Coalition of a minister for heritage within 10 days is commendable, but there is still a long way to go to redress the long history of deficiencies which has been the lot of heritage. The heritage sector will do well to monitor the promises made while the Coalition was in Opposition to ensure that heritage gets a better deal.Given that there is a voice at the cabinet table, the heritage sector now needs to speak with a loud and clear voice.

John Leary, OAM Past President, Blue Mountains Association of Cultural Heritage Organisations Inc.

BMACHO HAS A NEW PRESIDENT

Despite torrential rain a well attended annual general meeting in March at Everglades saw the retirement after 5 years in office of the BMACHO's inaugural president John Leary, OAM and the election of the new president, Pamela Smith of the Springwood Historians.

In his annual report the retiring president paid tribute to what he described as 'a quite unique body of people who have led and directed the association over its first five years.'

He paid particular tribute to Ian Jack, Barrie Reynolds and Peter Stanbury, OAM who had been on the committee since it was first formed. Others who had provided real assistance to the committee included Dick Morony, Florence Smart, Joan Kent, Doug Knowles, Jean Arthur, and Kathie McMahon-Nolf. Jan Koperberg was singled out for special praise for her dedication and effectiveness as secretary during the past year.

Mr Leary said, "he was grateful he had had an opportunity to witness first hand the incredible energy and dedication of hundreds, nay thousands of individuals working voluntarily in so many different ways and on so many different projects to protect, conserve and promote the heritage of this country's wide and diverse history."

The full report has been e-mailed to all members and associates.

The election saw only a few changes in the team to lead the organisation in the coming year. Those elected as committee members were; Pamela Smith, president; Ian Jack, vice president; Jan Koperberg, secretary; Joan Kent, treasurer; Jean Arthur, Doug Knowles, John Leary, Kathie McMahon-Nolf, Dick Morony, Barrie Reynolds and Peter Stanbury .

Pictured below are some of the 50 who attend the meeting.

Past president, John Leary, OAM welcomes BMACHO's new president, Pamela Smith (left) with secretary Jan Koperberg (centre) at the annual general meeting held at Everglades, Leura. ***Photgraph courtesy Dr Peter Stanbury, OAM.***

President's profile

The incoming president of BMACHO has been a resident of the Blue Mountains for the best part of 40 years.

She enjoyed a long association with Braemar Gallery, Springwood as both co-director and chair of the management committee.

The first ever Blue Mountains history conference was organised by Pamela in 2001, with the assistance of John Low (then BMCC local studies librarian), as part of the Centenary of Federation celebrations. She received the Centenary of Federation Medal for her efforts.

Several more were held (until the event was handed over to BMCC library) because the initial conference had been so well received.

The initiative was taken up by the local studies section of Penrith City Council who, since 2002, stages an event annually.

Pamela has a BA (Hons) degree in History as well as an Advanced Diploma in Local Family and Applied History.

Her honours thesis focused on private education in the Blue Mountains, while an earlier thesis dealt with the presence of the fascist Old Guard Movement in the Blue Mountains in the 1930s.

For several years she tutored University of the Third Age groups on aspects of the history of the area.

She is a member of Springwood Historians and was a major contributor to *The Making of a Mountain Community: a Biographical Dictionary of the Springwood District,* and collaborated with Shirley Evans on *Remembrance: Springwood District Honor Roll 1914-1919.*

She is currently enrolled in the Master of History degree course at the University of New England, Armidale and has a special interest in non-government private venture schools, local/public history, the Old and New Guard and women's history, especially women involved in politics and local government.

Thank you for Ian Jack

The tremendous assistance over many years, given to historical societies and heritage groups throughout NSW and in particular in the Blue Mountains, Lithgow and Hawkesbury regions by leading Australian historian, Associate Professor Ian Jack has been recognised by the Blue Mountains Association of Cultural Heritage Organisations Inc. (BMACHO).

Dr Jack has contributed his outstanding knowledge to many voluntary organisations including the Royal Australian Historical Society from which he which he has just retired as president. BMACHO of which he is vice president, the Heritage Council of NSW, and the National Trust of Australia (NSW).

Speaking at the recent annual general meeting BMACHO's retiring president, John Leary, OAM said: "Ian is a consummate scholar. His clarity of mind and communication are recognised and admired widely.

"Ian's enthusiasm and largeness of spirit inspires all who are interested in the heritage cause."

His academic work is never ending while he is regularly called upon to lecture and speak on history and heritage throughout Australia.

Ian is a prolific writer contributing to historical journals and writing many books

He is well known for his work internationally and locally.

Dr Jack has been a long standing member of the History Department at the University of Sydney and was its head for 8 years in the 1990s.

He was also Dean of the Faculty of Arts. He has been associated with St Andrews College of the University since 1980, is a senior fellow and responsible for the College archives.

Dr Peter Stanbury OAM said: "Ian Jack has been an indefatigable advocate of the importance of history and heritage in Australia."

Ian has many interesting anecdotes about history in the Greater Blue Mountains area, and he once said: "Heritage is always willing to talk to us if we are receptive enough to talk to it: handshaking is only the beginning of communication. Here in the Blue Mountains, we have endless opportunities for such discourse."

"I know from these anecdotes that Ian's favourite slab hut is the one in Kanimbla Valley built by Peter O'Reilly, and immortalised in his son's book, named, like the hut, *Cullenbenbong*," Mr Leary said.

Pictured is Associate Professor Ian Jack with Mrs Nanette Leary presenting him with a painting of *Cullenbenbong* which she painted.

Council agrees to establish heritage advisory committee

Blue Mountains City Council (BMCC) at its May meeting has agreed to the establishment of the Blue Mountains Heritage Advisory Committee as a committee of council.

This is indeed a good outcome for BMACHO which has sought to bring BMCC into line with numerous other councils around the country through heritage advisory committees effectively harnessing the wealth of knowledge and expertise in the community to ensure better heritage policies as well as a more informed decision making process in heritage matters at the level of local government.

Although the way is now clear for council to establish this committee with a number of the recommendations made by BMACHO having been included in its charter, there are still some issues raised by BMACHO that are lacking in the terms of reference for the establishment of the committee.

The major issue of which is the infrequency of committee meetings. However, once the committee is established it may be possible to have council increase the frequency.

A more detailed report on the proposed committee with be forwarded to BMACHO members in the near future.

The next stage is for council staff to advertise for people in the community to submit expressions of interest in serving on this committee. It is anticipated that there will be 8 - 12 community members on the committee.

The process of appointing these members from past experience could take 3-4 months.

A LONE GRAVE ON THE HILLSIDE

(M.Osterberg-Olsen, 2010)

Eliza Rodd was the daughter of career soldier James Rodd. He fought with the 39th regiment in Canada during the Anglo-American war. The 39th was transferred to France, arriving shortly before the Battle of Waterloo on June 18, 1815. While in France he married Judith Joseph Baudelet and they had two children.

The Regiment was stationed in Ireland from 1819 and then transferred to NSW in 1826. James and Judith Rodd brought their son to New South Wales, but left their four year old daughter Marie-Anne with her grandparents in Chamblain, France as she was thougth too young to make the journey.

James Rodd was intially stationed at Parramatta before being promoted to colour sergeant in 1827 and sent to Bathurst. By 1829 he was in charge of members of the 39th regiment stationed at Glenroy. Eliza Rodd was born on January 10, 1831 and baptised by the Anglican minister at Bathurst. She was the second child born to James and Judith in NSW She died on September 14, 1831.

James Rodd was transferred back to Sydney with his family at the beginning of 1832 leaving a lone grave on a hillside overlooking an idyllic view and marked lovingly with professionally crafted head and footstones. Judith died at Sydney on April 19, 1832.

The 39th Regiment was then transferred to India, taking its colour sergeant and his young sons far from the lone grave at Glenroy. Colour Sergeant James Rodd died in India in December 1832, leaving 13 year old Ambroise and 6 year old James junior orphaned.

Restoration work and protection of the infant Eliza Rodd's Grave has been an on-going project of the National Trust of Australia (NSW) - Lithgow Regional Branch since 2007. Repairs and restoration were completed in mid 2009. A photograph taken of the site in the early 1900's evidences a wood fence.

A member of the 73rd Regiment of Foot re-enactment group looks pensively at the grave of 8-month old Eliza Rodd. The grave (1831) now listed on the State Heritage Inventory is on the hillside described by Governor Lachlan Macquarie as'one of the finest landscapes of any country I have yet visited'. Photograph courtesy Ian Jack

RAHS has new president

After a record 8 years outstanding service as president of the Royal Australian Historical Society Inc., Professor Ian Jack last month stood down from office.

David Carment (pictured) has been elected to succeed Ian. David also chairs the Royal Australia Historical Society committee that provides a community forum for discussions about commemorating the first crossings of the Blue Mountains.

He is Emeritus Professor of History at Charles Darwin University in the Northern Territory, where he was also Dean of the Faculty of Law, Business and Arts. David was, however, born and brought up in Sydney, where he returned to live in 2006.

He has strong personal links with the Blue Mountains, where he is a frequent visitor. His mother's family, the Sulmans, had a home in Lawson for many years, and some of his closest relations currently live in Wentworth Falls and Woodford.

He has published extensively in Australian political history, the history of Central Queensland,

Northern Territory history and Northern Territory politics.

His most recent publications include two family histories.

Actively involved throughout his career in community and professional activities, he is a former president of the Australian Historical Association, the Historical Society of the Northern Territory and the National Trust of Australia (Northern Territory) and is president of the Mosman Historical Society.

In 2003, he was made a Member of the Order of Australia (AM) for his services to heritage and history.

AT 86 NORMAN LINDSAY DESIGNED SPRINGWOOD'S TOWN CREST

By Shirley Evans, Springwood Historians

It was 1965 and, at last, Springwood was to have a hall! Designed by local architect and World War II veteran, Eric Skarrat, and built by Alec Gall Constructions Pty Ltd, it was begun in February, 1965 and completed in February, 1966.

The people of Springwood had long felt the need for a hall.

William Rayner , one of the earliest general store proprietors, set up his extensive business in about 1877. His store had a large room attached to it and this became known as Rayner's Hall.

Here despite its inadequate size, most of the meetings and gatherings of the town were held – the Progress Committee, various lodges, political gatherings, the Literary and Debating Club, church services, concerts.

This continued until 1893 when William found he needed the extra space for his business.

Gustav Larsen and his nephew, Axel Bech, Sydney tobacconists, had a holiday home, *Elsinore*, in Macquarie Rd which had a billiard room and they kindly offered this for community use.

The Royal Hotel also hosted meetings.

William Honeysett, another general storekeeper, built a fairly large hall (66ft x 30ft) in 1909 which included a refreshment room. This burnt down together with the shops around it in 1921.

The Springwood School of Arts was opened in 1913 but it was not suitable for dances or balls having only a library, office space and a large billiard room.

Meetings were sometimes held there but nothing on a large scale.

Both during and after World War I Springwood people began campaigning and fund raising to build a War Memorial Hall but this came to nothing.

In 1923 an open air theatre was built in Macquarie Rd by Harry Williams.

It was known first as the Springwood Theatre, then the Plaza and finally the Roxy.

It had seating for 450 people and could be used for dances and balls when it was later roofed. Made of corrugated iron, it was not a beautiful building but could be decorated with a bit of imagination.

But now in 1965 the town was actually getting a purpose built, architect designed hall. 1965 also happened to be the 150th anniversary of the naming of Springwood by Governor Lachlan Macquarie.

Springwood's town crest on the wall of Springwood Civic Centre. Photograph courtesy John Merriman.

The Springwood Chamber of Commerce decided it was a propitious time for the town to have its own coat of arms which could then be permanently displayed in the new hall.

Bruce Jackson, son of Joseph Jackson MLA and proprietor of the Stonewall Jackson store in Macquarie Rd suggested that respected local artist, Norman Lindsay, who had been a Springwood resident since 1913 and was still an active creative artist at the age of 86, should be asked to design the coat of arms.

The Macquarie Historical Society (now known as the Springwood Historical Society) of which Bruce Jackson was a member enthusiastically adopted the idea and Norman Lindsay agreed to create the design.

He painted in water colours a coat of arms with a central figure of a lyre bird with tail spread and crowned with a waratah.

Lyre birds were commonly found in the Springwood bush and were actually bred in captivity by Jack Coyle who lived in Raymond Rd Springwood in the 1930s. He had a licence to do so.

The waratah was also commonly found in the Springwood bush and was frequently plundered by tourists to the area.

On one side of the lyre bird was an aboriginal man holding spears who represented the first inhabitants of the region and on the other side was a white man representing the contribution of explorers to the Blue Mountains.

Royal College of Arms did not recognise it as a genuine coat of arms

Continued from page 6

Underneath was the name Springwood on a curved ribbon. Considerable research went into the devices of the design with the cooperation of the Society of Australian Genealogists to conform to the rules of Heraldry.

However, it could not be regarded as a genuine coat of arms, the right for which needed to be granted by the Royal College of Arms in London.

The Macquarie Historical Society wrote to the Blue Mountains City Council proposing that Lindsay's design "*be embodied as a feature in the front of the building [i.e. the new Civic Centre], and that it be constructed of some durable material.*

"We think that this feature would embellish the new building and, at the same time, relate it to the outstanding progress of the district from the days of the aborigine and the explorer, to the present state of development."

It was thought that executing the design in tiles by the majolica process would provide a suitably durable display and would ensure the permanence of the colours and quotes were sought from Diana Pottery in Marrickville.

This pottery was probably the most important of the Australian potteries in the 1960s producing brightly coloured ceramics often featuring flora and fauna.

Lindsay and the pottery artists had consultations regarding the colours and Norman also experimented at home, decorating tiles using pen and ink, watercolours and oils according to Harry McPhee in his *Memories of Norman Lindsay*. To set the colour he fired the tiles in his own electric oven.

In addition to the tiled reproduction for the Springwood Civic Centre the design was said by Alderman Powell, a Springwood developer, to have been intended for reduction to a size suitable for letterheads etc. However, he said, it was not the intention of the Macquarie Historical Society or the Springwood Chamber of Commerce to commercialise the emblem.

When Alderman Powell showed the design to the council, Alderman Hunter was not entirely satisfied with it, saying he felt it was archaic.

Norman Lindsay was better known for controversy surrounding his painting of nudes and the naked nymphs like this sculpture which still stands in the grounds of the National Trust of Australia (NSW) owned property, Norman Lindsay Gallery at Faulconbridge.

Other criticisms were made regarding the position of the lyre bird's tail. Alec Chisholm, noted ornithologist, disagreed.

Mr F Walford, a well known bushman, said that the lyre bird normally held its tail parallel with the ground and only occasionally threw it over its head for a very short time.

Aldermen Hunter and Campbell moved that the design be displayed publicly in the Springwood district and the public asked to express approval or disapproval.

The result showed 702 approvals and 24 disapprovals. These votes came from Springwood, Faulconbridge, Valley Heights and Warrimoo with 23 votes cast from elsewhere.

Diana Pottery quoted £65 for the work, 36 inches by 30 inches with the Springwood Chamber of Commerce agreeing to meet the cost.

The Macquarie Historical Society was given the custodianship of the work. The only problem was the name "coat of arms".

The Blue Mountains City Council already had a coat of arms so it was decided to call it the Springwood emblem or crest.

Norman Lindsay was a famous artist so the Sydney newspapers and even an Auckland, New Zealand paper picked up the story. News items were published in the *Sydney Morning Herald,* the *Daily Telegraph,* the *Sun*, and the *Mirror*.

One Sydney newspaper (title unknown) said: '*With a display of political brilliance the Blue Mountains City Council appears to have found a formula to resolve the embarrassing case of the Norman Lindsay coat of arms design.'*

And later in the item: *'And so the mountain men have demonstrated how to win and lose at the same time.'*

Continued page 8

'Even this innocent work of art, with not a naked lady insight'caused controversy

Continued from page 7

When Norman Lindsay heard of the controversy he was quite amused. Harry McPhee, his assistant and companion in those later years, said in *Memoirs of Norman Lindsay 1879 – 1969* : *'Even this innocent work of art, with not a naked lady in sight, invited controversy.*

'Would you believe that some of the council aldermen disputed the position of the lyre bird's tail. With his usual aplomb, he retorted that at his age he didn't take aldermen very seriously and wouldn't care if they threw it in the garbage. He said that generations of critics had been trying to brain him with their feeding bottles.'

He was also quoted as saying: *'At my time of life one does not take aldermen very seriously. They came and bothered me to design a crest. It represented about a morning's work. I don't care what they do with it. I can't take the whole thing seriously.'*

And: *'Heavens, Lord love a duck. When I think of all the uproar over my work in the past... now this. I think it's damn funny; I wouldn't care a hoot if they put it in the garbage. At my time of life one does not take aldermen seriously.'*

So the tiled and framed work was duly completed and now hangs on the wall in the Springwood Civic Centre facing the entrance which is glassed and has a westerly aspect.

Despite the hopes for the durability of the colours it appears to have faded and has lost the brightness of the original painting.

Springwood Historians were privileged to view the original which is safely archived at the Norman Lindsay Gallery. It has been occasionally shown as part of special exhibitions but otherwise is safe from the depredations suffered by the tiled rendition.

I wondered if the Springwood town crest had a part in today's local life and was delighted to discover it is still being used (with the approval of the Springwood Historical Society) by a few groups.

Early on the Springwood Chamber of Commerce had the design stencilled onto something like firm plastic with "Member of the Springwood Chamber of Commerce" added.

One of these was framed and is in the local studies section of the Blue Mountains City Library.

Another is attached to the window of the Honey Gem Nursery.

I can find no one with any recollection of this initiative. It was also said in a letter to Mr Keith Wingrove of the National Art Gallery of South Australia from the Blue Mountains City Council that the Springwood Chamber of Commerce has made use of the emblem on signs erected on the outskirts of Springwood bearing the inscription *Welcome to Springwood*. This remains another mystery.

More recently the crest is used by the Springwood Historical Society on their letterheads, newsletters and calendars.

The Springwood Chamber of Commerce has it on their letterhead.

The Springwood Sports Club has had the design on their badge for many years and it is also printed on their membership card. It decorates a lot of their merchandise – shirts, jackets, vests, caps and bowling cloths.

A history of the club was printed as place mats for the official opening of their new premises and it is liberally decorated with the crest and they have recently had the design stencilled on the glass entrance doors.

I think Norman Lindsay would be pleased.

NSW CORPS OF MARINES

Gavin Jones a member of the NSW Corps of Marines reenactment group will speak on the original Corps of Marine's role in colonial history at the June 4 meeting of the Blue Mountains Historical Society.

He and his colleagues will also present demonstration of marching and musket fire.

For further information Susan Warmbath 4757 3402.

Convict women and the female factories

By Gay Hendriksen - Curator Parramatta Heritage Centre

Convict Female Factory Women were *women transported* - transported from one place to another, one life to another, one world to another.

Their stories range from those of machine breakers and displaced farm workers to petty thieves and family women just trying to survive.

An estimated 9,000 convict women were in the 12 female factories over a period of 52 years -1804 to 1856.

The colonial convict women coming to Australia would have been experiencing and witnessing the results and meaning of the Agrarian, Industrial and accompanying social revolution as well as the implications of the French Revolution. Some certainly participated in and witnessed the breaking of the looms in England's north.

The Irish, Scottish and Welsh in some cases would have been reacting to the hundreds of years of British 'colonising'. Many left family and children never to see them again.

The early transportation journey began in prisons which had not yet felt the effects of the great prison reformers such as John Howard and Elizabeth Fry.

John Howard in 1777 wrote about his observations of some of the prisons he visited.

In the Old Newgate he observed: *The rooms and cells were so close as to be almost constant seats of disease, and sources of infection, to the destruction of multitudes, not only in the prison, but abroad.* [1]

Of Folkingham he said: *Prison under the keeper's house ...5 damp rooms, two are used for a lunatic.... by a trapdoor in one of these rooms you go down 8 steps into a dungeon... No chimney, small court, no pump, no sewer. Yet a woman and child at her breast was sent ...the child died.*[2]

As we know for the women, the idea of transportation would have had a sense of the perilous as well as a sense of travelling to *new world,* new possibilities, over the oceans to a land of myth.

In reality the conditions on board were no worse than the gaols in the early period. Later when the ships were under government scrutiny the journey improved.

During this early colonial period in NSW, Britain was a maritime power and for a considerable time was at war with the French.

Flax loom and other flax spinning equipment were on the list of First Fleet supplies.

At this time flax was discovered in the colony and experiments with it for maritime purposes were conducted.

Female Factory front entrance at Parramatta circa 1870. ***Photogaph courtesy Ralph Hawkins, Society of Australian Genealogists.***

There was no thought of female factories in the first 10 years of the colony, however, there was the practical need to solve the problem of what to do with the convict women once they arrived and a substantial number of female convicts did have spinning skills.

These women were also a strain on the government purse. The result was in 1804 the first convict factory in Australia, possibly the world, began its operations in Parramatta above the men's gaol.

The Convict Female Factory women were simply convict women who, for various reasons, spent time in a convict female factory. This may simply have been because they were not assigned at the docks on arrival or it may be because they committed an offence in the colony.

The treatment and perceptions concerning them were informed by negative notions existing in early colonial times. Governor Hunter described the convict women: *… disgrace of their sex, are far worse than the men, and are generally found at the bottom of every infamous transaction committed in the colony.*[3] Later Samuel Marsden noted the factory as *a grand source of moral corruption, insubordination and disease.*[4]

In contrast to these views, Thomas Reid describes the women as essentially good. While surgeon on the ship Morley, said of the convict women who are destined for the Female Factories in Hobart Town and Parramatta: *I cannot hesitate but to declare my conviction, that if duly protected, and not exposed to more than common temptation, they will realise the most favourable expectations, and even forever set, an example of propriety to others in their situation.*

Before disembarking 121 women signed a letter of thanks to Reid for his humanitarian attitude on board the Morley.

Continued page 10

Factory women were ordinary women in extraordinary circumstances

Continued from page 9

The actual profiles of the women transported don't match the common stereotype at the time, of morally degenerate, prostitutes, from a crime class, unskilled and illiterate.

The majority were not of a *crime class*. For over 90% of the women transportation was a result of first or second offences. They were mainly transported for theft.

The women brought over 180 trades with them, demonstrating their skills and industry.

Just over half of the English were literate and just under half of the Irish.

These facts present quite a different picture to the descriptions of degenerate women with little chance of reform.

The factories were called factories because each was a site of production. The women produced spun wool and flax in all the factories.

There were 13 female factories - Parramatta (2), Bathurst, Newcastle, Port Macquarie (2), Moreton Bay (2), Hobart Town, Georgetown, Cascades, Launceston and Ross.

The experience in the factories varied according to when the women were in the factory and which factory they were in.

The earliest factory still in existence is the Greenway designed Parramatta Female Factory.

This was a Governor Macquarie initiative and the second factory in the country. Over half of the factory women experienced the Parramatta Female Factories.

The factory women were ordinary women in extraordinary circumstances.

They became the business women, farmers, mothers, teachers and workers that formed Australia.

Why are the factory women significant to us now? The significance today is somewhere in the spaces between myth and reality.

The Australian perceptions of strength in adversity *we can survive anything, do anything*, mateship, lack of deference to authority and the sense of humour can be tracked to these convict women and their partners.

Also these women's stories provide the paper on which we can mythologise, construct stories of ourselves and our lives.

We can rewrite our desires to act with strength against adversity and 'survive' with a sense of empowerment. In many ways we are the stories we tell.

The factory women by living their lives through opportunity in the colony were part of a quiet revolution where they taught their children and their children's children about their rights and equity which we treasure now.

Despite little tangible evidence, outside government records, the experiences and nature of these women has been significant in forming who we are as Australians.

As Kate Grenville describes in *Joan makes History:* There was not a single joy I could feel that countless Joans had not already felt, not a single mistake I could make that had not been made by some Joan before me... and although you may not think so to look at me, I am the entire history of the globe walking down the street…and like them all I, Joan, have made history[5].

Educating Hartley ... and 'not the common moral decency of a privy'

By Joan Kent

When the Hartley Public School opened its doors in 1869, Hartley was a small village developed around the 1837 stone court house to service the new police district, catering for the increasing population west of the Blue Mountains and enabling authorities to keep track of assigned convicts.

In the early 1840s there were three inns in the village which also functioned as a staging post between the gaols at Bathurst and Sydney when prisoners were being escorted on foot between the two locations.

Most residents initially lived in rudimentary slab huts on small cleared lots, on which they produced potatoes, wheat and hay for local consumption and to feed travellers and their stock en route for destinations further west.

However, apart from an increasing number of inns and small agricultural holdings, amenities were meagre and the population often transitory. By the 1850s and '60s both the Catholic and Anglican churches had been established within the village and it was within this religious sphere that most rudimentary education was provided.

The first public schooling available to children living west of the Blue Mountains was provided by the National School at Bowenfels (then known as Hassans Walls) roughly halfway between Hartley and Lithgow.

It was a small settlement served by the Eagle and Child Inn and established on the site of an earlier stockade for troopers and convicts en route to Bathurst.

The schoolhouse and residence for the school's master and mistress, built in 1851, still stand, together with a further stone building built in 1866.

Conditions were originally quite primitive; one early teacher complaining that there was 'No provision for any kind of water. It had to be begged', and 'not the common moral decency of a privy'.

Under the recently established National School Scheme, teachers were required to have attended the model school in Sydney and to be supervised by a board of local patrons.

A half-time school the teacher alternated between two schools, sometimes on a daily basis.

However, a small denominational school had earlier been established in Hartley during the construction of St Bernard's Roman Catholic Church and Presbytery (1842-1848) - by 1855 it was reported that 37 pupils were in attendance.

The school comprised a schoolroom and residence of plastered vertical wooden slabs under one roof.

The number of pupils declined in the 1860s, possibly because of the setting up of a second denominational school by the Church of England, in an atmosphere of increasing sectarianism.

Although there is now no evidence of the Catholic School building, both church and presbytery still stand in a sound and admirable condition.

In 1868 the school inspector had noted the existence of an Anglican School, being 'at the Sydney entrance of the township...opposite the Church of England' [St. John the Evangelist] being in fact a separate part of a group of buildings formerly The Royal Hotel then rented and occupied by the Church of England Minister (Rev RH Mayne) and 'given up by him for the purpose.'

From the late 1860s until 1886, the former Royal Hotel was rented as the rectory and while it appears that the building used as a school was attached to the former inn, the exact location is not known.

There were a number of small private schools in the Little Hartley area in the mid to late 19th century when 'dame schools' were often conducted from private homes and rented premises, unfortunately leaving us little evidence of their existence.

It is however known that before 1900 a private school was run by Mr and Miss Young in a small cottage of pit sawn timbers and handmade nails, adjacent to the produce store on the highway, where it remains.

Children “in a desperate state of ignorance”

Continued from page 11

Another, only recently demolished, operated from a cottage behind ‘Bonnie Blink’, the stately 1870s’ home in Bonnie Blink Drive.

The impetus for an extension of educational facilities was afforded by the passage of the Public Schools Act, 1866 whereby the Council of Education could take over all types of public schools and grant aid to certified denominational schools.

If the school complied, the Council of Education paid the teacher’s salary and supplied ‘school materials’, often helping with building maintenance.

The discovery of gold in the Bathurst area the previous decade had resulted in a booming Hartley economy - the inns were always full with a constant flow of travellers intent on making their fortunes affording many opportunities for skilled and semi-skilled labour.

On June 24, 1868 a number of local Hartley residents applied to the Education Council to change their present Anglican denominational school into a provisional one. However, the regional inspector decided that a provisional school was not warranted and that Hartley should become a half-time school in tandem with the Dudawarra School 8 miles away.

In a half-time school the teacher alternated between two schools, sometimes on a daily basis; or teaching at one school in the morning and the other in the afternoon. This suggestion received support from the Council of Education and the necessary arrangements were put in place.

Mr H Blyth, then the teacher of Eurobodalla School, arrived in Hartley to teach in the now public schools, each morning at Hartley and each afternoon at Dudawarra, even though it involved a daily horse ride of 16 miles.

Blyth considered this necessary, fearing that if he left his pupils for a full day, they would very likely go to the Catholic school, substantially reducing his salary which was paid by a £60 contribution from the Council of Eucation and from fees paid by the children.

A view of the Hartley Public School. Holterman Collection c.1871-75.
Source: ML Home & Away Videolink Still 38736.

There were 21 children at Hartley (some were 18 years old!) with 27 children at Dudawarra. Blyth commented that they were ‘in a desperate state of ignorance’, a situation he hoped to improve with the aid of a blackboard and easel.

This basic request was however initially refused as ‘not really necessary’ by William Wilkins, secretary of the Council of Education and hailed as one of the foremost colonial educators of the 19th century, but he finally acceded to the request with the intervention of the local inspector.

The poor standard or indeed the total lack of education in outlying areas of rural districts was a constant observation of educators for the last half of the nineteenth century and much of the early twentieth century.

This was not always helped by some poorly trained or inadequate teachers.

However within a year of his appointment, Mr Blyth left the district - and his replacement’s tenure was equally short.

The Hartley district however continued to grow - the railway linking Sydney with Bathurst had reached Mt Victoria by 1868 and began the torturous descent into Lithgow, via the Darling Causeway, Bell and the Zig Zag, opening in 1869.

The rail link allowed exploitation of the coal deposits of Lithgow Valley and Wallerawang and the development of Lithgow’s secondary industries and the central western pastoral industry.

For the Hartley Valley it was vital in the development of the oil-shale mining and retorting industries which began in Hartley Vale in the second half of 1865, utilising the rail line via a steep incline up an almost vertical face from the floor of Hartley Valley to the Sydney rail link on the Darling Causeway.

With the rapid growth in the population of Hartley Valley, the Rev Mayne approached the Council of Education for assistance in removing the school into more appropriate accommodation.

Two acres for a school site had already been donated in the Hartley Village and Rev Mayne had arranged for the purchase of a building formerly used by the fettlers working on the Great Western Line extension at One Tree Hill (later Mt Victoria) as a school for their children.

Continued page 13

Rules saw sale for £5 of One Tree Hill school building fall through

Continued from page 12

As the railway gangs and their families were moving on, all that was asked of the Council of Education was aid in moving the fettlers' building down into the Hartley Valley.

Inspector McCredie was enthusiastic about the offer but early in 1870 Rev Mayne advised that although he had agreed to buy the school building at One Tree Hill for £5, the two acre site in Hartley Village had been donated specifically to the Church of England and the Council of Education was forbidden under its' regulations to endorse the siting of the building on it.

The Council of Education could however grant aid to the school if it was a provisional (full-time) school, so the Reverend Mayne informed the council that the local residents would be entirely responsible for moving the newly purchased building and would then apply for aid for a provisional school.

By May 1870, all had been accomplished and in July the One Tree Hill building had been re-erected and all was in place to welcome the 32 children who were promised to attend.

McCredie was anxious to see the school operating as soon as possible, still fearing that some children would be lost to the Catholic school in Hartley or the private school in Little Hartley

A local committee responsible for the upkeep and general supervision of the school had been formed consisting of the Rev Mayne and the members carefully chosen by religious affiliation, five Anglicans and one Presbyterian.

Originally fees were set at the rate of 6d per child per week but this was increased almost immediately to 1/- a week for the first child and 6d each per week for any other children in the family – quite a financial burden considering the size of 19th century families.

Events took an unexpected turn when in August 1871, a member of the school committee, James Cale advised the Council of Education that he was soon to leave the Hartley district and offered his eleven acres of land and a six-roomed house to the council for £45, an offer immediately accepted.

The building was approximately 40' by 20' with a bark roof, and was eventually to serve as the residence for the teacher and his family.

It did however involve the relocation of the school to its present site on the corner of the Great Western Highway and Mid-Hartley Road and again removing and re-erecting the building from One Tree Hill to continue its function as the schoolhouse.

By 1875 this building required repairs – new sheets of bark, thoroughly cleaned and dressed, and supported by 12' saplings, replaced the old bark.

The chimney was bricked inside with a 'tin' exterior and a two-rail 5' paling fence kept out stray animals, goats then as now proving a considerable nuisance.

But despite the repairs, it was apparent that a new building was required. The Council of Education at first declined to act due to limited finances, but in May 1880 the local school board laid before the council the reasons why a new building was necessary – the school was in a 'ruinous and dangerous state', made only 'of bark and boards', formerly the accommodation for the 'use of the navvies' children when making the railway line...and removed here about 10 years ago and was only temporary when put up'. They declared it to be 'positive cruelty to send children to such a barn as all other parts had good schools'.

Towards the end of 1881 construction had begun by Messrs. Armstrong & Armstrong of Hartley Vale on a fine new brick building which still stands in situ. The old schoolroom remarkably was sold for £5/10/-.

There has been a good deal of confusion regarding the early buildings, their location and history, but it is now clear that the schoolmaster's house, formerly the original dwelling on the eleven acres purchased in 1871, stood empty for many years after 1911 when it was decided that as the attendance was unlikely to increase, the expenditure of £161 on maintenance was not warranted.

Continued page 14

Hartley Court House around which the village developed. ***Photograph by John Leary,OAM - October 2009.***

Hartley School finally closes in 1971

Continued from page 13

It was considered preferable to appoint a single man as schoolmaster who could find accommodation in the Hartley or Hartley Vale villages.

Thereafter married teachers often occupied the school residence in Hartley Vale when it was not required for Hartley Vale School.

In 1939 the schoolmaster's residence was moved to Hartley Village, functioning firstly as a residence and workshop operated by EA Corney & Sons.

When a new and more substantial building was constructed post World War 2, the old building, afterwards known as Corney's Cottage, was relocated to a site below Corney's Garage.

Now mounted on brick piers, the weatherboards were replaced in the 1960s by asbestos cement sheets. Latterly it has undergone a program of conservation and maintenance, including the reinstatement of external weatherboards which had been removed and re-used to line the internal walls of the 'new' garage.

Hartley School continued to operate, apart from two years during World War 2, finally closing its doors in April 1971 following the significant decision by the then Department of Education to close many small rural schools and 'bus' students to larger centres, in this case Lithgow.

However, the tradition of building removal and re-erection continued when the present recreation hall was moved to the school site from Hartley Historic Village on June 3, 1974 during the realignment of the Great Western Highway through Hartley.

It continues the function of the Old Hartley School as a meeting place and focus for the community.

25th year celebrations for Lithgow Family History Society

The Lithgow Family History Society Inc. celebrated it's 25th anniversary since foundation with a well attended function.

One of the highlights of the afternoon was the awarding of life membership to Kathleen Brennan for her outstanding work as librarian a position she has held for 22 years. Pictured are some of those attending the luncheon.

Foundation members who were present at the luncheon - back: Jan Saundercock, Sandra Haley, Jean Perry, Phyllis Mason, Neville Morgan, and Laurie Cook - seated; Fay Hasler,Thelma Draper, Eleanor Martin, and Helen Taylor.

Secretary Laurie Cook and treasurer Margaret Buckley.

Margaret and John Buckley.

Neville Morgan and Hilda Kirkwood.

TURF RACING CONNECTIONS

In the last issue of ***HERITAGE*** an article by John Broadley president of the Mudgee Historical Society Inc. appeared about the connections between early Mudgee and the turf racing industry.

BMACHO's secretary, Jan Koperberg has a distant connection with Poseidon a horse from Mudgee which won the Melbourne Cup in 1906.

Jan advises that her mother's second cousin, Tommy Clayton, won the Caulfield Cup and Melbourne Cup in 1906, thanks to Poseidon.

"It was a first for the double. Poseidon and Tommy Clayton won the Caulfield Cup again in 1907, another first for two Caulfield Cups in a row," Jan said

"Tommy died in 1909 from injuries received in a 12 horse fall when riding "All Blue" in the Trial Stakes at Rosehill.

"He was only 29 and died before my mother was born.

"Although he was my mother's second cousin, he was born the same year as my mother's mother. Tommy was on my mother's father's side," says Jan.

PATCHWORK TO HONOUR ANCESTORS

Members of Lithgow and District Family History Society are currently designing a wall hanger which will be made up of 7 inch calico squares and will have embroidered on them the names of their pioneer ancestors.

The squares will be sewn into a patchwork wall hanger to be displayed at the Lithgow Library Learning Centre for Heritage Week.

It will then be available for display at all the society's functions.

Dynamic duo to 'call it a day'

The energetic and very personable couple who as president and secretary have successfully led the Kurrajong – Comleroy Historical Society for a number of years have announced they will not seek re-election to the committee.

Valerie and Frank Holland at the Lachlan Macquarie bicentenary dinner last December.

The society's president, Frank Holland and secretary, Valerie Holland have indicated they will not be available for office at the elections to be held during the society's annual general meeting in September.

The Kurrajong-Comleroy Historical Society is one of the largest and most active historical societies in the region.

Much of the success in the short decade history of the society has been because of Frank and Val's ability to encourage others in the community to give of their best.

The society has held regular annual dinners. The formal dinner last December to mark the bicentenary of Lachlan Macquarie's visit to the district was an outstanding success with well over 120 guests in attendance.

The guest of honour was the Governor of NSW, Professor Marie Bashir, AC, CVO.

Announcing their decision, Frank said: The time has come where we will shortly need to make some lifestyle decisions that will require a good deal of our time and we will not be in a position to give the society the attention it deserves."

An artist in the gardens

An exhibition by local artist, Alison Jane Rice is to commemorate the opening of the upgraded gallery at Everglades.

The exhibition will be open on Sunday, June 12 between 10am and 4pm

Her works celebrate the persistence of nature in capturing and luxuriating in what will always belong to the earth.

Also available is Alison's much anticipated children's book *The Legend of Prince Farty Barty & His Sacred Bum Bum Tree*

The exhibition will also open weekends and during the week by appointment. Cost: adult $8, concession $6, child $4.

Successful seminar

Boat People – 1788 to 1922 was a successful seminar held by Blue Mountains Family History Society last month at Springwood.

About 50 people attended the seminar, made up of members from the Blue Mountains district and interested family historians and historians from other areas.

Christine Yeats, manager, public access, State Records NSW, spoke about *Convicts and Colonists: An overview of the boat people 1788 – 1922.*

Gay Hendriksen, curator and author, chose for her topic, *The sweet, the sour, the seditious...and the swashbuckling. From British prison to the shores of NSW and the convict female factory, women met the challenges of transportation.*

Ray Thorburn OAM spoke about the Scottish passages, the different waves of people brought from Scotland by various schemes, why they came, their journeys, where they settled and what they did for a living.

After lunch Jim Low, singer/ songwriter/author entertained the group with songs he has written about Australia.

The last speaker of the day was Gary Luke from the Australian Jewish Historical Society. Gary spoke about European and Jewish immigration.

Contributed by Jan Koperberg, president, BMFHS

Gay Hendriksen, Curator, Parramatta Heritage Centre.

New museum advisor

Blue Mountains City Council has been successful in gaining a further year's funding to deliver a part time museum advisory service.

The role of museum advisor has been taken over by Lynn Collins, who brings with him relevant experience in historic houses and museums, coupled with a strong art practice

Lynn has also recently been engaged as museum advisor to Lithgow City Council and this will help strengthen the networks between museums across a large part of BMACHO's constituency.

The Museums and Galleries website which registers consultants states: "With a diverse background in education, the visual arts and museum sectors, Lynn Collins is both an enthusiast and pragmatist in negotiating progressive, expressive arts ventures and local history projects, raising community awareness, operational standards and support for arts enterprises in the process.

"He is a good listener who enjoys creative, collaborative ventures applying exacting standards accumulated from 16 years as a curator and manager at six sites with the Historic Houses Trust of New South Wales (1990-2005); preceded by executive-directorial

Lynn Collins

roles at the Jam Factory Crafts Training Workshops and Crafts Council of South Australia (1982-1989); through broad experiences in teaching from primary through to tertiary levels (1965-1980); and from 40 years as a practicing visual artist.

"As the regular visual arts-crafts commentator with the *Adelaide Advertiser* (1984-1989) then with various, mostly populist journals, he promotes excellence and diversity in the arts, and also encourages strategic, relevant, cross-disciplinary partnerships."

Lynn replaces Shar Jones who has resigned after a lengthy absence and continued ill health.

Ray Thorburn, OAM spoke about the different waves of people who came from Scotland. Ray was appointed founding director of the Australian Genealogical Education Centre at Kiama in 1988, retiring in November, 2006.

Christine Yeats, manager, public access, State Records of NSW and Ian Kendall, Blue Mountains Family History's treasurer and master of ceremonies for the day.

Sheep and Shearing

Their Evolution and Contribution to Australia

Sheep and Shearing, self published by Robert Ellis takes a broad overview of the sheep industry over the years culminating in the industry today that encompasses some of the best wool and prime lamb available in the world.

The ups and downs of the wool industry certainly mirror Australia's harsh climate as well as the personal likes and dislikes of individuals who played a major part in the development of the breed of sheep over the past 200 years.

Ellis has written about the influence on blood lines by the Macarthurs, Merrimans, Faulkners and some of the lesser known successful breeders

Wool has played a major role in the financial prosperity of Australian society as well as the social fabric of our country.

The book covers the role played by early squatters, shearers, shepherds, drovers, bullock drivers, cameleers and donkey drivers who brought the wool bales to rail heads or barge loading sites. Finally he covers the history of sheep dogs

The range of photographs in this book gives a pictorial history of the breeds, the shearing equipment and the transport of wool bales from the outback by camel to river barges.

Available by enquiry to Mrs McMahon-Noff at e-mail bellbird@hotkey.net.au

Kurrajong Collections

Kurrajong Collections is the Kurrajong-Comleroy Historical Society's second pictorial coffee table book.

It includes selections from The Woodhill Collection (circa 1890-1900s) held by the Mitchell Library.

The University of Sydney archives contributed an image circa 1863, possibly amongst the first photographs taken in the area, and Mount Tomah Botanic Garden provided images from "The Jungle".

Other images from the National Library Collection give an insight into the eccentric William Hardy Wilson's vision for Kurrajong

Other unpublished photographs were provided from the society's collection, contributed by members and friends.

In his foreword to this edition, Alan Davies, curator of photographs at the State Library of New South Wales writes: *"…This wonderful evocative book brings together an important collection of historical photographs from the Mitchell Library and other sources, to*

reveal the changing face of Kurrajong, a small village about an hour north west of Sydney, at the foothills of the Blue Mountains … Kurrajong Collections is an important work today. In another century, it will provide a trail to follow for our great grand children, directing them not only to a life in Kurrajong in the 19th and early 20th century, but also to how we viewed the past through our 21st century eyes.

This book brings history just a little closer within reach."

To order send a cheque to Kurrajong-Comleroy Historical Society PO Box 174 Kurmond rrp $28 plus $5 postage.

EAT HISTORY
History Week theme 2011

The theme for History Week 2011 will be EAT History. History Week 2011 to be held September 3-11 will bring to the table the edible, appetising and tasty history of food. Who ate what and where in the past? How did we cook and where did our food come from?

History Week 2011 will be a smorgasbord of delectable delights!

History Week was initiated by the History Council of NSW in 1997 to showcase the rich, diverse history being produced by organisations and individuals across the state.

With over 200 events across NSW, History Week is about celebrating the best in community and professional history, highlighting its role in our cultural life and inviting people to get involved.

During History Week, community groups, local councils, libraries, archives, museums, universities, cultural institutions, professional and amateur historians across NSW open their doors to present the latest in today's historical research - fascinating stories, artefacts and experiences about both our past and ourselves today.

For more information and ideas for activities visit http://www.historycouncilnsw.org.au/history-week/history-week

North Springwood's earliest orchards thrived with ideal climate, rainfall and soil

By Lindsay Paish, Springwood Historians

North Springwood had an advantage over the traditional farming areas around Sydney because the climate is tolerable in summer and winter.

The average rainfall of about 125mm falls in autumn and spring provides ideal growing conditions for all types of produce, particularly fruit.

The soil derives from an outcropping of Wianamatta Shale that extends along the crest of the ridge from Springwood to Winmalee, providing a reasonable amount of fertility but with a harsh clay sub-soil. Soils around Hawkesbury Heights and Yellow Rock tend to be leached sandstone that is not nearly as rich.

The early explorers first noted evidence of the fertility of the area, and the 'woods,' as described by Blaxland and Macquarie, which clearly defined the limits of the good soil.

Such evidence is still apparent in the forests of Blue Gum *Eucalyptus deanei* and Ironbark around the Blue Mountains City Council depot and Buckland Village and in many places along Hawkesbury Road.

After the first flush of expansion westward from Sydney, following the crossing of the mountains in 1813, development took place in Springwood with the advent of the railway in 1864.

However, it was not until the late 1880s and early 1890s that viable farming developed in the North Springwood area. In all, about fifteen farms extended along the length of Hawkesbury Road and at Yellow Rock.

Initially, the pioneers who took up land established orchards as a matter of course and most notable was J.T. Ellison and Honore Marie.

In these early days, everyone who came as residents of the area established a few fruit trees and a chook yard to supply the everyday needs of the household.

Grapes being grown on trellises at the Greenheys orchard. Elisha Wiggins is in the foreground, circa 1880s - 1890s. Photograph courtesy Blue Mountains City Council Local Studies Image files.

The larger farms however, concentrated on earning a living from the land and the orchardists developed areas for fruit growing with great success.

Being virgin country isolated from the other horticultural areas, they produced some of the finest fruit for the Sydney market; top quality disease free apples, stone fruit – even persimmons – and some of the healthiest profitable citrus orchards in NSW.

These areas declined however, after World War 1, because of the growth of Batlow and the North Coast orchard areas together with improved transport for the produce.

Passionfruit produced in the area still held pride of place at the Sydney markets up to the end of the World War 2. The area produced the finest and earliest fruit for the market.

Despite the relatively good soils, there was a need for good husbandry. It has been recorded that Ellison successfully treated his orchard by mulching and enriching with yearly supplies of fresh soil but no manure.

Similarly, Henry Charles Lennox Anderson, one-time director of NSW Department of Agriculture, studied and experimented with chemical fertilisers on his White Cross property.

He concluded that if applied in the proper manner, chemicals were productive of great and lasting good, but warned that the land must be fully tested so that its wants may be supplied without waste of chemicals.

Present day trends however, lean towards a more conservative approach away from chemicals toward a more organic method similar to what Ellison originally used.

Many of the original properties had small orchards; Buckland Hospital provided fresh fruit for its patients and the tuberculosis hospital, Lynton Lodge, had a number of trees. Cordingley's farm, ultimately Bill Morgan's, had an orchard in conjunction with his poultry farm.

The White Cross property of the McCredie family (owned later by Jack Walsh and now the Winmalee Shopping Centre) also had a fair sized orchard associated with a poultry farm. There is little doubt; most residents in the area grew a reasonable array of fruit trees.

Continued page 19

A lone pear tree near the 18th hole

Continued from page 18

The first orchard along Hawkesbury Road, owned by J.T. Ellison, was located on the present day Springwood Golf Club.

Ellison, born July 25, 1841, purchased land in Springwood in 1872 at a cost of £1 ($2) an acre.

Ellison farmed about 130 acres with some crops and a dairy but his principal pursuit was a 20 acre orchard on which he developed oranges and summer fruits.

By 1891, he was receiving much public attention for the excellence of his produce and his success was marked by the dispatch of many cases of his oranges to inland towns.

This success did not come without a lot of effort. In 1889, he was so troubled by attacks on his fruit by flying fox that he was forced to erect a 15' high fence with a network of wires that covered the whole orchard.

John Ellison and his wife Hannah. Photograph courtesy Blue Mountains City Council Local Studies Image files.

He also battled the weather; a wind storm in December 1890 did so much damage that the ground was literally covered with young fallen fruit. The only reminder of Ellison's endeavour is a lone pear tree near the 18th hole.

The next orchard along Hawkesbury Road was located north of the golf links on what is known as the Golf Links Estate. The property was developed by GA Lloyd in 1920 and was eventually acquired by the Bennett family, who, much later, ran a pig farm on the area.

Samuel Lees, one-time mayor of Sydney, purchased the property of William Lawson (the explorer) which later became St. Columba's College.

He attempted to sub-divide the land, selling 7 acres to William Ipkendanz in 1894. Ipkendanz developed an orchard on the site and built 'Elmhurst.'

The property was eventually acquired by the Catholic Diocese in the early part of the 20th century. Today, St Thomas Aquinas Primary School occupies the front portion of the property, while the high school is located in the old college buildings to the rear.

Adjoining the college grounds another orchard was developed by R Stefansson in 1920 on the land now covered by Paulwood Avenue. The old cottage 'Sulitelma' still stands fronting Hawkesbury Road.

In 1920, James Wood acquired the land on the corner of Halcyon Avenue and Hawkesbury Road then owned by Irwin Turnbull of Windsor. Wood established a large citrus orchard and the trees were still evident in the early 1950s.

The Hawkesbury Road was not always a smooth well-formed road and in earlier times it was described as a disaster because the surface was constantly breaking up.

No cars or trucks used the road when the first orchardists arrived; to get their produce to Sydney they harnessed the horse and cart, loaded their fruit, and set off for Springwood Station. The journey often took over an hour each way along what was little more than a rough potholed track.

Norton Neave of Larke, Neave and Hoskins, car distributors, purchased land which is now Summerhayes Park and built the cottage 'Hiawatha.' In conjunction with the development of the land, he established an orchard at the rear of the house in the location of the present-day football ovals.

Further along Hawkesbury Road, where the present-day Winmalee High School now stands, Honore Marie built a small cottage known as 'Bombanoi' and planted a vineyard. No doubt many a fine vintage was produced from his vines. Marie had been the head warder of a prison in Noumea.

He also owned land opposite the Turnbull Estate and after the land had changed hands a number of times, George Mills became the owner. He established an orchard. Nellie, one of his daughters, became Mrs Stan Goddard, an old North Springwood identity.

Finally, the land opposite Simpson's Cottage (the present-day stone ruin at the top of the hill just before the Hawkesbury Lookout) was taken up by Annie Wheatley.

Annie, her husband and Tom Berry conducted a store in Springwood (present-day Springwood Mall) and ran the North Springwood land as an apple orchard.

Jo Booker took up land right out at the lookout with the aim of developing a passionfruit orchard because the Springwood area was so conducive to orcharding. The project never eventuated due to the advent of drought and the war.

Passionfruit was also the main farming activity in the Yellow Rock area where some of the best fruit was produced for the Sydney market.

In 1880, William Rayner was the first to set up in the area and built the cottage 'Evandale.' The family also ran a store in Springwood.

The property was managed by Elisha Wiggins, an apiarist from Bee Farm Road Springwood. The Evandale orchard produced some of the finest disease free apples and many other varieties of fruit including persimmons, which were said to be a 'treat to behold.'

Continued page 20

Loss of life as bushfires destroy farms

Continued from page 19

At one stage Rayner established a nursery and issued a neat little catalogue of fruit trees and vines. The property was finally owned by Jo Amarous who continued passionfruit farming after World War 2.

Closer in to Singles Ridge Road an Andrews family also ran a profitable passionfruit farm. Both properties were eventually purchased by Newports who developed the area as a nursery complex.

The soil, climate, and rainfall was also suitable for nurseries and in the period 1970 - 1980 North Springwood (now Winmalee) had approximately ten flourishing nursery businesses.

In 1918, RV Purvines, a relative of the Baxter family, held a large block of land at the end of what is now known as Purvines Road. He set up a small farm and began growing passionfruit.

The farm was all but wiped out and Mrs Purvines died during the bushfires of 1951. The only son Bob remained to redevelop the farm with wife Terry.

The only bushfire fighting equipment in the area in those days was an old Bedford truck owned by Reg Wheatley that carried a 'ship's' square tank of water on the back.

The lack of a volunteer bushfire brigade meant that protection of property was largely left up to the residents who did their best with what they had.

Just after Rayner began his farming enterprise, an English migrant by the name of DW Parker took up land adjacent to the present Illingworth Road and set it up as an orchard.

His farming venture didn't last long - due to the illness of his wife – but he started the first post office in North Springwood (now Winmalee), on the corner of Singles Ridge and Hawkesbury Roads.

James Baxter took up his land in 1890 and was one of the first to establish a viable passionfruit farm.

William Ipkendanz developed an orchard and built Elmhurst (pictured) in the mid 1890s. Photograph courtesy of Blue Mountains City Council Local Studies Image file.

He also grew vegetables for the Sydney market.

James only had one arm, losing the other in a shooting accident.

He had eight sons including Harold, Warwick and Norman, who operated a timber mill and were all well known in the area as champion axemen.

The next orchard in the Yellow Rock area was owned by the Fuller family who grew passionfruit, and a fine collection of summer fruits including peaches, pears and plums. It was reputed to be the best orchard in the area.

On the north, next door to the Fuller family, was the property of Holyer Fog. In the early 1930s, during the depression, Holyer Fog sent 500 cases of passionfruit to market and received just £25. Around the same time the jam manufacturers were only paying sixpence for a chaff bag full of passionfruit .

A large number of people were involved in orcharding during the hey-days of North Springwood as well as a number of vegetable gardens, poultry farms and dairies. Gradually, however, the viability of these farms decreased and ultimately fell into disuse when they were forced to compete with produce from the North Coast and inland and with a steady influx of pests and disease.

Although the land is still capable of producing good quality produce, the tide of residential development has overtaken the area. The land now grows homes not fruit while in some areas hobby farmers play at life on the land

About the author

The author, 85 year old Lindsay Paish is a former Forestry Department cartographer, now member of the Springwood Historians. Although now not in the best of health he wrote this article several years ago and knows the area of Springwood and its farms from long experience.

He has previously contributed to ***HERITAGE*** with an article on Lieutenant William Dawes who has been credited with being the first white man on the Blue Mountains drawing a map of the area in 1791.

Old barns in the Hawkesbury

'Old Barns of the Hawkesbury' will be the subject about which Graham and Carol Edds will speak at the next meeting of Kurrajong-Comleroy Historical Society on Monday, May 23.

frank.holland@bigpond.com.au

Spire restoration wins National Trust award

Renovation of the spire of St James Church, Sydney in continuous use since February 11, 1824 was recognised in the National Trust Heritage 2011 awards last month.

Restorers found ordinance marks on the orb and cross, probably stamped into the copper by the convicts who built the church

The St James Church restoration cost $1.3 million. Funded by donations and grants, it took a year to complete.

“There wasn’t anything about this project that came easily or simply,” said Greg Brown, a principal of the Sydney Restoration Company (a small Sydney firm also engaged to do restoration work at Wynstay, Mt Wilson).

“But it was extremely pleasurable. To be able to put your hands on an ordinance mark from the 1820s … I don’t know that I’ll ever get to do a job like this again,” Mr Brown said.

The restorers used similar techniques to the convicts. It was too costly to close streets during restoration so scaffolding was built up to and around the spire.

The deterioration of the framework of the orb and cross meant it could not be repaired in place so ropes and pulleys were used to lower the assembly.

Restorers then worked on the orb and cross by hand. There was no machinery.

The timber sarking beneath the copper of the spire was repaired and new copper used, with the patterns of the original work replicated.

Although not the first Anglican church in the colony, St James is now the oldest church in the Sydney CBD. It is in this church, the beginning of the legal year is marked with a service attended by the Supreme Court justices in

ceremonial costume. The church has also been associated with the most distinguished Order of St Michael and St George since 1950.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: “Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell’s Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites.”

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO’s official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2011-12 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Joan Kent (treasurer), Jean Arthur, Doug Knowles, John Leary, Dick Morony (public officer), Kathie McMahon-Nolf, Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

The Katoomba Waltz dedicated to an early chief justice

By John Leary, OAM

NSW HAS A NEW CHIEF JUSTICE, Tom Bathurst. With the delay in announcing a replacement for the incumbent, Jim Spigelman; barrister cum journalist Richard Ackland, published in the *Sydney Morning Herald* a speculative piece as to who might fill the office and if in fact there is a need for such an office.

Enchantingly, chief justices still live with us, in name. A Sydney ferry was named after Sir Leslie Herron's wife and Mary McCarron Maguire composed *The Katoomba* Waltz in honour of Sir Frederick Darley. [1]

Asked to name a popular waltz, most will recall the magic of Andre Rieu's presentations around the world of either the *The Blue Danube Waltz* or the *Emperor Waltz.*

However, few other than local historians would be aware of Mary McCarron Maguire's, *Katoomba Waltz* dedicated to Sir Frederick Darley (then Lieutenant Governor of NSW) and Lady Darley who lived in "Lilianfels", Katoomba.

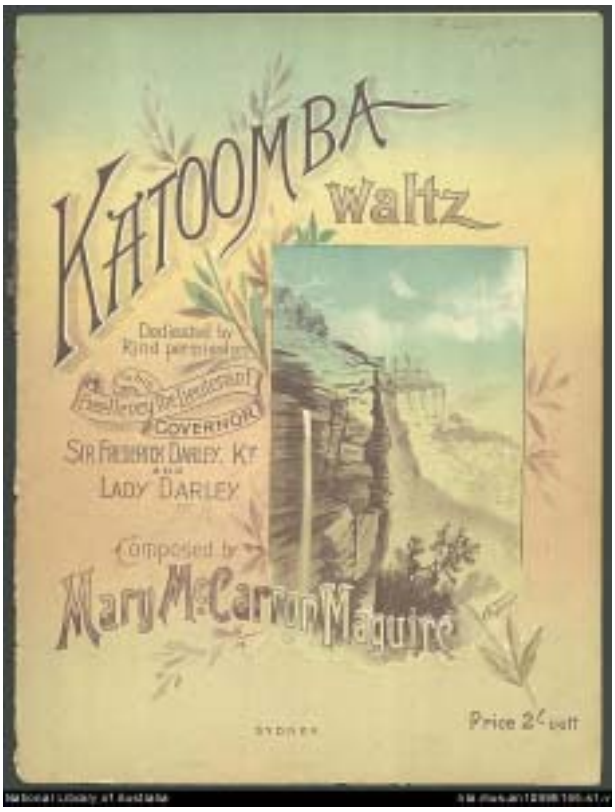
Published in 1895, *The Katoomba Waltz* was first performed at Government House in Sydney and was performed at the Tivoli Theatre in August 1895. The music was added to the repertoire of the NSW Artillery Regiment Band.

The Sydney Morning Herald of the day pronounced it 'a dashing composition admirably suited to ballroom purposes'

The rediscovery in 1989 of Mary McCarron Maguire's, *Katoomba Waltz* has led to speculation about a 'lost school' of popular composers whose works were inspired by the natural splendours of the Blue Mountains.

Little is known about Mary McCarron Maguire but she published two other waltzes, The *Antonina* and the *Commonwealth* during the decade 1890 - 1900, the *Commmonwealth* evidently inspired by the coming Federation in 1901. Two other musical items from 1890 - 1910 are a mazurka, *Leura Falls* by Alicia Nolan and *The Cascade Waltz* by Louis L Howarde.[2]

Very few details are known about Maguire's life, other than that she was one of two daughters of a Woollahra family.



This beautiful and delicately designed sheet music cover for the Katoomba Waltz is held in the National Library of Australia, Canberra which has approved the publication of this image nla.mus-an 10996145-1-v

They lived at "Lansdown" in Edgecliff Road, and were frequent guests at Government House and Admiralty House garden parties, and at lord mayoral receptions. Her sister Blanche was a semi-professional actress in the 1890s.

Sir Frederick Matthew Darley was born on September 18, 1830 in Dublin, Ireland. The first child of Henry Darley of Wingfield, Bray County Wicklow and his wife Maria Louise nee West.

At Hunsdon, Hertfordshire on December 13, 1860, Darley married Lucy Forest Brown, from Melbourne, a daughter of Captain Sylvester Brown (master mariner) and his wife Eliza Angell nee Alexander.

Council's call for public participation in heritage advisory role welcomed

THOSE INTERESTED in the protection and conservation of our heritage will welcome Blue Mountains City Council's recent decision to establish a heritage advisory committee of council.

The prompt action of council staff in calling for nominations from the community soon after the decision is also worthy of commendation.

Blue Mountains Association of Cultural Heritage Organisations (BMACHO) has for several years been advocating the establishment of a heritage advisory committee of council.

BMACHO has on occasions expressed concerns at what seemed to be delays in the process of having council accept the proposal for such a committee which are not uncommon in other local government units around the state and in fact in Australia.

On this occasion credit is due to the elected members of council and it's planning staff for the decision which should ultimately benefit council in its deliberations on heritage issues.

It is pleasing to BMACHO that council has acceded to some of the requests made by those in the heritage sector, both volunteers and professionals.

Council's decision to establish a heritage advisory council acknowledges the wealth of knowledge concerning the region's heritage and history, gained over many years by members of historical and heritage societies in the region.

In BMACHO's view there are still some issues that its members would have liked to have seen included in the terms of reference for the establishment of the committee.

However, within the wide parameter of council's objectives those who council decides to appoint to the committee should be able to provide some valuable expertise in matters of heritage advice.

Those who apply to be considered for appointment to the heritage advisory committee need to be very much aware that heritage is but a small part of the sometimes lengthy process of planning, a point that BMACHO has been stating for many years.

One of council's stated objectives for the heritage advisory committee, is a review of the heritage component of LEP 1991. This is the type of activity on which those in the heritage sector of our community are well equipped to provide.

Council recently released a quite comprehensive and easily understood, clear language document dealing with LEP processes and again this has been a worthwhile initiative of council's planning staff.

In welcoming council's decision to work more closely with the community it serves, (and in particular the not insignificant number of residents who have an abiding interest in our heritage and history) --- it is suggested there are a number of important ingredients to the ultimate success of this heritage advisory committee.

These are the need for those elected from the community to understand their work is limited to heritage issues only and that there must be an acceptance by them of the necessary and legal protocols council and its staff must observe.

There is also a need for council's staff to accept the limitations and ambitions of those who volunteer for this committee.

These community members need to be given dignity with tasks that allow them to believe they are contributing something worthwhile to the community in which they live, so they may share pride in achievement and not left to feel they just 'rubber stamp' the work of staff, without having had any real input into the processes.

John Leary, OAM - Past President, Blue Mountains Association of Cultural Heritage Organisations Inc.

LOCAL HISTORY BLOG

JUST over six months ago Springwood Historians launched a public/social history blog, or weblog.

One of the newer forms of 'engaging and interacting' with a wider audience, the blog or weblog aims to disseminate and gather historical facts and information related to the Blue Mountains.

The content is eclectic and changes regularly as new stories and information are added almost on a daily basis.

Some of the content, like the personal profiles of the Springwood Historians, and maps and general information related to the area - remain static, while older posts, which have been archived, can be accessed through the search facility on the weblog.

A 'comment' feature on the blog provides visitors with the ability to interact, which is something that Springwood Historians are keen to encourage. Another objective is to engage local schools.

So far the weblog has been viewed by more than 2,500 visitors from countries like the USA, UK, Canada, Russia, New Zealand and South Korea, and attracted favourable comments from local historians, genealogists and public historian, Cathy Stanton.

Pamela Smith, the editor of the blog, stated that although the blog is primarily focused on the Springwood area at present, they are eager to include stories on the wider Blue Mountains.

The address of the weblog is http://springwoodhistorians.blogspot or simply type Springwood Historians into the Google Search engine.

Grant awarded to BMACHO

FOR THE FOURTH YEAR in succession, BMACHO has been awarded a Commonwealth Government grant of $2,300 by the Department of Sustainability, Environment, Water, Populations and Communities under its 2010 - 2011 GVEHO Program.

The program is intended to help cover administrative operational costs.

BMACHO is most appreciative of this continued generous Commonwealth support.

It is both recognition of the value of BMACHO to the heritage community and a practical contribution that makes the organisation's work possible.

The GVEHO grant is invaluable in helping to meet the routine administrative costs of the Association.

It has also supported workshops, the newsletter and other activities and allows the committee to concentrate on finding funding from other sources for special projects such as the *Journa*l and major workshops.

Overall, BMACHO has a sound record (80%) of success in its grant applications.

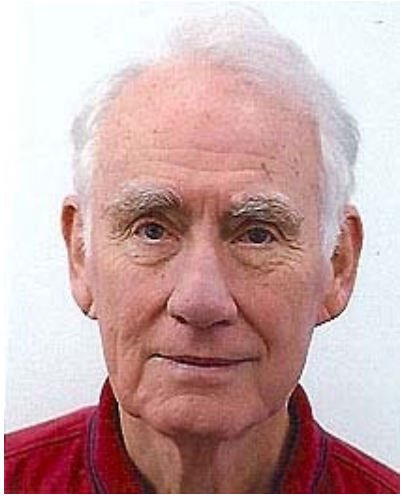
This year it has applied for two new project grants that would enable it to serve its membership more effectively and to contribute even more to heritage work in the region.

Grant applications require time and care in their preparation and, if successful, in the responsible management of the funds received.

There are, however, some useful tips on how to minimise the workload and increase the chances of success.

A workshop is being planned to assist members in the grant programs for their own societies.

Anybody interested in participating in the workshop, is asked to contact Barrie Reynolds by phone: 4757 4725, or by email: barrie.r@bigpond.net.au.



Professor Barrie Reynolds, BMACHO's grants officer and former inaugural secretary

TELSTRA GRANT FOR WORKSHOPS

MEANTIME, advice has just been received of BMACHO's success with another grant application

Telstra has generously awarded a grant of $5,025 under its Telstra Connected Seniors Grant Program, to enable BMACHO to provide a series of training workshops on the use of the internet for on-line historical research and information services in the heritage field.

Anybody interested please contact Barrie Reynolds: barrie.r@bigpond.net.au or 4757 4725.

Telstra Connected Seniors® is a tailored program created to help older Australians learn more about technology.

It offers individual self teach guides, fun interactive workshops, and also offers eligible community groups with the opportunity of funding to run successful training courses around technology.

It is anticipated these workshops will be conducted between February and May 2012.

Darley came to Australia on advice of another chief justice

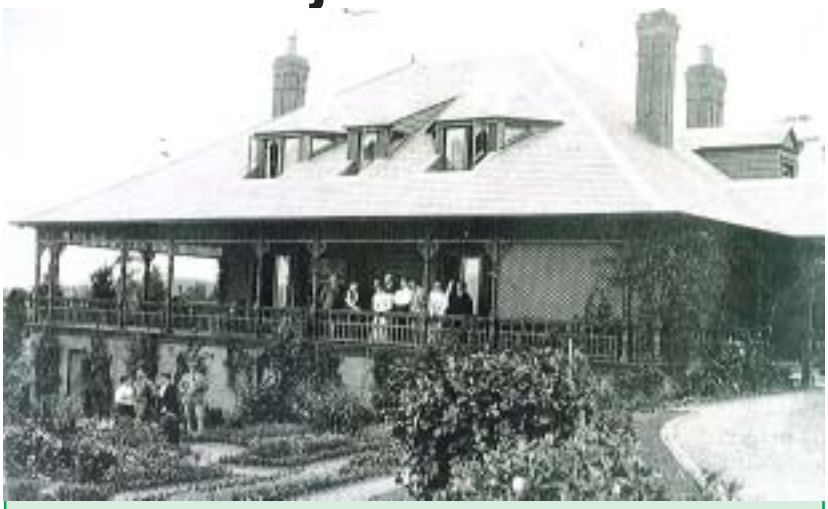
Continued from page 1

Darley and his wife came to Australia in 1862, on the advice of Sir Alfred Stephen (the Chief Justice of NSW) who convinced him that he would further his career in the colony.

Sir Frederick was knighted in 1887 and served five times as the Lieutenant Governor of NSW. The longest and most important being from January 24, 1900 to May 27, 1902, spanning the creation of the Commonwealth of Australia in 1901.

In August 1888, Sir Frederick Darley purchased more than 11 acres of land adjacent to Echo Point in Katoomba and enlisted Varney Parkes, the architect son of close friend, Sir Henry Parkes to design "Lilianfels" as a summer home.

The Darleys had seven children, six daughters and two sons and it was Lilian, who died at age 22 suffering tuberculosis, for whom the Katoomba property was named: the ending 'fels' has a German meaning, 'rocky ground'.



"Katoomba will in the future be historic from having as a resident one eminent Chief Justice, Sir Frederick Darley and his family at Lilianfels. Sir Frederick has spared no pains in laying the foundation of a fine garden and is said to have trenched a large portion of his property in order to grow fruit successfully." Illustrated Sydney News 1890

During the years in which Sir Frederick and Lady Darley resided near Echo Point, nearly every noted visitor to Australia accepted their hospitality and enjoyed the magnificent outlook.

Royalty, vice-royalty and princes of statesmanship, jurisprudence, science and art came in turn to view the mountains from the magnificent vantage point of Lilianfels.[3]

CANCELLATION OF MEETING

Due to severe storm damage ongoing this week in Mt Wilson & Mt Irvine

the mid-year general meeting planned for

Saturday, 16 July, 2011

has been cancelled

The following bulletin issued today, July 6 by Beth Raines, Captain of the local Brigade of the Rural Fire Service will give some idea of the extent of the damage:

On Tuesday afternoon the two Mounts were hit with a massive wind storm with pretty devastating results. High winds have continued and are expected to abate on Friday. There have been major tree losses along all roads and Mt Irvine Road, Mt Wilson Road and The Avenue were finally cleared yesterday morning with all minor roads (except Waterfall Road) being cleared by Wednesday evening. Telephone (landline) services have been interrupted but are now restored in places. Power has been off since Tuesday afternoon and is not expected to be restored for days yet - realistically not until next week. We have had Council crews working alongside Brigade members to remove trees off the road to allow access. Conditions here are very cold and windy, there is a huge amount of debris everywhere and power lines are still down in many places.

I am sure all members and friends of the Historical Society will join with me in sending warm wishes of support to all those affected by the widespread storms throughout the region.

EVANS OPENED THE WAY TO THE WEST

By John Leary, OAM

THERE IS A SERIES of inter-related events immediately after Lawson, Blaxland and Wentworth crossed the Blue Mountains in May and June 1813.

George William Evans began his survey of a roadway across the Blue Mountains in November 1813 and went as far as the future Bathurst.

William Cox then supervised the construction of the road from July 1814 to January 1815. Governor Macquarie travelled along the new road in April and May 1815 and selected the site of Bathurst.

There is however, a body of opinion that in fact Evans was 'the first European to cross the Great Dividing Range' the three explorers, Blaxland, Wentworth and Lawson not actually having crossed the main range.

What is uncontestable is the fact that in surveying a roadway from Emu Ford on the Nepean River to Bathurst and the subsequent building of the road by William Cox, opened up the interior to ensure the prosperity of the colony.

It allowed the creation and maintenance of a strong national economy based on pastoral and rural industries well into the second half of the 20th century.

Severe drought in the years immediately before the 'crossing' almost forced the small settlement which would eventually become Australia's largest city to be abandoned.

The crossing of the mountains, the surveying of the road and its construction in quick succession gave new found impetus to the colony.

Instructed by Governor Lachlan Macquarie, Evans the then Deputy-Surveyor of Lands was — "*to proceed in the Attempt of Effecting a Passage over the great Range and to discover what Description of Country lay to the Westward of them*." [1]

"the first European to cross the Great Dividing Range"

George William Evans image courtesy National Library of Australia pic - vn 3509777 - v

Governor Lachlan Macquarie sent Evans across the Blue Mountains into the Wiradjuri nation of central-western New South Wales to confirm the findings of the exploration party of Blaxland, Lawson and Wentworth.

He was the first European to record meeting with the Wiradjuri people of the region.[2]

Evans generally followed the route of Blaxland, Lawson and Wentworth, reaching the end of their route at a point Evans named Mount Blaxland.

Evans' party then moved on and discovered the Fish River area and further west near the junction of the now named Fish and Campbell Rivers and described two plains in his view, the O'Connell Plains and the Macquarie Plains.

Evans had made a significant decision, by determining to carry out the second part of Macquarie's instructions first, i.e. by surveying beyond the explorers' terminal point, which he did by starting at the foot of Mt York. Here he marked a tree on November 25, 1813 and measured westward to his later selected objective at the Macquarie River, reaching there on December 9, 1813.

Returning to his *Marked Tree* at the River Lett, which is described in his Survey Field Book (see AONSW Ref. Reel 2623) … *"About 10 chains from the River Lett, and the mouth of a drain about 4 chains left"* he then started on December 31, 1813, the survey of the explorers track, which he completed to Emu Ford on January 8, 1814.

Even today, with a team of surveyors using modern surveying equipment including GPS, digital theodolites and laser distance measures, such a feat would be difficult to emulate in a similar period of time and particularly as Evans had little qualified assistance.

Evans' party included Richard Lewis and James Burns, both 'Free Men' and three convicts, James Cooghan, John Grover and John Tygh.

Their names were recorded for posterity by Arthur J Hand, as street names when he subdivided the Lapstone Estate.

Continued page 6

Evans' reward — £100 and 1000 acres of land

Continued from page 5

Macquarie rewarded Evans with £100 and a grant of 1000 acres (405 ha) on the Coal River near Richmond, Van Dieman's Land. Evans and his family sailed for Hobart in May 1814, but Macquarie recalled him in March 1815 to act as a guide on a tour of the recently discovered country through which William Cox had constructed a road to Bathurst. [3]

By 1814 Evans was no stranger to the Australian bush and the hazards of surveying in uncharted territory.

Born on January 5, 1780, the third child and eldest son of William Evans, secretary to the Earl, of Warwick, of the Parish of St James, Westminster, England and his wife Ann nee Southam; young George served an apprenticeship with an engineer and architect and gained some elementary training in surveying.

In 1798 he married Jennett, daughter of Captain Thomas Melville, commander of the *Britannia* in the Third *Fleet* and migrated to the Cape of Good Hope.

He was employed in the Naval Store-keeper's Department at Table Bay and remained there until May 1802 when, in compliance with the treaty of Amiens, British forces were withdrawn.

Evans then aged 22 was persuaded by Captain William Kent to go to New South Wales and arrived at Port Jackson in HMS *Buffalo* on October 16, 1802.

Initially Evans was given the position of store-keeper in charge of the receipt and issue of grain at Parramatta, but in August 1803 he was appointed by Governor King as acting surveyor-general in the absence of Charles Grimes who was on leave in England.

In September 1804 he discovered and explored the Warragamba River, penetrating upstream to the present site of Warragamba Dam.

Discharged from the Survey Department by Governor Philip Gidley King in February 1805, he began farming at the Hawkesbury settlement on land granted to him the previous year.

This venture failed during the disastrous flood of March 1806, but he remained in occupation until Lieutenant-Governor William Paterson appointed him assistant surveyor at Port Dalrymple in 1809. However, his services were needed in Sydney and he did not leave to take up this office.

In March 1812, he surveyed the shores of Jervis Bay whence he led a small party overland on foot to Appin. This journey of two weeks was conducted under most arduous circumstances and resulted in the settlement of the Illawarra district during the drought years that soon followed.

His success probably induced Governor Lachlan Macquarie to later select him for the task of penetrating the interior of New South Wales.

In September 1812 he went to Van Diemen's Land with the acting surveyor-general, James Meehan, to remeasure grants made by former lieutenant-governors. These grants were in a deplorable state through the inefficiency and misconduct of deputy-surveyors George Harris and Peter Mills.[4]

While thus engaged he was appointed in November 1812 deputy-surveyor of lands, Van Diemen's Land, but in August 1813 he was recalled to Sydney and instructed to try to find a passage into the interior.

In May and June 1814, Evans led another expedition from Bathurst southward to within sight of the Abercrombie River, explored the middle reaches of the Belubula River, discovered the Lachlan River eight miles (13 km) downstream from Cowra, and traced its course as far as Mandagery Creek.

In July 1815 he returned to Hobart, remaining until 1817 when he was required to act as second-in-command to Surveyor-General John Oxley in an expedition then setting out from Bathurst to determine the course of the Lachlan River.

EVANS' WATCH. Astronomical observation are made to determine azimuths, latitudes and longitudes on the earth. Evans' watch would have been used in the timing of the observations to determine the the direction of true north and the latitude and longitude of Bathurst using solar or star observations. A watch error correction is applied to adjust the azimuth observation related to the true north meridian based on Greenwich mean time.

Though forced to return by flooded marsh country when about nine miles (14 km) below Booligal; Oxley paid tribute to Evans' able advice and co-operation, and the accuracy and fidelity of his earlier narrative.

In September 1817 Evans returned to Van Diemen's Land, but six months later he was again recalled to fill the position of second-in-command to Oxley, this time in his attempt to trace the Macquarie River to its termination.

Once again flooded marshes proved too great an obstacle, so the party turned eastward to Port Macquarie and thence southward to Port Stephens. After twenty-three weeks the exploration was completed in November 1818.

Evans returned to Hobart and for the first time since his appointment as deputy-surveyor was able to confine his attention to his duties in Van Diemen's Land, where land surveys were in serious arrears through inadequate staff and continual demands for his services on exploration.

Continued page 7

Evans' alleged bribery involvement

Continued from page 6

William Sorell had a high opinion of Evans, but the administration was lax and the surveyor had great power. Not only were mistakes often made but, in the issue of grants, a certain discretionary power was given to surveyors to 'throw in' additional pieces of land.

Sorell also sanctioned the acceptance of 'presents of office' by surveyors to supplement their inadequate pay.

This practice understandably brought complaints and accusations of corruption from disgruntled settlers and these were supported by (Sir) George Arthur, who replaced Sorell in May 1824.

The new lieutenant-governor sent to the secretary of state a lengthy account of Evans' alleged involvement in bribery and his illegal disposing of crown lands in an attempt to force him from office.

When Evans asked to retire on a pension, Arthur, in order to expedite his removal, was prepared to concede that his practices had been condoned by Sorell, but the stigma effectually prevented all further promotion of Evans' assistant, Thomas Scott.

Evans resigned in December 1825 on the ground of ill health, eight months after his wife had died.

A despatch from London in May 1826 appointing him the first surveyor-general of Van Diemen's Land had only recognised his position as the Colonial Office knew it when revising the establishment of the Surveyor-General's Department; soon afterwards Earl Bathurst wrote welcoming his resignation, confirming his pension and agreeing to abandon further investigation of his past conduct.

Evans sailed for England with his second wife, Lucy Parris, daughter of Thomas Lempriere, in November; while there, he supplemented his pension of £200 by teaching art, but in November 1828, when he heard of Oxley's death, he applied for appointment as surveyor-general in New South Wales, claiming that his health was fully recovered.

"South West View of Hobart Town, Van Dieman's Land ca.1819", a watercolour by Wiliam George Evans. Reproduced with permission of State Library of NSW. V6/1819/1

He was unsuccessful but in 1831 he surrendered his pension for a lump sum of £600, and returned to Sydney the next year.

Arriving in August he set up as a bookseller and stationer, and soon became drawing master at The King's School, then housed in Harrisford, George Street, Parramatta, while his wife conducted a finishing school for young ladies.

He returned to Hobart in 1844 to live with his family in Warwick Lodge, his home in New Town. After his wife died in August 1849, he moved to Macquarie Street, Hobart, where he died on October 16,1852, aged 72, and was buried in St John's churchyard, New Town.

He had at least twelve children, seven by his first marriage and five by his second.

As well as being a competent surveyor and a resolute explorer, Evans was an artist of some note.

His aquatint view of Hobart in 1820 was published as a frontispiece in his *Geographical, Historical and Topographical Description of Van Diemen's Land* … (London, 1822; second edition, 1824; and a French edition, Paris, 1823).

The original, with another aquatint of Hobart in 1819, is in the Dixson Library of New South Wales, where four of his views of Sydney are also hanging.

He appears to have drawn a number of sketches and water-colours, both of the settled areas of the colony and of the interior, when he journeyed with Oxley.

His artistic skill may also have helped him to win Paterson's favour in 1809 and so to restore him to official life at that time.[5]

Footsteps in time

Move forward into the 20th century and in the decade before 1988, across Australia towns, cities and villages were planning projects to commemorate the 200th anniversary of the first European settlement at Port Jackson in 1788.

In the Blue Mountains, John Yeaman, BEM, the city engineer had been considering a project to recognise the significance of Evans' surveying exploit from the River Lett at the base of Mount York east to Emu Ford on the Nepean River at Penrith .

In 1982 after having carried out research for the Blackheath Rotary Club's *Historic Blackheath* book, Yeaman put forward the idea that some action should be taken to remark the line of survey traverse carried out by Evans in 1813-14.

John Yeaman was another to contend that the work of Evans had been overshadowed by the recognition given to Blaxland, Wentworth and Lawson.

Continued page 8

Evans' pillars restored by surveyors group

Continued from page 7
It was the Blue Mountains section of the survey that interested Yeaman

On February 26, 1983 Yeaman presented a paper to the Mount Victoria and District Historical Society which provides a detailed picture of those who forged the link between the, then modest settlement at Port Jackson and the vast resources of the inland continent.[6.]

The remarking of the survey line established by Evans which Cox followed closely, was conceived as part of the 1988 celebrations.

Evans' Field Book is stored in the State Archives (Book No.96 AONSW Ref. Reel 2623) and despite its age and poor condition, it was possible to obtain details from it.

There are about 500 survey points, but initially it was decided to limit the number of points to 12, perhaps the most important watering holes[7].

An Australian Bicentennial grant of $45,000 was obtained by Blue Mountains City Council in 1986 which permitted 14 pillars to be built marking some of Evans' camping sites.

Mt York was the first pillar unveiled in 1988. Mr AK Weatherburn, a great, great grandson of George Evans and author of two books on the surveyor and his works, unveiled the Mt York pillar.

Footsteps in Time pillars are located at Mt York, Mt Victoria, Blackheath, Katoomba, Wentworth Falls, Wentworth Falls West, Lawson, Hazelbrook, Faulconbridge, Springwood, Warrimoo, Blaxland, Glenbrook, Lapstone and Emu Plains.

Each marker is identical to the base of a trigonomical survey pillar, as used throughout NSW for major surveys and contains four plaques; one giving details of the project, one giving details of Evans and his work, one giving reproductions of relevant pages of his field book and extract from his diary and one giving details of the individual unveiling ceremony.

An engraved steel plate on top of the marker completes the construction.

Over time some of the pillars have been vandalized, while others need refurbishment.

The Restoration of the *Footsteps in Time* pillars was a project undertaken by the Seniors Group Institution of Surveyors NSW Inc. funded by the Blue Mountains City Council, Perith City Council, Land and Property Management Authority and Institution of Surveyors NSW[8.]

The Seniors Group, Institution of Surveyors NSW Inc. conducted a ceremony at the Lapstone pillar in May 2011 to mark the restoration of the 14 pillars .

What would you keep in an empty jar?

by Dr Peter Stanbury, OAM

CHRISTOPER ROBIN'S friend, Eyeore, thought that an empty jar was good place for dead balloons.

But what if the jar was bigger than those in the Arabian Nights that held rivers of gold and jewels?

What if they were as big as a person standing up and there were hundreds of them scattered around the landscape, some in groups of scores or more, some standing alone?

What if they were two thousand years old? What use can you imagine?

Would you want to research them if the area in which they are found has been a war zone for most of the last hundred years?

In the last decade or so most of the cluster bombs and other ordinances surrounding them have been destroyed and only shell holes and bomb craters remain.

Now is a good time to carry out research. In the Lao Peoples Democratic Republic there are thousands of stone jars.

No one really knows what they were used for. They are thought to be carved out of stone by iron tools. Perhaps they were used for burials – but did they hold raw corpses, mummies, ashes or only goods for use in the after life? If so, where are the lids?

The jars are there, but why are there virtually no lids? What is the meaning of the infrequently found carved human figures with outspread arms found on some examples?

Hundreds of these jars of unknown origin are scattered across the landscape

The puzzle is one of the foremost opportunities for prehistory studies in South East Asia. Xieng Khouang (pronounced Sieng Kwang) in the central eastern region of Lao is a plateau about 1200 metres above sea level.

It has a wonderful climate for the tropics, warm during the day and cool at night. Many minerals are found nearby.

The area is a military strategic point – like a medieval castle with a view of the surrounding countries and an excellent position from which to control the neighbouring peoples.

Although the area is popularly known as the Plain of Jars, many jars are found on hilltops and in wooded areas.

Some sites have up to 300 jars; some sites have a single jar. The jars are made of a variety of materials: sandstone, granite, limestone or a mixed conglomerate of material.

Some sites seem to have a nearby stone quarry; others appear remote from a source of stone.

So how were the jars transported? By elephants? By pushing them over rolling logs?

The mouths of some jars are essentially round; others have a rectangular or square shape.

The few flat stone discs that remain are about the right size for lids, but they may also have been used to cover holes in the ground that contained corpses, ashes or objects of worth such as offerings.

It is interesting that the rims of the jars vary: some have an internal niche around the circumference, others have an external niche and yet others have no niche. Just one jar has a human(?) carved on the outside; at least one lid has a similar carving.

Since 1998 UNESCO and the Government of Lao PDR have been attempting to safeguard and research the remaining jars.

Some are now broken; either in recent wars or by human vandalism over the ages. On many jars bullet marks can be seen - what is better than a big jar for target practice?

This jar shows an internal niche at its opening

Jars crying out to be researched

The first work recently carried out consisted of mapping the position of the individual jars, proclaiming as protected areas the sites where many jars are found and clearing (blowing up or removing) unexploded ordnance.

After that local people have been inducted into recording and archaeological practices. Some excavations have also taken place, underneath and in the vicinity of the jars.

The finds, however, are meagre. A relatively small number of iron knives have been found, as well as the remains of bracelets of bronze, necklaces of glass beads and pottery.

These are either stored in the region or a few items are on display in the National Museum of Lao PDR in Vientiane.

Unfortunately none are on display at the sites; of which four or five major ones are accessible to the public.

Furthermore, the items in storage are deteriorating due to lack of conservation knowledge.

The Plain of Jars has been a war zone as seen from this newspaper clipping which show soldiers reading maps with the large jars in the background

The only conservators in the country are the occasional visitors from overseas.

The major site on an actual plain is on the outskirts of Ponsavan (from which airplanes and buses disgorge tourists) and is becoming hemmed in by farms and other undesirable developments.

Richmal Crompton's famous schoolboy hero, William, philosophised that he would be an inventor except that the radio, the telephone, TV and movies had all been invented so there was nothing left to invent.

Some times it seems that research projects are equally elusive. But the jars are crying out to be researched. Is this an opportunity for you to take one small step?

At the top of this jar there is an external niche

About the author

Dr Peter Stanbury, OAM an executive member of BMACHO's management committee and a regular contributor *to HERITAGE* is a member of Australian Business Volunteers. Peter is also vice chair, UMAC (ICOM's International Committee for University Museums and Collections) and librarian, Richard Bailey Library, Australian Society of Anaesthetists

As a volunteer he often travels overseas to give freely of his advice particularly in museum collections.

On one of his recent trips when in Laos, Peter visited the Plain of Jars to inspect these 2000 year old man sized jars of uncertain origin and function. As Peter says this is an interesting research program just waiting to be tackled.

Dear Old Golden Rule Days

EDUCATION is something which has, at some time, in some place, touched us all. Whether we left school before matriculation, attended a tertiary education institution or are one of a growing community of 'life-long learners', we have all been influenced by education at some time and at some level. **…**Elissa MacDonald, Editor In Chief, *aMUSine.* The museums, galleries and collections zine by interesting people for interested people.

HERITAGE is indebted to *aMUSine* for this first hand account of life by a young boy at Blue Mountains Grammar School 75 years ago and before it became an exclusive boys school.

I WAS BORN IN 1926 and had attended five different schools by the time I turned twelve years of age.

This was due to the fact that my father was a postmaster and was moved around by the Postmaster General's Department during my childhood.

I think my most enduring memories are of Blue Mountains Grammar School, Springwood where I was a day pupil from fifth class in 1935 to 1938 when my father's move to Sydney resulted in my transfer to Sutherland Intermediate High School.

After starting me off at Springwood Public School (second and third classes), Dad decided that I should have the opportunity to develop as a "young gentleman" and enrolled me as a day pupil at the Blue Mountains Grammar School whose motto was "Nihil sine labore" (nothing without work).

At that time it was located near Springwood Railway Station on the corner of Macquarie Road and Homedale Street, Springwood.

The school was established by its first headmaster, Edward Kenneth Deane, in 1918 in the grand, Italianate home known as "Homedale", built in 1882, and which was demolished in 1975.

I think my father was influenced in this regard by the Greyfriars stories, written by Frank Richards, which he had read during his own pre World War 1 boyhood and by friends in the close knit Springwood community.

I attended Blue Mountains Grammar School from 1935 to 1938 inclusive and apart from undergoing the usual bullying by a couple of older day boys enjoyed it immensely.

This faded photograph is of Rex Turner in his full Blue Mountains Grammar uniform. Photograph courtesy of R Turner and C MacDonald

I have very happy memories of my days at BMGS. I remember well the masters, the old classroom building, the pre-school morning hymn (usually hymn number 1 - "Now that the daylight fills the sky ….. ") being beefed out by the boys as the headmaster, Ken Deane accompanied us on the piano, the daily fill of the three R's, the camaraderie of the students around me, and, of course, our periods of play.

Having been brought up on the type of schoolboy novels which encouraged certain qualities in their boys, I saw BMGS in some way as the local Greyfriars or St. Jim's of Frank Richard's creation, preparing us to be men worthy of the title of gentlemen.

The words of the first verse of Sir Henry John Newbolt's *Vitae Lampada* were especially meaningful to me, and the afternoon cricket match never failed to remind me that:

There's a breathless hush in the Close tonight -
Ten to make and the match to win
A bumping pitch and a blinding light,
An hour to play and the last man in.
And it's not for the sake of a ribboned coat,
Or the selfish hope of a season's fame,
But his Captain's hand on his shoulder smote –
"Play up! play up! and play the game!"

Life at Blue Mountains Grammar School 75 years ago

As I have mentioned, the headmaster was Ken Deane. He was short, rotund, stern and respected by all his pupils. I remember him as a fun man.

He had an old, noisy Ford flat top truck (his beloved "Tin Lizzie") which he used to take the boys to the roadside swimming hole at Valley Heights, and to football matches at the Springwood Sports Ground, and incidental tasks such as towing the school's dead cow from where it had succumbed to an enormous hole where it was to be interred.

A peach tree planted atop the grave later yielded loads of magnificent fruit. Ken Deane was instrumental in inculcating in me a realization that I could become a good student and, in due course I would have the "makings of a gentleman".

His ability to mould boys into men of worth and resolve set me an example which I have tried to emulate throughout my life.

Another of my teachers was the red headed Irishman and sportsmaster, Mr Russel who also taught me Latin (I was quite a dab hand at it) and frightened me on the sports field ("Who kicked that football back into the scrum?" – me of course, as I didn't want the bloody thing or been told what to do with it), and later after I had been chased over the try line with the ball in my hands and scored a couple of tries ("Good boy Turner, I didn't think you had it in you!").

There was however, one teacher who I consider was one of the greatest influences on my life - the part time elocution teacher, Mr Gorman.

I know my elocution and language in my early school days was basic and was a take off of the western film stars who used to entertain me at the local picture theatre on Saturday afternoons.

He had taken me in hand shortly after I became a BMGS pupil. One day, I was in the Springwood Post Office talking to Dad when, for some reason or other I used the word "Garn!", meaning of course, "Go on".

I happened to look at the customer side of the post office counter and standing there was Mr Gorman.

I cringed and repeated what I had just said – this time saying it correctly. Mr Gorman smiled, nodded and went on his way. My interest in his teaching was immediate and far reaching.

He taught me that syllables, consonants and vowels all had a purpose, and should be uttered clearly so that my listeners would understand what I wanted to say.

He taught me not to slur my speech, and to enunciate every word and sound properly. In essence he taught me to speak, which has been a wonderful attribute in my progression through life.

My feelings of nostalgia for my old Alma Mater are well captured in the words of the old school song:

"Mother kind, our pride and treasure,
Bold our voices cry, and free,
Moulding us through days of pleasure
For our struggles yet to be;
Fate on blackest waves comes surging
Triumphs from our tasks may rise,
Still we strive, her proud words urging,
Labour, labour, wins the prize.

Hers the race we run to dying
Hers our triumph's ringing cheer,
Hers the ball to victory flying,
Hands that strain, the line is near;
Work and play their trophies bringing,
Labour on, our school replies,
Words like bells forever ringing:
Labour, labour, wins the prize.

Glorious school, we laud thee proudly,
Giver of our fairest days,
Masters, playmates, singing loudly,
In our swelling song we praise;
Banner ever proudly bearing,
That our school waves in our eyes,
Banner direct battles daring,
Labour, labour, wins the prize."

Ours was not a political song. "Labour" in its context meant "Effort", or, as Calvin Coolidge would have put it, "Persistence and determination". I commend its sentiments, and as Grantland Rice wrote before me, that . . . "when the One Great Scorer comes to mark against your name, he writes - not that you won or lost - But how you played the Game ."

75 years later

Rex Turner a veteran of World War 2, now aged 85 considers himself a 'gentleman of leisure' though in the past he was chief executive of HCF Australia

HERITAGE is indebted to his granddaughter,Elissa MacDonald, editor In chief, *aMUSine* who arranged for this recent photograph of Rex who provided *aMUSine* his memories of his school days in the Blue Mountains 75 years ago.

Rex believes there may only be three of his contemporaries still living.

Crumbled chimney stack only reminder of Polar explorer who lived in Woodford

By Pamela Smith

MANY NOTABLE POLITICIANS, successful business people, war heroes, and inspiring educators have lived in the Blue Mountains at one time or another.

One of these was renowned geologist, polar explorer and university lecturer Sir Tannatt William Edgeworth David KBE CMG DSO DSc FRS with wife Caroline.

The couple purchased twenty-six acres of land at Woodford in 1898; naming the two-roomed cottage they built 'Tyn-y-Coed' (meaning house in the wood).

The name reflected Sir David's Welsh birth. Born in 1858 at the rectory of St Fagan's in Wales, he was the eldest child of Rev William David a fellow of Jesus College Oxford. Sir David graduated BA from Oxford in 1881.

He arrived in New South Wales to take up the position of assistant geological surveyor following the disappearance of Lamont H Young (his predecessor) on a field trip to Bermagui in 1880.

Sir David arrived in Sydney in 1882 and in July 1885, married English born Caroline Martha (Cara) Mallet whom he met on the voyage to Sydney.

There is a suggestion that Cara emigrated for reasons of health, however it is more commonly believed that she came to NSW to take up an appointment as founding principal of Hurlstone Training College for female teachers. Interestingly, she is thought to have been appointed by Sir Henry Parkes.

Mackay, David and Mawson raise the flag at the Magnetic South Pole January 16, 1909

William Edgeworth David led first expedition to reach South Magnetic Pole

Cara, an orphan from a working class background received her education by scholarship from Whiteland College London and later, she trained as a teacher.

She was a lecturer at the college prior to applying for the position at Hurlstone. Cara, a bright intelligent woman, became interested in and assisted with the introduction of the free kindergarten movement in the inner suburbs of Sydney.

She was aided by other early feminist educators like Louisa Macdonald and Maybanke Wolstenholme.

Sir Edgeworth David was appointed professor of geology in the University of Sydney in 1891.

Sir Ernest Shackleton appointed him as leader of the scientific team accompanying him to the South Pole in 1907 - 9.

Sir David led the party that discovered the South Magnetic Pole and he and his team scaled the active volcano Mount Erebus.

At the outbreak of the First World War, Sir David recruited and formed the Australian Mining Corps that was composed of tough individuals from the gold, copper, coal and silver mines of Kalgoorlie, Bendigo, Tasmania and South Australia.

Although little is known about the corps the most successful operation carried out by the men serving under Lieutenant Colonel David was the mining under and explosion of Messines Ridge, in 1917.

In the early part of the twentieth century the Blue Mountains and 'Tyn-y-Coed' became the David's main place of residence.

The cottage was expanded to meet the needs of the family and orchards and gardens were established. In 1909, following his return from the Antarctic, the Davids entertained the crew of the polar expedition ship, *Nimrod*.

They were community minded and sociable, and members of the local Woodford Anglican Church.

In August 1934 the media of the day announced the death of the world famous scientist. Sir David was given a State funeral.

It is unfortunate that the crumbled chimney stack of 'Tyn-y-Coed' (destroyed by fire) is the only reminder of the David's time in Woodford.

Special days in World War 1

by Dr Peter C Rickwood

PATRIOTIC FERVOUR was high at times during World War I and the civilian population of Australia was eager to contribute to various 'relief' funds.

Volunteers often organised special days which became formally named after the particular cause, and processions[1], shows, etc. were organised to attract the populace with the aim of relieving them of money.

Whilst some special days were on specifically designated dates, it was common for small communities to hold them on a convenient nearby day - usually a Saturday when many were not at work; Sunday being off-limits due to religious observances.

This flexibility meant that the same special day was held on different dates at different places across Australia and not all communities would respond to a particular cause.

Belgium or Belgian Day, variously reported as having been held for the Belgian Relief Fund or to raise funds to provide food for children in Belgium, was on May 14, 1915 in the Blue Mountains, May 15, 1915 in Sydney[2], but seven weeks earlier in Victoria on March 26, 1915[3] and also in Tasmania[4]; in South Melbourne it was called Belgian Rose Day and reputedly was held on April 8,1915[5]. Note that it was not held on the National Day of Belgium, which is July 21, and marks the accession of King Leopold I in 1831!

A few special days were held in successive years, e.g. Red Cross Day.

Towards the end of the war there must have been some negative reaction to continual appeals for donations, and when the Armistice was declared local residents would have resisted these appeals with the intention of donating to the expected welcome home ceremonies for the volunteers from their community - many of which eventuated.

Some of the names of these special days in the 1914 - 18 period were unusual, and would not be known by many 21st Century residents, so I have attempted to compile a list.

The intent was also to show which 'days' were observed in which places in the Blue Mountains, but observances held in some villages may have been missed as most events were not advertised in newspapers, and post-celebration reports were often brief and concealed in articles with titles that do not convey all of their content.

THE AUTHOR

The author, Dr Peter C Rickwood, a former president of the Blue Mountains Historical Society Inc. is the inaugural editor of BMACHO's *Blue Mountains History Journal* the second edition of which will be published online later this year.

Peter is a visiting senior research fellow at the School of Biological, Earth & Environmental Science at the University of New South Wales.

The article first appeared in the Blue Mountains Historical Society's newsletter Hobby's Outreach Volume 23 Number 2 – June-July 2011

Not all villages in the Blue Mountains observed any particular special day and there was great inconsistency of effort, but Katoomba and Leura would appear to have been the most co-operative.

Some of the designated special days are not known to have been observed by any of our Blue Mountains villages e.g. Sand Bag Day.

I am grateful to Mr John Merriman, Local Studies Librarian, Springwood for steering me to the Australian War Memorial website which has a list of these days. (http://www.awm.gov.au/findingaids/special/Souvenirs/Appeals.xml)

Historic 1880s Carrington Hotel to be venue for Blue Mountains history conference

HISTORIC CARRINGTON HOTEL, Katoomba has been chosen as the venue for the 2012 Blue Mountains' history conference

"The early years of the colony" is the title chosen by the Blue Mountains Association of Cultural Heritage Organisations for its first conference to be held on Saturday, October 20, 2012.

The conference follows earlier Blue Mountains history conferences organised under the auspices of Blue Mountains City Council's local studies section.

BMACHO, president Pamela Smith who was involved in the organisation of earlier conferences, said the event would focus on life in the early years before the colony was explored west of the Blue Mountains.

The Association is planning to present an affordable event with a range of well-informed speakers.

Closer to the event more details and cost to participants will be promoted.

The keynote speaker is expected to be well known historian, Dr Shirley Fitzgerald.

Dr Fitzgerald was the City Historian for the City of Sydney from 1987 - 2009, when she delivered a program connecting the community to their history using diverse formats from radio chats to formal lectures.

She has taught in NSW schools, lectured at the University of New England, and established the inaugural Master of Letters degree in Public History at the University of Sydney.

Dr Fitzgerald has held a number of professional positions, including president of the History Council of NSW, 1996 - 99 and chair of State Records NSW, 2001 - 2007.

She was the inaugural chair of the Dictionary of Sydney Trust and continues to be involved in this exciting project.

The 1880s heritage Carrington Hotel at Katoomba

She is currently Adjunct Professor in the Faculty of Humanities and Social Sciences at the University of Technology, Sydney.

Topics will focus *on:*
** Fashions from frockcoat and crinolines to convict canvas and cabbage palm leaf hats;*
** Convict Women, prostitution, imbalance of women - their fears and fate in a foreign environment;*
** Indigenous history – First encounters, food, language. Indigenous interaction - From genocide to government arrogance.*

The above are only working titles and obviously wil be refined both by the committee and the speakers as planning progresses.

Each speaker will be asked to speak for 45 minutes and there will be question and discussion time of 15 minutes at the end of each paper.

Included in the program will be a musical interlude with Jim Low a folk singer, historian and writer guaranteed to wake the audience after lunch which will be served in the Carrington's grand dining room.

For further details contact Jan Koperberg jank@eftel.com.au

Jean Arthur in Blue Mountains Hospital

JEAN ARTHUR, the secretary of Mount Victoria & District Historical Society; a remarkable woman with a wealth of knowledge about the Mount Victoria district, had a fall last month and fractured her shoulder, which resulted in her being admitted to Blue Mountains District Anzac Memorial Hospital.

On the evening of the fall, Jean did not feel like cooking dinner and crossed the highway to the garage to buy fish and chips.

On the way back she tripped in a pothole on the corner of Mt York Road and the Great Western Highway and there she lay till a gentleman from the Talisman Gallery found her and called the ambulance.

This chap had closed his shop in Hartley Valley and had gone for a bicycle ride up Berghofer's Pass and along Mt York Road and was going back down Victoria Pass.

This was fortunate for Jean, because she had been lying on the road for some time, waiting for help, cold and in pain.

Jean is a member of BMACHO's management committee

Some members have already visited Jean in hospital or sent get-well wishes. All wish Jean all the the best for a speedy recovery.

School of Arts or Mechanics Institutes have their origin in early 19th century

by Pamela Smith, Springwood Historians

IN THE EARLY YEARS of the 20th century Mechanic's Institutes or a School of Arts building was a common feature in most Blue Mountains villages.

However, as a "movement" their history is much older.

The first was established in Scotland in 1821, with the aim of improving the intellect of its members through the "diffusion of useful knowledge" and to nurture "literature, science and art."[1]

It was not too long before these "civilising institutes" appeared in the new colony.

With a land grant courtesy of Governor Richard Bourke the Sydney Mechanic's School of Arts opened its doors in 1833 and still exists to this day.

Springwood was not so lucky because even though a committee formed in 1901, fund raising activities and a promise of land by James Hunter Lawson (owner of Braemar and the Oriental Hotel) came to nought.[2]

In fact one of the members of that early committee is thought to have absconded with the funds.

The Springwood School of Arts finally opened its doors in 1913, with Mr Brinsley Hall MP officiating.

A commemorative booklet published for the event stated the committee overcame "great difficulties" and "discouragement" to bring about the end result.[3]

The graceful Federation style building was well-ventilated and lit with Benzoli air gas lights.

As well as a well stocked library, the building contained reading and committee rooms, and a "fine billiard room" - lined in Australian timber - containing two excellent billiard tables.[4]

Pictured are the Coo - ee marchers as they marched past the Springwood School of Arts on their way through the Blue Mountains from Gilgandra in the central west to Sydney to enlist in World War 1 in 1915 . Local photographer, Jo Booker.

When barely twelve months old the building provided overnight accommodation and comfort for men who took part in the Co - ee March.

Later, the institute became the scene of World War 1 commemorations when captured enemy machine guns and the honour roll were placed in their keeping.

A newspaper article in 1919 suggested the Springwood School of Arts was "indispensable" and a fine institution "for our young men" because no signs of gambling or objectionable behaviour were tolerated within the "cosy comfort" of its walls.

'... like an elite men's club catering for the upper class...'

Mothers and wives were being asked to encourage their sons and husbands to join.

Research indicates however that despite these overtures to the general community the institution did not realise its primary objectives until the 1940s.

Until then it had functioned more like an elite men's club catering to the upper-class demographics of the area at that time.

But, by the 1940s all that had changed. In 1943 the Australian Labor Party held meetings there and Red Cross ladies conducted fund raising activities from the veranda of the building.

During the 1940's Horace Lindrum, Australia's first professional snooker and billiards player was a regular visitor.

Lindrum (who would go on to win the world snooker title in 1952) was featured in a competition to aid the Australian Comforts Fund in 1944. An amount of £56 was raised.

In 1946 an essay competition held by the institution was judged by one-time resident, Supreme Court Judge and patron of the Arts, Rae Else Mitchell.

Council explains LEP processes

AN INFORMATION SHEET on LEP processes has recently been released by Blue Mountains City Council

The following information provides some background on previous council processes, planning instruments and heritage studies and why Council is moving towards a review of heritage items under LEP 1991.

Council currently holds three Local Environmental Plans which apply to land throughout the Local Government Area. They are:

* Local Environmental Plan No.4 (LEP 4). This plan applies to limited sites throughout the LGA, is the oldest plan operating in the LGA and was gazetted in 1982.

- Local Environmental Plan 1991 (LEP 1991). This plan applies to outlying areas, land on the edges of towns and villages and rural sites throughout the LGA. It was gazetted in 1991.
- Local Environmental Plan 2005 (LEP 2005). This plan applies to the core villages and towns throughout the LGA and was gazetted in 2005.

History on LEP 2005

The development and gazettal of LEP 2005 took a number of years to complete and there were a number of draft LEP documents publicly exhibited and commented upon.

In all the LEP 2005 instrument went through two exhibition processes, before it was finally gazetted by the Department of Planning in 2005.

Blue Mountains Draft Local Environmental Plan 2002 (DLEP 2002) was placed on public exhibition between October 16 and December 13, 2002.

Council went through an exhaustive public review of DLEP 2002 in response to the submissions received from the community, internal review of the document and changes in government legislation.

The review of the DLEP 2002 resulted in council making a number of alterations to to the draft plan. The substantive bulk of the alterations were minor changes that did not change the role, operation and purpose of the LEP.

Consequently council adopted those changes. However, there were a number of alterations which were more substantive and council resolved to defer these issues and seek public comments on these deferred matters.

A second public exhibition of deferred matters was undertaken between October 16 and December 13, 2002 and the exhibition period was extended until January 17, 2003.

Following exhibition, council considered submissions and made appropriate changes to the DLEP and it was sent to the NSW State Government for gazettal.

The LEP was named Local Environmental Plan 2005 and was gazetted on October 7, 2005.

Springwood School of Arts

Continued from page 17

Over the ensuing years the building was used by a range of organisations like the local historical society, Boy Scouts & Guides, dance and musical groups, The Old Age Pensioners Association, Citizens Recruitment League, Red Cross and Children's Library Group conducted by caricaturist, cartoonist and artist George Finey.

During its lifetime it provided a venue for community celebrations, entertainments as well as charitable and wartime efforts.

Springwood School of Arts ... a graceful Federation style building

In the years following World War 2 the institution, which had never been strongly supported, faced competition from new technology like the advent of television.

Nevertheless, the building was used right up until its demolition in 1969. The Foundation Stone now graces the School of Arts Town Square.

Heritage is only one component of an LEP

Continued from page 18

Standard LEP

On March 31, 2006 the NSW Government gazetted a standard instrument for preparing new LEPs, also known as the LEP template.

Local plans across NSW will now use the same planning language, making it easier for communities to understand what is proposed for their local area.

Blue Mountains City Council is using a staged approach to achieving a standard LEP instrument.

The first stage is to review LEP 4 and LEP 1991 and bring these forward into the LEP 2005 instrument, therefore creating one LEP for the entire LGA.

The second stage will involve converting LEP 2005 into the Standard LEP instrument thereafter.

It is important to understand that creating an LEP is a lengthy process and may take a number of years to complete.

For example, the expected time frame for creating one LEP for the entire LGA is expected to be completed at the end of 2013.

Review of LEP 1991

Heritage is only one component of the final comprehensive LEP .

Heritage listed site ... Chimney Cottage, Mt Wilson

Heritage listed site ... Bills horse trough, Glenbrook

Council has received support from the Department of Planning that amendments to heritage items be undertaken to LEP 1991 before it is amalgamated into LEP 2005.

Therefore council staff are working towards updating and revising LEP 1991 Schedule 2 – Heritage and its associated mapping before it is rolled into the revised comprehensive LEP 2005.

Previous Heritage Studies

The first comprehensive heritage study undertaken in the Blue Mountains Local Government Area was a study completed in 1982 by Croft and Associates which applied to numerous sites throughout the LGA.

This study was later used as a basis for further heritage work.

Professor Ian Jack and Associates was engaged by council to undertake various heritage assessments and reviews to update heritage listings.

Dr Jim Smith was engaged by Council in 2010 to undertake a heritage study on natural areas covered by LEP 1991.

These include walking tracks, lookout and other heritage items of natural value.

A number of the heritage reviews which have been undertaken over the years, have not been publicly exhibited and the information has not been carried forward into an LEP instrument.

This is where some confusion may lie with community members, in that information from previous community consultation may not have resulted in amendments to the statutory LEP instrument.

Council is now working towards enacting previous heritage reviews undertaken and community input and carrying these forward into a revised and updated heritage schedule.

The first stage of the process is to consult with land owners of potential heritage items, publicly exhibit the heritage assessments

Heritage listed site ... Knapsack Zig Zag, Lapstone

Heritage listed site ... Woodford Academy

and reviews related to LEP 1991 items and seek council endorsement of these documents.

The second stage of the process is to carry forward the proposed amendments into an LEP amendment to LEP 1991.

Heritage briefs from around the world

Greeks resist sale of heritage sites

A ROYAL PALACE where Prince Philip was born has been the focus of protests against the sale of Greece's national heritage to pay off its debts.

The Greek government has plans to sell state assets in a bid to raise 50 billion Euro.

Mon Repos Palace in Corfu one of the largest Greek islands, where Prince Philip, the Duke of Edinburgh, was born 90 years ago, is one of several state-owned properties to be auctioned.

Prince Philip, Duke of Edinburgh

The fear is that places such as this will be sold off to private foreign buyers and closed off forever to the public. **Telegraph, London**

Fears for prehistoric art

CAVES containing some of the world's best prehistoric art are to be opened to the public despite warnings that human breath will destroy the 20,000-year-old paintings.

Scientists have said the decision carried 'immeasurable' risks.

The vast Altamira caves, discovered in 1879 in the Cantabria region of Spain have been called the Sistine Chapel of Paleolithic art.

They are covered in paintings of European bison, bulls and other animals.

The site is a UNESCO declared World Heritage Site. **Telegraph, London**

Bligh's medals up for auction

TWO GOLD MEDALS (pictured) awarded to Bounty captain, William Bligh have been put up for auction by his descendants.

The first medal was awarded in 1794 by the Royal Society in England for Bligh's work started on the voyage on the Bounty, relating to bread-fruit, which had been discovered in Tahiti.

The botanist Sir Joseph Banks was keen to transplant the crop to the West Indies as a food source for slave labourers.

The second is the Naval Gold Medal 1795 awarded to ship's captains.

Bligh won his for his role at the Battle of Camperdown, a major naval action on October 11, 1797 between the Royal Navy and the Dutch Navy in which the British captured 11 Dutch ships without loss of any of their own. ***The*** **Sydney Morning Herald**

Springwood emblem controversy

THE MAY-JUNE EDITION of *HERITAGE* , published an article by Shirley Evans about the design in 1965, by Norman Lindsay of what was described as a coat of arms.

The Springwood Chamber of Commerce decided it was a propitious time for the town to have its own coat of arms which could then be permanently displayed in the new hall.

However, it could not be regarded as a genuine coat of arms, the right for which needed to be granted by the Royal College of Arms in London.

The Blue Mountains City Council already had a coat of arms so it was decided to call it the Springwood emblem or crest.

It also happened to be the 150th anniversary of the naming of Springwood by Governor Lachlan Macquarie

A reader and contributor to this newsletter, Dr Peter Stanbury OAM has correctly pointed out that coat of arms and crest has quite specific meanings; they are not interchangeable.

The crest is the top part (often animal, piece of armour or sword) on or of a coat of arms

The blazon of arms for the above coat of arms would be as follows:

Arms: *"Argent, a saltire azure, cantoned with four markings of ermine sable."* (Silver or white shield with a blue saltire or 'X' and in four-equidistant places the marking of the ermine 'fur' in black.)

Crest: *"A lion's head erased azure langued gules."* (A lion's head cut off at the neck with a flourish, in blue with a red tongue.)

The Domesday Book

THE DOMESDAY BOOK was commissioned in December 1085 by William the Conqueror, who invaded England in 1066.

The first draft was completed in August 1086 and contained records for 13,418 settlements in the English counties south of the rivers Ribble and Tees (the border with Scotland at the time).

The original Domesday Book has survived over 900 years of English history and is currently housed in a specially made chest at The National Archives in Kew, London[1].

"…While spending the Christmas of 1085 in Gloucester William had deep speech with his counsellors and sent men all over England to each shire to find out what or how much each landholder had in land and livestock, and what it was worth," according to the *Anglo-Saxon Chronicle*.

One of the main purposes of the survey was to determine who held what and what taxes had been liable under Edward the Confessor; the judgment of the Domesday assessors was final—whatever the book said about who held the material wealth or what it was worth, was the law, and there was no appeal.

It was written in Latin, although there were some vernacular words inserted for native terms with no previous Latin equivalent, and the text was highly abbreviated.

Richard FitzNigel, writing around the year 1179, stated that the book was known by the English as 'Domesday', that is the Day of Judgement "for as the sentence of that strict and terrible last account cannot be evaded by any skilful subterfuge, so when this book is appealed to ... its sentence cannot be put, quashed or set aside with impunity.

Domesday Book and chest at the National Archives, Kew, London

That is why we have called the book 'the Book of Judgement' ... because its decisions, like those of the Last Judgement, are unalterable."

In August 2006 a complete online version of Domesday Book was made available for the first time by the United Kingdom's National Archives[2].

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2011-12 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Joan Kent (treasurer), Jean Arthur, Doug Knowles, John Leary, Dick Morony (public officer), Kathie McMahon-Nolf, Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

SEPTEMBER - OCTOBER 2011 ISSUE No. 17

Lapstone Zig Zag railway overcame insurmountable climb

THE LAPSTONE ZIG ZAG was built on the Great Western Railway between 1863 and 1865, to overcome an otherwise insurmountable climb up the eastern side of the Blue Mountains.

The ruling grade was already very steep at 1 in 33 (3%). The original plan had been to build the whole line across the Blue Mountains on a completely different route through the Grose Valley with a 3 km long tunnel, but this was beyond the resources of the state of New South Wales at the time.

The zig zag track included a now abandoned station called Lucasville which was built for the Minister for Mines, John Lucas who had a holiday home nearby.

The rail route across the mountains reached as far as Wentworth Falls (then called Weatherboard) by 1867 but the Lapstone Zig Zag, soon ran into problems: the distance between the top points and bottom points limited the length of trains. The single track also meant that trains travelling in opposite directions had to stop at crossing points.

***The Lapstone Zig Zag viaduct.** Photograph by John Leary, OAM . May 2011*

The first crossing point after Lapstone Zig Zag was at Wascoe's Siding at what is now Glenbrook. The single track would contribute to a fatal accident at Emu Plains in 1878 where eastbound and westbound goods trains collided.

The deviation including a tunnel was built around1890 to replace zig zag, but it too experienced problems as it was built at too steep a grade, causing the locomotives to slip.

Smoke also became a problem for uphill trains.

By 1910, the line was being duplicated (made into double track) and the "rathole" tunnel was replaced on a different deviation and the Glenbrook tunnel built.

From then the lower section of the track, including the historic Knapsack Gully viaduct, was converted into a road, the Great Western Highway until the M4 expressway replaced it in the mid 1990s.

The older tunnel was converted for mushroom growing but was also used by the RAAF for storage during World War 2. During 1943 to 1946 Glenbrook tunnel stored chemical weapons.

The line of the old track and cuttings (including the long abandoned platform of Lucasville station), and the old Knapsack Gully bridge is now a popular bushwalking track.

An opinion from the editor.....

Is it time to engage more with the world's oldest living cultural heritage?

OFTEN WHEN THE CULTURAL heritage of the Australian Aboriginal is discussed, it is done so, in almost hushed tones as if those who have come to this country since the European colonisation, are either ashamed of the treatment received by the indigenous people or alternatively that this culture reaching back almost 50,000 years, is so bound up in mystery that it its exploration is just too difficult.

In Australia, indigenous communities keep their cultural heritage alive by passing their knowledge, arts, rituals and performances from one generation to another with land being fundamental to the wellbeing of Aboriginal people.

Of course, there are many genuinely sensitive issues that create unavoidable barriers in a wider communication.

There are those who consider the Australian Aboriginal cultural heritage has been too politicised and it is reasonable to accept there are antagonists, activists and apologists who have inflamed the subject with the result that this rich cultural heritage is not properly understood by generations of new comers to this continent.

On the other hand there are organisations such as the Australian Institute of Aboriginal and Torres Strait Islander Studies which have done much to open up discourse

In most local history societies there is a passing reference to the indigenous people in the records and the research undertaken by the societies' members; but with the exception of those groups established by Australian Aboriginal people and a few academics there seems to be very little real information and research available in this region.

BMACHO in its constitution uses the definition: 'Cultural heritage is all aspects of life of the peoples of [this region]'.

Put more adequately, cultural heritage is seen as 'the total ways of living built up by a group of human beings, which is passed from one generation to the next, given to them by reason of their birth'.

Aboriginal cultures are complex and diverse. The indigenous cultures of Australia are the oldest living cultural history in the world - they go back at least 50,000 years and some argue closer to 65,000 years.

One of the reasons Aboriginal cultures have survived for so long is their ability to adapt and change over time. It was this affinity with their surroundings that goes a long way to explaining how Aboriginal people survived for so many millennia.

The apparently simple lifestyle of Aboriginal people also resulted in two misconceptions - that Aboriginal people were culturally uniform, (despite having 600 languages) and that they had so little attachment to the land, and made so little use of it that James Cook could practise the sleight of hand of describing the continent as terra nullius (empty land) even though his landings were opposed with spears and fire[1]

Archaeological work in Australia has led to the gradual discovery that Aboriginal people had indeed, as they said, been here a very long time. Both the Dharug and Gundungurra people are known to have inhabited this region well before the coming of Europeans and a great many of them still live in the Blue Mountains region.

Perhaps it is now time for organisations such as BMACHO to encourage local historians and those interested in cultural heritage to better engage with those living members of the indigenous people so that assistance may be provided for future generations.

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

Local historian provides images for Hazelbrook community mural

LOCAL HISTORIAN Ken Goodlet (pictured) points out features of historical interest on the new eastern wall mural of the underpass west of Hazelbrook Station.

The section of the mural in this picture shows from from left, Joseph and Florence Taggart's woodcutter's hut of 1912 from where they conducted their wood carrying and saw bench business on the north western corner of the Great Western Highway and Oaklands Road, Hazelbrook.

Behind Ken Goodlet is young Ivy and Hazel Denham with Minnie Adams on the first Hazelbrook Station, about 1900

On the left of the mural are an indigenous rock image of a kangaroo, found near Queens Rd Lawson and a rock hands-painting from a site north of Hazelbrook (not in picture).

To the right of the Hazelbrook Station image is, the first Hazelbrook service station, in snow, late 1920s; and Carl and Emma Liebrand working on their Oaklands Farm, around 1900.

This is all set against a backdrop of bushfires, a constant preoccupation of local residents.

Funded by the state government and local councillors, resourced by the Hazelbrook Association members, and guided by local artist Michael Lynn, young people designed and painted the mural. *Photograph by John Leary, OAM August 2011*

THE GENTLE ART OF PREPARING GRANT APPLICATIONS

A practical guide to the planning and completion of heritage grant applications and how to avoid some of the pitfalls. Plus dealing with what comes next.

A free seminar to be given by Barrie Reynolds, BMACHO's grants officer

Tuesday, 4 October, 2011, from 10 am to 12.30. Refreshments.

Location: Blue Mountains Historical Society, Hobby's Reach, 99-101 Blaxland Road Wentworth Falls.

Prior registration essential.

Further information and registration:
Phone/email Barrie Reynolds, 4757 4725
barrie.r@bigpond.net.au

RAHS HAS NEW CEO

THE ROYAL Australian Historical Society (RAHS) has a new CEO, Maria Walsh

President of the RAHS, Professor David Carment said, "Ms Walsh's appointment follows the 2010 RAHS Organisational Review.

"With a wealth of experience in both the not-for-profit and corporate sectors, Maria brings to the society the leadership skills to take us into the next phase of our development."

"I am honoured to have been appointed to lead this truly magnificent and unique organisation," said Maria Walsh.

"I have worked with national volunteer-based organisations and I pay tribute to the passion and community spirit of the 33,000 volunteers who work tirelessly for the benefit of the RAHS' association members."

A gift to the horses of Lawson

By John Low

THERE ARE SEVERAL early photographs of Douglass Square in Lawson where the shops and the Blue Mountain Hotel are prominently depicted.

My eye, nevertheless, is always drawn to the centre foreground where a horse hitched to a cart is drinking from a water trough at the edge of a grass plot near the intersection of Honour Avenue and the Western Road.

The trough was handed over to the town at a small ceremony in early December 1921 by prominent Lawson resident and former Lord Mayor of Sydney, RD Meagher.

He was standing in for his wife, Alice, who had initiated and funded the project but was too ill to attend.

The central place occupied by the horse trough in these photographs underscores the important function it performed in the community at the time.

In the years following World War I, working horses were still an everyday sight on the streets of our cities and towns and their welfare remained an object of a compassionate concern that had begun in earnest with the establishment of the NSW Society for the Prevention of Cruelty to Animals* in 1873.

An important component of this concern had always been the provision of appropriate watering facilities.

While city and municipal authorities were lobbied regularly and offered practical advice and designs, the society also solicited contributions from its own supporters to finance the erection of troughs and encouraged its more affluent members to personally donate horse troughs in their local areas.

Even as late as 1919 the society was still reporting in its annual report that “much remains to be done”. Its pleas found a responsive benefactor in Mrs RD Meagher.

The Lawson horse trough. Photograph by John Low 2007

Alice Maude Osmond was born in New Zealand ca.1862 to Mary (nee Marsh) and John Osmond, a brewery manager.

She appears to have crossed the Tasman in the late 1880s and may have been the Miss A Osmond who ran a tobacconist business in Hunter Street, Sydney, during the years 1889 to 1891, though this has not been confirmed.

On January 26, 1891, aged 29, she married a young (25) Bathurst-born solicitor, Richard Denis Meagher, at St Francis Church, Paddington. The couple established their home, ‘Fernleigh’, in Bennett Street, Bondi.

RD Meagher, a devout Irish Catholic with political ambitions and a flair for flowery and sometimes caustic oratory, was by this time already an identity around town.

Employed in the legal firm of another pugnacious Irish Catholic, William ‘Paddy’ Crick, he became a partner in 1892 and won a seat in parliament in 1895.

Life for the wife of this ‘colourful’ figure was never going to be easy and in the ensuing years she weathered a number of very public storms blown up by the “cantankerous” nature of her husband’s temperament.

In the early years of their marriage, Meagher’s flawed handling of the defence of George Dean, a ferry boat captain accused of poisoning his wife, dragged them into financial ruin and public humiliation when, in 1896, he was charged with conspiracy, struck off the roll of solicitors and forced to resign his seat in parliament.

Then, in 1898, as he was just beginning to re-establish his political career, he took offence at a comment by the even more ‘colourful’ John Norton, editor of the *Truth* newspaper.

Armed with a greenhide whip, Meagher ambushed the hapless editor at lunch time in Pitt Street and proceeded to thrash him severely.

Norton took refuge behind a lamp post, drew his revolver and fired at the fleeing politician who leapt into a passing cab and escaped.

The episode caused a sensation and Alice, already a veteran of defending her house from besieging journalists, must have despaired of ever leading a normal life.

Meagher, nevertheless, escaped gaol again and continued to rebuild a career which, in subsequent years, followed a long trajectory of service in both local government, the NSW State Parliament and, though not reinstated to the roll of solicitors until 1920, the law.

...escaped gaol again to rebuild a career in politics...

Throughout this very public life their marriage remained solid, resting clearly upon a strong foundation of mutual devotion.

Added to the worries of her husband's occasional public transgressions, Alice's health had always been fragile.

Despite this, she played her part in public life with enthusiasm and commitment.

During the time her husband served as Sydney's first Labor Lord Mayor (1916-17) she opened the new

Lord Mayoress of Sydney, Mrs RD Meagher ca 1917 Portrait courtesy City of Sydney Archives

Anzac Parade (1917) and her name is inscribed on the memorial obelisk.

As lady mayoress **s**he supported her husband's efforts to raise men and money for the war and, when a transport strike erupted during the second year of his term, embarked upon a tireless fund-raising campaign to relieve the distress of the strikers' families.

In 1920, hoping that his wife might benefit from the upland climate and clean mountain air, Richard Meagher purchased 'Yarrowee', a substantial sandstone cottage on 5 acres of land fronting the Western Road at Lawson.

They renamed their new country home 'Durham Lodge' and even here, though increasingly an invalid, Alice's social conscience found further expression.

Few passing swagmen, tramping the Western Road in search of work, left her door empty-handed. Also, as a life member of the NSW SPCA, she soon spotted the absence of a community horse trough.

In August 1921 she approached the Blue Mountains Shire Council with an offer to cover the cost of a water trough for the horses of Lawson.

Council agreed and instructed its engineer to prepare an appropriate design. By December it had been erected and, following the small dedication ceremony already mentioned, became operational.

Uncommented upon but common to many troughs of the period, it also seems to have incorporated a lower basin to satisfy the thirst of the local dogs.

At both ends marble plaques bearing the following inscription were attached:

"For the Dumb Friends of Man
Presented to the
Blue Mountains Shire Council
By Mrs. R. D. Meagher
Lawson – 1921"

Alice Meagher died just over two years later, on the evening of Wednesday April 9, 1924 at the Lewisham Private Hospital. Her funeral was held at the Church of Mary Immaculate, Waverley, on the following Friday afternoon and she was buried in Waverley Cemetery.

Both Alice and Richard Meagher were devout Catholics and, having no children, made plans to use their property for the benefit of their religion.

Alice especially wanted part of their land at Lawson to become the site for a new Catholic Church and hoped that ultimately 'Durham Lodge' would go to the Franciscans.

While the latter was not to be, following her death her husband purchased the neighbouring property, donated both it and 'Durham Lodge' to the church, and helped finance the building of a substantial church dedicated to Our Lady of the Nativity.

The new church was consecrated on April 7, 1929 and stands as a memorial to the life of Alice Meagher, "a good citizen, philanthropist and an ever-willing worker in all public causes".

Her horse trough was later moved to the eastern side of Honour Avenue and may soon, I understand, be relocated again as part of the current refurbishment of Douglass Square.

Hopefully, it too will stand for many years to come as a further, if more humble, memorial to her compassion and concern for animals.

Rail Museum needs volunteers

VOLUNTEERS ARE REQUIRED to work in the Valley Heights Locomotive Heritage Depot Museum Shop. Some experience with cash handling, catering, food handling or customer service would be an advantage but is not essential.

All training will be provided.

The role involves ticket sales to customers, retail sales of the museum's range of souvenirs and memorabilia, as well as refreshments including tea/coffee and light snacks.

The museum is looking for diligent and reliable people with a friendly outgoing nature who like dealing with people.

The museum is open on the second and fourth Sundays of each month, as well as additional Sundays during public holidays from 10am to 4pm.

Volunteers working in the shop would be expected to be available from 8.30am to approximately 4.30pm on open days. You will be expected to be available to be rostered every 2nd or 3rd open day.

Anyone interested in this voluntary opportunity should, Steve Corrigan on 4759 1980 or sjc_alco@pnc.com.au

Land records workshop

A LAND RECORDS workshop will be conducted on Sunday, October 16, 2011 for members of BMACHO.

The workshop will be held at the Blue Mountains Historical Society Hobby's Reach Research Rooms, 99-101 Blaxland Road, Wentworth Falls commencing at 1.30 pm to 2.30 pm (approx presentation time).

Digital technology has revolutionised the way historians can research land.

It is now possible to find cadastral information online for any piece of land in NSW, and to trace its ownership, at least under Torrens Title, via the web.

Within the next four years, Old System Title records, as well as the vast resources of the Lands Department, maps, plans and survey records, will also be available on the internet.

Libraries and archives too, led by the National Library of Australia, have active map digitisation programs.

The Royal Australian Historical Society has designed a workshop for local and family historians to demonstrate how to find these resources and use them in research.

A benefactor who believes in the importance of community history has generously supported the workshop, and this donation has allowed the RAHS to run the workshop for historians and members of its affiliated societies in locations across NSW.

The presenter for this workshop, Lesley Muir is a librarian, and senior vice-president of the Royal Australian Historical Society, with thirty years' experience in land research.

She has a PhD in historical geography from the University of Sydney; her thesis, *Shady Acres: Politicians, Developers and the Design of Sydney's Public Transport System 1873-1895*, was about the growth of Sydney and its suburbs in the late Victorian era.

Admission to the workshop will be by gold coin donation to Blue Mountains Historical Society. Afternoon tea will be provided, at participants expense, $3 or $5, by members of BMHS

The presentation on USB stick can be purchased for the price of the USB stick, on the day and then societies or organisation can practice at their own leisure.

Those wishing to attend, should contact Jan Koperberg by phoning 02 4754 1544 or email bmacho.heritage@gmail.com

Governor appoints French exile as ambassador to king of the mountains

PROLOGUE. When I set out to write this piece about Francis Louis Barrallier who explored the Blue Mountains some 11 years before the three explorers who have been credited with the being the first Europeans to cross the Blue Mountains, I started by researching his Journal.

Barrallier's Journal although detailed in many places was for me tantalisingly ambiguous. I turned then to Andy Macqueen's *The life and journeys of Barrallier* only to be totally absorbed in the delightful style of this Blue Mountain's historian and narrator. So much so, that some of which follows is direct quotes from his book.

The fascination surrounding Barrallier has been heightened by the fact that his Blue Mountains route lay in country which is still wild today.[1] Much of it is now of course, the Blue Mountains World Heritage site.

Having bushwalked this country from the Nattai across to Yeranderie well before the Warragamba Dam was built isolating this silver mining village, then down into the swift flowing Kowmung's pebble strewn bed to camp overnight at its junction with Christys Creek, on to the tumbling Johnston Falls and finally to view the splendour of the sandstone Kanangra Walls from the valley floor; like Andy Macqueen, I too have encountered the spirit of the Mountain King albeit some 148 years later than Barrallier.

... John Leary OAM

A FRENCH FUGITIVE from the early days of the notorious career of Napoleon Bonaparte, who went on to create over two decades of turmoil in Europe, Francis Louis Barrallier (1773-1853) was to make his mark in Australian history in the short, 34 months he was in the colony.

Barrallier was to explore several areas of the colony, but it is his trek into the Blue Mountains, from the south near the Nattai River some 11 years before the three explorers who are credited with being the first Europeans to cross the Blue Mountains, which has created most interest.

He didn't succeed in crossing the Blue Mountains, but nor did others and when it was eventually done it was by a far easier route than that chosen for Barrallier's exploration.

Francois Barrallier was the son of a French naval surveyor, presumably with royalist sympathies who after the capture of Toulon, an important Mediterranean strategic naval base, in 1793 was evacuated with his father and two brothers, Joseph and Peter.

He and his brothers were off-loaded in Italy. However, his father soon found employment with the British Navy as a surveyor.

Francis was not at first so lucky as his father, but his father appears to have had connections with the English aristocracy which led to the then 26 year old, Francis being able to travel in late1799 to the fledgling colony of New South Wales with the newly appointed governor, Phillip Gidley King.

Barrallier arrived in Port Jackson on board the whaler *Speedy* on April 15, 1800 a mere 12 years after the colony was first founded then the New South Wales Corps (aka The Rum Corps) had assumed an influential role in the administration of the colony.

The Anglo-Spanish fleet entering Toulon in 1793

It had been formed in England in 1789 as a permanent regiment to relieve the marines who had accompanied the First Fleet to Australia.

Because of the remoteness and unpopularity of the posting they were composed of officers on half pay, troublemakers, soldiers paroled from military prisons and those with few prospects, who were gambling on making a life for themselves in the new colony.

Many were incompetent or corrupt and most seem to have been involved in private dealings.These same officers were to serve as magistrates.[2]

At the heart of the problem was the notorious rum trade and Governor Hunter who was in office when Barrallier arrived, was finding himself powerless to control the situation which deteriorated further under the new governor, King.

This was the climate to which Barrallier who spoke little or no English arrived.

In July, 1800 because of the lack of commissioned officers available for duty, the governor appointed Barrallier an ensign in the New South Wales Corps, 'until His Majesty's pleasure be known'.

Continued from page 7
According to Andy Macqueen's research despite the privileges, Barrallier did not like being in the army.

Clearly he thought he had better things to do with his life than put up with the types of men who dominated the military.

Perhaps he was too proud and arrogant for them; more likely, as a loner, he simply did not want to fit in with the military culture.[3]

Barrallier soon began to make a name for himself as an explorer, in March 1801 accompanying Lieutenant James Grant on the *Lady Nelson* to further explore Bass Strait.

He was responsible for charting Western Port the large tidal bay in south eastern Victoria.

The bay opening into Bass Strait was first seen by George Bass in 1798 mapping the coast between Wilson's Promontory and Western Port.

In June a voyage with Grant was made to the Hunter River, where Barrallier made a survey of Coal River (Newcastle).

Within a further two months the governor appointed him acting engineer and artillery officer in place of Captain Edward Abbot who had resigned.

His duties involved the maintenance and improvement of Sydney's defences.

He designed the citadel, Fort Phillip, which King planned to build on the highest windmill hill in Sydney.

There had been several recorded attempts by Europeans to cross the Blue Mountains in the 14 years before Barrallier came along, the earliest being by Lieutenant Dawes in 1789 who had got as far as Mount Twiss near Linden.

In 1793 Colonel Paterson had tried to sail up the Grose River but was stopped by boulder strewn rapids. Hacking, in 1794 was reported to have penetrated 'further than anyone before'.

Kanangra Walls. Had Barrallier followed available ridge routes from the Kowmung River, he could have reached here and gone on to cross the mountains near Jenolan Caves and Oberon. Photograph courtesy James Lamb 2002

In 1795 Everingham, Ramsay and Reid may have reached Mount Irvine.

'...their supposed easy road to China did not exist.'

From the south in 1796 Bass seems to have tackled the mountains in the same general direction as Barrallier.

The emancipated convict Wilson made two trips in 1798 towards Goulburn.

These were ordered by Governor Hunter who wanted to prove to some troublesome Irish convicts that their supposed easy road to China did not exist.[4]

Next came Barrallier who Governor King had originally planned to send into the mountains in March 1802, but the journey was deferred because of wet weather.

Barrallier actually made two expeditions to the mountains.

The first was a reconnaissance for the main expedition and took place in September or early October 1802.

He with six or seven European men, two Aborigines and two horses appear to have set off from Richmond.

He headed southward up the Nepean River valley, presumably looking for an obvious break in the mountains.

Eventually, after travelling more than 50 kilometres, he turned westward, crossing the Razorback range between Camden and Picton.

He then discovered the Nattai River before returning by a more direct route to Parramatta.

He decided that the depot for his main expedition should be located at a place called 'Nattai', some 13 kilometres from Picton.[5]

About this time disputes between King and the New South Wales Corps caused Colonel William Paterson to demand Barrallier's return to regimental duty and in deference to Paterson's protest, the governor relieved Barrallier of his extra-regimental duties on October 8, 1802.

However, ten days after ordering Barrallier back to the regiment, King appointed him his aide-de-camp, and so made it possible for him to be sent exploring again.

Continued from page 8
For some reason, perhaps to tweak the noses of the New South Wales Corps, in order to get his way King resorted to a rather comical subterfuge: he pulled rank on Paterson, claimed Barrallier as his aide-de-camp and 'sent him on an embassy to the King of the Mountains' although the governor clearly had the objective of finding a crossing.[6]

Barrallier's second expedition left Parramatta on November 4, 1802 with a wagon drawn by two bullocks, which was to take supplies as far as the Nattai depot the site selected on the previous expedition.

The party comprised Barrallier, four soldiers, five convicts and the Aborigine Gogy with his wife and child. Gogy was the best known of the Dharawal.

He had been outlawed from his clan for killing and had taken refuge with Goondel's family. Goondel's hospitality did not incur long lasting gratitude.

Gogy and three of his people caught a woman from Goondel's clan near Nattai, tied her to a tree and killed her, removing some flesh.[7]

Later there may have been as many as 20 at the depot and it is to Barrallier's credit that there was no uprisings, desertions or serious incidents other than that which involved Gogy's wife.[8]

Their route took them past the site of Campbelltown (to be named by Governor Macquarie in honour of his wife's maiden name) then crossing the Nepean River near Menangle.

Skirting the Razorback Range they passed Picton arriving at the depot on November 9.

En route they encountered Aborigines who had never before seen white men and expressed fear and astonishment at Barrallier and his wagon with wheels.[9]

At the depot several bark huts had been constructed with the assistance of the Aborigines.

As the party travelled without tents bark huts were used for shelter on most every day during the expedition.

From the depot, Barrallier made three separate excursions down to the Nattai River which was followed to the junction of the Wollondilly River.

On the first of these excursions he met up with a party of Aborigines, including the tribal chief Goondel.

Barrallier recorded day-to-day life of Aboriginals

He had hoped to obtain advice about the route across the mountains from one of the chief's men but a quarrel developed between Gogy and Goondel's people, apparently because of Gogy's earlier involvement in the murder of a woman from Goondel's tribe.

Barrallier valued Gogy's service highly so they returned to the depot without the advice he hoped to have gained.

Barrallier's second excursion left from the depot on November 22, took 12 days and was his most significant.

This time the party consisted of Barrallier, five of his men and two young Aborigines Badbury and Le Tonsure. The latter so-named by Barrallier because of the hairless patch on his head, when his mother dropped him in a fire when he was a baby.

By the fourth night out from the depot the party thought they were virtually through the mountains but they were soon to be disillusioned.

On the fifth night out they camped nearby to the junction of the Kowmung and Christys Creek.[10]

The spot represents a favourite camp site of the more intrepid bushwalkers of today, as the Kowmung River remains one of the few virtually pristine rivers in the Sydney region.

On the morning of November 27, Barrallier sent two men up one of the adjoining mountains; on their return they reported that it was hopeless to follow the ridges as all that could be seen were separate and unjoined mountains.

Had the party climbed Joalah Mountain, on the other side of Christys Creek and followed the Boyd Range — or indeed had they followed the Bullhead Ridge on which the men stood, a viable route would have been found.

They continued on to follow Christys Creek to Wheengee Whungee Creek which they then negotiated until they reached what is now Johnston Falls which Barrallier inspected and decided they were impassable.

Returning to the Kowmung, they camped the night returning to the Nattai depot 5 days later.

And so Barrallier and his party had reached a point further west than Blaxland, Wentworth and Lawson would do almost 11 years later.

Andy Macqueen in his book, *The life and journeys of Barrallier 1773-1853* observes; 'Perhaps, Barrallier's journal has been more noted for its extensive and detailed observations of the Aborigines who accompanied him or whom he met, than for its description of the route.

'Barrallier's writing is quoted or referred to in a variety of works concerning the Aboriginal culture of the region.'

Continued from page 10

‘Apart from numerous colourful descriptions of the day-to-day life of the Aborigines, such as in hunting and food gathering , he has much to say about their behaviour and character.

‘A prime subject for this is his assistant Gogy, who in the end proved much trouble to Barrallier.

‘Firstly, there was the episode in which Gogy became terrified of the chief Goondel and his men, apparently because Gogy had previously been involved in the murder of a woman from Goondel’s tribe — possibly Goondel’s own sister.

‘In order to appease Gogy [Barrallier] was forced to terminate the first excursion.

‘Later, Gogy went into a lengthy rage in the belief that one of Barrallier’s men had seduced his wife.

‘Gogy clubbed his wife severely, at one stage knocking her out and speared her in the thighs. This whole episode makes appalling reading.’

There is no reason to doubt the veracity of Barrallier’s description of such events.

He simply recorded them honestly in the same way he recorded his fear of the cliffs or the nature of the vegetation. But he was clearly fascinated and shocked. [11]

Macqueen’s view of Barrallier as an observer is shared by Ross Brownscombe in his book, *On Suspect Terrain* where he writes about the extensive descriptions by Barrallier of the Australians of the Nattai and Wollondilly Rivers.

‘These were made at a time when the indigenous owners of what would later become known as the Cumberland Plain and Burragorang Valley were on the cusp of oblivion, in the fading years of their mastery of the region.

‘What Barrallier captures is the epitaph of a proud people not yet corrupted, not yet pathetic, still immersed in the normal rhythms of their culture.’

‘His journal is unique in the annals of early Australian exploration in that the land he explores is inhabited, occupied by people using its productions, manipulating the environment and he takes the trouble to distinguish them, to give each an individuality, with physical [the Aborigine Le Tonsure] and psychological idiosyncrasies and characteristics.’[12]

Barrallier might not have found a way over the mountains for King but in Macqueen’s belief, Barrallier went to see the King of the Mountains.

...epitaph of a proud people...

An Aboriginal mia mia [bark hut] and encampment by an unknown artist. *The above drawing and the one on the preceding page appeared in ‘Historic Blue Mountains 1813-1938’ published by the Blue Mountains Shire Council.*

In a sense he found him. He found that spirit of the earth which conjured up dreadful barriers and hardships, but at the same time tantalized him with glimpses of beauty and mystery. Untouched by “civilized man”.

Barrallier was to fall out with Governor King and left the colony on May 17 or 18, 1803, the colony having been in some turmoil in the months after Barrallier’s return from the Blue Mountains.

King had fallen out with the senior officers of the Corps and had been subjected to a campaign of slander.

Even though the British were no longer at war with the French there were many who believed all Frenchmen in the colony were spies.

Barrallier had continued to be King’s aide-de-camp while still being an officer of the Corps and so Barrallier somehow became involved in one of King’s many crises.

Whatever the real circumstances concerning Barrallier’s resignation from the Corps it seems he was treated unjustly.

He returned to England and three years later at the age of 33 set sail for the West Indies where he remained for 11 years.

In May 1805, he was appointed a lieutenant in the 90th Regiment, and served at St Vincent in 1806, where he improved the defences.

In 1809 he became a captain in the 101st Regiment, and as assistant engineer was present at the capture of Martinique.

He was appointed aide-de-camp to the commander-in-chief in 1809.

He participated in the invasion of Guadeloupe in 1810, and in 1812 was ordered to make a military map of Barbados, which took him five years to complete.

In 1813 he was appointed deputy assistant quartermaster general under Sir James Leith, next year he was present at the second attack on Guadeloupe, which led to its capture, and then was appointed surveyor-general of Guadeloupe.

Valley Heights rail depot centenary

THE VALLEY HEIGHTS locomotive depot will be 100 years old in December 2013.

Already a centenary committee of the Blue Mountains Division, NSW Rail Transport Museum is planning celebrations which will run through from December 2013 until July 2014.

It is proposed that a series of day events will run over the 8 months period.

The events being scheduled include a number of train visits from fellow heritage operators running tours to Valley Heights, opportunities to operate shuttle services for locals, Lapstone Zig Zag walks, model railway exhibition, railway film weekend, to name a few.

Celebrations will 'officially' kick off in January 2014 when dignitaries will be invited to officially open the museum. The committee has set dates for these events which will be subject to funding.

To engage the interest of local and corporate businesses the committee is working on a business plan to sell the attractions of the museum, the historical significance of the locomotive depot and the centenary events.

The Roundhouse closed as an operating depot in 1988 and a dedicated membership has maintained this heritage property.

Valley Heights depot circa 1950s

Barrallier died aged 80

Continued from page 10

In 1817 he returned to London and, after various periods of service in the 33rd Regiment and 25th Light Dragoons on and off half-pay, he became a brevet major in 1830 and a brevet lieutenant-colonel in 1846.

On July 31, 1819 he had married Isobel Skyrme at St Mary's, Lambeth, Surrey. He died on June 11, 1853 at his home in London, at the age of 80.[13]

The brief commentary of this article acknowledges the plotting of Barrallier's exploration by RH Cambage, R Else-Mitchell, Ernest Moxley, Alan EJ Andrews, Chris Cunningham and Ross Brownscombe.

Although there is much speculation most of it having been tested on the ground as to the exact route of Barrallier's trips, I particularly acknowledge the veracity of the conclusions Andy Macqueen has arrived at in his text, *Blue Mountains to Bridgetown. The life and journeys of Barrallier 1773 – 1853.* I appreciate and thank Andy for his assistance in, as he puts it, 'giving the Barrallier story another dusting off.' Unfortunately his book is out of print and no longer available for purchase.

I also thank Jan Koperberg for her continued assistance in sourcing images from the NSW State Library, the National Library of Australia and elsewhere.

Miles Franklin, her life and legacy

PROFESSOR JILL ROE the guest speaker at the October 1 meeting of the Blue Mountains Historical Society has chosen as her subject, Miles Franklin, Her Life and Legacy

Professor Roe is a leading authority on the life and work of Miles Franklin.

In this talk, scheduled to commence at 10am, she will present highlights of Miles Franklin's adventurous life and offer an outline of her legacies, with particular reference to the Miles Franklin Literary Award, by now Australia's most illustrious (and sometimes contentious) literary prize.

Jill Roe's prize-winning biography, *Stella Miles Franklin: A Life,* is now available in paperback and as an e-book and she has recently published a new edition of *My Congenials: Miles Franklin and Friends in Letters.*

For further information contact Susan Warmbath, 4757 3402 or John Low, 4782 3751

Former Governor who visited Springwood for golf 'outed' and banished

by Pamela Smith

WHAT DO EVELYN WAUGH'S novel *Brideshead Revisited;* the Honorable William Lygon, 7th Earl Beauchamp (Governor of New South Wales 1899-1901), and Hugh D McIntosh (the controversial boxing promoter/entrepreneur and parliamentarian) have in common.

More precisely, what have they to do with Springwood? An article in the *Nepean Times* provided a clue.

On March 11, 1933 the *Nepean Times* related how, on Saturday February 25, the Right Honorable. Earl Beauchamp KC drove the first ball when he conducted the official opening of the *Bon Accord Golf Links* at Springwood.[1]

Among the well-heeled guests were locals Dr and Mrs Baxter, Percy Dawson, David Rogalsky and the Blue Mountains shire president, Councillor Percy Wilson.[2] Other guests included Hugh Lygon (Beauchamp's son), the well known Macquarie Street specialist, Dr. Sydney Jones and wife and Mrs. White who was the sister of Sir Daniel Levy.[3]

It had been barely two years since William Lygon, who, in his bachelor days served as the Governor of NSW, had been outed and banished from England because of his homosexual inclinations.

Jane Mulvagh suggested, in recent years, in an article entitled *The Scandal that shook Brideshead*, that Evelyn Waugh used William Lygon as his model for 'Lord Marchmain' and son Hugo as the model for 'Sebastian.'[4] Mulvagh stated the Lygons - who provided the inspiration for the 'doomed aristocratic family in Waugh's novel' – put up a united front (except for his wife) when William was outed in June 1931.[5]

William had married Lady Lettice Mary Elizabeth Grosvenor in 1902, the daughter of Earl Grosvenor and accounts of his life, despite his sexual proclivities, credit William with being a loving husband and a devoted father to his seven children.[6]

Nevertheless, fearing the outcome of the scandal on his friend, King George entrusted Lord Stanmore and two other Knights of the Garter, with the task of presenting William with very limited options.

He was advised to resign from all his official posts and leave England immediately because if he remained the assured alternative would have been imminent arrest, a trial in the House of Lords and certain imprisonment. Homosexuality was still a criminal offence.

William did consider suicide but eventually fled to Wiesbaden where he was convinced by members of his family to put all thoughts of ending his life aside.[7]

Bon Accord where the former NSW governor officially opened the golf links

Lord Beauchamp as Governor of NSW in 1899. Drawing by Leslie Ward

Sadly, William thought that his exile would be short-lived, but David Dutton observed that in the years that followed William lived a 'somewhat pathetic peripatetic existence.'[8]

Evelyn Waugh - an Oxford friend to one of William's sons - arrived at *Madresfield* shortly after his departure and later immortalised the Lygons in the novel *Brideshead Revisited.*[9]

It would seem that William's outing had been a long time coming however, and interestingly Mulvagh blamed Australia for his final 'undoing.'

His sexual tendencies became common knowledge when he visited in August 1930, as part of a round-the-world trip.[10]

Accompanying William was a servant from *Madresfield* and Robert Bernays - a young Liberal MP - who acted as his speechwriter both said to be his current favourites.

Continued page 13

Continued from page 12
Unfortunately, William's 'varied sex-life' was reported back to his brother-in-law, the Duke of Westminster, who then passed the news on to the King.

Mulvagh suggested however, that Beauchamp's indiscretions had not gone un-noticed even during his tenure as Governor of New South Wales.

The poet Victor J Daley once described an evening at Government House where 'the most striking feature of the vice-regal ménage' was the youthfulness of its members.[11]

Dutton observed that William bestowed his patronage on local artists and writers during his time as governor which accounted for his friendship with people like Daley and Henry Lawson.[12]

As the *Nepean Times* article suggests, Beauchamp's exile eventually returned him to Sydney in 1933, and it is a little known fact that it was he who performed the official opening of *Bon Accord Golf Links.*[13]

The lessee of the *Bon Accord* property at that time was the ever controversial Hugh D McIntosh who is perhaps better known as 'Huge Deal McIntosh.'[14]

McIntosh established a nine-hole golf course on the property, perhaps to enhance the attraction of *Bon Accord Guest House.*

Percy Dawson and his brothers were the owners of the *Bon Accord* property, located on Hawkesbury Road, Springwood which added to their other property investments which included a chain of international jewellery shops, the Strand Arcade and Ambassadors restaurant and night club.[15]

Frank Van Straten has written extensively about Hugh McIntosh who dabbled in boxing and bicycle race promotion, politics, theatre productions and newspapers in Australia, and a chain of milk bars in England.

In 1923, convinced he would spend the rest of his life in England, McIntosh leased *Broome Park*, the 17th century home of the late Earl Kitchener, and extravagantly re-laid its cricket pitch with soil from Bulli in New South Wales.[16]

McIntosh was a remarkable man; he moved easily in political, high society and theatrical circles, and rubbed shoulders with people like HG Wells, Nellie Melba, Anna Pavlova and Oscar Ashe, and promoted artists like Roy Rene, (Mo), Ada Reeve and boxers like Jack Johnson and Tommy Burns.[17]

'...Governor's indiscretion not gone un-noticed...'

However, the narrative of his life illustrates that McIntosh swayed constantly between bankruptcy and times of incredible wealth.

In 1927, McIntosh sought damages from *Smith's Newspapers Limited* when Robert Clyde Packer was publisher.[18]

McIntosh wanted compensation for a headline that appeared in the *Daily Guardian* which read 'Mr HD McIntosh and how he met the Duke.'[19] It was obviously defamatory.

Even though the offending article has yet to be found it may have referred to the Duke and Duchess of York who visited Australia in 1927.

The *Daily Guardian* was part of Joynton Smith's newspaper empire.

In 1931, McIntosh was awarded a farthing damages in another libel case he actioned against the *Truth* because the tome referred to him as an 'erstwhile pie man who had blossomed into a newspaper magnate and drained the lifeblood from the *Sunday Times*.'[20]

He was well-known in Springwood; a one-time resident even remarked that the rafters of *Bon Accord* used to 'ring' in McIntosh's time.[21]

It was not at all uncommon for well-known actors and actresses to attend parties held in the ballroom of *Bon Accord* and Rose Lindsay, wife of Norman, was particularly fond of him and invited him to her soirees.[22]

Brideshead Revisited became a book and then a television drama, the still exiled William Lygon died in the Waldorf Astoria Hotel New York on November 15, 1938, and Hugh McIntosh was practically penniless again when he died at Golders Green (an area of London), in 1942.

Bon Accord Guest House burnt down in 1937 and *Bon Accord Golf Links* was absorbed into what presently exists in 1942 when the council purchased the property.

After his exile William Lygon spent a great deal of time in Australia. He owned an apartment at Darling Point and became the president of the Australian Sporting Club.[23]

It is obvious that the Blue Mountains was familiar to Lygon because Paula Byrne mentioned a trip made there by him and son Hugh.[24]

Hugh McIntosh (said to be a business associate of their father) was so well-known to the Lygon children that his name was used disparagingly among their inner circle of friends (like Waugh) as a private code for anything remotely 'boring.'[25]

The warrant for William Lygon's arrest was lifted temporarily to enable him to bury son Hugh when he died unexpectedly in 1936, and lifted permanently shortly before he died.

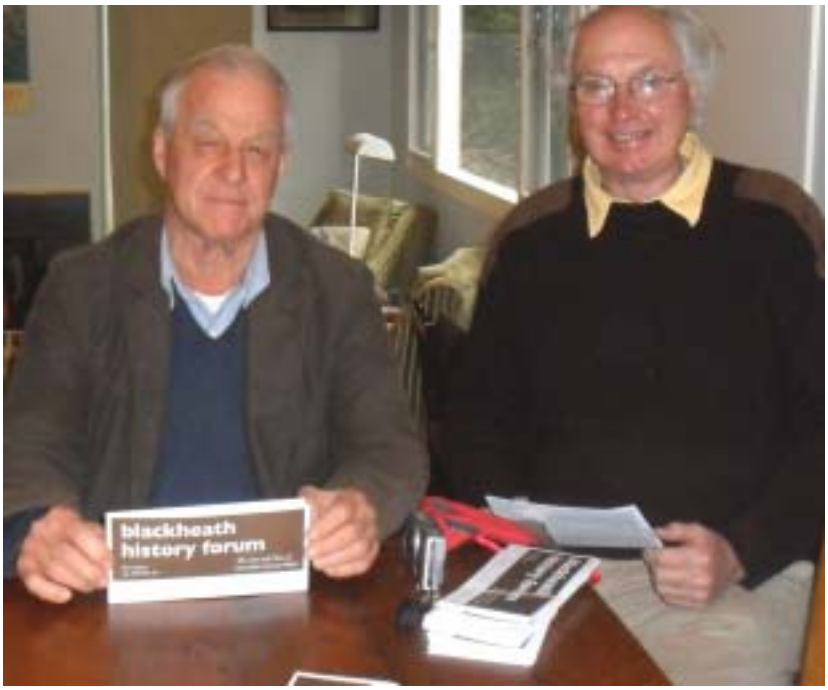
Keneally to speak at history forum

THOMAS KENEALLY will speak at the Blackheath History Forum on Saturday October, 22

Many will be familiar with his *Australians: Origins to Eureka.* In this lecture, he will focus on the forthcoming second volume of the series, advance copies of which should be available on the day.

Keneally will be the seventh and final speaker in this year's Forum season.

Lectures are being held at the Blackheath Primary School at 4pm every second Saturday afternoon, from July 30 to October 22.



Blackheath History forum chair Neal Bluett and committee person Robert O'Neill planning the launch of this year's season

Other speakers yet to come are Professor David Lowe (*Sir Percy Spender: foreign minister and diplomat)*; Professor Penny Russell (*Savage or Civilised? Manners in colonial Australia*); and Professor Stephen Foster (*Allan Macpherson: squatter, laird and parliamentarian*).

This is the third season of the Forum, which is open to anyone interested in understanding Australian history in both its national and global contexts.

Past speakers have included former premier Bob Carr, Dr Grace Karskens, Professor Henry Reynolds and Professor Robert O'Neill.

Entry is just $5, and refreshments are available from 3.30pm. For full details visit http://www.blackheathhistoryforum.org.au/images/stories/forum_2011.pdf

Former governor 'outed'

Welcome to new member

DR PETER RICKWOOD, the inaugural editor of the Blue Mountains History Journal and former president of Blue Mountains Historical Society has accepted an invitation to become an individual member of BMACHO.

Peter is a visiting senior research fellow at the School of Biological, Earth & Environmental Science at the University of NSW. He has been involved with volunteers throughout the region and earlier this year assisted Mary Reynolds of Mt Wilson when she produced a history of postal and telephone communications in Mt Wilson.
.
A more detailed profile of Peter will appear in the next edition of *HERITAGE*

Dr Peter Rickwood

Bouquets for *HERITAGE*

FROM TIME TO TIME *HERITAGE* receives accolades in the e-mail.

Here are just a few which seems to indicate that almost 3 years of publishing the association's 17 editions of newsletter has been positively received.

From **Angela le Sueur editor, NSW National Trust magazine** *Thank you so much for your latest issue of HERITAGE newsletter – and congratulations on achieving, yet again, such an informative, insightful and inspiring mix of articles.*

From **Ken Goodlet, historian/ author - Hazelbrook:** *Congratulations on a truly enlightening edition. I have written a history of Blue Mountains Grammar and of Hazelbrook and Woodford, of course, but there was information here I had not known. Thank you.*

From John Low, local historian: *Enjoyed the last issue you sent. Packed full of interesting material.*

From **Bill Evans, local historian and Cox's Road enthusiast:** *Congratulations John....you have "raised the bar" once again.*

From P**aul Cardow, Beyond Photographics, Wallerawang**: *Great newsletter. Keep up the good work. I just wanted to compliment the efforts of your team to put a newsletter together on a continuing basis. I also like the fact that a group of people are dedicated in linking the cultural heritage groups together.*

*I was alerted to your existence by the Discovery Team at National Parks (DECC), and that connection was from my interest at the time of some history of the Newnes railway. Yes I would like to be on the mailing list and I'll keep in touch***.**

From **Lynn Collins, Museums Advisor to Blue Mountains City Council and Lithgow City Council**: *From my observations, BMACHO successfully reaches people through the mountains and by listing the current state of thinking and actual planning of commemorative activities in the electronic periodical, it may succeed in fostering a rich, varied and coordinated event all along the track through to Bathurst in 2015 utilizing the enthusiasm and resources of numerous agencies making contact up and down the road.*

From **Pru Acton curator, Hawkesbury Regional Museum:** *Thanks very much, John and Nanette – very interesting and informative, as usual. I was particularly interested in your piece on George Evans, and thought you might be interested in the attached image, which is attributed to Evans and one we use a lot because it is a very early depiction of Windsor (1809). Hawkesbury Regional Museum is located (roughly) in the centre of the picture.*

From **Valerie and Frank Holland, Kurrajong-Comelroy Historical Society Inc**.: *Just a short note to thank you for your newsletter. I have just sent it out to all our members with e-mail.*

From **Jan Koperberg, president Blue Mountains Family History Society Inc.**: *I love your stories in the current HERITAGE newsletter about the "Katoomba Waltz", George William Evans and Rex Turner, BMGS pupil. Loved Peter Stanbury's article too - what a mystery!*

Naomi Parry has left Lithgow

NAOMI PARRY has left her position as Lithgow City Council's cultural development officer and manager of Eskbank House, to return to academia.

Naomi will be working for the Australian Catholic University as the NSW historical researcher on an innovative national project called, *Find and Connect.*

This is a federally funded project which aims to help former child migrants and people who grew up in out of home care (the Forgotten Australians) find information about their families.

Naomi says, "the decision to leave Lithgow City Council and Eskbank House was very difficult, but *Find and Connect* will make a real difference to the lives of people who grew up in child welfare systems in the 20th century.

"This is work I started with my PhD, *Such a Longing: Black and white children in welfare in NSW and Tasmania, 1880-1940*, which I completed at UNSW in 2007."

Naomi will continue to live in the Blue Mountains, and intends to take an active part in the heritage and history community.

Naomi has contributed several artciles to *HERITAGE* and all in the heritage sector wish her well

Her position as cultural development officer was advertised in August 2011 and is expected to be filled shortly.

An invitation is still open
to hear**,** Philip Hammon, from Scenic World Katoomba speak on

"Coal, Oil Shale, Engineers and Entrepreneurs"

Woodford Academy, Great Western Highway, Woodford

on Friday 2 September 2011 at 10.00 am

Woodford Academy book sale bonanza

GRAB some great novels or non fiction books - cheap prices at the Woodford Academy book sale bonanza to be held on Saturday and Sunday, September 17 and 18.

Also inspect the oldest set of buildings in the Blue Mountains, and enjoy a delicious Devonshire tea on the balcony. Saturday open 10am - 4pm and Sunday 12noon - 4pm.

Cost: $6 adult, $4 concession, $3 children. Contact: (02) 4758 7809.

Lacemaking demonstration

OPEN DAY AT WOODFORD Academy on Saturday, October 15 will feature a delightful display of hand made lace, with the lacemakers present who will demonstrate the craft.

There will also be a display of popular crazy tea cosies.

The lace display will finish at 2pm, but the house will stay open till 4pm. A delicious morning or afternoon tea may be enjoyed on the Balcony Tea Rooms.

Cost: $6 adults, $4 concession, Booking: (02) 4758 7809

Ted Mullet back on his feet

DEDICATED and long- serving chairman of Valley Heights Locomotive Depot and Museum, Ted Mullett is now back home recuperating after his second knee replacement.

His many friends will wish him a speedy recovery.

The silhouettes man

BACK IN FEBRUARY 2010, Joan Francis a member of the Blue Mountains Family History Society recalled in that organisation's newsletter *The Explorer's Tree,* her recollection as a teenager of a man who during Christmas school holidays had a booth at Echo Point, Katoomba cutting paper silhouette portraits.

'The portraits for clients mainly teenage girls (I was one of them) – who thought it was the 'in thing' to do.

'He could quickly cut out very life-like and reasonably priced silhouettes - two copies – one facing right one facing left. His work was very popular, but after a few years he just disappeared.

'Imagine my surprise when I saw him at the Royal Easter Show — not looking a day older and still cutting out silhouettes just as quickly and accurately as he did all those years ago!!!', Joan wrote

Thanks to the Royal Agricultural Society of NSW, *HERITAGE* is able to publish this image of Sebastian John Ross (April 24, 1919 - August 24, 2008)

Ross, was an American-born Australian artist and showman, famous for his miniature silhouette portraits cut in black card.

In 1948, Ross began to tour the circuit of agricultural shows as a silhouette artist, encouraged by the travelling showman and boxing entrepreneur, Jimmy Sharman.

He was to continue working at shows for the next 60 years, travelling as far as the Proserpine Show in Queensland.

From the 1950s until its closure in 1979, Ross also worked at Luna Park, Sydney, unless he was touring shows.

John Ross became a well-known identity on the show circuit, with generations of families taking their children to have their portraits cut out by him. In 2006 he was named an "Ekka Legend" at the Brisbane Exhibition and in 2007 was named a "Show Legend" at the Sydney Royal Easter Show.

He worked until the age of 89, and in that time created thousands of portraits, including those of many celebrities. He was sometimes referred to as "Scissors John".

Inspired by an artist he saw at Michigan State Fair, he trained with the silhouette artist Budd-Jack.

During World War 2, Ross served in the Philippines. He then came to Australia and served at Base Section 7 in Sydney, and as a staff sergeant managed the US driving pool, driving entertainment celebrities such as Bob Hope and Jack Benny.

In his search for good drivers, he employed a number of Australian women in the WAAAF, thus meeting Florence Phyllis Counsell (known as Phyllis). They married in February 1945.

They lived at Falcon Avenue, Hazelbrook, in the Blue Mountains, New South Wales. Ross and Phyllis had two sons, John Leyton Ross and Philip Ross.

Leading historian as keynote speaker for 2012 conference

DR SHIRLEY FITZGERALD former historian for City of Sydney Council, university lecturer, author and leading light in numerous heritage and history ventures has agreed to be the keynote speaker at the 2012 Blue Mountains history conference.

The conference being planned by the Blue Mountains Association of Cultural Heritage Organisations Inc. will be conducted in the heritage Carrington Hotel, Katoomba on Saturday, October 20, 2012.

Shirley writes about Sydney in a variety of formats, gives public lectures and regular historical chats on Sydney radio. She has taught in NSW schools, lectured at the University of New England and established the inaugural Master of Letters degree in Public History at the University of Sydney.

Until 2009 she was the city historian for the City of Sydney, delivering a program contributing to community understanding and involvement in it's history as well as undertaking historical research involving a wide range of products from pamphlets to film to research papers and published books.

Publications include *Rising Damp, Sydney 1870-1890*, Oxford University Press, 1987; *Sydney 1842-1992,* Hale & Iremonger, 1992, *Red Tape Gold Scissors: The Story of Sydney's Chinese,* State Library of NSW Press, 1997. (Chinese translation, 1998) and a series of histories of Sydney precincts - Chippendale, Surry Hills, Pyrmont, Millers Point - either as author or supervisor of the work.

The book *Rising Damp* establishes a detailed reconstruction of the urban environment, the state of public health, conditions of work and the chances of occupational mobility in late nineteenth century Sydney.

The conclusions arrived at were at odds with much of the perceived wisdom about colonial conditions.

Shirley Fitzgerald, BA Hons, PhD, Dip T.

This book is frequently cited in literature as having a significant impact on Australian historiography and on the development of Australian urban history.

She was instrumental in establishing the Dictionary of Sydney Project, a metropolitan wide, community based project which represents Sydney's history in electronic formats. She was the founding chair of it's Board of Trustees, 2006-9.

She has held a number of positions on history-related organisations, including president of the History Council of NSW, 1996-99 and trustee of the Historic Houses Trust of NSW 1996 -1998.

She received the Centenary of Federation Medal in 2003 for 'services to heritage', was made a life member of the History Council in 2004.

She is an honorary fellow of the Royal Australian Historical Society, has served as chairperson of the Board of State Records and is currently adjunct professor in the Faculty of Humanities and Social Sciences at the University of Technology, Sydney.

She is a graduate of the University of Adelaide and Macquarie University.

Vintage and Retro at Everglades

STEP BACK IN TIME at the Everglades Retro Fair to be held at Everglades Historic House and Gardens on November 5 and 6 .

Dance to the Sydney Youth Orchestra, sprawl on the green lawns while watching your kids play hopscotch or quoits, ladies can relish the fashions of the 30's and 40's while the men lust over polished vintage vehicles.

Play Croquet or enjoy a tour of the Art Deco home, wander through 8 acres of gardens. Find that perfect spot for a picnic.

Everyone is encouraged to dress the part - have a free retro face and hair makeover. Once you're done, you can learn to move and groove. All this and a lot more will be held at the National Trust property, Everglades.

To make a weekend of it, the Leura Golf Course will host the Woolworths Jazz on the Fairways featuring the George Washingmachine Quartet and the Blue Mountains Grammar School stage band. For more details www.nationaltrust.com.au or (02) 4784 1938.

Everglades open for Leura garden festival

UP TO 12 GARDENS will open to the public including the large private estate of 'The Braes' and the National Trust property Everglades during the Leura garden festival

The garden festival will be open from Saturday October 1 to Sunday 9.

Apart from Everglades the gardens featured in the festival are all privately owned properties and visitors have an exclusive opportunity to not only see a wide cross section of the very best gardens the region has to offer but also to interact with some of the garden owners, many of whom are present in their gardens during the days of the festival.

Garden enthusiasts who are planning new gardens or re-modeling existing one's always find

the festival is a fund of inspiring ideas.

Entry prices will be $20pp for a multiple entry ticket to all gardens, and $5pp for a single garden entry ticket. (Children with parents are admitted with no charge) Visa and MasterCard are accepted at festival HQ, Fitzroy Street Leura.

Multiple entry tickets may be used on any day or combination of days during the festival, and can be purchased at the entry to any garden. Bookings: 0431 095 279

1890s Tarella venue for Fuchsia Show

THE NSW FUCHSIA CLUB will be holding a wonderful show of their prize plants at historic Tarella, Blaxland Road, Wentworth Falls on Saturday, October 23 between 10am and 4pm.

There will be hundreds of young plants for sale with advice on how to get the best from growing them.

President of the Blue Mountains Historical Society, Graham Warmbath said, "Visitors should be early as the plants fly out the gate in the arms of eager buyers".

The 1890s cottage Tarella is open and there will be a display of historic photographs with the society's research officer being on hand to answer questions on people, places and events in the Blue Mountains.

This cottage was built by John McLaughlin, Sydney solicitor and Member of the Legislative Assembly, in 1890 as a holiday cottage for his family of four children to escape the heat of Sydney summers.

His daughter Beryl McLaughlin was the benefactor of the Blue Mountains Historical Society, leaving Tarella and the land to the Blue Mountains Historical Society on her death in 1988 just two months short of her 100th birthday.

The cottage contains an eclectic collection of memorabilia of the late 19th and early 20th centuries

Home-made refreshments will be available all day or picnic in the grounds.

Admission for adults is $5 and for children entry to the grounds is free with an 'I spy' competition to keep them amused with a small prize.

Meantime, The Open Garden Scheme has selected the grounds of Tarella as one of their gardens this year and it will be open for visits the weekend of October 29 and 30.

Home-made refreshments available all day or picnic in the grounds.

Admission is $6.

The 1890s cottage Tarella will be open on October 23, 29 and 30.

Methodist preachers also led Lithgow miners' union

By Ray Christison

IN RESEARCHING HISTORY of the development of the Western District Coal-Miners' Mutual Protective Association I quickly realised the very close connection between the Methodist churches and the union's leaders.

Many of those who led the development of the union were active in Lithgow's churches and a number were preachers or church leaders.

Methodists and Primitive Methodists held key leadership positions during the first two decades of the union.

The New South Wales Western Coalfield is bounded on the east by the Nepean River and extends northwest to well beyond Mudgee and Gulgong.

The western extremity of the field is located around Wellington and Dubbo.

During the 19th century and much of the 20th century coalmining activity was centred around the Lithgow Valley and the spine of the Great Dividing Range leading towards Rylstone.

Large-scale extraction of coal commenced after the construction of the Great Western Railway to Bowenfels in the late 1860s.

As the mines of the Western Coalfield developed men were drawn to the employment offered by the new collieries and shale mines.

Many came from the coalmining regions of Scotland, Northern England and Wales.

District and lodge officials taken with their banner before the 1900 Eight Hour Day procession. Photograph courtesy City of Greater Lithgow Mining Museum

Others came from Cornwall. As the gold mines of the Turon began to decline in the late 1870s, Cornish families were also drawn from these areas. Many of these migrants shared an adherence to the principles of Methodism.

Methodism developed in the 18th century as part of the evangelical revival movement encouraged by the preaching of John Wesley.

The evangelical doctrines of the movement, its reliance on the preaching of the word of God and its missionary zeal appealed to the workers struggling in the new industries fostered by the Industrial Revolution.

Primitive Methodism emerged from the Methodist movement from about 1810. The Primitve Methodists, or "ranters", became associated with many of the 19th century radical movements in Britain.

Methodism became quite popular among the coal and tin miners of England with numerous adherents in Cornwall, Wales and the North of England. Both sects placed a strong emphasis on preaching of the Bible and encouraged their members to take to the pulpit.

Like many 19th century evangelical sects they also organised Sabbath or Sunday Schools.

During the late 19th century Methodists and Primitive Methodists based in Lithgow played a pivotal role in the establishment and development of a mining union in the Western Coalfield.

The first union lodge was formed at the Vale of Clwydd Colliery in August 1878.

Thomas Druery, the first elected lodge president, was a member of a devout Methodist family from the River Tyne.

His father Robert, one of the heroes of the 1886 Lithgow Valley Colliery fire, was an active Methodist who worked in Lithgow's coalmines until he was well into his seventies.

He was remembered as one who "had taken a prominent part in the work of God in this place for many years" and "had worked faithfully for the cause of the kingdom of God".

Continued page 20

"A Light in the Vale. Development of the Lithgow District Miners' Mutual Protective Association 1875-1900"

Available from independent book retailers throughout Lithgow and the Blue Mountains. Also available at http://www.higround.com.au/higrpress.htm RRP $30.00

Miners' union leader and devout Methodist went on to be prime minister of Australia

Robert's other son Robert Ross was instrumental in the establishment of a union lodge at the Ironworks Tunnel Colliery in 1883.

Thomas and Robert Ross Druery were prime motivators for the establishment of a district union in February 1886. Robert Ross was elected the first president of the newly-formed Hartley District Miners' Mutual Protective Association.

In the following ten years the union was led by a succession of Methodists and Primitive Methodists.

Robert Ross Druery's successors Samuel Penna, William Teague and William Rickard were members of these churches.

William Rickard had commenced preaching in the Methodist church when he was 16 years old.

Joseph Cook, union general secretary between 1889 and 1891, was a devoted Primitive Methodist who gained popularity as a circuit preacher in the towns and villages around Lithgow.

Cook's popularity provided the foundation for his election as Labor MLA for the seat of Hartley in 1891.

During the Labor Loyalty Pledge disputes of 1893 and 1894 Cook retained the unswerving loyalty of his mining colleagues who continued to support his candidature in the face of pressure from the Central Labor Electoral League.

Cook was one of the preachers who railed against the manager of the Zig Zag Colliery who virtually forced miners to work on a Sunday in 1895. He used his oratory skills to highlight the desperation of the miners at a time of high unemployment.

The skills Cook acquired at the pulpit stood him in good stead as he fought political battles in the New South Wales Parliament in the 1890s. Cook went on to become prime minister of Australia in 1913.

The role of these men and their compatriots in the development of trade unionism in the Western Coalfield during the late 19th century is explored further in my book *A Light in the Vale. The development of the Lithgow District Miners' Mutual Protective Association 1875-1900*.

Waradah Goomeda exhibition at Mount Tomah

AN EXHIBITION titled Waradah Goomeda (Darug for Waratah Spirit) will be displayed at the Blue Mountains Botanical Garden, Mount Tomah between September 24 and October 9.

In partnership with Red Cockatoo Australia, this exhibition brings together Aboriginal artists including Chris Tobin, Leanne Tobin, Karen Maber, Dianne Ussher and Elly Chatfield from the Blue Mountains World Heritage region.

Image - Waratah by Chris Tobin

Waratah is a local Aboriginal word from the Darug language sometimes translated as "Beauty from afar". In this exhibition, individual artists share their Waratah stories creatively in painting and mixed media.

The dramatic Waratah is seen with different indigenous perspectives portrayed in brilliant colours.

Red Cockatoo Australia in partnership with the Blue Mountains Botanic Garden, Mount Tomah showcase their environmentally friendly range of Waratah gift cards, stories and Eco Waratah notepads by featured artists Chris Tobin, Karen Maber and Leanne Tobin.

Entry to the exhibition in the visitor's centre at the garden is free of charge 9.00am* to 5.00pm (*9.30am weekends)

To celebrate the state's floral emblem and inspire a love of waratahs in the wild, this year's program includes the state-wide waratah bloom competition, displays, growing advice, National Parks and Wildlife guided walk, waratah farm open day, information panels, school art competition and plant sales.

Enquiries: Phone 4567 3000 or visit www.mounttomahbotanicgarden.com.au/

Refreshments: Restaurant Tomah opens every day. Bookings recommended on 4567 2060

Blue Mountains Botanical Garden acknowledges the traditional custodians of this Blue Mountains region the Darug and Gundungurra people and their ancestors.

Waratahs in the wild. Photograph by John Leary, OAM

Defence sites heritage listed

THE SURVIVAL OF LITHGOW and the Blue Mountain's wartime history has been given priority with the highest level of State heritage protection.

A former railway tunnel and mustard gas storage facility in Glenbrook, the site of two former heavy anti-aircraft gun stations at South Bowenfels and Scenic Hill and a dummy gun station at Lithgow have all been added to the State Heritage Register.

Minister for Heritage, Robyn Parker, said the sites were part of a strategy to defend Australia in the event of an attack on home soil.

"By early 1942 the Japanese campaign was moving south and there was fear that Australia could be invaded.

One of the concerns was that the enemy could use chemical weapons as part of the attack.

Australia had seen the terrible injuries that soldiers had suffered when chemical weapons were first used in World War 1.

The military wanted to be able to protect Australia if chemical weapons were used against it during World War 2.

"The 1925 Geneva Protocol banned the use of chemical warfare for offensive purposes but it did give nations the ability to use chemical weapons to defend themselves if attacked," Ms Parker said.

A former railway tunnel in Glenbrook, constructed between 1891 and 1892 to bypass the Lapstone Zig Zag was chosen to store mustard gas, 3 other tunnels close to Sydney were also used for this purpose.

Glenbrook tunnel. Image courtesy Blue Mountains City Library - Local Studies Collection

Glenbrook tunnel construction 1910-1913. Image courtesy Blue Mountains City Library - Local Studies Collection

The first delivery of mustard gas to Glenbrook took place in August 1942; in 1946 the gas was removed from Glenbrook.

It is only in the last few years that the men who served there have been allowed to speak publicly about their experiences.

Two former heavy anti-aircraft gun stations and dummy gun station at South Bowenfels, Scenic Hill and Lithgow are the only known inland heavy anti-aircraft gun stations of their type in NSW.

"The gun stations were constructed to protect Lithgow's important mining, manufacturing and transport industries and the Lithgow small arms factory.

"Prior to December 1941 defence facilities were focused on the coast, however, the Military Command in NSW became concerned that enemy planes could reach some inland areas.

"Work on the gun stations, which included four gun emplacements and a command post, began in late 1941 and were completed in January 1942.

"From the air the dummy station looked like a real gun station and was aimed at confusing the enemy into bombing the wrong places.

The fake emplacements were constructed of materials such as piping and concrete.

"By January 1944 the threat of war on Australian soil had decreased, and the gun stations were abandoned soon after.

"Fortunately the defences at Lithgow and Glenbrook were not required.

"They are now part of Australia's wartime heritage and will be protected for future generations," Ms Parker said.

TOURISM AWARDS TO MEMBERS' STAFF

In the Blue Mountains, Lithgow and Oberon Tourism Awards of Excellence 2011, two BMACHO members' staff were recognised.

Lilianfels apprentice chef in the Darley Restaraunt, Tara Hellyer was chef apprentice of the year, while at Scenic World , Eric Jenkins was awarded employee of the year.

*Lilianfels and Scenic World are inaugural members of BMACHO

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or its really going to happen

THE recently appointed museums adviser to Lithgow and Blue Mountains City Councils, Lynn Collins (pictured) has picked up on uncertainty about planning for the Western Crossings commemorations and writes: 'At the excellent forum Naomi Parry arranged at Lithgow in May this year, there was a good buzz as people were clearly stimulated by the range of speakers and ideas. I was impressed.

'Yet on my travels subsequently, as I touch base with various mountains cultural agencies, I have been asked tentatively about exhibition development grants, how small artefact collections might be utilsed and what resources are available for participation in whatever is going to transpire along the road during the two years of festivities.

'No-one quite knows. People are talking about doing something, soon, maybe, depends...Time is slipping by.

'Commemoration plans were first discussed 6 or 7 years ago, but with just roughly 20 months to go, what's the itinerary of the mooted exhibition of key artifacts coming out of Sydney? Folks are asking; what are the councils doing; what plaques are being refurbished; which schools are having pageants of 19th century pioneers, what seminars are being held; is the new highway to be launched as a key event within the commemorations and what lasting things will come out of this occasion.

'I raised the issue with the editor of *HERITAGE* and proposed a small corner for a "running-sheet" of what folk from say, Penrith or Parramatta to Bathurst are thinking of doing, a very simple, organic, non-binding listing, cobbled together from community contributions sharing their aspirations, plans-to-date, modest or expansive.

'If folks through the mountains knew the Hartley people were arranging a walk program on The Road on such-and-such-a-day/s, they might consider tacking something appealing onto that, to capitalise on the promotional opportunities, the tourists, and the buzz.

'Or deferring their own conflicting activity, or actually attending the walk (if there was room), or offering to assist the Hartley initiative in some way....From my observation, no joint activities seem evident, following the positive atmosphere at Lithgow, 3 months ago, but here is the start of some exchanges, perhaps, wrote Lynn.'

HERITAGE editor, John Leary has said, the idea seems good so those organisations that have plans no matter how tentative are invited to e-mail them to johnanette@optusnet.com.au for publication on this page in subsequent editions.

Several years ago, BMACHO's management committee considered that it did not have the capacity or mandate to take on a co-ordinating role for events that were being considered as part of the commemoration.

At about this time the RAHS undertook to take a major co-ordinating role for the Western Crossing 1813-15 commemorations and Professor David Carment AM, (pictured above) then the senior vice president of the RAHS and now its president, accepted the role of co-ordinator.

The RAHS subsequently agreed to endorse the Western Crossing Committee as a sub committee of the RAHS providing it with a legal entity in which to work.

There have been a number of very well attended meetings of this committee throughout the region at which a wide range of interested bodies including historical societies and local government from Pernith, Blue Mountains, Hawkesbury, Lithgow, Oberon and Bathurst have been reprented by mayors and councillors.

David Carment reported to the last meeting of the committee that NSW Pemier Barry O'Farrell had been made aware of the committee's work and the possibility of funding may be addressed.

In the meantime, Joan Kent from the Hartley Valley 1813 Crossings Committee writes: 'Events and activities which will highlight the development of Hartley Valley community are being planned by a sub committee of Hartley District Progress Association.

The centre point is the planned opening of a number of private properties to enable the original routes across the Valley to be explored (under supervision) during May 2013 from the tracks down the Mt York escarpment to the vicinity of Mt Blaxland.

Other events being pursued include sculpture and art exhibitions, a thematic presentation of images of Hartley Valley by maps, sketches, paintings and photographs to be exhibited at the Old Hartley School and adjacent buildings, the 'signing' of historic structures along the present Great Western Highway, a bush picnic at Glenroy, road and mountain bike rides, a woolshed dance at Liddleton Station and musical and theatrical presentations in Hartley Vale.

These activities are only in early planning stages at present but offer a range of events from which to select.'

One of the more unusual but inovative ideas comes from local businessman, Tom Colless who recently reported he was trying to secure agreement for the minting of a holey dollar and dump to be issued to schoolchildren.

Naval wrecks now on heritage lists

NEARLY 70 YEARS after the entire crew of 644 died when the HMAS *Sydney* sank off the coast of Western Australia, the wreck has been added to the Commonwealth and National Heritage lists.

The HMAS *Sydney* engaged in a vicious battle with the German Raider HSK *Kormoran* 207 kilometres off the coast of Western Australia on November 19,1941.

The *Kormoran* wreck, which lies to the north-west of the *Sydney*, will also be listed.

The announcement by the Heritage Minister, Tony burke, marks the last stage in a long journey to find the wrecks and will bring to an end the rumour-mongering that flourished in the wake of the deadly naval battle.

The *Sydney*'s Captain Joseph Burnett was apparently fooled by the *Kormoran*'s disguise as a merchant ship and gave the order to approach.

By the time he realised his mistake, the German ship an auxiliary cruiser under the Fregattenkapitan (Commander) Theodor Detmers had trained its gun on the Sydney.

The half-hour long engagement resulted in the ships' mutual destruction.

When *Sydney* failed to return to port, air and sea searches for the cruiser were conducted between November 24 and November 29.

Three boats and two rafts carrying German survivors were recovered by merchant ships, while another two German boats made landfall --- 318 of the 399 personnel from *Kormoran* survived.

The exact location of the two wrecks was unknown until March 2008.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: jank@eftel.com.au or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mid Western Regional Council Library, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch (including Woodford Academy), National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2011-12 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Joan Kent (treasurer), Jean Arthur, Doug Knowles, John Leary, Dick Morony (public officer), Kathie McMahon-Nolf, Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

NOVEMBER - DECEMBER 2011 ISSUE No. 18

Cox's Road remnants to be listed on State Heritage Register

Earlier this year the NSW Heritage Office concluded it will list representative portions of Cox's Road as part of the 1813 bicentennial celebrations of the crossing of the Blue Mountains in recognition of the importance of the road in the history of opening up western NSW.

In April 2011 the NSW Heritage Office notified the Cox Road Project Committee, the nomination for listing of the Cox's Road on the State Heritage Register under the Heritage Act 1977 had been successful.

The Listings Committee advised that it was very enthusiastic about the proposal and considers the route a significant part of NSW's history and heritage.

After considering its options the committee concluded that listing of representative portions of Cox's Road would be undertaken as part of the1813 bicentennial celebrations.

This will require further extensive consultation with owners and other relevant stakeholders.

At least since the 1960s it has been acknowledged that there are significant remnants of the original colonial Cox's Road all along the Great Western Highway through the Blue Mountains and in the Lithgow and Bathurst local government areas.

Road formation carved as kerbed carriageway along the Woodford Ridge near the Woodford Trig.

Retaining wall on a deviation of the Cox's Road off the end of Cut Hill Road, Sodwalls, near Tarana.

Very little of the alignment has been recognised for its significance by any of the relevant local government bodies.

The Cox's Road Steering Committee was formed in July 2006 to look at long term objectives and mechanisms to preserve the 1814 Cox's Road alignment between Emu Plains and the Blue Mountains and Bathurst.

Convenor of the committee, Patsy Moppett has told *HERITAGE*, the committee was formed with delegates from the Lithgow, Blue Mountains and Bathurst branches of the National Trust, and operates under the auspices of the Trust as an informal committee.

"The committee sought to eventually establish a heritage walk or trail over parts of this route through some of the most beautiful countryside in Australia, and is currently seeking to have the remnants of the road listed on the State Heritage Register.

"The committee originally sourced input from various persons who had carried out research work on the Cox's Road including Alan Carey and Kevin Boole of the Land & Property Management Authority (LPMA), Siobhan Lavelle of NSW Heritage Office, Grace Karskens (Cox's Road Trust) and Bill Evans (RTA). These people still have associations with the committee.

"The committee's main objective is to facilitate the identification, conservation and management of the Cox's Road, Ms Moppett said.

An opinion from the editor.....

Industrial heritage the Cinderella of cultural heritage

Industrial or engineering heritage because it usually has neither charm nor beauty is often seen as the Cinderella of our cultural heritage.

Industry is an important part of our cultural heritage. As well as having obvious heritage value, it can:

* demonstrate stages of technological development;
* aid understanding of the history of society and the influences on its growth and development;
* demonstrate the nature of work and changes in working conditions and practices.

Around the nation there are steelworks, power stations, transport systems and other works built for specific uses now lying neglected and decaying.

These structures once held and sometimes still do hide machinery and other industrial objects and systems, but because of their concealment within a building and the fact that they are worn out they tend to be discarded; their heritage value easily overlooked.,

Industrial heritage in the field of agriculture fares a little better, primarily because those on the land tend to place a greater value on heritage and as a result many towns conserve farm machinery, its manuals of use and other knowledge, in local museums.

Once the purpose is no longer required there may be little other use for the items; a smelting furnace can be used for little else than smelting.

Regrettably, this means, materials and the skills to create and construct the works may disappear, along with the knowledge to conserve them. For example, riveted steam boilers are now difficult to maintain because the appropriate trade skills are becoming rare.

Engineers Australia, the National Trust of Australia RAHS and several other bodies in Australia have recognised the importance of industrial heritage as part of Australia's social history.

While a great deal of potential for conservation and restoration of industrial heritage is being lost around the nation, this is not the case within the Blue Mountains-Lithgow regions.

In this region there are at least four good examples of where industrial heritage is being brought into adaptive re-use and the efforts of those involved, who are mainly volunteers with these challenging projects need to be applauded.

The first is the scenic railway at Scenic World, Katoomba where the Hammon family have not only created the infrastructure for a major tourist attraction around the steep incline railway that hauled the coal and oil shale mined in the Jamison Valley, but they have collected and conserved a wide range of implements, cables etc. associated with mining in the region. To this can be added the outstanding Philip Hammon and Philip Pells book *The Burning Mists of Time – A technological and Social History of Mining at Katoomba.*

Next and no less significant in its scope is the Lithgow State Mine Heritage Park and Railway run by a non-profit body. After taking control of the site City of Greater Lithgow Mining Museum Inc. began restorations and started to gather artifacts and stories.

The museum is working to tell the stories of the mine's workers and their industry. The organisation has published a number of books well researched and written by Ray Christenson about the western coalfields and the men and women who lived and worked these mines. The mine owners Dick Austen and Angelo Butta who donated the site of the former Lithgow State Coal Mine to the people of Lithgow also need recognition for their contribution to the region's heritage.

The other two outstanding contributions to the preservation of industrial heritage are the operators of the Valley Heights Rail Museum and the Zig Zag Railway Co-op Ltd.

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

Local government asked to include Cox's Road in future heritage reviews

Continued from page 1

The steering committee became the Cox's Road Project Committee in 2008 and has sought support from the Blue Mountains, Lithgow, Oberon, Penrith and Bathurst councils.

"We have asked them to consider inclusion of the Cox's Road for heritage listing in future reviews of the various councils' local environmental plans (LEPs), and referral to the committee of any development applications or other proposals in the five LGAs, so that the committee may make comment in the context of the project objectives.

"The assessment process has highlighted many features of the establishment of the heritage trail, which provide challenges to inception and management of each site, and present restrictive criteria upon which to base future site interpretation.

"This includes the fact that many sites are on private land, and on-going access is all but non-existent.

"Sites on public land are the most obvious ones to be exploited by the project, but must be in accordance with local and state agency liability restrictions and safety of the public, at the same time making the sites available and able to be interpreted by future generations, with minimal agency management.

Cox's Road descent at Mt York

A view of the stone cutting and carriageway at the beginning of the descent from Mt York to Hartley Vale on the original Cox's Road. Railing that used to stretch across the drop to the rock in the background, was erected to keep the stock on the road. Photograph courtesy Jan Koperberg

"Over the next few months our committee will be undertaking workshops to investigate these representative portions with the assistance of members of the community in each precinct, commencing in November 2011.

"Once the final listing is established, this should open the funding doors to resources and finance to employ a project manager in a similar format to the Great North Road Project. Our task would then pass to that person.

"The committee acknowledges the assistance of a large number of people, without whose assistance the research, actions and outcomes could not be achieved.

"These include: Kevin Boole, Grace Karskens, Alan Carey, Col Roberts, Leonie Knapman, Siobhan Lavelle, Kevin Webb and Lyn Wood, Kerry Bartlett, Bill Evans, Nicole Secomb, Alan Bardsley, Bill Evans and BMACHO's inaugural president, John Leary," Ms Moppett said.

Blue Mountains heritage advisory committee named

Blue Mountains City Council at its last meeting endorsed the nomination of 10 community members to its heritage advisory committee. They are:

*Dr Naomi Parry a former Lithgow City Council cultural development officer and resident of Katoomba,
*David Turner deputy chairman National Trust of Australia (Blue Mountains Branch of Katoomba,
*Ron Powell an architect and landscape architect of Leura,
*Juliana Swatko a lecturer in photography and design UWS of Woodford,
*John Leary, OAM, past president of BMACHO, past chair Friends of Woodford Academy of Woodford,
*Pamela Smith, president BMACHO of Springwood,
*Shirley Evans, member of Blue Mountains Family History Society and Springwood Historians of Winmalee,
*Suzanne Mitchell a member of Professional Historians Society and RAHS of Springwood,
*Kate Matthews historian of Warrimoo,
*Fiona Carruthers member of Mt Wilson Historical Society of Mt Wilson.

Powerhouse curator to present fashions at Blue Mountains History conference

A POWERHOUSE MUSEUM curator Glynis Jones has accepted an invitation to be presenter of textiles and fashions in the early colonial era at the Blue Mountains History conference being planned for October 2012 in the heritage listed Carrington Hotel, Katoomba.

Glynis is a curator in the design & society department of the Powerhouse Museum with responsibility for the museum's holdings of fashion and dress.

She looks after a very diverse collection area covering men's, women's and children's clothing and accessories ranging from elaborate 18th century embroidered waistcoats to the work of contemporary international and Australian fashion labels including Louis Vuitton, Akira Isogawa and Romance Was Born.

The museum also holds important designer archives from Jenny Kee and Linda Jackson including original artwork for textiles and garments, stunning fashion photography and even business records.

In addition there are significant manufacturer's archives from Speedo which document the evolution of competitive swimwear from the racer back woolen Speedos of the 1930s to today's high tech suits.

Through filmed interviews and photography Glynis has been collecting and documenting the richness and diversity of subcultural and alternative dressing in Australia, from Mods to Metalheads and Goths to DIY punks.

In 2006 Glynis developed the popular online *Electronic Swatchbook* project, a public domain archive of high resolution images of fabric swatches from the museum's collection.

Over 900 swatches have been made available in digital form to be used freely by fashion and textile designers, graphic designers and students- http://www.powerhousemuseum.com/electronicswatchbook/

Glynis Jones with some of her favourite things from the museum's collection including the first pair of elastic sided boots invented by Joseph Sparkes Hall in 1837, photograph entitled 'Craig' by Ilana Rose, 1992 and a 1950s cocktail dress by Jacques Fath. Photograph by Sotha Bourn

Glynis has curated a number of exhibitions including *Frock Stars: Inside Australian Fashion Week (2010)* exploring the history, purpose, highlights, controversies and achievements of Australian Fashion Week to *Sourcing the Muse (2002)* in which she invited eight Australian designers to look through the museum's textile and dress collection and select items to use as a source of inspiration for a new work; providing a fascinating insight to the designers creative process.

Glynis has also contributed to various publications including *Subcultural and alternative style in Australia* for the *The Berg* Encyclopedia *of World dress and Fashion*(2010) and *Jenny Kee and Linda Jackson* for *Yesterday's Tomorrows, The Powerhouse Museum and its precursors 1880-2005 (*Powerhouse Publishing in association with UNSW Press 2005).

Norman Lindsay's *Novel Drawings* exhibition

Over a period of 55 years Norman Lindsay wrote 14 novels many of which he also illustrated.

Novel Drawings — original book illustrations by Norman Lindsay an exhibition of the works will run until the end of December at the Norman Lindsay Gallery, Faulconbridge.

Lindsay considered his fiction writing a diversion from the serious business of his art making and enjoyed embellishing his novels with lively drawings purely for his own and the reader's enjoyment.

The exhibition includes over 50 pen and ink or wash that will appeal to all ages.

The exhibition is free with normal gallery admission.

Naval comrades give ‘Inflexible’ sailor a fitting burial at Katoomba

by Jan Koperberg

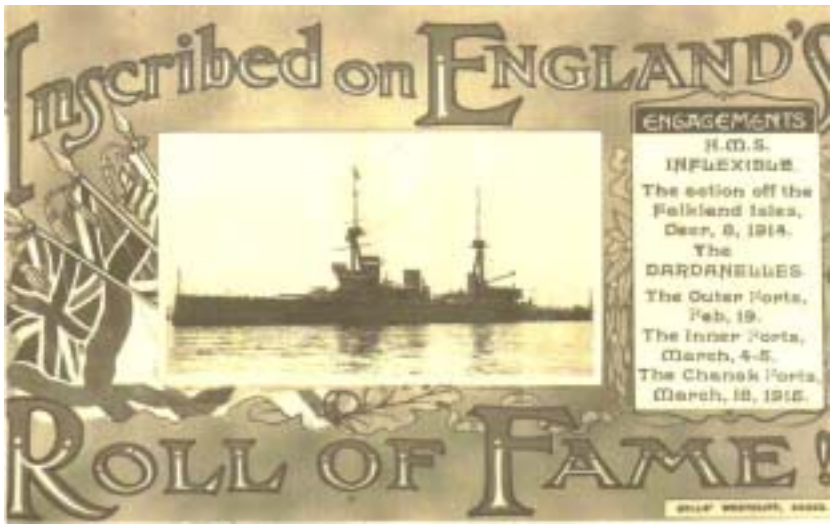
Thomas Dixon, RN, d.o.b. July 24, 1892, Byker, Northumberland, UK

IN SEPTEMBER 2007 I received an email from Heather Smeatom, who lives in Newcastle-upon-Tyne, England. She was researching her family tree and had found that her great-uncle Thomas Dixon was buried in Katoomba Cemetery in the Blue Mountains region of Australia.

Tom had served in the Royal Navy and his RN Records state that he was medically discharged from the Royal Navy in 1920 and spent nearly two years in Wentworth [Falls] Sanatorium in New South Wales, where he died on November 29, 1921.

Heather had obtained death details from NSW BMD Registry and had also obtained details of his burial from the Blue Mountains City Council Cemetery Register, which states that he is buried in Katoomba Cemetery, in Section KPR1, Row 1, Plot 15. Heather had tried, without success, to discover if any photographs of Katoomba Cemetery were available, perhaps location maps of the graves and also if the grave is (or was) marked.

I checked the Wood Coffill (Katoomba) Burial Index 1916 to 1945, Volume 1 and found the following entry:
Deceased:DIXON, Thomas Mr
Identification No: 589
Date of Death: Wednesday, 30 November
Age at Death: 30 yrs
Date of Burial: Thursday, 1 December 1921
Place of Burial: Katoomba
Religion:PR
Cemetery Section: 1
Plot Details: 15
Minister: Mackie
Informant: La Touche Medical Supt
Address of Informant: Bodington, Wentworth Falls
Other details: (none)
Vehicles: 2 horse hearse only (OPBM Vol 11) [1.]



The postcord recording events up to 1915 in which the HMS Inflexible participated. The Inflexible launched in 1907 saw considerable action in World War 1 but was deemed obsolete in 1921 and sold for scrap.

I then checked another publication, *Our Past Blue Mountaineers*, Vol XI and found the following entry for Tom:

“DIXON Thomas Katoomba, Presbyterian, Old Section, Row 1, No 15.

Scrolled grey marble headstone on sandstone surround, with white pebbled deck

‘IN LOVING MEMORY OF
THOMAS DIXON R.N.
DIED 29th NOV. 1921
AGED 30 YEARS

(Engraving of ships anchor)

“FAITHFUL UNTO DEATH’

ERECTED BY HIS SHIPMATESOF
H.M.A.S. MELBOURNE AND
H.M.A.S. SYDNEY[2.]

DIXON THOMAS: Tom was an ex-leading stoker on HMAS *Sydney*, who was a patient at Bodington Hospital, Wentworth Falls.

He had been there only six days as a TB patient when he died.

By some misunderstanding there was no official naval funeral party, so that several other naval inmates at Bodington attended the graveside.

They were Petty Officer Anderson and AB Hanley of HMAS *Torrens*, Stoker Malone of HMAS *Brisbane* and Signalman Wallace of HMAS *Australia*.

I went to Katoomba Cemetery, found the grave, and although worn, I photographed it for Heather, close up and at a distance, to show that Tom’s grave is nestled under a tree.

Heather was very touched that Tom’s shipmates had seen fit to give him a decent burial and to pay for a headstone and surround (the white pebbles are no longer there).

She wrote again in February 2008 to say that she had just returned to her research after a long break and thought she would write.

A cousin had come over from France a few weeks previously and had brought a letter and postcard from Tom, which she had found in a box of archives belonging to their second cousin. She was thrilled and thought it was a lovely letter, and attached a copy for me.

The postcard records, ‘Engagements H.M.S. Inflexible. The action off the Falkland Isles, Decr, 8, 1914, The Dardanelles. The Outer Ports, Feb, 19. The Inner Forts, March, 4-5. The Chanak Ports, March, 18, 1915.’
Continued page 6

Continued from page 5
Unfortunately the letter is not dated and the postmark on the envelope is not clear, but the postcard records events up to 1915, listed above, and Tom's Naval Record states that he served on HMS *Inflexible* between 1915 and 1919, so it is difficult to know exactly when it would have been sent.

The second cousin was born in 1907, so Heather thinks that perhaps it was sent around 1917/ 1918, when the cousin would have been around 10 years old.

The letter was from '6 Mess, HMS. *Inflexible*, C/o G.P.O., London states: Dear Norah
I am just writing you a few lines to let you know that I am still thinking of you. And I hope you are beheaving (sic) yourself while I am away, and when I come home again I will come and see you. I am sending you in this letter a photo of my ship. Well I cannot tell you any news, as I am not allowed to [because of war censorship]. I hope this letter finds you a good little girl, and give my best respect to all, as I am keeping fairly well. Your Sailor, Tom, xxxxxxxxxxxxxxx.'

'... a box containing dozens of old photos...'

In the same box among dozens of photographs, there were two of a young man in naval uniform and Heather was hoping that they were photographs of Tom, but she had been unable to confirm.

She was trying to discover if the uniform he was wearing would have been the type Tom would have worn during his time in the Royal Navy, but had not been successful.

The only thing she could come up with is a picture of the badge on his cap, which apparently is a RN petty officer's bullion cap badge.

The Dixon family which includes Tom in his naval uniform

This lead Heather to believe that it was not a photograph of Tom, as the last entry on his Royal Navy record states that he was a leading stoker, and there is no reference to him being a petty officer.

She had not given up hope altogether and thought it would be wonderful if it was Tom.

I received a copy of the 'Date and Period of Engagement' from Heather, which had a notation in the Remarks' - RAN agreement 2 years from January 12, 1920.

I looked up the National Archives of Australia for Navy Personnel 1911-1979, trawled through and found Tom's Record of Service. (Petty Officers and Men), stating he was "lent' from RN from January 12, 1920, which stated he had been on the *Melbourne* and the *Sydney*, which I referred to Heather.[3.]

Heather wrote again in August 2008 wanting to share some wonderful news.

Her uncle, who is 88, had rung to say that while clearing out some of her aunt's things, he found some old family photographs and wondered if she would like to have a look at them.

There was a photograph of the Dixon family, which included Tom. She said at last she could put a face to the name and such a handsome, young man.

She thinks the photograph would have been taken around 1910/11, when Tom was about 18 years old and is in pretty good condition, considering its age and the fact that it had been stored away in a box for such a long time.

She attached the photo and Tom is in his Royal Navy uniform.

Heather's grandmother (Annie) is standing at the back with Tom and their younger brother (George Dixon Jnr) is seated on the right.

They are pictured with their father (George Dixon Snr) and their step-mother (Mary). (Tom's mother had died when he was six years). The rest of the children are their half brothers and sisters (l-r) Mary, Ellen and Robert, but Heather did not know the name of the little boy next to his mother and did not even know of his existence.

What made this photograph special for Heather was a story her grandmother had told her when she was young, about the family photograph she had taken when she was about 16/17 years old.

She had arrived at the studio and removed her hat.

Her step-mother slapped her and called her a name because she had tied a scarlet ribbon in the back of her hair. Heather smiled back at her grandmother when she saw the offending ribbon.

The Robert Howard Memorial Award

Robert Grove Howard 1924 – 1995

The Bob Howard Award for 2010 has been won by Vicki Wilson, for her article “Private Joseph Harold Nevill, Service No. 269”, published in *The Explorers’ Tree,* No. 83, June 2010 and was awarded to Vicki at the September 2011 Blue Mountains Family History Society (BMFHS) general meeting.

Vicki’s name is now on the shield in the family history society section of Springwood Library.

The competition was judged by Lorraine Stacker, library services, Penrith City Library and member of Nepean Family History Society Inc.

Background to the Award

When Bob Howard died on May 10, 1995, the late Colin Slade was president of Blue Mountains Family History Society.

He was asked to deliver a eulogy at Bob’s funeral.

In *The Explorers’ Tree* magazine, No. 35, August 1995, Colin wrote that he was delivering the eulogy as a friend, rather than as president of the society.

He and other members of the society were there to pay their last respects, offer their heartfelt empathy and understanding to his wife, Pat and other members of the Howard family and to say farewell to a much loved and respected friend.

Bob was a foundation member of the society, which was inaugurated in 1986 and he enthusiastically participated in working bees and fund raising activities.

Bob wrote many and varied articles for *The Explorers’ Tree* magazine. Colin Slade noted that it was very hard to remember an issue that didn’t have a Howard article.

Bob was co-opted to the committee in 1988 as cemetery officer, attending most cemetery transcription days and was responsible for compiling data for the cemetery publications, which became a consuming passion.

Bob was also treasurer from 1989 for two years.

Pictured while in Fromelles, Vickie Wilson and the Duchess of Cornwall

Bob would spend many hours in the Springwood Library, looking through the microfilms of the old local newspapers to glean any information to add to the cemetery transcriptions.

These publications were well respected and sold well, stamped with that little extra, “the Howard touch”.

In 1991 Bob Howard and Don Wilson, were awarded the well-earned honour of becoming the first life members of the society.

In his eulogy, Colin Slade said: “Indeed it is an honour for the society, as Bob’s wishes were for donations to be given to the society in lieu of flowers; and I will propose that an annual memorial award and trophy for research be set up.”

A judging committee of three was formed to judge the best researched article for each year, from *The Explorers’ Tree* magazine and John Low, (historian, former BMCC Local Studies Librarian), was on the original committee.

BMFHS minutes of general meeting December 11,1995, Jennifer Burrell, representing the judging panel for the Bob Howard Award for 1995, read the judges report, commended Carol Bailey as editor for maintaining the newsletter’s high standard, and announced the winning article: “Names In Genealogy” by Audrey King.

BMFHS minutes of the general meeting February 12, 1996 note that the Bob Howard Award shield is now hanging in the library.

Contributed by Jan Koperberg, President, Blue Mountains Family History Society Inc.

Search for “Inflexible” sailor

Continued from page 6

Heather is still plodding on with her research, although does not get to spend as much time as she would like, and we still send photos of our coat-hanger bridges to one another at Christmas time, Heather’s of the Newcastle upon Tyne bridge and mine of the Sydney Harbour bridge.

Govett's 'Leap' debunked as a myth

THE STORY OF GOVETT and his 'leap' belongs more to mythology than to fact.

It is claimed that a bushranger named Govett, being chased by the police, spurred his horse on and died rather than surrender as he disappeared off the waterfall which drops 450 m into the Grose Valley.

Unfortunately, even though the story deserves to become part of Australian history Govett's Leap was named after William Romaine Govett, a young surveyor who arrived in Sydney in 1827, spent many years surveying the Blue Mountains and the Hawkesbury area, and returned to England in 1834 after the government had reduced his surveying establishment.

The evidence for the 'leap' being simply named after Govett the surveyor is overwhelming.

Coming now to the word "leap". The word "leap" is Scottish for waterfall or cataract**.**

In the early 1830s the Three Sisters were known as Govett's Point, suggesting that he was well known and admired in the area.

The view from Govett's Leap looking towards Govett's Creek and the Grose Valley with its spectacular sandstone cliffs.

In a letter to the editor of *The Sydney Morning Herald* of April 24,1930 the correspondent B.A.R. suggested the bushranger story under the heading 'The Blue Mountains' had erroneously appeared in a by then defunct Sydney weekly newspaper, more than 45 years earlier.

In 1835, by then back in England, Govett wrote in the *Saturday Magazine*: 'The bold broken nature of the country on either side is particularly grand, and the streams which at first commence in swamps soon make their way into inaccessible gullies, until they arrive at the cliffs of the main channel where they fall in cascades... The most remarkable of these cascades is the one near the Weatherboarded Hut and that which falls into the head of the Grose River, which the surveyor general named 'Govett's leap' from the circumstances of my first having come upon the spot when surveying with Mr Rusden.'

William Romaine Govett, dry plate photograph courtesy Image courtesy Mitchell Library, State Library of NSW [Original: DG 223]

And therein lies another mystery. In the *Saturday Magazine* article, Govett himself places Govett's Leap clearly in the correct area, above Govett's Creek and the Grose Valley near Blackheath, but the reference to the Weatherboarded Hut means one of two things.

Either Govett in his writing was confusing the Weatherboard Hut near Wentworth Falls or there was at the time of his surveying a weatherboarded hut near Govett's Leap.

William Romaine Govett (1807-1848), surveyor, was born at Tiverton, Devon, England, the third son of John Govett, surgeon, and his wife Susanna Price, née Owen. He was at Blundell's School, Tiverton, from 1817 to 1820.

He was appointed assistant surveyor in the Surveyor-General's Department of New South Wales on July 10, 1827 at £240 a year, reached Sydney in the *Asia* next December and began work on (Sir) Thomas Mitchell's staff.

Part of his work included surveying on the old Bathurst road, during which he discovered Govett's Leap in the Blue Mountains, which was named by Mitchell in his honour.

Mitchell was pleased with Govett and described him in a report on the department in 1832 as a wild young man who needed control, who had come to the colony ignorant of surveying but with much natural

Continued page 9

Continued from page 8
talent had become perhaps the ablest delineator of ground in the department, and who was remarkably clever at dealing with unexplored country.

'...the ablest delineator of ground...'

In February 1829, Govett was sent to the Hawkesbury River, where many farms required measurement, but in 1833 his career ended abruptly when the department was reduced.

Govett returned to England in the *Ann* in March 1834 with a letter of recommendation from Mitchell to the British government.

After his return to England, Govett lived at Tiverton, where he wrote several articles on New South Wales which were published in the *Saturday Magazine* between May 7, 1836 and September 2 ,1837 under the title 'Sketches of New South Wales'.

Like so many of the early explorers and adventurers who worked in the early days of the colony, Govett appears to have been an accomplished artist with many of his works being published and a substantial collection of his works in the State Library of NSW and the National Library of Austtralia. This ink on verso drawing titled View of of the Grose River from a cataract named Govett's Leap by Govett is reproduced courtesy of National Library of Australia nla –an3364840

They dealt with such topics as the nature of the country he had helped to survey, the habits of the Aboriginals, and life in Sydney; they were illustrated with twelve paintings by Govett, which were later advertised for sale by G. Michelmore & Co.

Govett appears to have undergone a personal crisis after his return and repented of his wild early life, but although he considered going abroad again and making a fresh beginning he did not live long and died on August 22, 1848 in London.

Material for this article sourced and compiled by John Leary, OAM.I also thank, Jan Koperberg for her continued assistance in sourcing images from the NSW State Library, the National Library of Australia and elsewhere. jkl

Life and Practice art at Everglades

AN ART EXHIBITION, *Life and Practice* featuring the works of Jurgis Miksevicius will be staged at Everglades House and Gardens, Leura between Sunday, November 20 2011 and Saturday January 28, 2012

This solo exhibition surveys examples of his extraordinary body of work which shows but a glimpse of the artist's legacy.

It is the life-gift of a creative individual who came to Australia as a young man escaping the horrors of war and violent dislocation from his homeland, Lithuania.

Woven into the display of Jurgis Miksevicius' paintings and drawings is a narrative of aspects of his life and creative process.

This is further illustrated by interior photos of his home of 50 years decorated with extraordinary murals; photos of his studios and pieces of furniture

The Student 1958 oil on hardboard 78 x 63 cm

Art works will be for sale. Dates: November 20, 2011 – January 28, 2012 (closed December 18 – January 6). Gallery hours: Thursday – Sunday, 11am – 4pm and by appointment

Cost: Free NT Members / $8 Adult / $6 Concession / $4 Child.
Enquiries: (02) 4784 1938

Caroline (Cara) Mallett: in her own right

By Pamela Smith - Springwood Historians

THE DIGITISATION and availability online of national newspapers, as well as magazines like the *Australian Women's Weekly*, are providing family and social historians with a clearer picture of past events. Thus, it is through this medium that we have a more personal view of the appointment of Cara Mallett to Hurlstone Women's Training School. In 1882, the *Sydney Morning Herald* published correspondence written by Sir Henry Parkes, and the Right Hon A.J Mundella MP who recommended Cara for the appointment.[1] This is the story of a remarkable woman who has been described as one of the earliest 'forward thinking' educators to come to this country in the 19th century.

The Reverend JB Faunthorpe, who was principal of Whitelands (the college Cara trained at prior to her Australian position) gave her a glowing reference as did the Inspector of Training Colleges in England, Canon Warburton.

The two gentlemen considered she was highly capable and Mundella, an English minister of parliament, suggested that although young, Cara possessed a better knowledge of 'modern' teaching methods than older teachers long in the profession.[2]

In her short career Cara had earned a first class Archbishop's certificate for religious knowledge, a first class certificate for advanced botany, a second class advanced certificate for physical geography, a full drawing certificate, first class advanced animal physiology, a first class merit certificate and the Lady Sudely prize for proficiency in domestic sanitation and a certificate from the St John's Ambulance Association.[3]

Faunthorpe stated, in his testimonial, that she was an excellent teacher, disciplinarian and manager, with some knowledge of the kindergarten system.[4] He also mentioned that Cara had more than a fair knowledge of Greek, Latin and French.[5]

The testimonials however also illustrated their regret at losing such a talented teacher. Another letter written by Saul Samuel, agent-general, stated that a berth had been secured for Miss Cara Mallett on the *Potosi* which sailed from England on the October 5, 1882.[6]

Eventful that voyage would prove to be because it was aboard the *Potosi* that Cara first encountered Tannant William Edgeworth David (later Sir) who of course was her future husband.[7]

Cara began life as Caroline Martha Mallett. She was born April 26, 1856 at Southwold, Suffolk in England and was the daughter of fisherman, Samuel Mallett and wife Pamela (nee Wright).[8]

Cara, as she preferred to be called, is said to have been orphaned at a young age and then raised by her grandmother.[9]

However, the 1871 census for England showed that at the age of 14, Cara was living with George and Mary Hurr.[10]

George was also a Suffolk fisherman and the census noted she was the couple's niece. She was a pupil teacher.[11]

Jennifer Horsfield, who explored Cara's life in some detail, suggested Cara exemplified what 'women could achieve' when they were 'empowered by education.'[12]

Horsfield confirmed that Cara, with an annual salary of £300, became 'one of the colony's first independent, highly qualified professional women.'[13]

As an avowal of her standing she was accepted into the Royal College of Preceptors in 1884, which allowed her to 'use the initials MRCP after her name.'[14]

Horsfield saw this event as not insignificant in a colony that remained wedded to the idea that a 'British stamp of approval' was the ideal.[15]

Cara proved to be a formidable principal and her active pursuit of higher standards and better training for student teachers often led to conflict with senior bureaucrats in the Department of Public Instruction.[16]

Horsfield suggested Cara was both outspoken and innovative and promoted Friedrich Froebel's radical kindergarten theories for teaching young children.

It is easy to see why Cara was impressed with German educator Friedrich Froebel (1782-1852) because he was quoted as saying:

"The destiny of nations lies far more in the hands of women, the mothers, than in the possessors of power, or those of innovators who for the most part do not understand themselves. We must cultivate women, who are the educators of the human race, else the new generation cannot accomplish its task."

Froebel's methods had an appeal to forward thinking educators like Cara because 'play' was considered as vital as more structured activities in the education of small children.[17]

Froebel even suggested that childhood play was the 'highest expression of human development' because it allowed the 'free expression of the child's soul.'[18] Froebel was not interested in turning out clones but in the 'wholeness' of the individual.[19]

Cara embraced Froebel's enlightened teaching methods and opposed rote learning which was taught by most teachers in the 'Victorian-era.'[20]

Froebel's methods are still being used to this day. While Cara was a strong advocate for the school curriculum to include the teaching of practical and domestic arts, she was equally supportive of girls being taught science.[21]

Continued page 11

Continued from page 10

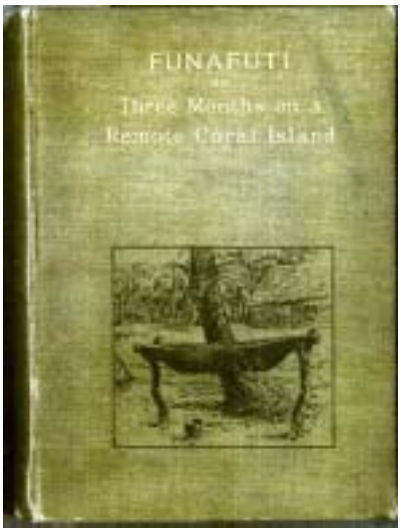
When Cara married mining surveyor, TW Edgeworth David, in 1885 she was required, as was the unequal tradition then, to resign her Hurlstone position.[22]

Horsfield implied that Cara's early married life, while dedicated to raising three young children, was somewhat lonely in many respects because her husband travelled frequently to 'far-flung geological field camps.'[23]

However, Carol Cantrell painted rather a different story by suggesting that Cara and the children often accompanied Edgeworth David.[24]

Cantrell described a trip they made to Funafuti in 1897, where Cara forged a friendship with locals while suffering the discomfort of 'rain, mouldy clothes and lack of privacy' quite cheerfully[25]

This trip obviously provided the material for *Mission work in Funafuti,* which Cara wrote when she returned home.[26]



Life gained a more normal pace after Edgeworth David was appointed Professor of Geology at the University of Sydney in 1891.[27]

The couple explored their own social and educational projects but equally, were at the centre of a 'group of liberal intellectuals who dominated Sydney's cultural life.'[28]

Thus, the Edgeworth David's could count among their friends people like William Windeyer and his feminist-campaigner wife, Mary; and Professors Scott, Anderson and MacCallum (academics from the University of Sydney).

During World War 1 Cara turned the David's Woodford cottage into a convalescent home for soldiers

The group founded the Australian Home Reading Union (AHRU) in 1892 that aimed to provide courses in science, history and general literature for people who had an interest but otherwise lacked higher education.[29]

The AHRU failed in its bid to attract the interest of working class people who, according to Horsfield, considered it was a club for the 'rich and privileged.'[30]

Together with friends like Louisa MacDonald (the first principal of the University Women's College) and feminist, Maybanke Wolstenholme, Cara supported the setting up of free kindergartens in the inner city.[31]

Cara put her skills to good use in the early decades of the twentieth-century when she lectured on topics like 'Foreign missions & the effect they had on natives,' 'National Efficiency,' and 'Women War Workers.'[32]

Newspapers of the day confirm that she was involved with the 'Women's Prohibition Movement' which was a body formed from the amalgamation of the 'Women's Christian Temperance Union' and other like societies.[33]

As president Cara addressed a large gathering at Katoomba in August 1920.[34] She stated that 'they had been unable to lift the dead weight of apathy from the general public' when she addressed another gathering later that same year.[35]

It is not clear whether they took up a suggestion made at that meeting that in order to rouse the apathy the ladies should go about ringing bells while carrying large placards declaring the benefits of Prohibition.

When the 'Wattle Day League' formed c1910, Cara and feminist campaigner, Rose Scott, became the vice presidents.[36]

The League president was Joseph Henry Maiden who was director of Sydney's Botanical Gardens.

Among other organisations Maiden was one-time president of the Linnean Society 1901-2; president of the Royal Australian Historical Society 1905-07 and president of the Horticultural Society 1903-17.

The objective of the Wattle League, in its formative years, was to instil a sense of national pride and patriotism for their country in Australian citizens.

Rose Scott's tireless campaign to improve women and children's rights also inspired Cara to become a devoted advocate.

Cara founded her own branch of the 'Women's Political Educational League,' begun by Scott in 1904, in an effort to alert women to their new responsibilities after gaining the vote.[37]

Edith Fry (1858-1940) another devotee of the Women's League was related to Woodford Academy principal John McManamey.

During World War One Cara turned the David's Woodford cottage (*Tyn-y-coed)* into a Red Cross convalescent home for soldiers.[38]

She was president of the 'Women's National Movement,' which aimed at social reform, like sex education for young children and the eradication of venereal disease.

Cara, given her involvement with the 'Women's Prohibition Movement', strongly supported prohibition and endorsed any measure to bring about six-o'clock closing.[39]

Continued on page 12

Sir Edgeworth's testimony to his wife, Lady Cara

Continued from page 11

Cara was divisional commander (1920) and then State commander (1928-38) of the NSW branch of the Girl Guides and organised the purchase of *Glengarry* at Turramurra for use as training headquarters.[40]

This amazing woman spun fleece into wool to knit hundreds of socks for World War Two servicemen and she even had a hybrid tea rose named in her honour.[41]

Edgeworth David once said of his wife 'Whatever success I may have achieved in life is due chiefly to my wife.'[42]

That testimony, glowing as it might be, only sums up a portion of the important contributions made by Cara or Lady Edgeworth David.

About the author

THE AUTHOR of this article, Pamela Smith's interest in the suffragette movement and early feminism was initiated when she first became aware that women, and their role in the national narrative, had largely been ignored until the rise of the feminist movement in Australia in the 1970s.

Pamela Smith

Since then she has endeavoured to do her small part by writing women back into Blue Mountains history. She carried out extensive research and presented a thesis on the women (and men) that operated early private venture schools in the Blue Mountains. Currently, she is interested in the women who contributed in the early years of local government in the Blue Mountains. Pamlea is currently the president of the Blue Mountains Association of Cultural Heitage Organisations (BMACHO)

New Windsor bridge proposal

THE RAHS WOULD LIKE to inform members of a current issue surrounding Thompson Square at Windsor that has proved to be a cause for concern.

The RAHS regards Thompson Square as a significant heritage and historic landmark and is deeply alarmed by any Roads and Traffic Authority (RTA) bridge proposals which would affect it.

Thompson Square was established in the 18th century, making it the oldest urban space in Australia.

Thompson Square also has significant links to Governor Macquarie, who gave the space a new name and appearance when he created Windsor as one of his five planned towns along the Hawkesbury-Nepean.

The Council of the RAHS has sent a letter to the RTA raising concerns regarding the current preferred option (Option 1). Option 1 involves a high level bridge 35 metres downstream of the existing bridge.

Individuals and societies are being encouraged to support the RAHS's stand against the new Windsor Bridge proposal to contact the Roads and Traffic Authority at Windsor_Bridge@rta.nsw.gov.au

Mine owners gift to Lithgow heritage

by Ray Christison

IN 1990 COAL MINING entrepreneurs Dick Austen and Angelo Butta donated the site of the former Lithgow State Coal Mine to the people of Lithgow.

The City of Greater Lithgow Mining Museum Incorporated was formed to develop a mining museum in the complex of buildings on the site.

The museum's volunteers have restored industrial buildings, undertaken complete replacement of electrical and plumbing services on the four hectare site, fought bushfires, undertaken major environmental and flood mitigation projects, gathered Australia's most comprehensive collection of coal mining artefacts, developed interpretive displays, hosted tens of thousands of visitors, published three coal mining histories and articulated a vision for regional heritage tourism.

The Lithgow State Coal Mine was the first colliery developed by the New South Wales Government after the passage of enabling legislation in 1912.

After a faltering start the mine rapidly developed into one of the largest collieries in the state.

During the 1920s shafts were sunk, massive brick buildings constructed to house workshops, a power house and stables, and a large coal handling plant and weatherboard office were built.

By 1930 over 700 men were working at the mine.

The mine was intended to be an industry leader in the application of technology and the development of good working conditions.

It supplied coal to the NSW Department of Railways and its product was railed across the western districts of New South Wales.

Small coal, unusable in railway locomotives, was sent across the gully to the Lithgow Power Station.

This power station, constructed in 1927, supplied electricity from Lawson to Wellington.

During the 1920s the mine became a pivotal point of the Miners' Federation of Australia Militant Minority Movement.

This activist group was led by Communist miners Bill Orr and Charlie Nelson.

These men met at the State Mine and it was here that they recruited young miners like Alfred Airey to the Communist cause.

Alfred, having studied at the Lenin School in Moscow and taken the Communist Party name Jack Blake, became one of the key leaders of the Communist Party of Australia between the 1930s and 1950s.

Bill Orr and Charlie Nelson became leaders of the Miners' Federation. Together they raised the morale of embattled mine workers and helped set new workplace standards for the coal industry.

As the State Mine struggled through the Great Depression its workers developed strong co-operative and social ventures.

The rich social life of the colliery included a brass band, football teams, a ladies' auxiliary, a bodybuilders' club, a boxing club and numerous other social groups.

The mine's blacksmith boxers became legendary. Blacksmith's striker Billy Boyce represented Australia in the 1948 Olympics.

The colliery's workers recalled a strong bond of comradeship that developed in the mine's vast underground workings.

Like all coalminers they knew the wonder of working in the depths of the earth, feeling it move and pulse as they worked to hew the coal.

They experienced the drama of rescuing mates from roof falls and dealing with the effects of mechanical accidents.

They volunteered to fight bushfires, to search for children lost in the bush and rallied to support the families of men killed in other pits.

In July 1964, on the day the Beatles landed in Sydney, heavy rains led to the flooding of a number of abandoned collieries in Lithgow.

As the flooding continued the State Coal Mine came under increasing threat.

Mine closure comes with decline in steam locomotion

Continued from page 14The closure of the Lithgow Power Station four years earlier and the decline of steam locomotion on the NSW Government Railways had severely affected the mine's viability.

The decision was taken to close the mine and its shafts were finally sealed on October 13, 1964.

Following closure much of the mine's surface infrastructure was demolished leaving only the workshop, former power house (later used as a bath house), office building and powder magazines standing.

Many of these buildings were used as storage and the office building was rented as a dwelling.

After taking control of the site, City of Greater Lithgow Mining Museum Inc. began restorations and started to gather artefacts and stories.

The museum is working to tell the stories of the mine's workers and their industry.

A director of the City of Greater Lithgow Mining Museum, Ray Chistison said, "We have worked with the buildings, respecting their integrity while enhancing their capabilities.

"The massive scale of buildings such as the former power house has allowed us to host major community events, festivals and celebrations."

New Guinea life created interest in cultural values

THE NEW CULTURAL development officer for Lithgow City Council, Wendy Hawkes interest in culture began as a child when she moved with her family to Papua New Guinea and spent her childhood and teenage years amongst a culture that values art, dance and music highly.

Returning to Australia at the end of high school she completed a teaching degree and has taught in the Blue Mountains and Lithgow areas since 2001.

Wendy began her Masters of Art Administration in 2006 at the College of Fine Arts, UNSW when she realised she wanted to pursue a career helping others enjoy art as much as she does.

Wendy was especially interested in rural areas as that is where she enjoys living the most. She moved to Lithgow 3 years ago and added a love of history to her love of art as she began exploring the area with the local photographic group.

"Beginning my new career as cultural development officer at Lithgow City Council is a fantastic opportunity as it allows me to fulfill my ambition of helping others access culture and history, either by creating it or experiencing it, while being surrounded by culture and history myself," Wendy said.

Wendy Hawkes

"Eskbank House and Museum, at which I will be based part of the time, is an excellent venue for storing knowledge and history and from which to share it.

"I hope to make Eskbank House and Museum a place that the community calls home and in which it feels a real sense of ownership as well as a place people like to come to visit from outside Lithgow. I look forward to forming links with other community cultural organisations.

"There are other exciting cultural projects outside the museum that I will be involved in and I am very much looking forward to sharing in the exciting cultural future of Lithgow," said Wendy.

Kurrajong-Comleroy Historical Society has new president

A country boy who always wanted to be a steam train driver and ended up being the curator of a rail museum has recently been elected as the president of Kurrajong-Comleroy Historical Society following the retirement of Frank Holland.

He is John Cooper who was born on the Richmond River in 1938 the product of a dairy farmer and his wife.

John's mother contracted Parkinson Disease after his birth and spent many months at a time in hospital until her passing in 1950.

John recalls that following his mother's death, his two sisters and he spent some years with their grandparents before returning to the farm to help his father on the dairy.

"I used to milk the cows before riding five miles to school at Woodburn," John told ***HERITAGE***.

"I never excelled at school and on New Year's Eve 1955 departed the bush for Sydney.

"I lived with my Aunty Bid (my mum's sister) and joined the railways on January 6, 1955. I wanted to be a steam train driver but in 1958 was struck down with tuberculosis which put me in hospital for 13 months.

"By this time I had not long been married. After returning to work in January 1960, I was put on light duties and later became a shunter.

"In January 1961 I had an accident shunting and lost four of my toes with another year unable to work."

In 1970 he was elected a director of the Railway Credit Union, holding that position until 2008.

In the time he was a director the organisation went from the Railway Staff Credit Union with assets of about $600,000 to Encompass Credit Union with assets of over $230 million.

He also became involved with the proposal to create a steam tourist railway on the original great Zig Zag Railway formation.

He was a founding member and the first chairman of Zig Zag Railway Co-op Limited holding that position for over ten years.

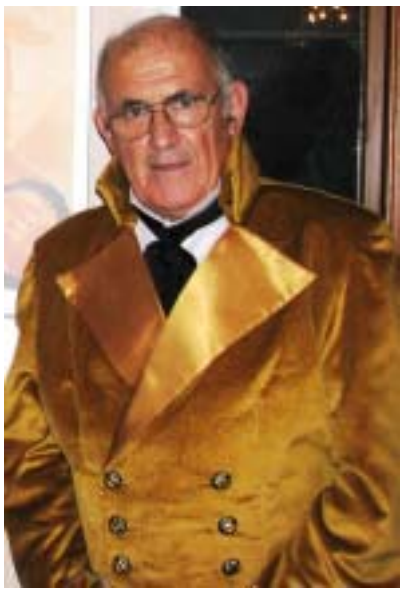
"I have also been chairman of the Australian Railway Preservation Society and on the committee of management of the Co op Federation of Australia.

"I have three children two of them have the same disease, Motor Neuron that took their mother in 1981. My son Peter passed away last year and his sister Donna is in a very advanced state.

"I remarried in 1996 to my now wife, Carolynne whom I met through the railway movement. "

John founded the Transport Signal & Communications Museum (TSCM) in 1990 at Cabramatta.

Carolynne joined the museum back then and they have worked together over the years in the restoration and the setting up of the museum which is now on their Kurrajong property.



John Cooper dressed as Richard Fitzgerald a convict, public servant and settler when he attended the formal dinner to celebrate 200 years since the visit of Governor Macquarie to Kurrajong in 2010. Lachlan Macquarie recognised Fitzgerald for his ability and praised the 'zeal, vigilance and integrity' of this 'most honest upright man'.

John is now the curator of TSCM and Carolynne is secretary, and he says they have a terrific committee which is now working towards the re opening of TSCM to the public by October 2012.

John and Carolynne are both president and secretary of the Australasian Telephone Collectors Society and have held those positions for some years. Carolynne has been on the Kurrajong-Comleroy Historical Society committee since 2008 and also is the coordinator of the family history group.

John says his position within Kurrajong-Comleroy Historical Society is very much to support the many dedicated members who are compiling family trees and the history of the early settlers of the local area.

"The Hawkesbury is indeed extremely rich in the very early days of our colony. After listening to our past president Frank Holland stating prior to his moving to Kurrajong he had shown no great interest in early history, so my view is if he can do it then possibly I can," said the new president, John Cooper.

Bob Clarke re- elected as chairman National Trust - Blue Mountains Branch

The popular Bob Clarke has been re-elected as chairman, National Trust - Blue Mountains Branch.

Other members of the committee include Rhona Leach (vice chair), John Partridge (secretary), Liz van Reyswoud (treasurer), David Donald Turner (heritage and advocacy adviser), Sandra Partridge (bookings and assistant treasurer), Bronwyn Mansfield (newsletter), Sarah Wray (catering), Elizabeth Saxton (assistant secretary), John Dikeman (walks co-ordinator), Laurel Anthony (functions) and Michael Blakeney (data base officer).

Grants workshop success

A very successful BMACHO workshop was conducted last month with the aim of encouraging a higher standard of grant applications.

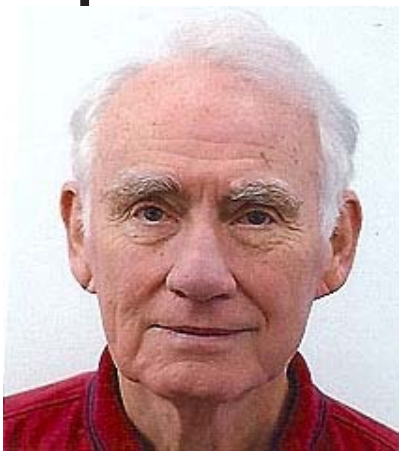
The seminar held at the Blue Mountains Historical Society's Hobby's Reach at Wentworth Falls was designed to give basic practical advice to the grants officers of (primarily heritage) societies and organisations.

The workshop designed and conducted by BMACHO's grants officer, Prof Barrie Reynolds focused on administrative and equipment grant programs that involve an actual application form.

"The principles expounded would, however, also be of help for capital, sponsorship and 'political' grant submissions.

"Topics covered were the planning and preparation involved prior to application, the completion of the application forms themselves and the aftermath: the handling of the project and legal and other responsibilities relating to a grant," Barrie said.

Some 21 participants attending from the following 10 BMACHO organisations: Blue Mountains Historical Society, Glenbrook Historical Society, Springwood Historical Society, Springwood Historians, Kurrajong-Comleroy Historical Society, Valley Heights Railway Museum, Blue Mountains Family History Society, Lithgow Family History Society, Blue Mountains Branch of National Trust, Lithgow Branch National Trust ; as well as six other non-BMACHO groups: Blue Mountains Probus, Cox's Road Project Committee,



Barrie Reynolds

Nepean Family History Society, Hartley District Progress Association, Blue Mountains, Wildplant Rescue and The Writers Room.

Barrie Reynolds has offered to comment on any draft applications that the participants plan to make.

He also said it is hoped to conduct the seminar again in Lithgow.

The occasion gave opportunities to encourage interest in the *Easy Grants* newsletter distributed online by BMACHO and the series of four workshops on the use of the internet for heritage purposes planned for early 2012.

These intended workshops are supported by a generous grant from the Telstra Connected Seniors Grant Program.

For further information on the proposed or expressions of interest in attending the Telstra internet workshop, e-mail: e-mail: committee@bluemountainsheritage.com.au or go to the BMACHO contacts page on the website, www.bluemountainsheritage.com.au

LAND RECORDS WORKSHOP WELL ATTENDED

The Land Records workshop held at Blue Mountains Historical Society's Hobby's Reach Research Rooms on Sunday, October 16, 2011, was well attended, by members of societies from all over the Blue Mountains.

The workshop was designed for local and family historians

Lesley Muir and Carol Liston, on behalf of the RAHS, have presented this workshop to historians and members of its affiliated societies, in locations across NSW, due to the generosity of a benefactor, who believes in the importance of community history.

There was a large amount of information to digest in one afternoon, but most enthusiasts purchased a copy of the presentation on a RAHS USB stick, and no doubt will be spending many hours online.

BMACHO would like to thank the RAHS and Lesley and Carol for giving up their Sunday afternoon, to bring the presentation to the Blue Mountains.

Thank you also to Blue Mountains Historical Society for the use of their premises.

Contributed by Jan Koperberg Secretary BMACHO

Remembrance Day high tea at Woodford Academy

Following a minutes silence to commemorate Remembrance Day - at 11am on Friday, November 11, a high tea will be held in the house and grounds of Woodford Academy.

Enjoy a delicious home cooked high tea, with a variety of teas and coffee on offer.

Have a look around the house and grounds of this historic property.

Once an inn, it progressed to a private home, a guest house and then an exclusive boy's boarding school.

Astronomers from all over Australia came to view the Transit of Venus from here in 1874.

Cost $25 for entry and high tea. For enquiries Marilyn Wright (02) 4758 7809.

Woodford Academy

Louise Markus first to support conference

LOUISE MARKUS MP, the Federal Member for Macquarie is the first person to come forward and financially support the 2012 Blue Mountains History Conference – *Colonial Society* to be held at the heritage listed Carrington Hotel Katoomba.

Louise Markus, MP

The organising committee has so far concentrated its efforts in finding interesting and some of the countrY's top heritage experts to be speakers at the conference.

The committee last month started to look for sponsors and Mrs Markus was the first to come forward and undertake the printing of the brochure needed to promote the conference.

John Leary, OAM, the former president of the Blue Mountains Association of Cultural Heritage Organisations Inc. (BMACHO) in welcoming Louise's support said that since she had become the local member, Mrs Markus had shown considerable interest in the work of BMACHO and the heritage of this region.

"I am delighted to be able to support the great work the Blue Mountains Association of Cultural Heritage Organisations does in promoting the heritage of the region," Louise Markus said.

Anyone interested in becoming a sponsor of the 2012 History Conference is asked to contact John Leary at johnnanette@optusnet.com.au or telephone 4758 8584.

Professor Ian Jack to open conference

A CONSUMATE SCHOLAR, and a man who has devoted a large part of his professional life to working with volunteers in the history and heritage sector, Associate Professor R. Ian Jack, MA, PhD, FRHistS, FRAHS has accepted an invitation to officially open the Blue Mountains Heritage Conference 2012.

Dr Jack last year stood down after 11 years in office as president of the Royal Australian Historical Society.

Former president of BMACHO, John Leary, OAM, said, "Ian's clarity of mind and communications are recognised and admired not only at academic institutions such as the University of Sydney, but throughout Australia by all levels of the heritage and history sector.

"Ian has a talent for encouraging others to engage in activities which

enhance the conservation and preservation of heritage and is able to summarize a range of opinions and views with precision and insight.

"He is a prolific researcher and writer of Australian history.

"Dr Jack has been and remains, an active exponent and promoter of Australian history and of heritage of the built environment," John Leary said.

Greater Blue Mountains World Heritage Centre

The Blue Mountains Botanic Garden, Mount Tomah has opened a new 155 square metre exhibition centre to help visitors enjoy a heightened experience and understanding of the Greater Blue Mountains World Heritage Area.

Visitors will be excited and inspired by this world-class attraction. Visitors may engage in a virtual journey through the canyons and ridges of 1,000,000 hectares of wilderness.

These inaccessible treasures may be experienced in the comfort of the exhibition centre, leaving these remote wilderness areas protected and intact.

Through the display, visitors can marvel at plant and animal diversity, experience the 14,000 years of Aboriginal culture that so lightly touched the land and understand the long geological forces which have shaped this wonderland.

The experience is hands-on with activity based learning suitable for all ages and languages.

Groups will be provided with opportunities to revel in this virtual wilderness and then walk through the 28 hectare Botanic Garden showcasing many of the rare plants of the World Heritage Area.

The centre has a gentle educational message promoting minimum impact eco-tourism and

Blue Mountains Botanic Garden, Mount Tomah is a foundation member of BMACHO

Welcome to new members

BMACHO welcomes the Eskbank Rail Heritage Centre at Lithgow as a new member.

The Eskbank Railway precinct is of state significance as an early railway precinct, important in the course of NSW's history because of its key role in the industrial development of the Lithgow Valley.

Meanwhile, the National Trust of Australia (NSW) has appointed a management committee for it's Woodford Academy property and BMACHO now welcomes the Woodford Academy Management Committee to full membership.

Woodford Academy is the oldest surviving property in the Blue Mountains.

Woodford Academy open to public

WOODFORD ACADEMY will be open to the public on November 11, 19 and January 21 between 10am and 4pm

This National Trust property reflects its colourful history from its earliest days as an inn, to its years as a model boys' school.

Enjoy the special atmosphere of the property which includes a fine example of a colonial kitchen and rare segmented arch over the fireplace (pictured below, photograph by John Leary 2007)

Then relax over a home-made morning tea on the balcony with its Blue Mountains vistas.

Cost: Free NT Members / $6 Adults/ $4 Concession / $3 Child Enquiries: Marilyn Wright (02) 4758 7809

Santa to arrive by steam tram

SANTA WILL ARRIVE EARLY in the Blue Mountains when aboard the heritage steam tram 103A he makes his appearance at the Valley Heights Rail Museum on Sundays November 27 and December 11.

Santa will arrive on both days at 11am and then later at 2pm.

He will have the usual bag of goodies for the children and looks forward to having his photograph taken with young children by mums and dads who bring their cameras.

Morning and afternoon tea will be available.

As a special treat on Sunday November 27 the NSW Railway Band will perform between 10.30am and 2.30pm.

Standard entrance charges will apply. For further information (02) 4751 4638 or www.infobluemountains.net.au/locdepot

Bradman scored a century for Blackheath

80 years ago this month, Don Bradman played for Blackheath against the Lithgow Pottery XI scoring an amazing century off three overs.

In a new book to commemorate the anniversary, the historian Ronald Cardwell and Irene McKilligan, the daughter of one of Bradman's team mates that day, have uncovered new material about Bradman's visit to the Blue Mountains.

Bradman had been invited to play for Blackheath in a game on November 2, 1931, by Oscar Wendell Bill, a journalist and former NSW player.

The 'Blackheath bat", which Bradman broke two months after the local game, became a significant item of memorabilia after he gave it to Blackheath mayor, Peter Sutton.

The bat is now displayed in the Bradman Museum in Bowral after a chequered history during which it lived in Blackheath council chambers, survived a burglary and resurfaced in the Blackheath Bowling Club.

Lithgow coalminer and opening batsman Bob Nicholson, a baritone singer so impressed Bradman,at a post match concert that the 'Don' invited him to sing at his wedding

***Bradman at Blackheath* is published by The Cricket Publishing Company.**

BRAIN STORMING AT SPRINGWOOD

A brain storming sessions for presidents, members of executives, committee members or those wishing to stand for positions on committees will be conducting on Tuesday, November 8.

The activity will commence at 9am in the Frazer Memorial Presbyterian Hall, Macquarie Street, Springwood.

This session will be facilitated by Doug Knowles, a committee member of Blue Mountains Association of Cultural Heritage Organisations and currently president of Glenbrook & District Historical Society.

Ideas will be put forward, questions asked, and hopefully answered, but if answers are not forthcoming on the day, they will be sought.

Doug Knowles

Anyone wishing to attend, should contact BMACHO's secretary, Jan Koperberg by phone 02 4754 1544 or j.koperberg@bigpond.com

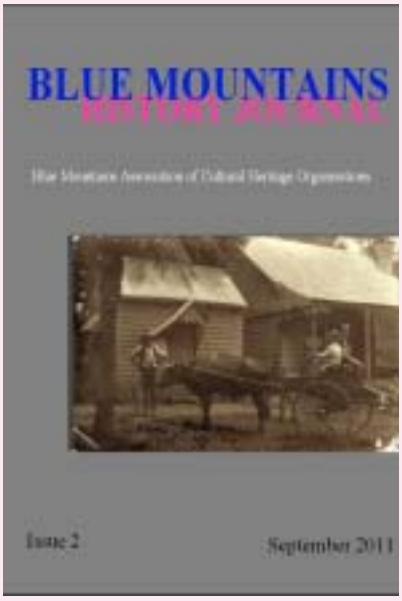
INTERESTING NEWSLETTERS

***HERITAGE*'s** editor receives regularly a number of first class newsletters from societies and corporations within the heritage sector. Sometimes a really good item of news or a well researched article deserving of a wider publicity is to be found in these newsletters.

If your newsletter is not being sent to the editor of ***HERITAGE*** he would appreciate receiving a copy, either by e-mail to johnnanette@optusnet.com.au or by post to John Leary, OAM, 31 Lysiana Road, WOODFORD 2778.

BLUE MOUNTAINS HISTORY JOURNAL

ISSUE 2 of the *Blue Mountains History Journal* is now available on the Blue Mountains Association of Cultural Heritage Organisation Inc. website (www.bluemountainsheritage.com.au) and may be down-loaded for private use without charge. It can also be purchased in hard copy.



ISSUE 2 contains articles by distinguished local historians from the Blue Mountains:

* *The Martindale Family and the Sketchbook of Mary Elizabeth Martindale* by John Low
* *Over a Century of Worship at Medlow Bath* by Clair Isbister, Robert King and Peter Rickwood
* *A History of the Postal and Telephone Services of Mount Wilson* by Mary Reynolds
* *A Secret Army in the Blue Mountains?* by Pamela Smith

ISSUE 2 is 58 pages in length and profusely illustrated with 67 historical prints, maps and plans. Many of the prints are in colour. A limited number of hard copies are available post-free, for $27 each. Interested readers are invited to send their cheques (made payable to BMACHO) to The Secretary, Blue Mountains Association of Cultural Heritage Organisations Incorporated, 14 Burral Street, Winmalee, NSW 2777, before **20 November 2007.**

A few copies of the Inaugural ISSUE 1 of the *Journal* are also available (price $27 post free). This contains four articles:

* *North Springwood in the Nineteenth Century: the site of St. Columba's Seminary and High School* by Ian Jack
* *Joseph Hay: One of Lawson's Pioneers* by Brian Fox
* *Dr William Bell (1815-1871): Experiences of a 19th Century Doctor on either side of the Blue Mountains* by Lois Sabine
* *Aboriginal Prehistory of the Blue Mountains* by Eugene Stockton

ISSUE 1 is 44 pages in length and illustrated with 26 historical prints, many in colour, tables, plans and other illustrations.

Enquiries for further information and expressions of interest in submitting manuscripts for publication are welcomed by the *Journal* editor (Dr. Peter Rickwood) through the Association's website.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INCORPORATED

First Waltzing Matilda manuscript on show as National Library unveils some of its treasures

THE NATIONAL LIBRARY of Australia in Canberra has unveiled a new permanent gallery showcasing some of the treasures of its collection.

The Treasures Gallery brings some of the library's valuable gems out of the vaults, with some on show for the first time.

It is an eclectic display including rare manuscripts and Captain James Cook's Endeavour journal, along with Doncker's exquisite atlas, that pre-dates Abel Tasman, showing a very different map of Australia.

There is a handwritten letter from Jane Austen to her sister Cassandra, William Bligh's notebook listing the bounty mutineers, and the original Waltzing Matilda manuscript.

There are also some very unexpected items. When a box of writer, Patrick White's notebooks was donated to the library, the curators found his reading glasses and beret inside.

Beside them are Jorn Utzon's original models for the sails of the Sydney Opera House.

Exhibitions director Nat Williams says the diverse collection highlights different aspects of Australia's history.

"We're an interesting country. We've been faced with all sorts of dilemmas. People have been courageous, they've explored, they've invented, they've innovated, they've advocated - they've done an extraordinary sort of range of things," he said.

"A lot of those things are reflected in here, from the first draft of Waltzing Matilda to Edward Mabo's papers.

"People can walk in, and in half an hour or an hour, walk around this gallery here and get a real sense of what Australia's about and how it's come to be where it is now."

The National Library has more than 12 million items in its collection, and the new gallery will constantly change to reflect that.

About every 16 weeks the library will turn the pages in some of the books and some of the sensitive items will be replaced with other items that cannot be on display for long periods of time.

There is still something about the one-off that really speaks to people," said curator Susannah Helman.

"People want to come and see the original thing, they want to come and see people's handwriting, they want to come and see something that's unique.

Pictured at left is the original Waltzing Matilda manuscript

A page in Austrlia's heritage - James Cook's journal. Image courtesy National Library of Australia nla.ms-ms1-s256r

"That's part of our culture I think, as humans, to marvel at what people have created and what people have been able to achieve."

The $7 million gallery has been 10 years in the making, with half of the funds coming from public donations. Mr Williams says visitors will appreciate the extensive collection.

"They're really enjoying it, they're finding it diverse, they're seeing the sort of richness of our collection which is boundless," he said.

"It really is one of the great collections in the world. It certainly documents Australian documentary heritage in an extraordinary way."
Alison Ramage

The purchase of the Endeavour journal of James Cook in 1923 is one of the most significant acquisitions made by the National Library of Australia. The journal covers the three-year voyage of the sailing ship Endeavour (1768 to 1771), captained by James Cook, when it circumnavigated the globe in the name of scientific advancement

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or its really going to happen

A REPORT FROM PROFESSOR DAVID CARMENT, CHAIR WESTERN CROSSINGS COMMITTEE

THE ROYAL AUSTRALIAN Historical Society's (RAHS) Western Crossings Committee was established in 2010.

It provides a forum for the exchange of information and ideas on commemorating the bicentenary of the first crossings of the Blue Mountains, including the involvement of Aboriginal people, the 'three explorers' in 1813, the survey and construction of the first road across the Blue Mountains in 1813-1815, and Governor Macquarie's selection of the site of Bathurst in 1815.

All these events are of considerable and cumulative historical significance. The RAHS believes that commemorative projects ought to be of long-term benefit.

Meetings have been held at Sydney, Penrith, Woodford, Lithgow and Katoomba. The next meeting is at Emu Plains.

Participants in meetings represent community heritage and history associations, local governments, state government departments and Aboriginal traditional owners.

There was discussion at all meetings of proposals to interpret sections of the original Cox's Road.

At the Katoomba meeting on August 12, Bill Evans from the Roads and Traffic Authority gave a fascinating presentation on the heritage and history of surveying and road building in the Blue Mountains region, devoting special attention to the first road.

He showed and discussed rarely seen maps, photographs and survey books.

Bill offered during his presentation to show interested committee members Cox's Road near Woodford.

This inspection occurred on August 28, when a group of about 20 people walked to parts of the road that are still clearly visible and easily reached.

Also at Katoomba, I reported on my August 11 meeting with the Premier of New South Wales, Barry O'Farrell and the Member for Blue Mountains, Roza Sage,

The Premier expressed in principle support for a state coordinating committee similar to that formed for the Macquarie 2010 commemoration. I also argued for a special competitive grants program.
DAVID CARMENT

MACQUARIE MONUMENT

SPRINGWOOD HISTORIANS thought Lynn Collins' suggestion of "a small corner for a 'running sheet' of what folk from say Penrith or Parramatta to Bathurst are thinking of doing" for the Western Crossing Commemoration was an excellent idea so we would like to tell you of our project.

Springwood already has a Macquarie Monument (see *HERITAGE* Newsletter May/June, 2010) but we fear it is a neglected part of Springwood and indeed Blue Mountains and NSW history.

We decided to visit it individually and then meet to consider its problems. All except one of our members (and she lives in Glenbrook) knew where it was, had walked or driven past it many times and knew what it commemorated.

But we all agreed it was shabby, and, after talking to other people, mostly unnoticed.

Positioned on the site identified by the RAHS as Macquarie's camping place on his journey over Cox's road to Bathurst in 1815 and the site of the first Military Barracks in Springwood, it could be called the birthplace of Springwood.

So our project is to see it restored, refurbished and given more prominence.

The land on which it stands is owned by Blue Mountains City Council so our first step was to contact them. Patrick Williams, recreation coordinator met us at the monument and agreed that it was an important historic site with priorities for action being"the fences surrounding the monument and interpretation of the monument".

Other possibilities were "treating the existing plaque on the monument to resist weathering and providing directional signage to the site".

Council financing for this type of project in the 2012/3 financial year would have to be assessed against other identified projects and the total amount set aside was only $15,000.

Obviously more money would be needed to see our project successfully completed. Our small group is not incorporated and unable to apply for grants so we are looking for partners.

As a further disappointment, on the new Springwood information sign erected on the Springwood Town Square, the monument is noted on the map simply as "monument'! Monument to what?
SHIRLEY EVANS

HOLEY DOLLAR AND DUMP

LOCAL businessman Tom Colless is trying to secure agreement for minting a holey dollar and dump, to be issued to school children.

When the colony of New South Wales was founded, it soon had a lack of coinage. Governor Lachlan Macquarie took the initiative of using £10,000 in Spanish dollars sent by the British government to produce coins known as the holey dollar and the dump being the piece stamped from the centre.

Australia's first hospital celebrates 200 years

SYDNEY HOSPITAL Australia's first hospital celebrated 200 years last month on its Macquarie Street sites.

Sydney Hospital dates from the arrival of the First Fleet in 1788 and has been on its present site in Macquarie Street since 1811.

The oldest building now standing on the site is the Nightingale Building which dates from 1868, and the sandstone buildings on the Macquarie Street frontage, dating from 1894.

The new Clinical Services Building of the hospital was opened in 1996 and has been built to harmonise with the historic buildings on the site.

The complex of buildings provides an important monument to the history of medicine and nursing in Australia, and continues to provide high quality healthcare services.

The buildings facing Macquarie Street are an imposing group of high Victorian institutional buildings, which form an integral part of the historic streetscape of Macquarie Street, as well as being important to the early history of medicine in Australia.

But it is not the heritage buildings which attract most attention. It is a bronze boar.

Few people fail to notice him! People from all over the world have solemnly stood in Macquarie Street, Sydney and rubbed his nose, made a wish, dropped a coin in his basket and had a photograph taken standing near him.

His name is Il Porcellino. He is not a pig; he is a wild boar.

The original Il Porcellino statue is estimated to be over 500 years old, and was unearthed in Rome after having stood for over 100 years in the Uffizi Galleries in Florence.

The Sydney Hospital and Sydney Eye Hospital Il Porcellino, which is a copy of the original, was presented to the hospital in l968 by the Marchessa Clarissa Torrigiani in memory of her father and brother – Dr Thomas Fiaschi who died in 1928 and Dr Piero Fiaschi who died in 1948. Both had been renowned surgeons at the Sydney hospital.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committee, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2011-12 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Joan Kent (treasurer), Jean Arthur, Doug Knowles, John Leary, Dick Morony (public officer), Kathie McMahon-Nolf, Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

JANUARY - FERUARY 2012 ISSUE No. 19

Lithgow Council underwrites funding for Cox Road signage

LITHGOW CITY COUNCIL has agreed to the installation of signage along the Cox's Road and will consider allocating $20,000 in 2013-14 management plan for the signage if state and federal government funding is not forthcoming.

The interpretive signage along the Cox's Road is part of the Blue Mountains crossing commemoration activities planned for 2013-15.

The road crosses through the Penrith, Blue Mountains, Oberon, Lithgow and Bathurst local goverment areas (LGAs).

There are still remnants of the road, which was built by William Cox and his crew of convicts in 1814, along which Governor Lachlan Macquari in 1815 travelled to the site where he proclaimed the township of Bathurst.

Lithgow Council is seeking funding in stages in order to have all signage installed by 2015.

Information board, Oberon LGA

Patsy Moppett, the convenor of the National Trust's Cox's Road Project Committee (CRPC), has advised the Blue Mountains Crossing Bicentenary Committee of Lithgow City Council that Oberon Council already has signage in place funded by the Australian Government's Department of Heritage.

Ms Moppett also told the committee that Blue Mountains City Council and Bathurst City Council are seeking funding over the next two years to instal signage in their local government areas.

The Cox's Road Project Committee has undertaken to co-ordinate mapping of the road and development of appropriate signage.

The Cox's Road Steering Committee was formed in July 2006 to look at long term objectives and mechanisms to preserve the 1814 Cox's Road alignment between Emu Plains and the Blue Mountains and Bathurst.

Convenor of the committee, Patsy Moppett has told *HERITAGE*, the committee was formed with delegates from the Lithgow, Blue Mountains and Bathurst branches of the National Trust, and operates under the auspices of the Trust as an informal committee.

"The CRPC sought to eventually establish a heritage walk or trail over parts of this route through some of the most beautiful countryside in Australia, and has sought to have the remnants of the road listed on the State Heritage Register. The NSW Heritage Office gave preliminaryy approval for this listing in April 2011.

Route signage in Oberon LGA

150-years for NSW Police Force

NSW POLICE FORCE will have served as a unified force for 150 years on March 1, this year.

Five police forces, the military mounted police, civil mounted police, gold police, mounted road patrols and rural constabulary, operated in the region between Emu Plains and the Cox's River from 1829 to 1862.

During the 1920s bushrangers and clashes between settlers and Aborigines were a growing law and order problem.[1.]

An opinion from the editor.....

Darug, Daruk, Dharug, Dharuk or Darkiñung?

IN the August – September 2011 edition of ***HERITAGE***, I opined that now might be the time to encourage local historians and those interested in cultural heritage to better engage with living members of the indigenous people so that assistance may be provided for future generations.

In that *Opinion* I indicated both the Dharug and Gundungurra people are known to have inhabited this region well before the coming of Europeans and a great many of them still live in the Blue Mountains region. New findings in a study publicly released in August 2011 seem to challenge conventional wisdom in this statement.

In a 2010 postgraduate history thesis researched at Sydney University, Dr Geoff Ford suggests that the Aborigines of the Blue Mountains and Hawkesbury / Grose River catchments at the time of settlement were *Darkiñung*, recorded as bordering the mountain *Gundungurra* people from the Wollondilly / Cox River catchments to their south.

HERITAGE's *Opinion* lacks the capacity to provide informed comment on the locale of Aboriginal people in this region, other than to suggest there are other bodies of research contrary to this view.

Ford places insistence on the spelling of Darug, Daruk, Dharug and Dharuk commonly in use when identifying Aboriginal people in various localities. However, colonial attempts to record what Aboriginal people seemed to say, must at least have been described as unscientific.

There was no accepted phonetic system for transcription while there was no 'correct' spelling of English itself until 1755 when *A Dictionary of the English Language*, (*Johnson's Dictionary)* was produced.

The new study, 'Darkiñung Recognition', may be examined in more than 30 public libraries. A digital copy is available online from the University of Sydney library (at URL: http://ses.library.usyd.edu.au/handle/2123/7745).

Public scrutiny of Dr Ford's thesis is highly desirable as it may bring on further scholarly debate

In the 1970s, society deemed it to be appropriate to replace the word 'Aborigine' with another noun for Aboriginal persons in parts of NSW, *Kuri*.

Then, as we approached the 1988 bicentenary of settlement, family history flourished, with the removal of the stigma of having either convict or Aboriginal heritage

As we approach the 2013 bicentenary of the Blue Mountains crossing some historians might see it as an appropriate time to revisit earlier research about the traditional identity of the Aboriginal people in NSW.

But to do so without further intense consultation with the Aboriginal elders and their community lacks sensitivity.

Generations of Aborigines have believed in the spelling and identity which they have been perhaps given by Europeans.

This does not mean that consultation should not occur during the Western crossings commemorations 2013-2015. There are in the community most articulate well-informed spokespeople for the Aboriginal community and they should be given every opportunity to be heard.

WELL DONE LITHGOW

Congratulations to Lithgow City Council on forming a Section 355 committee to oversee activities for the 'bicentenary of the western crossing in 2013-15'.

The ready, no-nonsense acceptance of the aspirations of the local community and offer to work with volunteers as equals is inspiring and how local government should work.

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

The coming of the motor car...

by John Leary, OAM

ALTHOUGH MECHANICS and engineers had been experimenting with alternatives to horse-drawn carriages as far back as the design for the Cugnot steam trolley of 1769; most define that as the first "real" automobile produced by Amédée Bollée in 1873, who built self-propelled steam road vehicles to transport groups of passengers.[1]

Motorised vehicles probably made their first Australian appearance in Melbourne about 1900.

At first they were praised for being faster and cleaner than horses.

However, their noise, speed and fumes frightened horses and left pedestrians ducking for cover. People complained of 'road hogs' who recklessly sped through the streets endangering all in their path.

To control the motorised horde, in 1916 Melbourne City Council had imposed new restrictions. Vehicles had to travel on the left-hand side of the road in not more than two lanes. When stopping, a hand or a whip had to be raised.

In the following years hand signals for turning were imposed, along with time restrictions on parking.

Initially considered a toy for the wealthy, the ownership of motor vehicles increased most markedly after the First World War.[2]

Pictured outside the Hartley Court House on a trip to Jenolan Caves 1930.On back of photo mount: Souvenir of our trip to Jenolan Caves 1930. Vehicle: Belgian Fabrique Nationale 1918 Front: Driver in dust coat, Mrs Cubitt Rear: Miss May Cubitt, Mr Quincey Adams of Dubbo, Master Cubitt. Blue Mountains City Library.

The distinction of being one of Australia's first motorists to be booked for speeding, biscuit mogul RH Arnott was fined 10 shillings ($1) for travelling down a Sydney street at 13 km/h

The first driver's license to be issued in Australia was on September 10, 1906 to William Hargreaves of Woodville, South Australia.[3]

Dr Peter C Rickwood writing in the *Hobby's Outreach*, under the titles "The First Car Over the Mountains" August-September 2010 and "A Sequel to 'The First Car over the Mountains'", concludes from his extensive research that the first motor car to cross the Blue Mountains did so on September 29, 1901

Crossing the Blue Mountains was part of a journey made in a 3-seater 5.5hp Delahaye by William Gordon Dixon accompanied by WG Hamilton went at least as far as Bathurst. [4]

In 1832 Major Mitchell built a road from Mount Victoria to Hartley to replace the dangerous grades of Bathurst Road built by William Cox.

This new road made it possible to travel safely via horse-drawn vehicles.

However, not foreseeing some 72 years into the future in 1904, the first motor car to travel down Victoria Pass required the assistance of a horse to be able to get back to the top.[5]

The "Roaring Twenties" was characterised by a spirit of optimism and progress. The austere war years had come to an end, and for many Australians life improved.

An open tourer driving the Jenolan Caves Road on the old Hartley bridge over the River Lett circa late 1920s early 30s. Broadhurst Collection. Contributed by Paul Cardow

Continued page 4

Horse drawn Coaches made the 2-day trip to Jenolan Caves

Continued from page 3

Mass production and technological advances increased consumerism, materialism and modernisation.

Shorter working hours, improvements in public transport and a surge in car manufacture and ownership changed the way Australians spent their leisure time.

The introduction of radio and the growth of dance halls and picture palaces met the growing demand for entertainment and recreation.

The figure of the 'flapper', with her short skirts and bobbed hair became a metaphor for the pursuit of pleasure and novelty which characterised the decade, as well as the rapid changes in social and moral attitudes and values.

With the coming of the motor car Jenolan Caves and other sites in the Blue Mountains were but a short distance by touring motor car from the holiday towns of Katoomba, Blackheath, Medlow Bath and others.

Entrepreneurs in the Blue Mountains soon realised taking a tour in a motor car was a great adventure.

One of those was Robert Rolfe who in 1889 had set up a business transporting tourists by horse drawn coaches.

Coaches made the 2-day trip to Jenolan Caves on a regular timetable, it being the usual custom for passengers to walk up the steep grades to ease the strain on the horses.

By 1911 the Rolfes had moved their business to Blackeath and expanding their business had progressed from horse drawn coaches to motor vehicles.

Rolfe's tourist business had as many as 13 cars housed at Blackheath and employed in the fledgling tourist industry.

Robert Rolfe died in 1942 and the tourist and taxi business was finally sold in1956.[6]

Another early operator was Stefan (known as Sid) Josef Siedlecky who also saw the potential in touring cars, when he set up a business in 1919.

One of 'Sid's' early cars was a Cadillac. He also bought a Cole which was a powerful 10 seater, 8 cylinder car. He was the first person to drive a car down into Megalong Valley.[7]

A fleet of 'Italia' cars owned by Joyton-Smith garaged at the Carrington also took visitors to the Jenolan Caves;

The economic depression of the 1920s and 30s and the coming of the private car saw a downwards effect on the tourist trade.

Early motorists faced many challenges, not the least of all being the condition of roads which had been built for horse and cart.

Motor cars were notoriously unreliable and there were no such thing as a roadside garage.

Maintenance and navigation equipment such as puncture repair kits had to be packed for the trip.

Before the 1920s in Australia even fuel had to be carried as there were few petrol outlets

"Why Walk?" was one of the vehicles in the fleet of motorised cars used by Rolfe's Motor Service in Blackheath, c. 1920s. Photograph courtesy of Bill Ward

High tea

Enjoy the ambience of the Art Deco dining room at Everglades House and Gardens, Leura, high tea being served on Saturday and Sundays, January 28 and 29 and February 26 between 2.30pm and 4pm.

Visitors may wander through the magnificent gardens and explore the 1930s house before high tea

Booking essential to Anita 4784 1974 or Liz 0418 206 899.

Cost $25 National Trust member, $30 adult, $10 child

An intriguing character comes to the Blue Mountains

by Paul Innes

EVERY ONCE IN A WHILE, an intriguing character comes into our lives, and in late 1911 – just over 100 years ago – such a character arrived in the Blue Mountains.

The intriguing character in question was a gentleman named James Joynton – Smith, more commonly known as 'Joynton'.

In late October 1911, Joynton – Smith purchased Katoomba's Carrington Hotel, and he immediately made his presence known. Within a week of buying the hotel from Mr Peacock, Joynton put the weekly tariff up from £2/16/- to £3.

Many more changes were about to take place at the Carrington Hotel, but before describing these, it's worth taking a peak into Joynton's life before he came to the Blue Mountains.

Born James John Smith in 1858... "a vintage year for babies..."[1], the future owner of the Carrington Hotel spent his early years in London's East End. There, he learnt a great deal about human nature and business.

One thing he did perceive was that his name was too common. In order to get noticed, he eventually decided it would be best to change his middle name... "to the debonair name of Joynton. The James John Smiths who might infest directories, telephone books and electoral rolls would no longer crowd me."[2] he said.

Then, wishing to leave the East End... "a place crowded with people haggling over pence..."[3] Joynton told his family he wanted to emigrate to one of the colonies. Signing on as a third cook aboard the 'Port Chalmers', Joynton set sail for New Zealand in 1874.

Once in New Zealand, Joynton worked on board several ships. Gradually he realised that all the money on board ship seemed to come from the shore. this made him decide that ... "one day I would leave the ship and tap this wealth at its source."[4]

Over a number of years while he developed his business skills on land, Joynton learnt two valuable lessons. One was to avoid alcohol; the other was to pay off debts.

As an assistant barman at the Port Chalmers Hotel, Joynton soon discovered that many men came into the bar abiding by the drinking code 'never have one alone'.

Suddenly realising he was cultivating the habit of drinking, Joynton put in "the plug" adding… "although I've been associated with hotels almost all my life, I have never been a drinker. It has been the residential side, as distinct from the bar, that has interested me."[5]

Learning to pay off debts materialised not long after Joynton had purchased the Post Office Hotel, in Wellington. A local businessman, TG Macarthy informed Joynton he would prosper if he paid off debts owed to... "the little people in business who cannot afford to be out of their money. Small unpaid accounts injure a man's credit most." Furthermore, he was encouraged to... "keep your money and yourself active, and in keeping both employed, you are employing others also, and increasing prosperity."[6]

This advice seemed to pay off, for within four years of owning the Post Office Hotel, Joynton had amassed a nest egg of £10,000. Feeling the need to see his family again, and hoping to increase his wealth on a horse racing betting scheme, Joynton set sail for England in 1886.

James Joynton-Smith

However, while he succeeded in seeing his family, he lost all but £500 on the betting scheme.

Returning to New Zealand, Joynton started again, working in the secretaryship of the Cooks and Stewards Union in Wellington. This job lead him to Sydney in 1890, when at the height of the maritime strike, he resigned from the union and set up an 'Illuminated Funeral Cards' business; then needing a more secure job he accepted the position as manager of the Grand Central Coffee Palace.

Determined to get back into the hotel business for himself, Joynton began looking for a hotel to purchase.

It wasn't long till he found out that the Imperial Arcade Hotel could be secured.

In February 1896, Joynton secured the lease of both the Pitt and Castlereagh Street ends of the Arcade, eventually owning and vastly improving the entire Arcade... "in my judgement the choicest piece of real estate in Australia."[7]

Continued page 6

Continued from page 5
Joynton – Smith was beginning to make his mark on Sydney, and it wasn't long till he was investing time and money into other ventures, particularly buying horse racing tracks, and establishing Rugby League, in 1908.

Now, if time and space permitted we could further examine Joynton's Sydney life; his political career as an Upper House Member, and Lord Mayor of Sydney; his creation of the *Smith Weekly* newspaper; and his involvement in the establishment of South Sydney Hospital, where a wing is named after him.

'... When I saw the Blue Mountains they cast a spell over me...'

But we need to move up to the Blue Mountains...

Joynton – Smith's association with the Blue Mountains seemed to begin in the early years of the 20th century.

"When I saw the Blue Mountains, they cast their spell over me. Here, I said, is something I need ... without them I could never be happy again," he commented.

"It was Mount Victoria that particularly appealed to me. The Imperial Hotel seemed to offer what I needed, so I bought it."

"In the meantime, I bought the Carrington Hotel at Katoomba. I saw that this was the pivotal point of the Blue Mountains, and that it could be made the rest house of the tired business man of Sydney."[8]

Purchasing the Carrington in October 1911, Joynton – Smith immediately set about bringing the hotel into the 20th century.

In 1912, the original lace iron work façade was transformed into an art nouveau stained glass facade.

In 1913, Joynton constructed a power station (with its enormous chimney) at the rear of the hotel. This power station supplied electricity to the Carrington, as well as to railway stations, businesses and homes between Mount Victoria and Woodford.

Joynton also noticed that '…when I first went to Katoomba, there was only one bank in the town" … and … "realizing there was an opening for another…"[9] he persuaded the City Bank of Sydney to open a branch in Katoomba in the Carrington grounds.

Mr Housie lived upstairs and became its first manager.

Knowing Katoomba was a tourist town, Joynton became involved in the hire car business and picture show business.

A fleet of 'Italia' cars garaged at the Carrington took visitors to the Jenolan Caves; while both his Empire and Kings picture theatres entertained visitors and locals.

Mr Otto Camphin was made chief executive of both the Empire and Kings theatres, and he was rewarded with … "half the enterprise." For, added Joynton… "When I have taken on another into a venture and he has brought success, I have made it a rule to share and share alike."[10]

By 1926, the Carrington stood on Joynton's books at £120,000, and in the same year, he sold the Imperial at Mount Victoria for £16,000, in order to build the Log Cabin at Penrith.

Driving to the Mountains one day, Joynton stopped off at a Penrith Hotel, and asked for a cup of tea.

The ensuring fuss, and serving of a lukewarm shandy in its place, convinced Joynton… "That in the near future, I would have tea at Penrith, so I looked for a site, and bought a suitable area of land overlooking a lovely stretch of the Nepean River.

Parties of motorists now make it [the Log Cabin] the objective of a run from Sydney, and motor parties to and from the mountains find there a pleasant break in the journey, and I get my cup of tea without any fuss whatever."[11]

Joynton – Smith passed away in 1943, but during his time at the Carrington Hotel he hosted thousands of visitors. Honeymoon couples mingled with families, war veterans, bachelors, and overseas travellers.

Famous people came as well. The Duke and Duchess of York visited in 1927, Prime Minister Stanley Melbourne Bruce discussed matters of importance in 1924, Billy Hughes relaxed at the hotel in 1929, and Amy Johnson ('Johnny') briefly touched down in June 1930.

In my travels, I've been lucky enough to meet two people who not only worked at the Carrington in Joynton's time, but also met him, recalls Paul Innes.

In 2003, an elderly fellow called Les Timmings told me that sometime during the 1930's both he and his father, Samuel Timmings – who worked at the hotel as the gardener between 1914 and 1947 – received £10 from Joynton. "

The Carrington Hotel pictured 2011

‘You’re smoking!’

Continued from page 6

“Apparently Joynton won some money on a horse the previous weekend, and gave every member of staff a 5 shillings tip.

That was a lot of money back then!” [12] Les said.

Then, in 2008, a fellow called Jim Mitchell, who was a pastry chef at the hotel said, “Yes, I met Joynton once.

“He didn’t come into the kitchen often, but on this particular day he came in as I was walking out the door into the corridor, about to go on my break.

“I’d already lit my cigarette.

“He saw that and told me I wasn’t allowed to smoke in the kitchen. I replied: ‘You’re smoking!’ (He had a cigar). He replied. ‘Yes, but I own the hotel!’”[13]

Touché Joynton…. and thank you for coming to the Blue Mountains.

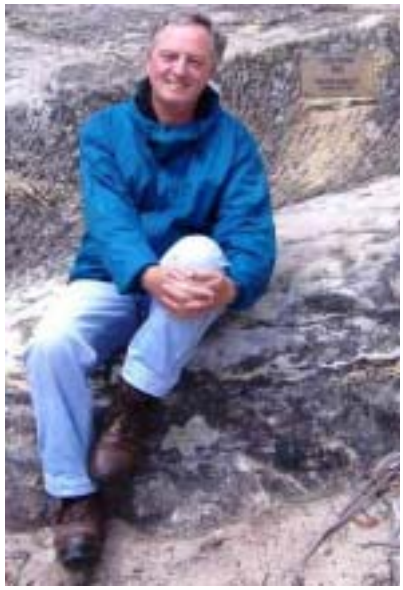
About the author

Paul Innes pictured and Helen Stamper regularly conduct guided historical walking tours around the Carrington Hotel; Katoomba; Mount Victoria; Mount York as well as several other sites in the Blue Mountains.

All tours are thoroughly researched, professionally presented and never rushed.

To book a tour or for further details, please visit their web site. www.discoverthebluemountains.com.au

Jan Koperberg’s photograph of Paul was taken at Mt Victoria on remnants of the Cox’s Road.



Springwood historic walk

SPRINGWOOD HISTORICAL Society, in association with Blue Mountains City Council and the Rotary Club of Springwood have identified, by numbered bronze plaques, seventeen historic sites in Springwood and produced a brochure containing a map and concise information about each place.

Arrangements may be made with the secretary Dick Morony by e-mail to: richardmorony@optusnet.com.au to take interested groups on a guided tour of these places.

Dick will also supply copies of the brochure to people who would like to undertake the walk on their own.

MURDER SITE ON GLENBROOK WALKS ITINERARY

GLENBROOK & District Historical Society regularly organises ‘walk and talk’ activities visiting interesting places of local history.

The March 31 activity is titled ’The Mountain Murders and a visit to Lee Weller’s grave site’.

In 1896 the sleepy village of Glenbrook was like most country towns in the Great Depression when the unemployed suffered real starvation in the absence of government assistance.

Then in 1896, the sleepy backwater’s name exploded into world headlines.

The anonymous but many named criminal known as Butler chose Glenbrook for the last of his murders, that of the retired sea captain, Lee Weller.

It appears he lured the sea captain with an offer to show him precious stones which he promised Weller he could find as a prospector

Already “Butler” was suspected of murders in West Australia, NSW and may be in Brazil and after the police were attracted to as they say “to certain happenings” at Glenbrook the second last victim a university student named Arthur Preston, was dug up at Faulconbridge.

Getting wind that the police were on his tail, he decided to flee to America, in a windjammer, but police had taken a steamship arriving in San Francisco to wait and arrest Butler.

Butler was brought back to Sydney where he was tried and hanged.

Those interested in participating in the walk should contact Doug Knowles at 4751 3275 or Tim Miers 4739 2384.

Everglades horticulturist receives top award

EVERGLADES HEAD GARDENER, Guy McIlrath has received the National Trust Distinguished Service Award.

Guy who has been head gardener for 7 years received the award based on commitment, leadership, innovation and support for quality of work life.

Everglades manager, Scott Pollock said Guy's eye for detail ensures the property runs with the greatest of ease.

"During the recent upgrades at Everglades, there were 20 different projects which he closely monitored to ensure the end result was the best that could be achieved

"This included suggestions relating to the processes, placement of infrastructure, and keeping things aligned with the conservation plan.

"Guy has huge respect from all workers and volunteers because of his leadership skills.

"Guy is a master at ensuring all staff and volunteers have a productive, educational and enjoyable time while at Everglades," said Mr Pollock.

Pictured is Guy McIlrath (wearing hat) being congratulated by Scott Pollock.

Local architect managed rare'yellowblock' recovery for heritage sandstone restoration

THE NSW GOVERNMENT provides funding for the conservation of the state's significant sandstone buildings and structures.

Funding is allocated to NSW Public Works, and the work is undertaken by a team of stonemasons, heritage roofers, plumbers and painters from its Alexandria workshops.

The work is guided by heritage architects from the Government Architect's Office who specialise in stone conservation.

Most of Sydney's major sandstone buildings, such as the State Library, Art Gallery, Sydney Hospital and the Australian Museum have already had major conservation work carried out.

Regional projects including Hartley Courthouse have recently received program funding.

A key component for the success of this work occurred in 2000 when the rare "yellowblock" sandstone was obtained in a 'once in a century' opportunity.

Ron Powell

The program's manager for the past decade, Ron Powell, negotiated and oversaw giant saws cutting the precious "yellowbloc"k out of excavations for multi-level car parks at Pyrmont, on the site of the former famous Saunders yellowblock quarries.

Ron Powell retired from the program and moved to Leura in 2009 and was recently appointed to the Blue Mountains City Council Heritage Advisory Committee.

In 2009 Ron received an award from the Institution of Engineers Australia's Heritage Group for his work in having the Saunder's quarrying operations and their contribution to Sydney recognised.

He was the catalyst for a book "Paradise, Purgatory Hell Hole, The Story of the Saunders Quarries" being written and published as well as the placement of an Institution of Engineers Australia Historic Engineering Marker plaque being placed on the former quarry wall at Pyrmont.

Ron has undertaken at ***HERITAGE***'s request to provide more information about the program's projects in coming issues.

Lights stay on at historic homes

by *Will Holmes à Court* - former CEO, National Trust of Australia (NSW)

A few Sunday's ago over breakfast many of us read the news about grounded planes and airport chaos, while others, recipients of an early edition, had their comfort of tea and toast hijacked by the headline "Lights go out at historic homes"

It was distressing news with the report referring to National Trust properties. An opinion had been expressed that the Trust was going to have to "mothball" some of its properties and six were mentioned.

The headline generated significant angst particularly from the named communities, those that rely on their rich heritage to reinforce their identity, their strong sense of history and the economic well being of their towns.

So to the question, "Is all news good news"? It is probably too early to call it, but as I write I can reflect that, while it was better than feared, it was worse than hoped.

To another audience it was more like the curate's egg, good in parts. If nothing else it has started a conversation, a conversation that needs to be had if the community is to continue to enjoy its origins and preserve its rich heritage.

A conversation that needs to be had with every generation and every new government particularly at this time as the important gives way to the urgent and the quiet voice of reason is ditched for a jingle.

The story spawned other TV, Radio and newspaper conversations, much of which confirmed again to me, and many, how much the National Trust and its good work is treasured and valued in the community.

It has also prompted many of our members and supporters to ask if the National Trust really does have plans to close properties to which I can answer that the board has no current plans to close any properties and we are working to find ways to make each sustainable in the long term.

On the general question of the Trust's overall financial state it is worth reflecting that the Trust movement is struggling worldwide with most organisations stretched to breaking point.

The exception is the UK which is unique in its size with millions of international visitors each year, more than four million members, large rental income streams and the support of a Heritage Lottery.

Will Holmes à Court

Consistently only those Trusts with some government funding are able to deliver the support the community expects.

The NSW Trust, like many "not - for - profits", has been losing money from operations for many years.

Our goal, as always, is to be "not - for - loss" but with the continuing fallout from the global financial crisis, the uncertainty in federal government and the crisis in the economy from the European debt market a new approach with new answers are required.

There's no magic solution. With new revenue streams being slow, the Trust has implemented aggressive cost cutting measures but the conclusion must be that these measures, failing additional support, are unlikely to deliver long term sustainability.

This leaves the Trust movement to face the harsh reality that if current expense and revenue trends prevail, some properties will have to close, no matter how distressing we find it.

So what can be done? The community must express its concern about the future of our state's historic properties and have a voice that will highlight to the government the Trust's very real and urgent plight.

The National Trust has approached the government for assistance to continue this necessary work for the community, and recently, in a response to the Minister for Heritage's request, has provided a proposal for a sustainable Trust, a response to which we sincerely hope means **"Lights stay on at historic homes".**

Will Holmes à Court leaves Trust

Since, making this above statement Will Holmes à Court has resigned from the National Trust of Australia (NSW)

He left the Trust on November 27, 2010 saying, "I am leaving the Trust to make room for a smaller and hopefully more sustainable organisation."

In the short time he was at the Trust he introduced new financial and staffing structures and made considerable in-roads to politicians at ministerial and other levels who are responsible for government funding to heritage programs.

From the editors mail box.....

Govett's reputation debunked

To the Editor

I was pleased to see the myth of the bushranger Govett exposed in ***HERITAGE*** - Issue 18. It has of course been exposed many times before, but to the annoyance of many it seems to stick.

Perhaps we need to recognise the myth as an interesting aspect of history in its own right.

Incidentally, those wanting a fuller analysis of the myth might read Peter Rickwood's chapter on the subject in *Blackheath: today from yesterday.*

My purpose in writing is to expose William Govett himself. As reported in the ***HERITAGE*** article, Surveyor General Mitchell wrote that Govett was "perhaps the ablest delineator of ground in the department" and "remarkably clever" at dealing with unexplored country.

In fact, Govett was so clever that in 1833 he engaged in what Alan Andrews has described as a "mass of inexcusable fakery" in mapping the ridges and streams draining the Newnes Plateau and Bell Range.

Faced with country too rugged for his pack animals, and confused about the course of the Colo River, Govett fraudulently drew a non-existent drainage system on his map.

Although his surveyor colleague Frederick D'Arcy, who surveyed the Colo and most of its tributaries, tried to point out Govett's "errors" to Major Mitchell, Mitchell preferred to believe his clever and able delineator.

He chose to adopt most of Govett's "mapping" on his famous 1834 map of the colony.

Govett's fraud was not discovered for a whole century, when the army undertook mapping with the aid of aerial photographs.

Govett did however contribute positively through his writing and drawing—aspects which I have drawn out to some extent in my recent book on D'Arcy.
Sincerely
Andy Macqueen

Dr Peter Rickwood, an indivdual member of BMACHO, the editor of BMACHO's *Blue Mountains History Journal* and editor and contributing author to *Blackheath: today from yesterday*. also drew attention to the existence of many more myths.

In his very well researched and referenced contribution to the Rotary Club of Blackheath's book, Peter suggests there are at least 11 myths.

He confirms that the article published in the last editon of ***HERITAGE*** is substantially correct as to the origin of the naming of Govett's Leap although "...no written statement by TL Mitchell [concerning Govett's claims] have been discovered."

Govett's Leap Fall, Blackheath 1905. Photograph Blue Mountains Local History Library Collection

In his chapter, 'Legends', Peter writes "... there are more fanciful stories about the naming of this waterfall, many of which were included in a speech given in 1899 at the luncheon to mark the opening of the track to the base of the fall."

From Peter's extensive research it seems, "...Govett's nephew, John Govett Smith, and others, went to a lot of trouble trying to dispel these 'legends' but the stories persist still, possibly to enhance the intrigue of the area and bring financial gain to the community."

Dr Rickwood goes on to state: "The installation was mooted of a board in an unspecified 'prominent postion' telling the truth about Govett's discovery, but it never eventuated .

"Instead, in 1974 the Blackheath Rhododendron Festival Committee commissioned Sydney sculptor, Arthur Murch to create a statue of horse and rider which was erected in Neate Park, and purports to commemorate one of these fables"

Editors note: In the interest of factual history ***HERITAGE*** does not wish to perpetrate these fables by further promoting these myths by recording them in this newsletter.

BMCC HERITAGE ADVISORY COMMITTEE MEETS

The recently formed heritage advisory committee of Blue Mountains City Council, met last month to introduce members and discuss the body's role.

It is anticipated that much of its work in 2012 will be involved with the heritage review of Local Environment Plan 1991.

The committee membership incudes 10 community members with considerable experience in a wide diversity of heritage.

Sculpture exhibition at Scenic World

by Lizzie Marshall

The Hammon family board's vision for creating a recurring sculpture exhibition was seen as a challenge on its own, but to create this event on the environmentally sensitive floor of rain a forest brought a whole new dimension to sculpture exhibitions. Scenic World's sculpture exhibition manager, Lizzie Marshall discusses in this article, some of these challenges

AS THE SCULPTURE exhibition manager, the central joy of my job has been the realisation of the Hammon family board's vision for a recurring sculpture show. This simple premise has turned out to be more involved than envisioned. The reality was to create an exhibition with the rainforest as a unique gallery that would enhance visitor experiences and provide a world class venue to showcase the art without competing with this unique setting.

My central aim, "of the highest artistic integrity" has had to be married with the considerations of the unique venue. This meant aligning artistic integrity with the environmental constraints of the fragile environment. This too has brought its own joys with resourcing the best advice in the individual fields of environmental and ecological concerns, heritage and cultural values, arboreal advice and a world class installation manager.

So where did my journey start. Firstly, the wonderful Blue Mountains Association of Cultural Heritage Organisations was key to my understanding that the environmental concerns were only one factor which would need to be considered when siting sculptures along Scenic World's rainforest boardwalk.

The rich cultural heritage of the area needed to be preserved, protected as well as complemented by the exhibition. Notable exclusions to sculpture sites extended to existing heritage items that are largely remnants from the past mining operations.

Blue Mountains City Council's development planning team were invaluable and eternally encouraging throughout the whole DA process. Their specialised interest in protecting the natural environment highlighted that one of the biggest considerations would be compaction of the soil on the delicate rainforest floor.

One of the wonders of this exhibition is how we are transporting the art into the valley. The Scenic Cableway is going to be occupied within the hours of 7am and 9am of the installation period for this purpose. The minimisation of footprint (soil compaction) replaced the previous constrictions of the Cableway's doors and carrying capacity. Previously the Cableway had defined the size and weight of individual sculptures (1.2 tonne being the heaviest it could carry in one go).

This drew new guidelines for our independent judges, Monica McMahon, UWS curator and Leonard Janiszewski, Macquarie University Sculpture Park curator, to choose works from the overwhelming response we had to our open call for submissions, that were "of the highest artistic integrity and took into account the consideration of the environmental footprint". This proved to be an interesting journey for our judges and we feel that as a result the most excellent of all outdoor exhibitions is headed to Scenic World from February 16 to March 11, 2012.

Amazingly of the twenty six artworks selected for exhibition eleven are going to be suspended from trees. Two new considerations arose from this: firstly, the consideration of damage to the trees and vines. Arboriculture Australia proved invaluable with their advice on best practice for suspending sculptures from the trees. Second consideration was to the suspension of the artworks is to the installation team which would be handling the delicate and valuable works. It is with great pride that *Sculpture at Scenic World* has contracted one of Australia's leading installation managers, Richard Harrison to instal our show. You may be familiar with his unsung work on the Biennale of Sydney's Cockatoo Island installations and most recently he worked with Australia's leading sculptor Ken Unsworth on his recent show at Cockatoo Island.

Sculpture at Scenic World opens to the public on Thursday February 16, 2012. There is a fully engaged program covering the entire three weeks providing plenty of opportunities to hear insightful lectures, meet the artists and experience free guided tours. The exhibition closes Sunday, March 11, 2012, with the final day featuring an artists' discussion panel at 3pm with *Sculpture at Scenic World* artists Nigel Harrison, Michael Mandelc and Bronwyn Berman who all work with metal in different ways to create their unique art. The event is free and will be chaired by Paul Brinkman, director, Blue Mountains Cultural Centre.

The impulse to sculpt

By Michael Mandelc --- Sculptor

One of my earliest experiences of sculpture was under the guiding hand of my grandfather who had me welding at age 10 years.

I can clearly recall the impulse to sculpt as the most natural and important thing to do, gladly the same urge remains with me to this day.

The opportunity to immerse myself in the workshop environment at that time opened up a vast world of possibilities. I was imprinted with the sensation of what it meant to put form up in space.

In as much as form follows facility so too one's environment as an artist can be considered the very seed bed for the origin of ideas.

Personally I feel one of the artist's primary commissions is the absolute need to develop their observation skills as if they were to serve as a sixth sense.

Hardly any means by which to continue securing this sense is excelled by the practice of drawing. In my mind drawing is fundamental and those that find it unnecessary may have forgotten to put the garlic in the soup.

In our time it has become increasingly challenging to actually define sculpture as it further occupies the junction between a temporal event and static form. From this time/space nexus tension is derived creating enormous expressive potential.

I do feel however that it is very important when venturing to extend and innovate upon the conversation that it be clearly rooted in context to both art practice and history.

It is important to differentiate between the nature of pure spectacle and the language of form, the difference between something that has been styled to appear like sculpture and work of greater depth that irrefutably commands its space.

I feel strongly about a studio practice that applies the use of studies as sculptural notions are developed.

This is something I inherited from my teachers whom I also assisted namely Stephen Walker OA and Alan Ingham. Both of these sculptors acted as assistants to Henry Moore.

Via this tradition it became increasingly apparent that when seeking to establish a framework within which to execute ideas one of the most potent and enduring principles is found in the discussion of materiality. Here is where one finds the natural sculptural integrity that great work is so charged with.

In my own case I explore a robust yet delicate flexibility in my work and in keeping with this the lost wax process has formed a practical mainstay.

With wax as the intermediary material it constitutes a highly versatile medium that not only affords me a reliable shorthand with which to quickly model but also allows the form to be 'read' as bronze while working on it.

The inherent characteristics of these materials accurately answer my approach to modelling and provide an intuitive vehicle by which to bring latent energies to the surface of my sculpture whilst also exploring negative space.

Pictured above is the artist's marquette of The Rod of Aaron which when placed in the exhibition stands about 2 metres high with the upper element being cast in bronze using the 'lost wax method (cire purdue) and then gilded in 24 ct gold leaf.

The Rod of Aaron

The sculptor, Michael Mandelc said his objective with this work, is to evoke a harmonic sentinel which signals perpetual rejuvenation.

"To do so, I have sought to break nature open, laying it vulnerable and then go on to clothe it in its environment.

"For all those who wander the green cathedral, a tuning fork. 'Rod of Aaron' engenders pause and place whilst spiritually charging it's surrounds, as it suggests, with unseen aspects abundant in the wild divine."

Visit the sculptor's website at www.michaelmandelc.com

***Sculpture at Scenic World* - Katoomba opens to the public Thursday February 16, and runs to March 11, 2012.**
www.scenicworld.com.au/sculpture

Journals of early coastal explorers --- download sources

by Peter C Rickwood

Whilst it may not be common for residents of the Blue Mountains to have the need to browse the journals (or diaries) of the 18th and 17th Century coastal explorers, when they do so then printed copies are usually only available in distant libraries.

But to some extent this problem has been eased due to the release of many full text versions on various websites.

However some of these sites can be difficult to locate so provided here are the URLs for many that I have hunted down whilst researching in recent months.

Unfortunately, not many first editions have been digitised and the printed copies are of such high value that few regional libraries have been able to afford them; hence often they can only be consulted in the Mitchell Library.

Facsimile copies are usually authentic versions of the originals but with an added preface or introduction giving background information about the author or subject matter. They are reliable.

The sketch of natives cowering in a shelter watched over by soldiers is of significance because it was drawn by Captain John Hunter who came in 1788.

Transcriptions are usually reasonably accurate but at times editors have been known to change spellings, mostly to correct the work of semi-literate writers; e.g. in one case 'staid' was corrected to 'stayed'.

One such editor admitted to having amended inconsistent punctuation and to have broken up over-long paragraphs, etc.

Such cavalier action can result in the author's meaning being altered so if a nuance is important then it is wise to consult the first edition of the journal or diary.

Secondary sources can be helpful but caution is needed as authors tend to paraphrase the original words of an explorer.

Be particularly careful not to rely on Wikipedia!

Wirraway crashes in Blue Mountains

by Peter Chinn, Springwood Historical Society

At about 10.00am on Thursday, August 1,1940 a Wirraway aircraft of 22 Squadron, piloted by Pilot Officer Harry Hopwood with observer Sergeant Vincent Monterola, took off from the RAAF base at Richmond for a training flight over the Blue Mountains in company with another Wirraway.

The Wirraway was a single-engined, two-seater aircraft built in large numbers prior to and during World War II by the Commonwealth Aircraft Corporation at Lidcome.

It was based on the North American Harvard trainer. Although originally a trainer the aircraft was also used by the Royal Australian Air Force as a dive-bomber and fighter.

It was, however, no match for the Japanese Zero fighters over Darwin or in Papua New Guinea. The Wirraway was generally armed with two .303 calibre Vickers machine guns and capable of carrying four 250 pound bombs.

No records are available to tell us what the weather was like at Richmond on that morning, however the central Blue Mountains were shrouded in heavy mist which was not unusual for that time of year.

Around 10.30am witnesses reported seeing an aircraft emerge below the mist above Hazelbrook railway station (elevation 2,200 feet), passing over the roofs of houses and narrowly missing a telegraph pole.

A few minutes later residents in Railway Parade, overlooking the gorge of Bedford Creek to the south, heard a crash then saw flames and black smoke shoot into the air some kilometres to the south.

The Wirraway had crashed into a hill on the southern side of Bedford Creek in an area only accessible in those days by scrub-bashing through precipitous and thickly-timbered terrain.

Mrs. Campbell, a Hazelbrook resident, contacted Constable Paine of Lawson Police who informed RAAF Richmond of the crash.

Her daughter, Miss Mary Campbell was a cubmistress at Hazelbrook who had often taken cubs and scouts for hikes in the region and led a police party to the site.

Two brothers, Harley and Irving James arrived at the crash site first. They told reporters that they had heard the two planes pass over Hazelbrook and to be just above the low clouds.

Much of the fuselage and a wing remain, partly hidden in thick undergrowth

They had found the remains of the aircraft still burning with the body of the pilot in the cockpit. The body of the observer was about twenty metres away near the top of the ridge.

The James brothers said that the aircraft had torn through trees for about 400 metres, tearing off branches as if they had been lopped.

Portions of the aircraft and a flying helmet were hanging from some of the broken trees, and fuel had set these items and the trees alight. The fire around the aircraft was fierce and a large area of bush was burnt.

Harley and Irving stated that some parts of the Wirraway were not burnt and were strewn over a wide area. They thought that the aircraft had impacted at about 200 miles per hour.

Pilot Officer Hopwood (26) was married and a resident of Mosman.

He had joined the Citizen Air Force at Richmond in 1934 and was called-up for full-time service with the RAAF in May 1940.

Sergeant Monterola (23), married, from Wentworthville, had enlisted in the RAAF in 1936.

The crash was thoroughly investigated by the RAAF and a report submitted to the Secretary of the Department of Air.

The investigators came to the conclusion that the cause of the crash was that “The aircraft had flown into cloud and probably spun out”.

I have visited the crash site a number of times with fellow-bushwalkers – reasonably accessible now due to the construction of a multitude of fire trails over the past thirty years or so but in 1940 it must have been a solid slog via Bedford Creek gorge.

While the crash site is only 3.5 km as the crow flies from Hazelbrook station the easiest access today is from Wentworth Falls via Kings Tableland Road, Queen Elizabeth Drive onto the Williams Ridge Fire Trail for about four kilometres before striking north another four kilometres on an unnamed fire trail

You have to look out for a crude cairn on the left of the fire trail (which is easily missed), then with the aid of a compass make a short ascent up and over the small ridge for about 100 metres to locate parts of the Wirraway just below the crest, still there after 71 years.

Continued page 17

WIRRAWAY CRASH

A Wirraway

Continued from page16

Much of the fuselage and a wing remain, partly hidden in thick undergrowth beneath the tall trees – a last reminder to the occasional visitor of this tragedy in the wilderness.

Unlike the site of the RAAF Avro Anson crash at Glenbrook on January 28, 1940, which claimed five lives, there is no plaque to record the accident. However, someone has placed the remains of one of the Wirraway's instruments in the cairn by the track to secure its identification with the crash.

While there is no tangible memorial to the deceased air crew authorities some years ago designated the area "Aeroplane Hills".

Woodford Academy open day

The National Trust property Woodford Academy will have an open day on Saturday, January 21 between 10am and 4pm.

Enjoy the special atmosphere of the property which includes a fine example of colonial kitchen and a rare segmented arch of the fireplace. Home made morning teas are served on the balcony with Blue Mountains vistas.

Admission $6 adults, $4 concession, $3 child. Enquiries Marilyn Wright 4758 7809

War stories --- do you have a war hero in your family?

The reason we say war hero is that all men and women, who served in any war are heroes in our eyes.'

The Lithgow & District Family History Society Inc. is embarking on a new project which will focus, to begin with, on World War 1 and then continue on to World War 2.

If anyone has a story to tell of a loved one who served in World War 1 the project organisers would like to hear from them.

The object is to compile the war history and stories of these gallant men and women who willingly gave their services to fight for their country.

The society feels that these histories should be recorded for future generations.

Once they are gathered and compiled they will hold a very special place on the society's library shelves for all researchers and family historians to appreciate.

The society also envisages having the stories published in the *Lithgow Mercury* and in the Society's quarterly journal.

Even if individuals only know of their involvement in the war but don't know what their history is and would like to find out more, then the society can help people achieve that goal.

Anyone having photographs of a loved one can also be added, which makes the records so much more complete and interesting.

The amount of information which can often be found in the war records is very rewarding, such as place of enlistment, where they served and any battles they in which theyfought.

In cases where the person died in battle or from illness, it is usually recorded along with letters sent to family and occasionally photographs are also to be found.

The society holds a large collection of the *Lithgow Mercury* dating right back and in these newspapers there were many mentions of servicemen and women. Simple things like a letter sent home to a loved one,

or a soldier being wounded or killed in action, and quite often someone being admitted to hospital with an illness.

The society also has a collection of a few English war newspapers which make very interesting reading.

For more information please contact Lithgow Family History Society members Cecily McCarten on 0408 676 638 or Helen Taylor on 63 557231.

They would like to hear from individuals and of course if anyone is thinking of becoming a member of the society they would be made most welcome.

Post script: The soldier pictured above is George Joseph Mara from Portland near Lithgow the great uncle of Helen Taylor.

The photograph was taken in France, during World War 1.

He was wounded in action twice and survived, went to hospital twice with trench feet and once with mumps and then died of pneumonia 16 days after the Armistice was signed.

Helen has a letter he sent home to Helen's grandmother only two weeks before the war ended.

He is buried at Villers-Bretonneux Military Cemetery.

"Such a sad story but one that is dear to my heart," says Mrs Taylor.

Contributed by Helen Taylor, Lithgow Family History Society

Researcher finds three brothers who served their country as soldiers

HERITAGE published in its last edition a piece about The Bob Howard Award for 2010 which had been won by Vicki Wilson, for her article "Private Joseph Harold Nevill, Service No. 269". The award is made each year by the Blue Mountains Family History Society for the best researched article from The Explorers' Tree magazine. This article giving an insight into just how Vicki went about her research is now republished.

by Vicki Wilson

Private Henry James Nevill
Born 1894 Balmain, NSW
Died 1916 Fromelles, France

Since 2009 when the remains of the allied soldiers were discovered near the Belgian border at Pheasant Wood, Fromelles, France, I have listened and read with interest the articles about these men and the construction of the cemetery dedicated to them.

It was with amazement that I discovered that my family was part of this story.

In October 2009 I attended the family history fair at Lemon Tree Passage Bowling Club which is hosted by the Port Stephens Family History Society.

As usual I travelled with my three friends Sharon, Judy and Lorraine and we stayed in a townhouse for a weekend of non-stop fun (oops, that should read catching up on our family history).

Late one night Judy and I were chatting and the subject of what family lines we had not done much on, came up and fortunately, though a little embarrassed, I admitted that I had not touched my fathers' maternal line.

I could not remember why, it could have had something to do with researching in Queensland or the Sydney Smith, Elizabeth Jones marriage; a union that I didn't want to touch in the early days of my research.

I left Lemon Tree Passage having undertaken to concentrate on my Moore and Nevill lines.

When I arrived home I didn't unpack, I put my bags down and sat in front of the computer… this is what happened!

Working backwards from what I knew I entered my grandmother's name "Dulcie Jessie Moore" into Google and only one hit appeared[1], a posting on RootChat.com, a family history mailing list. My grandmother was part of the family tree included in the posting entitled 'Fromelles missing – Nevill (NSW and Qld)'.

The posting read:
'We are looking for living relatives of the following soldier. There is also a need to combine the family tree to do DNA testing if it proves viable. There is loads of info about him, so we hope to be able to trace the family. Grateful for any help…. Ruskie'

According to this family tree my grandmother was the niece of Joseph Harold Nevill, service number: 269, a private in the 31st Battalion AIF, aged 22 when killed in action on July 19, 1916, his place of burial unknown.

Within three minutes of me responding to this post I had a reply from Sandra, who along with Tim Lycett, are the administrators of the 'Fromelles Descendants Database'[2].

They and other posters on the RootsChat.com mailing list have not only been most helpful in aiding my research of Joseph but also my Nevill line.

My next port of call was a link on the 'Fromelles Descendants Database' to the Fromelles page on the Australian Department of Defence website[3] where I registered as a relative of Joseph Harold Nevill, I also discovered that there were other relatives registered so I gave my permission for my details to be passed on to them.

I then accessed the National Archives of Australia site to view his 41 page digitised military file[4], the Australian War Memorial site to view his Roll of Honour Circular[5] and his 12 page Red Cross Society Wounded and Missing Enquiry Bureau file 1914 -18 War 1DL/0428 which is also located on the Australian War Memorial site[6].

From these websites I learned that Joseph Harold Nevill (1894 - 1916) was born in Balmain, NSW, the son of Henry James Nevill and Ada Smith (the daughter of the previously mentioned Sydney Smith and Elizabeth Jones).

He had attended the State School, Indooroopilly, Queensland and was apprenticed to Mr Bonney of Brisbane as a leather bag maker in July 1915 when he enlisted.
Continued page 19

THREE BROTHERS WHO SERVED THEIR COUNTRY. From left Private JH Nevill (killed in action) Private BH Nevill and Corporal SG Nevill. This photograph appeared in The Queenslander Newspaper on July 27, 1925

Continued from page 18

I learned that two of Joseph's brothers had also enlisted: Stanley Cecil Nevill in August 1915 in the 5th Light Horse and Bertram Henry Nevill in April 1917 in the 30/2 Light Horse, both returned after their tours of duty.

Joseph departed Australia and arrived at Suez on the December 7, 1915 aboard the *HMT Wandilla.*

The next recorded event in his file is a 48 hour punishment at the Ferry Port on May 6, 1916 for conduct to the prejudice of good order and military discipline.

He then boarded the *HMT Hororata* at Alexandria on June 16, 1916 for an eight day voyage to Marseilles and is then recorded as missing in action in the field on the July 21, 1916 in the neighbourhood of Fromelles.

'Victory Medal sold for $80'

Dear Sir,
I regret to have to inform you that I have received the following cable from London:-'269 Pte J. H. Nevill 31st Btn. name appears German death list

JH Nevill

Fromelles Cemetery

We are advised that these lists are really made from the discs gathered by the Germans from the dead bodies in the trenches and that no date or place of burial is mentioned the soldiers did not live to be prisoners and that the bodies were buried by the Germans.
Yours Faithfully,
George Scott Hon. Sec'.[7]

The identity discs referred to in the letter were returned by the Germans to the War Office on February 24, 1917 but it wasn't until June 1919 and after many pleading letters that Joseph's family learned his fate:

Dear Madam,
We have received the following statement from our agents in London
'On the evening of the 19th July 1916, I was standing close to the above man and saw him killed by concussion from a shell. His death being instantaneous there being no wounds.
'This happened in No-Man's Land and it was impossible to remove him for burial as he was close to a German outpost.
I.W. Fuich,
Yallock , Via Kooweerup Victoria'[8]

Sadly, I found Joseph's Victory Medal had been sold at auction for $80 in September 2008[9].

Within three days of registering with the Australian Department of Defence I had a call from Chloe Wootten, communications manager, Australian Fromelles Project Group (ASFPG), who is the liaison person for the Fromelles Project.

Chloe first needed to establish that I was a relative of Joseph and, once confirmed, proceeded to tell me the Nevill family history that she had collected as part of the project. I still have a lot more research to do to fill in the gaps.

Joseph's father Henry James Nevill (November 28, 1858 - June 21 1943) was born in Burton on Trent, London to Benjamin Nevill and Isabella Mayger.

Henry was married three times. His first marriage was to Margaret Peters in London in 1878[10], they had two sons: Henry Richard in 1879 and Albert Edward in 1880[11].

On January 28, 1884 Henry married Ada Annie Smith at Bethel House; George Street North, Sydney. Mabel Isabel (my great grandmother), the first of their nine children was also born in 1884[12]. Joseph Harold born 1894 was their seventh child. Ada died of pneumonia on March 8 1898[13], thirteen days after the birth of her ninth child Roy. Joseph was three at the time.

Henry next married Gertrude Elizabeth Sexton in Queensland in 1899 and there were eleven children from this marriage.

It is understood that Henry and Ada's nine children remained in Sydney and travelled to Queensland after his marriage to Gertrude who raised them as her own but more research needs to be done on this.

A descendant of one of Henry James Nevill's first family in England has donated his DNA to the Department of Defence in the hope that Joseph's remains may be identified therefore enabling him to be buried with a named headstone in the new military cemetery in Fromelles.

Fortunately, more DNA samples have become available if the first sample is inconclusive; one from a cousin of Joseph's and also my father, George Maxwell Horne, a great nephew of Joseph.
Continued page 20

DNA identified soldier killed in 1916

Continued from page 19

The Fromelles (Pheasant Wood) Military Cemetery was dedicated on the 94th anniversary of the battle on July 19, 2010.

Less than five months ago I knew nothing about this line of my family and from a few words in a conversation this wonderful discovery emerged. I have found family members in South Australia, Queensland and England through the internet with whom I now correspond and more amazingly, I am going to be in Fromelles to be part of this wonderful event!

For more information about the battle and the cemetery have a look at these sites:

EDITOR'S NOTE

Subsequent to the research in this article the author Vicki Wilson was advised by the Defence Department that it had a positive match with the DNA collected from a relative and the remains of Joseph Harold Nevill.

This meant that Private Henry James Nevill would be buried with a named headstone.

Vicki continued to research the family line through the usual sources.

Through the Defence Department's Fromelles Project she was put in contact with Maureen McLaren who lives in South Australia and who is related to Joseph through his father Henry's first marriage to Margaret Peters. Maureen and her cousin David Neville [Nevill with an 'e'] had registered with the Fromelles

Headstone of Pte JH Nevill buried in the Fromelles Military Cemetery.

Project some time ago and David had donated his DNA in the hope of being able to positively identify Joseph's remains.

Viki Wilson had already planned to be in Europe in August 2010, so did not hesitate to alter her itinerary to include the dedication of the new military cemetery in Fromelles which was held on July 19, the 94th anniversary of the battle.

Joseph Harold Nevill is located at 2F in the cemetery where a ceremony was held in the presence of HRH the Prince of Wales, the Duchess of Cornwall and the Governor-General of Australia.

BLUE MOUNTAINS HISTORY CONFERENCE 2012

To be held at the historic Carington Hotel, Katoomba on, Satutrday, October 20
Conference title: Colonial Society

Official opening by Associate Professor R Ian Jack
Keynote speaker: Dr Shirley Fitzgerald - The early years of the colony
Segment 1 The effect in the Indigenous population with the establishment of a European colony
Segment 2 Colonial dress (Glynis Jones, Powerhouse Museum)
Segment 3 Nature and role of gardens in the early settlement period (Silas Clifford-Smith, Archivisit, Heritage Centre, UNE).

For further information and early bookings (capacity limited to 120 participants) to Jan Koperberg at
j.koperberg@bigpond.com or bmacho.heritage@gmail.com

BMACHO committee meets at Scenic World

THE 10 MEMBERS OF BMACHO's management committee meet every month to discuss and decide on various activities in which the organisation is engaged.

Without a permanent home, various organisational members host the committee either in their own premises or in rooms they have hired or 'borrowed" for the day.

The December 2011 committee meeting was held in the board room of Scenic World which is an inaugural member of BMACHO.

The Hammon family owners of Scenic World with their normal generous hospitality not only provided the meeting facilty and morning tea, but also arranged for committee members to have a guided tour of the complex which includes the Scenic Railway, the Scenic Walkway across the rain forest floor with relics of the mining village which once was home to early miners and the Scenic Cableway across the valley. **Photographs courtesy Peter Stanbury, OAM**.

BMACHO president, Pamela Smith with guest speaker Will Holmes a' Court at the December committee meeting

On the board walk in the rain forest at the bottom of the Scenic Railway. From left to right, Dave (Scenic World guide), Doug Knowles, Jan Koperberg (partially hidden), Dick Morony, John Leary, Ian Jack and Suzanna Edwards

Patsy Moppett becomes an individual member

A TOWN PLANNER and heritage officer in local government for some 18 years, Patsy Moppett is the latest person to be welcomed to BMACHO as an individual member.

Patsy has worked at Camden, Bathurst, Evans, Lithgow and Cabonne councils.

In local government her work included management of the heritage programs for a number of these councils.

The programs included the heritage advisory service, heritage committee and the local heritage fund of those councils.

Currently she works for a private consulting company in Kelso near Bathurst undertaking planning, heritage and environmental research and reporting.

She has a Bachelor of Town Planning Degree and a Diploma in Conservation and Land Management, and completed other courses related to heritage, planning law, property planning, the environment and permaculture.

Patsy is involved with a number of community organisations including National Trust of Australia (NSW), Cox's Road Project Committee, Evans Arts Council, Dry Stone walls Association of Australia, various central west family history groups and historical societies, and Convict Trail Project on the Great North Road.

She also undertakes history and heritage research and report writing, having written the book, "A History of Cow Flat".

Patsy is currently working on a history of the Lower Turon goldfields, and various family history projects including one which records her father's travels across Australia, the world and his trip to the Antarctic.

Patsy Moppett

Patsy has four grown children and one grandchild, and lives at Yetholme between Bathurst and Lithgow. She undertakes bushland regeneration projects on her land at Yetholme in consultation with and through funding from the Central West Catchment Management Authority.

Claim of wrong plaque for heritage grave

On Saturday, November 5, 2011, I was speaking to a man from Lower Portland whom I had casually met at the Hawkesbury River near the location of the Aborigines' Reserve.

He knew of the popular word for the people there as Dharug (which he pronounced 'Darug') when referring to them.

Obviously, I corrected him by mentioning new findings from my research of original source records which confirmed the people from there as Darkiñung.

His response was unexpected: Why would it matter - they're just Aborigines.

He may have meant they were, but I was able to point out that they are, and some of the descendants of these Darkiñung people are living round about where we were talking.

Yet, it was not until I told him that it was the same as saying Switzerland was part of Italy that he showed any comprehension.

He acknowledged the point by responding with the common example of Irish and English being separate. [In my 2010 thesis, I use Poland and Spain as an example, commentary fn.29 p.262.]

That evening, I was talking with a Windsor tour operator known locally as a 'self-appointed historian' of the Hawkesbury, who had on Sunday September 18, 2011 placed a plaque in the state heritage C of E cemetery without bothering with the authorities from whom permission was required.

He has brushed off such oversights with his suggestion that others should have contacted him.

I raised the issue that the previously unmarked grave had had a false inscription placed there, labelling the Aboriginal occupant Andy Barber as 'Darug'. Andrew, his father and his family, were all identified in their lifetime as Darkiñung.

Although one of Andy's sisters' granddaughters was at the graveside, she was completely disregarded in favour of politically active people with no relationship to the family - but who claim ancestry from the Georges River Dharug at Liverpool.

She had told me she did not want to make a fuss at the church, and the operator again told me it was up to her to have contacted him beforehand - although he had been told about the Darkiñung in February.

The 'punch-line' from my discussion that evening was that the operator said it doesn't matter, they are only Aborigines.

He pointed out what a good thing he'd done by commemorating them with his plaque, so it didn't matter whether he was correct or not. [In my 2010 thesis, I note this attitude that it does not matter several times, with eg commentary fn.24 p.260.] **I disagree - it does matter**.

Contributed by Dr GE (Geoff) Ford who recently published a thesis titled *Darkiñung Recognition f*or a Master of Arts (Research) Degree at the Universty of Sydney

Life membership for two Lithgow stalwarts

THE LITHGOW & District Family History Society Inc. (LDFHS) recently had the pleasure of recognising one of its members with a very well deserved life membership.

Jan Saundercock joined the LDFHS as one of its founding members in 1986.

Over the years in her time with the society Jan has held the following positions: president, secretary, treasurer, librarian, minutes secretary, newsletter editor, indexing convenor, publishing officer, public officer and librarian which is no mean feat.

Jan has worked tirelessly in each and every role she has undertaken and has always given 100%.

Like many other committee members, Jan has had some very trying personal times in recent years through which she still had the society's interest at heart.

Jan has organised numerous seminars and just recently she ran a very informative day on how to use the library which was just fantastic.

It was with much pleasure that the committee members congratulated Jan and asked her to accept her badge and certificate of life membership of the Lithgow & District Family History Society Inc.

Also to receive life membership was Kathy Brennan who joined the society in 1989 just three years after its inception and went straight into the position of library convenor.

Kathy has retained this position ever since without a break. Kathy is very well deserved of this life membership as she always puts 100% into everything she does, and it's not only handling the job of llibrarian but she has many other roles as well.

Kathy has been there for all functions including the Festival of the Valley floats for every year the society had a float she participated in them.

Left to right LDFHS president, Eleanor Martin with life members Kathy Brennan and Jan Saundercock

The many cake stalls, bingo nights, garage sales just to name a few fundraising ventures which have benefitted from her involvement. It was very fitting to see Kathy receive her life membership at the 25th anniversary luncheon in front of a large crowd of members and friends and her husband Brian who has always been very supportive as well.

Shakespeare at Everglades

THE HIGHLY successful Leura Shakespeare Festival returns to Everglades for its third season in January 2012.

The festival will feature two brand new plays, William Shakespeare's *Macbeth* and *The Taming of the Shrew*.

The outdoor theatre festival, a partnership between The National Trust and Sport for Jove Theatre, is based at the stunning Everglades Gardens, Leura and tours to the historic Norman Lindsay Gallery, Faulconbridge.

Featuring a superb ensemble cast and directed by acclaimed director Damien Ryan, this wonderful summer experience is not to be missed. Matinees 2pm, evening performances 7pm.

2012 Season dates:
Saturday and Sunday January 7 and 8 at Everglades Gardens; Friday – Sunday January 13 - 15 at Everglades Gardens and; Friday– Sunday January 20 -22 at Everglades Gardens, and then Friday Saturday January 27 and 28 at Norman Lindsay Gallery.**Cost:** $32 adults / $26 concession (with card) / free for children 8 years and under. Combined show tickets available but only in advance.**For more information:** call (02) 9439 5683
Bookings Essential

The golden Pyrmont sandstone arch which forms the dramatic backdrop to the stage in the Garden Theatre at Everglades was originally the recessed entrance to the London Chartered Bank of Australia on Sydney's George Street.

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or its really going to happen

Lithgow City Council creates 2013-15 commemoration committee

LITHGOW CITY COUNCIL has established Section 355 Committee to oversee activities and in Lithgow LGA to commemorate the Bicentenary of the Crossing of the Blue Mountains by Europeans in 2013.

Mayor Neville Castle said, "This event is a highly significant one in the history of our nation.

"Events are being held from Penrith through to Bathurst and as the concluding point for Blaxland, Wentworth and Lawson's expedition, Lithgow plays an important role in these commemorations."

Lithgow Mayor, Cr Neville Castle

Mayor Castle told the inaugural meeting of the committee that there was an over arching committee under the auspices of the Royal Australian Historical Society.

The principle responsibilities of the Lithgow committee are:

- To monitor activities commemorating the Bicentenary of the Crossing of the Blue Mountains in 1813 and the completion of Cox's Road in 1815.
- To provide advice to community organisations which are planning their own events
- To ensure that perspectives of Aboriginal traditional owners are acknowledged in commemorations
- To assist Lithgow Council with other councils and other relevant organisations
- To assist council to lobby other governments for funding and other forms of support.

Lithgow Council will consider allocating in the 2012/2013 management plan funding of $20,000 comprising $10,000 in cash and $10,000 in-kind support towards the events.

The committee terms of reference specify membership of the following organisations: two councillors, three representatives from the Hartley District Progress Association and one representative from the following groups, Blue Mountains Association of Cultural Heritage Organisations (BMACHO), National Trust, Cox's Road Project Committee, Royal Australian Historical Society, Lithgow District Family History Society, Mingaan, Wiradjuri Council of Elders, Gundungurra Tribal Council, Hartley Vale and Mt Blaxland Reserve Trust.

Joan Kent will represent BMACHO on the committee.

Commemorative stamps and coins

Australia Post and the Australian Mint will issue two commemorative stamps and a coin for the bicentenary.

Blue Mountains City Council was making public domain pictures available to the Mint and Australia Post.

Maps to be digitised

State Records of New South Wales will digitise relevant maps of the crossing.

Ian Jack has advised he has identified 24 maps from 1814 – 1815 of the various crossings.

These maps will be available on the Spatial Information Exchange (SIX).

Landmarks Gallery links

The National Museum of Australia is developing plans to link its new Landmarks Gallery with the bicentenary commemorations

George Main, a curator at the Museum has advised that the Blue Mountains is one of the landmarks and the Museum will be looking at the consequences of the crossing, with stories and artefacts, including the Jackie Lewis breastplate.

State Library travelling exhibition

The State Library of New South Wales is considering a travelling exhibition/display.

Prof. David Carment has advised when he met with Mitchell Librarian, Richard Neville, recently he (Neville Richard) was keen to have the State Library participate in the bicentenary commemorations.

Heritage grant application

The RAHS's Council has given approval for David Carment to submit an application for funding of an events website, under the Your Community Heritage grants program

1813 Pioneer Way signs

NSW Roads and Marine Services are trying to resurrect the old 1813 Pioneer Way signs.

Schools involvement

Penrith City Council has indicated it intended to invite all local schools to be involved in events in that area.

The next meeting of the Western Crossing Committee will be held at the Hobby's Reach Research Centre 99-101 Blaxland Road, Wentworth Falls at 2pm, Friday February 17, 2012.

100 years ago this month.....
Scott's fatal journey to the Pole

AN ANTARCTIC march which had commenced on November 1 the previous year culminated a century ago this month when Robert Falcon Scott and his four companions reaching the South Pole on January 17, 1912 only to find that the Norwegian Roald Amundsen had preceded him by five weeks.

Scott's anguish is indicated in his diary: "The worst has happened. All the day dreams must go. Great God! This is an awful place. "[1]

The disappointed party began the 1300 km return journey from the Pole on January 19 and made good progress despite poor weather, completing the Polar Plateau stage of the trip some 300km by February 7.

On February 17, Edgar Evans died near the foot of Beardmore Glacier.[2] after an earlier fall

On March 16 Lawrence Oates, barely able to walk voluntarily left the tent and walked to his death., his last words being recorded in Scott's diary: "I am just going outside and may be gone some time".[3]

The three remaining men, Scott, Edward Wilson, and Henry Bowers made their final camp on March 19, in a fierce blizzard. On March 23 Scott made his last diary entry, and it is presumed he died that day.

The world was informed of the tragedy when the expedition's ship *Terra Nova* reached New Zealand on February 10, 1913. Within days Scott became a national icon.

Scott had returned from his early expedition to the Antarctic in 1904 to become a popular hero, a status he held for more than 50 years after his death. He was awarded a cluster of honours and medals and promoted to the rank of captain.

Scott's group took this photograph of themselves using a string to operate the camera shutter on the day they reached the South Pole

Scott's reputation survived the period after World War 2, beyond the 50th anniversary of his death. In 1966 Reginald Pound, the first biographer given access to Scott's original sledging journal, revealed personal failings which cast a new light on Scott.

1. Huxley, *Scott's LST Expedition* Vol. 1, pp.543-44.
2. Huxley, *Scott's LST Expedition* Vol. 1, pp.572-73.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: j.koperberg@bigpond.com or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Hartley Valley District Progress Association, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committee, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Pastsy Moppett, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2011-12 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Joan Kent (treasurer), Jean Arthur, Doug Knowles, John Leary, Dick Morony (public officer), Kathie McMahon-Nolf, Barrie Reynolds and Peter Stanbury.

HONORARY AUDITOR: Sue McMahon, B Comm CPA.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

MARCH - APRIL 2012 ISSUE No. 20

Grand house victim of bushfire now a ruin

By John Merriman, Local Studies Librarian, Blue Mountains City Library

THIS burnt out building ruin on the side of the Great Western Highway at Faulconbridge was once a grand house with a tower built for a wealthy businessman Andrew McCulloch in the early 1880s.

The stone used in its construction was quarried nearby and the work was carried out by a well known local stonemason, Patrick (Paddy) Ryan.

McCulloch furnished his country house using the exclusive Sydney firm of Lyon Cottier and Co.

The property boasted a tennis court, flag-staff and beautiful gardens and an ornamental lake made by damming a gully.

McCulloch named his new residence 'Weemala', an Aboriginal word said to mean "an expansive view", and spent the next few years developing the grounds.

However, at the end of the 1880s, he began to experience financial difficulties and sold the property to JW Cliff in 1889.

When Cliff sold the property, then totaling about 113 acres in 1907, the new owner, a solicitor named George Evans, changed the name to 'Eurama', said to be a Greek word meaning much the same as the earlier Aboriginal one.

Evans had also purchased the neighbouring house, 'Numantia', a wooden cottage adjacent to the railway line with its own rail platform, built in 1877 by Sir James Martin, and to this he transferred the name 'Weemala'.

This has proved to be a source of great confusion and many people today still refer to 'Eurama"'as 'Weemala'.

When George Evans died 'Eurama' passed to his daughter, Mrs Emily Ethel McLaurin.

It was later sold to Mrs Katherine Nathan in the 1920s and around 1930, to Mrs Daisy Brown.

Following Mrs Brown's death the building was left vacant for a time and suffered from some vandalism. Over the ensuing decades many owners had their dreams cut short.

The depression, war and other hard times, falling on the owners. In the early 1960s the then owner, Mr Adams, set about restoring the decaying property.

Restoration had been completed just prior to the disastrous bushfires on 1968.

The fire consumed the house in all its grandeur and the building remains a ruin today.

As a postscript to the 'Eurama' story, the Blue Mountains City Library was given permission by Mr Watkins, the then owner, to stage an open air children's adventure theatre performance there during the Bicentennial celebrations in 1988.

With the ruins as a backdrop the property proved a most effective site for this project.

An opinion from the editor.....

Western crossing bicentenary gets a dynamic boost

THE REGION is indeed fortunate to have many dedicated and enthusiastic volunteers engaged in heritage and history work. This small army of people from Penrith to Bathurst is doing a great job in planning commemorations and celebrations for the 2013 -15 bicentenary of the crossing of the Blue Mountains, the discovery and development of the golden west.

BMACHO, the Royal Australian Historical Society and the National Trust of Australia some 6 or 7 years ago sounded the alert that 2013 -15 would be a golden opportunity to create a lasting commemoration, of the western crossing almost 200 years ago and the events that followed culminating in Governor Lachlan Macquarie arriving by coach in Bathurst to proclaim it a township.

Gradually local government has come on board with token finances from their limited resources for the project, while the state government at several levels including that of the premier and federal local members have promised support.

All this interest is welcome and part of the need to involve government at all levels and the people of this community who must be an integral part of the planning and event operating process.

But what has been lacking up to date has been a person or persons who might drive this project and bring to reality this great opportunity.

Just such a force has now emerged with the formation of the Business Supporting Bicentenary (BSB) funded by Phil Hammon of Scenic World and Tom Colless of Colless Foods. This body could take a key role in securing an estimated $3 million in government grants and company sponsorships needed to make the events reach their potential.

[Some 4 years ago a rough calculation by BMACHO's executive suggested a budget of $5 million. BSB has no doubt refined BMACHO's earlier 'guesstimates' which included $2 million government and sponsorship funds for developing public access and innovative interpretive signage at various sites along the original Cox's Road between Emu Plains and Bathurst]

Phil Hammon and Tom Colless are dynamic businessmen who have the Blue Mountains very much at heart and in the past have not been slow to "put their money where their mouth is". Their strong leadership in this vital part of the bi-centenary celebration and commemoration is the link in the chain the project so badly needed

However, the Western crossing is not just about Katoomba nor even the Blue Mountains. It is about the whole region from Penrith to Bathurst and possibly Parramatta, Blacktown and the Hawkesbury.

It is ludicrous to think no matter how many "Memorandums of Understanding' local government might sign that it has the capacity to co-ordinate, obtain the government and private funding and then manage the event on a regional level.

It is also a recipe for disaster to ignore the tremendous amount of work that has been done by the volunteers, in historical societies, National Trust , BMACHO and others in the heritage sector. This group under the able chairmanship of RAHS president, Professor David Carment has done much of the preliminary work.

It is after all, primarily a commemoration of a major historical event. The aim should to be to use the commemoration to exploit the tourism potential which must then benefit the region's economy. Government funding is more likely to come for a regional project, rather than a series of parochial events.

Federal and state government should seize the opportunity to demonstrate how our heritage linked with tourism is good for the economy of the nation.

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

Property name changes cause confusion

Weemala (1880s) became Eurama (1907)

Numantia (1877) became Weemala (1907)

The Eurama owners

The subsequent owners of 'Eurama', who consolidated it into one estate and expanded that estate to the present 141 hectares, have been of individual significance: Andrew McCulloch as the epitome of the ruthless wheeler and dealer in sellable land next to a projected railway, the politician, conveyancer and real estate speculator who always had inside information, an anti-hero of the 1870s and 1880s; JW Cliff, as a lesser player in McCulloch's world; George Evans as a proselytiser for the Mountain tracks, the eponym of Evans Lookout, the builder of the State-significant 'Eirene' (now 'Cleopatra'); his daughter, the formidable Emily MacLaurin, and her husband, as heirs to the Rouses and Fitzgeralds, as well as the Evanses and the MacLaurins, who brought the first motor-car to the stables at 'Eurama' and the first Rolls Royce, and reigned there with something of the old-fashioned authority of the quondam squattocracy, leavened by scholarship of which Badham would have approved.*Source: NSW State Heritage statment of significance*

Continued from page 1

'Weemala' is now situated close to the rail line behind the high stone wall.

The cottage originally on this site was erected about 1877 for Sir James Martin KCMG. It was to be his country residence and was named 'Numantia'.

Numantia being a region in Spain and it has been said that Sir James thought the countryside here similar to that of Numantia, Spain.

It was a wooden house set behind a high stone wall.

Sir James had acquired a large amount of land from Sir Henry Parkes and it was his intention to build a huge mansion after he had built this small wooden cottage.

The grand mansion never eventuated.

The foundations only were laid. They later c.1914 -18 became the foundations for 'Banool' now 'The Bungalow' on the corner of Martin Place and Great Western Highway at Linden.

In 1876 a railway platform was erected to service the well-to-do residents of the area. It became the Numantia Platform but ceased operation in 1892 with the platform being removed in 1897.

In 1898 Adolphus Rogalsky purchased 'Numantia' and it was he who changed the name to 'Weemala'.

This coincided with the name change for the other 'Weemala' to 'Eurama'.

The high stone wall of 'Numantia', later 'Weemala', still stands.

The cottage was destroyed by bushfire in December 1977. Since then a new three bedroom brick veneer cottage was erected behind the stone wall. This building has been badly vandalised.

'Weemala' originally named 'Numantia'

Great - great - great grand - daughter of William Cox is guest speaker for BMACHO'S AGM

Dr Anne-Maree Whitaker (pictured), the great-great-great grand-daughter of William Cox, who built the first road over the Blue Mountains in 1814 -1815 will be the guest speaker at this month's annual general meeting of the Blue Mountains Association of Cultural Heritage Organisations Inc.

Her talk will be on her great - great - great - grandfather, William Cox, Justice of the Peace, paymaster NSW Corps and road builder.

Dr Anne - Maree Whitaker

Anne - Maree is working on a biography of her ancestor and has recently undertaken a research trip to the UK and Ireland in pursuit of family information.

Dr Whitaker has a PhD in Australian history from Macquarie University in Sydney.

She has published widely in Australian Catholic and Irish Australian topics and is an independent professional historian who undertakes research in a wide range of 18th - 20th century Australian topics.

Dr Whitaker is a Fellow of the Royal Australian Historical Society and the Royal Historical Society, and a member of the Professional Historians Association (NSW) and the Australian Catholic Historical Society.

Dr Whitaker was the winner of a 2010 National Trust Heritage Award for 'Sydney Parks - Signage and History Website'.

She is also the NSW State Library's CH Currey Memorial Fellow for 2011 - 2012.

Annual meeting marks 6 years of achievement

The existing management committee of BMACHO under the presidency of Pamela Smith for the past 12 months, has continued to provide innovative initiatives to serve the heritage sector.

Continuing on BMACHO's list of achievements in its first 5 years the committee's major milestones this year include; the publishing of the second *Blue Mountains History Journal,* several seminars or workshops, the publication of another 6 editions of the newsletter *HERITAGE*, support and advice on various issues as well as planning and organising the Blue Mountains History conference for later this year.

The committee has been particularly pleased to see achieved in 2011 one of its strategic aims, the creation by Blue Mountains City Council of a heritage advisory committee which in past years has seen a major task of lobbying by BMACHO.

The annual general meeting is scheduled for Saturday, March 14 at 2pm at the Grandview Hotel, Wentworth Falls.

In the past year, once again there has been a very compatible group of experienced men and women who have looked after the affairs of the association.

Particular mention is made of president Pamela Smith who has not had an easy job balancing her commitments, but has shown a strong lead in the affairs of the association particularly in the organisation of this year's major event the conference in October 2012.

The extraordinary capacity and ability of Jan Koperberg who as secretary has not only developed a very effective and timely communication with organisational and individual members, but in the wider heritage community continues to serve well past that of most others.

Nominations for all position close on March 9.

Pictured below is Pamela Smith during a meeting with National Trust CEO Will Holmes a Court

Review of role and future directions for heritage association

A REVIEW OF BMACHO's past and possible future roles will be undertaken by a small sub-committee which will provide the management committee with a report and recommendations by June 30, 2012.

Former BMACHO president John Leary has said, "Voluntary organisations such as those in the heritage sector play a vital role in society, but without strong management much of their hard work can be wasted.

"From time to time an organisation needs to review its overall strategic direction.

"All organisations need a strategic plan and that plan needs to answer three things: where are we now as an organisation, where do we want to be in three years time and how do we get from where we are now to where we want to be?.

"In the six years of its existence BMACHO has achieved much and now is the time to capitalise on these successes.

"For the review to be a success we need input and suggestions as to what members would like to see the association provide in the way of services," Mr Leary said.

'Organisations need strong, visionary, experienced people to provide strategic direction'

The committee will comprise BMACHO's president, Pamela Smith, secretary, Jan Koperberg, and former president, John Leary with vice president Ian Jack and former treasurer, Peter Stanbury available to also provide advice.

The decision to conduct the review has been discussed for some time and recently the NSW Department of Fair Trading recommended this action should be taken every couple of years.

It is 6 years since BMACHO was established and it is now considered to be an appropriate time to look at various aspects of the association's role.

The review will consider the following issues:

i. the quality and appropriateness of the services being supplied to members;

ii. the expectations of both organisational and individual members;

iii. the need and ability to provide extended and other services

iv. the ramifications of the possible extension of the area to be served by the association;

v. the necessity and desirability of a change in name for the association;

vi. the desirability of affiliating or associating with one or more universities; and

vii. any other area which the committee may think appropriate.

Some of the issues the sub-committee will investigate include:

* The advantage or disadvantages of increasing BMACHO's constituency to include neighbouring, but historically linked areas, such as Hawkesbury, Penrith, Oberon or even Bathurst

* The benefit to historical societies and other heritage groups from having professional advice and guidance on site for e.g. exhibit display and management or archiving or restoration work.

* The advisability and capability of BMACHO to provide support within the capacity of its members in their pursuit of heritage advocacy.

* The need to broaden BMACHO's financial base to allow more services to be provided to members.

* The possibility of linking BMACHO with a university and other research facilities.

The sub-committee will also look at ways to ensure that the association operates within the principle of 'best practice'.

Anyone interested in making a submission should make contact with Jan Koperberg at j.koperberg@bigpond.com

Internet and e-mail workshops

A series of four introductory workshops for people wishing to improve their skills in the use of the internet and email will be offered by BMACHO on Thursday mornings April 5, 12 19 and 26.

The workshops will be free and are funded by a generous grant from Telstra Connected Seniors Program.

The Workshops will be held at Hobby's Reach, the home of the Blue Mountains Historical Society, 99/101 Blaxland Road, Wentworth Falls.

The class size is limited and preregistration is essential.

Further information from Barrie Reynolds: phone 4757 4725; email barrie.r@bigpond.net.au

Scenic World Sculpture awards announced

A SCULPTURE of wool and wire has taken out the inaugural Sculpture at Scenic World $20,000 acquisitive award for pushing the medium's boundaries into the 21st Century.

Greer Taylor's work, *Distant Time*, is one of 26 sculptures by 27 artists from Katoomba to Belfast to be displayed along Scenic World's ancient temperate rainforest walkway, during the independent exhibition open until until March 11, 2012.

The award was presented by Scenic World's new joint managing directors, Anthea and David Hammon, on behalf of the Hammon Family Council during the official exhibition opening last month.

Taylor's winning sculpture comprises two parts, small and large formal pyramids composed with red woollen thread woven around steel wire, installed among the ancient trees to reflect a distant time that both contrasts and compliments the landscape.

Ms Taylor said after the presentation it was a privilege to create artwork for a beautiful natural environment that was being protected by the Hammon family's Scenic World.

"The respect for the art, artists and the environment is what inspired me to apply for this exhibition," Ms Taylor said.

"*Distant Time* reflects this forest. It's a web of random gatherings and by placing this form in the rainforest the sculpture and surroundings are mirrored and magnified by their differences."

The winning sculpture was selected by independent judges, UWS Curator Monica McMahon and Macquarie University Sculpture Park Curator, Leonard Janiszewski.

The works of Cassandra Scott-Finn, *Infinity?*, Elianna Apostilades, *Amber 302*, and Heidi Kenyon, *I'm Still Here*, have each been awarded highly commended by the judges. They stated:

"Scott-Finn's work achieves a mesmerising kaleidoscope of constantly changing colour and form that absorbs both viewer and environment as elements of its ongoing visual dance.

"Similarly, Elianna Apostilades successfully sculpts form, light, movement, environment and time, transcending preconceived notions of the traditional key canons of sculpture.

"Heidi Kenyon's magical work exposes the intricate preciousness of the organic through light, form and environment.

"The strength of all three works lies in their ability to challenge, readdress, reconstitute, and reinvigorate sculpture in the 21st century as an art form whose fundamental visual language incorporates environmental elements as essential."

HERITAGE INDEX

BMACHO newsletter ***HERITAGE*** from January 2009 to December 2011 has been index by Joan Edwards of the Blue Mountains Family History Society.

The index is available on the BMFHS website at http://www.rootsweb.ancestry.com/~nswbmfhs/res/bmacho.htm

The Red Admiral - an exhibition of Patrick White's years at Mt Wilson

IN 2012, the Mt Wilson and Mt Irvine Historical Society will celebrate the centenary of Patrick White's May 28, 1912 birth date by holding a year-long exhibition at the Turkish Bath Museum at Mt Wilson.

Patrick White spent his formative years as a young child at Mt Wilson in the 1920s and 1930s; the exhibition will highlight the impact of both the Australian natural environment and the influence of working class and wealthy society individuals and families that were to strongly shape him for the remainder of his life, as an individual and as a writer of international acclaim.

The story of Patrick White and his family at Mt Wilson in the 1920s and 30s (the so-called 'Golden Age' of Hill Station life in Australia) is rich in historical interest, and yet, remains well hidden to most people.

The project aims to heighten awareness of the formative years of White's life in an easily accessible and understood manner.

The exhibition has been specifically designed not to be an academic treatment of his literature, nor does it require an understanding or appreciation of White, or his works.

The goal is to foster a recognition of a vital influence on White that has previously been ignored, or misunderstood, for many years, despite the amount of research undertaken on the most famous and renowned Australian author.

The exhibition will be in the form of a series of framed A1 sized posters designed by a local professional graphics artist.

The title of the exhibition is taken from the name White used as a ten-year old. His first published pieces were about Mt. Wilson. The 'Red Admiral' was his favourite butterfly.

The exhibition is to be opened at 11am on Sunday June 17, by the Governor of NSW, Professor Marie Bashir AC CVO at the Mt Wilson Village Hall.

Ruth White, the mother of Patrick White, on the verandah of Withycombe with an unidentified friend in 1923. Photograph Mt Wilson & Mt Irvine Historical Society Collection

In association with the exhibition, the Mt Wilson and Mt Irvine Historical Society is hosting an open gardens weekend on Saturday and Sunday April 28 - 29.

Three beautiful gardens – *Withycombe*, *Sylvan Close* and *Bisley* - that are seldom open to the public will be featured. Late April is traditionally the time of year when Mt Wilson's famous autumn colours are at their peak.

Withycombe was the childhood home of Patrick White. His parents, Dick and Ruth, bought the property in 1921 and held it until 1938 until it was sold to the Church of England for ten shillings.

Near the front gate of *Withycombe* is a tree which still carries, albeit very faintly, the initials PW carved into its trunk some ninety years ago.

The combined entrance fee to the three gardens is $20 per adult; children are admitted without charge. Tickets are available at the entrance of any of the three gardens.

The gardens will be open from 10am to 4pm. Food, drink and toilet facilities are available on the weekend from the Mt Wilson Village Hall.

Additionally, the Mt Wilson Turkish Bath Museum will be open in conjunction on both days.

This unique heritage listed building is situated within the *Wynstay* Estate at the end of The Avenue, Mount Wilson.

It was one of the first properties to be established in Mount Wilson, as early as 1875, by Mr Richard Wynne who also established the Wynne Landscape & Sculpture Prize in 1895.

The building was in use for a few years for its initial purpose, as a Turkish Bath, but now partly restored it houses a museum of local history operated by the Mt Wilson and Mt Irvine Historical Society.

The building itself is very stylish, featuring many original features including arched windows of stained and hand painted glass. It has exterior walls of polychrome brickwork with Italianate decoration and an elaborate turret with cast iron finials and roof decoration.

Ornate roof decorations on Turkish bath house, Mt Wilson

Dowell O'Reilly … father of Eleanor Dark an author and poet in his own right

by Pamela Smith - Springwood Historians

WHAT can we give in return

For her beauty and mystery

Of flowering forest, infinite plain,

Deep sky and distant mountain-chain,

And her triumphant sea,

Thundering old songs of liberty?[1]

DOWELL O"REILLY, better known perhaps as the father of author Eleanor Dark, was a schoolmaster turned parliamentarian and an author and poet in his own right.

Dowell, born in Sydney on July 18 1865, was the second of four children born to Anglican clergyman, Rev. Thomas O'Reilly and second wife Rosa (nee Smith).[22]

He was educated at Sydney Grammar School and took up a teaching post at 'Hayfield' to assist his mother after his father died in 1881.[3]

It was there that he met Eleanor McCulloch – the music teacher - who he married in a quiet, almost secretive, ceremony on December 28 1895.[4]

The bride's parents and close friends were absent which, according to Barbara Brooks and Judith Clark caused 'quite a stir' when the union became common knowledge.[5]

Albert Bathurst Piddington, who a year later married Dowell's sister Marion Louisa, was his best man.

Piddington, like Dowell, had been educated at Sydney Grammar.

Marriage to Eleanor Grace McCulloch meant that he became the son-in-law of the controversial politician, Andrew Hardie McCulloch.

McCulloch is perhaps better known in the Blue Mountains as the owner of the - now derelict - cottage 'Eurama' located at Linden.

The ruins of the cottage are a familiar sight to road and rail traffic as they pass by today.

O'Reilly was also related to Dr Charles Badham, Professor of Classics at Sydney University, through Badham's first marriage to Julia, sister to O'Reilly's mother.[6]

Dowell Philip O'Reilly

There is some speculation that Badham may have assisted O'Reilly's mother when she opened 'Hayfield' as a preparatory school for boys at Parramatta.[7]

An article in the *Illustrated Sydney News* in 1889, suggested that 'Hayfield,' presided over by Mrs. O'Reilly, was an efficient and comfortable school.[8]

Dowell and Eleanor had their first child, named for his father, in 1899. Eleanor, named for her mother, was born in 1901, while Brian arrived in 1905.[9]

Dowell junior died in 1926, Brian married Norah Wilson and died at Wentworth Falls in 1985 in the same year as sister Eleanor (then Eleanor Dark), who died in Katoomba.

In 1886/87, Dowell played cricket for Central Cumberland against the visiting English side, and in 1888, he was commissioned second lieutenant in the Parramatta Volunteer Rifles.[10] He transferred to the reserves in 1898.

Dowell was elected to the Legislative Assembly for Parramatta in 1894, on a free trade ticket.

Shortly after, he moved a motion in parliament in favour of female suffrage.[11]

Dowell's sympathies for female suffrage endeared him to Rose Scott; they became firm friends.[12] In 1898 he returned to Sydney Grammar where he remained a master until 1909.[13]

Although his literary career began in the 1880s, it was somewhat less than spectacular.

He is known to have destroyed volumes of *A Pedlar's Pack*, because sales of the book of verse had been inadequate.[14]

By the 1890s his literary career seemed to have picked up because he regularly contributed poems and short stories to the *Bulletin* and other publications.[15]

Night classes at the University of Sydney in 1889 brought him into contact with scholar and writer, John Le Gay Brereton, and the equally talented poet, author and scholar, Christopher Brennan.

One-time Professor of Economics, Robert Francis Irvine, was also a mutual friend.

The men were involved in publication of the short-lived *Australian Magazine* and were members of the Casual Club.[16]

In 1910 Dowell contested the seat of Parramatta as a Labour candidate and counted WM Hughes among his circle of friends.[17]

Continued page 9

Continued from page 8

Friendship with controversial prime minister 'Billy' Hughes

WM Hughes,CH,KC - Prime Minister of Australia 1915 - 23

His friendship with Hughes was to have long term effects and was thought to have caused a rift with his brother-in-law, AB Piddington.[18]

A column in the *Sydney Morning Herald* called 'Sydney Day by Day' carried a very tongue in cheek view of Dowell.

The article implied that he was somewhat of the 'Bohemian order,' and well thought of in 'local literary' circles.[19]

The article went on to suggest that Dowell found favour among the 'womenfolk of the State' although 'not an enormous number,' who, by that time, had won the right to vote. The *Herald* correspondent suggested that Dowell had written some 'acceptable poetry' and his 'crisp and appetising' style was reflected in a letter sent to the paper regarding his feud with Piddington.[20]

Michael Roe suggested that while Piddington was intellectually gifted, he was of a turbulent disposition and prone to recurrent 'displays of wayward emotion.'[21]

Thus, O'Reilly's claim (see below) may have been correct. However, over recent years a darker side to this feud has been revealed by Helen O'Reilly and Marivic Wyndham, which had little to do with politics but more to do with personal issues within the family.[22]

Years of illness preceded the death of Eleanor Grace O'Reilly, who eventually died in 1914.[23] Dowell's second wife, Marie Rose Beatrice (Mollie) Miles, who he married in 1917, was a cousin he met in England in 1879.[24]

He continued contributing to periodicals and in 1913 published *Tears and Triumph*, that, while fiction, sketched an 'outline of his suffragette philosophy.'[25]

The local studies collection in Springwood library hold several of Dowell O'Reilly's works including *Tears and Triumph*, *Fivecorners, The prose and verse of Dowell O'Reilly and Dowell O'Reilly from his letters.*

Dowell died of pneumonia and vascular disease at Leura in 1923 and was buried in the cemetery at Blackheath.

The author

Pamela Smith a regular contributor to ***HERITAGE*** , is currently president of the Blue Mountains Association of Cultural Heritage Organisations Inc, a founding member of Springwood Historians and a member of Blue Mountains City Council's heritage advisory committee.

Pamela has a BA (Hons) degree in History as well as an Advanced Diploma in Local Family and Applied History. Her honours thesis focused on private education in the Blue Mountains, while an earlier thesis dealt with the presence of the fascist Old Guard Movement in the Blue Mountains in the 1930s.

She is currently enrolled in the Master of History degree course at the University of New England, Armidale and has a special interest in non-government private venture schools, local/public history, the Old and New Guard and women's history, especially women involved in politics and local government.

Sydney the soft touch

By Andrew Tink - Biographer of Lord Sydney

IN AN AGE when convicts could be transported for the most trifling offences, it may come as a surprise to read that the home secretary who sent the First Fleet to Botany Bay was a soft touch.

While the sentencing of convicts was a matter for the criminal courts, those who had been condemned to death could plead to the king for clemency. As home secretary, Lord Sydney was responsible for the paperwork and he often tested George III's patience with his lenient attitude.

When Sydney made sympathetic representations on behalf of a convict sentenced to death for forgery, the king replied testily: 'there cannot be the smallest reason for any farther delay as to the law taking its course on George Owen…the execution of this unhappy convict [is] absolutely necessary as an example'.

Sydney was once even castigated by a minister of religion. 'I am told that you have now obtained a pardon for a man convicted of the horrid crime of wilful murder', the Reverend Charles Hardy said. 'Do I now live in a country where a secretary of state can in effect annul our laws?'

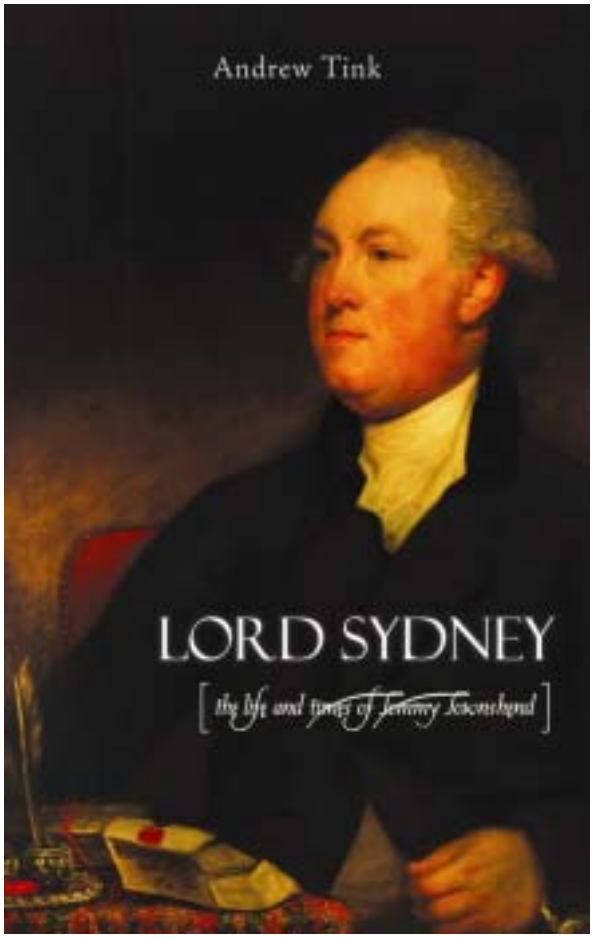
On Sydney's ministerial watch, the Transportation Act of 1784 had passed the British Parliament.

Among other things it provided that convict overseers 'could inflict…such moderate punishment…as may be inflicted by law on persons committed to a House of Correction'. Crude as it was, this imposed a duty of care on Lord Sydney and all others involved in organising the First Fleet.

Sydney's most important decisions included the choice of Arthur Phillip, a firm but fair man, to be the convict colony's first governor. And they shared the same vision for NSW:

- There was to be no slavery;
- The convicts would be encouraged to redeem themselves through emancipation and land grants;
- The ordinary rule of law rather than military law would apply to them;
- The Europeans were to live in 'amity and kindness' with the Aborigines.

In this short article Andrew Tink writes about the man who gave Sydney its name. The book *Lord Sydney: The life and times of Tommy Townshend* rrp $39.95, is available from all good booksellers (in Sydney – including, but not limited to: Lindfield Bookshop, The Children's Bookshop, Abbey's Bookshop, Berkelouw Books, Dymocks booksellers, Novella Fine Books, Lesley McKay's, Shearer's on Norton, Pages & Pages Bookseller, Potts Point Bookshop, Hordern House Rare Books).



Equally importantly, Sydney resolved that the convicts on the First Fleet were to be as generously provisioned as soldiers going to the toughest outposts in the British Empire.

In all, Sydney spent £ 58,000 to transport about 750 convicts and 250 military men to Botany Bay, using a competent contractor, William Richards, to organise things.

As a result, there were only about 25 deaths during the voyage. Sydney's generosity was criticised by some of his cabinet colleagues though. And soon after the return of the First Fleet ships to England, Sydney retired.

Determined not to be a 'soft touch', Sydney's replacement as home secretary, the 29 year old political up and comer, George Grenville, ordered that the Second Fleet be prepared with 'least expense to the public'.

Richards was replaced by a firm of slavers, Camden Calvert and King. And over 1,000 convicts were shipped for just £22,370. As a result, 267 died.

Had Sydney the soft touch organised the First Fleet the way young George Grenville organised the Second, the first European settlement of Australia would have failed.

Hazelbrook and Woodford history, 2nd edition

A SECOND edition of the 2007 National Trust award-winning Hazelbrook and Woodford history has recently been published.

As the first edition of *Hazelbrook and Woodford: a story of two Blue Mountains towns* launched in early October 2006 had sold out by 2008, the historian and author Ken Goodlet thought it time to do a second edition for Christmas last year. That first edition is now in, roughly, one in four households in Woodford/ Hazelbrook, but new residents have since moved in whom he thought might be interested in getting a copy.

Besides, new information and photographs had come to light and Ken wanted to incorporate in the history the events of the last five years, so there are more photographs, more general information, more appendices and obviously more pages. Important features are specialist chapters by Dr Eugene Stockton on geology and Aboriginal heritage and by Judy and Peter Smith on native animal and plant life.

The bulk of the book is about the early settlers, the holidaymakers, the community-minded spirits and the later suburban-dwellers in these two communities that have reinvented themselves over the decades.

While the book includes the fruit of research by earlier historians and by Ken, it also includes the memories of over 100 local people interviewed by him, supported by some 340 local photos and maps.

When Ken first undertook the Hazelbrook/Woodford project, he had hoped that there could be up-to-date histories of all mountains towns. The fine work by Dr Peter Rickwood on Blackheath has been a further step in that process. The new edition at $30 is available from local bookshops and from the author at 4758 6591.

Ken Goodlet's book cover image — *A Christmas Journey*, by T. Walter Wilson, Woodford Station, 1881. (The date indicates the drawing was the third of four stations at Woodford. The station pictured was, slightly west of the present station, just above the recently demolished old railway cottages.)

This picture has also been painted inside the waiting room of Woodford railway station.

An outstanding Mount Wilson potter of yesteryear

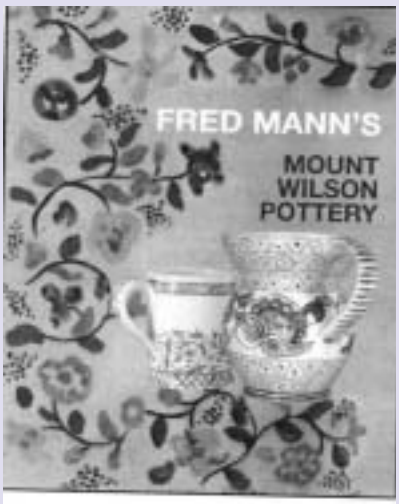
MT WILSON and Mt Irvine Historical Society have overseen the publication of an important new book that celebrates the life and creative output of an outstanding local identity, Fred Mann

Fred Mann's Mount Wilson Pottery was primarily the result of the efforts of two well - known local residents.

The book was the brainchild of Wendy Holland who has driven the project with extraordinary passion, energy and vision over the last two and half years.

Roger Howard-Smith shot most of the photographs in the book and most generously covered the initial printing costs

The book, to paraphrase John Valder, 'remains a cherished reminder of a generous, cheerful, friendly man'.



Many local or past residents of Mt Wilson and Mt Irvine offered their much loved pieces for inclusion in the book.

The book is truly a local community effort celebrating the pottery that emerged from the white clay from diggings at Yengo. Jess Delbridge, grand-daughter of Arthur Delbridge a talented graphic designer who lives at Mt Wilson was responsible for technical layout of the book.

The book can be ordered directly from Wendy Holland 4756 2094, Florence Smart 9416 1957 or Tim Gow 4756 2031 for $20. All proceeds of the sale of this book go to Mt Wilson and Mt Irvine Historical Society to underwrite future projects.

Republished from Mt Wilson & Mt Irvine Historical Society Newsletter No 28

The blacksmith and his anvil the symbol of runaway marriages

BLACKSMITHING is a dying trade and with it the blacksmith tools of trade, the most prominent being the anvil, writes **John Leary**.

There are many references to anvils in ancient Greek and Egyptian writings, including Homer's works.

Because anvils are very ancient tools and were at one time very commonplace, they have acquired symbolic meaning beyond their use as utilitarian objects.

But by far the most romantic reference to the anvil is attributed to the anvil priest of Gretna Green, in Scotland site of the famous 'runaway marriage".

Scottish law allowed for 'irregular marriages', meaning that if a declaration was made before two witnesses, almost anybody had the authority to conduct the marriage ceremony.

In the 18th and 19th century almost every European village had a blacksmith and some carried on the trade near inns or staging posts.

Local folklore has it that at Gretna Green it was not unknown for the blacksmith to be one of the two witnesses.

The blacksmiths in Gretna Green became known as "anvil priests"

Gretna's famous 'runaway marriages' began in 1753 when *Lord Hardwicke's Marriage Act* was passed in England; it stated that if both parties to a marriage were not at least 21 years old, then parents had to consent to the marriage.

The Act did not apply in Scotland, where it was possible for boys to marry at 14 and girls at 12 years of age with or without parental consent.

Many elopers fled England, and the first Scottish village they encountered was Gretna Green on the old coaching route from London to Edinburgh.

The tradition of eloping English couples searching for blacksmiths resulted legally from the fact that blacksmiths were necessarily citizens and could often be recognised by strangers by their presence at their forge and anvil

The Old Blacksmith's Shop, built around 1712, and Gretna Hall Blacksmith's Shop (1710) became, in popular folklore at least, the focal tourist points for the marriage trade. The Old Blacksmith's opened to the public as a visitor attraction as early as 1887.

Since 1929 both parties in Scotland have had to be at least 16 years old, but they still may marry without parental consent.

In England and Wales, the age for marriage is now 16 with parental consent and 18 without.

Today there are several wedding venues in and around Gretna Green, from former churches to purpose-built chapels.

The services at all the venues are always performed over an iconic blacksmith's anvil.

There are an estimated 5000 weddings services in the area each year and one of every six Scottish weddings.

Anvils have today lost their former commonness. Anvils are still used by blacksmiths and metal workers of all kinds in producing custom work. They are also essential to the work done by farriers.

As much as the author of this article, would like to have been able to write, that the anvil on this page was one on which marriages were solemnised at Gretna Green or anywhere else this blacksmith's anvil is one which John Leary, photographed in a recent visit to the Lithgow Mining Museum.

Nevertheless, the anvil has an interesting history, as Ray Christison writes on the following page.

The local blacksmith and his anvil have become the lasting symbols of Gretna Green, Scotland weddings where the ceremony is usually performed over an iconic blacksmith's anvil.

An anvil photograhed at Lithgow Mining Museum by John Leary,OAM

But well before Gretna Green the concept of an anvil may predate humanity. Chimpanzees have been observed using large sticks as hammers to crack nuts, using logs as anvils.

Large anvils still used by resident blacksmith at Lithgow Mining Museum

In its heyday the Lithgow State Coal Mine employed numerous blacksmiths, farriers and welders.

These men made and sharpened tools, repaired machinery, shod horses and ensured that the haulage ropes in the mine were safe and functional.

They worked from the large workshops building located at the northern end of the colliery headworks.

These were tough, muscular men who gained a reputation for their physical prowess.

Many trained in the art of boxing and quite a few obtained championship status.

Blacksmith's striker Billy Boyce came close to winning gold in his class at the 1948 Olympics.

Reg Kerrison, former Lithgow State Coal Mine master blacksmith working on an anvil at a colliery in the Illawarra.

When the mine closed in 1964 the blacksmiths' shop was cleaned out and was used for storage.

When the NSW Government Railway Workshops at Chullora were closed in the late 1990s the City of Greater Lithgow Mining Museum Inc was offered the blacksmithing equipment from that facility.

This was gratefully received and formed the basis of a major restoration.

Among the pieces gifted to the museum were two large engineering anvils.

These are now regularly used by the museum's resident blacksmith and others involved in training courses.

The Chullora equipment is a significant ensemble within the museum's collection.

The Chullora blacksmiths' shop manufactured components for railway carriages and locomotives.

During the Second World War this equipment was turned to the manufacture of Beaufort bombers and Sentinal tanks.

The anvils are an important component of this historic ensemble.

Heritage and the internet seminar

BMACHO, with a generous grant from Telstra Connected Seniors program, will be offering a public seminar on Heritage and the internet on Thursday, May 10 at 9.30 am.

Speakers will include Dr. Carol Liston (UWS), Michael Lech (Historic Houses Trust) and Dr. Peter Rickwood (UNSW and Blackheath). They will be speaking on the internet in heritage research, in the management and researching of museum collections and as a tool for publishing historical journals.

Each speaker plans to distribute a list of relevant websites for the benefit of those attending.

The seminar will be held in the meeting room of the Blue Mountains Historical Society at Hobby's Reach, 99-101 Blaxland Road, Wentworth Falls.

For further details: phone Barrie Reynolds 4757 4725; email barrie.r@bigpond.net.au .

Refreshments will be available and a gold coin donation will be appreciated.

BLUE MOUNTAINS HISTORY CONFERENCE 2012

To be held at the historic Carrington Hotel, Katoomba on, Satutrday, October 20
Conference title: Colonial Society

For further information and early bookings (capacity limited to 120 participants) contact Jan Koperberg at j.koperberg@bigpond.com or bmacho.heritage@gmail.com

Wall hangings recalls pioneer ancestors

RECENTLY the Lithgow Learning Centre (Library) was the venue for The Lithgow & District Family History Society Inc. to celebrate the launch of a wall hanging in remembrance of pioneer ancestors.

Each member took a calico square and either embroidered, painted or sketched the details of their pioneers who arrived in the colony in 1788 - 1888.

The idea came from local member Velma McFadden and the hanging was designed by the members, the squares were then sewn together by Margaret Buckley and Sandra Haley.

The quilting was done by Lyn and Graham Husdon from Portland and the society would like to thank them both very much for the wonderful job they did with the quilting.

The wall hanging was unveiled by Daryl Jenkins the son of the late Yvonne Jenkins who was the founding member and first president of the society.

Daryl spoke of his mother's love of family history and how for many years she spent gathering information on both her own family and that of many other local families.

She was an incredible lady and would have loved to have been present to see the concept of the wall hanging and the finished project.

. ***Lithgow Family History Society president Eleanor Martin and Daryl Jenkins beside the wall hanging***

Visitors and members were served morning tea at the launch and this gave them time to relate stories of their ancestors while being able to enjoy viewing the quilt.

The wall Hanging will be on display at the Learning Centre until Friday, March 16.

There is also a book with information on each pioneer available for anyone to view.

For further information contact on (02) 63531089 on Tuesday nights from 6 - 9pm or on Fridays from 10am - 4pm or Helen Taylor (02) 63557231 or email taygun@bigpond.com

Cox's Road walk at Linden

GLENBROOK & District Historical Society will conduct a walk along the Cox's Road at Linden on April 28.

Along the Linden section of the Cox's road there remain some excellent relics of carriageway and sandstone kerbs hand chiselled by convicts for whom work on the road represented emancipation as they laboured for their freedom.

Dr Grace Karskens writes in *An historical and archaeological study of Cox's Road and earlycrossing of the Blue Mountains NSW* , 1988 '... Cox following the example of other magistrates freely used the promise of pardons as payment for all aspects of the roadwork ... 'A total of 39 road labourers received between them 35 emancipations, 3 free pardons and one ticket of leave a further seven were emancipated for supplying horses and carts'.

For enquiries about the walk, contact Doug Knowles on 4751 3275.

Blue Mountains *an Illustrated Souvenir*

Photographer, Andrew Merry, in his exhibition Blue Mountains: an Illustrated Souvenir responds to how the Blue Mountains has been represented in art over the past 200 years.

The exhibition at Everglades Historic House, Leura is open by appointment from 11am to 4pm from now until 15 April 15

His photographs explore popular visual styles including 'the sublime', the picturesque and the postcard traditions.

The images offered are of cloud filled valleys, cliff edges, brooding landscapes, valley floors, fires and the rejuvenation of the bush.

In doing so this exhibition presents both a critique of clichéd views and an enjoyment in 'acting out' these clichés.

Locations for the photographs include the Blue Gum Forest, Hanging Rock, and the Grose and Jamison Valleys. Enquiries to 4784 1938

Walk beneath the trade union banner

LITHGOW STATE MINE Heritage Park is privileged to again host the Sydney Trades Hall collection of trade union banners.

Representing almost 150 years of trade union tradition these magnificent hand painted banners are listed on the NSW State Heritage Register.

They are rarely available for viewing by the public as there are few spaces large enough for them to be hung.

The former Lithgow State Mine Bath House is an ideal place in which to display the banners.

The bath house was originally constructed in 1923 as a power station for the colliery. In 1928 it was decommissioned and converted to accommodate showers and change rooms for the more than 700 men who worked in the mine.

With its open space and high ceiling the bath house provides a wonderful place to display the banners.

The State Mine's associations with the history of the Miners' Federation of Australia also make it a most appropriate venue for this exhibition.

The banners will be on display at the State Mine until the end of April 2012.

They can be viewed during museum opening hours, which are noon to 4pm Saturdays, Sundays, school and public holidays.

Group bookings are welcome at other times.

Admission fees are $5 per adult and $3 concession. Tours can be booked by contacting the museum at statemin@lisp.com.au or by phoning museum president Ray Christison on 6353 1812.

Free journals available

THE following free offer will be of particular interest to members, both librarians and curators of museums, societies and also individual researchers.

Back copies of the following heritage and museum publications are available:

Venturing above and beyond

PENRITH City Council and Library's History conference Venturing Above and Beyond will be held on Saturday, March 10.

This year the conference will be looking at the crossing of the Blue Mountains and also hear about the first flight over the Nepean area.

The Nepean River was the launching point for many adventurers exploring the Blue Mountains in search of new lands for the fledgling colony.

Men such as William Dawes, George Caley and Francis Barrallier attempted the crossing prior to 1813 and the conference will acknowledge the efforts of these early explorers.

At this time the settlement at Castlereagh was less than 20 years old and the large estates along the river were not much more than bushland.

A century later in 1911, William Ewart purchased a plane and brought it to Penrith to learn to fly. He was the first pilot to obtain his pilot's licence in Australia in December of that year.

In January 1912 he established an aviation school at Penrith before transferring his operations to Ham Common (Richmond RAAF)

Keynote speaker at this year's conference is Associate Professor Ian Jack, who will present some history and development of the District of Evan.

Dr Jack will be joined by Dr Grace Karskens, who will be talking about her research on Castlereagh. Peter Finlay will be introducing the early aviators in the Penrith area – William Ewart and Leslie Jones.

For more information, cost and registration phone Penrith Library (02) 4732 7687 or e-mail alisons@penrithcity.nsw.gov.au

Old Hartley bridge on Great Western Highway

PAUL CARDOW who kindly contributed the image (at right) of the old Hartley bridge circa. 1920s which appeared in ***HERITAGE*** January - February edition has written: 'I'm not trying to be pedantic, but the Old Hartley Bridge is part of the Great Western Highway, not Jenolan Caves Road.

The original caption inscribed on the glass plate, did say Jenolan Caves Road, which threw me initially, giving me reason to check the remains of the old bridge.

Apart from this, I really enjoyed your article and the related articles.

I'm more than impressed that Cox's road is to be marked out and signposted. It would be nice to see Bonaventure and the Old Coach Roads at Rydal marked out before they disappear as well.
Thanks for the correction Editor

More accolades

SEVERAL MONTHS AGO ***HERITAGE*** published some of the bouquets received in the e-mail.

Now published are a few more.

From **Dorothy Warwick, Holroyd Local History Research:** *Once again, can I congratulate you on a great newsletter! I have passed it on to various other groups that I belong to as it is such an interesting read. Congratulations and best wishes.*

From **John White, webmaster, Campbelltown-Airds Historical Society Inc**: *I received the Jan/Feb newsletter via Stella Vernon who has forwarded it to me. I'm very pleased to see the list of research web sites with journals of explorers in this edition.*

You have saved many people a lot of time by doing the searches for these sites, now to just get time to read them. Thanks again, look forward to future editions.

From **Lithgow City Councillor and managing director Westfund, Grahame Danaher:** *An excellent publication.*

From **Christo Aitken, Blue Mountains City Council's heritage advisor:** *I was on the mailing list previously and did receive a couple of your newsletters but you're right…at some time a gremlin must have dropped me off the list. Thanks for putting me back. It's a great newsletter…much time and effort spent by yourselves on its production…and good that you're readership is building*.

From **Julie Nixon, Holroyd Historical Family Group:** *I am currently researching my family who grow bigger and bigger the more I dig through our past. I look forward to receiving your newsletter,* ***HERITAGE*****.**

From **Ken Goodlet, local historian and author:** *Once again, a great edition of HERITAGE. There is so much there that I'm interested in.*

FRIDAY 13TH TWILIGHT TOUR

IT IS ALMOST as if organisers of 'twilight tour' for Friday, April 13 at Woodford Academy are tempting fate.

In March 1843, the convict George Conway, who was renowned for constantly escaping from his guards, met his end at Woodford Academy; some say his spirit resides here still.

Hear stories of the eccentric and colourful characters who resided at the Inn since the 1830's. Be welcomed along the front verandah by genial host of the 1840s, Mr Buss.

Tours commence 6pm, 6.30pm, 7pm and 7.30pm.

Cost $20 adult, $10 child. Supper included. Bookings essential prior to April 9 to 4758 7809.

Bob Debus to reflect on 30 years in politics

THE BERYL McLaughlin lecture 2012 will be delivered by former state and federal minister, Bob Debus on Saturday, March 3 at the Wentworth Falls School of Arts.

The annual lecture honouring the memory of the Blue Mountains Historical Society's principal benefactor, presents the reflections of prominent Blue Mountains citizens on both early and contemporary life in this region.

Mr Debus was the state member for Blue Mountains from 1981 to 1988 and 1995 to 2007 when he turned to federal politics as the member for Macquarie retiring Minister for Home Affairs after one term in 2010.

Previous lectures have included the historian Dr Jim Smith and artist John Ellison.

All are welcome to the 10.30am lecture with admission by gold coin donation. Morning tea is available from 10am.

The Wentworth Falls School of Arts is located on the Great Western Highway at Wentworth Falls, a short distance from Wentworth Falls Railway Station. Parking is available in the village or at nearby Pitt Park.

Two Blue Mountains Family History authors receive awards

THE WINNERS of two awards were announced last month by Vicki Edmunds, manager, libraries and customer services for Blue Mountains City Council, when she made presentations to Rhonda Flowers of Woodford and Jo Adam of Lawson after judging contributions to *The Explorers' Tree* magazines for 2011.

Commenting on the winning article for The Bob Howard award for best researched article: *Families at War "Lest We Forget"* by Rhonda Flowers, *(The Explorers Tree* March 2011*),* Vicki said it was a well written article that sets the scene by explaining where the Woodford War Memorial is, the recent history of the site and then the background to the monument.

"The reader gets an insight into some of the names on the war memorial.

"Rhonda has linked family members, discovered resting places and personalised an otherwise static sculpture.

"I especially enjoyed the postscript at the end of the article which encourages us all to remember the stories and families behind the names on a war memorial whenever we visit any town throughout Australia."

The Coolgardie Safe award for best article that does not fit the criteria for Bob Howard award, but which is worth preserving and exudes a breath of fresh air *was* won by Jo Adam's entry *A Walk Through my childhood – Tuesday is Washday (The Explorers Tree* March 2011*.)*

Jo did a wonderful job recreating her memory of washday in 1942 Australia.

"She set the scene very visually and I could even smell the story in some parts.

"It reminded me of watching my grandmothers' wrestle with their coppers and refusing any modern up to date washing machines.

"This piece on war-time washing not only captured what went on during washday but caught a lot of the social nuances that are hard to document. (Clothes-props, the health inspector, what it is like to have a husband MIA), Vickie said.

Blue Mountains Family History Society decided during 2011 to create *The Coolgardie Safe award* because so many articles submitted to the magazine did not fit the Bob Howard award criteria.

These are the stories that can be easily forgotten and lost, if not put into print.

Rhonda and Jo were both presented with certificates and their names will go on the shield in the family history section of Springwood library.

President of the Blue Mountains Family History Society Inc. Jan Koperberg said, thanks go to Vicki Edmunds for agreeing to judge the award and for her comments about both articles.

The society's thanks also go to Rhonda Flowers and Jo Adam for understanding the importance of research and recording memories.

Newsletter editor calls it a day

AFTER 15 years as editor of Mt Wilson & Mt Irvine Historical Society Inc, Elspeth Callender has called it a day.

During this period Elspeth has advanced her career as a freelance writer and highly skilled professional editor. She has worked for the Mt Wilson & Mt Irvine Historical Society in an entirely voluntary capacity with diligence and dedication.

Former president of the Mt Wilson & Mt Irvine Historical Society, Florence Smart has said, "That along with the Turkish Bath, the newsletter is the public face of the society and thanks to Elspeth, we enjoy a very positive reputation throughout the heritage sector and among our peer groups,"

Elspeth will now devote her time to editing and pulling together the large body of research and writing which Mary Reynolds and others have deposited into the society's archive, with the aim of producing a manuscript ready for publication which will present a history of Mt Wilson in an enjoyable, readable and saleable form.

The society has received a grant towards this project from the Royal Australian Historical Society

Awards for three Valley Heights Rail Museum members

THREE MEMBERS OF VALLEY Heights Rail Museum have received recognition with awards from the Office of Rail Heritage (OHR)

They are Brian Coker, Dick Butcher and Phil Robinson

Brian Coker joined the fledgling New South Wales Rail Transport Museum at the inaugural meeting in October 1962.

In 1964, two years after the formation of the NSW Rail Transport Museum, Brian Coker was elected to the position of treasurer.

Brian remained treasurer for the next 13 years, standing down from the position in the late 1970s. For the next 10 years, he extended his assistance to the various treasurers as required.

It was during that time, that Brian joined a locomotive restoration team led by Bob Booth (and later Tony Eyre) working at firstly, Petersham Cable Shed, then the RTM site at Enfield locomotive depot. Brian remained with the group until the ultimate move of the RTM from Enfield to Thirlmere.

In the 1980s, treasurer's duties were, at times, carried out by a number of members (including at one stage, a full time paid employee), but Brian Coker was given the unofficial duty of assistant to the treasurer, a task which Brian performed long after he retired from full time employment.

As late as the year 2011, Brian assisted with RTM accounts, wages, and general financial duties, having worked at the various RTM offices at Burwood, Redfern, Thirlmere and Central Station.

Apart from 49 years of continuous voluntary work for the NSW RTM at Enfield, Thirlmere and Sydney, Brian carries out voluntary financial work for the Valley Heights group. Brian has been part of that group for more than five years performing the role of treasurer during that whole time.

Pictured left to right are Ted Mullett, Peter Berriman and Marianne Hammerton (OHR) with award recipients Dick Butcher (second from left) and Phil Robinson (right), Brian Coker (inset left) Photographs: courtesy of Andrew Tester.

Brian has also been active in the Museum's retail department both at Thirlmere and at Valley Heights providing customer service to the museum's clients.

Richard (Dick) Butcher joined the NSW Rail Transport Museum in 1966. Dick has had an extensive service in various RTM activities at Enfield, Thirlmere and more recent times at Valley Heights.

These activities have included supervisory roles, running fitter on many RTM mainline tours and exhibit restoration of locomotives 5910 and 5711. Dick's passion for the railway preservation movement continued when the Eveleigh railway precinct was under early threat of redevelopment.

Having worked part of his career within the confines of Eveleigh Loco and the Large Erecting Shop, Dick knew of the industrial treasure that still existed at Eveleigh and led a personal campaign, writing many letters to relevant authorities with the aim of preserving what was left of the Eveleigh Railway Workshops.

Over the years Dick has passed on his vast knowledge in his railway trade of welding to many of his volunteer counterparts and has assisted many kindred organisations with his expertise.

In recent times Dick has been called upon to assist with some extensive heavy duty welding repairs to exhibits belonging to the Steam Tram & Railway Preservations Society, at Valley Heights. During this past year Richard was asked to assist Lachlan Valley Railway (LVR) with some repairs to Steam Locomotive 5917's firebox.

This required a highly skilled and knowledgeable person in the field of welding. Dick is well known within the railway preservation movement for his welding abilities and as a result of his efforts LVR's locomotive boiler has successfully completed hydrostatic tests.

Richard also provided a training workshop to members of the Valley Heights Division of the RTM in the use of the MIG Welding machine.

These members lacked the knowledge in the use of this valuable piece of equipment and Dick provided his expertise and training from his many years in the welding trade to insure it is correct.

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or its really going to happen

Business supporting Bicentenary

BLUE MOUNTAINS commercial interests have formed Business Supporting Bicentenary (BSB) with a view to securing an estimated $3 million in government grants and company sponsorship needed to make the Blue Mountains Bicentenary Crossing reach its potential.

BSB funded by local businessmen Phil Hammon of Scenic World) and Tom Colless (Colless Foods) has prepared a prospectus document and information guide which includes a core of 12 Blue Mountains major events spread over the years 2013, 2014 and 2105.

Among the proposals are:

- a bicentenary launch in February 2013 featuring a grand parade at the Echo Point precinct, a fly over, entertainment, fireworks and an illumination display;
- a. Crossing Milestones Festival to feature a re-enactment of explorers Blaxland, Wentworth and Lawson three-weeks journey of discovery over the Blue Mountains in May 1813, village events, fireworks, community and sporting events, illumination of icons such as Carrington Hotel chimney, Three Sisters, bridges;.
- an Aboriginal art and cultural event that explores the response of indigenous people to the European crossing;
- A Road Builders Celebration involving descendants of Cox and others, soldiers and period costume, hands on activities such as stone

Randall Walker, chairperson Blue Mountains, Lithgow and Oberon Tourism

Phil and Tom are joined on the committee by leading businessmen Randall Walker, Bruce Ferrier and others.

Randall Walker, chairperson Blue Mountains, Lithgow and Oberon Tourism, said crossing bicentenary events in the Blue Mountains have the potential to reach an annual audience of five million visitors.

Grand parade of descendants

MT VICTORIA & District Historical Society is planning a grand parade of descendants. The parade will recreate a similar event held for the 175th anniversary. The society will seek out descendents of Blaxland, Wentworth and Lawson as well as William Cox and convict labourers who built the first road. Organisers are planning to carry horse drawn drays some of the parade particiapnts unable to take the walk to Mt York on May 28, 2013.

Crossing! a Play

Wendy Blaxland, the great-great-great-great grand-daughter of the explorer Gregory Blaxland has made an impressive presentation to a recent meeting of the Western Crossing committee concerning the production of a play *Crossing!*

The play looks at the personalities of the three explorers, the circumstances that led convicts, military personnel and free settlers to leave their homes in England to come to a unfamiliar land, the crossing itself and its consequences and the attitude of the Aboriginal inhabitants of the area.

Wendy told the meeting, "*Crossing!* is a re-creation of the expedition led by actors, with satisfying ways for its audience to be involved, not a theatrical spectacle to watch. Some individuals from the audience will become members of the expedition, and the audience itself will act as the Blue Mountains terrain, be invited to participate in songs and celebrate vital moments with the actors. The audience will experience the hardships and excitements of the crossing through drama, suspense and humour.

"The creative team will be professionals. The actors will interact with the audience to help populate the stage with the convicts, horses and dogs who accompanied the three named explorers, and the entire audience will become the terrain through which they travelled.

"Music will be an integral part of the show, and songs will provide an authentic feeling of the early 19th century. Costumes and props will help the audience travel back imaginatively in time. The play will last 50 minutes.

"As an experienced writer and theatre professional, I will write, direct and produce this production. Other creative talents are being assembled, from an experienced and distinguished composer through to young people with whom I have worked for some time," she said

State Library puts $1.8m, 194-year Australiana album on show

A REMARKABLE 194-year-old album of previously unknown drawings of colonial Sydney, Newcastle and its Indigenous people, was publicly unveiled at the Newcastle Art Gallery recently by NSW Arts Minister George Souris.

The Wallis Album was found in the back of a cupboard of a deceased estate in Ontario, Canada, in October last year before the State Library of NSW secured its passage home to Australia for $1.8 million.

The album was largely created and compiled some 194 years ago by Captain James Wallis, Commandant of Newcastle between 1816 and 1818.

"The State Library is committed to connecting the original documents of Australia with local communities, and we're thrilled to be partnering with the Newcastle Art Gallery in sharing this important artefact that has obvious historical and emotional significance to Newcastle," says Dr Alex Byrne, NSW State Librarian and chief executive.

"This remarkable album is the most significant pictorial artefact to have been made in colonial NSW during the 1810s and is a fantastic addition to the Mitchell Library's unrivalled collection relating to the history of our nation," says Dr Byrne.

The Wallis collection comprises 35 watercolours and drawings of Sydney and regional views of NSW, portraits of Aborigines and natural history illustrations made in Newcastle in 1818 by Captain Wallis and convict artist Joseph Lycett.

"Wallis painted named portraits of Awakabal Aboriginal people from the Newcastle area which are incredibly rare records of this community's ancestors," said Mitchell Librarian Richard Neville.

An untitled drawing by Joseph Lycett

"The album includes a Lycett view of Sydney Cove as well as one of Wallis' portraits which feature Burigon with whom he shared many pleasurable hunting expeditions.

Wallis album includes early sketches of paintings by Lycett that are featured on the Macquarie Collector's Chest c. 1818, which Wallis gave to Governor Macquarie to thank him for his patronage.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: j.koperberg@bigpond.com or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains, Lithgow and Oberon Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Hartley Valley District Progress Association, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mid-Mountains Historical Society Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committee, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Pastsy Moppett, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2011-12 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Joan Kent (treasurer), Jean Arthur, Doug Knowles, John Leary, Dick Morony (public officer), Kathie McMahon-Nolf, Barrie Reynolds and Peter Stanbury.

.**AFFILIATIONS** BMACHO is a member of the Royal Australian Historical Society Inc.

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

MAY - JUNE 2012 ISSUE No. 21

Little Wheeny Creek mill race survives ravages of floods

by Frank Holland - former president, Kurrajong - Comleroy Historical Society Inc.

SETTLEMENT around Kurrajong can be documented through various land grants the first being 500 acres to William Lawson and then in 1809 a series of grants were made.

However, it is likely that people were in the area prior to that time. It is known that Matthew Everingham carried out exploration in 1795 which took him through the Wheeny Gap and possibly as far as present day Mount Tomah.

In 1810 Governor Macquarie passed through the area, which by then had a number of people living on the land.

Shortly after its incorporation in 2001, Kurrajong - Comleroy Historical Society Inc (KCHS) researched the Singleton mills site on Little Wheeny Creek.

Most of the research focused on the location of the mills and attempts to understand the type of construction and plan of the mill. Based on this research a working model of the mill was constructed.

Over the past 11 years a number of tours of the site have been undertaken.

Benjamin Singleton with his mother and younger brother Joseph accompanied his father William, who had been convicted in England of the theft of some cloth, to Port Jackson.

William gained his ticket of leave and later obtained a grant of land on the Hawkesbury near Wilberforce.

Two grinding stones from Singleton's mill being examined by Dr Martin Gibbs (taking notes) and local historian Les Dolan a member of Kurrajong - Comleroy Historical Society. These mill stones which were recovered from Little Wheeny Creek when council was constructing a new bridge over the creek are now located in Memorial Park, Kurrajong Village

In 1809 Benjamin's elder brother, James, joined the family as a free settler and he and Benjamin were granted 50 acres each at what is present day Grose Vale in the Richmond district.

No evidence has been located proving that they actually lived on these grants and it is not until 1816 that documentary evidence can be found that at least one mill was in existence, as it was offered for sale that year.

This sale did not proceed. It is also unclear as to who held the title to the land on which the mill had been erected.

What is clear is that between 1810 and 1816 Benjamin and James built or had built two water mills, for grinding grain, on the banks of Little Wheeny Creek at Kurrajong.

This creek, although small provided a safe, permanent water supply (and still does).

An opinion from the editor.....

Local historians and historical societies of immense value to heritage

THE eminent historian and former president of the Royal Australian Historical Society, Professor R Ian Jack has often expressed a view, which this writer shares, to the effect that local historical societies and historians are an extremely valuable and vital resource in researching and recording our heritage and history. Much of the preservation and recording of history and heritage in Australia probably would not have occurred had it not been for the quiet achievers associated with historical and heritage groups around Australia.

In this edition there are several examples that Dr Jack's views are very valid.

On page one of this edition of *HERITAGE* is a story of the exemplary tenacity and perseverance of members of the Kurrajong – Comleroy Historical Society whose research hopefully will lead to having the early industrial site of Singleton's mills recognised as a significant heritage site.

As is often the case, this research has been supported by academics, in this case Dr Martin Gibbs and his students from Sydney University.

This mill was away from the ravages of the frequent floods that destroyed more prominent mills and property along the banks of the Hawkesbury. Remnants of the race, stone work and the mill pond are visible today and it is possible that up to 30 people may have been housed in the area.

Elsewhere, in this publication is a piece about the untiring efforts of heritage enthusiasts to save from oblivion the historic Thompson's Square heritage building sightlines at Windsor.

In this case the proponents seeking to save this unique heritage precinct have mounted compelling arguments against what is an ill conceived bureaucratic solution which flies in the face of the NSW Heritage Register.

Not only are locals outraged, by this proposal for a new river crossing at this site, but so too must be every decent thinking person around Australia.

If the state government is to have any credibility in the area of history and heritage it must instruct the Road and Maritime Services to rethink the proposal for a new river crossing taking into account the formal recognition of heritage sites listed in the New South Wales Heritage Register.

And in yet another area of the region at Lawson the apparently cavalier actions of the Road and Maritime Services have buried a piece of rail heritage dating back to the laying of the first rail line across the Blue Mountains. With the roadwork construction of the Great Western Highway beside Sydney Rock near Lawson is a new rerouted railway cutting.

The now abandoned original cutting of the 1866-67 rail line is in its own right of some significance as rail heritage but apart from the built heritage, there are items of geological and botanical interest which need to be recognised. For many years Father Eugene Stockton has stressed the importance of this rail cutting and the nearby Sydney Rock as having heritage value.

There is a school of thought among many well qualified archaeologists that some of our heritage is best protected by it being "left in the ground" and this may well be one of those sites.

However, *HERITAGE* understands following an "11th hour community protest" at the burying of parts of this cutting, a compromise has been suggested by the Road and Maritime Services. The ham-fisted manner in which this compromise appears to have been negotiated leaves a great deal to be desired.

Road and Maritime Services must not be allowed to tread roughshod over our heritage as its predecessors have tried to do in the past.

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

Singleton's mills supplied flour to young colony

Continued from page 1

These mills were away from the ravages of the frequent floods that destroyed more prominent mills and property along the banks of the Hawkesbury.

The mills supplied flour to the fledging colonies on the Hawkesbury and at Port Jackson as evidenced by government contracts.

Based on photographs of later mills built by the Singletons they would have been of two levels of slab or weatherboard, constructed on a sandstone base.

A mill pond would have been constructed from which a steady flow of water could be conveyed to the mills by way of a water race.

Remnants of the race, stone work and the mill pond are visible today.

Based on other constructions and a study of the area local artist, Fay Edwards, painted an impression of the Little Wheeny Creek mill

Benjamin left the area circa 1822 for Patrick Plains, moving his family along the route he played a part in opening up through his own explorations and in partnership with William Parr and later with John Howe.

This route was the first European track north to the Hunter River but was soon superseded by the construction of the Great North Road.

Remnants of the race, stone work and the mill pond are visible today.

James Singleton continued on with his younger brother Joseph but later moved on to build tidal mills beside the Hawkesbury River near Wiseman's Ferry.

This shortened the travelling time to Port Jackson.

The Singletons built at least one other mill at the site to later be named Singleton.

The mills on Little Wheeny Creek passed through a number of owners and were operational up to circa 1858 before falling into disrepair.

As the Kurrajong area became more settled the buildings were scavenged for any useful material and the site became overgrown although eye witness accounts state that remnants of buildings were still visible in the early 1900's.

Today some stone work at the site can be seen with approximately 180 metres of a water race clearly defined **(**see photograph at top of this page).

Considerable labour would have been required to build the stone wall of the race and it is known that convicts were assigned to Benjamin Singleton.

It is possible that up to 30 people may have been housed in the area.

Eye witness accounts state that a substantial house was erected and it is reasonable to assume that a number of dwellings and out buildings surrounded the mills.

It is possible that other remnants are buried beneath the top soil and debris that has washed down the hillside over the years

In 2009 students from Sydney University under the guidance of Dr. Martin Gibbs**,** carried out a baseline survey of the site.

Continued page 4

Artist's impression of Singleton's mill painted by Fay Edwards

Sydney University students report on mill site

Continued from page 3

During this survey some previously unseen stone work was uncovered together with a piece of a glass bottle bearing the initials GR are clearly visible**.** (Photograph below)

These items were recovered and left on site.

A report was prepared by the students and this document was made available to the Hawkesbury City Council when a presentation was made seeking support to have the site (on Crown Land administered by council) re-named "Singleton's Reserve".

At the Council meeting of February 28, 2012, the following resolution was adopted by Hawkesbury City Council – *"That the name Singleton's Reserve for the reserve located on Mill Road Kurrajong (Lots 285 and 286 DP 751649 be supported and application be made to the Geographical Names Board for formal gazettal."*

As many readers would know the process of lobbying is not quick and a number of years passed from the first approaches to receiving this unanimous support of council and councillors.

The Kurrajong - Comleroy Historical Society is grateful for that support and will be seeking a similar response when the society moves to have the site recognised for its historical value as an early industrial site.

Society members believe it is a significant historical site certainly for New South Wales, if not for Australia and are currently awaiting formal gazettal.

A number of articles have been produced covering a brief history of the mills during Ben Singleton's ownership. The author of this article is currently involved in a KCHS project aimed at documenting the history of the mill site from construction of the mills through to the present day.

About the author - Frank Holland

FRANK and Valerie Holland moved to Kurrajong in 2000 following Frank's retirement after 35 years in banking and 6 years as a human resource consultant.

They joined the Kurrajong – Comleroy Historical Society shortly after it commenced in 2001.

Valerie was secretary for 7 years and Frank held a number of positions before being elected president in 2006.

They both stood down in September 2011 to focus more on research activities.

They remain committed to recording the history of 'The Kurrajong'.

They both sing with the Sydney Welsh Choir and Frank is a volunteer at Hawkesbury Fire Control – Communications Group where he holds the position of senior deputy captain.

In his earlier days he served in the Citizen Military Forces with the 30th Scottish Battalion and later commissioned as an officer in the 17 Battalion Royal New South Wales Regiment.

50 YEARS EARLIER

Sir, --- In the early 1800s Benjamin Singleton built mills in the Windsor and Wheeny Creek (now Kurrajong) district.

As wheatgrowing declined there and the Wheeny Creek mills fell into disuse, our forefathers painstakingly hauled, probably with bullock teams, two of the huge circular stones — splendid examples of the old millwright's art — up the ridge, and laid them on their side at the Comleroy Road junction.

Here they subsequently served as a base for a 1914-18 war memorial. Then the Bell's Line of Road was to follow a new alignment, and the Department of Main Roads appeared in the historic district with all the power and modernity of tractors, bulldozers and earthmoving equipment. It became necessary to move the ancient stones.

They now lie spread in a number of shattered segments, apparently ownerless, next to the Kurrajong Park, showing how our ancestor's loving care was nullified by an unappreciative posterity, despite every mechanical aid at its command.

MacLeod Morgan. Sydney
The Sydney Morning Herald
March 13, 1954

CONFERENCE KEYNOTE SPEAKER, PROFESSOR OF PUBLIC HISTORY

A CO-DIRECTOR of the Australian Centre for Public History (ACPH) and the Centre for Creative Practice and Cultural Economy, Professor Paul Ashton has accepted an invitation to be the keynote speaker at the Blue Mountains History conference being staged in October this year.

Paul (pictured) is the Professor of Public History at the University of Technology, Sydney (UTS),

He is also the academic director of UTS Shopfront, a university-wide community engagement program.

Paul's most recent book (co-authored with Paula Hamilton) is *History at the Crossroads: Australians and the Past* (Halstead Press) and he is a founder and co-editor of the refereed journal *Public History Review*, now published by UTSePress.

Paul commenced his career as a freelance historian and was an inaugural member and one-time president of the Professional Historians Association of NSW.

He was also closely involved with the formation of the Australian Council of Professional Historians Associations and the History Council of NSW.

Paul's work as a freelancer, which ranged from heritage conservation, oral and community history to commissioned history, drew him into the broader world of public history which emerged in North America in the 1970s and much later in Britain, though the earlier people's history movement in the UK was a form of public history which was to be internationally influential.

"... audience and historical authority."

He was appointed lecturer in Public History at UTS in 1995.

From 2002-5, he was a board member of the National Council on Public History in the USA.

Public history is concerned, among other things, with audience and historical authority.

Thus in the introduction to *History at the Crossroads*, Paul and his colleague wrote:

Metaphorically, history in the broadest sense might be though of as a house with many rooms.

Different groups inhabit the various quarters including local and community historians, genealogists, specialist museum practitioners, makers of historical films and public historians.

Some of these people inhabit more than one room while many make occasional visits to other parts of the house. And all of the rooms have internal divisions.

Some residents, however – notably academic historians – see themselves as occupying the principal room.

Indeed, not a few from the academy insist that they are in possession of the house.

The range and depth of historical activity in Australia, as elsewhere, is enormous. And it stretches back to early colonial society.

Paul's interest in Australian public history has seen him become involved in a number of diverse historical endeavours.

Recently, one of these was 'Sydney's Italian Fruit Shops', an exhibition co-produced by the ACPH and Co.As.It which ran for five months at Customs House in Circular Quay and is currently travelling.

Another is the landmark Dictionary of Sydney which takes in the Blue Mountains.

Paul was part of the team that secured an Australian Research Council grant to develop this cutting edge digital resource which has now published almost 900 000 'curated' words on Sydney's history.

He is a member of the Dictionary's Trust and its editorial management committee.

The Lindsays at home 1912-2012

AN exhibition at Norman Lindsay which is on until the end of May focuses on the Lindsay house, "Springwood" as a family home mainly in the 1930s.

There are over 50 photographs depicting this exciting time in the family's life and show the changes that were made to the house and its interior over the years as well as memorabillia that give a 'glimpse of the past'.

Rare views of Blue Mountains on show for first time

FIFTEEN original watercolours depicting Governor Macquarie's crossing of the Blue Mountains in 1815 are on display together for the first time ever in the State Library of NSW's major new exhibition, *Lewin: Wild Art.*

John William Lewin (1770-1819) carved out a career from humble insect collector to become Australia's first professional artist, yet his remarkable achievements have mostly gone unrecognised until now!

Lewin: Wild Art is the world's first comprehensive exhibition of Lewin's work, featuring over 150 original drawings and watercolours – many never seen by Australian audiences – selected from the Mitchell Library's renowned collection as well as other major local, national and international collections.

According to Richard Neville, exhibition curator and Mitchell librarian, Lewin was instantly captivated by the foreign landscape and exotic wildlife and was prolific in "giving Australians today an unrivalled visual record of their past."

"During his 19 years in the colony Lewin produced these powerful and distinctly Australian works featuring insects, birds and plants in their natural environment – an approach completely at odds with conventional English methods," says Mr Neville author of *John Lewin: Painter & Naturalist (NewSouth Publishing).*

Blue Mountains by Lewin, JW. State Library of NSW collection

Spring Wood by Lewin, JW. State Library of NSW collection

Lewin also produced commissioned works for every colonial governor, his most notable being the watercolours of the Blue Mountains and 12 large natural history works and landscapes for Governor Bligh in 1807, just a few months before he was overthrown.

"When Macquarie decided to take an expedition across the Blue Mountains, he was very aware that across these plains were important resources for the future expansion of the colony, and he wanted a visual record of what he found," says Mr Neville.

Lewin volunteered to join the expedition, which commenced on April 25, 1815 and made 20 "beautifully observed Australian landscapes" during the 10 day journey.

The 15 surviving works are held in the State Library's collection and depict the major views which Governor Macquarie noted in his account of the expedition.

"They are also some of the first European paintings to accurately capture the real characteristics of the Australian bush," says Mr Neville.

Among Lewin's may achievements was his landmark publication, Birds of New South Wales (1813), the first illustrated book to be published in the colony. Only 13 copies survive, and the State Library's copy is on show in the exhibition.

Lewin: Wild Art is a free exhibition at the State Library of NSW until May 27, 2012 then from July 28 to October 28 at the National Library of Australia at Canberra. For those who can not visit the exhibition in Sydney, they can visit www.sl.nsw.gov.au/lewin and view John Lewin's beautiful artwork in amazing detail using the collection viewer. Zoom in on over 150 images featured in the exhibition and watch the video commentary which has been added to selected artworks.

Survival and Civilisation in a Strange Land

PROFESSIONAL gardener, historian and author Silas Clifford-Smith's subject for the 2012 Blue Mountains History conference is *Survival and Civilisation in a Strange Land*, which will highlight the importance of parks, gardens and cemeteries to Australian settlers from the time of settlement up to the early 20th century.

Although born and raised in England, Silas has lived in Australia for nearly thirty years.

He has qualifications in horticulture from Ryde College of TAFE and art history from the University of Sydney.

By profession he is a gardener who has specialised in the care and restoration of old gardens.

As well as working for many private clients he has been employed by the National Trust at the Norman Lindsay Museum in Faulconbridge and Experiment Farm Cottage.

Silas Clifford-Smith

Silas has also worked for the Historic Houses Trust at Vaucluse House and Elizabeth Farm, and the Governor-General at Admiralty House.

He has written for a broad range of publications on gardening, heritage and art themes. He recently wrote *Percy Lindsay: artist and bohemian* (Australian Scholarly Publishing, 2011), a biography which was awarded the Isabella Brierley History Prize for an unpublished manuscript.

He has also contributed to the *Oxford Companion of Australian Gardens* (Oxford University Press, 2002) and *Interwar Gardens* (National Trust, 2003).

Silas is an active member of the Australian Garden History Society and the Marrickville Heritage Society.

Although based in Sydney, Silas is currently restoring an old railway property in the central tablelands.

Government moves to preserve digital heritage

BLOGS, e-magazines, interactive newspaper articles and more could soon be joining the archives of the National Library of Australia to keep them alive for future generations if proposals released recently by the federal government are implemented.

The government recently launched a public consultation paper on the proposed reforms to the Copyright Act, which are designed to ensure that digital documents are kept by the National Library of Australia for future generations.

Blue Mountains Association of Cultural Heritage Organisations Inc. supports the move by the Attorney-General Nicola Roxon and Minister for the Arts Simon Crean and the proposal to reform the Copyright Act, which will ensure that digital documents are kept by the National Library of Australia for future generations

The proliferation of electronic readers, smart phones and tablet computers means that publishers are increasingly making available and distributing works in an electronic only format.

Currently the Copyright Act requires publishers to deposit printed works at the National Library of Australia in order to preserve Australia's documented heritage.

The government is seeking views on proposed changes that would modernise the current system to extend to electronic documents by empowering the director-general of the National Library to request certain electronic material to be deposited.

Australia's cultural landscape is changing dramatically with an increase in digital content and convergent art forms.

As writers, publishers and creators move into digital formats, there is a need to ensure that the preservation of cultural content for all Australians to enjoy and appreciate continues.

These changes will ensure future generations don't miss out on Australia's dynamic cultural heritage simply because the work was created digitally.

The consultation paper Extending Legal Deposit and instructions for providing submissions are available online at http://www.ag.gov.au/Consultationsreformsandreviews/Pages/Extending-Legal-Deposit.aspx.

SAVE 10% on early bird bookings

BLUE MOUNTAINS HISTORY CONFERENCE

To be held at the historic Carrington Hotel, Katoomba
on, Saturday, October 20, 2012
Conference theme: "*Colonial Society*"
with a great line-up of speakers and presenters

PROGRAM

9.30am Conference to be opened by former president RAHS, Prof Ian Jack.

9.50am *The early years of the colony* by keynote speaker, Prof Paul Ashton, co-director Australian Centre for Public History.

11.20am *The effect on the Indigenous population with the establishment of an European colony* (Speaker to be confirmed)

12.20pm *The Carrington Hotel - a return to the era of grace, elegance and charm.* A tour guided by Paul Innes.

12.45pm
Lunch to be served in the grand dining room of The Carington.

1.45pm
Musical interlude Jim Low, folk singer, historian and writer.

2.15pm Colonial dress by Glynis Jones, curator fashion & dress design & society, Powerhouse Museum.

3.45pm Nature and role of gardens in the early settlement period by Silas Cliford-Smith archivist at the Heritage Centre, UNE

Bookings with full payment before July 30 will be discounted to $45 per person ---

Cost includes morning and afternoon tea as well as lunch in the historic grand dining room of Carrington Hotel.

For further information and early bookings (capacity limited to 120 participants) contact Jan Koperberg at j.koperberg@bigpond.com or bmacho.heritage@gmail.com

Road works bury heritage rail cutting near Sydney Rock, Lawson

by Ken Goodlet - local historian and author

THERE are grave concerns about a proposal by the Roads and Maritime Services (RMS, formerly RTA) to bury some significant mountains historical, geological and botanical items in the now abandoned railway cutting on the southern side of Sydney Rock on the eastern approaches to Lawson.

Last month, a protest demonstration took place on the corner of the Great Western Highway and Somers Street, Lawson to object to the proposal.

The new re-routed railway cutting goes north of Sydney Rock, along with a new alignment of the highway, a major engineering feat.

The rail re-routing overcomes what has been a headache for Railcorp and its predecessors ever since the single track rail line began operating in 1867: periodic subsidence of the ground under the line immediately south-east of Sydney Rock.

The site contains many significant features.

First, there is the 1902 Monier arch bridge that carried the Bathurst Road, crossing the east-west rail line at a north-south orientation when the line was duplicated in that year.

The 1866/67 sandstone abutment on the southern side of the original 1867 rail track. Note the shadow on the left that shows where the 1866-67 stone arch of the Bathurst Road bridge began. Note, too, the roll of cloth to be used to cover the wall before its burial

That bridge is to be retained and left exposed by the RMS.

Second, there is a sandstone wall. When walking from north to south over the 1902 Monier arch bridge, this wall can be seen by peering over its south-western corner.

It is the original southern cutting of the 1866-67 railway line, covered since late April 2012 by a cloth. It is the remains of a masonry abutment consisting of eight courses of squared sandstone blocks with drafted margins.

This would have been part of the supports for the original single line sandstone arch road bridge of 1866-67 over the single track 1867 rail line.

The *Sydney Morning Herald* of the time mentions that there were two 'in masonry' bridges built running across the rail line between Blaxland and Lawson, this being one of them.

What I saw on that sandstone wall in early April 2012 was the beginning of the curve in stone of the 1866-67 arch road bridge at the top left when facing the sandstone wall.

This sandstone wall is in the process of being buried. I was informed on numerous occasions we protesters would have needed to register our protest five years ago for it to have been even considered.

Day by day, more rubble from the giant Bullaburra pile on the northern side of the highway is being used to fill in that part of the cutting.

Continued page 10

Those who took part in the protest on Friday 13 April advocating the establishment of the Sydney Rock and environs heritage reserve to protect the Rock and the old railway cutting (photograph courtesy The Blue Mountains Gazette, April 18, 2012, p. 10)

Continued from page 9
Third, there is the geological stratification. Father Eugene Stockton has written of the clear contact in this railway cutting 'between the Narrabeen series and the overlying Hawkesbury sandstone, a contact not so accessible for inspection elsewhere in the Blue Mountains'. It is the farthest west outcrop of Hawkesbury sandstone in the mountains.

'...very rare botanical species on face of rail cutting...'

A photograph in the site survey report to the site contractors on April 13, 2012 indicates full burial of the cutting from the new highway to the 1902 bridge and some 60 metres east and partial burial for a further 30 metres, leaving 25 metres uncovered. All significant geological heritage will be buried.

Fourth, there are the botanical features. Eugene Stockton again has written: 'An article I published for the Blue Mountains Conservation Society (*Hut News* No. 268, 2010, p.10) outlined the results of the botanical survey by Peter and Judy Smith, which highlighted the presence of the unique wet cliff-line community on the northern face of the old railway cutting with some rare species particularly of the very rare Cliff Teatree, *Leptospermum rupicola*.It is found in five other places in the mountains.

There is a possibility of at most three of the 33 Cliff Tea Tree plants in the cutting surviving burial, according to the April 2012 report

The cutting and its environs' distinctive plant life might well be due to the fact that it is the only area on the mountains ridge from Emu Plains to Hartley that has not been burnt out by bushfires since at least 1867.

Fifth, there is Sydney Rock itself. The name was first used in 1882 and it was a popular stopping-off spot for holiday-makers and locals. It might well have Aboriginal significance, although there are no markings visible at the site.

Eugene Stockton remembers it as a popular picnic spot in the 1940s and from there at night he and his friends could see the searchlights over Sydney's skies during World War II and the fireworks at the end.

While it is unlikely to be interfered with by the present construction efforts, its future remains uncertain.

Eugene Stockton has had a plan for some time of creating a heritage reserve of this whole area, enabling children and others to appreciate its educational, research and aesthetic worth.

This requires action by council to demarcate the whole site as a reserve, to be developed at a time when resources are available to do so.

We have lost so much of our mountains heritage over the years. This is partly because all development has perforce been confined to the ridges across the mountains, and the necessity of maximising the use of those ridges for infrastructure development has meant clearing away most of what little Aboriginal, 'built', geological and botanical heritage we have.

Where are we now with the Sydney Rock and railway cutting heritage?

The April 2012 report indicates that, while Sydney Rock, less significant geological stratification and possibly three Cliff Tea Tree plants will survive burial, most of the significant geology, possibly all the significant botany and all the history will be buried and effectively lost to us.

These losses are the latest in a long litany of such losses that go back to the 1920s, some of them unavoidable, others requiring a little creativity to save.

What have I learnt by this experience? The RMS engineers and designers and contractors have done a quite remarkable job on what they are trained to do: building a highway diversion and rail cutting.

Two of the five flowering Leptospermum rupicola plants high on the 1902 northern face of the railway cutting

They do not appear to have the expertise to represent local heritage stakeholders in the preservation of our history. The RMS decision-makers have not been given mandatory effective protocols to consult a particular nominated local heritage organisation that can be held accountable for its advice about their various projects at an early enough stage to influence their decision-making.

Grant funds for restoration of Norman Lindsay's painting studio

NATIONAL Trust of Australia (NSW) will receive funding under the Community Building Partnership program for restoration of Norman Lindsay's painting studio at the Norman Lindsay Gallery.

Norman Lindsay's painting studio was built in 1918 and was in continued use until the 1960s.

It was the space that allowed Lindsay freedom from distraction and was where he created his enormous output of paintings, made his ship models and wrote his books at night.

It was also where he often entertained his favourite guests with readings from his latest writings.

Its preservation and restoration is important in telling the story of both Lindsay's work and of this significant heritage listed property.

The restoration will include repairs to the buildings foundations, stucco walls and drainage enabling visitors to continue to view his studio and appreciate Lindsay's legacy for many years to come.

The Norman Lindsay painting studio

In addition to the $16,000 grant for restoration work at the painting studio at Norman Lindsay Gallery and Museum the National Trust will receive the following grants:

* Dundullimal church project - $20,000
* Grossman House external painting repairs - $17,000
* Riversdale external painting project - $12,000
* Miss Traill's House guttering replacement and timberwork - $12,000
* Brough House external painting and repairs - $17,000

Norman Lindsay pictured in his painting studio circa 1930s

Lindsay is widely regarded as one of Australia's greatest artists, producing a vast body of work in different media, including pen drawing, etching, watercolour, oil and sculptures in concrete and bronze.

Family History research changes

BLUE Mountains Family History Society has been re-organising the family history section of Springwood Library for the last 18 months.

Orientation is required to use the resources.

In June, orientation of the BMFHS library volunteers will commence, followed by interested members and the Blue Mountains City Council Library staff.

Following these orientations Patou Clerc, the information services co-ordinator, BMCC Libraries, has proposed that Blue Mountains Family History Society give orientation sessions to the general public during National Family History Week.

These sessions will be held Monday to Friday July 30 to August 3, 2012, inclusive, from 10 am to 12noon.

Patou will organise for BMCC to advertise the event and to take bookings.

Blue Mountains Family History Society will also promote the event on the NSW & ACT Association of Family History Societies' website http://www.nswactfhs.org/ , the Australasian Federation of Family History Organisations' National Family History Week website at http://www.familyhistoryweek.org.au/ and in the BMACHO Calendar of Events, once the proposed event is finalised.

Although there are two BMFHS Library volunteers on duty for guaranteed sessions Tuesday and Thursday, 10am to 1pm to assist members and the general public, February to November each year, there are also volunteers on duty most Mondays, Wednesdays and Saturdays (but these are not guaranteed days).

Crash of Wirraway near Hazelbrook

HERITAGE has previously published articles from contributors on the subject of the wartime aircraft crashes in the Blue Mountains and for these the editor and BMACHO is grateful, particularly when they open up debate.

The most recent article was in the January – February 2012 edition.

Respected local historian, Brian Fox has written to the editor referring to the Hazelbrook crash stating, " I have in the past walked to this site a number of times and interviewed the people who were first to reach this site.

"Many published stories were not quite correct. Which is why I set out to dispel the inconsistencies; history does have a way of repeating the errors of past historians."

Brian hopes his article will clarify this unfortunate tragedy.

HERITAGE is indebted to Brian and thanks him for the following contribution first prepared in August 2005 from oral histories followed up and researched by him.

Brian is pictured in an early photograph of him holding one half of the propeller (the other half was mangled when the plane hit the ground).

By Brian Fox - Local historian

WIRRAWAY A20-17 from 22 Squadron RAAF based at Richmond took off for a training flight on August 1, 1940 but not far into the flight the aircraft experienced engine trouble.

The weather for that day did not help either as it was a damp and foggy day, hence giving low visibility. About 10.30am the plane flew directly over the Campbell's residence, near Hazelbrook Railway Station and Norm the eldest child recalls the engine misfiring and spluttering and then a few moments later a bang.

In running to the back fence of their house they could see smoke in the distance from the crashed plane.

As a result of the crash two young men, Flying Officer Harry Thomas Hopwood and his observer Sergeant Vincent Charles Monterola were instantly killed when their aircraft sheared the tops of the trees and hit the wooded ridge south of Hazelbrook.

The Wirraway (Aboriginal for Challenge or Challenger) was the first product of the new privately owned Commonwealth Aircraft Corporation (CAC), and was a license built derivative of the North American NA-16 known as the 'Texan' or 'Harvard'.

This explains the parts sourced from America eg the name on the propeller shows "Hartford Connecticut, Division of United Aircraft Corporation."

The location of the crash site is now officially known as Aeroplane Hills (even though the locals preferred the name Wirraway Hill), located 3.2km SW of Hazelbrook Post Office.

One access to the site is via Wentworth Falls, Tableland Road, Ingar Fire Trail and along an unnamed fire trail on what is called Wirraway Ridge.

At the beginning of this unnamed fire trail a locked gate provides a 3.4km walk to the crash site.

Alternatively access is gained via Hazelbrook, Terrace Falls Road, Terrace Falls Reserve and walking across Bedford Creek and up the other side to the crash site. Note in 1940 there was no road access via Tableland Road, Wentworth Falls.

Even today, 65 years later the crash site still has the remains of the fuselage and struts giving a permanent reminder and memorial to this tragic event all those years ago.

A number of locals witnessed the plane flying over head and saw the plume of smoke when the Wirraway crashed. One such family was the Campbell's of Hazelbrook.

Oral history from Norm, Mary and Colin Campbell has helped to piece together that fateful day.

Norm the eldest of the Campbell children has the most vivid recollection of this fateful day.

Continued page 13

Oral history helped piece together the fateful day

Continued from page 12

Norm relates that his mother rang the police and the Richmond airbase to inform them of the accident and at first the airbase denied any of their planes were flying. (This could be attributed to war time policy).

Norm immediately jumped on his brothers Harley Davidson motor bike and charged off down Terrace Falls Road towards the crash site, in his haste he forgot to turn the fuel stop on so when the fuel in the bikes carburettor ran out the bike stopped and he could not get it going again.

Leaving his bike where it was he ran the rest of the way, through Terrace Falls Reserve down and across Bedford Creek and up the other side directed by the smoke to the crash site.

Norm's memory of what he saw still remains vivid today, for it was not a pretty site for anyone to witness, while Sergeant Monterola had been thrown out of the plane on impact (he had his parachute on and may have been intending to use it) while the Flying Officer Hopwood's burnt body still remained in the plane.

Norm being the first to the crash site could see that both had been killed instantly and not being able to offer any assistance returned back home to report his findings.

Nearly home Norm was surrounded by reporters from the local and Sydney newspapers who had heard about the crash and had reached Hazelbrook, the one local phone box near their house running hot as reporters filed their stories to their editors. Along with the reporters came the police, RAAF officials, ambulance and local bush fire brigade.

James Park at Hazelbrook being the closest vehicular access became the base for the search and recovery team for the two young fliers.

Norm again returned to the crash site guiding this team of men. The two bodies covered in tarpaulin were stretchered out to waiting ambulances at James Park.

As with any major event in a small village a crowd gathered at James Park. In the late afternoon, Norm recalls his father setting out to the crash site but on the way back it was too dark to see so he found a small overhanging cave near Bedford Creek to wait out the night.

Meanwhile Norm, who again after tea had returned to James Park, said I'm going to find Dad, the police said no, but Norm was persistent and for the third time that day set off again towards the crash site along with three others including the policeman.

With the use of kerosene lamps they reached the crash site. In the distance they could hear the Mudgee Mail Train coming up the mountains so they knew it was about 9pm.

Not finding his father John, they returned home; Norm being very familiar with the bush directed the other three back to James Park.

Meantime John Campbell had reached the crash site but on his way back it was too dark with out a light so he found an overhang near Bedford Creek to wait out the night and walked out at first light.

Norm records that his father had heard and seen their light but as Bedford Creek was running higher than normal and with the noise of the running water they could not hear each other.

By the next day the crash site had its souvenir hunters and in a short period of time a number of houses in Hazelbrook must have sported various pieces of the plane. One of the souvenir hunters was Norm and his brother Colin who returned early to the crash site as they had overheard the local plumber saying he was going to get the propeller, so they thought they would beat him to it.

The propeller (one half of it, as the other half was very mangled) ended up residing in Norm's sister Mary's house until her death in 2004 and being displayed in her front room.

Mary was only too happy to relate events from that eventful day and embellished the part that she played to the point that you would think that she was the one who led the search and recovery team to the crash site instead of being one of a few women who supplied the food and drink to the rescue team.

Many years after the accident relatives of Sergeant Monterola from Melbourne sought out Mary to talk about the accident. Mary would have liked to place a plaque near the site in memory of the two fliers but National Parks are not in favour of memorials in the park so the plaque never eventuated.

WALK TO KNAPSACK BRIDGE

Glenbrook & District Historical conduct regular walk and talk tours to historic sites.

On Saturday May 26 a walk is planned to Duck Hole, Glenbrook Creek.

On June 16 a walk to Eastern Zig Zag, Knapsack viaduct (pictured) and old mine shaft is being organise.The Lapstone Zig Zag was built on the Great Western Railway between 1863 and 1865, to overcome an otherwise insurmountable climb up the eastern side of the Blue Mountains.

The Zig Zag track included a now abandoned station called Lucasville which was built for the Minister for Mines, John Lucas who had a holiday home nearby.

For further details Doug Knowles 4751 3275.

Plane crash at Glenbrook

By Shirley Evans --- Springwood Historians

A TWIN engine Avro Anson, used for training at the Air Navigation School Parkes was on a mercy flight transporting a seriously ill airman to Sydney for urgent medical treatment when it tragically crashed killing all five men

At about 4.45 pm, Tuesday, January 28, 1941 the RAAF plane carrying five airmen crashed in Glenbrook in the lower Blue Mountains.

The plane was piloted by Pilot Officer John Ignatius Newman, 25, single of Toowoomba, Queensland.

He was a prominent rugby union player and had represented Queensland on a tour of New South Wales.

He helped establish the Toowoomba GPS football club and was its first captain.

His father had been a Brisbane detective and both parents were dead. Newman had completed over 313 hours of flying training and had been assessed as "average" or "average plus" on his flying courses.

Squadron Leader James M Rainbow, 42, single of Double Bay was the station medical officer.

Flying Officer Henry Theodore Skillman, 30, married of Parkes, was a qualified navigation instructor but was not a qualified Anson pilot. He was undergoing a conversion course on Ansons.

Flying Officer Bailey Middlebrook Sawyer, 34, married of Parkes, was the patient. He had a serious middle ear infection and it was thought he urgently needed specialist medical attention.

His service record held by the National Archives of Australia is very short on detail – place of birth unknown, place of enlistment unknown but date of birth was recorded as June 7, 1906.

The Sydney Morning Herald March 25, 1994 reported that the RAAF's chief of operations at Glenbrook, on the occasion of unveiling a monument at the site of the crash, said that Pilot Officer Sawyer was an American adventurer who was sailing in Australian waters when World War II was declared. He then joined the RAAF.

Aircraftsman Charles Richard Tyson, 23, single of Geelong West was the wireless operator. His father was a police sergeant.

Avro Anson planes had entered the RAAF service in 1935 and were initially used for maritime patrols. By the beginning of the war they were considered obsolete for this type of operation and were superseded by Lockheed Hudsons. Ansons were then considered ideal as training aircraft. According to the RAAF Museum Point Cook web page they were known as "Faithful Annie".

Avro Ansons similar to the one that crashed at Glenbrook

Eight days before the fatal flight, Flying Officer Sawyer developed the middle ear infection and by January, 28 it had developed into a mastoid with pus. Squadron Leader Rainbow warned the station commander that a plane might be needed to take the patient to Sydney.

Aircraftsman Charles Richard Tyson, 23 killed in crash

At about midday he decided it was an urgent necessity and the plane and crew were prepared. An operation order was prepared but not finished in time to give to the pilot who was instructed verbally.

The weather in Parkes was perfect and cloudless and he was told to keep below any cloud and to turn back if this was impractical. He was also told to fly low because of Sawyer's ear infection.

The plane took off at about 3pm and was in frequent wireless contact until 4.30pm. It was next heard and observed at Glenbrook where the sky was almost completely overcast with clouds hanging fairly low.

Witnesses saw it emerging through the clouds at a fairly steep angle. The port wing was seen to shatter about the middle and pieces fluttered down.

The aircraft tipped onto its left side and dived at great speed towards the ground where it struck an electric light pole and started two small fires.

The five parachutes were found at the scene.

Glenbrook station master, Oliver Shaw, who lived near the site of the crash at the intersection of Lucasville Rd and Clifton Ave, said he found the bodies of the airmen some distance from the wreckage. Portions of the wing material were found scattered throughout the bush over a wide area.

The story of the crash attracted a great deal of attention throughout the country. Newspapers from Darwin, Queensland, Western Australia, Tasmania and various towns in NSW such as Broken Hill carried the story. On January 30 the *Canberra Times* reported that the Minister for Air, Mr McEwen, stated "that of the last nine air accidents investigated it had been established beyond question that in eight cases personal misjudgement on the part of the crews had been the cause." He also said that the investigation into the Glenbrook crash had started and that there would be two independent inquiries.

Workers' Union condemned blaming the crew

Mr Forde, Deputy Leader of the Labor Party, urged for a searching inquiry into the system of training in the RAAF and the airworthiness of aircraft. He also suggested an enquiry into whether instructors were being overworked. He thought that accidents had been all too frequent in the last eighteen months. The Advisory War Council (see note 1) was to meet in Melbourne in the following week and Labor members intended to raise these issues.

The annual convention of the Australian Workers' Union opened in Sydney on January 31, 1941 and a searching inquiry into recent Air Force crashes was demanded. The union, the largest numerically and financially in the Commonwealth, deplored Mr McEwen's statement. Mr CG Fallon, Federal Secretary of the AWU, had lost a son in an air crash three years ago and *"condemned the practice of blaming the crew"*, although in that instance his son had not been blamed.

There was a coronial inquiry into the deaths of the five airmen in the Penrith Court House on March 4, 1941, where several Glenbrook residents, the manager of the Leonay Golf Club, a resident of Castlereagh St Penrith and several Air Force officers all gave evidence. The police were represented by Sergeant Kennedy and Wing Commander Ellis appeared for the Air Board. The Coroner, Mr EF Rule, concluded, "*I am unable to say what caused the crash, and would not say that any fault was due to the pilot whilst the machine was under his care.*"

A RAAF inquiry was held on January, 31 1941, very soon after the crash. The plane's records and log book and the airmen's records were examined and conclusions were reached. A copy of the report is available in the Local Studies Collection of the Blue Mountains City Library in the Vertical File under the heading AIR ACCIDENTS for those who are more technically minded but I will just quote some passages from it which I found significant:

REPORT NO. 11 REPORT ON ACCIDENT TO ANSON A4-5

"*The aircraft had for some considerable time been pegged down in the open and exposed to the weather. The riggers in charge of it stated that the protective covering on the plywood was inclined to crack, but was kept in good order by doping* (see note 2). *On 12.9.40 various repairs were effected to the port mainplane* (see note 3) *which had been damaged when the undercarriage collapsed while the aircraft was taxying. On 26.9.40 further repairs were effected to the port mainplane as the result of the aircraft being involved in a collision on the ground. Details of these repairs are attached to the report. On 25.11.40 repairs were effected to the plywood covering the underside port mainplane and a new ply panel was fitted.*"

"*The wreckage was examined by the Inspectorate at the scene of the accident on 29.1.41. The engines and centre section had crashed in the middle of a street in Glenbrook and were badly smashed. It was however clear that some disintegration had taken place whilst the aircraft was in the air. Portions of the wings and pieces of fabric were to be seen strewn as far back along the course of the aircraft as 700 yards from the main wreckage. The pieces furthest from the wreckage were pieces of the port wing suggesting that that was the first portion of the aircraft to break away. The first piece of the port wing, apart from small pieces of three ply and fabric which would naturally float furthest, to be located consisted of approximately 12 feet of the front spar together with portion of the leading edge. From then onwards to the position of the main wreckage various pieces of wreckage from the wing were found in a direct line corresponding to the path of the aircraft, including portion of the outer front spar of the starboard wing. These portions have been salved and instructions have been given for them to be forwarded to Air Board for further examination."*

"<u>The cause of the accident</u>"

(a) The accident was caused by the failure of the port wing which shattered about the middle shortly after the aircraft was brought down from or through the clouds.

(b) There are two possible causes either or both of which may have caused or contributed to the failure of the wing.

(1) It may have been due to the pilot descending at an excessive speed and so placing upon the wing a strain which it could not withstand. If this were the case the excessive speed may have been induced by the pilot desiring to take advantage of some gap in the clouds which he observed, or he may have been urged to descend quickly to a lower altitude for some reason connected with the patient in the aircraft.

(2) It may have been due to some weakness in the wing structure. The salved parts are

Continued page 16

Continued from page 15

being sent to Melbourne where they will be examined as soon as possible in an attempt to discover whether any weakness existed.

Whether the precise cause of the failure can be narrowed down still further to one of the above mentioned causes will depend upon the result of that examination.

Recommendation It is recommended that the facts of the present case be placed before the Director of Medical Services with a view to consideration by him of whether there are types of illness in which it is, because of altitude, inadvisable to transport the patient by air. If such types of illness do exist it is recommended that medical officers be advised accordingly."

I have found no evidence of further inquiries.

... brass plaque marks site of tragic crash...

On March 24, 1994 a monument of carved stone with a brass plaque was erected in Clifton Ave to mark the site of the tragic crash. Two brothers of Charles Tyson were able to attend the unveiling and memorial service.

Postscript In 1956, 15 years later, my husband, Jim, and I bought the block of land at 4 Clifton Avenue Glenbrook and built our first home. We lived there until the end of 1965, having our family, creating a garden, playing tennis and working with the Country Women's Association while Jim taught English and history at Penrith and Richmond High Schools.

Our house was very close to the crash site and very close to the home of Mr Shaw, a major witness, but never, at any time, did we hear of the dreadful accident. We were very surprised to read about the monument. I'm not sure what conclusions to reach from this – how quickly local history can be forgotten, perhaps.

Notes:

1. Advisory War Council: This was "formed under regulations on October 28 1940 after the September federal elections that year had given the government a majority of only one and after attempts to form an all-party government had failed. The members were the prime minister and 3 ministers and 4 members of the Opposition, and it provided a place for secret discussion of defence policy. It met less frequently in the later war years and was abolished on August 31 1945." Australian Encyclopaedia, 1963

2. Doping: a dressing, varnish or filler used as for protecting the cloth covering of aeroplane wings." Webster's' Dictionary of the English Language

3. Port mainplane: left wing of aeroplane

Managing your collection/State Records workshop

TO help the heritage sector increase its skills, the RAHS in collaboration with State Records of NSW will bring Managing Your Records workshops into communities.

BMACHO has taken up the offer and Blue Mountains Historical Society have agreed for the workshop to be held at their research rooms, Hobby's Reach, Wentworth Falls

This is a 3-hour workshop with a break in the middle for lunch.

Some of the subjects to be covered are:

* Compiling and managing databases

* Digitising records and photographs

* Paper collection indexing, housing storage, and temperature control

* Providing access to records

Other topics that may be covered are:

* Arranging and describing collections

* Accessioning procedures

* Do's and Don'ts of storage

The RAHS agreement with State Records, requires that priority is to be given to RAHS members and affiliates.

The workshop will be held:
When: Saturday November 24, 2012
Time: 10.00 am for 10.30 am start
Where: Hobby's Reach Research Rooms, 99 – 101 Blaxland Road Wentworth Falls

Enquiries and bookings: Contact Jan Koperberg at j.koperberg@bigpond.com , bmacho.heritage@gmail.com or phone Jan on 02 4754 1544

Dave Evans - the Felixman of Echo Point

by John Merriman - local studies librarian, Blue Mountains City Library

DAVID (Dave or Dan) Evans, also called the Felixman, was a widely known local identity at Echo Point, Katoomba from the 1920s to the 1950s, with his Felix the Cat and later, mountain devil props.

Visitors, mainly families with children, would pose for a souvenir photograph which he developed while they waited. A number of these surviving photographs are held in the local studies collection of the Blue Mountains City Library.

One early photograph in the collection is a tintype, the rest are printed on photographic paper and mounted in a card frame.

Few facts of Dave Evans' life are known; he was apparently Welsh and lived in Kurrawan St Katoomba, within walking distance of Echo Point.

His income would have been highly seasonal and dependent on weather and holidays, never large enough to warrant a shop or staff and professional darkroom setup.

One witness says he would be at Echo Point taking pictures 'rain, hail or shine'; so his business address was right there in the open air where his customers were - what a workplace! A little draughty perhaps but in the absence of customers one always has the view, or the mist, or both.

The early photographs from the 1920s and 1930s show the child size Felix the Cat mannequin accompanying one or more children or family groups, some kids needed mother close by as their looks of apprehension suggest.

The later images from the 1950s show the large Mountain Devil doll. This may be a response to the commercial success of Felix and concern with copyright.

The majority of his surviving photographs are taken at Echo Point and they cover few other subjects but tourist portraits; although he may possibly have also operated at the Scenic Railway and there is a group portrait of working men at the Hydro Majestic with a Felix figure.

He was quite unlike a photographer such as Harry Phillips who took few intimate photographs and published widely and commercially on landscape subjects.

Evans is not listed as a property owner in council's rate records and local cemetery records make no mention of a David Evans, although he is listed in a 1933 commercial directory as D Evans, photographer of Katoomba and he is absent from the 1950s Katoomba phone books.

In April 1932 the *Blue Mountains Times* reported that Mr Evans, the Felixman at Echo Point, had

complained to Katoomba Council of unlicensed persons plying a somewhat similar business without paying a fee.

Katoomba shopkeepers were also complaining of the many street musicians collecting from passers by – they had become so common as to be quite a nuisance.

The Great Depression produced many unemployed men who tried their hand at busking for a few coins.

In 1962 the "late D Evans" photographic licence was transferred to Souvenir Snapshots of Katoomba. His name is too common to identify him in any NSW birth, death and marriage records and his final resting place remains a mystery.

Pictured bottom left is a very young Jan Koperberg nee Skulander her mother, Florence Jean Skulander, née Lea and next to her is her sister, Gladys Lea, circa 1949-50 with the mountain devil at Echo Point, Katoomba. At top of page is an image of an original tin type photograph of two unknown children.

Anyone who can can add more information about Dave Evans, The Felixman of Echo Point, or have any of his photographs is asked to contact John Merriman.

Thompson Square, Windsor: the oldest civic square in Australia under threat

by Jan Barkley-Jack and Ian Jack

WITHIN a year of the first European settlement along the banks of the Upper Hawkesbury in 1794, a civic square began to form at Hawkesbury, with four wooden buildings on three sides: a wharf, store-house, the first soldiers' barracks and a granary.

The fourth side was the frontage to the Hawkesbury River, where ocean-going boats brought supplies and took grain back to feed Sydney.

The form and extent of the square as it is know it today were fixed by 1800.

Andrew Thompson received a lease that defined the eastern section of the square in 1799.

Governor Hunter had added a watch-house and a cottage for Thompson when he was constable, replaced the provision store and the soldiers' barracks and built two granaries.

All the early Hawkesbury settlers from 1795 onwards frequented the square regularly to get provisions, store their grain or to seek the help of the constables, the military or the magistrate, many landing at the square from their small boats.

High-ranking visitors, including all the early governors, also knew the square well.

The fabric within the square was steadily improved and amplified under King and Bligh, and when Macquarie first visited in 1810 he recognised it as a fully developed civic precinct which he called 'the present square'.

The name Thompson Square was given by Macquarie in honour of the archetypical convict redeemed. Achieved through extraordinary abilities of character, Andrew Thompson's entrepreneurial and civic successes, culminating as the first emancipist magistrate, make him a foremost representative of this Australian icon.

Thompson Square as an eighteenth-century public square in the most immediately successful of Macquarie's eight new country towns is a striking part of the surviving evidence for the governor's policies.

No other of Macquarie's squares in new towns such as Richmond or Wilberforce or Liverpool was already in existence.

Moreover, although public squares were a commonplace of Georgian town planning in Britain and elsewhere, the earlier settlements of Sydney and Parramatta along with Toongabbie had not initially developed around such defined focal space: no eighteenth century civic square predating Thompson Square now exists.

From Macquarie's time onwards, fine buildings were erected on the three landward sides of the square.

The suite of nineteenth-century vernacular buildings now adorning the west side of the square, the *Macquarie Arms* (built between 1812 and 1815), Howe's House (1820s) and the Doctors' House (1844), has exceptional integrity and architectural distinction.

The continuing aesthetic values of Thompson Square are embedded in the relationship and interaction between the built and the natural environment, because a civic square consists of both open space and its encapsulating buildings.

Because of the wharf and the bridge built in 1874 (and raised in 1897), Thompson Square has always been a thoroughfare.

The roadways in and across the square have evolved organically from the early tracks down to the punt, and naturally have brought changes to the contours and grassy spaces within the total area, but they have all remained low-level, sympathetic in bulk and scale, and so have continued unobtrusive for 217 years.

The Macquarie Arms (built between 1812 and 1815)

No 5 Thompson's Square built circa 1850

Howe's House (1820s) now part of the Hawkesbury Regional Museum

The Doctors' House (1844)

They do not interrupt the important sight-lines across the square or those from all parts of the square to the rural land opposite which is still readable as the part of the original 1794 farmers' grants.

All this is threatened by the current proposal to put a wider, higher-level bridge a short distance downstream from the 1874 bridge.

Continued page 19

Threat of disruption to historic sightlines

Continued from page 18

The approaches to the new bridge would bring a major roadway through the north-eastern part of the square critically close to the buildings, disrupting the historic sight-lines and bringing an intolerable volume of noisy heavy traffic through Windsor's most popular public space, which is thronged every weekend.

No economic advantage would accrue to local businesses, because through traffic does not stop, and turning off into Windsor town will be gravely impeded.

It has been alleged that the 1874 bridge is no longer safe. Engineers' reports, however, make it clear that with judicious conservation the old bridge can continue in use into the 2030s.

The cost of conserving the existing structure is estimated at around $1m, a fraction of the cost of the proposed new bridge, especially one considered for the short term and in isolation from the wider needs of a flood-prone district.

The Options Report of Road and Maritime Services, published in 2011, acknowledges that the proposed bridge will itself be obsolete by 2026.

What is needed on the Upper Hawkesbury is a new crossing which will by-pass the historic towns and other important heritage places, well away from Windsor.

All bridge sites within the town of Windsor lead from one readily floodable area (McGraths Flats) to another (Wilberforce Road).

It is surely essential to plan a reasonably secure route from Windsor Road to the Hunter for the long term.

Such a new bridge elsewhere is more costly, which was, naturally, an important consideration in the preference and given to the Thompson Square option, but it is inevitable and would be good planning.

A photograph of Thompson Square taken by Ian Jack on March 3, 2012 from the opposing bank of the river when the water was very high, close to the decking of the existing bridge on the right.

Thompson Square from much the same place, painted by GW Evans in 1809, so this is the pre-Macquarie square. It is annotated with red to show the schematic curtilage of the present Thompson Square Conservation Area.

The Thompson Square Conservation Precinct has had a place amongst listings at the top of the New South Wales Heritage Register for nearly thirty years, and this formal protection is being over-ridden by the state government. Now that the value of Thompson Square as Australia's only eighteenth-century civic square has been fully documented, there is mounting local and Australia-wide outrage that the national values of this iconic civic space will be destroyed for short-term convenience.

Note: For references to the historical evidence which supports this article, please contact janbarkleyjack@aapt.net.au.

Save Thompson Square, Windsor Australia's first public square under threat

Sunday, June 3, 2012 at 12 noon

Management committee changes at AGM

TWO of the original management committee members of the Blue Mountains Association of Cultural Heritage Organisation (BMACHO), Professor Barrie Reynolds and Dr Peter Stanbury, OAM did not seek re-election at the recent annual general meeting.

Barrie and Peter have been executive members since the society was formed in April 2006 leaving John Leary and Ian Jack as the only other 'originals' serving on the committee.

Much of the credit for establishing the organisation must go to Barrie who for 3½ years was the inaugural secretary. During the past 6 years Barrie has been successful in gaining considerable funds for the work of BMACHO with more than $12,000 from successful applications in the past financial year.

Peter has filled a number of roles on the executive in the past 6 years including that of treasurer.

He has vast experience in various aspects of heritage particularly in the area of museums in Australia and overseas and has readily and freely provided assistance to organisational members throughout the region. His cheery disposition has made him popular not only on the committee but also among those with whom he has worked in the community.

Also to retire from the management committee were former treasurer, Kathie McMahon-Nolf and Jean Arthur. The input of both of these members will also be missed. Kathie took on the role of treasurer in March 2009 when there were difficulties in finding someone for this office.

Kathie's bright and breezy approach to issues was often welcomed during meetings.

A former president of Kurrajong-Comleroy Historical Society she has phenomenal knowledge of that district; Kathie lives on the same land her ancestors first settled in 1838. Kathie's husband, Alex passed away last year and Kathie will spend more time with her family some of whom live in Canada.

Jean a long-time secretary of Mt Victoria and District Historical Society has brought her lifetime of knowledge concerning local history to the management committee.

Although she suffered a serious road accident last year she still contributes assistance to the local historical society as well as a member of the Blue Mountains City Council's committee for the Western Crossing's commemoration.

At the 7th annual general meeting of BMACHO Pamela Smith, was elected unopposed for her second term as president as was Ian Jack for a sixth term as vice president, and Jan Koperberg for a third term as secretary.

Other members of the committee to be re-elected were former president John Leary, OAM, former treasurer, Joan Kent, Richard Morony, and Doug Knowles with a newcomer to the management committee being Scott Pollock.

Following the election of office bearers and committee, John Leary congratulated those elected welcoming "on board" Scott Pollock, the manager of Everglades.

Congratulating the president Pamela Smith, he said, "Pamela you brought to your first year as president a different style of leadership, a style that was most welcome and one that ensured members of the organisation were aware of what the committee was doing.

"Despite a busy life including university study, you along with Jan Koperberg have done a tremendous amount of work behind the scenes. It is indeed pleasing that you have accepted nomination for a further year and in what will be a busy time including the organisation of the Blue Mountains History conference," John said..

WELCOME TO NEW COMMITTEE MEMBER

AT the May meeting of BMACHO's management committee, Judy Barham accepted a position as a member of the committee for 2012.

Currently Judy is vice president of the Blue Mountains Historical Society and has been working as its librarian for a number of years during which she has been entering the library catalogue onto a database. Judy has said this is a long job and is still not finished.

"However, I am enjoying it and I now have an excuse to spend more time in bookshops! While the library budget is small, I have an excuse to buy a few books each year with someone else's money!

"I have worked as a high school teacher and for many years in the IT Industry as an analyst/ programmer. History has long been a hobby and I went back to university as a mature age student and completed by correspondence a degree in Australian History – years I thoroughly enjoyed," said Judy

From left to right Barrie Reynolds, Kathie McMahon-Nolf, Jean Artrhur,Peter Stanbury and Scott Pollock.

Last chance for 105 years to see Transit of Venus if missed on June 6, 2012

by John Leary, OAM

THE transit of Venus is one of the most famous events in the history of science according to Dr Nick Lomb long-time curator of astronomy at the Powerhouse Museum.

In his book *Transit of Venus* he states: It occurs when Venus, the planet named after the Roman goddess of love appears to move across the disc of the Sun.

This phenomenon occurs in an unusual pattern, in a pair of 8 years apart, and then not for over a century.

Transits of Venus are of especial interest to Australian since it was Lieutenant James Cook's voyage to Tahiti to observe the 1769 transit that led to European settlement of the continent.[1.]

During a transit, Venus can be seen from Earth as a small black disc moving across the face of the Sun. The duration of such transits is usually measured in hours (the transit of 2004 lasted six hours). A transit is similar to a solar eclipse by the Moon. Observations of transits of Venus helped scientists use the principle of parallax to calculate the distance between the Sun and the Earth.

Waiting for the transit at Woodford. Photograph from Transit of Venus 9 December 1874

In December 1874 observation was organised by the first Australian-born government astronomer Henry Chamberlain Russell.Four separate observing parties set up to reduce the chance of cloud disrupting observations. The sites were Sydney Observatory, Woodford, Goulburn and Eden on the south coast.

The site at Woodford was the property of Sydney businessman Alfred Fairfax (no relation to *The Sydney Morning Herald* Fairfax family) later to become the Woodford Academy now owned by the National Trust. The Woodford team was led by no lesser person than the surveyor-general PF Adams.

It is likely that in 1874 few would have seen the transit other than trained astronomers. But not so in 2004 as the event was transmitted to millions around the world by television as it happened.

At Woodford in 2004 an estimated 1000 people watched the transit through a series of telescopes and big screens while others were bused from Woodford Academy to a private observatory in Wentworth Falls for a viewing.

The day culminated with a formal dinner in the historic Woodford Academy where the guest of honour were Justice Barrie O'Keefe AM , president, National Trust and Warwick Watkins surveyor-general of NSW.

No doubt on June 6, 2012 a few will gaze into the sky to observe the Transit of Venus not to be seen again until the year 2117.

National Trust – Blue Mountains Branch will conduct a walk on the Transit of Venus Track on May 26. For more information contact Liz 4757 2694 or BlueMtsNatTr@gmail.com

End notes

[1.] Lomb, Dr Nick, *Transit of Venus* 2004 Sydney

Hartley 2012 History Workshop

HARTLEY District Progress Association – 1813 Commemoration committee will hold the 2012 History Workshop at the Hartley School Hall (1881), Middle Hartley Road, Hartley on Saturday, June 2, 2012

Continuing in the theme discussed at last year's workshop, the meeting will focus on 2012 as the bicentenary of the end of the era of pre European settlement.

Informality will be the keynote for a morning discussion around the theme of Hartley Valle before the coming of the white man.

Conversation can range broadly and participants may well discuss the best way to enrich the proposed 2013 Hartley History Forum with a strong element to engender a better understanding of the rich Aboriginal culture that was displaced by European settlement.

After a morning discussion around the fire in the Hartley Schoolhouse and a light lunch those attending will disburse to examine a number of heritage treasures within the valley.

This meeting is open to all who would like to attend.To facilitate catering those wishing to attend the workshop should advise Jeremy Dawkins at jeremydawkinsmail@gmail.com or Ramsay Moodie at ramsay.moodie@bigpond.com no later than May 30. Telephone enquiries to Ramsay Moodie at 0412 283 800

Walking with women

WALKING with Women – sharing the journeys of convict women from trial and transportation to life in the female factories is the topic chosen by guest speaker Gay Hendriksen at BMACHO's next general meeting.

Also to be discussed is their connection today and the significance of the Parramatta Female Factory.

Following on the success of the last general meeting of BMACHO when the guest speaker was Phil Hammon of Scenic World the next general meeting is scheduled for Saturday July 14.

The meeting is scheduled to commence at 2pm at the Blue Mountains Historical Society's Rooms, Hobby's Reach, Blaxland Road, Wentworth Falls.

Gay Hendriksen is a Blue Mountains resident and has worked in the gallery and museum environment for 21 years including local history museums in Shellharbour and Sydney, Penrith Regional Gallery, Norman Lindsay Gallery and Museum and now Parramatta Heritage Centre.

She also curated the exhibition Women Transported - Life in Australia's Convict Female Factories which has won national and state awards in excellence last year

Gay Hendriksen

She is currently president of the Parramatta Female Factory Action Group which has the aim of saving the Greenway designed Parramatta Female Factory which was commissioned by Governor Macquarie and making it available for all to experience.

Afternoon tea will be served and for further information contact Jan Koperberg at j.kopeberg@bigpond.com.au

GREAT WORK IF YOU CAN GET IT!

BMACHO member and doyen of heritage and vintage fashion and curator of the Darnell Collection, Charlotte Smith will take part in a 10 A day luxury tour of England later this year.

There will be many special highlights such as afternoon tea and cocktail making at Bovey Castle entry to Killerton House and dinner at the world famous River House.

Later those participating in the tour will stay at Bath for three nights in that historic city where they can stroll through the Bath Vintage Fair.

The party will visit Frome a delightful and historical market town that features cobblestone streets and famous quirky vintage shops.

Then it's on to the Dorset countryside and the beautiful town of Totness which is the home of the Museum of Costume, Fashion and Textiles. Then follows visits to several other towns before returning to London for an exclusive tour of Kensington Palace.

The tours starts at $7099 but airfares to and from UK are not included. For more information visit Travelling Divas at www.travellingdivas.com.au

More accolades for *HERITAGE*

FROM Alison Spencer, Research Officer, Penrith City Library: *Your group has very kindly been sending a copy of your newsletter to Lorraine. We have decided to put this newsletter into our Local Studies magazines collection as it contains many articles relating to something or someone in our area.*

From Dr Peter Rickwood, former president Blue Mountains Historical Society, editor of Blue Mountains History Journal: *Congratulations on yet another informative issue of Heritage Newsletter. I have great admiration of your work in hunting down so many different authors.*

From Alan Clark, secretary Shoalhaven Historical Society: *Congratulations on the latest edition of Heritage which is up to its always high standard; I usually forward the newsletter to people which they enjoy in the Shoalhaven Society.*

From Andrew Tink former MP in NSW Parliament: *Many thanks for including my Sydney article in Heritage. The high quality of your magazine continues to astound me and for me, it is indeed a privilege to be asked to contribute an article to it.*

From Wendy Blaxland, great, great, great, great grand-daughter of Gregory Blaxland: *Loved the newsletter; thanks so much.*

From Ken Goodlet, local historian and author, Hazelbrook: *Congratulations once again on your latest HERITAGE in March-April.*

TRAVELLING THE SILK ROAD

STEP back a 1000 years in time to experience the sights, sounds and stories of the greatest trade route of history.

Travelling the Silk Road is an exhibition of the ancient pathway to the modern world on show until July 29 at the National Museum of Australia, Canberra.

Admission is $10 adults, $8 concession pass holders, $5 child or $22 a family.

For information: Freecall 1800026 132 or www.nma.gov.au

Scots Church, Pitt Town celebrates its 150th anniversary

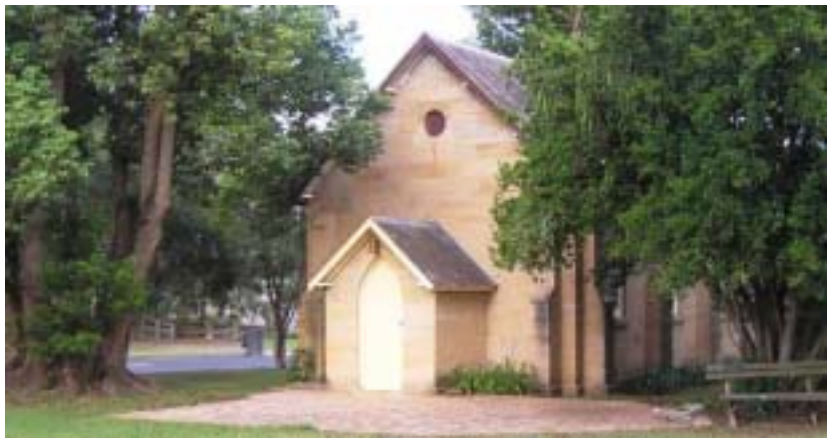
SCOTS Church, Pitt Town will celebrate its 150th anniversary during the weekend May 25-27 and the public are invited to participate in the activities.

A car tour organised by the Hawkesbury Historical Society is part of the sesquicentennial celebrations of Scots Church and will be held on Saturday, May 26

Starting at 10.30am at Scots Church, Bathurst Street, Pitt Town, the tour focuses on the lives of William Hall, the principal donor for the building of the church in 1862 and Rev George Macfie, the minister at the time the church was built.

The areas to be toured are Cattai and Pitt Town.

The tour starts with talks given in Scots Church by local historians.



The first stop on the tour is at the Riverside Oaks Golf Resort, Cattai, the original land grant given to the pioneer George Hall, where historical sites will be inspected.

A sandwich and finger food lunch will be available at Riverside Oaks before returning to Pitt Town.

After visiting various sites in Pitt Town a Devonshire tea will be served at the church.

Bookings are essential. Tickets $25 per person, $15 per child 5-16 years with under 5 year olds free.

For bookings contact Kath Wilkins 4577 3842.

On Friday night May 25 a bush dance will be held in the Maraylya Hall, Boundary Road, Maraylya commencing at 6.30pm For further information 4572 3518.

On Sunday, May 27 an anniversary service will commence at 10.30am. The service will be followed by a plaque unveiling, cutting of an anniversary cake, morning tea, entertainment, historical talks and displays.

For further information contact Ted Brill 4579 9235.

Scots Church circ 1932

HISTORY WEEK 2012

Theme for this year - "Threads. They wore what!"
September 8-15, 2012

LONG before the fashionist as of today decided 'the look', dress was an important element of human expression.

From status to style, culture to professional identity, clothes have defined us.

History Week 2012 will explore the history of threads and unpick the meaning behind the wardrobes of the past.

During History Week, community groups, local councils, libraries, archives, museums, universities, cultural institutions, professional and amateur historians across NSW open their doors to present the latest in today's historical research – fascinating stories, artifacts and experiences about both our past and ourselves today.

The History Council of NSW encourages groups to register local events for History Week on the internet at www.historycouncilnsw.org.au/history-week/history-week

History Week events will be published on the website from August to September

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or it's really going to happen

THE Western Crossing Committee continues to meet regularly under the chairmanship of Emeritus Professor David Carment, with an ever increasing attendance of organisations and local government from Blacktown to Bathurst.

PENRITH PLANS. At the most recent meeting, Lorraine Stacker reported that Penrith City Council had released a program and events overview to include community commemorations and lasting legacies.

She said there would be a breakfast function at South Creek Farm, the launch of the re-enactment trek, a family camp out on the banks of the Nepean River, a historical festival and commemoration of the 50th anniversary of Emu Plains becoming part of Penrith City.

The lasting legacies would include a commemorative booklet, preparation of supplements for local newspapers and special memorabilia.

CROSSING! THE PLAY. The exciting theatrical project, *Crossing!* the play recreating the crossings of the Blue Mountains in a lively and interactive theatre production is forging ahead well, with generous help and information coming in from many directions, reports Wendy Blaxland.

Deirdre Burges has agreed to be the designer and Sarah de Jong composer. Both are experienced and well-regarded theatre professionals.

Books, documents, individuals, courses and discussion have led to the understanding that while the 1813 crossing is important, it falls within a continuum of crossings dating from Aboriginal crossings for thousands of years, a number of different explorations in different areas of the mountains and other important later crossings, including the building of the road and the perilous journeys of some early settlers and travellers. These aspects will also form part of the play, giving a wider perspective on the central story.

The central season of *Crossing!* will be during May and June 2013. Performances will take place at the Blaxland and Wentworth Falls Festivals, as well as at other Mountains townships, both in schools and more public venues.

Partnerships are being forged with chambers of commerce, local government, historical societies, drama departments in schools and local theatre groups to ensure that the *Crossing!* project is firmly rooted in the local community.

CONFERENCE. The 2013 RAHS State History conference will be held in the Blue Mountains.

HARTLEY FORUM. Joan Kent has advised that Hartley District Progress Association will hold a forum on June 12, 2012 when discussions would be about the area before European settlement; another at the end of May or early June 2013 based on the western crossings and one in 2014 about surveying and building the road.

ABORIGINAL ARTEFACTS. Mt Victoria and District Historical Society is planning an exhibition in 2013 to include Aboriginal artifacts.

DESCENDANTS' PARADE. Marcia Osterberg-Olsen has advised that the Mt Victoria & District Historical Society is planning a parade from Mt Victoria to Mt York with descendants depicting the three explorers, the servants, the horses and dogs.

The parade will probably be held on Sunday May 26 to maximize the participants rather than the anniversary, May 28, 2013.

BLUE WAVE WALK. The Blue Mountains Blue Wave walk planning is well advanced.

Blaxland's grave site report

At the request of Professor Carment, AM, Dr Siobhan Lavelle, OAM has prepared an updated assessment of the headstone and gravesite of Gregory Blaxland[1]

The report indicates: 'There is little or no work required on the headstone at this time' following the repair work carried out to the site in 1997.

Dr Lavelle reports that '…although the reblacking [on the headstone] has faded …the inscription remains legible'

'If more attractive aesthetic appearance is desired then minor cleaning could be carried out.

'That should be done with water and a soft bristle brush.

'The aim would be to remove surface soiling and NOT to achieve a new looking stone.

'It is perfectly appropriate for a stone of this age to look old and show evidence of its history.'

[1] Siobhan Lavelle, *Headstone & Gravesite of Gregory Blaxland All Saints' Cemetery, Parramatta – Updated Assessment April, 2012*

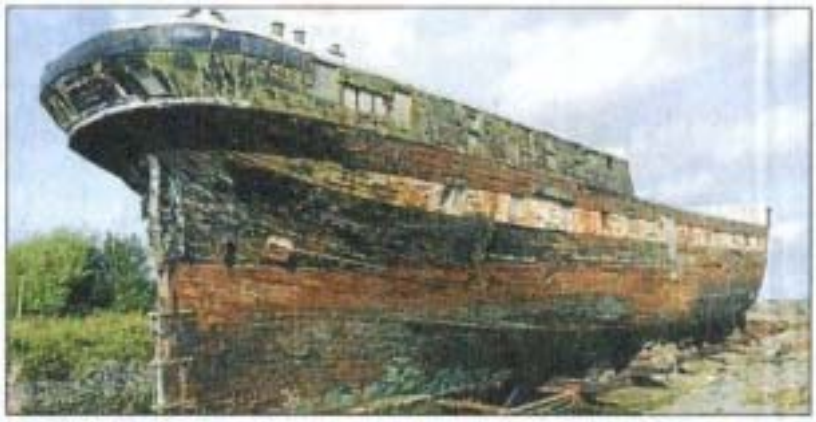
Historic clipper retires to sun after 150 years

IT is the oldest surviving clipper ship in the world apart from the Cutty Sark, and in its heyday carried emigrants from Scotland to Australia where about 250,000 people can trace their origins to its passengers.

For years the City of Adelaide has lain rotting on a slipway in Irvine, Scotland. But now, almost 150 years after it was launched on May 7, 1864 preparations are under way for one last voyage to Adelaide, where the vessel is to become a tourist attraction.

According to the UK National Historic Ships Committee, the 54 metres ship is one of the most important in British maritime history, the last survivor of the timber trade between North America and Britain.

Despite its early splendour and pedigree, the future had looked bleak for the *City of Adelaide* after it sank in the River Clyde. It became a political issue, with various parties laying claim to ownership until a bid from Australia secured its future. The ship spent 23 years making 16,000 km trips to and from Australia and, played a fundamental role in the development of the young nation.



The hulk of the City of Adelaide before it is loaded on 100-tonne cradle for shipping to Australia

In 1893, it was converted to a hospital ship at Southampton and after being commissioned in the Royal Navy in 1924 was converted to a training ship and renamed *HMS Carrick.*

It sank in the Clyde in 1991 and after a year under water, it was raised by the Scottish Museum and moved to its present site.

The clipper will become the centrepiece of the maritime heritage display in Adelaide.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: j.koperberg@bigpond.com or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.

BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."

The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations.

One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.

Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains, Lithgow and Oberon Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Hartley Valley District Progress Association, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committee, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low, Ian Milliss, Pastsy Moppett, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2012-13 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Judy Barham, Joan Kent, Doug Knowles, John Leary, Dick Morony (public officer), and Scott Pollock.

.**AFFILIATIONS** BMACHO is a member of the Royal Australian Historical Society Inc.

JULY - AUGUST 2012 ISSUE No. 22

Governor opens 'The Red Admiral' exhibition at Mt Wilson

GOVERNOR of NSW, Professor Marie Bashir, AC CVO officially opened "The Red Admiral" – an exhibition of Patrick White's years at Mount Wilson last month

Mt Wilson and Mt Irvine Historical Society celebrated the centenary of Patrick White's May 28, 1912 birth date with the opening of an exhibition that examines the writer's early years at Mt Wilson.

It highlights the impact of both the Australian natural environment and the influence of working class and wealthy society individuals and families that were to strongly shape White for the remainder of his life.

"He [White] was one of our greatest writers and this exhibition enriches our understanding of him," said Professor Bashir .

"The hidden yearnings of White's characters are what I have most enjoyed and now I am inspired to revisit them," Professor Bashir said.

David Marr and Barbara Mobbs, White's biographer and literary executor respectively, were also guests of the society at the opening.

A specially commissioned 25 minute DVD of White, and his relationship to Mt Wilson, premiered at the exhibition.

The film featured interviews with three Mt Wilson residents, Peter Valder, Mary Reynolds and Libby Raines. Another three local residents – Rachael Kohn (interviewer), Huw Evans (narrator) and Fiona Carruthers (producer) – also made significant contributions to the film.

Mary Reynolds, OAM , the Governor of NSW Professor Marie Bashir AC CVO and Des Barrett at the exhibition opening

Dr Bernadette Brennan and Dr Susan Lever, two respected academics from the University of Sydney and the Association for the Study of Australian Literature (ASAL), and David Marr were also interviewed in the video and explore Mt Wilson's influence on White's works.

Both the video and the exhibition material were enthusiastically received by attendees.

Most people were genuinely surprised at the deep affection White had for his childhood home and the profound influence it had on his work.

At the conclusion of the opening formalities, Des Barrett, president of the Mt Wilson and Mt Irvine Historical Society, presented $5,000 to ASAL for the purpose of study at post-graduate level (MA or PhD) of the literary work of Patrick White.

ASAL have nominated that the scholarship would be jointly shared by Georgina Loveridge from the University of Sydney and Lorraine Burdett from the University of NSW. Both Georgina and Lorraine attended the opening and were presented to the audience by Bernadette Brennan, ASAL's president.

The exhibition is now in winter recess and will move to the Mt Wilson Turkish Bath in September through to May 2013.

Details of opening hours during this period will be announced at a later date.

The DVD can be obtained by contacting Tim Gow at historicalsociety@mtwilson.com.au or on (02) 4756 2032. A donation to the Society of $15 to cover postage and copying costs is suggested.

An opinion from the editor.....

The digital age and the way researchers source information

FOR a decade or more libraries and universities around the world have been emptying their bookshelves of books as more of the bound paper objects are digitalised.

Of course some universities and to a lesser degree libraries are using the cover of a need to digitalise to dispose of publications which are not in regular demand thus freeing up valuable space for computers and work areas. Using the euphemisms of today this will mean 'the transformation of libraries from studious environments to social ones'.

Librarians have had to weigh up the pluses and minus of disposing of 'slow demand publications' from libraries and one of the more obvious downsides is this information bound between the dusty covers could be lost for ever.

So how is digitalising affecting the researchers — academics, professionals and more importantly for readers of this newsletter, people like the amateur historian and local studies enthusiasts?

Researchers face the task of acquiring technological skills to navigate the masses of information often displayed in an entirely different form of past centuries.

Generally speaking academics and professionals appear to have readily adapted to digitalisation; many predicting that with completion of indexing the time in researching subjects has been dramatically shortened allowing time saved "looking things up" to be used for more in-depth research. One of the downsides is of course that the easy access of information by students paves the way to more plagiarism.

But how are amateur historians coping? These are the people who as this column has stated many times before form the backbone of research and recording of our local history and heritage.

They have taken surprisingly well it would seem, to change, although there are some who have been left behind with the computer age and in particular digitalisation.

BMACHO with a generous grant from the Telstra Connected Seniors program earlier this year played a significant role in assisting local historians to better navigate the Internet and other organisations continue to assist older people.

Libraries are and have changed and it is interesting that the incoming chairman of the National Library of Australia, Ryan Stokes appears to come to the job making no claims as a scholar or lover of books. But rather in a previous life, he had according to the federal minister for arts shown leadership in "driving digital content and developing the digital economy with the wireless broadband provider Vividwireless."

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

What have we learned in 2067 years?

"THE budget should be balanced, the treasury should be refilled, public debt should be reduced, the arrogance of officialdom should be tempered and controlled, and the assistance to foreign lands should be curtailed lest Rome become bankrupt. People must again learn to work, instead of living on public assistance." Cicero - 55 BC

Correction

IN the May – June 2012 edition of *HERITAGE* it was reported that during the past 6 years Barrie [Reynolds] has been successful in gaining considerable funds for the work of BMACHO with more than $12,000 from successful applications in the past financial year.

While the statement was not incorrect it could have been reported that in his [Professor Reynold's] term of office BMACHO has been successful in applications at local, state and federal levels to the tune of some $25,000

Crisis for regional tourist icon Zig Zag Railway

ONE of the region's premier tourist attractions the heritage Zig Zag Railway at Clarence suddenly closed last month and could be off the rails for months after its board received notice to cease operations from the Independent Transport Safety Regulator (ITSR)

Larry Zanker, chairman, Zig Zag Railways issued the following statement: "Zig Zag railway has been operating both steam and diesel rail motor trains seven days a week for many years now.

"Unfortunately this intensive running schedule is taking its toll of our locomotives and carriages.

"Zig Zag Railway is currently developing a whole new set of procedures to ensure that we will be able to return to the services we offered before."

An ITSR spokesperson said the regulatory body did not consider there was an immediate threat to safety at the attraction but action had been forced by "systemic and management difficulties."

NSW Transport Minister Gladys Berejiklian has offered to provide the Zig Zag Railway's management with the advice, expertise and assistance it needs to update its operational systems to ensure compliance with regulatory requirements.

The Zig Zag Ralway is a 19th century engineering masterpiece and a renowned tourist attraction.

The Zig Zag is a full size, narrow gauge tourist railway located at Clarence, 10km east of Lithgow.

Built in the 1860s, the line was constructed to transport people and produce from the western plains of NSW to Sydney.

John Whitton, chief engineer of the NSW Government Railways, designed a 'Zig-Zag' line - a series of gently sloping ramps in the form of a letter 'Z' - which alternately push and pull trains down the escarpment.

The Zig Zag Railway, passes over three wonderful sandstone viaducts and through two hand-hewn tunnels plus a cutting. The views during its descent from the Blue Mountains into the Lithgow Valley are striking.

By the beginning of the 20th century rail traffic over the Blue Mountains was heavy and the single track was inadequate.

A ten-tunnel line was constructed through the escarpment and completed in 1910 bypassing the zig-zag line.

The trains, track and rolling stock are maintained and operated by the Zig Zag Railway Co-op Ltd, a voluntary, "not for profit' co-operative.

The Zig Zag Railway appeals to children and adults alike, especially those who once rode behind steam locomotives on the way to school or on holidays.

An early photograph of the heritage Zig Zag railway

A BMACHO member

Zig Zag Railway is an inaugural member of BMACHO and its members wish the railway's management and volunteers a speedy return of this great attraction steeped in the heritage of this region

Historians and friends congratulate John Low on Order of Australia award

MANY will have privately congratulated John Low on being recognised with an Order of Australia Medal (OAM) for his service to the Blue Mountains as a historian, author and librarian

HERITAGE in a salute to John an individual member of BMACHO, has invited a number of people to comment on the work of this truly quiet achiever.

Former president of BMACHO John Leary, OAM has written:
"Communities throughout Australia have men and women researching and chronicling local history, the immense product of which is and will be of immeasurable value to future students and those interested in our heritage. Most of these good people will go unheralded and John Low in his humble way might well say, 'Why me'.

"Simply … using the hackneyed phrase, 'his award is well deserved.' He has served his community well. He has been a doer, a giver and the Blue Mountains has been a better place for his coming.

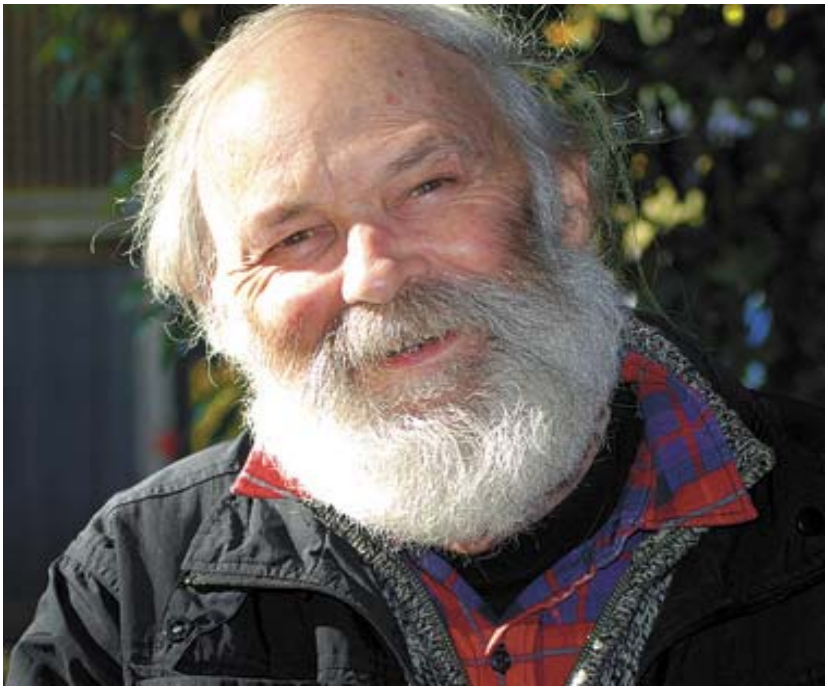
"John Low has a quality which marks him out as a person who is not only interesting but also interested.

"John as a historian, while always keen to discover the facts of our heritage portrays history in an interesting manner almost as if a raconteur.

"Not only is John interesting but he is also interested as a spectator of what is going on around him.

"I've learnt a great deal in my time as local studies librarian and my life in the Blue Mountains has been the richer for it. Now it's time to retire and let someone else enjoy it."

- John Low July 2, 2007



John Low, OAM --- Historian, gentleman and friend to many. Photograph courtesy Blue Mountains Gazette

"*Wild Ephemera* a collection of some his poems is indicative of his ability and skill as an unbiased observer of the natural and human history of the Blue Mountains.

"The opening stanza of his poem *LISTENING*,

With cries like breaking glass
five rosellas,
blue and scarlet darts
fire themselves
at a hidden target
somewhere
in the canopy's confusion.
My daughter is startled, but excited.
She loves the bush innocently, pointing
to where the birds have gone…

evokes an image which has been part of Blue Mountains heritage since time immemorial.

"One of the most refreshing of my memories of John was in the early years of this millennium when as chairman of the Friends of Woodford Academy; I invited a number of local poets including John Low and Deb Westbury to read poetry as a fund raiser for the National Trust of Australia (NSW).

"The day had been a success, but for me the jewel in the crown of the day was to quietly talk and listen to John about Woodford Academy.

"I listened enthralled to John quietly tell me what he knew about the property. He told me in a quite humble manner what he knew about the property encapsulating in a very short time more than I could have ever hoped to have researched on my own. John has continued to give me this sort of advice and support for more than a decade and particularly as the editor of *HERITAGE.*

"His advice is highly valued by all that come in contact with him not only in the Blue Mountains but in a much wider sphere.

"His pleasing personality and unassuming manner allows those seeking the benefit of his experience to gain access to a treasure trove of knowledge.

"Others will speak and write more eloquently than I of this giant of a man in the field of Blue Mountains heritage and whose love of local history seems to know no bounds,"

--- John Leary, OAM

‘A mastery of so many unfamiliar corners of Mountains history...’

Long term former president the RAHS and vice president of BMACHO, Associate Professor Ian Jack was one of many to respond to a request for a comment.

“All students of heritage and history in the Blue Mountains are much in the debt of John Low,” said Dr Jack

“By developing a local studies centre of excellence at Springwood Library, John has been an essential force in broadening public awareness of the diversity of surviving evidence.

“I was impressed at my first exposure to the local studies collections not only by the historical books and journals, the guide books, the rate books, the maps and the photographs, but also by the shelves of creative literature written in or inspired by the Mountains.

“The search-rooms became as a result an indispensable source for cultural history of all sorts.

“I was simultaneously pleased to find the rich files and photographs of the Springwood Historical Society cohabiting with the Blue Mountains City Council’s local studies library and equally accessible.

“While John’s own holdings dealt even-handedly with the whole of the Blue Mountains City, their location in Springwood implied inevitably a particular relationship with historians of the lower Mountains and the relationship of the two independent collections has benefited all potential users.

“John’s amiability, unflappability and determination, combined with his own effortless mastery of so many unfamiliar corners of Mountains history, have given him a very special place in the affections of all right-minded scholars,”

--- **Ian Jack**.

“He kept me entertained with his conversation...”

President Blue Mountains Family History Society Inc and secretary of BMACHO, Jan Koperberg writes: “I first remember meeting John Low in 1988, when I purchased two Blue Mountains City Council posters, one by H Rousel and one by Joe Booker, which I still have, framed in my home.

“At the time John was in the local studies section of Springwood library when it was in the “dungeons”, under the existing library, which now houses the librarians’ offices.

“However, it would have been a much quieter and much roomier location than the present local studies section, where it shares with Braemar Gallery.

“Over the years, when I have come into contact with John, he has always been the same. Always pleasant and always willing to provide assistance.

“He has been guest speaker at a number of Blue Mountains Family History Society meetings and I once drove John to Windsor for a meeting of the Hawkesbury Family History Group, where he was guest speaker.

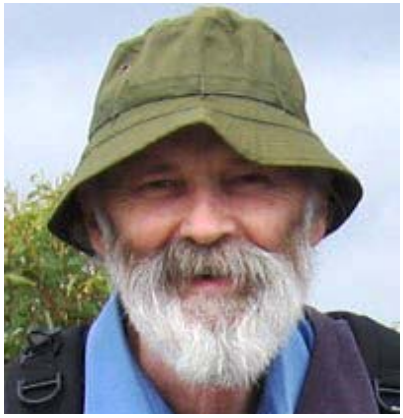
“He kept me entertained with his conversation to and from Windsor.

John is ever the historian, still researching, still taking groups on tours, still guest speaking and assisting others with their research.

“His daughters say to him that he is still doing what he was doing when he was working, but now he doesn’t get paid. John recalls this with a laugh.

“Congratulations John, you thoroughly deserve the OAM award.”

--- Jan Koperberg



John Low OAM --- Simply Australia

WELL DESERVED

Manager Blue Mountains City Council’s libraries and customer services Vicki Edmunds has contributed the text from an address at his retirement in 2007

John Low was employed by the Blue Mountains City Library as a local history librarian in March 1982 on a 6 month contract to establish a local history collection.

“Following an extension of this contract, he was appointed on a permanent basis in September 1983.

“From these small beginnings the local history (now studies) collection has grown into a large and valuable part of the library’s reference and information service.

“It has been used by a wide variety of people – school and university students, local residents seeking explanations for place and street names, professional and local historians, authors, songwriters etc. – and has been acknowledged in numerous publications.

“Besides acquiring material and answering inquiries John enjoyed getting out and speaking to community groups and school classes and liaising with the various historical societies.

“He particularly enjoyed researching lots of hidden corners of Blue Mountains history and planned to continue doing this.”

John retired from Blue Mountains Library Service in August, 2007.

--- Vicki Edmunds

Continued page 5

"I doff my cap to John Low, OAM"

President of the Blue Mountains Historical Society, Graham Warmbath writes, "I doff my cap to John Low, OAM"

"As a boy in war time Britain, chortling over Sir David Low cartoons of Hitler and Musollini, if someone had told me that one day I should meet a relative, how could I have believed that? Yet it's happened.

"If Sir David 'damaged Anglo-German relations', John has charmed us all from his 'head full of secrets'.

"Did I really think that the soldiers of the 4th King's Own Regiment of Foot would lead as harsh a life as those of the convicts? I could go on!

"John Low is a prominent member of Blue Mountains Historical Society and of its management committee, taking responsibility for a program of 'walks and talks' which has attracted a community and grown membership of the society.

"Formerly, John was Blue Mountains City Council's local studies librarian, based at Springwood library. I first met John there, a genial mercurial figure with whom I felt at ease.

"Fast forward to Monday June, 11 last: *The Sydney Morning Herald* publishes the Queen's Birthday Honours List 2012… John Carlisle Low has been awarded the Order of Australia Medal 'for service to the Blue Mountains as a historian, author and librarian'… news that melted all composure.

"Well done, friend. Hurrah from the Blue Mountains Historical Society."

--- Graham Warmbath

Encyclopaedic knowledge

Vice president of the Blue Mountains Historical Society Judy Baham writes: "As a comparative newcomer to the Mountains, I have always found John's encyclopaedic knowledge of the area inspiring.

"Little snippets of information given freely come at most unexpected times.

"I enjoy the lectures he gives. They are often on obscure events of local history which he turns into an absorbing tale.

"As Blue Mountains Historical Society's librarian, I can always turn to John for advice and recommendations for new books and know that what he says is sound advice.

"I can never hope to acquire his knowledge of Blue Mountains authors and their works."

--- Judy Barham

John Low on the verandah of "Braemar", Springwood 1987, a building in which he spent considerable time as a local studies librarian. Photograph Blue Mountains City Library collection.

John's train trips to foster local history

Former president Blue Mountains Histoical Society and current editor *Blue Mountains History Journal* Dr Peter Rickwood writes: "It is pleasing that the contributions of the pre-eminent historian in the Blue Mountains have at last been recognised with the award of an OAM.

"One aspect of John's activities that has not been covered by others is his willingness to travel in the interest of fostering local history.

"For some years John made weekly train journeys from Leura to North Sydney to work as a volunteer at the Don Bank Museum.

"But although that is his usual mode of transport he is not restricted to the rail corridor as one of his passions is for walking.

"Thus he has been known to attend ceremonies etc. all over the Blue Mountains irrespective of their location and the prevailing weather conditions, and his presence is always appreciated.

"Congratulations John."

--- Peter Rickwood

A man unstinting of his time

President of BMACHO and co-founder Springwood Historians, Pamela Smith writes: "John deserves the award for all the hard work and dedication he put into building up the local studies collection from virtually nothing to a very valuable asset of BMCC.

"He was always unstinting in the time he gave to local schools, service organisations and people that frequented local studies (including myself) and as a result John has gained wide recognition and respect from all those with whom he came into contact."

--- Pamela Smith

Miles and her mates in the Mountains

A prolific writer and biographer of Miles Franklin, Professor Emerita, Jill Roe, AO (at right) will be one of a line up of first class speakers at the Blue Mountains History conference in October this year.

Professor Roe has chosen the title *Miles and her mates in the Mountains* for her 'talk'

Jill is professor emerita in modern history at Macquarie University, Sydney.

She is the author of the prize-winning *Stella Miles Franklin — A Biography* (2008, now available in paperback and as an e-book), and editor of selections of Miles Franklin's letters (*My Congenials*, 2nd edition, 2010) and her topical writings (*A Gregarious Culture*, 2001, with Margaret Bettison).

She is a long-standing member of the editorial board of the *Australian Dictionary of Biography*. At present she is working on aspects of regional history

At Macquarie University, Sydney, she has most recently served as Director of the Macquarie PEN Anthology of the Australian Literature Centre.

Professor Jill Roe AO the author of the prize-winning Stella Miles Franklin — A Biography

She has published books on urban and social policy history in Australia; also on the history of alternative religious movements, and is now a leading authority on the life and works of Australian writer Stella Miles Franklin.

Professor Roe was visiting Professor of Australian Studies at Harvard University from 1994-1995, and an honorary visiting fellow at the Schlesinger Library, Radcliff College in 1999. She was chair of the editorial board of the *Australian Dictionary of Biography* from 1996-2006, an associate editor of a *Supplementary Volume* (2005), and is an ongoing member of the ADB's NSW Working Party.

From 1998-2002 she was president of the Australian Historical Association and is a life member.

From 2005 to 2008 she held leading positions in the NSW History Council. She has been a member of the Australian Nominating Committee, Harvard Chair of Australian Studies since 2005, and in 2009 was appointed a member of the editorial board of *History Australia.*

Her biography of Miles Franklin was awarded the Queensland Premier's History Book prize 2009, and the South Australian Premier's non-fiction prize and the Magarey Medal for Biography in 2010.

Major sponsors come on board for conference

IN another boost to the Blue Mountains History conference, Blue Mountains City Council has donated $600 from its Community Donations Program.

This amount and the $500 from the Katoomba and Upper Blue Mountains Community Bank (Bendigo Bank) will assist in defraying some of the administrative costs associated with organising this important inaugural event.

BMACHO president, Pamela Smith said government grant funds are becoming particularly difficult to obtain in this current climate.

"In addition to the two major sponsors already commit ted BMACHO would like to thank Blue Mountains City Council library, the Federal Member for Macquarie, Louise Markus MP, who arranged for the printing of invitations for supporting the conference at no cost.

"Other sponsors are also being sought to keep the fee for participants within reasonable limits," Pamela said.

See comment by Robert Stock, chairman of Upper Blue Mountains Community Bank (Bendigo Bank) on page 13

Thanks to Louise Markus, MP - Member for Macquarie

World War 2 in the Blue Mountains

By Joan Edwards

HOW did mountains people live during WW2?

The common view was that war would be repeat of 1914-1918; an expeditionary force would be formed, go overseas, women would send knitted socks and food parcels, and war would be "over there".

The Commonwealth enacted several pieces of legislation in the first week including banning certain imports, price controls and regulation of enemy aliens.

Within the background of international politics and events, a mere 7 million Australians occupied this island nation, many of whom still called Britain "home" even though they had never been there.

The Commonwealth Government declared the narrow coastal belt from Newcastle to Wollongong as the priority area, ignoring the small mountain settlements with dairies, poultry farms and piggeries, the holiday destinations of the upper mountains and the Lithgow Valley industrial area yet to recover from the depression.

The significance of the area was not fully realised until 1942.

Censorship determined what the public was allowed to know as well as what the government wanted them to believe – not necessarily the facts.

Many variations of the facts have emerged over the years so it has been necessary to rely on Trove's digitised major metropolitan newspapers for the wartime version to which I have been able to add released information, extant newspapers and records, oral histories, reminiscences and unexpected, once restricted, archival material.

There are several recurring themes all of which relate to the political, military, social and economic conditions at the time.

Rationing was in force, some items were on the coupon system, others when shopkeepers eked out their supplies to regular customers.

Providing an escort to Wentworth Falls station for a patient allowed to go home

Creativity and ingenuity were paramount as local ladies dried used tea leaves to bulk out the official supply sufficient for two cups per day, or use golden syrup when no egg was available to bind a cake.

Similarly they could dodge the holes in Dad's worn out trousers, turn them inside out and create new trousers for the son.

One pre-war development at the Small Arms Factory, Lithgow was to revert from peacetime orders such as golf club heads and handcuffs back to guns for which they were famed in WW1.

The output of Bren guns was outstanding especially in view of strikes, not receiving full set of blue prints or tools and under trained workforce.

Lithgow's coal mines, electricity generation, woollen mills, pottery works and nearby Portland Cement Works all contributed to the war effort.

Goods to and from these locations crossed the mountains by the one direct road or rail line through the Blue Mountains.

Lithgow could not house the ever increasing workforce so shanty camps developed.

Secondary medical screening using X-rays identified tuberculosis in many recently enlisted personnel.

In numerous cases it was two or three weeks after attestation so they were discharged into the care of the Red Cross at Bodington Sanatorium at Wentworth Falls.

Medical advances in T.B. treatment were in their infancy and Bodington became recognised for its care. Other male TB patients were nearby at the Queen Victoria Homes with fewer amenities.

Activity increased in the desperate days of 1942. Brownouts were in force, and all signage removed from streets and railway stations.

Street lighting and vehicle headlights were hooded.

In addition to usual voluntary support services, volunteers undertook roles within the National Emergency Services (NES) as wardens, first aiders, ambulance drivers and filled any other positions as required.

Several centres produced hundreds of camouflage nets, while others took up the challenge and joined the Volunteer Air Observers Corps (plane spotters) and provided 24 hour service at Wentworth Falls and Blackheath.

Volunteer Defence Force lost its "dad's Army image

Continued from page 8

The Volunteer Defence Force lost its Dad's Army image as it came under military control.

They were readied for possible invasion, prepared for sabotage if required. Gun emplacements were established to defend Lithgow industries. The route across the mountains was vital.

Hundreds of SAF workers were housed in the upper Blue Mountains. The workers were transported by rail, later by buses.

It is difficult to imagine the men and women, working 12 and 8 hour shifts respectively, travelling by buses limited to 20 miles per hour due to brownout regulations, or even loaded buses travelling up Victoria Pass at that speed.

The impact of voluntary evacuations to the mountains in 1942 is difficult to comprehend.

Katoomba school (K to 3rd year high) had 830 pupils in 1941, and an extra 500 turned up on the first school day in 1942.

Up to 70 extras turned up at primary schools. Mountain boarding schools were filled to capacity and several Sydney boarding schools set up temporary boarding houses.

Teachers were called up, retirees and married women taught in classrooms or hallways or open lunch sheds or any other available space.

Victoria Barracks needed a less vulnerable location and requisitioned Burnside Homes at North Parramatta and so buildings to house another 500 had to be requisitioned in Springwood.

Leura's large bus depot was taken to store emergency food supplies and the Hydro Majestic Hotel for a U.S. army hospital.

The pros and cons of obtaining chemical weapons for retaliatory purposes was discussed from the mid 1930s as it was known the Japanese were using them in China.

It was not until the 1990s that citizens knew about Glenbrook tunnel storage, even then the extent of chemical weapon storage was not revealed. Of course, spies and enemy aliens are essential in war stories and, yes, we had them too.

All this went on within mountains life as we know it. Droughts, storms, weddings, thefts, sporting activities, movies, bushfires, late trains, lost bushwalkers, golf results and more bushfires as well as fears, uncertainty and the stress of family and friends serving overseas, the ever increasing lists of casualties and the dreaded telegram announcing missing or killed in action.

About the author

Joan Edwards is an historical geographer with a particular interest in people and events within their total environment – physical, built, social, economic and political.

This research results from Joan's desire to place her childhood memories in the environmental context.

Joan has produced numerous publications over the years including educational texts for Oxford University Press and others.

Joan is the past president of the Blue Mountains Family History Socity Inc.and currently its vice president.

World War 2 in the Blue Mountains will be published by Blue Mountains Family History Society in 2013.

DAFFODILS AT THEIR BEST MOUNT TOMAH

AUGUST 18-26

Blue Mountains Botanic Garden, Mount Tomah will be supporting the Cancer Council's Daffodil Day on Friday, August 24 as part of a week long festival celebrating the beauty of daffodils and in anticipation of the start of spring. For detailS see page 13.

Managing your collection workshop

State Records in partnership with RAHS will conduct a regional workshop, *Managing Your Collection* on Saturday, November 24.

Being organised by BMACHO, the workshop will be held at Hobby's Reach the property of Blue Mountains Historical Society, 101 Blaxland Road, Wentworth Falls.

The workshop will commence at 10.30am and a cup of tea or coffee will be available from 10am.

Morning tea will be provided halfway through the workshop and a light lunch will be provided at 1.30pm.

Bookings are essential by e-mail to: j.koperberg@bigpond.com or phone to Jan Koperberg 902) 4754 1544.

SAVE 10% on early bird bookings

BLUE MOUNTAINS HISTORY CONFERENCE

To be held at the historic Carrington Hotel, Katoomba
on, Saturday, October 20, 2012
Conference theme: "*Colonial Society*"
with a great line-up of speakers and presenters

PROGRAM

Conference to be opened by former president RAHS, Prof Ian Jack.

Prolific writer and biographer of Miles Franklin Professor Emerita, Jill Roe, AO has chosen the title Miles and her mates in the Mountains for her 'talk'

Colonial dress by Glynis Jones, curator fashion & dress design & society, Powerhouse Museum.

The early years of the colony by keynote speaker, Prof Paul Ashton, co-director Australian Centre for Public History.

The Carrington Hotel - a return to the era of grace, elegance and charm. A tour guided by Paul Innes.

Nature and role of gardens in the early settlement period by Silas Cliford-Smith archivist at the Heritage Centre, UNE

Musical interlude Jim Low, folk singer, historian and writer.

Bookings with full payment before August 20 will be discounted to $45 per person ---

Cost includes morning and afternoon tea as well as lunch in the historic grand dining room of Carrington Hotel.

For further information and early bookings (capacity limited to 120 participants) contact Jan Koperberg at j.koperberg@bigpond.com or bmacho.heritage@gmail.com

Paddy Ryan left his mark in stone, but much of his life is an enigma

by Pamela Smith - Springwood Historians

PADDY Ryan, the local Blue Mountains stonemason, remains somewhat of an enigma. Not a great deal is known about his life or origins despite being described as an 'early character of the district.'

It appears that he did not belong to any association or group in Springwood because when his name was mentioned periodically in the newspapers it was only in relation to his profession.

The earliest official record of Paddy is documented on the 1891 census, where it was said that Patrick Ryan lived in a private house on Grose Road, Faulconbridge.

A few years later the 1894-5 electoral roll confirmed again that he was still residing at Faulconbridge.

His occupation had changed, and was noted then as being a 'farmer'. Andrew Ryan, a labourer of Springwood was also listed on the same roll, but it is not known if the two were related.

It is not clear how much land he owned because his name does not appear on any early maps. However, it appears that the property he held was located in the vicinity of Grose Road and Chapman Parade.

The road that is currently Chapman Parade was known initially as Grose Road, and the present day extension of Grose Road past the high school was known then as Links Road. More specifically, it would seem that Paddy owned the property where the Norman Lindsay Gallery is currently located.

That home, along with several others in the district, attests to the high quality and enduring nature of his workmanship. Some years prior to the 1890s he is believed to have been responsible for the erection of several other buildings in the area.

At Faulconbridge/Linden he is thought to have built *Lady Martin's Bath*, *Martin's Folly* and a home for Sir Alfred Stephen.

Everton built by Paddy Ryan for the Hon John Meeks in 1875-7 is still standing,

Around c1882-3, in the same area, he was the stonemason who built *Eurama/Weemala* for Andrew Hardie McCulloch MP, to a design supplied by colonial architect George Mansfield.

Paddy was employed again c1885-7 for the building of *Everton* for the Hon. John Meeks. *Everton* still exists. Paddy was most fortunate to have a 'moneyed local' clientele.

According to the *Nepean Times* (June 2, 1894), the skill of local stonemason Paddy Ryan was in demand again.

This time he was erecting a stone cottage for Mrs Quarry (formerly Gibbes). The *Times* mentioned that the home was being built on land that lay along Lomatia Park Road.

A paper written many years ago by Mrs Quarry's grandson, Mr HB Gibbes**,** stated that 'several attempts' were made at building the cottage from stone that was quarried from a site nearby.

Unfortunately Mr Gibbes did not elaborate on what the problem was. The home later became *Stonehaven*, a home for boys, which was demolished 1966-7 for the Great Western highway deviation.

Several years later the *Nepean Times* (June 18, 1898) related that P Ryan, contractor, was about to 'finish off' the home that stood on property he had subsequently sold to Francis Foy of Mark Foy fame.

Paddy had long been in the process of building the home, dubbed *Erin go Brangh* ---but according to the newspaper the home stood unfinished for many years.

We have no way of knowing how Foy came to know about the property because it is so far off the main road as to make it invisible to anyone passing.

Perhaps Paddy advertised it for sale in the paper but, if he did, we have no record.

Foy subsequently owned portions 4 (80 acres), 108 (42 acres) and 110 (50 acres) along the present day Chapman Parade.

But it is not clear if Paddy Ryan was the original owner of all three lots.
Continued page 12

Paddy before the court for having "too much "powder on the job"

In March 1898 John Lawler, a Sydney bedding manufacturer, employed Paddy Ryan to build his stone cottage on a rather uneven piece of property that he owned in Railway Parade, Springwood.

The home still stands today and is one of the finest in the district. It is listed on the Blue Mountains City Council heritage register.

The erection of Lawler's home did not pass without its share of drama. The quarryman (Paddy?) who was working on the project was served with a fine for having 'too much powder on the job', with insufficient means of storage.

He was obliged to appear before the bench at Penrith Court House where he was duly fined. The name of Lawler's home, *Eringah*, like Paddy Ryan's unfinished home (*Erin go brah*), would suggest they both had Irish connections.

In August 1903 the *Nepean Times* correspondent mentioned that 'Mr P Ryan was doing some good work as a stonemason at Mr Lawler's new buildings'.

Unfortunately, the reporter failed to specify where these buildings were! Almost a year went by without further news, and in July 1904 readers were told by the *Nepean Times* that Mr P Ryan of Vale of Avoca had lately started in the poultry farming line.

An amazing tale was told of an Orpington hen he had purchased from a Rooty Hill poultry farm that had laid 66 eggs without a break.

The poor hen rested for a week before she started this amazing feat all over again! He was reported to be very pleased with his purchase.

Paddy had a stern warning given to him via the pages of the same paper in 1906, which said that it would be advisable for Mr Ryan to keep his pigs and poultry well protected with the rifle club members so anxious to start shooting.

The exact location of Vale of Avoca is unclear, however a paperback entitled *Exploring the Blue Mountains* mentions a place with this name as being downstream of the Grose Valley.

The first explorer into the narrow valley was William Paterson who thought it might be a gateway to the west. However, it is not known if this refers to the place of residence of our Paddy Ryan.

Paddy is known to have married Kathleen (Kate) but no details are available as to where or when this event occurred.

They had a son Patrick junior who was a contemporary of William and Percy Croucher.

The three made a return trip on foot to Jenolan Caves in 1895.

Paddy died in 1917, and proctor James CJ Ryan administered his estate. Kate was his beneficiary.

The 1920 electoral roll mentions Thomas George Ryan, railway employee, *Tyneside* Faulconbridge, Kathleen Ryan, St Martha's Home Leichhardt, and Martin Ryan, *Avoca*, Archer Street, Chatswood, as owners of allotments of land at Faulconbridge.

It seems safe to assume that Kathleen (his wife?) and Martin were relatives of Paddy but more research would be required to confirm if all three shared kinship.

About the author.....

Pamela Smith, the author of this biography of Paddy Ryan is a regular contributor to *HERITAGE*.

She has an Advanced Diploma in Local, Family & Applied History, a Bachelor of Arts (Hons.) in History and is currently studying for a Masters in History all through the University of New England Armidale.

She has studied Australian and international history, museum practices, and conservation. Her special interests are women's history, the history of education and politics and social history in general.

She is currently working through a unit on crime, punishment and servitude which encompasses the convict era, the architecture and function of early prisons, World War internment in Australia and the current day internment of asylum seekers.

She is also currently president of the Blue Mountains Association of Cultural Heritage Organisations Inc and a founding member of Springwood Historians. She also serves on Blue Mountains City Council's heritage advisory committee.

An avid local history researcher and author she has been published on a wide range of subjects.

Magnificent old giants at Mount Tomah

School children measuring the girth of a giant Eucalyptus fastigata (Brown Barrels) tree trunk at Mount Tomah

THE Blue Mountains Botanic Garden at Mount Tomah will celebrate National Tree Day as a family day with displays and walks.

National Tree Day this year is on Sunday, July 29 and activities are planned in the garden from 10.30am to 2.30pm.

Visitors to the Blue Mountains Botanic Garden can discover the magnificent old giants of Mount Tomah.

They can be guided through the ancient hollows of *Eucalyptus fastigata* (Brown Barrels) and meet dinosaur trees - the tallest living species in the world!

The Waratah Education Centre will open its doors to showcase our wonderful world of trees.

Images, barks, fruits, seeds, amazing facts about trees and their life giving properties can be seen.

Since 1996 National Tree Day has recorded over 2.8 million volunteers planting over 17 million native trees and shrubs.

National Tree Day includes a whole range of different activities around Australia including planting trees and native plants and bushes, caring for trees and plants by removing weeds, information sessions, bushwalks and more. Most of all it is lots of fun!

The Blue Mountains Botanic Garden, Mount Tomah sits on a basalt peak 1,000 metres above sea level in the World Heritage listed Greater Blue Mountains.

The garden is home to thousands of species of cool climate and southern hemisphere plants

Daffodil festival

The early bulbs are starting to appear and once again the Blue Mountains Botanic Garden will support the Cancer Council the Daffodil Festival from August 18-26.

With optimum growing conditions, the garden will be transformed by a sea of golden hues as additional plantings of daffodils erupt in bloom.

Enjoy a picnic, take some photographs or simply enjoy the mass plantings. Cut flowers and Cancer Council merchandise will be available for sale.

Contact details for all events:

Entry to the Blue Mountains Botanic Garden, Mount Tomah is free.

Bendigo Bank supports Blue Mountains history conference

BENDIGO Bank through its local branch, Katoomba and Upper Blue Mountains Community Bank has donated $600 towards the administration costs of the Blue Mountains History Conference

Chairman of the Katoomba and Upper Blue Mountains Community Bank, local resident Robert Stock announcing the donation said, “The bank is very pleased to have the opportunity to offer support to the Blue Mountains Association of Cultural Heritage Organisations Inc with a contribution towards the cost of the annual history conference in October.

“It is clear that much of our cultural heritage is lost over the years as technologies change and our built environment is redeveloped.

“Hopefully with advocacy and education provided by organisations such as BMACHO, where redevelopment is necessary, it can be done sensitively and in such a way that evidence of the past is not lost.

“Maintaining this cultural heritage adds interest and quality to life up here in the mountains.

“It is of course also a significant theme with our local tourism industry.

As such BMACHO’s efforts to understand and preserve our cultural heritage are applauded.

“We wish BMACHO every success with its conference later this year,” Mr Stock said

Robert Stock

Lithgow Small Arms Factory to celebrate centenary

LITHGOW Small Arms Factory Museum will celebrate the centenary of the establishment of the factory which went on to be the source of much of Australia's defence equipment for World War 1 and 2.

An exhibition of pre-federation colonial weapons will be presented by the Lithgow Small Arms Factory Museum in conjunction with the Antique Arms Collectors Society of Australia from September 20 to October 27.

A series of centenary workshop talks will be conducted over the weekend October 20-21.

For more information on these activities contact the Lithgow Small Arms Factory Museum by e-mail to lithgowsafmusesum@ozemail.com.au or by telephone to (02) 6351 4452.

BRIEF HISTORY OF THE SMALL ARMS FACTORY

The Federation of the Australian states in 1901 resulted in a uniform defence and armed services policy being implemented.

When the British Army adopted the .303 calibre short, magazine Lee-Enfield rifle for general issue to its forces colonial governments were "asked" to standardise and submit orders to the UK for the new weapons.

It was proposed in Australia that the country should be more self sufficient and manufacture its own defence needs in its own arsenal and a number of sites were considered for Australia's first rifle manufacturing facility.

The government received an offer in 1904 by Mr W Sandford of Eskbank Ironworks to lease land, supply cheap coal and prepare his plant to produce the steel required for the manufacture of rifles if Lithgow was chosen.

The Lithgow Progress Association also made representation to the Honorable Sir Joseph Cook MP on Lithgow's behalf.

After considerable investigations by the defence department and inspection by Lord Kitchener in 1909, Lithgow was chosen as the site to establish a small arms factory.

The ready supply of steel and coal for power were the main factors but it was also believed that Lithgow was beyond the range of the naval guns of the day.

Engineer Commander William Clarkson of the Royal Australian Navy was seconded by the defence department to supervise all operations.

A suitable parcel of land was purchased and the contract to erect the factory buildings was let to the firm of Jones and Allman early in 1910.

A rifle fan display at the Small Arms Factory, Lithgow

The contract for the power plant was given to the State Government Dockyard.

World wide tenders were called for the supply of suitable plant to manufacture 1,500 rifles per annum. Despite there being three British tenders, the contract was awarded to the Pratt & Whitney Company of Hartford Connecticut., USA because of its assurance its machinery was designed for the "American method of repetition manufacture" which is now known as "high precision mass production". Included in the contract was the supply of machine tools, tooling and gauges as well as the training of six craftsmen in America.

The factory was officially opened by the Governor General, Baron Denman on June 8, 1912.

The level of employment grew rapidly from 25 to 300 in 1913 and the onset of war in 1914 brought increased production, extra shifts and a labour force which reached 1,150 by the end of hostilities in 1918. The factory was the largest employer in Lithgow and continued pioneering the techniques of mass production with precision tools and highly trained personnel which enabled it to produce all of Australia's weapon needs.

Rifle production declined in the 1920's with a resulting reduction in the work-force but production of the .303" Vickers machine gun commenced in a newly erected building circa 1924 and staff numbers began to rise.

The 1930s' depression caused more reductions in staff with the figure reduced to around 250 employees. Despite much opposition from the private sector the factory began to undertake commercial production in an attempt to retain its workforce and keep the factory operational.

This work included the manufacture of Western Electric 'talkie' projectors, reverse engineered sheep shearing hand-sets, Slazenger golf clubs, spanners, sewing machines, police handcuffs and many other non-military items.

Tribute to Bills horse troughs

Patsy Moppett an individual member of BMACHO and a heritage consultant at Yethome who contributed this article writes: 'Following up on previous articles in *HERITAG*E about Bills horse troughs, I would like to add a little more information. Having developed an interest in them elsewhere in NSW and Victoria, I began to notice them a little closer to home'

BILLS horse troughs are located in mostly in country towns throughout NSW and Victoria, although there are some to be found in the metropolitan area.

They were a feature of the Depression years, and none were made after 1940.

Many had a small dog drinking trough attached to the side. The average daily drinking water requirement for a horse is said to be about 50 litres.

Other troughs are showing signs of wear, and with most people not being aware of their significance they are sometimes inadvertently destroyed.

Some are still in pristine condition in their original locations, and others have been relocated to sites near museums etc.

Many of the troughs have had to be moved to make way for road works, and many were destroyed or dumped in rubbish tips.

Many were saved from this fate and have found their way into private ownership and with tender loving care are still preserved today.

They are very much sort after items for features in gardens

Some have been relocated to sporting grounds and are used for their original purpose for watering horses, or for garden beds.

The two at Narrandra are classic examples, being located at the pony club grounds as a flower trough, and at the show ground, possibly still being used as a drinking trough.

Within the Blue Mountains there are several, at Medlow Bath, Glenbrook, Warrimoo and Wentworth Falls.

Another unrelated trough is located at Lawson, being donated by Mrs. R D Meagher to "The dumb friends of man" presented to the Blue Mountains Shire Council in 1921.

A Bills horse trough at Wentworth Falls

The Glenbrook trough has been well documented by John Low, historian, in the March-April 2011 edition of *HERITAGE.*

The history of their troughs and their origins with George and Annis Bills was related admirably by John Leary, OAM in the January-February 2010 edition of *HERITAGE*.

The troughs at Medlow Bath and Wentworth Falls are of standard design.

They are mostly a water area, a cistern with an iron lid being at one end.

There is the additional small water trough for dogs and cats at the right hand end.

The pedimented section at the rear has the usual terrazzo panel nearing the Bills' name.

The trough at Warrimoo is the same usual characteristic design, but lacking the small side trough for small animals.

The trough was relocated in 1999 from the highway frontage, and now sits within a small park, where its significance is somewhat lost, away from where horses would normally have passed through.

Much of the wider research into Bills troughs can be attributed to the work of George Gemmill, who has travelled all over with his dog Hamish, recording and photographing them.

George is the" keeper of the memories" and has recorded over 310 locations where the troughs may be found in NSW, Victoria, Western Australia and from Great Britain. He has yet to find any in South Australia or Tasmania.

As a young boy and growing up in Newport, Melbourne Australia, George sold papers on the Williamstown short road ferry. He can remember a Bills trough which was in a park over the road from the Newport Hotel near the bus stop.

As lads they used to meet around this spot, and the trough was used by the few horses which were still being used to deliver bread, milk, ice and wood around Newport. This would have been about 1948.

Compassion for animals during the depression

Continued from page 15

George has dedicated a web site to the memories of Annis and George Bills, who showed such compassion for animals during the Depression.

From his travels he has collected a large library of photographs, and has displayed the images and their locations on his web site.

He has received photographs of Bills troughs from places as far away as London Ireland and Northcliffe in Western Australia, and he is always open to add in items that others find.

A Bills horse trough at Warimoo

The Webmaster of his site can be contacted at billshorsetroughs@hotmail.com and George always welcomes inquiries, and additions to the library.

There are still some to be found. Any new ones I find, I relate the information to George Gemmill, as do other people from across the globe.

He would love to hear of any others through the Blue Mountains and elsewhere that are hidden away in some back street or in a rear yard gathering moss.

As an aside, the other water trough located at Lawson at the Honour Avenue Gardens, was originally installed in the 1920s in Douglass Square and relocated to its current setting in Honour Avenue near the remnant steps of the Grand Hotel (prior to the hotel's destruction by fire) during earlier refurbishments.

The trough has a recessed trough beneath, probably for use by dogs. It has a timber post and rail buffer plank to the road, with a plate and lock fixed to the plank to prevent access.

The trough is in reasonable condition with clear lettering, painted yellow, mostly flaked off. It no longer functions as a refill trough, containing rainwater only.

The trough has a plaque on each end which reads "The Dumb Friends of Man. Presented to the Blue Mountains Shire Council by Mrs RD Meagher, Lawson 1921".

A review of the trough's history was presented by John Low in the September-October 2011 issue of *HERITAGE*.

e-mails are bouncing

IN recent times a number of members of the Blue Mountains Association of Cultural Heritage Organisations Inc. (BMACHO) may have been missing out on e-mailed advice of activities and other information.

Secretaries of organisations are particularly asked to provide this updated information as often the secretary or contact person for the society also changes from time to time.

.Email addresses with the contact name and telephone number of all individual and organisational members should be e-mailed to BMACHO's secretary at j.koperberg@gmail.com .

Bendigo Community Bank helps Everglades prepare for fire

A dontaion of $1500 from Bendigo Community Bank will be used by Everglades Historic House and Gardens to purchase a pump to better equip the property for firefighting.

President of the Everglades fund-raising committee, sandy Luxford approached the Katoomba bank asking for a dontaion for the equipment and within a short time the board approved the donation.

This is the second time the Bendigo Community Bank has supported Everglades, last year sponsoring the inaugural Vintage and Retro weekend.

The National Trust property Everglades which adjoins vast stretches of national park bushland has been lucky since the 1930s to escape from bushfires.

The 2011 fire reached to within 500 metres of the property and the Gordon Creek area has not been burnt since the 1957 bushfires.

Head gardner, Guy McIlrath has always been aware of the issue and pointed out the need for a fire-fighting pump.

Everglades at Leura is set in one of Australia's foremost heritage gardens.

The house and gardens were designed in the 1930s as a week-end retreat by Danish-born architect Paul Sorensen.

The property sits on the edge of the Jamison Valley and offers breathtaking views across the Blue Mountains National Park.

The gardens themselves cover more than 12 acres and feature both European and native Australian flora.

Everglades is open from 10am to 5pm in spring and summer and from 10am to 4pm in autumn and winter.

Cemetery walk remembers Gallipoli hero

A cemetery walk at the Lithgow Cemetery to mark ANZAC day 2012 was held by the Lithgow & District Family History Society Inc.

The walk started with morning tea in the car park and the sharing of ANZAC biscuits made by member Cecily McCarten where participants also had a discussion about returned service men and women. This was followed by the playing of the Last Post and one-minute silence before commencing the walk.

Each visitor was given a map showing the graves of 12 returned servicemen.

It was very fitting to see Sandra Haley able to lay the card on her own father Alfred Piggott's grave and Cecily McCarten lay the card on her grandfather Cecil Ford's grave.

Members visited the grave of Private Joseph Peter King who was a Gallipoli hero.

Joseph King was born in 1891 in Omaru, New Zealand and was the son of Frederick and Margaret King.

He enlisted at Rosehill, Sydney on October 2, 1914 in the 13th Battalion.

His occupation prior to enlisting was that of a coach painter.

Joseph proceeded to Gallipoli aboard the Alexandria arriving April 12, 1915. He suffered from shell shock when he was in Rest Gully and a shell exploded just behind his dugout. He and two of his mates were buried.

He was dazed at the time and was unconscious for 3 hours and suffered concussion, but did not report sick until 5 days later, when he was sent to Lemnos where he remained for 4 months before returning to Gallipoli, although he had become very nervous while resting at Lemnos.

Joseph was returned to Australia suffering from shell shock and was discharged from service on August 24, 1916 as medically unfit suffering from epileptic fits.

He never returned to New Zealand but was admitted to Lithgow Hospital in 1917 suffering from Epilepsy and his address was given as The Lansdowne Hotel. He passed away on October 2, 1917 just 26 years of age.

After hearing the story of Private King it has been decided by some members of the society to have a working bee and do some restoration and cleaning of his grave.

Lithgow Family History Society will make this an annual event.

National Trust luminary dies

JOHN FISHER who recently passed way will be remembered for his contribution to the National Trust of Australia (NSW) in its formative years from 1960 into the 1980s.

A member of the Trust Council for 20 years, he founded and was the first chairman of the Trust's historic building's committee.

Here he worked with such luminaries as Helen Blaxland, Max Freeland, Leslie Wilkinson, Rachel Roxburgh, Morton Herman, John Mansfield, Cedric Flower, Daniel Thomas and Ted Farmer, the government architect, producing a list of significant buildings worth preserving.

John also worked on many Trust properties as an honorary architect, and worked on most of the Trust advisory committees on both built and natural heritage.

In 1959 he prepared a plan to preserve The Rocks, and in 1966 represented the Trust in advising the government on preserving Hill End.

High tea at Everglades

HIGH tea will be served at Everglades historic house and garden on Saturday, July 28

Enjoy the ambience of the Art Deco dining room at the recently restored 1930's property at Leura.

A scrumptious home made high tea follows a welcome punch and nibbles. Leaf tea and plunger coffee will be served.

Wander around the garden before or after the tea.

Bookings essential by telephoning Anita on 4784 1974 or Liz on 0418206899.

Cost: $25 for National Trust members, $30 for adults and $10 for a child.

Lithgow Family History elects 2012-13 committee

LITHGOW & District Family History Society Inc recently held it'sannual general meeting and election of officers for the coming year.

Pictured are members and office bearers for 2012-13.

Back row, L-R: Laurie Cook- secretary/public officer, Louise Dean - research officer/social secretary, Coralie McDonald - member, Ian Irvine - filing, Danny Whitty - vice president, Robyn Whitty - member, Marcie Farr - photographic convenor, Ken Brice - committee, Helen Taylor- cemetery convenor/publicity officer, Eleanor Martin- president/ membership secretary, Jan Saundercock - publishing officer,

Seated left to right: Lea Wootton - indexing convenor/PALO convenor, Ross McDonald - journal editor, Ean Jones - special projects computer indexer, Kathy Brennan - librarian, Sandra Haley - minutes secretary.

Absent: Margaret Buckley - treasurer and Cecily McCarten - committee.

The society is hoping for another productive year with steady growth as it has had in the previous year. The library is still growing with many additions to the shelves. Anyone wishing to join the society or just call in to do some casual research will be made most welcome.

"Family history is still one of the fastest growing hobbies found today and becomes quite addictive so why not come in and research your own ancestors, said Helen Taylor.

The society's library hours are Tuesday nights 6pm – 9pm, Fridays 10am – 4pm and the 1st Saturday of every month 10am – 4pm. There is always an on duty librarian to help.

Discover exotic plants

THE discovery of the continent of Australia with its exotic plants previously unknown to the rest of the world caused a sensation to the botanic scientists.

Mt Annan Botanic Gardens displays over 4000 of these plants in acres of hills and lakes.

The Blue Mountains branch of National Trust is organising a bus tour to Mt Annan on Saturday, August 11.

Participants will have a choice of staying on the bus for a tour of the gardens or taking a walk to scenic outlooks, lakes or bird hides.

Cost is $35 per person for Trust members, $40 for non members or $25 if participants meet the tour at Mt Annan Botanic Gardens

Enquiries and bookings to Sandra at 4739 3003 or BlueMtsNatTr@gmail.com

Small Arms Factory history

Continued from page 13

With the outbreak of the second world war manufacture of small arms resumed and following the evacuation of Dunkirk in 1940 the United Kingdom requested that Australia forward as many rifles as could be spared. In response, 30,000 rifles were sent, severely reducing availability of weapons.

Action was taken to expand weapon production by erecting new feeder factories, the first at Bathurst followed by Orange, then Forbes, Wellington, Mudgee, Cowra, Young, Parkes, Dubbo and Portland.

In 1943 the total personnel employed at Lithgow was 6,000 while a further 6,000 were employed at the ten feeder factories. Weekly production achieved figures of 4,000 rifles, 150 Bren guns and 70 Vickers machine guns.

To protect Lithgow's defence facilities from possible air-attack, anti-aircraft guns were sited at the east and western ends of the Lithgow valley as well as a machine gun company stationed on the roof of the factory.

During 1945 all 'feeder factories' were closed and full production re-established at Lithgow.

When manufacture of the .303" SMLE rifle No.1 Mk.III ceased in 1956, a total of 640,000 had been produced in Australia, 415,000 of these were produced from 1939.

In 1954 the Australian government adopted the 7.62mm L1A1 rifle (Australia's version of the Belgian FAL rifle) and entered into a manufacturing agreement with the Fabrique Nationale d' Armes de Guerre of Belgium to produce the rifle at Lithgow.

Again the factory was completely re-organised, new buildings erected, and new machine tools procured for its production. When production ceased in the mid 1980s, some 230,000 units had been issued.

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or it's really going to happen

New chair

Dr Anne-Maree Whitaker, senior vice president of the RAHS (pictured above) will take over as chair of the Western Crossing committee at its August meeting.

She replaces Prof David Carment who has been the inaugural chairman for a number of years.

As a descendant of William Cox the road builder, she has a personal interest in the 2013-15 commemorations.

Anne-Maree is an independent professional historian who undertakes research in a wide range of topics.

She is the author of several books including histories of Marrickville, South Sydney, Appin and St Vincent's Hospital.

Her biography *Joseph Foveaux: power and patronage in early NSW* was short-listed for the NSW Premier's Literary awards in 2001. She won the National Trust Heritage award for the Sydney Parks Project in 2010.

***** Commemorative postage stamps are to be launched after the Western Crossing meeting at Blue Mountains City Council chambers on August 17. The BMCC Crossings Committee had argued that the $1.20 stamp was not appropriate, not as widely used, and so it was decided to issue a 60c stamp.

***** Andrew Tink would be willing to give talks pertaining to his book the *Biography of William Charles Wentworth.* (A number of local societies and organisations have had Andrew Tink as their guest speaker since the book was published.)

***** Lithgow City Council had put aside $10,000 for the Western Crossings and a further $20,000 for interpretive signage for Cox's Road.

***** William Cox and William George Evans had both lived in the Hawkesbury area and the Hawkesbury Historical Society in conjunction with Hawkesbury City Council has indicated they would like to be involved in the Western Crossing Committee commemorations.

***** Richard Cox a great great grandson of William Cox who recently published a book will speak about the work and significance of the crossings at the August 17 meeting of the Hawkesbury Historical Society.

***** Graham Hunt a member of the Seniors Group, Institution of Surveyors NSW, the group which maintains the *Pillars in Time* monuments, had received $10,000 for restoration work.

***** The BMCC Crossings committee has received a grant of $23,000 for the Mt York interpretive signage.

PENRITH LAUNCH OF CELEBRATIONS

Australian actor Jack Thompson will be the face of the Penrith crossing celebrations.

He recently joined members of the Penrith District Historical Society and St Marys and District Historical Society and descendents of the original three explorers on the banks of the Nepean River to launch next year's program of events marking 200 years since Blaxland, Wentworth and Lawson trekked across the Mountains.

The two descendents of Gregory Blaxland, Gregory Blaxland and Wendy Blaxland were present at the launch as were the Blue Mountains mayor and Penrith mayor Greg Davies.

Pictured at right are members of the St Marys and Nepean District Historical Societies

Timbuktu World Heritage shrine under attack

TIMBUKTU'S fabled shrines listed by UNESCO as endagered sites only days before have been attacked by Islamic fundamentalists.

The gunmen reported to be from a militant group with ties to al-Qaeda had attacked tombs and vowed to destroy every last shrine standing in an act similar to the 2001 destruction of the ancient giant Buddah of the Bamiyan Valley in Afghanistan.

Timbuktu is thought to have been founded towards the end of the 5th century.

Legend has it a temporary camp was established guarded by an old woman, Buktu.

Gradually Tim-Buktu (the place of Buktu) became a small sedentary village at the crossroads of several trade routes. Quickly converted to Islam, the market city of Timbuktu reached its apex under the reign of Askia (1493-1591).

It then became an important centre of Koranic culture with the University of Sankore and numerous schools attended, it is said by some 25,000 students.

As an intellectual and spiritual capital, its three great mosques, Djingareyber (1325), Sankore (1578-1582)and Sid Yahia (circa. 1400), recall Timbuktu's golden age.

In the 16th century Moroccan invaders began to drive scholars out, and trade routes slowly shifted to the coast The city's importance and prestige waned and scholars drifted elsewhere.

French colonisation at the close of the 19th century dealt another serious blow to the former glories of Timbuktu. Source: UNESCO World Heritage Committee

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: j.koperberg@bigpond.com or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.
BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."
The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations. One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.
Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains, Lithgow and Oberon Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Hartley Valley District Progress Association, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committee, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low OAM, Ian Milliss, Pastsy Moppett, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.
COMMITTEE The committee for 2012-13 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Judy Barham, Joan Kent, Doug Knowles, John Leary, Dick Morony (public officer), and Scott Pollock. .

DISCLAIMER Views and opinions expressed in ***HERITAGE*** originate from many sources and contributors. Every effort is taken to ensure accuracy of material. NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

SEPTEMBER - OCTOBER 2012 ISSUE No. 23

WILLIAM COX AND HIS TEAM OF CONVICT ROAD BUILDERS

by Richard Cox, great, great, grandson of William

Mr Cox is a Sensible, intelligent Man, of great arrangement, and the best agriculturalist in the colony.... *Governor Macquarie, recommending William Cox to be the Commandant at Bathurst, after building the road, 24 June 1815*[1]

WILLIAM COX, who forged a place for himself in Australian history by organising the building of the first road across the Blue Mountains in 1814, was a man of extraordinary personal contrasts.

On his way out to the colony in 1799 in charge of a shipload of convicts on the *Minerva* he displayed considerable humanity. Between them, he and the ship's surgeon ensured that the 196 convicts were given regular exercise and fresh air.

As a result only three elderly prisoners died en route, an unusually low percentage. When there was an attempted mutiny William only sentenced the ringleaders to six lashes each, when on many ships they would have been hung from the yardarm.

Yet on arrival, as paymaster of the New South Wales Corps he used regimental funds in London to pay for farms, building himself into the second largest landowner in the colony in two years. In plain terms he embezzled the money.

William's little empire collapsed in 1803, leaving his family penniless. He was sent home for trial and 'dismissed the service' in 1808.[1] But Governor King had already given him and his sons' grants of land in 1804 and after his return in 1810 he was rehabilitated when Governor Macquarie appointed him as a magistrate at Windsor.

However, as a JP he increasingly favoured himself in the allocation of skilled convict workers, or 'mechanics', to employers and was heavily criticised for it by his contemporaries. At the same time his judgements were fair and liberal, as when he simply re-assigned convicts to new masters after punishment had been demanded by obstreperous ones.

This brings one to the way in which he dealt with convicts and the building of the Blue Mountains road, which he was contracted for by Macquarie. It was a considerable task.

The range rises to over 4,000 feet and although the famous trio of Gregory Blaxland, William Lawson and WC Wentworth had found a way over in 1813, they had in fact not traversed the main range. Blaxland's advice to William to follow the ridges very nearly defeated the entire enterprise when the road builders reached Mount York.

On July 14, 1814 Macquarie sent William a letter detailing exacting requirements. The road had to be 12 feet wide to permit two carts to pass each other 'with ease', although he preferred it to be 16 feet. In forest and brush ground the timber had to be cleared away to 20 feet. It was to run from the Emu Plains, on the Nepean River, to a 'centrical part' of the Bathurst Plains. Depots were to be established en route.

An opinion from the editor.....

Educational and research body proposed

DR DAVID BLAXLAND a descendant of the explorer, Gregory Blaxland has come up with a proposal which may well be seen as a lasting and welcome commemoration for the bicentenary of the '1813-15 Western Crossing' and at the same time harness the wealth of knowledge and expertise contained in the Western Crossing Committee (WCC).

He has proposed the establishment of a permanent educational and research body in this region. The main objective of such a foundation would be to facilitate and promote education and research concerning the natural history, cultural heritage and human development of this region. The idea appears to have great merit and needs to be carefully considered.

There are many in the heritage sector who strongly believe the commemoration of the 1813 -15 western crossing should have lasting benefit. The same people are becoming concerned that the opportunity to create a lasting commemoration is fast slipping away.

The WCC came into being as a result of discussions between BMACHO and the RAHS when concern was being expressed about ad hoc plans across the region. BMACHO asked the then president of the RAHS, Associate Professor Ian Jack if it might be possible for RAHS to co-ordinate the various plans and so the RAHS Council appointed Professor David Carment AM to chair the committee who recently handed over the chair to his RAHS colleague Dr Anne Whittaker. The committee under the auspices of the RAHS has from Penrith to Bathurst attracted a wide range of individuals and organisations and eventually local government .

In early discussions BMACHO and RAHS asserted that the commemoration should include projects that are of a long-term benefit. At the time it was considered possible, because of the significance of the event that application to the federal and state governments might well attract funding for projects which will remain long after the event.

It is fair to say that there has been some success in funding smaller commemorative projects. But to date there has been little success in initiating a major project such as the much talked about walking trails along parts of the route on which William Cox and his gang of 30 convicts built the 101 miles of road between the Nepean River and the site where Bathurst now stands.

The idea in that project was to restore a substantial part of Cox's Road so this could be used as an educational tool and tourist attraction through the region. In the case of this project it is important to acknowledge the investigative work into land ownership in the Lithgow Valley carried out by members of the National Trust and the funding of signage by Lithgow City Council.

There are plenty of wonderful examples of these types of walkways or selected site access projects around Australia such as the UNESCO World Heritage listed Great North Road convict built to link Sydney with the fertile Hunter Valley, the numerous walking tracks within the Sydney metropolitan area including the Fairfax walk on North Head or the Tamar Valley Drive in Tasmania with its educational journal and audio companion for those who prefer to stay in their car.

A 'visionary' was needed to get the Cox's Road project up and running and no such person has so far been forthcoming who had the capacity to excite government, major corporations and the local community to the significance of this important milestone in the history of Australia.

This is not to say, David Carment and the WCC have not done a most commendable job coordinating the many local groups so that there will be plenty of celebrations including some educational activities. Sure, to capture the imagination of the public there will be need for some celebratory activity; but care should be taken to ensure that public funding is not all frittered away on an extravaganza of parades, plaque placements, partying and pyrotechnics.

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

William Cox selected 30 convicts to work for emancipation

Continued from page 1

William selected 30 convicts, who volunteered, in Macquarie's words, 'on the Condition of receiving emancipation for their extra Labour on the conclusion of it. This is the only remuneration they receive, except their rations'.[2] The supervisors were free men. William kept a journal during the six months of the job. He never referred to the men as convicts, always by names or as 'workmen', 'quarrymen' or 'carpenters'. A small guard of soldiers was there to deal with Aborigines and ward off sightseers.

On July 17,1814 William left Clarendon, his estate, for Captain Woodruff's farm, carts and provisions arrived from Sydney, and he 'mustered the people'. They were issued with slops (working clothes). On July 24, he noted that, after crossing the Nepean, 'The workmen exerted themselves during the week, much to my satisfaction'. As reward he gave them 'a lot of cabbage' (which would also ward off scurvy).

A resting place subsequently named Springwood was created 12 miles from the ford, beyond the first depot. But soon the going became tougher. William recorded 'The ascent is steep; the soil rough and stony; the timber chiefly ironbark.'

The hardness of this wood blunted the axes. The blacksmith's forge was brought up and a chimney built for it. In effect they were progressing in a leapfrogging way, with William himself at the centre and the advance party ahead, while behind them provisions were moved slowly forward.

'The workmen go with much cheerfulness and do their work well.' he wrote on August 2 and again 'Gave them a quantity of cabbage as a present.' But William would not take insubordination and the first victim was a supervisor named Burne, who he sacked on August 4 for refusing to accept orders from the senior supervisor, Lewis.

Despite worries about Aborigines on August 8 'two natives from Richmond joined us; one shot a kangaroo'. On August 28 Joe from Mulgoa and Coley from Richmond also joined them, promising to remain. They were employed as guides. Many years later he would also employ natives as farm workers at Mulgoa, telling a visitor that so long as they were decently fed they were as good as whites.[3]

Always ahead of them lay the enticing prospect of 'good forest ground down in the valley'. The problem was going to be getting to it from the long ridges which constituted the massif of the mountains, while there were many problems, not least of supply.

They ran out of food on August 12. At daylight next day William 'sent Lewis to the depot with a letter to Mrs Cox to send me out immediately 300lb of beef.' Obtaining supplies from Clarendon, rather than from the Commissariat further off in Sydney, was of immediate benefit to the workmen.

William Cox, Sketch courtesy of Blue Mountains Local Studies collection. File HS0\HS0589.

They now set off along a 12 mile ridge, as Blaxland had so unfortunately advised. The going through the forest was as bad as through the brush below.

The trees were gigantic, while continual rain and cold on the mountain began to make many of the workmen ill. William recorded of them tersely: 'Done well'. By August 28 they had 'removed, with all the people, to a little forward of the 16th mile'. On September 3 he recorded unemotionally: 'The road finished to Caley's heap of stones, 17 ¾ miles' (near present day Linden). It had taken from August 7 to construct nine miles of road.

On September 8 the wind was high and cold and 'blew a perfect hurricane': again a precursor of future conditions, totally different to those they had left on the Cumberland Plain. They would have liked to shoot kangaroos for meat, but saw none, only bagging three pheasants. On September 12 the 'long bridge', the first of many, was completed. It had occupied twelve men for three weeks, 'which time they worked very hard and cheerful'.

The stone in the rocky ground was too hard to break with sledgehammers and was having to be levered up. They also had a small supply of gunpowder.

Continued page 4

The road plunges down, twisting between gigantic boulders, in places swerving past the very edge of cliffs

Continued from page 3

By October 2 the second depot building had been weatherboarded, with gable ends. It was to become the Weatherboard Inn, giving its name to what is Wentworth Falls today. They had now reached 28 miles from the Emu ford, little more than a quarter of the way to the 'centrical point' of the Bathurst plains.

Forward scouting revealed that at the end of ridge there was a formidable descent. William sent men to search for a way down, unsuccessfully.

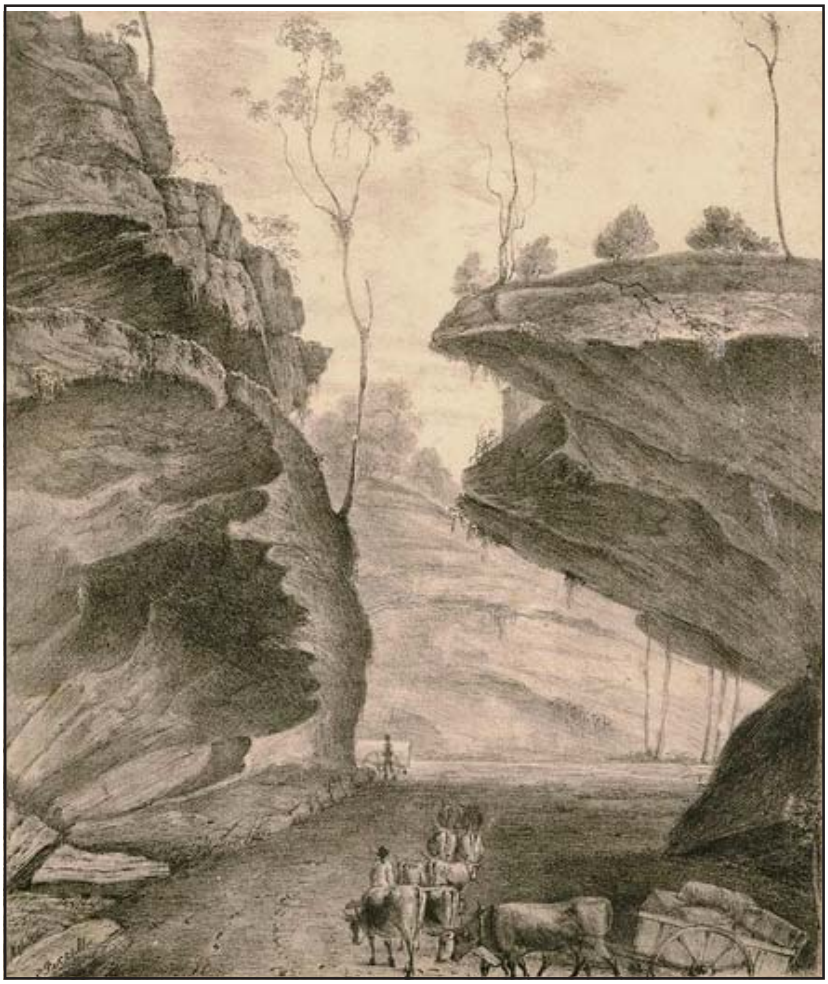
It rained a lot and the 'blankets belonging to the men were very wet and uncomfortable'. On November 2 he decided to survey it himself 'as a road must be made to get off the mountain', but found the descent 'much worse than I expected…The whole front of the mountain is covered with loose rock…the hill is so very steep about half a mile down that it is not possible to make a good road……without going to a very great expense'.

He therefore 'made up my mind to make such a road as a cart can go down empty or a very light load without a possibility of its being able to return with any sort of load whatever'. In transport terms this was tantamount to defeat, although 'such a road would answer to drive stock down to the forest ground'.

When he managed to get down there himself he found: 'Grass of a good quality…Timber thin and kangaroos - plenty'. But 'in returning back we had to clamber up the mountain, and it completely knocked me up'.

He was now uncomplainingly close to his 50th birthday. He frequently gave the men a gill of spirits each to cheer them when they got wet. He compassionately wrote to the Reverend Cartwright on the Emu Plains asking him to 'send two of the gaol gang to cut and house Tindall's wheat at the Nepean. He has a large family and it is his all.'

There are still two small waterholes, thick with leaf mould, a few metres to the side of the track to Mount York, close to which his men slept in bark huts, as apparently did he when his caravan got stuck. The overhanging rock ledges at the top of the mountain are easily identified, too. William described them as 'so lofty and undermined that the men will be able to sleep dry'.



Part of Cox's Pass, New South Wales, 1821. Reproduced with permission of Mitchell Library, State Library of New South Wales is a lithograph by E. Purcell (Ref: sv1B/Blu M /21.)

In the end, they did get the road down in a series of semi-circular bends. The governor's secretary John Campbell, in his account of Macquarie's tour of inspection in May 1815, described this three quarters of a mile as 'a rugged and tremendous descent in all its windings'.[4]

If you go to Mount York today, not far from an obelisk commemorating Cox's achievement, you will see a short section of the road, restored by the Blue Mountains City Council. It then plunges down, twisting between gigantic boulders, in places swerving past the very edge of cliffs.

Even when it was finished horses harnessed to carriages had to be taken down backwards, because they became terrified. Great logs were attached to the rear of wagons to slow them. The historian Chris Cunningham, calls the eventual achievement 'perhaps the most noble of all the stories involved in crossing the Blue Mountains'.

The later problems of bridging rivers were much less. After reaching the Fish River William 'ordered a bullock to be killed for the use of the people, which I had issued to them in lieu of giving them a ration of salt pork … when the men were mustered this morning they were extremely clean, and looked cheerful and hearty'.

Cox aged 50, had certainly exhausted himself in bitter mountain weather

On January 5 the strain of the long and punishing endeavour overtook William and he fell sick himself, the last of the team to do so: 'About midnight I was taken violently ill with excruciating pains just above my left hip.' Perhaps he had spent too long in the saddle.

He had certainly exhausted himself in bitter weather and was fifty years old. Macquarie remarked that 'Mr Cox voluntarily relinquished the comforts of his own house and the society of his numerous family and exposed himself to much personal fatigue, with only such covering as a bark hut could afford from the inclemency of the weather'.[5] (His caravan, drawn by a horse called Scratch, could not always be negotiated up the slopes).

William Cox in the uniform of an officer of the New South Wales Corps, circa 1797-1798
Miniature portrait, reproduced with permission of the State Library of NSW digital order a1087001

The final diary entry, on January 7, recorded ordering the men further forward and himself riding to the head of the Sidmouth valley. 'Returned by the hills, which are very fine. An emu and a kangaroo passed quietly along'. These last words conjure up a picture of William in his paradise, riding in the wilderness.

But he was quickly back at work at home, before the road was actually finished.

On January 15, 1815 he submitted an estimate to government for the construction of two bridges and of Bridge Street at Windsor.

Campbell's account finished: 'The road constructed by Mr Cox and the party under him commences at Emu Ford … and is thence carried 101 ½ miles to the flagstaff at Bathurst …

'The Governor cannot conclude this account of his tour without offering his best acknowledgements to William Cox, Esq, for the important service he has rendered to the colony in so short a period of time' and 'shall have great pleasure in recommending his meritorious services on this occasion to the favourable consideration of his Majesty's Ministers'.

In fact all William did receive was a grant of 2,000 acres at Bathurst. But he had made his name. He was indeed a 'man of great arrangement'.

William Cox : a contradictory character

The stock, when valued, was considered worth twenty five percent more than the purchase money, consequently the farm did not stand Mr Cox in six-pence. What made things even better was that Mr Cox paid him with bills on the regimental agents

Joseph Holt, Irish rebel and farm manager for William Cox, paymaster of the New South Wales Corps, October 1800

Paymaster William Cox, of the New South Wales Corps, is dismissed the Service.

London Gazette, 16 April 1808

Mr Cox is a Sensible, intelligent Man, of a great arrangement, and the best agriculturist in the colony.

Governor Macquarie, recommending William Cox to be the commandant at Bathurst, 24 June 1815

Let a foreigner, a stranger, be told that it is the Convict, the refuse of our Country, that [sic] have performed nearly all the labour that has been done here in the short space of thirty years, and I think he would be astonished.

William Cox to Commissioner Bigge, 7 May 1820

I have received also a grant of land of 100 acres for my Service on the Western road. I have sold it to Mr Cox. He gave me £25 for it he paid me in money and a cow, and several orders, that I have paid.

James Watson, emancipated worker on the Bathurst road, in complaint to Bigge, 29 November 1820

There is not a magistrate in the Colony who has given so much of his time to the business of the Crown & public these ten years past as myself...If any man ever laboured amidst a den of thieves and a nest of hornets it is myself.

William Cox to Commissioner Bigge, 4 December 1820

Extracts from *William Cox: Blue Mountains Road Builder and Pastoralist*

Professor Ian Jack launches William Cox

WELL KNOWN Australian historian and author, Dr Ian Jack has officially launched Richard Cox's latest book, *William Cox: Blue Mountains Road Builder and Pastoralist.*

A large gathering, many of them Cox descendants listened for more than an hour to the author talk about the Cox dynasty and his book during the launch at the Hawkesbury Regional Museum last month.

Welcoming the great, great grandson of William Cox, Dr Jack said: "It is a very real pleasure to launch the first substantial biography of William Cox and to welcome its author, Richard Cox.

"It is always good to see a family which takes account of its own history.

The author, Richard Cox

"Richard is particularly well placed to set the Australian story in its British context, since he is one of the members of the extensive Cox clan who have resettled in Britain.

"In Australia, William Cox is remembered by the general historically-minded population in a fairly narrow way, dependent on where they live.

"We in the Hawkesbury tend to think of him as the local magistrate and entrepreneur and we look with pride on the surviving buildings which he helped to construct, such as St Matthew's Anglican church, rectory and stables and Windsor court-house.

"People in the Blue Mountains primarily relate to Cox as the man who built the first dray road over the Mountains and opened up the central west to European settlement: and indeed Richard's sub-title gives pride of place to Cox as a road builder.

"Folk in the Penrith area have a particular interest in the Cox houses in the Mulgoa valley, all constructed for or by sons of William Cox and their brides.

"Out at Mudgee, Cox the pastoralist is still alive and well, for alone among the estates opened up by the original William, Burrundulla is still owned by a descendent in the direct male line, and still used for its original purposes, although old William did not live to see the lovely homestead that his descendants built at Burrundulla.

"All these aspects of the heritage of William Cox have their proper place in the new biography, but the setting of the Coxes in south-west England is also deftly analysed. Here in Australia we tend to forget that William Cox was already in his 30s when he came to Sydney.

"Three formative decades had been spent elsewhere. His childhood, his formal education, his technical training in clock-making, his military experience, all this baggage which created the dominant personality we think of in Australia was gained in Britain.

"Richard's familiarity with the family circumstances of the late eighteenth-century Coxes gives a freshness of vision to the introductory chapter of his book. It also gives some unfamiliar images in this pleasingly illustrated book.

"I did not know, for example, that William Cox had actually manufactured some handsome long-case clocks until I saw Richard's colour image of a surviving one made by William in Devizes in 1791.

"So this is a well rounded biography. It is also a dispassionate account of a great-great grandfather. One of the perils sometimes attending family histories is piety. Members of a subsequent generation are not always willing to concede that their forefathers had some deficiencies as well as transcendent merits.

Professor Ian Jack

"Richard faces up squarely to the difficulties William Cox encountered in explaining how he had handled the finances of the NSW Corps when he was their paymaster and how these problems resulted in the sale of virtually all his substantial assets in the colony in 1804 and 1805.

"He strikes a very convincing moderate position, putting William's behaviour firmly in an eighteenth-century context, while in no way concealing that William's behaviour was not above reproach from both contemporary and modern ethical standpoints.

"As the story of William's rehabilitation unfolds, Richard draws out some significant themes. To me the outstanding theme is the family itself.

"When I gave a paper to the National Trust a couple of years ago about the Cox houses, I was struck by the number of land-grants run by William Cox which had in fact been made in the name of his children: this was how Clarendon here on the Hawkesbury had escaped the disastrous sales of 1804-1805, since it had been granted in the names of two of his sons.

"But what Richard brings out most tellingly is the way in which the whole Cox enterprise of the years up to William's death in 1837 was a family one.

"There was never any doubt who was boss, but the enterprise was a team effort.

Continued page 7

Cox family unity ensured an empire

Continued from page 6

"Richard makes very clear that the second marriage of William, after his first wife, Rebecca, died in 1819, did not affect the cohesiveness of the family.

"There were ten children between the two wives and the lack of any recorded animosity is very striking.

"I had noticed an odd little instance of this in my copy of *Memoirs of William Cox JP*, which was printed by the family in 1901.

"My copy is a specially bound issue for family members only and bears the signature of the widow of George Henry Cox of Burrundulla. Carefully pasted onto the inside front cover is the death notice of the second Mrs William Cox, who had died long before the publication of the *Memoirs*.

"Now Anna Blachford was not the grandmother of George Henry Cox: she was the step-grandmother. I found it rather touching that this should be pasted in at Burrundulla in 1901.

"What Richard has done is to fill out in fine detail the context of family solidarity and real affection which is reflected in my little piece of Coxiana.

"Without this family unity, the Cox empire, which encompassed Clarendon, Mulgoa, Bathurst, Mudgee and the Hunter, could not have been consolidated so successfully.

"Without it, the family could not have enjoyed the material rewards of major pastoral stations over the Mountains which followed so naturally on the road-building of 1815.

"This is not to diminish the qualities of old William himself: for example, his ability to supply thousands of bricks and forests of timber to construct public buildings and above all his large employment force of convicts and ex-convicts experienced in all sorts of useful trades, so that a conservation architect like Graham Edds can identify stylistically roofs put up by Cox's team of carpenters.

"All this made the private village of Clarendon with its 100 employees the initial heart of the Cox enterprise and the headquarters for building the Western Road.

"In this biography, we have a rounded picture of the man responsible for that Western Road, which is about to be commemorated in so many ways during its bicentenary.

"Richard, you could not have timed your publication better and you could not have chosen more appropriate publishers than David and Scilla Rosenberg.

"I am delighted to declare *William Cox* well and truly launched," concluded Ian Jack.

Trust walk will trace earliest crossings of Blue Mountains

THE EASTERN escarpment of the lower Blue Mountains is steeped in history – both Aboriginal and European.

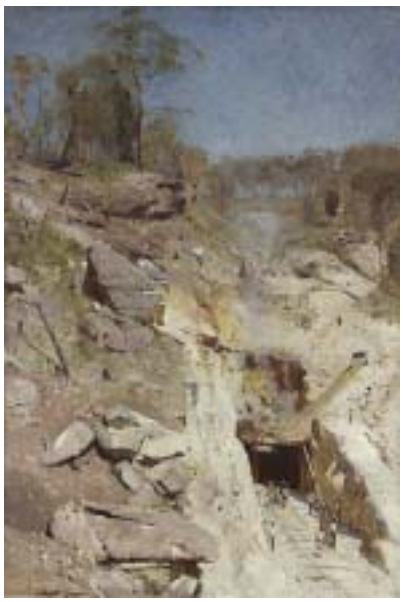
Blue Mountains Branch – National Trust of Australia (NSW) is organising a walk 'Darks Common – construction railway' walk for Monday, October 1. Those participating in the walk will meet at Lapstone Primary School car park, Explorers Road with the event starting at 10am and scheduled to finish at 1.30pm.

Focusing on the exploration and earliest crossings of the mountains by Europeans and to the early road works and ultimately to the railway, the walk embraces many aspects of the journey.

The Lapstone Hill area was part of the mountain barrier that had to be overcome in order to open the way to the pastures and agricultural land that were sorely needed by the infant colony in the early days after settlement in 1788.

The walk will highlight the efforts to overcome the barrier - referring to the Lapstone Zig-Zag, the viaduct, designed by John Whitton, Lapstone tunnel which Arthur Streeton painted in 1891 'Fire's On', one of the iconic Australian paintings. And much more!

Along the route of the 'construction railway', evidence of rock cutting, drilling, explosive 'quarrying' - embankments to carry the line over gullies, also the concrete foundation of winch gear servicing the funicular railway which extended down to the 'new' railway line will be seen.



Lapstone tunnel which Arthur Streeton painted in 1891 'Fire's On', one of the iconic Australian paintings.

The walk will finish at Darks Common, followed by a hearty lunch.

Cost $25 members, $30 non-members. Bookings essential by Sunday, September 23 Enquiries: Sandra 47393003 or **BlueMtsNatTr@gmail.com**

Blue Mountains History Conference October 20, 2012

Everglades a picture of beauty for all seasons

SPRING, summer, autumn and even winter provides spectacular displays of colour, texture and design for those who visit the National Trust owned property Everglades at Leura.

Professional photographer Jonathan Miller visited this heritage property during the past autumn to produce a portfolio of about 50 photographs for the Trust.

In the delightful image at right he captured a rustic red brick edged window framing the blue-green and russet hues of the Jamison Valley and escarpments beyond.

A delight in early autumn, had he photographed this view in spring the green leaves would have made way to a purple cascade of wisteria.

Below he has captured the autumn leaves and enigmatic trunk and branches.

The gardens at Everglades under the tender care of horticulturist Guy McIlrath and his small band of volunteers are regarded as one of Australia's foremost cold climate gardens and arboreta.

This 1930s treasure unites European romanticism with the raw magic of the Australian bush.

Five hectares of valley views, bluebell woodland, lawned and flowering terraces, stone walls, winding paths, glades, pools, and fountains, art deco house, gift shop, tea rooms, art gallery, picnic spots is an ideal place for a day of relaxation.

The property is open every day between 10am and 4pm April to

September and 10am to 5pm October to March. Admission charges: Adults $10, concession $8, child - $4.

Angela le Sueur in her book *Everglades at Leura* wrote that the Everglades gardens are an expression of a special partnership between the wealthy businessman, Henri Van de Gelde and the Danish horticulturist and landscape designer, Paul Sorensen, whose legendary skills created many gardens of note in Leura and Katoomba.

At Everglades the special character of each terrace 'room' is enjoyed on its own terms, as are the spectacular vistas beyond.

Brightly coloured bulbs are still a feature of the upper terrace which gently leads the visitor to the azalea drift where delicate pinks and oranges mix the more vibrant colours of azaleas and rhododendrons and on lower perimeters, to native plants.

Both images on this page have been photographed at Everglades by professional photographer Jonathan Miller

Sorenson planned for the future - a time when his signature trees and shrubs would grow to overshadow the first mass planting beds.Van de Gelde collected statues from Europe and some of these remain today to embellish the gardens.

Today, 70 years on Everglades is a highlight of any visit to the Blue Mountains; a place for people of all ages to gather and enjoy its special events – or to wander and contemplate alone.

Leura Gardens Festival 2012

Eleven gardens will be open to the public including the large National Trust property Everglades, as part of the Leura Garden Festival 2012.**T**he festival will be held from Saturday September 29 to Sunday October 7. Gardens open at 9.30am to 4.30pm daily.

Apart from Everglades, the gardens featured in the festival are all privately owned properties and visitors have an exclusive opportunity to not only see a wide cross section of the very best gardens the region has to offer but also to interact with some of the garden owners, many of whom are present in their gardens during the days of the festival.

Entry prices will be $20pp for a multiple entry ticket to all gardens, and $5pp for a single garden entry ticket. Children with parents are admitted with no charge

Best visual memories of Scenic Railway to go on display

THE 25 MILLION visitors to Scenic World in the past 67 years have been invited to *Make History* at the internationally celebrated attraction, as part of a $30 million redevelopment of the iconic Scenic Railway.

Visitors past and present have been asked to share their memories of Scenic World and the Blue Mountains through photograph and video.

The best memories will find a permanent home onsite as part of the reimaging of the Scenic Railway.

The *Make History* project is part of the major upgrade which will include a new train to transport passengers down to the ancient rainforest floor in the Jamison Valley, new top and bottom platform with interpretation and a new track.

Scenic World has offered five double tickets from anywhere in Australia to share in the official launch event, experiencing first hand the new train which will continue to be the steepest railway descent in the world at 52 degrees.

Scenic World's joint managing directors, Anthea and David Hammon, said the *Make History* project aims to herald an exciting new chapter for Scenic World while creating a time capsule of Australia's past.

"Our family has operated Scenic World for three generation over the past 67 years so history is very important to us," Anthea and David said.

"Our visitors play a key role in our history so we want to extend our interpretation program under the railway redevelopment to include visitor memories through stories, images and moving footage of the site and the greater Blue Mountains."

Submissions will be displayed on Scenic World's Facebook timeline and viewed by more than 100,000 friends. Some of the entries will also be placed on the attraction's website with curators selecting the best entries for a permanent onsite gallery.

Competition winners, judged on entries from each decade, will experience the new Swiss-made railway first hand, scheduled to open in February 2013.

The prize also includes return domestic flights, transfers, two nights at Lilianfels Resort and Spa, double pass to the exclusive railway launch party, and annual passes.

International visitors who participate will also be in the running to win a unique Scenic World merchandise pack as a keepsake of their visit to the Blue Mountains.

To enter, participants can upload images and videos, along with a short description, on a custom-built tab on the Scenic World's Facebook page, www.facebook.com/ScenicWorld and enter via the website www.scenicworld.com.au.

The competition closes on September 2, 2012.

The white lady of Mt Victoria

By John Low, OAM - Blue Mountains Historical Society

FOR PROBABLY more than 100 years the figure of a mysterious woman, carved into the face of a rock by the side of a bush track at Mt Victoria, has danced to soundless music.

Hidden for much of this time by moss and scrub, she was cleaned up and given a white dress some decades ago by an unknown admirer.

She attracted a new audience, becoming the town's celebrated 'white lady' and though her purity and visibility have waned significantly in recent years one can still find her dancing on her rock stage along the path to Fairy Bower .

But who was this woman with the power to inspire such admiration? It is a question invariably asked by those who encounter her and while a categorical answer may never be forthcoming there is at least one very good suggestion.

In the early 1990s the Mt. Victoria & District Historical Society announced that it had found in its collection a photograph of a dancing woman that matched the mysterious image in the bush behind the Toll Bar Cottage. Dated 1906, the photograph is of Emily Hutchinson-Cooper (1878-1947), the daughter of George and Margaret Cooper, owners of the 'Grand Hotel'.

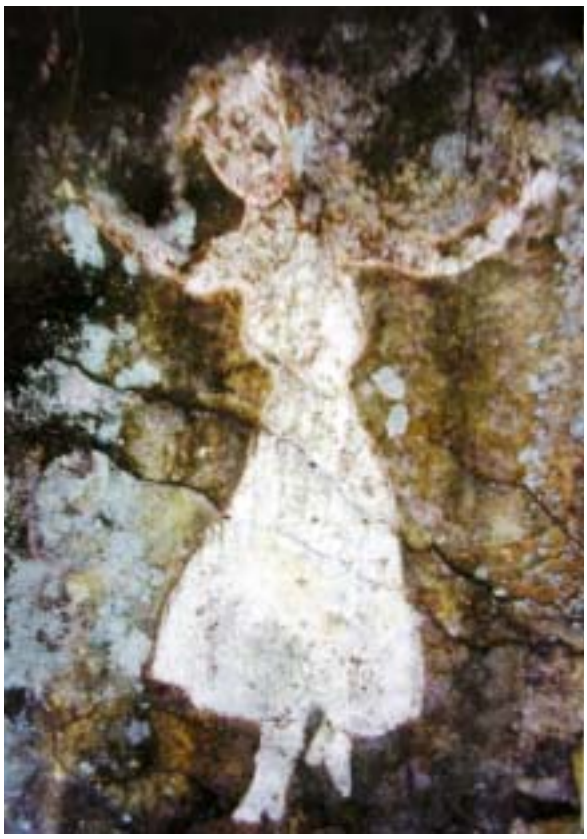
Emily was born in Sydney in 1878, almost a decade before her father purchased the Fairfax family's 'Manor House' in Mt. Victoria.

On the back of the Jenolan Caves tourist boom, he developed it into the town's premier accommodation house with its own coach line and stable of 80 horses.

Emily was a talented and versatile musician, accomplished as a singer, violinist and pianist and musical entertainments were a common feature of life at Cooper's Grand Hotel.

In June 1900 she and her sister performed for a vice-regal party on their way to the Caves that included Lady Mary Lygon, well known as a friend of composer Edward Elgar and probably the subject of his *13th Enigma Variation.*

She was in Australia to assist her bachelor brother in his duties as governor and it may well have been through her influence that Emily made her debut as a soprano in Sydney the following year.



For six years from 1901 to 1907, "under vice-regal patronage", she headlined at an annual concert in the city.

The photograph, (pictured below) taken the year Emily was married in Katoomba and now displayed at the Mt. Victoria museum, depicts an attractive, vivacious young woman in a stage costume of cream dress and boots, 'kicking up her heels' and thoroughly enjoying the experience.

While somewhat faded, it bears a strong enough similarity to the image on the rock to justify serious consideration of the society's claim to have solved the mystery. In any case, until a better solution appears, it will be Emily I think of whenever I pass that rock on the way to Fairy Bower or Cox's Cave.

This article was first published in the Blue Mountains Conservation Society's *Hut News*, No. 271, June 2010

Convict female factory women - You and me in a different set of circumstances….

by Gay Hendrickson

WHAT IS our connection to the convict female factory women, the lives they left, the journeys they made and what they would have experienced?

These convict women are an important part of who we are as Australians.

They are a part of our bloodlines, our lifelines and our storylines. In many ways we are them and they are us.

In order to find out who these women were and what their lives were really like involves tracing the shapes of their lives.

These convict women coming to Australia were living at a time of extraordinary junctures in British and European history.

The women lived within a web woven by the whims and idiosyncrasies of the powerful and the extreme circumstances that were the 1790s to the 1850s.

They would have been experiencing and witnessing the full effects and meaning of revolution.

Some of these women would have protested against authority against domination and lack of human rights becoming the early proponents of the social revolution.

Many would have experienced the agrarian revolution - enclosing of lands and changes in agricultural methods and machinery.

Others would have seen massive changes from living an agricultural life and dislocation from the countryside to industrialisation and life in large towns and cities, participating willingly or otherwise in the industrial revolution.

Some certainly participated in and witnessed the breaking of looms in England's north. Many of the Irish, Scottish and Welsh would have been reacting to the hundreds of years of British 'colonising'.

We know that 24,960 women were transported by ship[1]. Of these an estimated 9,000 went through the female factory system[2].

Convict female factory women were simply convict women who for various reasons, spent time in a convict female factory.

This may simply have been because they were not assigned at the docks on arrival or it may have been because they committed some offence in the colony.

These women were considered by many as society's outcasts.

The real telling of the story of these women is to push past the stereotypes commonly described and look at particular sets of circumstances.

Gleaning moments from the lives of some of these women and sharing their stories, Charlotte Badger, Maria Riseley, Mary Hindle, Elizabeth Browning Owen, Bridget Byrnes, Mary Field and Ellen Sweeney gives an insight into this hidden part of our history.

Charlotte Badger was born in Bromsgrove and in 1799 was transported for seven years[3].

She was incarcerated for four years in Worcester Gaol before being transported.

The Ship *Earl Cornwallis* departed England on November 18, 1800, with 193 male and 95 female prisoners.

Mary Noonan

Mary was born on January 20, 1812 in County Waterford, the daughter of John Noonan and Mary Dobbin.

Mary was convicted of 'stealing money' in 1829, Waterford, sentenced to transportation for seven years, she had two previous convictions.

Mary married Owen Stapleton in 1835 and had seven children.

In 1876 she married Colin Rogers. She died in 1903 and is buried at Blayney

- Image courtesy of Frances Cook

There were 27 male and 8 female deaths on the voyage of 206 days (nearly 7 months).

Charlotte was assigned. When she had two years left to serve, she became pregnant and was sent to the Female Factory, Parramatta.

Continued page 12

Continued from page 11
Her daughter Anny was born, the father, an un-named soldier.

She was then to be assigned to masters in Van Diemen's Land and put aboard the *Venus*.

Captain Chace was cruel to crew and prisoners including flogging women.

He also wanted to do sealing on the way so the women were put ashore at Two Fold Bay and left to fend for themselves for fifteen days and when the ship returned the women were locked below decks.

The captain was also cruel to the crew who objected and were accused of mutiny by the captain.

When *Venus* arrived in Port Dalyrymple in 1806 the Captain went ashore to make his report at which time the crew committed piracy - while the women were on board.

Charlotte by default became a pirate.

Last officially seen in Tonga[4], however, the muster of 1823, 1824 and 1825 has this entry; Maria Badger age 10, born in colony, daughter of Charlotte Badger, Parramatta. Charlotte's story was one of being buffeted by circumstance.

Maria became an unwanted chattel

Maria Riseley was a woman who shaped circumstance, although some of the negative attitudes toward convict women formed her life as well.

Maria was born about 1780. She was convicted of *stealing from a dwelling house*[5] and sailed on January 2, 1804 aboard *Experiment I.* There was no surgeon and the ship included 2 males and 136 females. Six women died.

The women from the *Experiment 1* were assigned to the first Female Factory, Parramatta.

While there Maria gave birth to a daughter, Caroline Maria, the father stated as John Thompson.

She was assigned to Edward Lord from the Factory and travelled to Van Diemen's Land.

She had another 7 children.

Edward travelled to England often with one or more of his children, all of whom were educated in England. Maria was never allowed to go to England or have anything to do with Edward's family.

Constance de la Sablonaire,
Constance with her cousin/sister Elizabeth were sent to Madame Morel to be taught a range of skills as was the practice of slave owners These two were sent needlework where they were accused of trying to poison the mistress – white powder in tea .

Madame and her three-year-old son reacted to the tea, with a violent headache, dizziness and palpitations. The doctor decided they had been poisoned with arsenic. They did survive but the girls were charged with attempted murder.
Image courtesy of the National Library of Australia

They were store owners and ship owners with retail and property interests, their homes and two hotels in Hobart.

They also had 6,974 acres, 3,400 cattle, 4,500 sheep and 41 horses.

They employed 25 free workers and 50 convict servants.

Much of his fortune was Maria's good business management.

Edward Lord was named as father to Ann Fry's child, born in the colony in 1825.

He had also established another family in England with his children's British nurse and fathered another five children.

The impact on Maria through this must have been devastating. To Edward she became an unwanted chattel.

We can find portraits of all the members of this important family…except Maria. Maria died on July 22, 1859.

Mary Hindle's life was defined by her choices over a couple of days participating in loom breaking riots.

She was born in Haslingden, Lancashire, c1799 to James and Mary Holden (nee Haworth). In 1818 she married George Hindle, a handloom weaver, and had 3 children. Elizabeth was baptised at St. James on March 21, 1819.

There are two other children who are recorded in the burials but not baptisms, Abraham on January 10, 1822 aged 1 year and Robert on December 17, 1823, both aged 1 year.

By 1826 Mary, her husband and 7 year old Elizabeth were living at Pleasant Street, Haslingden.

Mary's trade was a laundry woman. She had lost two of her three children.

It was hard for the handloom weavers like George at the time and 72 hour weeks were not uncommon.

Continued page 13

Spies had been sent among the rioters and cut small pieces of cloth from clothing to identify the culprits

Continued from page 12

Life generally in Lancashire at the time was that of early industrialised England. Haslingden was a weaving centre and Mary's time was one of protest.

On Monday, April 24, 1826 about 1,000 workers rioted. It went on for four days.

On the first day soldiers sent did not attack them. On April 25, Mary Hindle was in the crowd at William Turner's Mill at Helmshore and she shouted encouragement and laughed: *I have won my bet; I bet a shilling that the powerlooms would be destroyed within five weeks.*[6]

At Chatterton the army made a stand and killed 4 people including a bystander waiting for a coach to Manchester. Over 1,100 looms were destroyed at a cost of £16,000.

Spies had been sent among the rioters and cut small pieces of cloth from clothing to identify the culprits and proffered this as evidence[7]. This evidence convicted Mary.

There were 53 men and 12 women tried in August. Of these people 35 men and 6 women received the death penalty but were subsequently reprieved.

Eight men and two women were sentenced to transportation for life. Mary Hindle and Anne Entwhistle were the only two women to receive this punishment.

Mary Hindle was sentenced at Lancaster Assizes on August 8, 1826, term - Life[8].

Almost 10 months later on June 4, 1827 Mary sailed from London with another 80 females on board the *Harmony* and arrived in September 1827.

She never settled into life in the colony as is evident in her letters to her husband and her petition she sent to the governor while in the factory.

Her petition was a plea for freedom: *I hear that pardons have been granted to the men involved in the crime [machine breaking] and I humbly implore your Excellency to include me in the number of those who have received the Blessing of such Clemency…do not suffer me to languish the remains of my existence in hopeless Slavery.*[9]

The annotations on her petition *"Is this woman one of the machine breakers? No pardon has been received for this woman. Let her be told by Mrs Leach." (Matron)*

Mary was out of the factory in 1840 and assigned to the principal superintendent of convicts but absconded again.

In1841 Mary committed suicide (verdict intoxicated). Mary was one of the women who could not cope with the dislocation, separation from family and the attitudes towards women like her.

Elizabeth Browning Owen's transportation story was shaped by her connection with her children and empathetic officials.

Elizabeth was born about 1792, most likely in the parish of Newington, Surrey.

From age 19 Elizabeth's life as a mother began when she gave birth to son John.

Every two years for the ensuing six, she gave birth to a child – Eliza, Robert and then Elizabeth.

Sometime after the birth of her fourth child she was alone caring for them.

She had skills with her hands, a good eye and a sense of precision.

She found her way into forging. Elizabeth was tried at the Surry Assizes on March 25, 1820 and sentenced to transportation for fourteen years[10].

Emma Mayner and daughters

Emma "was found guilty of receiving a time piece valued at £2 and a shawl valued at 6 shillings, the goods of Charles Wisedale, knowing them to have been stolen. It appears that they were stolen at Aston by Thomas Shenton. Her age was given as 18 and she could neither read nor write."

Image courtesy of Shirley Moore

It was almost two months between the trial and embarkation on the *Morley.*

During this period she was separated from her children. Her children ranged from three to nine years old.

Her nine year old child was deemed too old to travel with the mother.

Elizabeth Browning Owen was extremely distressed with the prospect of separation by transportation.

The ships surgeon Thomas Reid noted her struggle at the time of embarkation.

He said that: *At 6pm … a person arrived saying he had brought four children belonging to Browning Owen, a convict, but had left them at Woolwich, being uncertain whether they would be received on board.*

Continued page 14

Her 9 year old child was deemed too old to travel with the convict mother

Continued from page 13

One of them happened to be three years above the age permitted [aged 9]. The case of this poor woman seems one of aggravated distress: About nine months since, her husband incited her to commit a crime; and after involving her in guilt and misery, left her with a helpless family without a friend in the world. Her conduct having been exceedingly good since she came on board, induced me to lay a statement of her case before Mr Capper, for consideration of the Secretary of State, whose benevolence granted permission for all the children to be embarked and accompany her.[11]

Her children - John 9 years, Eliza 7, Robert 5 and Elizabeth 3 - boarded the ship *Morley* , were reunited with their mother and joined another 121 female prisoners.

The ship arrived in Sydney 1820 via Hobart. Elizabeth married Emanuel Marvin in 1822. Elizabeth worked with him at *The General Bourke/ Governor Bourke* Hotel, Parramatta in 1839. She died in Parramatta in 1839.

Bridget Byrne was born about 1773 in Trim, County Wicklow.

She was a mantua maker which meant she had good sewing skills and unlike so many in Ireland at the time she had an income.

Her story was not a story of petty crime gone wrong but protest against a colonial power responsible for the death of her brother during the rebellion.

The story of her crime tells us, during a rebellion, she hit a soldier on the head and killed him, in reprisal for the death of her brother at the hands of the British soldiers.

Through this act upon a 'king's man it was considered an assault on the king and sedition.

Bridget was convicted in Meath in August 1801 for murder and transportation for Life[12].

Bridget embarked on the ship *Rolla* which departed from Cork Harbour November 4, 1802 carrying 127 male and 37 female prisoners.

She was in the female factory about 1804, when she married Morgan Power.

Bridget died on November 25,1820 and is buried at St John's Parramatta.

Mary Field's story is a part of one that appears to be 'family migration'. Mary was born 1778, Youghall, County Cork, Ireland.

She married James Field and had four children.

Mary was described as a washerwoman, nurse and a seamstress. Her daughter Margaret was a washerwoman and straw plaiter.

Mary's husband James died about 1820 in Ireland. Mary had two convictions by the time she was indicted in 1827 aged 49 for stealing from a person. Her daughter Margaret aged 18 was also accused.

This was not enough for capital punishment but was enough for transportation. They were sentenced in Cork to seven years transportation[13].

Three children preceded her and Margaret to the Colony of NSW. Catherine came out on the *Brothers,* Elizabeth came on the *Lady Rowena* and James on the *Godfrey Webster*

Mary and Margaret embarked on the *Elizabeth* together with daughter Margaret, two of 194 females.

The master was Walter Cock and the surgeon was John Hughes. It sailed from Cork on August 27, 1827 taking a little over 4 months (138 days) and arrived on January 12, 1828 with 192 women.

Anne Dunne

Anne was born c1810 Carlow, Ireland. She was tried in Dublin November 17, 1830, found guilty of 'stealing linen', and sentenced to transportation for seven years.

She had had a previous conviction, which carried a sentence of seven months. On April 16, 1835 at Christ Church Castlereagh, Anne Dunne married James Tompkins.

There were 10 children to this couple. Disheartened by flooding of the Nepean River John moved his family to Gulgong where he continued as a carrier and gold miner, until his death in 1879.

Image courtesy of Maureen Upton and family

My own female factory ancestor, Ellen Sweeny was born about 1818 to Caroline and James Sweeney.

She married a William Murphy in 1832 and had two sons, Mathew and John. Her husband died leaving her the two children.

Continued page 15

These women became the silent revolution in Australia

Parramatta Female Factory - Image courtesy Society of Australian Genealogists

Continued from page 14

Ellen stole money from her master and was transported in 1842. Her comment – 'borrowed' money on the 'never never' from her employer Mr Stragel who had underpaid her.

She had to leave her two boys , 5 and 8 years old, behind never to see them again. Ellen was sent to Van Diemen's Land to the Cascades Female Factory and gave birth to Sarah on August 11, 1843 at the Cascades Female Factory known as 'The valley of death'.

John Dale was the father. Ellen was given a ticket of leave and married John in 1845 at St Georges Church, Battery Point, Hobart.

John and Ellen moved to Elizabeth Street, Hobart where Alfred was born on September 10, 1846. James was born on October 8, 1849 at Henty's sheep station "Muntham", near Coleraine. Son, Alfred, was born in 1846.

They moved to Victoria and had one more child, James in 1849. Ellen died in 1899.

All these women became the silent revolution in Australia. Through their lives, and values the Australian character began to be shaped into what it is today. In so many ways they were the mothers of the nation. Yet they really were just you and me in a different set of circumstances.

About the author

Gay Hendriksen is a Blue Mountains resident and has worked in the gallery and museum environment for 21 years including local history museums in Shellharbour and Sydney, Penrith Regional Gallery, Norman Lindsay Gallery and Museum and now Parramatta Heritage Centre.

She also curated the exhibition Women Transported - Life in Australia's Convict Female Factories which has won national and state awards in excellence and is currently touring 5 states.

She is also currently president of the Parramatta Female Factory Action Group which has the aim of saving the Greenway designed Parramatta Female Factory which was commissioned by Governor Macquarie and making it available for all to experience.

Readers are invited to view the Parramatta Female Factory Action Group's website and take a tour with experts on the history and significance of this part of our Australian Heritage. www.petitionbuzz.com/petitions/savethefemale factory/o/2

Proposal for permanent educational and research body

A PROPOSAL which would bring a lasting benefit to the region has been presented to the Western Crossing Committee (WCC) the coordinating body for the 2013-15 western crossing celebrations.

Dr David Blaxland a descendant of the explorer Gregory Blaxland who has been participating in the WCC meetings has proposed the setting up of the Western Crossings Foundation (or Trust) as a permanent body for education and research concerning the natural environment and human development of the region.

The proposal could lead to increased employment opportunities in the fields of education, care of the environment, tourism and research.

Dr Blaxland a medical practioner living in Wagga Wagga has pastoral interests with a farm employing environemental practices at Warrnambool, Victoria.

"There would be a potentially immeasurable contribution to the canon of historical knowledge of the region.

"This could be a valuable bicentennial legacy to future members of the local community," he said.

Dr Blaxland has suggested that the objectives of the Foundation might be:

1. To facilitate and promote education and research concerning the natural history and human development of the region;
2. Through the above, to foster understanding and co-operation between local communities and groups of people; and
3. To make results of this work available for promotion of the region to visitors.

The work of the Trust would also contribute to the historical knowledge of the region.

The outgoing chairman of WCC, Professor David Carment has suggested the establishment of links with one or more tertiary educational insitutes such as the University of Western Sydney or Charles Sturt University and local TAFE colleges.

The Foundation would be established in a form to accept grants, donations and bequests.

Dr Blaxland said the Western Crossings Committee was unusual consisting of members from diverse backgrounds encompassing a wide range of skills, knowledge and experience.

If there is no further action the committee will automatically disband at the end of 2015 celebrations.

Numerous ideas have been discussed including the production of films showing how tasks were performed and comparing them with modern methods including now rare trades and the construction of lost trades.

Another idea was for the production of CDs for use in motor vehicles when encompassing a large geographical area.

A small group of people who have shown an interest in the proposal will meet with Dr Blaxland before the next meeting of the Western Crossing Committee.

A LESSON LEARNT FROM THE BURIAL OF THE 1867 RAIL CUTTING ABUTMENT

"BURIED beside the highway and railway diversion in the old railway cutting between Lawson and Hazelbrook is the last 'built' link with the original 1867 single track train line," writes local historian and author Ken Goodlet of Hazelbrook

"The entombed southern side eight-course stone abutment supported an arched masonry railway bridge over which the Bathurst road went, one of two such bridges on the mountains, according to the *Herald* of the time.

"You have to go to either the west or east escarpment to see any original stonework.

"This is just one more piece of our heritage that has been taken away from us without our [the Mountains community] permission.

The 1866/67 sandstone abutment on the southern side of the original 1867 rail track. Note the shadow on the left that shows where the 1866-67 stone arch of the Bathurst Road bridge began.

"Much of it over the years was unavoidable, but not this time. Had the Roads and Maritime Service (RMS) looked at their own guidelines for preserving heritage in their excellent 2002 Review of Environmental Factors for the mountains highway, they would have created a concrete block wall or equivalent on the southern side of the new highway as they have done on the northern side, rather than sacrificing our heritage by supporting the wall with a whopping amount of lime and blue metal strengthened rubble.

"Fortunately, the RMS's failure to follow their own heritage guidelines on the Woodford highway heritage precinct has been picked up early enough by a sub-committee of Woodford residents to give them a fighting chance of reviving their discrete community identity," Mr Goodlet said.

All set for Blue Mountains history conference

THE BLUE Mountains History conference being organiSed by BMACHO will be held at the heritage listed Carrington Hotel, Katoomba on Saturday, October 20.

At the time of going to press with this newsletter there were a limited number of places available and those interested in attending should email Jan Koperberg at j.koperberg@bigpond.com

Early bird registrations are now closed and the normal fee of $50 is payable with bookings.

The fee includes morning and afternoon tea as well as lunch in the historic grand dining room at Carrington Hotel now restored to its former glory. The conference will be held in the ballroom also restored to its original décor.

The registration desk will open at 8.30am with the conference opening at 9am

The conference will be officially opened by the well known historian Associate Professor Ian Jack former long-term president of the Royal Australian Historical Society.

Ian has been an indefatigable advocate of the importance of history and heritage of Australia. He has immeasurably increased the appreciation of heritage and has saved innumerable items from oblivion.

His vast knowledge of the history and heritage of the Greater Blue Mountains region and the Hawkesbury made him an obvious choice for the role of opening this conference.

The keynote speaker Professor Paul Ashton has chosen as his subject the 'The early years of the colony'.

Paul is a co-director of the Australian Centre for Public History (ACPH) and the Centre for Creative Practice and Cultural Economy. He is the Professor of Public History at the University of Technology, Sydney (UTS),

Paul's most recent book (co-authored with Paula Hamilton) is *History at the Crossroads:*

Pictured front row from left BMACHO secretary, Jan Koperberg, Brigette Mackenzie (Bendigo Bank , Katoomba branch manager), BMACHO president , Pamela Smith and Peter Carroll (Bendigo Bank); back row BMACHO committee members Doug Knowles, Judy Barham, Scott Pollock and John Leary, OAM at the cheque presentation at Everglades, Leura.

Australians and the Past (Halstead Press) and he is a founder and co-editor of the refereed journal *Public History Review*, now published by UTSePress.

Professional gardener, historian and author Silas Clifford-Smith's subject for the conference is Survival and Civilisation in a Strange Land, which will highlight the importance of parks, gardens and cemeteries to Australian settlers from the time of settlement up to the early 20th century.

As well as working for many private clients he has been employed by the National Trust at the Norman Lindsay Museum in Faulconbridge and Experiment Farm Cottage.

Silas has also worked for the Historic Houses Trust at Vaucluse House and Elizabeth Farm, and the Governor-General at Admiralty House.

A prolific writer and biographer of Miles Franklin, Professor Emerita, Jill Roe, AO is another of the line up of first class speakers for the conference.

Professor Roe has chosen the title 'Miles and her mates in the Mountains' for her 'talk'.

Jill is professor emerita in modern history at Macquarie University, Sydney.

A Powerhouse Museum curator Glynis Jones has accepted an invitation to be presenter of textiles and fashions in the early colonial era.

Glynis is a curator in the design and society department of the Powerhouse Museum with responsibility for the museum's holdings of fashion and dress.

Local historian Paul Innes will speak and provide a tour of the heritage Carrington Hotel. His subject, 'The Carrington Hotel – a return to the era of grace and elegance and charm'.

Hurry last chance to book……

BLUE MOUNTAINS HISTORY CONFERENCE

To be held at the historic Carrington Hotel, Katoomba
on, Saturday, October 20, 2012
Conference theme: "*Colonial Society*"
with a great line-up of speakers and presenters

PROGRAM

8.30am Registration
9.00am Introductions conference starts

9.15am Conference to be opened by former president RAHS, Prof Ian Jack.

9.45am *The early years of the colony* by keynote speaker, Prof Paul Ashton, co-director Australian Centre for Public History.

10.45am Morning tea

11.15am *Nature and role of gardens in the early settlement period* by Silas Cliford-Smith archivist at the Heritage Centre, UNE

12.15pm *TheCarrington Hotel - a return to the era of grace, elegance and charm.* A tour guided by Paul Innes.

12.45pm
Lunch in the grand dining room

1.45pm
Musical interlude Jim Low, folk singer, historian and writer in the ballroom.

2.30pm *Colonial dress* by Glynis Jones, curator fashion & dress design and society Powerhouse Museum

3.30pm
Afternoon tea

4.00pm Prolific writer and biographer of Miles Franklin Professor Emerita, Jill Roe, AO has chosen the title *Miles and her mates in the Mountains* for her 'talk'

Cost of $50 includes morning and afternoon tea as well as lunch in the historic grand dining room of Carrington Hotel.

For further information and early bookings (capacity limited to 120 participants) contact Jan Koperberg at
j.koperberg@bigpond.com or bmacho.heritage@gmail.com

Lithgow Small Arms Factory centenary

LITHGOW Small Arms Factory Museum will celebrate the centenary of the establishment of the factory which went on to be the source of much of Australia's defence equipment for World War 1 and 2.

An exhibition of pre-federation colonial weapons will be presented by the Lithgow Small Arms Factory Museum in conjunction with the Antique Arms Collectors Society of Australia from September 20 to October 27.

There will be an official opening of this exhibition on September 29 and the cutting of a centenary cake at 11.30am. Talks and demonstrations by expert members of the AACSA will commence at 1pm.

A series of centenary workshop talks will be conducted over the weekend October 20 - 21.

Among the speakers will be Professor Greg Patmore who will speak of 'The Factory and the Lithgow community before the Second War', Ian Kuring on 'The development of military small arms in Australia during the 20th century', Colonel Jim Burns, 'The role, organisation and tactics of the modern Australian defence force', Justin Hewitt an archaeologist,'Weapons from the West' Tony Griffiths (author of *Lithgow's Small Arms Factory and its people*) 'Ladies of Lithgow and the SAF' and Graham Eveden 'Development of the F88 Austeyr rifle: 1988 till today and into the future'.

Saturday workshops will be of interest to military and arms enthusiasts while the Sunday program will centre on talks for history enthusiasts. For more information on these activities contact the Lithgow Small Arms Factory Museum by e-mail to lithgowsafmusesum@ozemail.com.au or by telephone to (02) 6351 4452

Volunteer Defence Corps not a Force

AN ARTICLE titled *World War 2 in the Blue Mountains* by Joan Edwards appeared In the July-August 2012 edition of *HERITAGE.*

Bob Burnett of Mt Victoria Historical Society has drawn attention to an incorrect nomenclature of the organisation that was often known as Australia's 'Dad's Army of the day which was in fact the Volunteer Defence Corps (not Force), also referred to as the VDC.

Thanks Bob, you information is correct. *HERITAGE* has done some research and offers the additional information.

The Volunteer Defence Corps (VDC) was an Australian part time volunteer military force of World War 2 modelled on the British Home Guard.

The VDC was established in July 1940 by the Returned and Services League of Australia (RSL) and was initially composed of ex-servicemen who had served in World War 1[1].

The government took over control of the VDC in May 1941, and gave the organisation the role of training for guerrilla warfare, collecting local intelligence and providing static defence of each unit's home area[2].

General Harry Chauvel, who had retired in 1930, was recalled to duty in 1940 and appointed Inspector-General of the VDC. Chauvel held this position until his death in March 1945.

Following the outbreak of the Pacific War, the Government expanded the VDC in February 1942.

Membership was open to men aged between 18 and 60, including those working in reserved occupations. As a result, the VDC reached peak strength of almost 100,000 in units across Australia[3].

As the perceived threat to Australia declined the VDC's role changed from static defence to operating anti-aircraft artillery, coastal artillery and searchlights.

Members of inland VDC units were freed from having to attend regular training in May 1944 and the Volunteer Defence Corps was officially disbanded on August 24, 1945[4].

Patron's favourite Lindsays on show at artist's home

A SPECIAL exhibition of many of the best of the Norman Lindsay watercolours from the Howard Hinton collection is planned for the months of September to November at the Norman Lindsay Gallery in Faulconbridge.

Stunning watercolours such as *Happiness, Hydrangeas, Belshazzar, Hot Blood, Odysseus* and *Guarded* are among the works to be exhibited and seen for the first time together in the artist's home.

Howard Hinton was 'an Artist's patron' and during his lifetime he donated over 1000 works of art to various institutions including the Teachers' College in Armidale

He planned the collection to be a thorough representation of Australian art from 1880. It eventually included works by William Dobell, Hans Heysen, Margaret Preston, Thea Proctor, Tom Roberts, Arthur Streeton and the large collection Lindsays.

It was described by Norman Lindsay as 'the only complete collection of Australian art in the country'.

The exhibition will run from September 10 to November 19 and is included with normal admission to the gallery.

Happiness, Norman Lindsay, 1933, Watercolour, Bequest of Howard Hinton 1948, New England Regional Art Museum, Armidale NSW

Vintage and retro

EVERGLADES will be hosting its second Vintage and Retro weekend on November 17 and 18.

This year, vintage and retro fashion parades will be featured. While the ladies relish the fashions of the 30s and 40s, the men can lust over polished vintage vehicles.

There's plenty of lush green lawns to sprawl over while watching your kids play hopscotch or quoits.

Everyone is being encouraged to dress the part. Once you're done, you can learn to move and groove. All this and a lot more will be up for grabs.

Cost: Adult $14, National Trust members $10, concessions $12, children $8. family $35. Tickets/enquiries**:** 02 47841938

More accolades for *HERITAGE*

From David Blaxland a descendant of Gregory Blaxland:*Thank you very much for adding my email address to your newsletter. I'm astonished by the high quality of the articles.*

They're easy to read and very informative. Jan Koperberg mentioned that she was the secretary of BMACHO – I knew that it would consist of an interesting group of members but I had no idea that the standard of your work would be so high. I'm sure that, if it would be permissible, my fourth cousin Richard Blaxland, would also like to receive a copy of HERITAGE.

Richard and I both have a keen interest in history in general, and Australian history in particular.

From Mary Reynolds, Mt Wilson and Mt Irvine Historical Society Inc: *What a mammoth effort with the latest HERITAGE newsletter.*

From Neryl Medcalf former research officer Woodford Academy: *Thank you, for the latest copy of the HERITAGE newsletter - always a great read!*

From Wendy Blaxland, great, great, great, great grand-daughter of Gregory Blaxland:*Thanks again for a most interesting newsletter; you provide such a valuable service to everyone wanting to share information about the history of this fascinating area*

From Alison Halliday: *As always a pleasure to receive and a fascinating read. Many thanks.*

From Joan and Tom Kent of Hartley Valley: *Congratulations on a particularly interesting edition of the newsletter HERITAGE - you have really excelled in difficult circumstances.*

From Ken Goodlet, local historian and author of Hazelbrook: *Congratulations, John on another wonderful newsletter. I'm particularly pleased that John Low got such a high profile in it. He is a wonderful asset and a thoroughly nice person.*

From Geoff Bates, Mt Victoria Historical Society: *Keep up the good work of recording our history - very interesting.*

Inland explorers' stamps issue launched

AUSTRALIA POST has issued the 'Inland Explorers' series of four stamps.

They were issued on July 3 and Blue Mountains City Council held an afternoon tea on August 17 to launch the Crossings website and the commemmorative stamps.

This stamp issue commemorates two anniversaries: in 2012 it is 150 years since John McDouall Stuart returned from his overland crossing of Australia; and in 2013 it will be 200 years since Gregory Blaxland, William Lawson and William Charles Wentworth crossed the Blue Mountains.

In 1813, Blaxland, Lawson and Wentworth travelled through Dharug and Gundungurra country to establish a route across the Blue Mountains to open up the western plains of NSW for farming and settlement.

Others had attempted the crossing before, but the party's key strategy was to follow a westward-running ridge travelling for 21 days to what became known as Mt Blaxland.

Their expedition led, within a few short years, to a road across the mountains.

Some 50 years later, Stuart became the first European to make the south-north return crossing of Australia.

He left South Australia with his nine companions in October 1861, on his third attempt to cross the continent, reaching the coast at Van Diemans Gulf on July 24, 1862. Stuart raised the flag the following day, after first attempting to find the mouth of the Adelaide River.

Turning south, the party made Adelaide on December 17 that year. Stuart's success has been attributed to his experience, his egalitarian leadership style and his lighter method of travel. His expedition eventually led to the Adelaide-Darwin telegraph, (enabling telegraphic communication with the world) and the Stuart Highway.

Collector gets three postmarks

Local lay philatelist, former president of Blue Mountains Historical Society and now editor of the *Blue Mountains History Journal,* Dr Peter Rickwood might be in other circles described as one who had won the trifecta.

Peter purchased the Australia Post first day cover envelopes with the two 60 cents stamps of Blaxland, Wentworth and Lawson on the day of issue as well of that of John McDougall Stuart in the 'Inland Explorers' series.

Not content with the envelope bearing any old post office post mark, he visited post offices at Blaxland, Lawson and Wentworth Falls on July 3, 2012 the official date of issue by Australia Post and had his first day covers post marked at post offices in the three towns.

This initiative is probably almost unique. Well done Peter! Of course, the chance of it being unique would probably have been assured if Peter had flown on the same day to post offices at say Adelaide River 0846 Northern Territory, Oodnadatta 5374 or Coober Pedy 5723 South Australia all towns which came into existence after the exploration by Stuart or even Stuart Park near Darwin which seems to be the only town named in his honour .

John Leary, OAM

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or it's really going to happen

New chair

Dr Anne-Maree Whitaker (pictured) the senior vice president of RAHS has now assumed the chair of the Western Crossing Committee (WCC) replacing the RAHS president Prof David Carment AM.

Aircraft to fly over region

Mr Phil Hammon of BSB and Scenic World advised a recent meeting of WCC the planned flight path is from Bathurst, over the Grose, down to Emu Plains and then back up the route of the Great Western Highway and on to Bathurst.

Descendants walk

Trevor Lloyd from the Blue Mountains Blue Wave has advised WCC its planned re-enactment walk from St Marys to Hartley Valley was organised to be held over 21 days. SES vehicles will accompany the walkers.

The team will be made up of descendants and their families and will be conducted from May11 to May 31, 2013. It is hoped the walkers will be in Katoomba on May 25 for the aircraft flyover.

There are 7 people in the walk, but not the same 7 people over the 21 days. Stephen Wentworth will start the walk to represent William Charles Wentworth.

Digital mapping project

Rosemary Sempell, Land and Property Information said that the relevant maps had now been scanned at State Records and that there would be digital delivery by the end of the year.

Holey dollar

A holey dollar coin is to be created for distribution to 12,000 primary and high school children in the Blue Mountains area.

Phil Hammon has displayed to the recent WCC meeting a 'promo' coin in brass with the dump, which is a copy of the original coin and dump. This was in a display box, on a backing, which would show the logo of the sponsor/s.

The commemorative coin would be made in pewter. Phil said the metal used depended on whether the coin was to look new or old.

Sharon Lamb asked if school children from Blacktown to Bathurst could receive the coin and this possibility is now being considered.

William Lawson's grave

Blacktown City Council has received a grant to restore William Lawson's grave at St Bartholomew's church at Prospect. St Bartholomew's Anniversary Day will be held on April 13, 2013.

A moment in Time

Hartley District Progress Association will be conducting an images exhibition titled *A Moment in Time*, in the historic site for the two weeks either side of the June1 weekend.

The yet to be named Fair Day on June 1, 2013 will run from 10am to 4pm.

There will also be guided walks on Cox's Road in May and June.

These walks will be of varying length and difficulty, limited to manageable numbers and only on those sections of the road where permission can be obtained from landholders.

Hartley District Progress Association also has a history conference scheduled for June 8, 2013.

Katoomba RSL Club

Katoomba RSL has donated $500 for Mt Victoria & District Historical Society to paint the museum before the bicentenary events.

Possible Event in London

Richard Cox, a great-great-grandson of William Cox has offered to try to organise some celebrations in England in May 2013.

2013 William Cox Festival

Nepean Historical Society will be holding their usual William Cox Festival at the Arms of Australia Inn, Emu Plains in July 2013.

Mount York re-enactment

Marcia Osterberg-Olsen has advised that Mt Victoria & District Historical Society had planned a parade of descendants from the beginning of Mount York Road out to Mount York, a re-enactment of the parade organised by Jean Arthur 25 years ago. There will also be horse-drawn vehicles.

The parade is being planned for May 26, which would co-incide with the 'Great Train Weekend', but organisers are now looking at May 28, to coincide with the main commemorative event.

Parramatta and District Historical Society

Parramatta & District Historical Society, has advised the society holds an event at Hambledon Cottage, Parramatta every year in September for History Week, with school children from the district role-playing historic events and people.

For the Crossings bicentenary next year, the society will be focusing on Blaxland, Lawson and Wentworth and the crossing of the Blue Mountains

Crossing! Play

Wendy Blaxland advised that a website had been set up to give publicity about the play: www.Blaxlandanddaughter.com. The names of the convicts who travelled with the three explorers are still unknown, as are the names of the Indigenous people.

For more information about Western Crossing events contact: www.bluemountains crossings.com.au

Stolen artefacts back in Afghanistan

HUNDREDS of looted treasures have been returned to Afghanistan with the help of the British Museum, British police and border forces.

The haul is just a fraction of what has been stolen from Afghanistan's national museum and rich archaeological sites in recent decades.

"The pieces, and their enormous range, bear testament to the incredibly rich cultural history of Afghanistan," said, Colin Crokin, Britain's consul-general in Afghanistan, at the hand over ceremony recently for the 83 meticulously catalogued items.

"In a sense, they are symbols of Afghanistan's struggle for national unity and peace - scattered by the civil war, recovered and now passed back to their own people for safekeeping."

Among the important recovered artefacts is a second century schist Buddha, which now gazes down from a niche on the museum's main stairwell, despite a 20-year odyssey to other corners of Asia.

The statue was part of the museum's collection but disappeared in the early 1990s, when the building was on the frontline between warring factions, which repeatedly raided its storerooms.

The Buddha ended up with a Japanese collector, who refused to return it and could not be legally compelled to do so, even though it had been looted.

But an anonymous British dealer stepped in, spending hundreds of thousands of pounds to buy for the museum.

"It is very important for us to get these artefacts back because they are part of cultural heritage and history," said Afghanistan's deputy culture minister Sayed Masaddeq Khalili.

About 9000 looted artefacts have been returned from other countries since 2009. Guardian News & Media

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: j.koperberg@bigpond.com or bmacho.heritage@gmail.com
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.
BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."
The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations. One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.
Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains, Lithgow and Oberon Tourism Limited, Blue Mountains World Heritage Institute, Cudgegong Museums Group Inc., Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Hartley Valley District Progress Association, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committee, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low OAM, Ian Milliss, Patsy Moppett, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.
COMMITTEE The committee for 2012-13 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Judy Barham, Joan Kent, Doug Knowles, John Leary, Dick Morony (public officer), and Scott Pollock.

DISCLAIMER Views and opinions expressed in ***HERITAGE*** originate from many sources and contributors. Every effort is taken to ensure accuracy of material. Content does not necessarily represent or reflect the views and opinions of BMACHO, its committee or members. If errors are found feedback is most welcome.

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

NOVEMBER - DECEMBER 2012 ISSUE No. 24

Heritage of mountain villages sacrificed for highway progress

MANY older residents of the Blue Mountains are lamenting the continual erosion of the unique character of the villages that developed along the Great Western Highway in the last 150 years.

The heritage landscape has been swallowed up as the ribbon of highway under construction for several decades presses on to the west. It is only the historians and those long-time residents of the mountains who can recall the unique character which was once the Blue Mountains

Pictured at right are Joseph (left) and Florence (centre) Taggett outside their wood carrier and saw bench business in Hazelbrook, circa. early 1920s.

Born in Somerset in about 1881, Joseph migrated in 1911, served as a dispatch runner in World War I and purchased his home, 'Oakura' in Woodford in June 1920. The second location of his woodcutting business was near the present Hazelbrook service station where this photograph seems to have been taken.

In a small mountains economy, survival meant multi-skilling, so woodcutting, construction of the dam wall at Hazelbrook in 1928 and general building were amongst his accomplishments.

When working as a garage attendant, this immensely strong man would as a joke lift a car's back wheels off the ground as patrons were starting their cars.

Public spirited, in 1923 Joseph was elected a lieutenant of the newly-formed Woodford Bushfire Brigade.

He died in 1939, the wood site being then sold to become a service station. ***Photograph --- Ken Goodlet collection***

BMACHO History conference success

THE BLUE Mountains History conference 2012 held in the heritage Carrington Hotel, Katoomba was by all measures an outstanding success.

Organised by the Blue Mountains Association of Cultural Heritage Organisations Inc. (BMACHO) the conference was attended by almost 100 participants.

BMACHO president, Pamela Smith reminded those present that BMACHO had been formed as a result of a suggestion by Professor Barrie Reynolds at an earlier conference at the Carrington and it was most appropriate that the organisation's first conference be held at this venue.

Attendees were exposed to a smorgasbord of speakers the conference opening address being given by former long-time president of the Royal Australian Historical Society, Associate Professor R Ian Jack.

In his address titled *Colonial society and beyond* (which is published in full on pages 4-7 of this edition of *HERITAGE*), Ian said "…a conference like this is another, necessary, dimension to BMACHO's activities, because it brings together more than 100 like-minded people to listen to papers, to meet other historians and, most of all, simply to talk during the all-important periods of tea and lunch.

"The real action takes place in the Carrington's dining-room. This has been happening in this great hotel ever since 1883 although the context has perhaps shifted over the years: I hope that the deals done today will be less dodgy than some of those in the past," Ian said.

An opinion from the editor.....

Heritage appears to go missing from proposed NSW planning reforms

THE NSW state government is proposing legislation to remove the rights of individuals under the guise of streamlining the planning process.

What that means is making it easier to get developments approved by removing community consultation from the approval process.

The proposed legislation which has been outlined in a government green paper, A *New Planning System for NSW* will remove the right of communities to have a say in development proposals and planning matters directly affecting their lives. It will also diminish the role of elected councillors.

It will permit 'Enterprise Zones' with no planning controls to be imposed over entire suburbs or local government areas. It will not protect the environment or the heritage.

For years it has been accepted that the role of planning is to balance the needs of the community and the environment with those of the private interests of developers.

Now the government is proposing to enact a planning system that puts the developers' needs and interests above those of the community and the environment.

The O'Farrell government came to power with a promise to return planning powers to the community but it is clear the reform processes have been captured by the same interests that gave us the notorious Part 3A under the previous government.

Local heritage consultant architect Margi Fallon has produced a timely article which appears on page 14 of *HERITAGE* and her views and recommended actions are extremely pertinent.

Ms Fallon in her artcile states: "...over the past 10 years the heritage branch has been decimated by the removal of staff to the planning department and then the separation of the heritage branch from the planning department.

"Their statutory status has been greatly reduced, and staffing has reduced their capacity to train and support the heritage protection industry."

The winding back of the status of the heritage branch has been of concern to heritage groups for sometime and to see further degeneration of this authority was not what was expected from the promises made by the O'Farrell government when in opposition.

The public should voice their concern in letters to local state members, Premier Barry O'Farrell and Planning Minister Brad Hazzard even though the closing date for official submissions has passed.

Margi Fallon's article is recommended as required reading for all interested in the preservation of our heritage and the retention of individual's rights to have a say on planning matters directly affecting their lives.

CONGRATULATIONS

IT IS always good to be able to congratulate someone who receives an award for excellence and on this occasion as editor of *HERITAGE,* I applaud the efforts of BMACHO individual member Ian Milliss and his associate Dr Lucas Ihlein who have won the Fremantle Arts Centre Print Award regarded as Australia's most prestigious award.

Primarily it is an award for art, but the subject of the collaborative work, *Yeoman's Project* (see page 11 brings a new dimension to the pursuits of BMACHO; it introduces through commercial graphics the history and heritage of agriculture and of topographical mapping.

It must be of interest that a farming system on the property Nevallan at nearby North Richmond is being considered for state heritage listing.

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

CENTENARY OF LOCOMOTIVE DEPOT

VALLEY HEIGHTS locomotive depot will celebrate its centenary in 2014.

In 1988, the Valley Heights Locomotive Depot was closed after 75 years of faithful railway service.

The locomotive depot proudly stands today housing a local heritage museum, thanks to the efforts of local volunteers over the course of last 24 years.

Now in its 99th year, planning is well underway to celebrate its 100th anniversary, a milestone that was doubtful back in 1988.

Some of the proposed events planned include:
*an official opening for the celebrations with a special train;
*visits by steam locomotives
local steam shuttles
*themed days for historical societies.

These plans albeit in its early stages, are very much subject to financial support from the community and are subject to change. Committee member of the museum, Andrew Tester said, it would be great if members of BMACHO could support these celebrations, the details of which will be published in the pages of *HERITAGE* during 2013.

At the inaugural Trains, Trams and T's event at the Valley Heights Loco Depot Heritage Museum early this year, museum volunteers, tram crews and visitors came dressed for the occasion. The event was held to showcase transport in the 1920s. Photograph Andrew Tester

Colonial past and public history

THE KEYNOTE speaker, at last month's Blue Mountains History conference was Professor Paul Ashton (pictured below) who took as his topic *Colonial past and public history*.

"Public history can be broadly defined, as Paula Hamilton and I have defined it, 'as a diverse set of practices that communicate and engage with historical meanings in public arenas'.

"As the British-based historian Ludmilla Jordanova reminds us in her wonderful book *History in Practice*, 'we should remember that the state, which in many countries plays a major role in funding institutions such as archives and museums, lies at the heart of public history.'

"Public history also concerns memory. There are numerous ways in which memories are constructed, reproduced and circulated. Nancy Woods' book *Vectors of Memory: Legacies of Memory in Post War Europe* (Berg 1999) investigates conduits of memorial activity in the twentieth century.

"But we can apply this concept of vectors of memory to public history in colonial times.

"Take maps for example. These documents were not simply finding aids.

"They were often comprehensive recordings of places, circulating in cultures in different ways and reinforcing a sense of place in the public imagining.

"They showed patterns of development and often the dynamics underpinning change and growth.

"Value systems can also be read in maps. Monuments and memorials, public landscapes, processions, rituals of 'social integration', art galleries, museums and official histories also became vectors of memory.

"They became part of a process described in the second half of the twentieth century by Donald Horne as 'the great drama, endlessly playing... of maintaining definitions of the nation and its social orders'.

"During the nineteenth century and beyond, however, this great drama was ultimately an imperial, masculine narrative." Professor Ashton said.

Paul is the co-director of the Australian Centre for Public History and the Centre for Creative Practice and Cultural Economy & Professor of Public History at the University of Technology, Sydney.

Colonial society and beyond

THE following is the text of an address by Associate Professor Ian Jack who officially opened the Blue Mountains History conference organised by the Blue Mountains Association of Cultural Organisations on October 20.

'It is a great pleasure to make some introductory remarks at this conference.

The Blue Mountains Association of Cultural Heritage Organisations is delighted that so many folk interested in the history and heritage of the mountains have found their way to Katoomba today.

BMACHO is still a very young society beside the Springwood Historical Society, the Blue Mountains Historical Society at Wentworth Falls, the Mount Victoria Historical Society and the Mount Wilson and Mount Irvine Historical Society.

But thanks to John Leary, Jan Koperberg, Pamela Smith and co-founders, Barrie Reynolds and Peter Stanbury, BMACHO has achieved a great deal in its overview role within the historical community beyond the Monocline, through John Leary's splendid *HERITAGE* newsletter, Peter Rickwood's thoroughly refereed *Blue Mountains History Journal* or the occasional general meetings organised at various venues.

And it has tried to obtain state and commonwealth funding to enhance public understanding of the area: not least, in 2006, it combined with the National Trust to seek real money, seven figures of money, to 'Rediscover our Heritage in the Blue Mountains'.

That has not happened but a helpful relationship with Telstra has funded a series of appropriate workshops this year. A lot of mountain water has passed under the BMACHO bridge over the last few years.

But a conference like this is another, necessary, dimension to BMACHO's activities, because it brings together more than 100 like-minded people to listen to papers, to meet other historians and, most of all, simply to talk during the all-important periods of tea and lunch.

The real action takes place in the Carrington's dining-room. This has been happening in this great hotel ever since 1883 although the context has perhaps shifted over the years: I hope that the deals done today will be less dodgy than some of those in the past.

The Carrington is very strategically sited. Katoomba is a natural place to foregather.

Ever since the railway penetrated the mountains a century and a half ago, Europeans have been tempted to come on up here; an affordable touristic pilgrimage and Katoomba-Leura soon developed a remarkable concentration of guest-houses, over a hundred in their heyday.

Grand dining room of Katoomba's Carrington Hotel

Associate Professor Ian Jack

If we had held this conference a hundred years ago, each of you could have stayed in a separate guesthouse tonight.

But to congregate in the vicinity of Katoomba is not just a European phenomenon at all. This has always been a place of meetings.

We may call our function today a conference, for that is the fashionable term with overtones of tax-deductibility, but in reality we are just continuing an age-old tradition of meeting in the Mountains.

The Mountain plateau had been for millennia an area where Aboriginal people from different language groups, Darug, Gundungarra, Wiradjuri, had met, long before the Weatherboard Inn was dispensing dubious hospitality, long before Katoomba Street and Lurline Street were lined with accommodation houses, and before the Three Sisters took on a Europeanised mythology created by Mel Ward in 1949.

As Martin Thomas reminded us in his marvellous book, *The Artificial Horizon*: *Imagining the Blue Mountains*, the legend of the Three Sisters as articulated by Ward and his successors is in fact 'an especially revealing text in the dreamwork of imperialism…, a fragment from an extensive mythological order, emerging from a region … which always, it seems, has been a privileged place for marvel and speculation' (p.155).

So we are here like others before us over the last 30,000 or 40,000 years, to marvel and speculate.

Continued on page 5

‘Like a handshake across the centuries’

Continued from page 4 To see the mountains as a barrier was a very European construct. At first the Mountains seemed a handy prison wall to the west of the Cumberland Plain’s distributed penal station.

In a quite different way, to Aboriginal people the Blue Mountains were a self-evident demarcator, where various language groups had a fluid boundary, but that said, the Mountains were not so much a divider as a meeting-place.

The name, the Great Dividing Range, is profoundly revealing of one type of European outlook.

There was another, simultaneous outlook, however, for the name ‘Great Dividing Range’ is the antithesis of the romance and gum-laden exhalation of the term ‘Blue Mountains’.

But for the folk who had been enjoying the area for many millennia, the Wiradjuri, the Gundungurra and the Darug people, the Mountains were not a divide at all, but a natural point of contact.

The mountains lay on the periphery of several indigenous language groups and trade routes inevitably led across the plateau.

Father Eugene Stockton, the much-loved priestly archaeologist of Lawson, recalled how he came to Aboriginal studies in the Mountains.

Twenty years ago, in his influential book, *Blue Mountains Dreaming*, he told how ‘As a teenager I began to find stones which did not belong to the geology of the area.’ (p.5)

Australian Aboriginal flaked stone tools. Image courtesy NSW Office of Environment and Heritage

These stones are the physical evidence of Aboriginal trade routes and habits of exchange. Eugene went on to coin a very telling phrase.‘Holding a stone tool in my hand [he wrote] I wondered at the last hand to grasp it: it was like a handshake across the centuries.’ (p.5)

‘A handshake across the centuries’. I do wish that I had thought of that phrase, for it is a warm and friendly evocation of how historians should respond to any physical evidence of any human activity, of any period.

We should all be shaking hands across the centuries in response to all the variety of cultural heritage which surrounds us. It is an essential part of historical discourse.

And it helps to remind us that there is no wilderness. The Blue Mountains National Park which is all around us here was given World Heritage status because of its natural qualities.

But there is no part of the World Heritage area which has remained untrodden by human beings over many millennia.

Even in the remotest gorges of the Wollangambe, where the Wollemi Pine was found with such fanfare, even there you find Aboriginal art-sites.

Here at Katoomba, Jamison Valley is not just a wonderful environment: it is still a place full of relics of European coal-miners and oil-shale workers, relics which the Hammon family has skilfully used to enhance the cultural value of a trip on the Scenic Railway.

And over the last century and a half, thousands of steps have been cut into the living rock-faces at the edge of this plateau some for miners but more for tourists.

All these Mountain features, and hundreds more like them, have been created or modified by people over tens of thousands of years.

This is not just a miracle of nature: it is nature moderated by men and women.

So there are many, many hands which we should all wish to grasp, wherever we go in the Mountains and whatever historical curiosity we may happen to have.

Aboriginal hand stencils in the Red Hand Cave near Glenbrook

All sorts of things may excite our curiosity: an ochred hand, or a powder-magazine beside a convict road, or an elegant stone culvert, or remnant plantings on an abandoned country retreat, or, one of my favourites, a mine-adit cut horizontally into the talus from a narrow ledge where lyre-birds display and the archaeologists try not to lose their tools or their colleagues down the 300-metre drop into the Grose Valley.

All this suggests that there is no neat chronological divide.

Long before Lawson, Wentworth and Blaxland, there was widespread Aboriginal knowledge of how to attain the table-top from the plains and valleys on all sides, not just from the coastal plain, but also from the north and south and west.

There was detailed information about how to cross the climactic landscape of the table-top without falling down a precipice or leaping down a waterfall like the mythologically transformed Mr Govett.

For everyone on the mountains, indigenous or European, travel in the region was at bottom a ‘negotiation with the perpendicular’, in Martin Thomas’s quizzical phrase.

But for the indigenous people it was country like any other, and the mountains with their abysses had their fair share of Dreamtime stories of ancestral creation, skilfully interpreted in the past two decades by Jim Smith.

Continued page 6

Continued from page 5

To the Europeans the Mountains were for a long time an infernal nuisance full of 'impassable chasms' , with the plateau an arid and unattractive area to hurry across to get to the other side.

It was only gradually in the nineteenth century that the mystique of the Sublime gathered force and, as Kate Hartig felicitously observed: 'the aesthetic appraisal of the mountain landscape was cloaked in a romantic image and was expressed by sentiments of exaltation and delight.'

The grand concept of the Sublime in the nineteenth century fostered an appreciation of the savagely scenic.

In Europe, the Alps ceased to be a confounded nuisance for travellers to surmount and became instead somewhere to walk, to climb, to sketch, to admire. It is one aspect of the invention of the holiday.

Once it was known in the 1810s that there was another side to the Blue Mountains, leading to promising plains for European animals to graze and erode, the stretch from Glenbrook to Mount Victoria was seen primarily as a hazardous intermission between the good grazing on the Cumberland Plain and the next accessible patch in Hartley Vale.

And in that intermission there was precious little for animals or people to eat or drink. This perception took half a century to moderate. The Mountains road was still 'dreary and desolate' to Louisa Meredith in 1839.

What happened in the Blue Mountains, as elsewhere in the course of the nineteenth century, is a very European realisation that, while a road may very well have been constructed to lead from A to B and that one ventured on that road at A with the sole wish to reach B as safely and expeditiously as possible, nonetheless there may be pleasures to be found along the way of which one had not dreamt.

It is not quite the world where 'It is better to travel hopefully than to arrive', but it is a world where new possibilities and new realisations were gradually opened up.

The gardens at Nooroo, Mt Wilson - the summerhouse framed by wisteria, maples and rhododendrons

So mountain retreats sprang up, often in spectacular situations, like Yester Grange at Wentworth Falls or Eurama at Faulconbridge, cool places for the well-to-do to escape the discomfort of summer weather in Sydney or Newcastle.

Two became recognisable hill stations in the pattern of the Indian raj: these were Mount Wilson and Kurrajong Heights.

And country retreats and hill stations called for gardens, like those which Silas Clifford-Smith will be talking about this morning. And this is true not only of the hill-stations; it is equally true of the later gardens, symbolised in the twentieth century by the work of Paul Sorensen, that ambivalent icon.

Many of these gardens, and their successors, are now on display every year as part of such things as the Leura Festival. They are no less manicured and have created no less ruthless clearings of the environment within throwing distance of the World Heritage park.

That does not mean that I do not admire them nor that I do not recommend many of them for heritage listing, often at a state-wide level of significance.

But there is a tight-rope to walk when weighing up just what has been the impact of some of these gardens on the heritage values of the Mountains.

...the irony of classic gardens which we love so much at Mt Wilson...

It always strike me as an irony that the classic gardens which we all love so much at Mount Wilson are in fact exotic importations created by the deliberate destruction of the rich natural vegetation of the basalt cap, with its rain-forest and tree-fern under-storey.

The character of Mount Wilson is complex, just as its Indian counterpart, Simla, is complex, for reasons both similar and dissimilar. Neither has a simple, uncomplicated relationship between the original environment and the modified.

And because each has a seasonal occupation by the wealthy professional folk who need to escape hot and humid cities, each has also a different sort of permanent resident, those who take care of the estates and form their own very different community throughout the year.

Continued from page 6
There is an analogue in the service-providers, living all the year round in the towns and villages which grew up along the railway line from the 1870s onwards.

The mountains are gearing up, however, in 2012, not for a celebration of the Sublime, nor of the long-term impact of mass tourism, but for a full-blooded dedication to European events of two hundred years ago.

This conference is a forerunner to an extraordinary three years of events designed to examine afresh the European crossing of the Mountains in stages through 1813, 1814 and 1815.

A Western Crossing Committee, formed by the Royal Australian Historical Society and strongly supported by BMACHO, has been instrumental in bringing together a wide variety of societies, groups and local council agencies from Penrith and Richmond and Kurrajong in the east through all the villages and towns along the Great Western Highway and Bells Line of Road right out to Bathurst in the west, so that there is a common sharing of information about all the multifarious activities which are planned.

The commonality of interest among the local government areas of Hawkesbury, Penrith, Blue Mountains, Lithgow, Oberon and Bathurst has never been so clearly articulated and has produced significant by-products such as the linking of the tourist bodies in Blue Mountains City, Lithgow City and Oberon Shire.

No less than the Three Sisters, the Western Crossing has acquired its own mythology. This is neatly enshrined in a tangible shrine here in Katoomba, the so-called Explorers' Tree, which, as Siobhan Lavelle has so deftly demonstrated, has a remarkable amount to say about almost everything in the last 200 years, from the Dauntless Three, through Evans the surveyor and Cox the entrepreneur, through the convicts who constructed and maintained the changing lines of the western road, to the tourist revolution and its corollary, the service providers, and ultimately the dormitory suburb.

If you have not yet read Siobhan's article in the *Journal of the Royal Australian Historical Society in 2003* entitled 'A Tree and a Legend: the making of past and place in the Blue Mountains', you should do so, for it fully lives up to Siobhan's claim that:

> The Explorers' Tree provides an historic case study of interest in its demonstration of place creation, recognition and acceptance, and also the role of place as marker of national and local identity.

The Explorers Tree, Katoomba ca 1875. Charles Bayliss National Library of Australia vn4192094

And place is so essential a part of Mountain studies.

Siobhan successfully shows how different observers over 150 years have had widely divergent reactions to the legendary tree, indeed making a rather ordinary *eucalyptus oreades* into a legendary tree. And these contrasting views among observers have a certain equation with whether the observer is a local or not.

These are big questions which should resonate on sites other than the Explorers' Tree: they have certainly been resonating recently in yet another reappraisal of the alleged convict graves situated just above the Explorers' Tree on Pulpit Hill: we are now down to only one, but that is the earliest convict grave on the Mountains, described by French explorers in the 1820s and probably on the site located recently by ground-penetrating radar.

There are so many topics, great and small, which still have the capacity to provide fodder for conferences and symposia held here in the Mountains. Today the organisers have brought together a cross-section of interests. The early colonial period bookends the talks, with a Professor of Public History, Paul Ashton, at one end and Glynis Jones, a curator of textiles and clothing at the other.

Gardens get their due in a nineteenth-century context wider than the Mountains from Silas Clifford-Smith, well-known hereabouts for his work in the gardens at the Norman Lindsay gallery.

The mountains have also had a significant role in literary inspiration. John Low, who was inspirational in earlier conferences here at the Carrington, was for many years the local studies librarian at Springwood. One of his significant achievements there was the accumulation of a first-rate collection of literary works of fiction relating in some way to the mountains.

The shelves of these hard-to-find novels caught my eye the first time I browsed in John's domain at Springwood and the collection deserves more recognition, particularly because of the renewed success of the writers' centre at Eleanor Dark's old home of Varuna, here in Katoomba.

So it was a happy inspiration to invite Jill Roe to come and distil from her comprehensive knowledge of Miles Franklin a paper on Miles's Mountain Mates. And we close one phase of the proceedings with a closer look at our surroundings here in the Carrington conducted by the in-house historian, Paul Innes.

Mudgee Colonial Inn Museum a part of the town's heritage

by John Broadley --- president Mudgee Historical Society

THERE are few historical societies in Australia which can claim to ownership of part of a town's rich heritage.

The site of the Colonial Inn Museum, headquarters of the Mudgee Historical Society, is situated on part of one of Mudgee's most historic land grants: Portion 181 of the Parish of Mudgee in the County of Wellington, a crown grant of 995 acres which was registered in 1835 to Mudgee pioneer, George Cox.

Although the site contains numerous buildings from various periods, the main museum building dates from the mid 1850s and is one of Mudgee's oldest.

George Cox and his younger brother Henry, sons of noted Hawkesbury settler and Blue Mountains road builder, William Cox, were pioneer settlers of Mudgee, establishing runs at Mudgee in February 1822.

They gradually accrued extensive landholdings on the southern banks of the Cudgegong River which flows through the Mudgee valley, while Blue Mountains explorer Lieutenant William Lawson occupied the northern bank.

These three men were soon joined by Richard Rouse senior of Windsor, Robert Lowe of Bringelly and William Bowman of Windsor as pioneer settlers of the Mudgee district.

All were, however, largely absentee landowners, leaving their Mudgee lands in the charge of convict overseers until the next generation came of age.

As a result of the discovery of gold in 1851 at Louisa Creek, now Hargraves, near Mudgee, the population of the district increased dramatically, and the sleepy backwater village of Mudgee became a service centre for the surrounding goldfields.

A recent photograph of the Colonial Inn Museum

Industry developed – breweries, tanneries, foundries, flour mills - while many shops and hotels were built; remarkably, many buildings from this era remain, although most have undergone transformations.

From the early 1850s George Cox began to subdivide the south-eastern corner of Portion 181 which adjoined the western boundary of the town of Mudgee which had been proclaimed in 1838.

These subdivisions varied in size, but mostly comprised a few acres and were located along, or close to, Market Lane, the north-western entry to the town.

This area rapidly became a busy industrial and commercial centre to service the passing hordes on their way to and from the gold fields. Numerous shops, a soap factory, a foundry, a flour mill, wheelwrights and coach factories sprang up in the vicinity.

Several hotels were erected during the 1850s between the bend in what is now known as Market Street west and the site of Radio 2MG on Mudgee's north-western outskirts.

In 1853 George Cox sold a parcel of 8 acres of his grant to John Brooks for £5. This was a narrow portion of land on the northern side of Market Lane immediately adjacent to the town boundary and ran down to the Cudgegong River.

By 1856 John Brooks had constructed the existing building – in brick, two-storeyed, with a narrow cantilevered balcony on the front facade and two rear service wings - whose design suggests that it was intended for use as licensed premises.

The building was decidedly grander than many of the inns and hotels of the period outside of the town boundary.

On the ground floor the building's two front doors accessed the public bar on the right and the ladies' saloon or parlour on the left.

Segregated service of alcohol remained the norm until well into the twentieth century.

In 1857 John Brooks sold the property to George McQuiggan, who operated a hotel on the premises until 1861.

George McQuiggan was a prominent businessman with an extensive real estate portfolio in the burgeoning town.

Continued page 9

Continued from page 8
From 1861 to 1864 the building was leased to the Mudgee firm of Dickson & Burrows who operated a store on the premises.

From 1865 until 1923 the West End Hotel operated from the premises by numerous licensees under a variety of owners; in those days the licensee was not always necessarily the owner.

George McQuiggan died in 1874 and in 1880 his trustees conveyed the property to Thomas Wilton who in turn died in 1894.

In 1896 his executor and the executor of his daughter, Annie Hollis, who had died in 1895, conveyed the property to Joseph Mulley who had been licensee since 1890.

Joseph Mulley remained licensee until his death in 1903, when his widow Sarah took over the licence.

...not unusual for women to be licensees...

It was not unusual for women to be licensees, as there had been several female licensees in Mudgee during the 1800s; in fact, Sarah was the second female licensee of the West End Hotel, as Mrs James Dwane had been licensee from 1875 to 1877, succeeding her husband who had been licensee from 1871 to 1875.

In 1905 Sarah Mulley sold the property to Albert Gentle who held the licence until 1923 when the West End Hotel and numerous other hotels in the town and district were delicensed.

The building remained the Gentles' private residence until its sale to Rose Bowen in 1927, when it became a boarding house/flats; it was also reputedly used as "lying-in accommodation" for women from isolated areas awaiting birth.

In 1935, during the Great Depression, the mortgagee sold the property to Wilfred Roth, farmer of Bombira, Mudgee, and his wife, Alice Hazel Roth.

The West End Hotel circa 1880s

The Roths only held the property briefly, on selling in 1937 to Gibson Harland, farmer of Gilgandra, and his wife, Phoebe.

The Harlands retained the property until the late 1950s, by which time they had retired to Mudgee.

In 1958 they sold to Joyce Helena Cole, servicewoman, who in turn sold the property in 1966 to the Mudgee Historical Society for use as its headquarters and as a museum.

The Mudgee Historical Society had been formed in 1964 as an initiative of the Mudgee Rotary Club and originally occupied a few rooms in the recently-delicensed premises of the Post Office Hotel which was adapted for commercial and residential use.

In the early days of the Mudgee Historical Society many items were generously donated for exhibition and the museum quickly outgrew its limited space. Thus a search began to find suitable premises for a museum.

The society trustees selected four historic premises, but ultimately decided upon the former West End Hotel as being in the best condition and offering scope for expansion. Renamed the Colonial Inn Museum, the building remains to this day the offices of the Mudgee Historical Society Inc and is the core of its museum displays.

Remarkably, the old hotel building has undergone few changes since it was built circa 1856.

The original cantilevered balcony was replaced by a deep two-storeyed verandah in the late 1800s; the ironwork – verandah railing, posts and pillars bear the mark of Mudgee's Hansen foundry which started in the early 1880s in premises nearby.

Windows and doors are original and the floors and the majority of the lath and plaster ceilings are intact. The odd internal door and window have been inserted, moved or sealed and the occasional partition wall upstairs has been inserted or realigned.

Rooms had been added to the rear of the wings at various stages, and the previously-open space between the wings has been roofed over.

The building has adapted well to use as a museum. Its thick exterior walls mean that the building's interior has a relatively standard temperature all year round, ideal for the preservation of delicate items.

Several theme display rooms have been installed in rooms which originally served a particular function during its hotel period.

The entry is the original bar and it is set up as such, while the original parlour is accurately set up as a late nineteenth century parlour.

The hotel kitchen remains a late 19th/early 20th century kitchen, and this room in particular evokes many comments from visitors: "It's just like my Nanna's kitchen!"
Continued page 10

A “gozunder” that fascinated school children

Continued from page 9

Upstairs, one of the hotel bedrooms is furnished as a typical Victorian bedroom, along with a commode chair and a “gozunder” (these fascinate school children), while the long room at the front upstairs, which opens onto the verandah and which was used for dinners, meetings and dances, contains the original Mudgee Municipal mayoral desk and chair and councillors’ table and chairs; the long room also houses war memorabilia and a chemist display.

Other theme rooms within the original hotel building are a men’s room, a women’s room, a children’s room, “kept for best” room, handicraft room, and a room featuring early cameras and record players.

When the society bought the property it had been considerably reduced in size and all the old outbuildings – stables, outhouses, sheds – had been demolished.

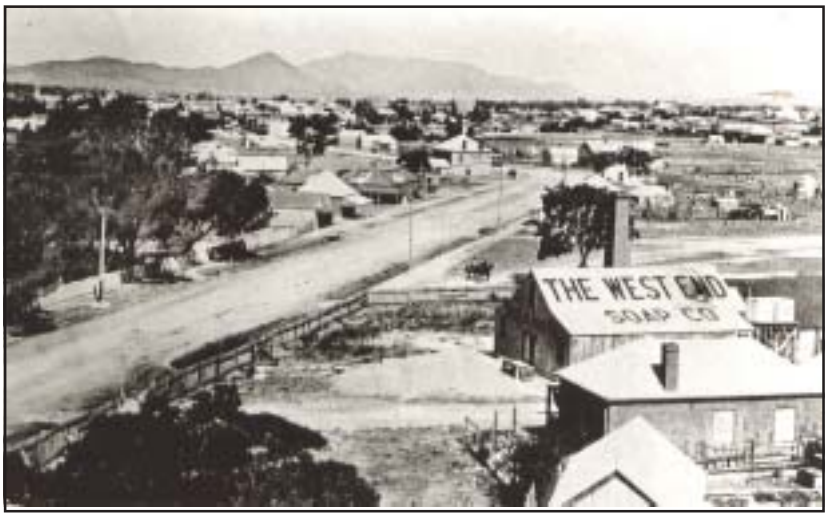
Since then an adjoining block of land was purchased and a variety of buildings, all sympathetic in design and materials, have been erected or transported to the site.

These structures include a combined meeting room, kitchen and toilet block; a recreation of a vertical slab hip roofed cottage; a large gabled storage/display shed with skillions; and extensive skillion machinery and vehicle display sheds.

In 1996 a gabled, corrugated iron-clad former church was re-located to the site from South Mudgee for use as display space, especially to house the museum’s sizeable costumed doll collection; originally built in 1906 at Lue, a village to the south-east of Mudgee, the church had been previously moved in the 1930s into Mudgee.

More recently, a brand new curator’s storage and work shed and a blacksmith shop have been completed, the latter made solely from recycled material.

The Colonial Inn Museum and its grounds contain an enormous collection of 19th and early 20th century Australiana: domestic implements, furniture, agricultural machinery, tools, horse-drawn vehicles and cars, and also holds substantial photographic and archival documents collections.



A panorama of the west of Mudgee township in the late 1800s showing the West End soap factory in the foreground and at the top centre West End Hotel to the left of the bend in the unsealed road. Image courtesy Mudgee Historical Society Inc

It is open seven days a week and is used extensively by local schools as an educational resource, and as a community meeting place for a number of organisations.

It is also a welcoming place for visits from local nursing homes, and for the last four years the Mudgee Historical Society Inc has hosted a courtesy morning tea for local senior citizens during National Seniors’ Week.

The Mudgee Historical Society Inc is solely a volunteer organisation which wholly owns its site and buildings and relies on the hard work of its volunteers and the generosity and support of its membership and the community to survive.

It is especially appreciative of the constant support of the Mid-Western Regional Council and its predecessor, the Mudgee Shire Council.

The Mudgee Historical Society Inc looks forward to celebrating the Golden anniversary of its establishment in 2014 and of its existence on site in 2016.

A Moment in Time exhibition at Hartley

AN IMAGES exhibition titled *a Moment in Time* will be conducted by Hartley District Progress Association in June 2013.

The exhibition will be staged in the Hartley historic site for two weeks either side of the Queens Birthday weekend.

A yet to be named Fair Day on June 1 has been diarised by the Governor of NSW and festivities on that day will run from 10am to 4pm.

There will be guided walks along the Cox’s Road in May and June.

These walks will vary in length and difficulty, limited to manageable numbers and only on sections of the original road where landholder’s permission can be obtained.

Hartley District Progress Association has a history conference scheduled for June 8, 2013.

Heritage farming project wins prestigious print award

IAN MILLISS pictured, an individual member of BMACHO and his associate Lucas Ihlein have recently been awarded the prestigious Fremantle Arts Centre Print Award, for their collaborative work *Yeoman's Project.*

Through a series of five prints, the art work explores the influence of Percival Alfred Yeomans, an Australian farmer and engineer whose research into sustainable agriculture continues to attract international acclaim.

Known best for his invention of the "Keyline System", Yeomans' enhancements to the practices of land cultivation won him the Prince Phillip Design Award in 1974.

Ian and Ihlein have been awarded the $15,000 acquisitional prize, and Yeomans Project will become part of the City of Fremantle's permanent art collection.

The judges said of the winning entry, 'In a tight layering of concept and research and through the process of offset lithography, the series references land art, commercial graphics, agricultural advertising and the history of topographical mapping.

The award has special local significance as Yobarnie and Nevallan at North Richmond are the two properties where Yeomans developed and refined his ideas.

Nevallan is still intact and currently under consideration for state heritage listing. Yobarnie has already been partly subdivided; dams destroyed and built on although large parts still remain intact.

by Ian Milliss

If you look to the south when driving up the Kurrajong Road from North Richmond just before you reach Kurmond you will overlook a farm with regular rows of tree belts and dams circling the hills.

This is the distinctive image of Nevallan, one of the first properties of the Australian agricultural innovator PA Yeomans.

Percival Alfred Yeomans (1904 - 1984) was an Australian inventor known for his "Keyline System" of farm design and management.

Beginning as a novice farmer shortly after World War 2, Yeomans applied his engineering and mining training to the degraded hillside land outside Richmond that he took over when his brother-in-law who was managing the family owned property died in a bushfire.

He successfully combined water retention techniques and tilling patterns into an innovative form of organic farming designed to renew the eroded farmland by rapidly regenerating topsoil.

Keyline farming focuses on water flow patterns. The layout of farm dams, irrigation areas, roads, fences, farm buildings, tree lines and water storage are all structured to maximise retention and repeated recapture of run-off water on the farm.

Once rainfall water is captured it is used for irrigation but its flow is controlled by a particular pattern of tilling based on the "keyline" which maximises absorption and pasture growth, effectively spreading the irregular rainfall patterns so common to Australia.

Yeomans' approach directly opposed the conventional wisdom of the time.

Collecting and storing large quantities of run off water on the farm itself for subsequent irrigation was virtually unheard of and was opposed by government soil conservation departments whose priority then (and still now to some extent) was encouraging rapid runoff into watercourses where the water is later resold down river to intensive irrigators.

His advocacy of tyned tillage equipment and a unique cultivation pattern to solve the ravages of erosion and increase soil fertility also conflicted with the simplistic approach of the agricultural chemical industry.

Yeomans later extended his analysis to urban landscape design as well.

Continued Page 12

Part of the Nevallan property at North Richmond

He argued that there is a local and global problem of mismanagement of both rain water and human effluent caused by poor landscape design.

...a "City Forest" scheme to process the nutrients of human waste...

He proposed a "City Forest" scheme to process the nutrients of human waste and slow rainwater flow, arguing that forests should be deliberately designed and grown as an intrinsic part of cities, a radical extension of his techniques for working on farmland.

Yeomans also designed and manufactured his own specialised ploughs and tynes, receiving The Prince Philip Design Award in 1974.

Yeomans' ploughs work the subsoil by lifting the pasture surface and breaking up root systems without overturning the sod.

The deep surface furrows direct water into the subsoil, encouraging renewed root growth and making the ploughs particularly effective in regenerating degraded pasture.

Yeomans was energetically devoted to promoting his ideas through his several books, extensive education programs and field days.

From the 1950s onward his techniques were taken up by many farmers throughout Australia and ultimately worldwide.

In the 1970s they led to the development of the permaculture movement and also influenced other farming techniques such as the low tillage movement.

One of the 5 winning prints

Yobarnie and Nevallan at North Richmond are the two properties where Yeomans developed and refined his ideas.

Unfortunately it has been difficult to get any recognition of the heritage significance of these properties, among the most historically important farming landscapes in the country particularly given the current focus on sustainable farming.

The properties were sold after Yeomans' death and continued to operate for many years as dairy farms.

One of Yeomans' ploughs

Nevallan is still intact and currently under consideration for state heritage listing. Yobarnie has already been partly subdivided; dams destroyed and built on although large parts still remain intact.

But that is Yeomans' work. Our investigation is itself now a part of art history.

In the early 1970s I worked with the Art Gallery of NSW to curate an exhibition on Yeomans as part of an ongoing art world discussion on the definition of art, artists and cultural activism.

I was advocating that artists were not defined by the manufacture of certain types of artefacts or media (eg painting) nor by their use of certain distribution mechanisms (eg galleries) but rather by their ability to generate adaptive cultural change using any available activity.

On that basis Yeomans represented a model for a new understanding of what an artist could be, a type of cultural innovator who used any means available to change the culture.

The exhibition was eventually cancelled by the last minute intervention of the Gallery's Board of Trustees, despite the objections of the director and curators, on the basis that it was a trade show, not art. ***Continued page 13***

The Yeomans' project ... art, farming, history and more ...

Continued from page 12

While I moved on to explore similar ideas in other ways the trustee's action was one of many inappropriate interventions which resulted in the Art Gallery Act being changed in 1980 to remove their power over day to day activity in the institution.

In 2010 a young artist, Dr Lucas Ihlein, approached me about working with him to recreate this project for a 2011 exhibition on the influence of early conceptual art at the Australian Centre for Contemporary Art in Melbourne.

We received funding from the Australia Council and the revived project has taken a variety of forms, a blog http://yeomansproject.com, a series of prints (which recently won the 2012 Fremantle Arts Centre Print Award http://yhoo.it/RaZZ91), the display itself which included artefacts relating to Yeomans including one of his ploughs, a bus tour and a number of talks and conference appearances.

The multi disciplinary nature of the project illustrates the way disciplinary boundaries are currently dissolving. As the internet and social media open up the potential for cheap and widespread distribution and interaction the gatekeepers of previously discrete disciplines are being bypassed yet the disciplines themselves are being expanded and opened out to a broader range of practitioners, with varying results.

The Yeomans Project now has components that can be classified as history, art, farming, education, environmental activism, and a variety of other previously more clearly separated activities.

In a final irony the original exhibition has once again been scheduled for the Art Gallery of NSW in November 2013, only 38 years late.

The growth of gardens in the Blue Mountains

FIVE half-day (identical) seminars are being held over the weekend April 12-14, 2013 by Garden Clubs of Australia — Blue Mountains zone as part of the 200th anniversary of the 'Crossing of the Blue Mountains' by Blaxland, Lawson and Wentworth in 1813 celebrations

The seminars will cover the growth of gardening, within the historical establishment of the Blue Mountains, from pre-settlement times, through the early days of the developing towns and villages of the 19th and 20th centuries; to the spectacular and historic gardens of to-day.

Beginning with a look at indigenous native food plants (pre 1813 and to-day) and early market gardens, then on to how many of the 'estate' and 'resort' gardens were established, and then to the large number of quality residential gardens annually on display, the seminars conclude with a look at the challenges and opportunities confronting Blue Mountains gardeners, and gardeners generally, in the 21st century.

The seminars begin at Kurrajong on the evening of Friday, April 12 then Springwood and Wentworth Falls on Saturday 13 and conclude at Blackheath and Lithgow on Sunday 14 — giving Blue Mountains garden club members, residents, and visitors, a wide choice of venues and times to participate in the program.

There will be five high - profile speakers:

Bundeluk, of the Darug people: "Storyteller" — Bushtucker tradition indigenous plants, pre 1813 and to-day.

Associate Professor Ian Jack, Royal Australian Historical Society: —- Historical development of the Blue Mountains and its early gardens.

Alison Halliday, co-author of the best-selling publication A *Passion for Place, Gardens of the Blue Mountains* - Bells Line of Road gardens.

Angus Stewart, noted native plant breeder and presenter, ABC TV's "Gardening Australia" — Our Blue Mountain Gardens of To-day.

Jerry Coleby-Williams, Director - Seed Savers Foundation, and another prominent presenter of ABC TV's "Gardening Australia" program: — Into the Future – Challenges and Opportunities.

The seminars (each of 3 and a half hours duration) are open to the garden interested public on Saturday, April 13 at Springwood (8.30am – 12.30pm) and Wentworth Falls (2.30pm –6.00pm) and the next day (Sunday) at Lithgow (2.30 – 6pm) all for a low cost of $12, school students, free.

This is a unique opportunity to learn, from renowned speakers, of the development of Australian gardening from the early days to the present, and of what lies ahead for gardeners in the future.

Numbers are limited but early bookings can be made by telephoning mobile 0488-075-388 or by e-mail to cyberguy1@me.com.

Garden clubs with members wanting to attend should contact Central Blue Mountains Garden Club, P.O. Box 164, Lawson 2783, or ring Warren Boorman on (02) 4759 2149.

The seminars are an "1813 Crossing " scheduled event, part of extensive celebrations being held throughout the Blue Mountains region from 2013 to 2015, concluding with the 200th anniversary of Governor Macquarie's visit to "declare open" Bathurst, Australia's first inland settlement.

PROPOSED NSW PLANNING REFORMS OVERLOOK HERITAGE VALUE

By Margi Fallon Heritage Consultant Architect

MANY may be aware of the proposed *New Planning System for NSW* as outlined in the green paper released for public comment in July this year. Submissions for individuals closed on September 14 and for councils on October 5.

It was clear from many of the submissions that the proposed planning reforms will have a major effect on community consultation, design quality, environmental protection and heritage within the state.

The reforms are being developed with the primary aim of speeding up development in the state, with many risks attached.

Despite many reservations being expressed from community, environment, local government and heritage groups around the state, the government is proceeding quickly to the development of the white paper which will go before parliament for ratification early to mid next year.

OBJECTIVES OF THE PROPOSED PLANNING REFORMS

The key drivers of this reform are 'growth and development outcomes', and these will occur at the cost of quality, environment and good design. The removal of the word environment from the naming of the planning instruments is ominous.

The word "heritage" also barely appears in the green paper.

A stated objective of greater community involvement will not be met as this is proposed to be restricted to the strategic planning.

The general community will not be able to understand enough of the end result to be able to fully engage in strategic planning unless they are very honestly and clearly trained and consulted by highly trained professionals, with scale models of what will land on the ground as a result.

There needs to be community consultation at the development end of the process as well as the strategic end of the process.

An inverted triangle principal of planning, proposed by the Productivity Commission, sets the concept of a top down planning system rather than a merit based assessment system.

This will be difficult to achieve without a very careful and coordinated approach that enables the local and character needs to be addressed at the state level.

It is difficult to see how this can happen in reality.

The community is unlikely to engage at a state level, and will be more involved at a local level.

However, what is left to decide strategically at a local level will be pretty small as the state and regional plans will provide the framework through which the local planning can happen.

The streamlining of the planning process to remove or reduce the scope of merit based assessment of design will need to either be a very complex system of clearly defined code requirements to enable the "tick box " to provide for good outcomes, or it will create a proliferation of the lowest common denominator of design and urban outcomes.

The outcome of this will only be noticed when it is too late. (Noting that the majority of small to medium scale developments are not designed by design trained professionals.)

While the green paper appears to recognise local government, the regional and subregional system has the potential to remove the role and power of local government in planning.

This will not have a good outcome as NSW is a diverse culture and it will not be possible to adequately cover urban, coastal, regional, outer west and other local areas from a state level concept.

The environment of NSW is diverse and the needs of the various communities are diverse.

The drivers and focus of these reforms are clearly based on Sydney urban growth and development issues and these issues are not as relevant in regional NSW.

What is relevant is decentralisation, and infrastructure. These are also included in the reforms and the implementation of the reforms with a greater focus on regional NSW will enable this issue to be potentially addressed.

The planned strategic management system of state to regional to subregional to local, will only work if the manning of the various offices at each level are located appropriately (ie regional and sub regional offices in their relevant regional areas, manned by regional professionals, not Sydney based ones.)

The manning of the "Independent" bodies suggested in the report is heavily weighted to the planning and developer profession.

However, for a good design outcome a broad range of professionals need to be involved in the strategic planning bodies including :
Heritage professionals, Aboriginal cultural professionals, environmental professionals, planning professionals, urban design professionals, and community representatives.

The last group -- community representatives, does at its heart need to involve local government councillors. I don't believe local community elected representatives can be removed from the consultative and decision making system. After all, that is what they have been elected to do – advocate for the local community.

New system aimed at removing local government from planning

Continued from page 14

The proposed new system is heavily weighted to centralisation and standardisation of planning controls, removing the role of local government. To me this is a step toward council area amalgamations.

While there may be some efficencies from going to regional councils it cannot deal with some of the more specific local area needs.

For example, the Blue Mountains is not a metropolitan area even though it is so close to Sydney – to amalgamate with say Penrith would be completely inappropriate as the issues of a World Heritage Area are completely different to the issues of a Sydney Plains suburban area.

It would be better to retain and expand the systems already in place which enable the local councils to remain independent, but enable some linking of services such as is provided by WESROC, or in the central west the WBC Strategic Alliance where Wellington, Blayney and Cabonne work together in some areas of service.

As a result of the speed with which these reforms seem to be travelling, a number of community groups have joined forces to form the Better Planning Network (BPN).

This group has been lobbying the government in a positive way to ensure the community and environment groups have a strategic say in the reforms.

Most recently they have been lobbying for an extended period for the consultation process for the white paper.

At present it is planned that the public consultation period will be for three months over the Christmas period. However, there may be signs that this will be extended to six months through the lobbying of the BPN.

Check out the planning reforms process and get informed. It is happening quickly and we may lose many good things if it is not done properly.

The planning reforms and process for consultation can be viewed at : http://www.planning.nsw.gov.au/a-new-planning-system-for-nsw. You can also connect to the Better Planning Network at : http://betterplanningnetwork.good.do You can also continue to write to the planning department. Some of the issues that I have personally put to the Planning Department are :

1. THE HERITAGE BRANCH NEEDS TO BE REINSTATED AS A KEY PLAYER IN THE PLANNING SYSTEM. – over the past 10 years the heritage branch has been decimated by the removal of staff to the planning department and then the separation of the heritage branch from the planning department.

Their statutory status has been greatly reduced, and staffing has reduced their capacity to train and support the heritage protection industry.

2. ABORIGINAL HERITAGE CONSERVATION – also needs a greater role in planning. Currently planning concentrates on artefacts in the ground and a lot of heritage is being removed as part of destroy permits which seem not to protect the systems they should. Aboriginal cultural heritage officers need to be part of the strategic planning system – particularly in regional areas where there is a stronger connection to the indigenous past.

3. THE STATE GOVERNMENTAL PLANNING OFFICE NEEDS TO BE STRENGTHENED – ie the strategic planning needs to be a governmental driven issue not a consultant driven issue.

The government needs to employ planners and heritage advisers and professionals that will be wholly focussed on the community and not split between working for both the developer side of the equation and the community side of the equation.

4. THE DEPARTMENT OF PLANNING NEEDS TO BE DECENTRALISED – with the Regional Planning Board serviced by a regional planning office. That office would include planners, heritage, environmental and Aboriginal cultural professionals.

The regional planning offices need to be located in the regions they serve. (ie Bathurst /Orange, Grafton, Gosford, Newcastle, Dubbo, Nowra, Wagga, Albury, Armidale, Tamworth). The old buildings may still be there.

The author

Margaret Fallon BArch RAIA is principal architect of Integrated Design Associates.

Along with her experience in commercial, public and private design projects and construction management, Margaret has a keen interest in community and environmental design issues.

Margaret is a heritage consultant and has carried out a number of heritage studies in the Blue Mountains and central west of NSW.

A resident of Wentworth Falls, Margaret has held heritage advisor positions at Blacktown and Strathfield councils, as well as working for a short period of time at the NSW Heritage Branch.

The Cox's Road - Context of representative portions

THE COX'S Road Steering Committee was formed in July 2006 to look at long term objectives and mechanisms to preserve the 1814 Cox's Road alignment between Emu Plains and the Blue Mountains and Bathurst. The committee was formed with delegates from the Lithgow, Blue Mountains and Bathurst branches of the National Trust of Australia (NSW), and operates under the auspices of the Trust as an informal committee.

In April 2011 the NSW Heritage Office concluded it will list representative portions of Cox's Road as part of the 1813 bicentennial celebrations of the crossing of the Blue Mountains in recognition of the importance of the road in the history of opening up western NSW.

Cox's Road Project Committee (CRPC) convenor, and an individual member of BMACHO, Patsy Moppett pictured, has produced a series of articles for *HERITAGE* to provide some of the detail for each precinct of the road, this being the introduction to the series as well as the Emu Ford and Woodford precincts.

By Patsy Moppett

AS A follow up to a previous article on the Cox's Road in September 2011, it is timely that further information be shared in regard to the original road across the Blue Mountains that opened up the western region for the wider settlement of the New South Wales colony.

It is common knowledge that the Cox's Road was followed up in subsequent years by various other crossing routes and deviations, resulting in the Great Western Highway as we see it today. With increasing interest in the western crossings in general, the significance of the original crossing should be acknowledged.

This monument erected by the RAHS marks the location where Macquarie declared the site for Bathurst

The Cox's Road Project Committee (National Trust) (CRPC) made a submission for nomination of Cox's Road for listing on the SHR under the Heritage Act 1977 in 2010, to record and register the significance of the road.

The State Heritage Register Committee of the Heritage Council of NSW considered its options for listing all or part of the Cox's Road.

The SHR committee was very enthusiastic about the proposal and considered the route a significant part of NSW history and heritage.

After considering its options, the SHR committee concluded that listing of representative portions of Cox's Road would be undertaken as part of the 1813 bicentennial commemorations of the crossing of the Blue Mountains in recognition of the importance of the road in the history of opening up of western NSW.

It was understood that this would require extensive consultation with owners and other relevant stakeholders.

The significance of the road relates to its place within early colonial history and society.

Sophisticated technology had little part to play in the construction of the modest structures that enabled the opening up of western NSW, and the standards and practice of road engineering of the colonial period stand out.

The route traversed a rugged and inhospitable landscape, with minimal loss of life, with efficient and effective management of labour and equipment, demonstrating basic work patterns and skills.

The road construction was also associated with notable public figures of the time including Cox, Macquarie, Evans and Blaxland.

A report presented by Grace Karskens in 1988, Cox's Way, was carried out as a historical and archaeological study of William Cox's Road, which also touched on other early crossings of the Blue Mountains. ***Continued page 17***

Grace Karskens' study, first to bring together available surveys for whole road

Continued from page 16

Dr Karskens' report was prepared for the Cox's Road Trust, within the then NSW Department of Lands.

The study was the first which brought together available surveys, historical and archaeological data for the whole of the road. For ease of assessment, Karskens divided the route into precincts, within which one can identify specific significant remaining features of the original road.

As part of the initial submission to the Heritage Council, all of the precincts identified by Grace Karskens have been examined under the State Heritage Register criteria.

The Cox's Road Project Committee has now examined in more detail some representative portions of the road, to reinforce the data previously presented to the Heritage Council.

The choice of precincts does not suggest that other sites are less significant. However, the logistics of listing such a heritage feature as a road route present issues relating to land ownership, access, environmental impacts and so on.

Therefore the precincts that have been chosen for closer examination are identified as the least vulnerable.

Traditionally, the stony ridge tops at Linden and Woodford, and the Mount York Descent have been the most well-known features.

Little has been recorded in regard to the road beyond Mount York, or the other sections of the route through the mountains from the Nepean River.

Karskens' study examines the whole of the route from the Nepean River right through to the Bathurst plains, picking up and analysing all remaining features of the route, stopping short of more elaborate survey and archaeological investigation along less significant sections.

The CRPC has taken some of the major Karsken's precincts and elaborated on their significance. The detail documented would assist in the production of maps and brochures for both the 1813 bicentennial commemorations and for the actual listing process.

In 2011 the NSW Heritage Council and Heritage Office emphasised that they would like to consider promotion of the history and importance of the road through the publishing of articles and through relevant events over the following months.

Therefore it is my intention, through a series of articles during the course of the coming issues of *HERITAGE,* to provide some of the detail for each precinct, as follows:

- Emu Ford
- Woodford/Linden
- Caley's Repulse
- Mount York
- Mount Blaxland
- Fish River and beyond

The Emu Ford precinct

The Emu Ford precinct is located on the Nepean River at Penrith, just north of the existing weir. It was probably the first crossing of the river, even before William Cox set off in 1814.

It was utilised by Blaxland, Lawson and Wentworth, and subsequently by Surveyor Evans to access Emu Island, and what became the settlement of Emu in 1832.

Cox began the approaches in July 1814, the whole crossing construction taking only a couple of days.

A punt and ferries further to the south provided the formal replacement of the ford in later years but were subject to a toll, thus the ford remained in use as a means to avoid the toll for quite some time.

It is possible that people travelling to the west continued to use the crossing even up until the 1850s, but mapping of the 1860s showed no sign of the crossing.

Travellers had to negotiate the steep slopes near Peach Tree Creek until the first bridge was constructed in 1867, the Victoria Bridge.

Goods were usually transported across the river on horseback, and people were taken across by boat.

The subsequent development of the weir and Peach Tree Park has meant that the eastern approaches to the crossing are no longer evident.

The western side is not too disturbed but any evidence is overgrown. The narrowing of the river and the shallow stony crossing are still quite clear, near where a small side creek, Peach Tree Creek, enters the River from the east.

In her report "Cox's Way", Grace Karskens states that "*this precinct is a historically significant site, marking the starting point of the early mountain crossings and still illustrates the nature and problems of water crossings during the early nineteenth century".*

The following photographs document the remaining key features in the vicinity of the crossing:

Emu Ford site view to south west

Emu Ford site view to north west

“Nepean River; banks very steep on the east side”... *William Cox July 18, 1814*

Continued from page 17

The following extracts are taken from records of the time contained in *Fourteen Crossings of the Blue Mountains.*

Gregory Blaxland
Tuesday, May 11, 1813
“Mr. Gregory Blaxland, Mr. William Wentworth and Lieutenant Lawson took their departure to endeavour to explore the interior of the Country and to effect a passage over the Blue Mountains between the Western River and the River Grose.

They crossed the Nepean River at the ford on to Emu Island at four o’clock in the afternoon and proceeded by their Calculation two Miles through forest land and good grass, encamped at 5 o’clock at the foot of the first ridge of the Mountains”.

Assistant-Surveyor Evans
Friday November 19, 1813
“I directed the Provisions and other necessaries to be conveyed across the Nepean to the N.E. Point of Forest Land, commonly called Emu Island, which was done, and by the time everything was arranged Evening approached”.

William Cox July 18, 1814
“Began work at 10.00am to make a pass across the Nepean River; the banks very steep on the east side...”.

July 19, 1814
Finished the road down the right bank of the river. The swamp oak on Emu side very hard to cut and root. In the afternoon began our operations on Emu Plains”.

Major Henry Colden Antill (in company of His Excellency Governor and Mrs Macquarie)
April 26, 1815
Sir John Jamieson...had requested we would breakfast at his farm ...situated on the banks of the Nepean, the horses and carriage were sent round to the ford while we were at breakfast, about a mile down the river, where they crossed and came up to the Government stockyard opposite to Sir John’s, …we all crossed in a boat and at 11 o’clock started from Emu Plains, …”

Emu Ford by John Lewin courtesy State Library of NSW

LITHOGRAPHS – Record from Governor Macquarie’s journey over Cox’s Road in Aril 1815
John Lewin’s (1770-1819) watercolour drawings of (Cox’s Pass ca. 1815-1816) held at the State Library of New South Wales document parts of Cox’s Pass. It was during this trip that Governor Macquarie proclaimed the site and settlement of Bathurst,

John William Lewin was primarily a natural history artist and collector.

In April 1815, Lewin accompanied Governor Macquarie’s expedition over the Blue Mountains to assess the Bathurst Plains for agricultural and pastoral merit.

Lewin recorded the journey in 21 watercolour drawings, of which 15 are held in this series.

Among the group was Major Henry Colden Antill who made a deal with Lewin to provide a copy of his journal in exchange for copies of Lewin’s watercolours. This set is the one that belonged to Antill.

Breakfast tour of historic chocolate factory

HERE is an opportunity to have a hot breakfast at The Paragon at Katoomba with a tour of the historical chocolate factory, Wednesday November 21, from 7.30 am to 9.00 am.

Organised by Biznet.

Check out the link for cost and booking information http://www.biznet.org.au/event.asp?pid=10&id=284

One of the best preserved sections of Cox's Road runs through Woodford

Continued from page 18

Woodford Precinct

The Woodford precinct is located off the Great Western Highway opposite the end of Tollgate Drive, rising to pass behind the Woodford trig station and Rockcorry cottages.

It joins Taylor Road up until the entry of the track through the National Park back to Glenbrook.

The road here was superseded by the road along the existing Great Western Highway after 1835.

It conveys a sense of the conditions of travel at the time, together with indications of the deviations that occurred trying to avoid the original rough track made by Cox.

As the precinct is quite elongated, the features of the road are quite considerable, and the route is accompanied by numerous other tracks which could be early diversions.

The route is clearly defined by numerous sections of kerbs, cuttings, retaining walls and drains which run intermittently along the road.

The cuttings range from 4 to 40cm in height and up to 25m long and are partly on private land.

In places there are shallow gutters, curved to direct water away from the road.

Adjacent to the Woodford trig lays a particularly good section of kerbing.

There are low rough cuttings near the Rockcorry Cottages and low earthen embankments and retaining walls on Taylor Road.

At one point there is a carving in the rock face opposite the low retaining walls.

The pavement to the eastern end is uneven with large expanses of natural rock, now covered often in sandy, earth and gravel, or clay. The width varies from 12 ft to 20 ft.

Two sections of early retaining wall run along the eastern side of Taylor Road where the road has a gravel surface in good condition.

An early retaining wall eastern side of a gravelled section of Taylor Road

One wall comprises up to 1m high of roughly shaped or simply faced stone, stacked with no particular coursing or jointing.

The second wall is up to 210cm with neat squared large blocks with jointing and coursing.

Battering was attempted to stabilise the wall, and also heightening the embankment.

In her report *Cox's Way*, Grace Karskens states that the precinct is one of the best preserved and most intact sections of Cox's Road, presenting a graphic picture of the work done by Cox's men on the rocky outcrops and shelves of the ridge.

Photographs on this and the next page document key features of Cox's Road that is clearly visible.

Continued page 20

Photographic images on this and other pages accompanying the text of this article except where acknowledged with the caption have been taken by the author, Patsy Moppett.

Hand chiselled sandstone kerbing

Rock cutting east of trig station

Rockcorry road drain

Continued from page19

The Woodford precinct of the Cox's Road route does not feature highly in diaries of the period, mainly due to it being a largely featureless track along a narrow rocky ridge with little requirement for construction works.

However some small snippets are recorded. It should be noted that the Woodford precinct may also include the Caley's Repulse site, as documented by Allan Searle in his *"Historic Woodford and Linden" 1980.*

He believed that a site in the vicinity of the Woodford trig was a truer site which conformed to all written descriptions of it. However, in this report Caley's Repulse is not included, being treated in the history of the Road as a separate precinct.

'Woodford stretch not the most comfortable for travellers...'

The following extracts are taken from records of the time contained in *Fourteen Crossings of the Blue Mountains,* all observations being immediately followed by an approach to a "pile of stones".

It appears that the Woodford section of the road was not the most comfortable section for travellers!

Blaxland, Lawson and Wentworth - May, 18 1813 ...to Mark and Cut a passage for the Horses through the brush returned to their Camp – very tired and out of spirits -...along a very narrow ridge not more than fifteen or twenty yards over...

Assistant Surveyor Evans - November 21
...travelled on mostly Ridges overrun with Brush...

William Cox - August 18, 1814
...and just entered a scrub with stunted timber..... The stonemason went forward to examine a rocky ridge about three miles ahead, and on Monday he will go there to work to level them.

A portion of the Cox's Road near the Woodford trig where carved into the rock is a kerb on either side, both sides, a clear indication that Macquarie's order to Cox to build a road "so that two carriages may pass side by side" was adhered to by Cox.

Governor Lachlan Macquarie - April 27, 1815
...At a further distance of four miles a sudden change is perceived in the appearance of the timber and the quality of the soil – the former becoming stunted, and the latter barren and rocky. At this place the Country became altogether mountainous, and extremely rugged...

Major Henry Colden Antill - April 27, 1815
....Our Road was stony, and some very severe and short hills for the loaded carts.....

Quoy, Gaudichaud and Pellion – 1819
...Soon we saw the ground change and the road, although still well kept, became rather less easy on account of the inequality of the ground. The masses of sandstone show bare here almost everywhere; the vegetation is poor; and at the bottom of great valleys right and left, tower these vertical and natural walls of rock, for a long time insurmountable barriers, which caused the failure of so many enterprises to seek a passage through the Blue Mountains.

A Historical and Archaeological Study of Cox's Road and Early Crossings of the Blue Mountains, NSW, Grace Karskens 1988, for Crown Lands Office, Sydne

Historic Woodford and Linden 1980, Allan Searle

About the author

Patsy Moppett has worked as a town planner and heritage officer in local government in the central west of NSW for some 22 years, her work including management of heritage programs, heritage advisory service, heritage committee and local heritage funds.

She has also worked in private consulting, undertaking planning, heritage and environmental research and reporting. She has a Bachelor of Town Planning Degree and a Diploma in Conservation and Land Management, and has completed other courses related to heritage, planning law, property planning, the environment and permaculture.

Patsy undertakes history and heritage research and report writing, having written the book "*A History of Cow Flat*". She is currently working on a history of the Lower Turon goldfields, and various family history projects.

Patsy is convenor of the Cox's Road project Committee, which was formed to undertake the listing of the road on the State Heritage Register. Under this Committee she has assisted in the preparation of reporting for the NSW Heritage Office.

Oldest grave in the Blue Mountains

by Peter Chin --- president, Springwood Historical Society

PARTLY hidden in the shade of a large tree in a remote part of Springwood Cemetery is the grave of Private Francis Smith, one of the earliest known European to die and be interred in the Blue Mountains.

From the opening of the Western Road over the Mountains in 1815 until the late 1830s travellers were required to have a permit from the governor to travel to the west in the interest of controlling settlement in the Bathurst region.

To enforce this regulation small military posts, manned by three or four soldiers, were established at points along the road.

From November 1815 there was a post at Springwood somewhere in the vicinity of the present Macquarie monument in Macquarie Road which was relocated in 1833 to a site on what is now the Springwood Mews in Ferguson Road.

Private Francis Smith was a member of the 4th King's Own Regiment which was stationed in New South Wales from 1832 to 1837, and with probably three other soldiers manned the Springwood military post.

Smith had joined the regiment in 1813 and served in the Peninsula War, the war against the United States in 1814 and later in the West Indies before returning to England. He arrived in Sydney in 1832 and was located at various posts in Sydney and the Blue Mountains before coming to Springwood in January 1836.

Private Smith died at the Springwood post on May 5, 1836 from causes unrecorded. Because this was the only European settlement in the area he was buried in the bush near the post. A headstone bearing the following inscription was placed on the grave:

Sacred to the memory of
Francis Smith
Who died May 5th 1836
aged 43 years
having served
for 25 years
as a soldier in
H.M. The King's Own Regt.

In 1878, in response to a parliamentary enquiry, it was reported that a solitary soldier's grave was located near the site of the old military post but that the headstone "is broken and supported by a sapling."

Sad to relate, the headstone remains in that condition.

In 1886 Springwood Cemetery was established and the Church of England portion consecrated and in use by 1887.

Private Smith's broken headstone which is now shaded under a tree in Springwood cemetery Photograph by John Leary, October 2012

It was probably not long after this that the remains of Francis Smith were exhumed and re interred in this section of the cemetery (grave No.91) and marked by the broken headstone and foot stone.

While Private Smith's grave lies almost forgotten in Springwood Cemetery a monument to the memory of this earliest of our European inhabitants was erected in the small park in the front of Springwood Civic Centre in May 1990 and unveiled by Brigadier DJ McLachlan, Commander of the 2nd Military District, assisted by 15 months old Nathan Dubber of Tweed Heads, Francis Smith's youngest direct descendant.

It is to be hoped that action will soon be taken to restore Private Smith's headstone since its broken condition was first recorded 134 years ago.

The King's Own Regiment

The Kings Own Regiment in which Pte Smith served was an infantry regiment of the line of the British Army, which served under various titles from 1680 to 1959.

Its lineage is continued today by the Duke of Lancaster's Regiment . It saw service for nearly three centuries. In 1751, after various name changes, the regiment was titled 4th (King's Own) Regiment of Foot. The regiment retained this title until 1881 when it became The King's Own (Royal Lancaster Regiment). In 1921, it was re-designated The King's Own Royal Regiment (Lancaster).

After partcipating in every major conflict in the late 17th an 18th centuries the regiment saw colonial service in Australia from 1832 until 1837, being stationed variously at Tasmania, Sydney, Victoria ,South Australia, and the Swan River Colony under the command of Lieut. Colonel J. K. McKenzie. Footnote --- John Leary, OAM

The Harold Kenneth Campbell monument

MOST PEOPLE who have driven along Great Western Highway on the west side of Blaxland will have noticed a vault like monument on a narrow strip of grassed land between the highway and Wilson Way.

Some may even have taken the trouble to visit the site to discover that it is a memorial to an individual soldier, one of the 61,513 Australian soldiers of the 1st AIF who lost their lives in the 'war to end all wars', the Great War later to become known as the First World War

The monument is a memorial to Harold Kenneth Campbell, who aged 19 years and 5 months, enlisted in the Australian Imperial Force on June 29, 1915.

His parents gave their written consent saying he had "been raised to fight for his King & Country".

His father, James Spink Campbell, of "Beverley", Blaxland, was named as next of kin. Harold's occupation was poultry farmer and James was a civil servant.

Harold fought at Pozieres as a private in the 3rd Battalion, sustained gunshot wounds to his knee and leg and died as a result of his wounds in the General Hospital, Rouen, on August 2, 1916. He is buried at St Sever Cemetery, Rouen.

On October 22, 1916 the Blaxland Progress Association requested permission to erect a Soldier's Memorial at the intersection of Railway Parade and Station Street, opposite the station in full view of passengers in passing trains.

Permission was granted. It was to be a stone or granite pedestal with a machine gun mounted on top.

The monument was unveiled in 1925 with about 200 people assembled.

Councillor Wilson made a speech in which he said that it would "stand for ever as a beacon for the boys of the future to do their duty as the fallen hero had done his".

The machine gun was one of a number of German guns seized in France. The monument was unveiled by Major General Sir Charles Rosenthal, a local highly decorated soldier.

Councillor Wilson took the opportunity to collect donations to finish paying for the cost of the memorial.

In 1928 the Great Western Highway on the south side of the railway station was proclaimed as a main road and superseded Mitchell's Pass as the main western road. Consequently, it was decided to move the monument to Blaxland Park, a small park opposite Blaxland Public School.

In 1926 the Wilson Way over bridge intercepted the highway in line with Bridge Street but in the 1980s, when the highway was widened, it was altered to the present alignment.

This alienated the triangle piece of land where the monument now stands. The monument which has only been moved once retained its original fence until 1958

In 2001 the Blue Mountains City Council requested and received permission from the Minister for Land and Water Conservation to rename the park the Blaxland War Memorial Park.

Barbara Higginson had lobbied for this renaming and had been supported by the Blaxland and District Chamber of Commerce & Industry Inc who commented: "The war memorial is a significant part of the history of Blaxland and the Chamber of Commerce is mindful of the importance of the memorial and the park to the township and the residents.".

Over the years the plaque(s) and the gun on the monument have disappeared and the Blaxland – Glenbrook RSL Sub Branch who have assumed a de facto ownership of it have, with the help of the Blue Mountains City Council, organised restoration and refurbishment, replacing the plaque and repairing the little fence at the base.

CAMPBELL FAMILY BACKGROUND

It was quite unusual for a World War I memorial to be erected for a single fallen soldier. Honour boards and monuments in the Blue Mountains were erected in memory of numbers of men (and a few women).

Perhaps Harold was the only Blaxland man who enlisted. Four other men, born in Blaxland, were located in the World War I Nominal Roll; two enlisting in Cootamundra, one in Lithgow and one in Sydney, but nothing further is known about them.

Blaxland was a very small township and Harold would have been quite well known locally.

His parents, James and Edith, and sister, Edith, lived in a house called "Beverley" which was situated where the Blaxland Arcade is now located. The house was named after James' family home or rather property in Boorowa, NSW.

Continued page 23

Continued from page 22
James and Edith were active community and church workers. James was treasurer of the Urban Area and Progress Association for many years and he and Edith were strong supporters of St David's Church of England in Taringha Street.

They donated the block of land on which the church hall was built and they set up a memorial to their son, in the church. The church was destroyed in the 1968 bushfires.

...a very interesting and prestigious pedigree

James could claim a very interesting and prestigious pedigree. His maternal grandfather was Rowland Hassall, an early colonial preacher and farmer.

His paternal great great grandfather, William Campbell, was a colourful sea captain who owned a ship called the "Harrington".

He had trade connections with John Macarthur and settled in Australia after receiving a land grant of 2000 acres near Camden.

He named his property, "Harrington Park", and there is now a suburb with this name.

The homestead still stands and is being restored. The Fairfax family are thought to have been the last private owners.

The Hassall and Campbell family members married into other well known colonial families including the Antills (Captain Henry Antill was Governor Macquarie's ADC) of "Jarvisfield", Picton.

They also frequently married cousins so their family tree is scattered with the Campbell and Hassall surname.

James Spink Campbell was married twice, first to Gertrude Williams of Yass. She gave birth to a son, William Douglas Adye Campbell in 1883 and died in the same year.

James married Edith Deacon at Ashfield in 1894 and they had two children – Harold and Edith.

Edith married John Back and they lived in Sydney for a time before moving back to live in "Beverley" in Blaxland in 1942. They had three children, Josephine, Kenneth and Shirley.

Kenneth became vice chancellor of James Cook University in Townsville.

He married Patricia Cummings, daughter of Regner Olaf Cummings, who was a noted tennis player during the Hopman era. They currently reside in Queensland.

After serving with the military forces in World War II, Josephine married Francis Clement Murray.

Shirley married veterinary surgeon Marcus Richard Edward Durand.

In the Hassall family tree on Ancestry.com James' second marriage and children are not recorded.

William, the son of his first marriage, is noted as the family historian. He died in 1966. Does this indicate a family disapproval of the second marriage? We don't know.

With his privileged family background and his position in the tiny Blaxland community he would have been well known and respected and his loss of a son would have been felt by all – hence the erection of a community memorial.

This article forms the basis of a report by Pamela Smith and Shirley Evans of Springwood Historians to Blue Mountains City Council's heritage advisory committee. Council has asked its heritage advisory committee to comment on a request to council by the Glenbrook-Blaxland Returned and Services League (RSL) Sub-Branch to relocate the monument from its existing location to within the grounds of Glenbrook Bowling Club.

RAFFLE PRIZE WINNERS

THE following are the results of the raffle conducted by BMACHO to raise funds to offset costs of the Blue Mountains History conference:

1st prize - Ticket No 0104 - Accommodation package at The Carrington won by Ian Milliss

The heritage listed Carrington Hotel, Katoomba

2nd prize - Ticket No 0288 - Gourmet picnic at Everglades, Leura – won by Tom Kent

3rd prize - Ticket No 0671 - 2 metre hand-knitted Alpaca scarf won by Beth Koperberg

4th prize - Ticket No 0605 - Basket from Hazelbrook Pharmacy won by Diana Jones

5th Prize - Ticket No 0264 - 2 tickets to Scenic World won by Jeff Smeaton

Managing your collection workshop

STATE Records in partnership with RAHS will conduct a regional workshop, *Managing Your Collection* on Saturday, November 24.

Being organised by BMACHO, the workshop will be held at Hobby's Reach the property of Blue Mountains Historical Society, 101 Blaxland Road, Wentworth Falls.

The workshop will commence at 10.30am and a cup of tea or coffee will be available from 10am.

Morning tea will be provided halfway through the workshop and a light lunch will be provided at 1.30pm.

Bookings are essential by e-mail to: j.koperberg@bigpond.com or phone to Jan Koperberg (02) 4754 1544.

HISTORIC HOUSES OF MUDGEE

MUDGEE-BASED historian and heritage consultant, John Broadley, earlier this year released his book *Historic Houses of Mudgee*.

The launch was held at historic Putta Bucca House, Mudgee, one of the 19 houses featured from Mudgee town and country.

Friend Dr Judy White of Belltrees, Scone, who also wrote the *Foreword* and who has connections to several of the houses featured, was guest speaker at the launch.

In the foreword, Dr White, AM writes "The book brings history alive".

John self-published the book which was a passionate personal quest.

Over twenty years he undertook all the research, took the photographs, did hundreds of line drawings by hand of the joinery, and acquired high-end desktop publishing skills to produce a print-ready document.

He identifies the site of each house, presents the ownership history, describes the exterior and interior in detail, and also treats the properties' outbuildings and gardens.

The stories of these houses are an intricate part of the history of the Mudgee district, one of the earliest settled areas (1822) west of the Blue Mountains.

Historic Houses of Mudgee will give its reader an intimate understanding of how Mudgee was settled and how it developed.

Historic Houses of Mudgee is available from the author at $70.00 (plus $15 for postage and packaging).

Contact: Address: 7 Oakfield Close, Mudgee, NSW, 2850
Phone: 02. 6372 3365 or 0429 708 218.

Reflections on Blaxland's Blue Mountains expedition

1813: SOME reflections on Blaxland's Blue Mountains expedition is the title of a talk to be given by John Low, OAM at Mt Wilson later this month.

John's talk will follow the annual general meeting of the Mt Wilson and Mt Irvine Historical Society in the Village Hall on Saturday, November 10 commencing at 10.30am.

John was employed by the Blue Mountains City Library as a local history librarian in March 1982. His task was to establish a local history collection. He secured a permanent appointment in September 1983 and stayed for the next 24 years providing a range of services to historians in the Blue Mountains and beyond

John, in the words of Professor Ian Jack, has "his own effortless mastery of so many unfamiliar corners of Mountains history, [which has] given him a special place in the affections of all right-minded scholars".

MONUMENTS AND MEMORIALS

by Shirley Evans - Springwood Historians

OF LATE I have been very concerned with monuments and memorials – specifically the Macquarie monument in Springwood and the Harold Campbell monument in Blaxland.

I have also been (very slowly) photographing monuments with the help of other members of Springwood Historians for a possible CD.

I have some books about monuments and I took up one of these and began to browse. The book was *Monuments and Memorials* edited by Beryl Henderson, published by the Royal Australian Historical Society in 1988 and funded by the NSW Bicentennial Council.

It lists monuments and memorials throughout NSW. Foundation stones, buildings and cemeteries are not included, all the information was contributed, and while there is a huge amount of information in this edition the need for a second volume was contemplated at the time of publication. Some of the monuments are illustrated in black and white.

While it is certainly not riveting reading I found it fascinating and soon began to read in depth rather than skimming.

Some memorials are very touching, particularly those from parents remembering children lost through sickness, accidents or in war.

They are mainly in churches and take the form of brass or marble tablets or plaques.

I haven't been able to find out the difference between a plaque and a tablet.

In this book the tablets seem to be mostly marble and the plaques brass but I can't be sure of this.

The other form of family tribute in churches is the stained glass window and there are many of these, particularly in memory of beloved parents.

Two very touching memorials are windows in memory of children who are now unknown.

One is in a Sydney church remembering "Wee Crissy" showing the Wise Virgins going out into the night with lamps lit.

The other one is in a Woollahra church in memory of "Ranee Ann", 1929-1933 – a set of three windows depicting "child themes".

A very sad monument to pioneer children was erected by the White Cliffs History Group in 1983 which stands in front of a small cemetery containing the graves of five children named Richardson.

They died between 1890 and 1892, and were thought probably to have died of heat exhaustion and bad water.

Predictably, many of the memorials in churches are to men of the cloth, church workers including a surprising number of choir masters and church benefactors.

There are also many memorials to those lost in disasters – mining accidents, shipwrecks, bushfires and wars.

Of course many monuments are tributes to people we all know from history such as explorers, members of the royal family or political figures, and there are monuments that we know quite well but are ignorant of their story.

One such for me was the "Il Porcellino" fountain in Macquarie Street, Sydney at the entrance to Sydney Hospital.

This was sculpted in Florence and erected in 1968 by Marchese Fiaschi Torrigiani in memory of her brother and father, both of whom worked as honorary surgeons for Sydney Hospital, and also as a link of friendship between Italy and Australia.

It is a copy of a bronze work by Pietro Tacca which itself was inspired by an ancient Roman marble sculpture.

Monuments to animals are unsurprisingly frequent.

Annis and George Bills, great animal lovers, established a trust fund to provide horse troughs throughout the country and even overseas to give relief to thirsty horses and there are eleven of these listed. The Glenbrook trough is not listed.

A brass plaque in Sydney pays tribute to the part played by the Clydesdale horse in the development of Australia.

Continued page 26

Mare and foal, Scone

Matthew Flinder's cat Trim, NSW Library, Sydney

Ill Porcellino, Sydney Hospital

Aboriginal people also remembered in Wauchope

Continued from page 25

A statue of a ram at the side of the Cobb Highway near the Wanganella Village acknowledges the debt owed to the merino by Australian people.

On a wall in the Sydney Botanic Gardens the members of the Desert Mounted Corps erected a large plaque dedicated to the gallant horses that carried them over the Sinai Desert into Palestine in 1915-1918.

Another which I think we would all know is a statue and brass plaque erected by the North Shore Historical Society outside the NSW State Library in honour of Matthew Flinders' beloved cat.

A surprising memorial was erected in 1970 on the Hume Highway, Bargo, commemorating the first recording by Europeans of the lyrebird and koala.

Tessa, the Guide dog is remembered in Stockton – a realistic bronze Labrador on her haunches complete with guide dog harness.

Tessa and monument, Stockton

Aboriginal people are remembered too.

In Wauchope there is a bronze plaque mounted on a block of local sandstone in memory of the Aborigines of the Hastings River.

On the lighthouse at Norah Head there is a monument to Bungaree acknowledging his great help in surveying the coastline near Norah Head.

One of the most spectacular looking monuments was erected in Bondi Junction to acknowledge the origins of the Surf Life Saving Movement.

It is built of reinforced concrete in the form of a wave which is about to break.

One of the sweetest is a brass plaque in a Woollahra church erected by the employees of John S Hunter in recognition of the happy relationship which always existed between them.

And one of the most exotic is a brass plaque in a Mittagong church in memory of Florence Alice Stewart Rawson, wife of Admiral Sir Harry Rawson (21st Governor of NSW 1902-1909), who died in 1905 and was buried in the Red Sea.

The entries are arranged geographically.

The Blue Mountains has surprisingly few entries with only two for Springwood and only one of the amazing number of monuments at Mt York.

The book, in a different sort of way, is an index to New South Wales' social history – social values, historic tragedies and pioneering achievements.

GET INTO THE CHISTMAS SPIRIT

BLUE MOUNTAINS Branch of National Trust is having stalls at Leura on December 1 and Wentworth Falls on December 8, with a Christmas theme.

For more details contact Rhona Leach on 4757 2424

War Hero project launch

LITHGOW Family History Society will officially launch its *War Hero* project later this month.

The launch on Remembrance Day, Sunday November 11, will be held in the Club Lithgow (Bowling Club, 2c Lithgow Street, Lithgow with proceedings commencing at 2.30pm.

Guest speaker, Mr Joe Elkusch from Springwood RSL Sub Branch will talk about his World War 2 recollections as a boy, of the midget submarine attack on Sydney Harbour.

There will be a slide presentation by Helen Taylor of the *War Hero* project.

Also attending the function will be local resident Mr Ron Barker a son of "Digger" Walter Barker who served in the 6th Light Horse Battalion in World War 1.

Ron will bring to the launch for display, memorabilia brought home from Egypt by his father.

Cost of the afternoon including afternoon tea is $10.

Members of the public are welcome to attend. RSVP to Helen Taylor (02) 63 557 231 or Lithgow & District Family History Society (02) 63 531 089, PO Box 516, Lithgow 2790

In brief.....

Valley Heights 2013 calendar

FOR MANY years the Springwood Historical Society has produced an annual calendar featuring interesting historic photographs of the local area from yesteryear.

This year the calender will be a joint effort of Springwood Historical Society and Valley Heights Loco Depot Museum.

The 2013 calendar has now been released and features Valley Heights.

Valley Heights was chosen for this year's calendar to highlight the significance of Valley Heights Loco Depot in the lead up to its centenary celebrations in 2014.

The calendar is now available and retails at $10 plus $2 postage and package.

In past years the historical society has largely produced this as a community service and those interested in history and heritage might like to support the society by purchasing a copy and/or promoting the sale of the calendar.

The calendar can be ordered on line at richardmorony@optusnet.com.au or atmuseum@optusnet.com.au."

Glenbrook Historical Society office bearers

AT THE recent annual general meeting of Glenbrook and District Historical Society, Doug Knowles was re-elected as president.

He may be contact by e-mail at: sunvalley5@bigpond.com or telephone (02) 4751 3275.

Former Blue Mountains City councillor, Kevin Frappell kevinfrappell@gmail.com (02) 4739 8718 has been elected as vice president.

Mary Knowles was elected as secretary and Elizabeth Saxton (02) 4739 1426 has been elected as treasurer.

State award for Kurrajong Family History Group

MEMBERS of the Kurrajong-Comleroy Historical Society - Family History Group are to receive one of a number of 2012 NSW Government Heritage Volunteer Awards.

Pictured is Kurrajong-Comleroy Historical Society president, John Cooper advising the members of the Family History Group they have been recognised with the award. L-R Wanda Deacon, Carolynne Cooper, Joy Shepherd and Valerie Birch.

The presentation is to be made later this month in Heritage Branch, Office of Environment and Heritage, Parramatta.

The group has been involved in heritage projects related to research and recording of family and local history; the provision of advice to members of the public in relation to family history research; and the digital archiving of photographs and other images of the Hawkesbury and surrounding district.

This work is slow and tedious and group members have spent a tremendous number of hours during the past 7 years developing this collection's archives.

Ultimately the archive will be of immense value to researchers, scholars and students. It will also be a valuable model for other historical societies and groups.

VALLEY HEIGHTS LOCO MUSEUM AGM

THE 21st annual general meeting of the Blue Mountains Division NSW Rail Transport Museum will be held on Saturday, November 10, at the Valley Heights Locomotive Depot Heritage Museum commencing at 1.30pm

Apologies can be tabled prior to the meeting by e-mail at atmuseum@optusnet.com.au

Vintage and retro at Everglades

EVERGLADES will be hosting its second Vintage and Retro weekend on November 17 and 18.

This year, vintage and retro fashion parades will be featured. While the ladies relish the fashions of the 30s and 40s, the men can lust over polished vintage vehicles.

There's plenty of lush green lawns to sprawl over while watching your kids play hopscotch or quoits.

Everyone is being encouraged to dress the part.

Once you're done, you can learn to move and groove. All this and a lot more will be up for grabs.

Cost: Adult $14, National Trust members $10, concessions $12, children $8. family $35. Tickets/enquiries**:** 02 47841938

Lithgow Museums' Networking Group -- revealing the history of Lithgow

The Lithgow area is a hidden gem of history and heritage.

Visitors and locals alike can enjoy the history of one of the most fascinating areas in Australia through the many museums, historic sites and heritage organisations.

From Aboriginal history through to the history of the Small Arms Factory and from Hartley through to Glen Davis there are sites and museums to learn about Aboriginal, convict, mining, social, railway and factory history.

In March 2012 a group of museum and heritage organisation operators from the Lithgow LGA met at Eskbank House and Museum to have a chat about how they could help each other out.

From this initial gathering the Lithgow Museums' Networking Group was formed.

The group meets monthly and its aims are: educating each other to improve the quality of local museums, networking to promote each other's museums and share resources, co-operating to create a combined museum experience for visitors and sharing enthusiasm and to enjoy each other's company as museum and heritage enthusiasts.

A spokesperson for the group said it is exciting to be able to work together, take strength from each other and present a combined museums experience to visitors and locals.

There are 12 organisations in the group, some able to attend regularly others coming when they can or contributing via email, etc.

The groups include: Lithgow and District Family History Society (LDFHS), Lithgow Small Arms Factory Museum (LSAFM), Simmo's Museum, Eskbank House and Museum, Lithgow Library Learning Centre (LLLC), Lithgow State Mine Heritage Park, Lithgow State Mine Railway Ltd, Hartley Historical Village, Portland History Group, Rydal Village Association, Delta Expo and Newnes Pub.

Each organisation takes turns hosting the meetings and this has been an invaluable part of getting to know each other's museums and being able to share resources and promote other museums to visitors.

The group has participated in several group activities aimed at increasing visitor numbers to museums and generally get the word out that Lithgow's Heritage is amazing and worth a visit.

The first activity was an open day for many of the museums in the group on International Museums Day 2012. International Museums Day is in May and is celebrated by over 30,000 museums throughout the world.

With only a short time to organise and limited advertising most museums still saw an increase in visitation on the day of over 500 %.

The group has more plans for International Museums Day 2013 and also celebrating other international days like Volunteers Day 2012 with an afternoon tea for the wonderful volunteers in all these organisations.

The next group activity was a combined stall at Daffodils at Rydal. Photographs from the different organisations were displayed and pamphlets and postcards were handed out along with the first Lithgow Heritage Newsletter outlining heritage events happening in September and October in the region.

The most rewarding part of the day was talking to people about the museums and history and hearing their stories of the area. Perhaps this is in fact the most rewarding part of running a museum in general.

The latest event was a stall at the "Back to Hartley" celebrations on Sunday, October 28, 2012. This time the display included a "What is it?" table with a variety of mysterious objects for people to ponder, a "Who is it?" display of historic photographs of Lithgow citizens with space for people to comment, displays from the museums and projected historical images of the Lithgow area. Participants said, the most interesting part of the stall was talking heritage and history and spending time with other museum enthusiasts.

For more information contact Eleanor Martin, Lithgow District Family and History Society ldfhs@lisp.com.au 0429 932 319.

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or it's really going to happen!

Background and purpose of Western Crossings Committee

The Western Crossing Committee was established several years ago as a sub-committee of the Royal Australian Historical Society following discussions by the then presidents of both RAHS and BMACHO.

National Trust of Australia (NSW) local branches had also been discussing ideas for special activities in 2013-15 as far back as a decade or more ago.

BMACHO continues to be a strong supporter of the Western Crossing Committee of the RAHS and acknowledges numerous other committees have been established along the route from Parramatta to Bathurst including by Penrith, Blue Mountains, Lithgow, Hawkesbury and Bathurst city councils as well as individuals, business and historical and heritage groups.

The RAHS Western Crossings Committee's purpose is to provide a consultative forum on activities relating to the commemoration of the bicentenary of the crossings of the Blue Mountains by:

* Gregory Blaxland, William Lawson, and William Charles Wentworth in 1813;
* George Evans in 1813;
*William Cox and the road party in 1814 – 1815;
*Indigenous people before, during and after white exploration and settlement;
*Other persons including convicts who may have crossed the Blue Mountains before 1813 but not received recognition at the time.

The current chair of the Western Crossings Committee is Dr Anne-Maree Whitaker pictured who is also president of the RAHS.

---John Leary OAM

Grants for Macquarie monument and Private Smith's gravestone

Springwood Historians and the Springwood Historical Society decided that their special projects for the commemorations would be to work towards the rehabilitation/ restoration of the Macquarie monument in Macquarie Rd, Springwood and the grave of Francis Smith in the Springwood Cemetery.

We believe it is important to care for existing monuments and sites and to make their history more accessible to the public.

After the completion of thorough research by the two groups the state and federal government representatives and the Blue Mountains City Council were contacted and representatives from the groups met with council staff.

A council staff member has agreed that the Macquarie monument was of great historical significance and certainly in need of refurbishment and an interpretive sign.

Private Francis Smith who served in HM 4TH The King's Own Regiment is buried at the rear of Springwood Cemetery.

The old gravestone is damaged and the immediate environs untended.

Council agreed to apply for a grant on our behalf under the Federal Government's Community Heritage Program and the application was successful receiving $2272.27 for the Macquarie Monument and $2272.27 for the grave.

The grant funding under this program is being matched from Council Operation Plan funding for Cultural and Physical Assets for 2012-2013 which is allocated to the interpretation of cultural and physical assets and interpretive signage is going to be provided at both sites.

Aircraft fly over

The brainchild of Philip Hammon is a flyover of a diverse range of aircraft as part of the celebrations on Saturday, May 25, 2013.

It is anticipated that Tiger Moths, a Super Constellation and an FA -18 with fly across the mountains to co-incide with community events which will be organised at ovals and schools from where the aircraft can be viewed as they flyver.

The aircraft will land at Bathurst Airport where visitors can see the aircraft on the ground and meet pilots and crews.

It is hoped that RAAF, Navy and Army aircraft will also participate while the Royal Flying Doctor Service, RFS, Wespac Rescue and National Parks will also be invited.

A number of flying clubs have also been contacted.

Events workshop

A Blue Mountains Crossings 2013-2015 events workshop will be conducted later this month.

The workshop under the auspices of Blue Mountains City Council will be conducted on Thursday, November 29, 2012 at the Mid Mountains Community Centre, New Street, Lawson between 9am and 1pm

An invitation is extended to all interested in the event to participate

This workshop will provide information about the Crossings, how to register an event, what events are being planned and how to encourage public participation.

RSVP by email crossings@bmcc.nsw.gov.au .For further information Kerrin O'Grady at Blue Mountains City Council on 4780 5659

For more information about Western Crossing events contact: www.bluemountains crossings.com.au

350 years of Punch

RESPECTED *Sydney Morning Herald* political journalist, Peter Hartcher has alluded to the Australian parliament as a Punch and Judy show --- so *HERITAGE*'s editor John Leary has looked to history and has discovered this violent puppet show celebrates 350 years of performance in 2012.

Punch made his earliest appearance in the 14th century in Italy, in the Commedia del'Arte dramas, when he was Pulcinella.

Later, in France in the 16th century, he became Polichinelle, the "hunchbacked fool of French farce," and, in 17th century diaries and journals, he is seen in England as Punchinella, Mr. Punch, and finally, Punch.

Punch and Judy shows reached their greatest popularity in England in street shows, fairs, and small theatres during the 19th century. Until this time, the often-bawdy shows were directed to adult audiences, but now they had begun attracting more and more children.

Toy Punch and Judy shows began to appear. Like other toys, these playthings re-created in small scale the real-life delights of the world in which children lived.

Most of the puppets were made in Germany, hand-carved in wood or shaped with papier mache, with exaggerated features and colorful costumes, ranging generally from about 8" to 20" in height.

There were usually 6 to 12 figures in a set, though the number varied.

It's easy to see the appeal for children of the Punch and Judy shows – characters of all stripes, silly, nonsensical plots and dialogues, quaint, decorated, little stages. Often a live dog, Toby, sat in front of the stage with a ruff around his neck and a hat on.

Punch, could commit the most heinous of acts and get away with it! Throw the baby out of the window, whack his wife with a big stick, kill off the authorities that come to take him to jail, chase the ghost away, and, his greatest triumph, vanquish the devil himself, all with a merry grin. Pleased as Punch.

There was very little in the way of plot that the street watchers had to follow - Punch must contend with a shrewish wife and a screaming baby so he murders them both and is then forced to defend himself from the law officials and do-gooders who try to get him to the gallows.

The dialogues were passed on orally without much written down, but some authentic texts and scraps do exist.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: committee@bluemountainsheritage.com.au
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.
BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."
The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations. One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.
Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains, Lithgow and Oberon Tourism Limited, Blue Mountains World Heritage Institute, Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Hartley Valley District Progress Association, Kurrajong-Comleroy Historical Society Inc, Lilianfels Blue Mountains Resort, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committee, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low OAM, Ian Milliss, Patsy Moppett, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2012-13 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Judy Barham, Joan Kent, Doug Knowles, John Leary, Dick Morony (public officer), and Scott Pollock.

DISCLAIMER Views and opinions expressed in ***HERITAGE*** originate from many sources and contributors. Every effort is taken to ensure accuracy of material. Content does not necessarily represent or reflect the views and opinions of BMACHO, its committee or members. If errors are found feedback is most welcome.

NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

JANUARY - FEBRUARY 2013 ISSUE No. 25

Iconic Paragon at Katoomba under threat

The iconic Paragon Café at Katoomba which includes one of the oldest chocolate making factories in Australia, a candy factory and bakery is under threat of closure unless funding can be found to carry out urgent repairs to the roof of the building and over a longer period solve many complex issues concerning the continued use of the property.

The roof is just a small part of many, issues.

" Even had there been good maintenance programs in place all these years there comes a time when something of this age needs a major rework and the Paragon is at this point, the Paragon's lessee Ms Robyn Parker said.

"The problems are far more complex than a leaking roof and far more complex solutions than just this.

"The Paragon is an 80 year old piece of infrastructure in a modern world, trying to compete with modern cafes.

"The building is over 100 years old, the internal fitout is 80 years old and neither have been well maintained.

"What we are looking for from government is assistance to develop a conservation management plan combined with funding to assist in both conservation and restoration.

"It is hoped to develop a 5 year program to address conservation issues in order of priority.

"We are also looking for assistance to refit areas of the building that have fallen into a state of disrepair to enable them to be self supporting," Ms Parker said.

Panelled timber walls and plaster moulds of classical figures, adorn the Paragon cafe. Photograph courtesy Ian Jack.

The property is listed on the State Heritage Inventory Form as being: '...of state significance, reflecting the flair and taste of a Greek immigrant family with a wide experience in catering and the need for a high-class tea room, sundae parlour, confectionery and ballroom in inter-war [years] for locals and visitors'.[1]

In a bid to find assistance , Ms Parker invited the NSW Minister for Heritage Robyn Parker (no relation to the lessee) and the Member for Blue Mountains, Roza Sage to visit Katoomba, last month, to inspect the Paragon.

BMACHO president, Pamela Smith, vice president, Associate Professor Ian Jack, secretary, Jan Koperberg and former president, John Leary along with Blue Mountains, Lithgow and Oberon Tourism chairman Randall Walker also attended the meeting to support Robyn Parker's plea to the minister.

A daughter-in-law of the original owner, Mrs Simos, was also there to provide advice to the minister.

This shop is one of a suite of four built at 63-69 Katoomba Street more than a century ago.

The Paragon is one of the best known art deco restaurants and function rooms in New South Wales and its name remains a strong attraction to tourists.

In the early part of the 21st century the Paragon fell into a state of disrepair.

Robyn Parker, who has loved the place since she was a child, is the woman behind the reinvigorated Paragon. She is passionate about ensuring the survival of the Paragon.

"I was fascinated by it," she says. "I thought a princess must live here or something. It was just like nothing I'd ever seen."

Every Christmas, Robyn would travel to the Blue Mountains from her family's Sydney home and although she didn't pass through the Paragon's doors until she was much older, simply driving past was a highlight of every trip.

An opinion from the editor.....

Catostrophic bushfires --- may need family histories in survival plan

CATOSTROPHIC bushfires this month have swept across the Australian landscape, often leaving nothing in their path other than a household chimney standing like a single sentinel guarding the memory of lost history and part of our heritage.

Until the late 19th century, family histories were almost exclusively of interest to persons who had obtained their wealth or rank by inheritance.

Other people, who had inherited nothing, might, in extreme cases, suppress their family history as a matter of shame.

Since the second half of the 20th century in Australia, there has been a growing pride in the pioneers and nation-builders.

Much of our family history painstakingly researched and recorded is kept in private homes, while many artifacts of heritage value are housed in local history museums.

It is probably timely for a wake up call, that these recorded histories and artifacts need to be included along with our other treasures in our bushfire survival plans.

But one public figure who does deserve the community's thanks is the former Member for Blue Mountains and later Member for Macquarie, Bob Debus.

Bob Debus has an abiding love of the Blue Mountains and its people and his knowledge of local history and our cultural heritage is exceptional.

It was he, probably more than anyone, with his vision and tenacity, who ensured this project came to fruition.

While some see the cultural centre as primarily embracing the visual arts it also must be remembered that from the earliest time it was planned to be inclusive of our cultural heritage and to some degree this is being achieved through exhibits such as the World Heritage area exhibition.

Aboriginal people have lived in the Blue Mountains for many thousands of years.

The region incorporates significant parts of the traditional lands of the Gundungarra and Dharug tribal groups.

The cultural centre acknowledges the important histories of the traditional owners of the Blue Mountains region and the relevance of those histories to the Blue Mountains identity.

The Cultural Centre will play an important role in showcasing, celebrating and respecting the indigenous cultures of the region.

There are many aspects of our cultural heritage which will hopefully warrant subjects for exhibitions, particularly during the next three years as we commemorate the 'Western Crossings (1813 - 15)' bicentenary.

The Blue Mountains Cultural Centre is indeed a welcome addition to the amenities of this city.

John Leary, OAM - Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

Blue Mountains Cultural Centre worth long wait

There have been times in the past decade and more that some have doubted if they would ever live long enough to visit the Blue Mountains Cultural Centre, but it is now up and running. It is indeed a magnificent facility.

Many have worked hard to achieve that which was only a dream and they deserve credit; while there will also be many in public life who claim credit for which probably they do not deserve.

Minister for Heritage visits Paragon

Continued from page 1

"It was just so stunningly beautiful... and I fell in love with it," she says.

The Paragon, which used to be called the Paragon Sundae and Candy Store, was an upmarket cafe; somewhere where you wore your Sunday best.

It was brought to life in 1916 by a young Greek immigrant, Zach Simos, who'd moved to Australia four years earlier. By 1926, Zach had a roaring business.

In 2000, however, the Simos family put their beloved cafe up for sale.

By the time Robyn had the opportunity to take over in 2011 it was "almost dying".

"It was about at the point of collapse," she says sadly, explaining that the back rooms had been shut-up, an action which ultimately had been their saviour.

These back rooms, which are now set up as a dining room and charming piano bar, were added to the original building in the mid-1930s; the dining room in 1934 and the bar in 1936.

Both were designed in a glamorous Hollywood art-deco style by architect Henry White, who also designed the State and Capitol theatres in Sydney.

***L to r: The daughter-in-law of the original Paragon owner - Mrs Simos, The NSW Minister for Heritage - Robyn Parker, current lessee of the Paragon - Robyn Parker and the Member for Blue Mountains - Roza Sage.** Photograph courtesy Jan Koperberg*

Velour seats run along two walls of the lounge, behind which were once ornate plaster works and gilded mirrors.

Where the bar now stands, there used to be a stage, while the piano in the corner is the original.

Architecturally, the rooms are very significant, "but not many people know these details and it's one of the paradoxes of the Paragon," said Ms Parker".

"For something so special, it's been hidden all these years."

Although Robyn had always dreamt of owning the Paragon, which she says is Australia's oldest cafe, she knew she had, and still has, a monstrous task of restoration ahead of her.

The kitchen sink the staff washes up in is 80 years old, along with other infrastructure, posing numerous challenges. [2]

Internally, the Paragon restaurant retains its inter-war art deco interiors.

The front section has a panelled timber shop fit out and timber booth seating with panelled timber walls and plaster moulds of classical figures. Original chairs with the "P" motif for the restaurant remain in service.

The rear rooms of the Paragon are fitted behind the adjacent shops and feature a ballroom/dining room lined with timber veneers with a coved plaster ceiling to the south influenced by the décor of ocean liners.

To the north is the bar (former banquet hall) with perforated plaster frieze work showing a pre-Columbian influence in its motifs. The toilet spaces also retain much of their original fitout.[3]

The chocolate-making machinery, imported after World War 1 from France and America (and possibly elsewhere) is still in store upstairs and will soon be inspected by experts in the history of technology.

Continued from page 3

The four shops, 63 to 69, were built on Newlind's land in 1909 (photograph in Paragon).

The three to the north, 63 to 67, including the future Paragon, were all owned in 1911 by the Reverend John Russell, who was the Anglican rector of St Hilda's across the street from 1902 until 1913.

Since Russell did not own the fourth shop, it is likely that he was not responsible for building on the site but merely bought existing new shops as an investment.

Russell continued to own the properties as an income-earner until 1924, retaining thereafter only one nother investment property, 100-102 Katoomba Street .

The income from the various shops was no doubt useful to Russell when he went to Sydney as senior curate to the rector of St James .[4]

Russell leased his shops as three separate entities. No. 63 was by 1914 leased by a jeweller, LP Goldstein, who bought the freehold from Russell in 1924.

The shop was later occupied by another jeweller, H Lloyd, and is currently Mine Shaft Jewellery. This is remarkable consistency of use over a period of almost one hundred years.

No. 65 was leased by Russell to a series of shopkeepers, Sullivan in 1914-6, Dagon from 1917 to 1919.

By 1923 it was leased to Zacharias Simos as refreshment rooms, called the Paragon, and in 1924 Simos purchased both 65 and 67 from Russell.

Simos was a Greek migrant

Simos was a Greek migrant who had arrived in Sydney early in the century. After working and saving energetically, he arrived in Katoomba in 1916.[5]

An old Paragon 1 lb chocholate box in the memorabilia at the Paragon cafe. Photograph courtesy Ian Jack

After a period working as a caterer, in 1921 Simos bought the refreshment rooms owned by Miss Kelly and previously run by Mrs Banning at 110 Katoomba Street.

At the same time he also bought Miss Kelly's adjacent premises at n 112 - 114, then leased by the estate agents, Soper Brothers.

Simos was able to earn and save enough to retain 110 to 114 Katoomba Street while paying £9250 in 1924 for 65 and 67.

Simos and his wife were responsible for the art deco restyling of the Paragon in 1925 and for the addition of the banquet hall in 1934 and the Blue Room in 1936, utilising space behind 67 as well as 65.[6]

The high reputation of the suitably named Paragon was preserved by Mrs Simos after Zacharias' death and the tea-room has remained as a remarkably intact example of interwar art deco, outside and in, though it is no longer owned by the Simos family.

The fourth shop in the suite, 69, was never owned by Russell. From the outset in 1909 it was owned by Reuben S Hofman, who seems to have used it as his own draper's shop.

After his retirement, Hofman leased 69 initially to E Luce, also a draper, in the early 1920s, but it became a confectioner's in the mid-1920s, competing with the Paragon.

It was bought in the 1930s by Mrs Mary Simos, wife of Zacharias, so that the three shops, 65, 67, and 69, were all in the Simos family control. No.69 was always leased for income.[7]

This article was prepared by John Leary, OAM from various sources including those listed as references.

The editor is grateful to Ian Jack for his oversight of the text for this article.

McLaughlin lecture at Wentworth Falls

THE annual McLaughlin lecture organised by the Blue Mountains History Society will be held on Saturday, March 2, commencing 10am at the Wentworth Falls School of Arts.

Dr Siobhan Lavelle will be the guest speaker addressing the significance and impact of the Western Crossing.

Admission: by gold coin.

Paul Brunton to speak of the mysteries surrounding early explorers' rare manuscripts

THE MITCHELL Library holds the eye-witness accounts by William Lawson, William Charles Wentworth and Gregory Blaxland of their journey over the Blue Mountains in 1813.

Those by Lawson and Wentworth are in manuscript while that of Blaxland is a rare privately printed volume, published in 1823, of which there are only about 10 extant copies.

All three items were early acquisitions by the Library following its opening in 1910, perhaps indicating the contemporary view of the pivotal nature of this event.

Paul Brunton will speak about these original sources and the mysteries surrounding them at BMACHO's annual general meeting.

The AGM will be held at the Blue Mountains Cultural Centre, Katoomba on Saturday, March 23 commencing at 2pm.

Members of the association are welcome to have any interested person associated with their society to participate in the meeting in addition to one voting delegate.

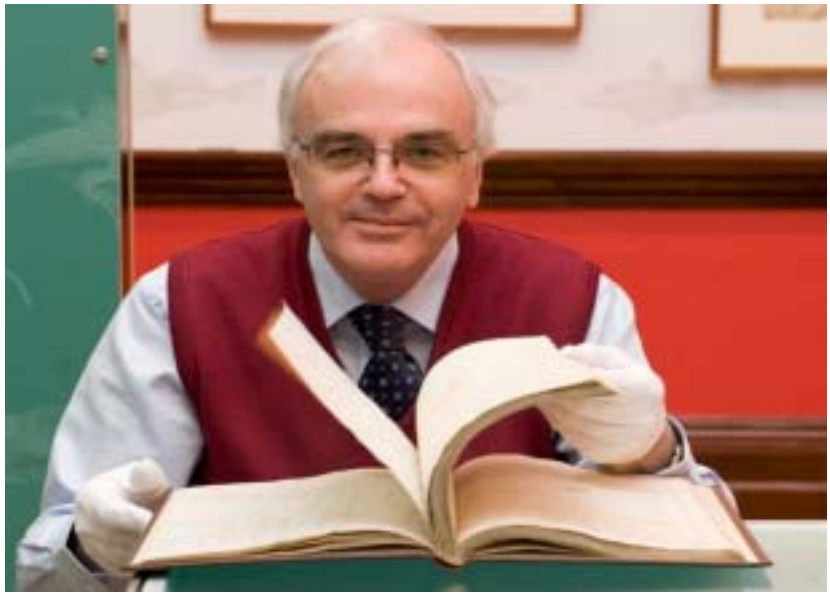
Those members of the public interested in history and heritage will also be welcome to hear this outstanding speaker.

Paul Brunton is Emeritus Curator, State Library of New South Wales and an Honorary Associate of the School of Philosophical and Historical Inquiry, University of Sydney.

He was Senior Curator, Mitchell Library, State Library of New South Wales, from 2002-2012 and Curator of Manuscripts from 1986 to 2001.

Paul has published on archives administration and on various aspects of the State Library's collection including *Matthew Flinders: personal letters from an extraordinary life* (2002).

He is preparing an annotated edition of the original handwritten journal and logbook of William Bligh kept on HMS *Bounty*, 1787-1789, for publication by Allen & Unwin.



Paul Brunton, OAM with the Stokes diary

Paul has curated many exhibitions including *Matthew Flinders: the Ultimate Voyage* (2001); *First Sight: the Dutch mapping of Australia, 1606-1697* (2006); *Politics and Power: Bligh's Sydney Rebellion 1808* (2008); and *ONE hundred* celebrating the Mitchell Library's centenary (2010).

He was president of the Australian Society of Archivists, 1991-1993. In 2003, he was awarded the Centenary of Federation medal for services to libraries.

In 2012, he was awarded the Order of Australia Medal (OAM) for services to Australian history through various curatorial positions at the Mitchell Library.

High point for Cultural Centre

THE BLUE Mountains Cultural Centre features the Blue Mountains City Art Gallery and World Heritage Exhibition which is devoted to education about the distinctive environment, history and culture of the Blue Mountains region which is co-located with the new Katoomba Library. The centre officially opened on November 17, 2012.

The Cultural Centre will showcase innovative, diverse, distinctive and creative cultural programs for enjoyment by residents of, and visitors to, the Blue Mountains.

Built on the highest point in Katoomba with panoramic views of the World Heritage area and its links to the main shopping precinct on Katoomba Street through enhanced pedestrian connections.

Being the first publicly owned and managed, purpose designed facility of the arts to be constructed in the Blue Mountains, it is expected that the development will significantly contribute to the improvement of the economic health and cultural vitality of the Blue Mountains and the surrounding regions.

HOURS OF OPERATION
Monday – Friday 10am-5pm
Saturday + Sunday – 10am – 4pm
Closed Public Holidays

Features of the Cultural Centre include:

- Foyer – providing cultural and visitor information
- Theatrette/seminar room – for seminars, talks and presentations
- Multi-purpose workshop – for educational public programs
- Cultural Centre restaurant / café – for fine food and outdoor dining
- Cultural Centre shop – providing quality craft and mementos of the Blue Mountains region.

Sydney Lord Mayor built Mountain mansion

by John Leary, OAM

THE SON of an Irish farmer and his wife, Charles Moore (1820-1895) emigrated to Australia in 1849 to make his fortune as a draper in the 'gold-rush era' going on to become Lord Mayor[1] of Sydney in 1867[2]

He soon prospered and in 1860, Moore built a substantial house at Coogee and was elected to Randwick Municipal Council going on to be elected as mayor in 1863 despite being in the Coogee minority faction.

During his term on Randwick Municipal Council he was also a member of Botany-Randwick-Coogee Roads Trust.

In 1865 he was elected to Sydney City Council for Bourke Ward being the lord mayor from 1867 to 1869.[3]

One of two Moorecourt gateposts still standing in Buttenshaw Park, Springwood,
Image - John Leary, OAM Nov 2012

Moorecourt . Image - Blue Mountains City Library HS0\196

Charles Moore built the single storey section of *Moorecourt* in Springwood in 1876, the rear two storeys being added in 1880.

At Pulpit Hill on the Mountains, there was an old government lock-up built of massive stone and Moore purchased it for a small sum, subsequently moving all of the useful material by rail to Springwood to build the cottage.[4.]

At once he became busy in local affairs and in 1876 he was a member of the committee which sought the establishment of a public school.

In 1878-79 he was listed in the Post Office Directory along with 23 others as a resident of the Valley.

In 1880 he moved into *Moorecourt* a mansion he had built on land which is now part of Buttenshaw Park.

Moorecourt became a ladies college in 1897 and ceased to be Springwood Ladies College in 1949. The building was demolished in 1956. [5]

As Mayor of Sydney, Charles Moore won the reputation of being an "improver". First elected as mayor in December 1866 by a large margin, again in 1867 by a similar majority and for a third term in December 1868

It was during his term as Sydney's mayor the site for the Town Hall was acquired, plans drawn and the foundation stone laid.

Moore induced the government to pass an Act transferring the old burial ground next to St Andrew's Cathedral to the Corporation, for a town hall site, thus eradicating what was seen as an eyesore in the best part of George Street, Sydney.[6.]

He successfully championed earlier plans for making dams to improve the capacity of the Botany swamps, Sydney's main water source.

He had the Tank Stream covered, Macquarie Street extended to Circular Quay and the Tarpeian Way (lower Macquarie St) formed.[7.]

Probably he gained most fame for improvement, involving the Sydney Common.

The land was part of 1000 acres (4.0 km^2) originally set aside by Governor Lachlan Macquarie in 1810 for grazing and watering stock.

This sandy waste was generally believed to be crown land but in 1866 Moore traced documents proving that in 1811 it had been vested in Sydney's inhabitants.

Moore fought for the land to be dedicated as a leisure area for the people of Sydney and suburbs He planned to improve and sell part of it to provide funds to improve half of the rest; the remainder was to be gazetted as a water reserve.

Continued page 7

Parklands a memorial to Charles Moore

Continued from page 6

The scheme was supported in parliament by the colonial secretary, Henry Parkes, and the secretary for lands, JB Wilson.

Early in 1867 work began on levelling the sand hills and planting them with grass and trees, and the council renamed the common 'Moore Park'.

Sydney's first zoo was established here in 1879 on 7 acres (28,000 m^2) of land known as Billygoat Swamp. The zoological gardens covered 15 acres (61,000 m^2) by 1906 but moved to Bradley's Head at the site now known as Taronga in 1917.

It was replaced by Sydney Girls High School which opened on this site in 1921.

Students transferred from Elizabeth Street, which became the site of the David Jones Department Store. Sydney Boys High School opened in 1928 on the remaining zoo land.

An infamous pack rape crime occurred in the park, leading to the 1886 Mount Rennie rape case. Nine men were sentenced to death and four were hanged despite controversy.

At the time of dedication, Moore Park was bounded to the south by Lachlan Estate and Randwick Racecourse, to the west by Dowling Street, to the north by Old South Head Road, and to the east by the Lachlan Water Reserve.

A road lined with stone and pines marked this eastern boundary of the park and the western boundary of the water reserve.

The Right Honourable Charles Moore, MLC

Moorecourt circa 1937 when the building housed Springwood Ladies College Image – Blue Mountains City Library HSO\O92

Two other roads crossed Moore Park prior to 1866; the first was known as Old Botany Road and was used by hunters and fisherman initially and later by pleasure seekers traveling to Coogee and Botany.

The second road provided a western entrance to a cemetery that was located off South Dowling Street.

The dedicated land encompassed the Tunnel Reserve (1827-1838), the Military Barracks and the Military Cricket Ground.[8.]

Charles Moore was one of Sydney's leading citizens and was also one of the outstanding pioneers of Springwood.

Born August 29, 1820 at Ballymacarne, Craven Ireland he was the 11th child of James Moore and Catherine Moore.

His grandfather and great grandfather were businessmen in Ballymacarne, but were believed to have come from London where they were connected with the Guilds of London and Sir William Moore who was Lord Mayor of London in 1395 is believed to have been of this family.[9]

Having decided to emigrate to Australia, he sailed from Plymouth in the *Minerva* in September 1849. At Adelaide and Melbourne he disposed of part of the consignment of drapery he had brought and was so impressed by the profits, he dispatched at once orders to London for further supplies.

In Sydney he was soon well established as a draper and shared handsomely in the prosperity of the gold-boom period.

Subsequently he acquired Charles Newton's auctioneering business in Pitt Street, Sydney.[10.]

Charles Moore was honoured by numerous memorials apart from Moore Park. Moore Street (Martin Place) was also named after him.

Other memorials to Moore's civic works include the Moore stairs at Circular Quay which were opened in 1868.

Years ahead of his time, he proposed an underground railway beneath York Street running from Central Station to Circular Quay.

In 1874 after a visit to England, he was elected to the Legislative Assembly as the Member for East Sydney to fill a vacancy created by the resignation of JAES Henry Neale.

Four months later the parliament was dissolved and in the ensuring election Moore was defeated.

Continued page 8

Continued from page 7
From 1880 until his death in 1895, he was a member of the NSW Legislative Council.

Charles Moore was deeply interested in the Church of England.

In St Philip's Church, Sydney there is a plaque to his memory. He was also involved with St Jude's Church in Randwick.

In Springwood, he first used part of his home for church services and after the appointment of a rector; he donated land and much of the money to build Christ Church. This was completed in 1889.

…a seemingly obstinate man

Moore was seemingly an obstinate man, both at St Jude's and at Springwood he had violent differences of opinion with other church members.

In Springwood one result of this was that he never transferred the house next door to the church to the trustees.

Moore had built this as a vicarage but after the disagreements it was no longer used as such.

The land on which the Lawson, Church of England is built was in Moore's name for many years.

Moore held other public positions on the Blue Mountains, such as trustee of the Springwood Cemetery and trustee of various sights and recreation areas in Lawson.[11.]

In July 1895 Charles Moore, MLC died in Old Government House, Parramatta where he had moved from Springwood when it was found necessary to have his medical advisers constantly at hand.

He was buried in the Church of England section of Emu Plains Cemetery on July 6, 1895.

He was twice married but there were no children from either marriage.

In January 1854 Moore had married Sarah Jane Wilcox, who died without issue.

In 1882 he again visited Europe and in 1883 at Kingston, Ireland, married a widow Annie Hill Montgomery.[12.]

The gateposts of *Moorecourt* were removed by the Blue Mountains City Council and reerected in the Wisteria Walk, Buttenshaw Park.

His coat of arms, showing the inscription 'Moore of Springwood' is evidence of his love for and interest in this district.

End notes

1. Charles Moore is variously referred to in this article as Lord Mayor and Mayor of Sydney. The office of Mayor of Sydney along with the Sydney municipality was created 20 July 1842 pursuant to the Sydney City Incorporation Act 1842 by Governor Sir George Gipps, of the New South Wales Legislative Council. This replaced the previous system under an Act of 1833, whereby three police commissioners were responsible for local conditions. The office of mayor was elevated to lord mayor in 1902 by King Edward VII, and as part of this process received the honorific The Right Honourable (The Rt. Hon.).

Welsh coal mining museum goes solar

A COAL museum seeking to save money on its electricity bill has installed 200 solar panels on its roof.

The panels at Wales' Big Pit National Coal Mining Museum are expected to save the museum about $618,000 over 25 years, the trade magazine *Renewable Energy World* has reported.

Not a bad deal for an up-front cost of about $100,000.

"Coal is such an important part of Wales' heritage and yet green energy will play a major part in the future,"

The museum manager has said. "A solar powered coalmining museum is a fantastic way to celebrate this national journey"

Big Pit shut down in 1980 and reopened three years later as "a living , breathing reminder of the coal industry in Wales and the people and society it created", according to the museum's website.

UNESCO named it a World Heritage Site in 2000.

Annie Davis – governess, gossip and go-getter

By Kate Nielsen Matthew

Governesses in Australia can be difficult to locate in the historical record.

Often only a shadowy reference in an employer's records, or a notation on an immigrant ship manifest, gives a clue that a governess had a part to play in that story.

Despite the impression of insignificance that these glimpses might suggest, governesses played a significant role in the history of Australian education in the nineteenth century – holding positions in both rural and urban homes and teaching the young ladies of the colony English and history as well as music, singing, drawing, dancing and how to navigate society.[1]

Through one of those serendipitous occurrences that historians are greatly indebted to, a body of letters survived to illuminate the individual lives of a group of English governesses who emigrated to Australia in the 1860s and 1870s.

The Female Middle Class Emigration Society assisted these women to travel from England to the Australian colonies in search of jobs.

In return, many of the women wrote to the Society giving their views on life in Australia, the employment prospects for governesses, the class and quality of employers, and sometimes on each other.[2]

Annie Davis was one such governess.

Opinionated, gossipy, and apparently quite good at her job, Annie's letters help to shed some light not only on her life, and that of her fellow governesses, but also on the position of women in a time of growing expansion of opportunities and personal freedom - if they could maintain economic independence.

Annie emigrated from England in 1863, arriving in Melbourne in July of that year.[3]

She was an experienced governess, with a comprehensive range of skills.

She could teach French, German, music, singing and drawing, and although English is not mentioned within her skill set, competence in English literature and poetry was assumed.[4]

This was typical of the range of subjects taught to young women in the 1860s, with some variations on the theme of accomplishments depending on whether the governess played piano or violin, and was better at drawing or painting.

The choice of subjects was limited both by what society felt was necessary and desirable for female education, and by what the governesses themselves were capable of teaching.

As a result, educational reform for women was slow, and it was not until the 1880s that university educated governesses began to flood the market in Australia.

In the process they displaced many of the British governesses who were still trying to find work teaching what they themselves had learned during what was best described as 'a very indifferent education'.[5]

However, the 1860s was still the halcyon days before this revolution in teacher education had occurred. Annie's range of skills meant that, unlike many of the other governesses, she was rarely unemployed.

She had six positions that we know of after her transfer from Melbourne to Sydney soon after her arrival.

After 13 months working for Donald McIntyre at Glebe, where she was paid £90 per annum in addition to her board to educate three girls, Annie found herself unemployed and forced to take a morning engagement, which was 'not well paid', for six months.[6]

This was not unusual in the governessing profession. Contracts were often only for six months or one year, after which time they could be dissolved by either party for any reason.

Annie's next position was with William Durham's family at Wambo in the Hunter Valley, but again this only lasted six months.[7]

Between June and September 1865 she taught at two different schools, but again found some stability with the Allen family (a well-known Sydney family of solicitors) in January 1866.[8]

Continued page 10

The Governess. painted Rebecca Solomon (1832-1886), ca. 1851, exhibited at the Royal Academy 1854. In this image the governess wears black clothes and is occupied in teaching her pupil, while the probable daughter of the family that employs her is wearing a bright-colored dress, and is musically flirting with an eligible man.

Continued from page 9

Despite very short contracts, Annie was well paid – averaging between £80 and £90 per annum plus board – which was a reflection of her superior skills.

At the time, the average wage for governesses in Australia was approximately £67 per annum, slightly higher than the English average.

It remains difficult to explain why Annie did not apply to join the school system as a teacher.

The rates were far better, as were the hours and the level of personal independence and freedom.

One of her fellow FMCES emigrants – Louisa Dearmer – did pass the examinations required to join the state school system in New South Wales, and was earning £150 per year.[9]

Of course, governesses usually lived with the family, and therefore the cost of their room and board was added to their salary.

However, even with that taken into account, the position of school teacher was still better paid and was accompanied by more personal freedom and independence.

One reason why Annie might not have gone into the school system was the change that would have made to her social position.

Governesses at the time were largely considered to be ladies, a description that carried some very loaded connotations in nineteenth century society.

The stereotypical Victorian lady of leisure was an aspiration for English society as a whole, and although it was diluted considerably in the British colonies the concept of a lady in Australian society still required that she did not earn her own living.[10]

The role of governess, especially one that lived with the family, was one of the few that preserved a veneer of gentility by hiding the employment relationship within the household dynamics – in the same way that the position of lady's companion did.

Many of the advertisements in the newspapers of the day were worded as though the governess was looking for a home rather than a job, and that she would bestow her services only on those worthy of her efforts.

Annie's letters, however, suggest that she may not have been one of those women who feared losing the veneer of lady-like respectability that came from governessing.

Although initially reporting that Mrs Dillon, the Society's contact in Sydney, should be accurately described as a scholastic agent rather than a philanthropic contact to Society emigrants to 'save Ladies some embarrassment', she later described her as having 'been a kind friend to me', suggesting an ongoing social intercourse. [11]

A further counter-point to the typical governess attitude lies within Annie's description of the shelf-life of governesses (no one over 40 had much in the way of career prospects in her opinion) and her declared intention to re-train as a nurse.[12]

…marriage was not for her…

Annie had no intention of marrying, and saw nursing as a way to prolong her ability to earn her own living.

This recognition that marriage was not for her, and the foresight to plan for her future, distances Annie from those who were determined to maintain their status as ladies at all costs.

It is possible that she would not have been able to pass the teaching exam, but her ability to command a high salary as a governess in addition to her room and board makes this unlikely.

This aspect of Annie's career remains irreconcilable with the traditional parameters of a governess' life.

Gossip was not unusual in the letters that governesses sent to the FMCES.

In the nineteenth century, good-natured gossip was one of the few ways of getting news about mutual friends or acquaintances.

Reports of marriages, job changes, successes or failures were common reports back to the Society, and the Secretary, Jane Lewin, encouraged these reports from the governesses as much as possible.

However, Annie took it to a new level and, amongst the more than 450 pages of letters transcribed in the FMCES records, Annie's represent a very few correspondents who engaged in gossip of a malicious variety.

The worst offence was against two fellow governesses, who had been employed by the Allen family before Annie took up her position there.

She wrote to Miss Lewin that 'Miss Maize … is a little insane', for which she offers no evidence except Miss Maize's propensity to change jobs regularly – something that most governesses did.[13]

Her charge against Miss Ford was more serious.

Annie reported that 'I believe her salary here was the same as mine but during the six months she spent every fraction she earned and ran up bills at two or three Drapers to the sum of £90!! making use of Mrs Allen's name.'[14]

It is a serious charge, but Annie's source was Mrs Walker, mistress of a boarding house, rather than anyone connected with the Allen family, so its veracity is difficult to determine.

Gossiping about her fellow governesses was not her only offence.

Two years earlier, Annie repeated some negative comments she had heard about the Society to a friend in England, which subsequently got back to London and proved very embarrassing for her correspondent, Jane Lewin.[15]

Although Annie was repentant in her letters, there is no evidence that it curbed her enthusiasm for gossip.

What we can piece together of Annie's life is therefore both typical and atypical of that of a governess in New South Wales.

She was typical in terms of the subjects she taught and the number of times she changed jobs, but atypical in the salaries she could command, her almost continuous employment and her pragmatic approach to her future.

Continued page 11

Annie Davis the governess

Continued from page 10

She was a delightful correspondent: entertaining, with an eye for gossip and a willingness to express her opinion with more candor than is often seen in letters of this nature.

Annie Davis' story ends with her last letter to the FMCES in February 1867, and although there are some clues, no further information can be verified at the present time.

The author Kate Matthew

Kate Matthew (BA, MHist) is a historian based in the Blue Mountains.

In addition to governesses in nineteenth century Australia, her research interests include John Lucas MLA/MLC and the Fourth Parliament of New South Wales (1860-1864).

Kate was recently awarded a grant from the Royal Australian Historical Society to research the history of the site currently occupied by the RAAF Base at Glenbrook.

She is a member of the Blue Mountains City Council Heritage Advisory Committee and a casual lecturer at the Australian Catholic University at Strathfield.

Kate Nielsen Mathew

HERITAGE newsletter alive and well in USA!!

Family historians are great 'detectives' and have very little trouble tracking down distant relatives, especially these days with modern technology.

In late September, I had an email arrive in the BMACHO gmail account, through the enquiry form on the BMACHO website, marked for my attention.

It was from Michael Thompson, who gave his location as USA.

Michael had seen my article **online** in the *HERITAGE* newsletter, September/October 2010, titled 'John Ross, Convict Labourer on the Cox's Road in 1814'.

He was writing to say that he too was descended from John Ross and Elizabeth Bennett, but through their son George Ross, whereas I am descended through their daughter, Mary, born 1814, while her father was labouring on the first road over the Blue Mountains with William Cox.

Michael was asking if he could add my article to his personal research, with appropriate acknowledgement, to which I agreed.

He went on to say that living in USA, he has to rely very heavily on the internet to gather information about his Australian ancestors.

I am pleased Michael found the *HERITAGE* article and that I was able to be of assistance.

23 March 2013

Australia Day breakfast in a Kurrajong vineyard

AUSTRALIA Day breakfast in a local vineyard seems a great idea!!

Kurrajong-Comleroy Historical Society is organising the event to be held at Remo's & Sons Vineyard, 58 Blaxland Ridge Road, Kurrajong on Australia Day, January 26.

The event will celebrate the 12th anniversary of the founding of Kurrajong-Comleroy Historical Society and selective awards will be presented for outstanding contribution to the society.

Cost of the breakfast is $35 per person, scheduled for 8.30am for a 9am sitting. The awards will be made at 10am.

Bookings before January 15 to the society's secretary, Suzanne Smith at (02) 4567 7410 are essential to allow for catering.

BMACHO JOINS PLANNING LOBBY GROUP

FOLLOWING an article by local heritage consultant, Margi Fallon and an *Opinion* piece titled, *Heritage goes missing from proposed NSW planning reform* both of which appeared in the November-December 2012 edition of *HERITAGE*, the Blue Mountains Association of Cultural Heritage Organisations Inc, has accepted an invitation to join the Better Planning Network.

Former president of the Royal Australian Historical Society Inc Associate Professor Ian Jack says: "the Better Planning Network is bringing together the dismay felt by many people. Margaret Fallon is drawing attention to what is happening, in her role as a heritage consultant."

Former president of BMACHO, John Leary OAM said:"the NSW state government is proposing legislation to remove the rights of individuals under the guise of streamlining the planning process.

"What that means is making it easier to get developments approved by removing community consultation from the approval process.

"The proposed legislation which has been outlined in a government green paper, A *New Planning System for NSW* will remove the right of communities to have a say in development proposals and planning matters directly affecting their lives.

" It will also diminish the role of elected councillors".

BMACHO president, Pamela Smith has said: "the Green Paper is frightening and heritage is only mentioned four times.

BMACHO's management committee in discussions last month decided to suggest that constituent members of BMACHO may also wish to join the Better Planning Network.

The planning reforms and process for consultation can be viewed at: http://www.planning.nsw.gov.au/a-new-planning-system-for-nsw. or to connect to the Better Planning Network at: http://betterplanningnetwork.good.do/nsw/email-the-premier/

Better Planning Network (BPN) has advice from the NSW Planning and Infrastructure that the government's white paper will be released in early February 2013. It has been suggested that the consultation period on the white paper may be as short as 2-4 months.

BPN has advised the department that this timeframe (particularly anything less than 4 months) is unacceptable.

Veteran journalist's epic walk

Newly elected chair of Woodford Academy management committee, Ian Harman and local historian Ken Goodlet late last month joined veteran Fairfax journalist, Malcolm Brown for part of the way on his walk from Sydney to Dubbo to draw attention to this year's bicentenary celebrations of the western crossing in 1813.

As he passed through Woodford he inspected a section of William Cox's Road.

In a bid for a wider impact from his epic walk Mr Brown hopes it might encourage people to get out of their cars and see the world from a wider perspective.

When he was a child, Mr Brown said it was not unusual to see Aboriginal people walking between towns — a notion that would seem alien for anyone today.

200 years since Bennelong died

Researchers believe they have located near Kissing Point, the grave of Benelong a leader of the Eora people.

Bennelong was brought to the settlement at Sydney Cove in November 1789 by order of the Governor Arthur Phillip who planned to learn the language and customs of the local people living around Sydney Cove.

January 3, 2013 marks the 200th anniversary of Bennelong's death.

Portrait (signed "W.W.") thought to depict Bennelong

Inside and outside museums in Burma

Peter Stanbury, OAM, PhD

A typical sunset in Burma

What seems a good idea at the time doesn't always turn out the way one had envisaged.

As Burma has been open to individual visitors for over a year it seemed an enticing place to visit *en route* to the UMAC (International Committee for University Museums and Collections) conference in Singapore.

Actually it is not really on the way at all, it is further north and west and one has to go via Bangkok or Kuala Lumpur. But what does that matter, once you have decided to go?

There are still places in Burma where visitors are not welcome, mostly near the borders of other countries, but there is still plenty to see and one feels welcomed by smiles and offers of advice from ordinary citizens.

Official welcome is less encouraging. A visa takes a month to obtain.

There is not one public ATM in Burma at the time of writing – this means you must carry an uncomfortable amount of cash that can normally be exchanged only at official banks. However, not once did I feel threatened by theft.

My reason for going to Burma was to see if the national or regional museums would appreciate volunteers as in Cambodia or the Philippines.

In spite of writing beforehand and offering in person it became clear that museums are still under strict control.

Locals seldom visit and it seemed to me, few international visitors bother to go.

The buildings are enormous caverns; in the galleries large historical exhibits cower along the walls.

Both labels and staff are scanty. Staff appear to be under strict instructions not to encourage communication; it is as though there is behind the scenes still a strong governmental control or influence.

Photography, with or without flash, within museums is prohibited for no good reason.

Private citizens with a collection of important objects may not start their own museum.

The conservation of animals and plants appears to be treated by the authorities as important; national parks are established and there are trained rangers within the parks.

Burma is a land of spiritual people. Whereas Chinese often make money make more money, wealthy Burmese would rather endow a pagoda, temple or build a religious structure.

There are thousands upon thousands of temples and stupas, a few big and well patronised but many small and in ill repair.

To become a monk, or work for monks, even for a short time, is considered an important contribution to one's life and to the community. Buddhism is the way of life.

The pagodas and the philosophy of the people make the whole of Burma a living museum, so visit as soon as you can and enjoy whatever it is that fascinates you: you find it there in this country of 50 million people (5 million in the big city of Yangon (Rangoon).

As in any Asian country, many crafts are practiced – weaving, lacquer work, carving and gilding although some souvenirs and many useful and industrial objects are imported.

Before the military rule people in different regions of the country wore distinctive clothing; even in one region clothes clearly distinguished one's position in the community.

Meals are built around rice with the addition of curry, clear soup, hot dip and vegetable fingers to scoop the dip, salad and cooked vegetables, crisps of some dried vegetable, followed by fresh fruit – really a mixture of Indian and Chinese cuisine.

Bagan Museum

Robinson's remarkable large scale maps of the Shire of the Blue Mountains

By Peter C Rickwood and Peter R Atherden --- Blue Mountains Historical Society Inc.

For the first time, a set of 80 early 20th century detailed maps of the settled parts of the Blue Mountains have been made convenient to use. These are a most valuable resource for historians who now can not only readily read the information on these maps using computers at either the Springwood Library or at the Blue Mountains Historical Society Inc., Wentworth Falls, but also can obtain jpeg files of small areas.

Herbert Edward Cooper Robinson, (1856-1933), a renowned map maker and map publisher from 1895[1], was commissioned in 1912 to produce detailed maps of the Shire of the Blue Mountains.

However the contract was contentious and Robinson's quotation was held over at the April meeting of the Shire Council[2] only to be reconsidered in July[3] when it was confusingly reported that: "Mr Robinson, of Sydney, had quoted £320 for the supply of 242 maps in sections ..." to be supplied over a period of four years. But it was moved that: "Ninety five maps of a scale of 8 chains to one inch would be required at once."

When the order was acknowledged in August[4] there were to be "... 93 maps at £3.10s each ..." drawn at an unspecified scale, and some councillors protested because the contract had not been put out to public tender.

Surprisingly it was reported in September 1913[5]: "In the office of Mr RB Paterson will be seen the complete series of maps of the Shire of the Blue Mountains, issued and published by Mr HEC Robinson, Government cartographist.", which seems dubious and may relate to only a part of the order.

Eventually the maps were provided at a scale of 4 chains to an inch [1: 3,168] but exactly how many is uncertain. Goodacre[6] wrote that: "Early in its history the firm began work on the first ever large scale map of the Blue Mountains area, for the Blue Mountains Shire Council. It was on 90 sheets, each measuring 30" by 40" and it took the draughtsman, Mr CH Richards, three years to draw. Herbert Robinson himself did survey work for it."

Four partial sets of these 4 chains to an inch maps are known to exist, two sets of original maps and two of copies.

One set of original maps is held by the Blue Mountains City Council Local Studies Library (BMMCLS - 80 Sheets) at Springwood and a second by the Blue Mountains Historical Society (BMHS - 64 Sheets) at Wentworth Falls.

A third set at the Mitchell Library[7,8] (84 Sheets) consists of "blueprint" [9] copies (white print on a dark blue base) and the fourth set is in the National Library of Australia (26 Sheets) but as shown on their website[10] these are "paper prints in negative format" [11] (white lines on a black background).

These sets overlap in area coverage and between them there are copies of 86 sheets. Four copies of the index map are known[12] on which are outlined 211 sheets but many parts of the shire area were wilderness and so were not mapped.

Clues come from notes printed in vacant space: eg on Sheet 112 (BMCCLS) has a signed annotation " H.E.C. Robinson 15 November 1915" (Figure 1) and Sheet 127 (BMHS) "H.E.C. Robinson 1st Decr 1915" which may be handwritten. Sheet 93 has a similar note dated 1.12.13 but with a printed name and not a signature.

Before attributing a date to a map from such an addition, that text needs to be carefully inspected to see if it is printed or if it has been skilfully added to a base map in drawing ink; that is not always easy for some of the printed text seems to be handwritten as in Figures 1.

For convenience, 1915 is the date used here for these maps despite the fact that it post-dates the 1913 completion date reported in a newspaper[14] but it does fall within the three years that the draughtsman was said to have been working on these maps[15].

However in their catalogue the National Library of Australia [16] use 1947 and explain: "Publication date based on latest date appearing in series. Sheets 101 and 116 "Proclaimed City of Blue Mountains 19th September 1947"

[Not seen on BMCCLS or ML maps so they pre-date 1947]. That information seems to be printed on the maps so might these be re-prints of the originals?

These maps are some of the most detailed of the Blue Mountains and they contain a lot of information of interest to historians researching aspects of the settled areas, such as original owners, Certificate of Title Volume and Folio numbers, Estate names, planned roads etc. (e.g. Figure 2).

Continued from page 15

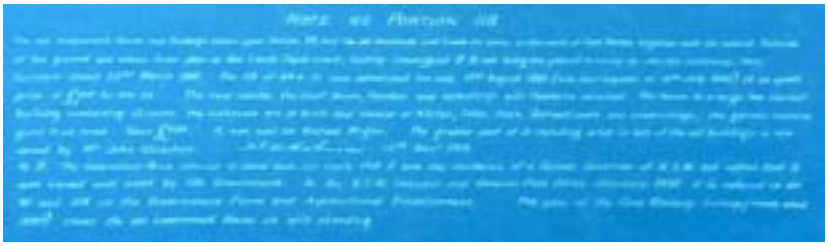

Figure 1. Text written on Robinson's Sheet 112 (ML Collection).

Some of the most detailed of the Blue Mountains

Continued from page 14

But the maps are “40 inches x 30 inches” (101.6 cm x 76.2 cm) on sheets 109 x 87 cm so are cumbersome to use.

This is not helped by one set being stored in a basement archive in a vertical hanging map cabinet (BMCCLS); the second partly flat in a horizontal map cabinet but mostly in rolls (BMHS) and the third set (Mitchell Library) is inconveniently bound into two very heavy ‘books’.

Moreover some maps in the BMCCLS and BMHS collections are cracked and shedding patches from their linen backing so that they are now very fragile.

It occurred to one of us (PCR) that it was high time that these be copied in electronic format both for preservation of the information and for convenience of use, and the other of us (PRA) had the photographic skill and equipment to make this possible.

So with the help of Mr John Merriman, local studies librarian, Springwood, the BMCCLS collection of 80 maps has been photographed in recent months and a complete set of images (as jpeg files) has been burned onto CDs for examination on a computer. These CDs can be consulted at either BMCCLS or BMHS, and it is possible to extract a part of any map as a jpeg file for use in publications.

DEATH OF SPRINGWOOD HISTORIAN

A founding member of Springwood Historians, Lindsay Paish passed away peacefully in his sleep in the first days of the new year.

He was a contributor to *HERITAGE* and will be sorely missed by many.

Scenic Railway's final trip

KATOOMBA'S Scenic Railway will depart on its last journey down to the pristine rainforest floor on January 13, 2013

The world's steepest passenger railway at 52 degrees is being replaced by a new Swiss-designed train and railway line under a $30 million redevelopment of Scenic World, expected to be completed by Easter 2013.

Fondly known as the 'Mountain Devil', the current train has taken 700,000 journeys through the rainforest corridor to a parcel of the World Heritage – listed Jamison Valley.

Siblings and Scenic World joint managing directors, Anthea and David Hammon, said the decommissioning of the train would be a nostalgic time for their three-generation family business.

"This train has been a big part of our childhood, the generations before us, and the wider Blue Mountains community," said Mr Hammon.

"But it is now time for a new chapter at Scenic World and this railway transformation will provide our visitors with a fresh perspective on the rainforest with some new surprises with our history."

The legendary Scenic Railway was originally part of the remarkable

The Scenic Railway in earlier days

technology that accompanied mining activities in the Jamison and Megalong Valleys.

Philip Hammon and Philip Pells in their fascinating book, *The Burning Mists of Time* relate how some of the engineering works became part of one of Australia's major tourist attractions under the stewardship of Harry Hammon.

The coal mine operated until 1945 when the loss of a contract to provide coal to the Katoomba Municipal power house caused it to close.

The incline had however been carrying paying passengers for many years before this, because the construction of the Giant Stairway, the Furber Steps and the Federal Pass walking tracks brought many hikers to the foot of the incline, begging for a ride to the top.

They were initially carried inside the coal skip; a little plank was installed at the back for the attendant miner to be seated, and hessian sacks were draped over coal dust coated planks to protect the passengers clothing.

A 12 seater car was built, called "Jessie". Jessie was used on weekends and public holidays carrying passengers at sixpence a time.

History etched in glass

More than 13,000 glass negatives forming the Fairfax Archives Glass Plate Collection have been donated to the National Library of Australia.

The photographs taken by Fairfax photographers between 1908 and the mid 1930s, will be restored and put in digital form in a partnership between Fairfax Media, the National Library and the government's National Cultural Heritage Foundation which contributed $425,000

Australia's rarest collection of photojournalism is an evocative insight into another time.

Not just into the events of that time - Depression-era dole queues, the first ANZAC Day march, bustling life in Sydney's streets but also into the intricate art of glass plate photography that was common a century ago.

The National Library of Australia's director-general, Anne-Marie Schwirtlich has said the collection was particularly significant for Australian's understanding of the early 20th century.

These images are special because they provide a complete archive of photojournalism during the era.

There are no comparable newspaper photo archives, "Ms Schwirtlich said.

The director of information services at Fairfax Media, Chris Berry, who has led the project over the past three years, said the goal was to preserve the images for all Australians.

'A lot of the stories are familiar ones, but the vivid nature of the glass plates bring them to life."

The collection is expected to be available online by the middle of this year.

The Sydney Morning Herald

The Cox's Road - Caley's Repulse named by Macquarie on a false premise

THE NSW Heritage Office in April 2011 concluded it will list representative portions of Cox's Road as part of the 1813 bicentennial celebrations of the crossing of the Blue Mountains in recognition of the importance of the road in the history of opening up western NSW.

Much of the credit for the initiative to have the NSW Heritage Office reach this decision has come from the Cox's Road Steering Committee formed in July 2006 to look at long term objectives and mechanisms to preserve the 1814 Cox's Road alignment between Emu Plains and the Blue Mountains and Bathurst. The committee was formed with delegates from the Lithgow, Blue Mountains and Bathurst branches of the National Trust of Australia (NSW), and operates under the auspices of the Trust as an informal committee.

For the November-December edition of *HERITAGE,* convenor of the Cox's Road Project Committee (CRPC) who is also an individual member of BMACHO, Patsy Moppett pictured, produced the first of a three part series of articles to provide some of the detail for each precinct of the road.

In this edition, Patsy covers the Caley's Repulse and Mt York precincts.

By Patsy Moppett

The Caley's Repulse precinct is located off Railway Parade, Linden, on the ridge above the railway line and highway and to the north-west.

It is so named from the legendary "pile of stones", but does not define the location of the stones.

When Cox came to construct this section of road, he chose a lower route than Evans had surveyed, where the high rocky areas gave way to the more flat rocky areas.

In spite of this choice travellers found the going a jolting ride, and many small deviations sought to find a more comfortable way through.

Even though Mitchell's route was laid in 1835, the old route was still in use as late as 1839.

The precinct is defined by a series of low rock cuttings and kerbs, rutted stone pavements and a small section of side drain.

The common width of the road in this vicinity is 6-7m, with almost vertical faces up to 60cm. Chisel and pick marks are common, and the rock shelves show signs of the scraping of vehicles drawn over the rocky surfaces.

Pile of stones fenced in 1974 appears not to been built by Caley as records indicate he did not penetrate into this part of the mountains

In her report *Cox's Way*, Grace Karskens states that the precinct is "one of the longest and most intact sections of Cox's Road across the rocky ridge, and illustrates the simple methods and tools used by the gangs.....the rocky platforms and wild appearance of the area give a clear picture of the conditions of nineteenth century transport and travel".

The following extracts are taken from records of the time contained in *Fourteen Crossings of the Blue Mountains,* all observations referring to a "pile of stones".

Blaxland, Lawson and Wentworth - May 19, 1813
"….. from this ridge they first began to have an extensive view of the settlements below at a little distance from the spot they descended they found a heap of stones piled up in the Shape of a Pyramid by some European one side of which the Natives had opened if apparently to see if anything was deposited in the Middle……."

Assistant-Surveyor Evans - November 21, 1813
"….. at about 11 o'clock I passed the Pile of Stones alluded to by a former party: soon after we were on a very high hill, which was clear of Mist…"

William Cox - September 1, 1814
"Retained eight men to work on the bridge. Sent the rest forward road-making….."

Continued page 18

From Evan's Cave 'a view of the country as far as the eye can carry you'

Continued from page 17

September 3,1814
"The road finished to Caley's heap of stones, 17 ¾ miles".
September 4,1814
"Removed forward to Caley's pile...went to Caley's pile, and from thence up the rock to Evan's cave you get a view of the country from north-west round to south-west as far as the eye can carry you".

Governor Lachlan Macquarie April 27,1815
"Near to the 18th Mile Mark (it is to be observed that the measure commences from Emu Ford), a pile of stones attracted attention; it is close to the line of road, on the top of a rugged and abrupt ascent, and is supposed to have been placed there by Mr Caley, as the extreme limit of his tour – hence the Governor gave that part of the Mountain the name of "Caley's Repulse". To have penetrated even so far, was at that time an effort of no small difficulty."

Major Henry Colden Antill - April 27, 1815
"About 5 miles further on we came to a very extensive prospect from a lofty spot, where we found a heap of stones, supposed to have been placed there by an adventurer, who had penetrated thus far with much difficulty in his endeavour to cross the mountains.

He had arrived at it from a difficult direction from the one we had now taken, and much more difficult, but finding this place no end to the mountains, and the country looking most unpromising around him, and his provisions being nearly expended, he gave up what he thought a fruitless attempt, and retraced his steps, after erecting this pile of stones, to which the Governor gave the name of Keely's Repulse".

Quoy, Gaudichaud and Pellion - 1819
After crossing, by a wooden bridge, a very steep precipice, we found before us, near the road, a pile of stones surmounted by a pole; a rustic monument showing the termination of the venturesome journey of Mr Caley, an English botanist, at a time when the high road that we were travelling in so easy a manner had not yet been laid down".

Cox's Road alignment near Linden 2012

Further thoughts
In the vicinity of this stretch of road was supposedly located the pile of stones referred to in the many diaries of the time, and named by Governor Macquarie after George Caley, even though Caley never explored this section of the mountains.

George Caley was a botanist of note, an explorer and naturalist, publishing many journals, letters and observations relating to his travels through the Blue Mountains.

The stones were reported to be on the roadside at Linden, and many are the tales of how they came to be.

It was shown on maps to the 1830s, but not always in the same location. For over 70 years the site was "lost".

It then aroused considerable interest and conjecture in the early 1900s, in with the community attempting to establish cultural significance of the feature.

In particular the Australian Historical Society set out in 1913 to accurately locate and "restore" the stones.

The pile of stones we see today (off Tollgate Drive, Glossop Road, Caley's Lane) was fenced in 1974 and a plaque erected, but is probably not in the original location, which is thought to be nearer to the original route and near the current day Woodford Trig.

Cox's Road edges near Linden

Mount York Precinct

The Mount York Precinct is located near Mount Victoria, just before the descent down into the Hartley Valley.

It contains Cox's Pass, so named by Governor Macquarie in 1815 in recognition of the feat of building the road on the descent from the Blue Mountains to the valley below.

Continued page 19

Continued from page 18
A number of other tracks abound at the Mount York precinct, and without some research the casual observer would be forgiven for confusing one with another.

All routes were constructed with the idea of seeking the most effective and efficient way down the precipitous cliffs and ridges into the Hartley valley.

Cox's Pass was the first to follow Surveyor Evans. Other routes included Lawson's Long Alley, Lockyer's Pass (never completed), and Berghofer's Pass. The final descent was via Mitchell's Pass, which we utilise today.

The track down Cox's Pass today contains almost complete sections of the original road.

It is situated in the Blue Mountains National Park and the marked walking trail follows the course of the road.

There is evidence of two land bridges and indications of numerous variations to the route to avoid steep pinches and rocky outcrops, including at least two zig-zags.

The works on Mt York became the focus of Cox's road building task

In her report Grace Karskens suggests that the remnants of Cox's Road in the Blue Mountains are very rare surviving examples of a significant road constructed in the simple style used during the period of Macquarie's governorship.

Its significance lies in its extensive display of Cox's methods and approaches, and also later attempts to improve some sections.

Rectangular sockets cut in the rock to receive a 3-railed fence to prevent stock from falling over a precipice along Cox's Road at Mt York

The precinct is also important because of the symbolic cultural meaning vested in it by writers and travellers, including Governor Macquarie in 1815, and a host of others since.

The works on Mt York became the focus of Cox's road building task.

The ascent (descent) features cuttings, retaining walls, earthen embankments, a bridge site and zig-zag formation.

Bridge support rock cutting on Cox's Road, at Mt York

The rocky sections near the summit have types of cuttings typical of Cox's works on other sections – the roughly cut low stone kerb up to 50cm high with a vertical face adjoining rock platform/pavement, which was probably quarried to form the retaining wall opposite.

This wall has partly collapsed and is of rough or broken stones up to 40cm in length.

The wall is approximately 20m long and the road at this point is 7m wide.

A little further on the road passes narrowly between two rock faces, partly covered with short chisel marks.

Rectangular sockets cut in the rock nearby appear to have received a three-railed timber fence to guard against stock falling over the immense precipice.

The following extracts are taken from records of the time contained in *Fourteen Crossings of the Blue Mountains:*

Gregory Blaxland - Friday May 28, 1813
"They got ready about nine O'clock and proceeded about 5 miles and three quarters … until five O'clock when they encamped on the edge of the precipice (Mount York) and discovered to their great satisfaction that what they had considered sandy and barren land below the mountains to be forest land…"

Hand chipped rock on Cox's Road, Mt York

"...a road must be made to get off the mountain"

—William Cox' diary November 2, 1814

Continued from page 19

Saturday May 29, 1813

"They fetched up the horses and began to descend the mountain at 7 O'clock through a pass in the rocks about thirty feet wide they had discovered the day before … going down they were forced to unload the horses part of the way and carry their loads themselves as they could but just keep their footing without a load… where a road for a cart might easily be made by cutting a trench slanting along the side of the mountain in the earth which lays against it and which at this place joins the earth on the top ….."

William Cox - November 2, 1814

"Sent three men again to examine the descent of the mountain, and ascertained that there is no other way but from the bluff originally marked. Tomorrow I intend going to survey it, as a road must be made to get off the mountain."

November 3, 1814

"At 6 this morning went forward with Lewis, Tye, and a soldier to examine the mountain at the end of the ridge – four miles. Found it much worse than I expected. It commences with going down steep between immense large bounders, when it opens with a very steep gulley in front, and towards the left it falls off so steep that it is with much difficulty a person can get down at all. The whole front of the mountain is covered with loose rock, at least two-thirds of the way down; and on the right and left it is bounded both by steep gullies and rocks, so that we cannot, by winding short to the left, get half length sufficient to gain ground to get down without a number of circular turns both to the right and left, and in that case the hill is so very steep about half-a-mile down that it is not possible to make a good road to go down and up again without going to a very great expense. I have, therefore, made up my mind to make such a road as a cart can go down empty or with a very light load without a possibility of its being able to return with any sort of load whatever; and such a road will also answer to drive stock down to the forest ground."

Upper reaches of Cox's Road, Mt York

Cox's Pasf [Pass] ca. 1815-1816 by John William Lewin
Mitchell Library State Library of NSW – PXE 888/6

November 14, 1814

"Got on erecting the bridge at the beginning of the descent off the mountain, and blowing up the rocks that are in the line of our intended road down to the forest. Find it difficult work, and it will cost us much labour."

November 18, 1814

"Hard at work on the rocks this day. Kept our six pickaxes at work; and W. Appledon (a sailor) fixed the blocks and tackle to trees, and got a most capital purchase to turn out an immense large rock at the side of the mountain in the way of our road, which he performed well. Two men received slight hurts in doing it by one of the purchases slipping (J. Tindall and T. Adams)."

November 22, 1814

"Thick, moist morning. The sick list reduced to one (S. Davis). All hands again on the mountain. Light rain and heavy fogs during the day, but the men continued out and did a good day's work. Turned out a great number of very large rocks this day; blew up one. The ground as we dig discovers many more rocks than we expected."

November 26, 1814

"Issued to all hands one pair of trousers each. The stone on the mountain is uncommon hard, and flinty. Cuts extremely bad, and some of it will not split. We have been fortunate in turning out very large solid rocks 2 ft. thick without breaking them, and we have used by little powder this week."

Governor Lachlan Macquarie - April 1815

"The road continues ….. on the ridge of the mountain ….. and there it suddenly terminates in a nearly perpendicular precipice of 676 feet high, ascertained by measurement. The road constructed by Mr Cox down this rugged and tremendous descent, through all its windings is no less than 3-fourths of a mile in length, and has been executed with such skill and stability as reflects much credit on him. The labour here undergone, and the difficulties surmounted, can only be appreciated by those who view this scene.

Continued page 21

Cox's Road

Continued from page 20

In order to perpetuate the memory of Mr Cox's services, the Governor deemed it a tribute justly due to him, to give his name to this grand and extraordinary Pass; and he accordingly called it 'Cox's Pass'."

Major Henry Colden Antill (in company of His Excellency Governor and Mrs Macquarie) **- April 29, 1815**

"About 11 o'clock, at the 49-mile tree, we came to the pass down the mountain into the new country below, which could be seen to great advantage from the projecting rock on the left just before descending the pass …. The pass had been made with great labour down a very steep mountain of upwards of six hundred feet, and the way the road is made traversing the face of it makes it nearly a mile long; it was with much difficulty and exertion we got carts down by fixing drag-ropes behind and holding on with the people; it was so perpendicular in places that the cattle could scarcely keep their footing …. This pass was likewise named Cox's Pass, in compliment to the gentleman who had superintended making the road and pass ……. a piece of work which certainly reflects great credit on his exertions and perseverance."

BMACHO supports move to set up regional educational and research Foundation

BMACHO supports the formation of a Western Crossings Foundation and will hold a workshop in an endeavour to form a Western Crossings Foundation committee.

A planning meeting to organise the workshop will be conducted at Everglades on January 18.

Dr David Blaxland a descendant of the explorer Gregory has proposed the setting up of the Western Crossings Foundation (or Trust) as a permanent body for education and research concerning the natural environment and human development of the region.

The proposal could lead to increased employment opportunities in the fields of education, care of the environment, tourism and research.

Dr Blaxland a medical practioner living in Wagga Wagga has pastoral interests with a farm employing environmental practices at Warrnambool, Victoria.

"There would be a potentially immeasurable contribution to the canon of historical knowledge of the region.

"This could be a valuable bicentennial legacy to future members of the local community," he said.

Dr Blaxland has suggested that the objectives of the foundation might be:

1. To facilitate and promote education and research concerning the natural history and human development of the region;

2. Through the above, to foster understanding and co-operation between local communities and groups of people; and

3. To make results of this work available for promotion of the region to visitors.

The work of the trust would also contribute to the historical knowledge of the region.

The outgoing chairman of WCC, Professor David Carment has suggested the establishment of links with one or more tertiary educational insitutes such as the University of Western Sydney or Charles Sturt University and local TAFE colleges.

A LONG MARCH FROM LITHGOW

REMEMBRANCE Day 2012 was an appropriate day for the launch by Lithgow & District Family History Society of its War Hero project.

Held at Club Lithgow the event with around 140 people attending was a very successful launch with the Federal Member for Calare, John Cobb speaking on the importance of remembering Australia diggers before officially launching it and congratulating the society for its initiative in taking on the project.

Lithgow mayor, Maree Statham also spoke on the importance of such a project and wished the society all the best for the publishing of the book in 2014.

War Hero project convenor Helen Taylor outlined the criteria for the project saying that a certain amount of the records will be on permanent display on the library's shelves but the full content will be available on computer.

Helen then announced the title of the book which will be launched on Remembrance Day 2014 to be *A Long March From Lithgow.*

A very large display of memorabilia including firearms, a trench telescope, kit bags, medals, photographs, flags and much more were viewed by guests.

Joe Elkusch from Springwood RSL Sub Branch then spoke on the Japanese submarine attack on Sydney Harbour and had the audience totally captivated.

This was then followed by a quite emotional DVD presentation covering the Boer War, WW1 and WW2. It featured many who were present along with their fathers, uncles and grandfathers.

The slide presentation also featured music by country music singer Darren Coggan from his *War Stories* CD.

Helen Taylor has said anyone who has a war veteran, man or woman who served their country either overseas or on the home front the Lithgow Family History Society would be pleased if they could contact the society.

The content for the book will be restricted to local areas and the society may be contacted for more information concerning the areas to be included, at the society's library at the corner of Tank and Donald Street Lithgow, telephone (02) 63 531 089 on Tuesday nights from 6pm – 9 pm or Fridays from 10am – 4pm and the 1st Saturday each month from 10am – 4.pm

Workmen discover early kitchen at Eskbank House

By Wendy Hawkes - cultural officer, Lithgow City Council

IN MANY houses the kitchen is the heart of the home and at Eskbank House workmen recently rediscovered the heart of this 1840s heritage property, with the revealing of an original kitchen flagstone floor under the Masonite workroom floor.

The flagstones were discovered during the installation of a new heating system in December 2011.

Everything was put on hold while a heritage architect supervised several access holes being cut into the flooring to determine the extent of the flagstones and to give recommendations on how to proceed.

The flooring was then removed revealing an area of flagstones (with a small area of bricks) and raising a million questions and mysteries.

While the flagstone were undoubtedly the most exciting discovery, the removed flooring, fireplace and what was discovered between the floor layers all had stories to tell as well.

There were several layers to the flooring that was removed and each told a tale about the different lives of Eskbank House.

The flagstones are thought to date from 1866 – 1875, when the wings were added to the original 1840s house.

Eskbank House circa 1878 which indicates a flue on the roof.

In the 1920s the courtyard between the wings was enclosed and a floor added and this is likely when the cypress tongue and groove floorboards were placed over the flagstones to keep the damp and cold out.

The next layer of flooring was linoleum attached to a base Masonite layer and was probably laid over the floor boards during its time as a rental property, perhaps even when it was used as a boarding house for the Small Arms Factory workers during World War 2.

The final layer of flooring was a Masonite layer with a red paint finish.

It is probable this was placed over the rest of the layers by the Lithgow District History Society after 1948 (Integrated Design, 2011).

It is amazing to see the story of Eskbank House, from a genteel wealthy residence through to a museum, told in the layers of flooring.

The fireplace also changed over time and some of these changes were revealed when the flooring was removed.

The original fireplace appears to have had a rectangular shape with the location of the former kitchen fit out (1920s – 1970s) visible in wall fittings and skirting cutouts.

An 1878 photograph of the house from the outside shows the presence of a flue on the roof and indicates a cast iron combustion stove may have been set in this fireplace.

Continued page 24

Lithgow City Council workmen, Al and Terry holding an old coin and brass hinge they found under flooring at Eskbank House

A fireplace which has cooked the meals for Lithgow wealthiest citizens through to factory workers

Continued from page 23

The fire place was changed to a brick arch at some stage and this is still visible in the current fireplace.

During the time the house was run by the Lithgow District Family History Society a prefabricated cement slab was laid over bricks, over the flagstones.

Gas was also fitted in the fireplace and the gas fixture is still visible.

This fireplace has cooked the meals for Lithgow wealthiest citizens through to factory workers and even museum caretakers. What yarns it could tell!

Another small mystery in the kitchen is an area to the right of the fireplace where the flagstone has been replaced by bricks and the render on the wall is marked.

Those who are associated with the property have all speculated on what this might have been; a platform for a copper (but they were usually in the laundry) or a space for a cupboard are the most common suggestions, but it still is really not known.

Other finds that intrigued viewers were the objects that had fallen between the cracks and lodged under the floor boards.

A penny dated 1911, newspapers dated 1997, pencil stubs, pieces of tiles, nails and plant roots have all been found.

But the most exciting item was a Marvel comic which had been pulled under the floor boards by a mouse and torn up to make a nest in the hollow between the fireplaces flagstone and the floorboards.

There was even a mummified mouse itself which has been kept for the record.

At the beginning of the year the flagstone floor was completely excavated with decking placed over a third of it so that visitors could view it without damaging it.

Flagstone floor and fireplace discovered during work at Eskbank House. Brick section of flooring on the right side of the fireplace

It is proposed to install a recreated 1870s kitchen using objects already in the museum's collection, but staff are taking their time doing this as they want to get it right.

In the meantime, visitors are invited to spend some time gazing at this discovery and imagining and speculating on all that must have gone on there over the years.

'Keeping volunteers interested'

VOLUNTEERS are the life blood of societies affiliated with BMACHO and most societies have difficulty in recruiting and keeping members interested.

To share ideas and discuss the issue BMACHO will hold a "Getting the people you need" seminar later this year.

All societies rely heavily on the hard work and commitment of the people who make up the committee and on the people who volunteer in every facet of an organisation from research, and marketing to manning exhibits in museum through to washing up after a meeting or activity.

Getting people involved in an organisation is a challenge for most societies, large or small.

Attracting younger people, in particular, who are willing to take up the reins from those who have been keeping the group going over many years is also a challenge.

The workshop's theme will be about creating an environment that attracts, develops and retains people who are willing to continually improve the society.

The workshop will look at how societies can work more effectively with people; how to help people get the skills needed; to sort out difficult situations; and how to demonstrate appreciation of each volunteer's effort.

Committees function most effectively when members have a broad mix of backgrounds, skills and experiences.

The sustainability of societies in the long term is dependent on continually recruiting, and developing interested and willing contributors.

The workshop will look at all these and other issues.

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or it's really going to happen!

Pioneer walk to Mt York being planned

Marcia Osterberg has advised that Mt Victoria & District Historical Society will coordinate the Pioneer Walk to Mt York on May 28.

Vintage cars will be used to transport elderly and those unable to walk the distance. Descendants of pioneers who wish to participate in the walk must register on the website www.bluemountains crossings.com.au

Marcia said that it was also hoped to include in the Western Crossing program, the Great Train weekend, a popular annual event at Mt Victoria which this year will be held on May, 25-26.

Back to St Bart's Day

Blacktown City Council has a yearly event, Back to St Barts Day.

Blacktown City Council's community events manager, Peter Filmer has said, this year the event to be held on April 27, and will be part of the Western Crossing program.

St Bartholomew. constructed in 1841, is the oldest building in Blacktown and where the grave of William Lawson i s located in the church's graveyard.

Restoration to this grave site has been commenced and it is the intention to unveil a plaque in recognition of the 200th anniversary of the crossing.

Katoomba rifle shoot

Katoomba Rifle Club will conduct a bicentenary shoot at Leura on April 28.

A number of rifle clubs are expected to participate.

Wiradjuri people

Wiradjuri people have agreed to meet with Hartley District Progress Association to discuss their involvement in local activities including the consequences of the stolen generation.

New schools kit

Chair of the Wetern Crossings committee, Dr Anne-Maree Whitaker has advised that the National Museum has produced a new schools kit on the Blue Mountains crossing in the *Australian History Mystery* series, which ties in with the Year 9 history curriculum.

Holey dollar

Bruce Ferrier has advised that the first proofs of the holey dollar and dump "look fantastic."

Probably 30,000 of these coins will be produced with 18,000 given to schoolchildren at the beginning of second term 2013.

Tthe coins at $10 will be marketed through two barrack vans which will be stationed around the mountains.

One of the vans is an 'approximate' reproduction, but its history is more related to the vehicles used on the convict built Great Northern Road.

The public will be able to buy memorabillia photographs of themselves chained with convicts in the seconfd van.

A notice will advise that the vans are not accurate reproductions.

George Evans to be honoured

Surveyor, George William Evans has been nominated for a posthumous award for his contribution to the work on the road across the Blue Mountains.

Hawkesbury City Council's mayor, Kim Ford has advised that Evans' name will be added to the honour board at Windsor during the Australia Day 2013 luncheon.

Trust members to walk Cox's Road

National Trust members will participate in a walk on the Linden-Woodford section of Cox's Road on June 1.

Flyover of crossings route

A flyover of the Blue Mountains, Lithgow and Bathurst is being planned as part of the activities marking the bicentenary of Blaxland, Lawson and Wentworth's Blue Mountains crossing.

Organisers hope everything from helicopters to small private fixed wing aircraft to World War 2 fighters and modern day military jets will take part in the event on May 25.

They are working with the RAAF for their assistance with resources such as staging areas and aircraft participation.

Once airborne, pilots will follow a similar path to that blazed by the three explorers in 1813, with viewing areas planned for Penrith, Glenbrook, Springwood, Hazelbrook, Wentworth Falls, Katoomba, Blackheath, Mt York, Lithgow and Bathurst.

Former RAAF Wing Commander Matt Hall, Australia's leading aerobatic display pilot, is coordinating the event on behalf of Business Supporting the Bicentenary (BSB) and Blue Mountains Lithgow and Oberon Tourism (BMLOT)

BSB director Philip Hammon of Scenic World came up with the idea of a flyover to enable thousands of people to view the event and celebrate the bicentenary of their local communities.

"A flyover is something that demonstrates just how far we have come in the last 200 years since Blaxland, Lawson and Wentworth made their historic journey, said Mr Hammon.

For more information about the Crossings Bicentenary, visit www.bluemountainscrossings.com.au

A tetradrachma from Thrace (323-281BC)

THE practice of putting royal portraits on coins began after the death of Alexander the Great. This coin (pictured) is from Thrace, one of the ancient regions he conquered

It shows Alexander the Great in profile with ram's head horns associated with the god of Amon.

Nearly every state conquered by Alexander started to mint coins with his face according to Dr Anna Trofimova.[1] It spread his image over vast distances.

This coin is one of more than 400 items ranging from coins and jewellery to weapons and armour, frescos and statues.

Underpinning this extraordinary display is a thesis or rather several.

It seeks to explain how Alexander transformed the world through military conquest, spreading Greek culture and art. – Hellenism – from the shores of the Mediterranean to the deserts of central Asia and the borders of India

In the process Alexander the man became Alexander the myth; a deity to some, a tyrant to others.

His image, real, imagined and invented was stamped on coins and in the faces of statues and idols, pervading cultures and creeds.

Dr Trofimova claims that Alexander was very sexy. He was brave, died young and believed in his glory.

The real Alexander is as fascinating as the myth. A master tactician, the Macedonian king who conquered the world in the 4th century BC.

He displayed gtreat humanity to the people he conquered. But he had a dark side too:an incandescent temper and a love of drink.

No discussion of Alexander can ignore the question of his sexuality. His lifelong companion was Hephaestion, a childhood friend and lieutenant. Some scholars believe they were lovers.

The debate is complicated by the sexual mores and social mores of the era.

The exhibition which opened last November runs until to April 28

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 14 Bunnal Ave, Winmalee 2777
E-mail: committee@bluemountainsheritage.com.au
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.
BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."
The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.

ii. To encourage and assist cultural heritage activities of member organisations.

iii. To initiate and support cultural heritage activities not already covered by member organisations. One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.
***Blue Mountains History Journa*l** is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains World Heritage Institute, Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Hartley Valley District Progress Association, Kurrajong-Comleroy Historical Society Inc, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committee, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low OAM, Ian Milliss, Patsy Moppett, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2012-13 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Judy Barham, Joan Kent, Doug Knowles, John Leary, Dick Morony (public officer), and Scott Pollock.

DISCLAIMER Views and opinions expressed in ***HERITAGE*** originate from many sources and contributors. Every effort is taken to ensure accuracy of material. The Hartley Rock, the pivot for 'A moment in time'

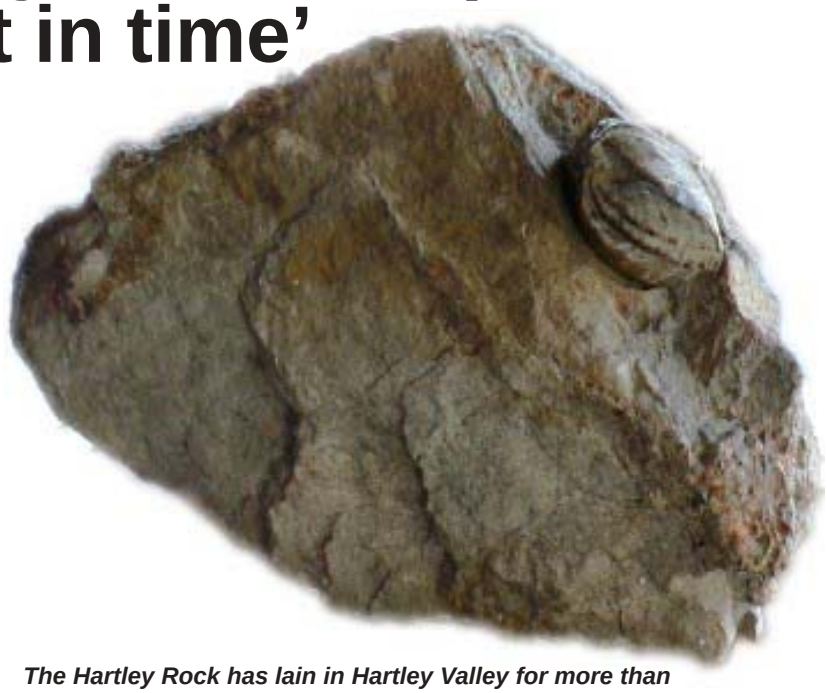
By Joan Kent BAHons. Macquarie University, MSocSc.Ind.Archaeology, Birmingham University



The Hartley Rock has lain in Hartley Valley for more than 300 million years. Image: John Leary, OAM.

THE ACTIVITIES associated with the commemoration of the two hundredth anniversary of the European crossing of the Blue Mountains have generated a reappraisal of this 'historic' event.

The images exhibition, 'A Moment in Time' to be presented by the Hartley District Progress Association at the Old Hartley School Hall in May and June this year will contribute to this reassessment.

In terms of European settlement over the last 200 years 'the Crossing' certainly is significant, as it is for the Aboriginal peoples upon whom this expedition had such a profound impact.

However, it also focusses our attention on the vast period of time over which the 'New Country' is represented geologically.

For that reason the Hartley Rock is the pivot of the exhibition for *'To see tomorrow, you must first know yesterday.*'

'The Hartley Rock has lain in the Hartley Valley *substrata* for over three hundred million years; a fossilised *brachiopod* nestled in a cavity of the bedrock, smaller shell fossils embedded in the surface.'

The history of the Hartley Valley can be traced far beyond the upheaval when the Australian continent – then part of the great southern supercontinent of Gondwana which comprised all the major southern landmasses – finally severed its last links with Antarctica 45 million years ago.

In ancient times the landscape which now surrounds the valley of the Cox was a vast plain which over ten to fifteen million years was gradually invaded by the sea – at a rate of 7 millimetres per year! An uplift which created the Blue Mountains, including the valley of the Cox, occurred between ninety and sixty million years ago – at an estimated rate of 2.5cms per century.

This ancient rock and its' embedded fossils were formed in an even earlier period of the planet's evolution, the Devonian period, now revealed after 300 hundred million years of oblivion.

It is appropriate that the Hartley Rock is the witness to both Aboriginal habitation over many thousands of years and the recent overlay of European settlement.

An opinion from the editor.....

Two centuries on we commemorate the Western Crossings

In the run up to the events from 2013 to 2015 which will commemorate and celebrate the achievements of the crossing of the Blue Mountains by the party led by the three explorers, Blaxland, Wentworth and Lawson, the subsequent surveying of the route by Evans from Emu Plains to what would become the City of Bathurst, the extraordinary feat of the convict party under the supervision of Cox in building a road to open up the golden west and the journey along this road to proclaim the site for the township of Bathurst; we perhaps need to pause to reflect on what effect this would have in lifting the colony of NSW into the great nation and economic wonder of today.

Not in the wildest dreams of Lachlan Macquarie or his masters back in London could there have been perception of a future nation of the dimension of Australia, which 200 years later stands, with a status based on most indicators of human wellbeing, democracy, social, industrial, political and economic achievements, among the top in the world.

Without the events of 1813-15, although it may in the long-run have prospered, it is likely that had not the golden west been opened up, the fledgling colony, with its small population, largely centred on Sydney Cove with some expansion north, south and to the west as far as Parramatta would have perished and been abandoned.

Those who came to the colony in its first 30 years including some, erroneously classed as felons because of minor misdemeanours or indiscretions, became the true pioneers and foundation stock of this now great nation. Of course, others were to follow in the next two hundred years including those of the last 50 years who have contributed to our now multicultural society.

Continuing the policy of promoting the research and recording of the region's cultural heritage, in the pages of this edition of *HERITAGE* are stories of some of these early pioneers and their achievements, as well as reports on the activities associated with the commemoration of this significant event in Australian history.

Among these reports is welcome news of the state government's recognition of the work of a small army of volunteers in the region's heritage sector; firstly through an amount of $80,000 to be distributed through the Royal Australian Historical Society and secondly through Lithgow City Council to the Cox's Road Project Committee a grant of $20,000.

One of the groups to benefit from the government's support is BMACHO which will receive up to $5,000 to be used for legal administrative costs of setting up a philanthropic foundation for research and education in the region, first proposed by Dr David Blaxland a direct descendant of the explorer, Gregory Blaxland.

While there will always be need for celebratory activities which in their own right through tourism bring benefit to the region, it is important there be some lasting benefit to the community with commemorative activity such as the proposed Western Crossings Foundation.

Finally, the front page article about the Hartley Rock brings starkly into contrast the 200 years of human achievements related to the western crossings and the existence of that 300 million years-old piece of geological mass, reminding us our achievements are but a blink of an eyelid in the evolution of the universe.

John Leary, OAM -
Past president, Blue Mountains Association of Cultural Heritage Organisations Inc.

Hartley rock linked with Bonnie Blink

Continued from page 1

Much attention is paid to the crossing of the Blue Mountains but it must be remembered that it is the story of the descent of Mt York on May 29, 1813 and the subsequent utilisation of the country beyond which is of lasting significance for regional and national history.

The development of the Hartley Valley played a vital role in this process, initially as a place for resting and provisioning weary travellers and settlers to the New Country, prompting the erection of a number of inns and small businesses, but also as a coaching depot and the first agricultural and pastoral activities west of the Mountains.

A large number of these buildings remain, centred in the Hartley Historic Site but the history of the Valley and the early western expansion is also illustrated by the inns and domestic dwellings which mark the route of the 'new' Great Western Road from the 1830s.

Even earlier are the inns in Hartley Vale on the original alignment of Cox's Road – Collit's Inn (1823) and the Comet Inn (1879) from the shale mining period.

Another icon with a strong link to 'the Hartley Rock' is *Bonnie Blink* (believed to mean happy face or smile) – our rock was discovered by Mrs Pat Connell in the grounds of *Bonnie Blink* some ten years ago, as a result of ploughing. The 80 acre property was granted to Hugh Brady in 1854.

Here it is believed he built the original house with an associated school, run by his sister. This house had been demolished by late 1884 but the school building remained intact until demolished in 1996.

The property passed through several hands between 1876 and 1884, including for a short period the Anthony Hordern family. It is believed that the Horderns continued their practice of planting an English oak tree (which survives and flourishes) at Hartley in keeping with their trademark 'While I live I'll grow'.

In 1884 the property was purchased by the colourful and prolific colonial architect Charles Henry Edmund Blackmann, who was then in partnership with Varney Parkes (son of Sir Henry Parkes) and the renowned John Sulman in a prominent Sydney architectural practice.

Bonnie Blink where the Hartley rock was discovered.

It was Blackmann who constructed the French provincial style country villa, possibly on the foundations of the earlier building.

This surviving 1884 building was built of local sandstone which Blackmann found on the property, reputedly left after plans for a nearby church were abandoned.

The iron gate at the front of the house bears his initials 'CHEB' as proof of his ownership although it may well have been a speculative project as it was sold in 1886.

Again there were a series of new owners of short duration until 1903 when the properties came into the ownership of the McKillop family, cousins of the beatified Mother Mary McKillop.

In 1916 *Bonnie Blink* was purchased by Oliver Alexander Baaner and has remained in the Baaner family, OA Banner's granddaughter, Mrs Pat Connell being the present owner.

Mrs Connell was responsible for extensive renovations with the advice of heritage architect Christo Aitken during the early 2000s.

Now restored to much of its' former glory and set in beautiful gardens complete with the Horden oak tree, the 'Bonnie Blink' building is approaching its' 130th anniversary, treasured by the Baaner/Connell family and the Little Hartley community.

This year of 2013 is an appropriate vantage point from which to view both our ancient and recent past and our future – being aware of our past will better equip us to decide our future.

The contributions of Mrs Pat Connell in the preparation of this article are gratefully acknowledged.

THE AUTHOR

The author of this article, Joan Kent (pictured) is curator of the exhibition *A Moment in Time* reflecting on the earliest history of the Hartley Valley and the consequences of the western crossing.

Joan is a an indivual member of BMACHO and its former treasurer. She is involved in numerous other community activities and with her husband Tom runs an alphaca farm at Kanimbla.

Gregory Blaxland's wine medals

By David Blaxland

FEW PEOPLE realise that Gregory Blaxland won the first medals overseas for Australian wines.

The first vines in the colony were grown from cuttings that arrived with the first fleet in 1788 on board the *Lady Penrhyn.* These were obtained at Rio de Janiero and Capetown, and are thought to have been planted in Sydney Cove.

Unfortunately the vines died due to the disease anthracnose('black spot' or 'blight').

Several later plantings were established including those at Rose Hill, Camden Park and Norfolk Island.

Gregory Blaxland, his wife Elizabeth and their three children left England on September 1, 1805, above decks on the *William Pitt,* a transport carrying 121 prisoners, all except one being female. This was the only convict transport to participate in an overseas expedition, sailing as part of a fleet intended for the reduction of the Dutch settlements at the Cape of Good Hope.

After the longest passage from England of any female transport between 1801 and 1820 the *William Pitt* arrived at Sydney Cove on April 11, 1806, bringing the news of the battle of Trafalgar to the colony, as

The silver and gold medals won in London for wines produced by Gregory Blaxland in NSW.

well as vines that Gregory had procured at the Cape.

These initial vines and shoots suffered from blight, almost certainly due to anthracnose.

However, with experimentation he found a variety of grape which appeared resistant to this disease.

This variety, Black Constantia, had probably been brought from the Cape with the first fleet, and was the variety of grape first planted at Brush Farm, his 185 hectare property in present day Eastwood.

Several years later he planted two new varieties he thought to be Claret, but which were probably Pinot Noir and Pinot Meunier.

The Royal Society for the Encouragement of Arts, Manufacturers & Commerce offered a medal for 'the finest wine of not less than 20 gallons of good marketable quality made from the produce of vineyards in New South Wales'.[1]

Gregory sailed for London from Sydney Cove on the *Royal George* on March 19, 1822 with 86 gallons of wine in two casks. He submitted a quarter of a pipe (26 ¼ gallons) for judging, and sent a letter dated February 12, 1823 to the Secretary of the Royal Society, in which he stated that 'the red wine got too much heated in the fermenting tun before I was aware of it and the white wine has flavour of rum from being put in a cask which had that liquor in it some time before the wine was put in.'[2]

He was awarded a silver medal, the judges' comments being: On examination by the committee it appeared to be a light but sound wine with much of the odour and flavour of ordinary Claret, or rather holding an intermediate place between that wine and the red wine of Nice. The general opinion seems to be that although the present sample, from the expertness of the manufacturer and the youth of the vine, is by no means of superior quality, yet it affords a reasonable ground of expectation that by care and time it may become a valuable article of export [3].

After returning to Sydney, Gregory continued experimenting with wine making. Several years later, on being selected to travel to London with a petition concerning civil rights and taxation, he took the opportunity to take samples of his wine to enter for the 1828 awards of the Society.

About the author David Blaxland

Dr David Blaxland is a direct descendant of of Gregory Blaxland and the prime mover in the establishment of the Western Crossings Foundation. He is acknowledged as a "Blaxland-ophile" having extensively researched the Blaxland family.

He has been a general pathologist since 1987 working initially in northern Tasmania, then south west Victoria and southern NSW having previously practised as a GP. Based at Wagga Wagga David is the regional pathologist for a large medical service in the Riverina area He is a general pathologist with a special interest in histopathology, haematology, and medical undergraduate education.

Although a full time medical practitioner he also finds time for his farm at Warnambool where he employs the best environment methods including the use of native grasses for stock feed. He is also a breeder of Clydesdale horses.

Businessman's move on explorers' busts

AT THE CEREMONY to unveil the statue of Governor Lachlan Macquarie in Hyde Park earlier in the year the sculptor, Terrance Plowright also unveiled three models he described as "roughies' of busts of explorers Blaxland, Wentworth and Lawson.

Commissioned and funded by Businesses Supporting Bicentenary (BSB) member Tom Colless, it is hoped local fund raising over coming months will ensure the bronze busts of each explorer will be installed in the Blue Mountains towns named after them. Mr Colless said he hopes to make busts part of a lasting legacy from the upcoming Blue Mountains Crossings Bicentenary events between May 2013 and December 2015.

People who donate to the project can have their names engraved on plaques.

Plaques will identify the first 200 people to support the cost of each of three busts.

Business listings of up to 2 lines will cost $220, private donors $110 for 1 line or $220 for 2 lines.

The great-great-great-great granddaughter of Gregory Blaxland who also attended the Hyde Park, Sydney launch was impressed with the designs.

"He (sculptor Terrance Plowright) has made him (Blaxland) look very handsome, even more than Wentworth and Lawson, I think," she said.

To find out more about the project, visit

Wentworth Falls sculptor Terrance Plowright (centre) and Business Supporting Bicentenary members Philip Hammon and Tom Colless beside Mr Plowright's designs for bronze busts of the three explorers.

Blaxland's wine medals on loan to Mitchell Library

Continued from page 4

This wine was probably made from his Pinot Noir and Pinot Meunier grapes.

So in February 1827 he departed from Sydney with three half pipes of wine from his vineyard, fortified with 10% French brandy to withstand the voyage.

He subsequently won the Gold Ceres Medal, the committee commenting that the wine was wholly free from the earthy flavour that unhappily characterised most of the Cape wines. The colour of the wine was a tawny red.[4]

The large silver medal awarded in 1823 measures 5.2cm in diameter, and the smaller gold medal of 1828 is 4.0cm in diameter.

Fortunately, even though ownership of the medals was retained by the Blaxland family, in 1911 the Trustees of the Mitchell Library agreed to hold both medals for safe custody.

Acknowledgements
My cousin Chris Blaxland for allowing access to a letter dated November 21, 1911 from Fred Blaxland, solicitor of Cooma, to his cousin Charlie, our great grandfather, relating the circumstances under which the medals were placed in the Mitchell Library.

The Mitchell Library, for permission to photograph the medals.

Ron Buttrey whose research for and writing of *A Short History of the Life of Gregory Blaxland* provided me with an invaluable source which forms the basis of much of the material in the article I have written for *HERITAGE*.

COX'S ROAD HERITAGE SIGNAGE PROJECT GETS $20,000 GRANT

ROADS MINISTER Duncan Gay and Member for Bathurst Paul Toole have announced the NSW government will provide $20,000 to the Lithgow City Council for road signs along Coxs Road in commemoration of the bicentenary of the crossing of the Blue Mountains.

"Coxs Road was the first road from Sydney to Bathurst, built by William Cox at the instruction of Governor Macquarie in 1814," Mr Gay said.

"It was named and proclaimed by Governor Macquarie on April 25, 1815 after he travelled along the road by carriage.

"Cox's Road is a unique example of early road building in NSW. Sections of the original road remain and are of historic significance.

"The funding allocation follows representations by Member for Bathurst Paul Toole.

Paul Toole, MP

"The Coxs Road Project Committee, a volunteer organisation dedicated to mapping, preserving and sharing the story of Coxs Road, will manage the sign project," Mr Gay said.

Mr Toole said the committee will use the funds to install interpretive signs, route alignment signs and route direction signs along Cox's Road.

"The signs will celebrate the 200th anniversary of the building of the road and are expected to become a significant community resource featuring historical, educational, tourism and research information," Mr Toole said

Asked to comment on the grant, convenor of the Cox's Road Project Committee, Patsy Moppett said, the success of Lithgow Council in procuring this funding is excellent news.

"Lithgow can now join with Bathurst and Oberon councils in signposting the route of the Cox's Road route where it passes through those local government area.

"The Cox's Road Project Committee has provided advice in regard to the design and location of the signage, and will continue to act in an advisory role.

"Lithgow will now move to erect the signage as part of the western crossings commemorations activities which will take place over the next 2-3 years, both in Lithgow and in various towns along the Cox's Road route," said MsMoppett

Mayor of Lithgow, Cr Maree Statham said, the Cox's Road played an integral part in the early settlement of the Lithgow area.

"Lithgow City Council is very pleased to be able to join with NSW Government, Oberon and Bathurst Council's in signposting the historic Cox's Road.

"Some parts of the road are still evident today and signage will enable visitors and locals to learn about why this road was so significant and the different journeys that have been made upon it." Cr Statham said

Top librarian to talk about explorer's rare manuscripts

THE MITCHELL Library holds the eye-witness accounts by William Lawson, William Charles Wentworth and Gregory Blaxland of their journey over the Blue Mountains in 1813.

Those by Lawson and Wentworth are in manuscript while that of Blaxland is a rare privately printed volume, published in 1823, of which there are only about 10 extant copies.

All three items were early acquisitions by the Library following its opening in 1910, perhaps indicating the contemporary view of the pivotal nature of this event.

Paul Brunton will speak about these original sources and the mysteries surrounding them at BMACHO's annual general meeting.

The AGM will be held at the Blue Mountains Cultural Centre, Katoomba on Saturday, March 23 commencing at 2pm.

Members of the association are welcome to have any interested person associated with their society to participate in the meeting in addition to one voting delegate.

Those members of the public interested in history and heritage will also be welcome to hear this outstanding speaker.

Paul Brunton is Emeritus Curator, State Library of New South Wales and an Honorary Associate of the School of Philosophical and Historical Inquiry, University of Sydney.

He was Senior Curator, Mitchell Library, State Library of New South Wales, from 2002-2012 and Curator of Manuscripts from 1986 to 2001.

Paul Brunton

Governor unveils sculpture of Lachlan Macquarie

A BRONZE SCULPTURE of Governor Lachlan Macquarie the work of Wentworth Falls sculptor Terrance Plowright has been unveiled in Hyde Park by the Governor of NSW, Professor Marie Bashir, AC CVO.

The statue holds a scroll in its left hand that symbolically contains plans of Sydney Town and from its elevated aspect gazes towards Macquarie Street.

Governor Bashir described the sculpture as outstanding and said, “we commend you (Mr Plowright) warmly on your work”.

Revealing it was Macquarie’s birthday that day (January 31) she said, “the Australia of today, I think would have been a source of great pride to Lachlan Macquarie”.

“I based the sculpture on a painting by Senator Richard Reed, but I also made sure I had my own input into the face, as just (carving) one millimeter here and there can change the character immensely,” Mr Plowright said.

“Governor Macquarie was an incredibly dignified man, he had a strength of character and a face of humility and he was a man of great intelligence — I wanted to show that in the face.”

NSW Premier Barry O’Farrell said, “we see him (Macquarie) with that sense of fair go that we see in this land today.” *Shane Deslatinik Blue Mountains Gazette.*

Pictured are the Governor of NSW, Professor Marie Bashir, with Wentworth Falls sculptor, Terrance Plowright and Lord Mayor of Sydney, Clr Clover Moore at the unveiling of the bronze sculpture of Governor Lachlan Macquarie. Image: Paul Patterson, courtesy of City of Sydney.

Harbour honoured

SYDNEY HARBOUR has officially been recognised as an iconic National Landscape.

The harbour will be the 16th landscape listed and the first that takes in natural and archtectural wonders, along with thousands of years of human history. It joins the Great Barrier Reef, the Kimberley and the Red Centre.

Sydney Harbour’s shimmering saphire waters, sunburnt sandstone headlands, white sand beaches and grey-green iron bushland are legendary.

The harbour holds stories of the Aboriginal dreaming and European settlement, while beneath the waves lives a wealth of marine life, hundreds of fish species, penguins, dolphins and even kelp forests.

Hammerhead crane

NATIONAL TRUST will be commenting on a proposal to remove the historic hammerhead crane at Garden Island which was listed on the National Trust Register in 1996 and listed on the Australian “Our Heritage at Risk” list in 2007.

The Trust will be opposing the removal of this landmark of Sydney’s Working Harbour and has questioned the quoted cost of annual maintenance.

The Trust believes there are options for private funding of the Garden Island hammerhead Ccane restoration and conversion to a major Sydney tourist attraction.

The Clydebank titan crane in Glasgow, has been fully restored and is now promoted as Scotland’s most unique attraction.

Cockatoo ghost

COCKATOO ISLAND in Sydney Harbour housed convicts in the early days of the settlement and has had a long naval history of which much has been written.

Not so well known nor written about is the brutal history of Biloela Industrial and Reformatory School for Girls, a forbidding presence on the harbour island.

Author Yvette Poshogillan has taken two years researching the history of this institution for destitute and wayward girls, for her novel, *Escape from Cockatoo*, writing some of it in the very rooms where girls like those fictional characters of her subject would have lived and worked. Biloela was established in 1871 to deal with ‘street arabs”, a term used to deal with orphans and homeless children.

GEORGE WILLIAM EVANS

'...he created the western road to open up the interior.'

NEW South Wales is about to embark on three years of commemoration of the crossing of the Blue Mountains.

The western road goes across a great watershed and its creation in itself is a watershed, the act which changed Australia from being a small colony along the coastal plain around Sydney Cove to a state coming to grips with an immense inland country for grazing and agriculture, altering the environment and displacing its traditional occupants.

The Great Dividing Range is well named.

There were four well-defined phases in the Western Crossing in Governor Macquarie's time.

First, of course, there were the dauntless three, the self-interested explorers, Lawson, Blaxland and Wentworth, who reached the Hartley Valley, hoping for new grazing lands for their stock.

Then immediately afterwards, at the behest of the government, there was the professional surveying of the ridge-top route.

Next came the road-making itself, done in exemplary fashion by convicts under William Cox, buoyed up by a promise of remission of their sentence when the road was completed

George William Evans nla-pic-vn3509777-v

And finally in 1815 there was the establishment of Bathurst, followed by the first settlements on the Bathurst Plains.

I want to say something about the man who did the all-important surveying and mapping of the route blazed by Blaxland, Wentworth and Lawson.

They had turned back at Hartley Valley, but the surveyor went much further west and created his own route to what became Bathurst.

The surveyor, in short, was also an explorer, the first European to stand on the Bathurst Plains.

George William Evans was a well-educated Englishman, who came to New South Wales via the Cape of Good Hope.

He had eloped to Cape Town in 1798 with a fifteen-year old bride and moved on to Sydney in 1802, where he was soon appointed Acting Surveyor-General while Charles Grimes was in Britain.

Evans's story is not, however, a simple one of colonial success.

He was dismissed for some unspecified fraud in 1805 and went to live on the quite large Hawkesbury farm which he had been granted in trust for his two infant daughters in 1804.

Evans's 519 acres was immediately adjacent to the 200 acres held by the young children of William Cox. This is half-way between Windsor and Richmond: the present Richmond Air Base is just to the south on this map

The association of Evans and Cox did not begin with the planning of the western road, but had begun a decade earlier, with an unexpected intimacy.

Both the Cox and Evans farms were largely rich arable land on the Hawkesbury river flood-plain, with a small strip of high land at the south end, adjacent to the common.

The two farms, looking towards the river with the Blue Mountains evocatively in the distance.

When the rains come in earnest, all that lowland as far as the Blue Mountains can be under water, even today. Cox prudently built his house, Clarendon, on the strip of high land.

Continued page 9

George William Evans is the text of a talk by Associate Professor, R Ian Jack, former president of the Royal Australian Historical Society to members and guests of the society on Australia Day 2013.

Ian is the vice president of BMACHO.

Continued from page 8
Cox extended his original cottage in Macquarie's time, but the core of this house was already there when a big flood hit the Hawkesbury in March 1806.

Evanses rescued from roof top by boat in flood

Evans had unwisely built his house down on the flood-plain and he, his wife and the girls had to be rescued by boat from the top of their roof.

Their first rescuer was a neighbour from the other side of the Hawkesbury, but as the flood waters rose that house too was threatened and the Evanses had to be rescued again.

This time their boatman was William Cox himself who rowed them across the torrent to Clarendon, which was nice and dry, comfortably above the highest flood.

The message was not lost on Evans who at once built a new home for himself on his own high land immediately adjacent to Clarendon.

Unlike Cox, Evans built a two-storey house. And, unlike Clarendon, which fell down a century ago, Evans's house still exists, essentially intact.

It is the oldest two-storey house in Australia. It had the second storey because of the belt and braces approach of Mrs Jennet Evans.

We know this because Jennet wrote a hysterical letter to Governor King about her experiences clinging to the roof ridge during the 1806 flood and the King family kept her letter.

The flood plains below Evans' house. Photograph - Ian Jack 2011.

Cox's Clarendon from south-east c. 1890 Photograph courtesy RAHS

Although the house was built in three phases between 1806 and 1810, each phase was two-storey.

The first, in mid-1806, the second was very soon afterwards, probably late in 1806; while the larger section was added by 1810.

Jennet Evans was unduly cautious. The house has never had any flood-water even on its ground floor and even the cellar has never been flooded.

The house faced away from Clarendon. The frontage faced the common: what this says about Jennet Evans' hang-ups I'm not sure.

William and Rebecca Cox chose to have their front view over the flood-plain.

So George and Jennet lived nice dry lives in their new house as Hawkesbury farmers from 1806 until Governor Macquarie changed their lives.

Macquarie restored Evans to favour as a government surveyor and, along with James Meehan, Evans laid out the sites of the new Hawkesbury towns like Windsor and Richmond in 1810 and 1811.

During his years as a local farmer, Evans had continued to paint: he was a most talented topographical artist and three of his water-colours of the village which became Windsor survive.

The Evanses had social cachet. It is striking that George and Jennet attended the famous dinner party in December 1810 when Macquarie named the new towns, whereas the senior surveyor James Meehan was not invited.

William Cox was present, of course, as the new magistrate for the district.

The dinner party was held in the government cottage.

Evans was sent to Tasmania as surveyor in 1812, but it is striking that Macquarie recalled him to New South Wales in 1813 specifically to lay out a suitable road across the Mountains after the news of Blaxland, Wentworth and Lawson broke.

Evans did not sell the Hawkesbury farm and Jennet, who did not go to Tasmania with him in 1812, was still there in 1813.

So the survey of the western road and its construction were master-minded by the two neighbours Evans and Cox.

Even after George and Jennet finally went together to Tasmania in 1814 and leased the Hawkesbury farm, Evans was again recalled by Macquarie to accompany the governor on the famous trip across the new road in 1815 which culminated in the naming of Bathurst on a site discovered by Evans.

There is a full-size statue of Evans in Bathurst, where he is still appreciated.

Evans was again recalled to New South Wales from Tasmania in 1817 to assist John Oxley in his exploration of the interior and he did many of the illustrations to Oxley's book.

But after Macquarie left Australia, there were no more recalls.

Continued page 10

‘Evans house still intact, a touching testimony to a wife’s hysteria about flood-water’

Continued from page 9 Evans published a justly famous book about the geography, history and topography of Tasmania in 1822 (which was translated into French a few years later).

But Jennet died in Tasmania in 1825 and he resigned his surveyorship.

Though he promptly remarried in Tasmania, Evans returned to England in 1826.

The final stage in the Evans saga was his return to Sydney in 1832 with his wife and five new children.

In Sydney he sold books and stationery and published other people’s books.

He supplemented his income by teaching boys to draw at The King’s School, while his wife Lucy ran a finishing school for young Sydney ladies.

But Lucy went back to Tasmania in 1839 and George finally followed her in 1844.

Lucy died in 1849 and George died in Hobart in poor circumstances three years later.

His career petered out, but Evans should be remembered for his fundamental work in creating the western road and the opening up of the interior, for distinguished exploration, for really important and attractive topographical painting and drawings and for his contribution to Tasmania.

And not least because his Hawkesbury house is still intact, a touching testimony to a wife’s hysteria about flood-water.

LOST IN THE STORY OF THE ‘DAUNTLESS THREE’

When the expedition led by Gregory Blaxland (1778-1853) William Lawson (1774-1850 and William Charles Wentworth (1790-1872) left Blaxland’s South Creek farm on May 11, 1813 in quest of as passage over the Blue Mountains, their departure was noted quietly in a paragraph on page 2 of the Sydney Gazette and New South Wales Advertiser several day later. Noting their spirit and determination, the writer also made special mention of their ‘prudentially taking with them four sumpter horses’ (Anonymous 1813). Community leaders support Western Crossings Foundation

AT A MEETING held at Everglades, in January it was decided to form the Western Crossings Foundation.

At a further meeting at Bathurst earlier this month it was decided that the mission statement would read: To facilitate the study of heritage and consequences of the crossing of the Blue Mountains.

The aims and objectives of the foundation are:

* To facilitate and promote education and research concerning the natural history and human development of the region;

* Through the above, to foster understanding and co-operation between local communities and groups of people; and

* To make results of this work available for promotion of the region to visitors.

Federal member for Macquarie, Louise Markus attending the first meeting of the steering committee said, “A celebration is important for the crossings, but to want to invest in something of a long term basis is quite an exciting proposal.”

Ms Markus suggested a project which could be considered was a mobile education unit to travel the area.

Dr Blaxland suggested another project might be setting up spur lines from the National Trail.

David suggested that the Foundation should target projects not already being funded by government.

Pictured at the meeting at Everglades, Leura to form the Western Crossings Foundation are from left to right, the Mayor of Bathurst Clr Monica Morse, the Member for Macquarie Louise Markus, MP, Dr David Blaxland great great grandson of the explorer Gregory Blaxland, John Leary, OAM former president of Blue Mountains Association of Cultural Heritage Organisations Jasmin Smith representing the Vice Chancellor, CharlesSturt University (Professor Susan Thomas) and Jan Koperberg secretary BMACHO and former president Blue Mountains Family History Society.

There will need to be broad spectrum funding. The area of embrace from the Cumberland Plain to the Bathurst Plain and include the Hawkesbury area.

The steering committee now comprises: Dr David Blaxland, Dr Ian Jack, the Member for Macquarie Ms Louise Markus, John Leary OAM, the Mayor Bathurst Cr Monica Morse, Ms Jan Koperberg, Jasmin Smith representing the Vice Chancellor of Charles Sturt University (Professor Sue Thomas), former principal Yanco Agricultural High School, Colin Brown, Philip Hammon and Professor David Carment.The University of Western Sydney will also be asked to be represented on the committee.

The steering committee will conduct seminar or workshop at the Imperial Hotel on Sunday, June 23.

The Turkish Bath in Spring

The *Turkish Bath in Spring* a painting by Mt Irvine artist Ray Harrington recently acquired by the Mt Wilson and Mt Irvine Historical Society has now been hung in the Turkish Bath Museum at Mt Wilson.

More accolades for *HERITAGE*

From Peter Stanbury OAM PhD, vice chair UMAC - ICOM’S International Committee for University Museums & Collections, Librarian, Australian Society of Anaesthetists: *Really John the newsletter goes from strength to strength - congratulations and thank you for the hours and hours (weeks and months!) of work you put in. I hope this year turns out really well for you and Nanette*

From Dorothy Warwick, Friends of Linnwood, Holroyd Local History Research: *Congratulations on another GREAT issue! I look forward to receiving it every time and forward it on to all members of the Forum of societies we facilitate. Love the article on The Paragon. My husband and I were in Katoomba recently and actually spoke to Robyn about all the issues she is having with the owner of the building. We hope that something can be done to preserve such a brilliant piece of history*.

From Peter Webber: *Many thanks for a stunningly informative and impressive issue.*

From Stella Vernon Campbelltown and Airds Historical Society: *Thanks for the opus Blue Mountains John - I was interested in William Cox.*

Mums, Children & Mustard Gas, The Blue Mountains Goes to War

Joan Edwards – former president Blue Mountains Family History Society Inc. writes a preview of her forthcoming book, *Mums,Children & Mustard Gas, The Blue Mountains goes to War*

The author, Joan Edwards (centre) pctured with State Member for the Blue Mountains Roza Sage and Federal Member for Macquarie Louise Markus. Photograph by Glenis Geldard BMFHS, image courtesy Blue Mountains Gazette.

LIFE WAS CHAOTIC on the Mountains and Lithgow areas once Japan attacked Pearl Harbour.

Never before had the population to deal with so many changes concurrently, almost daily.

The war related industries and the vulnerable road and rail access to the west were prime targets to be defended and all activities were compounded by the rush of evacuating Sydneysiders.

Priority activities ranged from home defence to personal welfare, all impacting greatly on the region's infrastructure and human resources.

The immediate response to the Japanese attack on Hawaii was Katoomba Municipal Council's change of five Leura street names within 48 hours.

The patriotic names remain today: Britain, Winston, Churchill, Franklin and Roosevelt streets in lieu of their original Japanese names given by the late Alfred Ickerso.

Then it was down to more practical matters such as ensuring the public understood what to do, and not to do, in an air raid even how to extinguish incendiary bombs.

The latter was well demonstrated in newsreels of city theatre usherettes in full evening dress and would have been seen by locals 'at the pictures'.

Volunteers dug air raid trenches at local schools and classes practised evacuations, remembered by many as fun rather than of any practical value.

Some families built air raid shelters while others planned refuge in nearby bushland.

Parents and the community generally, protected children from worst case scenarios such as the Japanese chemical weapon atrocities in China.

Yet Glenbrook children were aware of the importance of weapons in Glenbrook tunnel and knew it was not to be mentioned. Similarly children elsewhere were silent about local happenings.

My mother never told me about chemical nasties, but in her VAD first-aid book she had handwritten notes on a variety of poisons including prussic acid and cyanide and even the antidote for opium poisoning. Can't imagine her administering that!

Young people made significant contributions. Young lads with billy carts collected paper, metals and whatever else was required for recycling.

Young teens on bikes were messengers conveying memorised verbal messages and replies. Telephones were not considered safe and messengers would not be carrying vital information if they were captured.

Bike riding in brownouts or blackouts over potholed unsealed roads was challenging but they coped.

Girls, too, contributed with fund raising, sewing and knitting. Even primary school lasses knitted scarves but many, including myself, found seeming never ending scarves too boring.

One Leura lass chose to knit gloves and balaclavas. I chose socks, only navy socks for the air force because I hated khaki. Even picky little girls made valuable contributions. Others made camouflage nets including Ascham girls evacuated to Blackheath.

2013 – 2015 marks the bicentenary of crossing the Blue Mountains: the achievements of Blaxland, Lawson and Wentworth, Evans' survey and Cox's Road. Four thousand AIF troops followed in their footsteps 73 years later of as they marched from Ingleburn to Bathurst in 1940.

Four main contingents of the 7th Division undertook the 12 day march, starting two days apart. Each group spent 8 nights in our area namely at Springwood, Hazelbrook/Lawson, two nights at Katoomba, Blackheath/Mt. Victoria, Lithgow and Wallerawang.

Continued page 13

4000 troops marched across the mountains

Continued from page 12
Many believed it was because there were no trains. Not so.

The 2nd/13th was followed by the 2nd/17th followed by Signals, Field Ambulance, Anti Tank Squadron etc. They were billeted or bivouaced and entertained by locals all the way.

It was designed to harden the troops quickly and test not only men and equipment but catering, the field hospital and other support services so adjustments could be made.

It was a well publicised promotion to convey a sense of readiness, to arouse pride and patriotic fervour and, hopefully, persuade many more to enlist.

Lasting friendships were made between locals and these troops that were renamed the 9th Division

Officers and men of the 2nd/13th Infantry Battalion received a warm welcome as they marched into Katoomba on their way to training camp at Bathurst. Photograph courtesy The Sydney Morning Herald.

Pte Harry Dick led the 2/13th march down Katoomba Street with borrowed "Boris" as mascot. The authoress of this article, Joan Edwards, was a cousin some 20 years younger and she did not know he was involved until given the newspapercutting. Photograph courtesy The Sydney Morning Herald.

en route to North Africa where they served with distinction in many battles and siege of Tobruk. Locally they became "our boys".

These are snippets of some stories of life on the home front in *Mums, Children & Mustard Gas, The Blue Mountains Goes to War*.

It is far from definitive as I negotiated my way as best I could through censorship and propaganda but if it encourages others to add to the story, I will have achieved my aim. If all goes to plan it will be published later this year. Further information will be added to www.bmfh.org in the coming weeks.

Bid to fence Woodford graves

WOODFORD Academy's management committee has asked Blue Mountains City Council to provide the low key identification and fencing for the 1840s gravesites in the adjacent Woodford Reserve.

This action is included in the Blue Mountain City Council's plan of management for the reserve.

Woodford Academy's committee has also asked council to apply for a grant to restore the gravestones.

The graves are part of the history of the road across the mountains and the humble people and their families who lived and died here.

The graves are of a child, a soldier and a convict.

These people have been identified from the broken headstones in safekeeping at the Academy.

The Reserve is part of the area originally known as Twenty Mile Hollow and was valued because of the availability of water near Cox's Road.

The damaged gravestones are for safekeeping stored inside Woodford Academy and can be viewed on open days on the third Saturday of each month between 10am and 4pm. Woodford Academy is a National Trust property.

The Cox's Road - some of the most significant features on Mt Blaxland

THE NSW Heritage Office in April 2011 concluded it will list representative portions of Cox's Road as part of the bicentennial celebrations of the crossing of the Blue Mountains in recognition of the importance of the road in the history of opening up western NSW.

Much of the credit for the initiative to have the NSW Heritage Office reach this decision has come from the Cox's Road Steering Committee formed in July 2006 to look at long term objectives and mechanisms to preserve the 1814 Cox's Road alignment between Emu Plains and the Blue Mountains and Bathurst. The committee was formed with delegates from the Lithgow, Blue Mountains and Bathurst branches of the National Trust of Australia (NSW), and operates under the auspices of the Trust as an informal committee.

For the two previous editions of *HERITAGE,* convenor of the Cox's Road Project Committee (CRPC) who is also an individual member of BMACHO, Patsy Moppett pictured, produced the first two of a three part series of articles to provide some of the detail for each precinct of the road.

In this edition, Patsy covers the Mt Blaxland and the Fish River and beyond precincts, the final in the series.

by Patsy Moppett

THE MT BLAXLAND precinct is located off McKane's Falls Road, south west of the city of Lithgow, and continues on to the south west from there to cross the Rydal Hampton Road.

The rocky outcrop of Mt Blaxland itself is located on the property *Mt Blaxland.*

Mt Blaxland was traditionally thought to be the point reached by Blaxland, Lawson and Wentworth in May 1813, having been previously identified by Surveyor Evans.

Although some doubt has now been cast on the accuracy of the description of the landscape, some of the most significant features of the Cox's Road can be found around the zig zag section of the precinct. However, these road remnants can only be reached across private land.

The road from the lower slopes of Mt Blaxland winds around the hills via a significant zig zag formation, short sections of stone work and bridge embankments at creek crossings, stone retaining walls, some pavement remains, stone box culvert, and a number of diversions.

A primitive stone box culvert along the Cox's Road on the lower slopes of Mt Blaxland.

Much of the alignment is indistinct in open areas and where diversions have occurred.

Monuments are located both at the top and the base of Mt Blaxland.

In her report *Cox's Way*, Grace Karskens states that William Cox marked out the road at Mt Blaxland in December 1814, and sent out men to camp there, whilst the rest of the party were still working on the bridge at Cox's River.

The present day farm track actually runs some distance north of the early McBrien's survey, so Cox's Road would have involved little cutting or forming over the easy grades, and would have left little or no trace.

The farm track from McKanes Falls Road has a graded earthen surface with side drains and concrete pipe culverts.

There appears to be an earlier diversion on the north side, running below the present approach to Lowther Creek where the road swings out wider than at present. No bridge was built at Lowther Creek; the existing ford was probably used.

Then the road swings off the track to the south west and commences to ascend immediately, following the present day fence line through more thickly timbered country.

Continued page 15

Road cuts through pink granite

Continued from page 14

At one point the road cuts through pink granite, where broken stone is lying around, and a quarry formed in later years.

A short retaining wall of field/faced stones is built on the north west side and matches the work further along.

The pavement here has packed stones, and the width is about 3m, although variable.

Approximately 750m from the base of the hill, the road is formed into a significant zig zag of about 140m, with one major turn and another contoured curve above.

It is supported by substantial retaining walls of relatively careful construction and in good condition, apart from one section on the first reach and some loose sections at the top.

A 'primitive' stone box culvert is located about 30m from the end of the wall, set on walls of two courses of squared stone, with a roughly cut lintel and an earthen floor.

Beyond the zig zag section the road levels out and is edged intermittently with broken stone.

The formation is not so worn here, as it reaches to the top of the walls.

There is evidence of a steep short section where an attempt has been made to improve the gradient in later years.

Cox's Road below the road's zig zag

A portion of a substantial retaining wall on the zig zag of the roadway on the lower slopes of Mt Blaxland.

Cox's road continues directly up hill while the second road curves slightly along its outside edge.

The road is typical of Cox's work, with steep unbroken climbs, narrow width, minimal cuttings, retaining walls and scattered pavement stones.

From the summit the line is not visible, running directly down the grassy slopes of the ridge, with a slight cutting near the McDonalds Road junction.

The following extracts are taken from records of the time contained in *Fourteen Crossings of the Blue Mountains*, relating to Mt Blaxland:

Gregory Blaxland - May 31, 1813
The party encamped by the side of a fine stream of water [Lowther Creek] *at a short distance from a high hill, in the shape of a sugarloaf* [Mt Blaxland]*. In the afternoon they ascended its summit, from whence they descried all around, forest or grass land, sufficient in extent in their opinion, to support the stock of the colony for the next thirty years.* This was the extreme point of their journey.

William Cox - December 11, 1814
After passing Mt Blaxland we ascended a high ridge, and found it continued to ascend until we got extremely high...the hills to the west, north, and south are extremely high and difficult of access, but in many of them the feed is good to the highest part.

December 13, 1814
Mr Hobby went forward to Blaxland's Mountain to superintend the 10 men ahead in road making...

December 15, 1814
At 7am, went forward myself, and come up with the party at the 10-mile, to which they had completed the road, except turning some rock out of it after you ascend the hill at Blaxland's Mountain. Returned at 10, and sent forward three men with crow bars, pickaxes etc, to complete the road, and remain with the party ahead.

Governor Lachlan Macquarie - May 1, 1815
Early on Monday May 1, they were back on the road headed for the Fish River.

They continued past Mount Blaxland and two small hillocks in the shape of sugarloaves that Macquarie named for Wentworth and Lawson.

This day proved exhausting for the livestock traversing the road over a succession of steep hills for nearly sixteen miles.

Most of this difficult terrain was covered by Governor Macquarie and Elizabeth on horseback.

Continued page 16

"A mist rises from a part I suppose to be a River or a large Lagoon ..."

Assistant Surveyor Evans, November 30, 1813

Continued from page 15

Major Henry Colden Antill - May 1, 1815

This day proved the most fatiguing and trying for the cattle of any we had yet experienced; the road lay over a succession of steep hills for nearly sixteen miles, one hill in particular about 3 miles on the road was very steep, and obliged us after one cart was up to send back the horses to help up the other…about two miles from our encampment passed Mount Blaxland, and a little further on Wentworth's and Lawson's sugar loaves.

Fish River Precinct

The Fish River precinct commences from Pitts Corner, the intersection of Cut Hill Road with Jerry's Plains Road, within the Lithgow local government area.

It follows a crown road to the west and down to the Fish River bridge site near Phil's Falls, south west of the City of Lithgow.

William Cox selected a line towards the Fish River from the east and found the land on either side of the river "extremely hilly and awkward for road building".

The western slopes proved particularly difficult, and it was not long before alterations were being made to improve gradients on the eastern side.

The original route ran along the ridge, while easier grades were built on the lower slopes.

The road from Pitts Corner clearly follows the crown road through private properties.

Its upper reaches have experienced some erosion, defined by remaining eucalypts.

About 1.5km east of the Fish River a major deviation occurs, defined by significant retaining walls.

The original route runs along the ridge, barely visible, descending down to the river, as defined by McBrien's survey.

The later deviation is cut around the hill with an easier grade, at 6m wide. It is supported by a significant retaining wall from 30cm to 2m in height, of un-coursed rubble work. Tree growth and stock use have caused some areas to collapse.

Upper section of retaining wall for the road.

In her report *Cox's Way,* Grace Karskens describes another road, between the original route and the deviation, cut out of the hill, and with a flat surface, which may have been another attempt to improve the road.

The road then continued south of the crown road and down to the river, defined by another line of timber, where there are shallow cuttings and the indentation of the old road.

The banks of the Fish River show no sign of Cox's 25 foot long bridge with stone filled approaches.

Both banks today are well vegetated, with a stony base on the western side.

An earth mound on the eastern side may have been part of the approach to the crossing site.

Karskens states that this precinct is an excellent example of the progressive development of the road west; with three roads of progressively larger scale still clearly visible alongside one another.

They illustrate the typical growth of a road from a rudimentary track to a made road, both in location and construction, and reflect the growing importance of the western region and thus its link with Sydney.

Parts of the road pass through private land.

The following extracts are taken from records of the time contained in *Fourteen Crossings of the Blue Mountains*, relating to the Fish River precinct:

Assistant-Surveyor Evans - November 30, 1813

A mist rises from a part I suppose to be a River or a large Lagoon ... the descent then becomes steep for a ¼ of a mile, leading into a fine valley at the end of which I met a large Riverlett arising from the southern hills...my course is down the Riverlett...on the north of it at this place is a remarkable Sugar Loaf Hill having a Stone on the peak of it, which I have named after myself.

William Cox - December 18, 1814

At half past 7 went forward to examine the road from hence to the Fish River. Found the country very hilly and rocky in many places…fixed on the road, except going up the hill, which must be avoided if possible.

View from west down to Fish River crossing.

William Cox - December 25, 1814

At 8am, after serving out the rations, went forward to the Fish River, and removed the caravan and one cartload there, where I pitched my tent...examined the river to find the best place to cross it, and fixed on a spot about 10 chains below where Mr Evans crossed...the land on both sides of the river extremely hilly, and awkward for road making.

December 27, 1814

We made the river at a spot where a small stream falls into it from north-north-east, about two miles below Evan's Mountain, to the west.

Continued page 17

Continued from page 16

January 3, 1815
The men finished filling in the piers at each end of the bridge…got all the split logs brought in for the bridge. They are very good heavy logs, well split.

January 5, 1815
Finished the bridge over the Fish River this evening. It is a strong and well-built one. On each end is a pier of 25 feet, which is well filled up with stone and a very little earth over it. The span across is 25 feet more, which is planked with split logs; and as flood will go over it, there is no earth put on top. It is altogether 75 feet long and 16 feet wide.
There is also another small bridge 10 ft. long across a creek leading to it, which is also completed this evening.

Governor Lachlan Macquarie - May 1, 1815
Early on Monday May 1, they were back on the road headed for the Fish River… a range of very lofty hills and vallies (sic) *alternately form the tract of Country from Cox's River, for a distance of 16 miles, until the Fish River is arrived at; and the stage between these rivers is consequently very severe and oppressive on the cattle.*

Major Henry Colden Antill - May 1, 1815
We passed Evan's Peak, a very remarkable hill, with a round rock crowning its summit… we arrived at our night's station on the banks of a small river, called the Fish River...The Fish River is now a small stream running through a valley…the feed for the cattle at this station is good and plentiful along the banks of the river.

Beyond the Fish River

On the western side and beyond the Fish River the remnants of the road become less distinct.

This includes the precincts of Snakes Valley Creek and Sydmouth Valley.

At Snakes Valley Creek, the old road crossed the creek via a shallow stony ford, where it would appear as though a bridge was not required.

Snake Valley Creek crossing.

There remain trench like depressions curving up and around the bank from the creek on the western side.

On the eastern side the road came directly down the slope.

The approaches and the few remaining features are now grass covered and indistinct.

At Sydmouth Valley slopes were less severe, and the valley opened out around Sydmouth Valley Creek.

Cox's diary ceased here, and so the record of works beyond this point is not clear, other than he stated that the road beyond here was good for road making.

Remnants of the road have not survived for the valley, but a trench / ramp cut is still visible on the bank of Sydmouth Valley Creek, which may have been the site of a bridge, which follows McBrien's traverse.

Grace Karskens describes these precincts as examples and reminders of the early road illustrating the means of crossing the many streams.

Sydmouth Valley provided visitors with the English-type landscape that they longed for in its lush greenness and gentle horizons.

Further investigation may provide more evidence of the early road.

Once again, much of this part of the road passes through private land.

Beyond Sydmouth Valley there is little evidence of the road, right through to the O'Connell Plains and to Bathurst.

The following extracts are taken from records of the time contained in *Fourteen Crossings of the Blue Mountains*, relating to the Fish River precinct:

Assistant-Surveyor Evans - December 1, 1813
I am more pleased with the Country every day; it is a great extent of Grazing land without being divided by barren spaces as on the East side of the Mountains, and well watered by running streams in almost every Valley:

As Evans followed the Fish River and approached the O'Connell Plains and Macquarie Plains he became increasingly exuberant in his descriptions of the landscape.

December 2, 1813
*I think it equal to Van Dieman's Land, the River running through fine flats, and round the points of small Ridges that gradually descend to it, covered with the finest grass and intermixed with the White Daisey (*sic) *as in England.*

December 4, 1813
My progress is through an exceeding good Track of Country: it is the handsomest I have ever seen with gentle rising hills and dales well watered.:

Continued page 18

…an exceeding good Track of Country: it is the handsomest I have ever seen with gentle rising hills and dales well watered… *Wiliam Evans December 4, 1813*

Continued from page 17

William Cox - January 1, 1815
While the bridge over the Fish River was underway, Cox travelled beyond and to Emu Valley, Sydmouth Valley and to O'Connell Plains and Macquarie Plains.

During these three days travelling [probably December 30, 31 and January 1] *we passed over a great quantity of most excellent pasturage. Fine, dry healthy hills, gravelly soil, and good grass, and so thinly timbered, that it resembled park in England rather than a forest…At Sydmouth Valley I never saw finer grass, or more on the same quantity of land in a meadow in England than was here, and just in a fit state for mowing.*

January 2, 1815
Cox was back at the Fish River examining how they might make a way up the hill on the western side.

The land got hilly, and falls more into gullies than lower down. It is also scrubby in places, and more timber on it, and altogether not so good as lower down.

Sydmouth Valley by JW Lewin courtesy State Library of NSW PXE 88813A.

January 4, 1815
At 8am went with Mr Hobby, Tye and two soldiers to Emu Valley, to mark the intended line of road from thence to Sydmouth Valley. Returned at 4.30, having marked very good ground for road making. We also traced down the rich valley. There are about two miles of it equally good as where we cross, then it falls into a creek...removed the gang of 12 men forward to Emu Valley this evening, three miles.

Cox noted that from this point they would have no further need of their forge until they reached Bathurst Plains.

January 6, 1815
At 8am crossed the river and the new bridge with the caravan and two carts, as also our horses, and went as far as Sydmouth Valley...In the afternoon marked the trees for our road from the valley to the next creek, where we have a bridge to build, and also one in the valley.

January 7, 1815
Ordered the whole of the men forward to a creek about two miles ahead this evening, and rode up to the head of Sydmouth Valley.

The diary ended here. The road was completed to Bathurst on January 14, 1815.

Governor Lachlan Macquarie - April 29, 1815
Passing on from hence (Mount Evans) the country continues hilly, but affords good pasturage, gradually improving to Sydmouth Valley…the land here is level, and first met with unencumbered timber; it is not of very considerable extent, but abounds with a great variety of herbs and plants. Leaving Sydmouth Valley, the country becomes again hilly, and in other respects resembles very much the country to the eastward of the valley for some miles from Sydmouth Valley…there began to exhibit an open and extensive view of gently rising grounds and fertile plains.

May 4, 1815
The Governor and Suite arrived at these Plains (Macquarie Plains and O'Connell Plains) on Thursday the 4th May, and encamped on the southern or left bank of the Macquarie River – the situation being selected in consequence of its commanding a beautiful and extensive prospect for many miles in every direction around it.

Major Henry Colden Antill May 2, 1815
Our encampment this day was picturesque and beautiful, situated in a valley with a chain of Ponds running through it, a high hill bounding each extremity, and very good grass and water for our cattle. After passing the first three or four miles we seemed to be leaving the hilly country behind us, and to be fast descending into a more open one.

May 3, 1815
…we came to an extensive plain, called by Mr Evans, who first discovered it, O'Connell Plains,... A considerable tract of land without a tree, fit for both pasture and cultivation. Continuing along the banks of the river we came to another extensive plain called Macquarie Plains…the most extensive of the two, and equally good for pasture and cultivation.

Walk and Talk to Duckhole

Pictured is the chute down which coal was delivered to the site of a steam driven pump alongside Glenbrook Creek. The engine was used to pump water up to the lagoon. The water then fell by gravity to Glenbrook Station for filling steam train engines. At bottom of chute is the late Ted Nolan (sitting) and Henry Lawson's son Will. Photograph Nolan Collection

AS ONE of their regular "Walks and Talks" events, members of the Glenbrook Historical Society walked to Duck Hole on Saturday, March 16.

The activity included walking the old roadway, visiting the Duck Hole, the pump site and wind eroded caves.

As early as 1867, locomotives watered from a water tank at Glenbrook.[1] There were no stations on Lapstone Hill. Trains had to stop at a water tank near what later was to become the village of Glenbrook.

The trains' boilers were empty after the long climb up the zig zag.

A wooden pipeline brought water to the tank from Glenbrook Lagoon.There was also some water brought by rail from Wentworth Falls to fill the water tank.

The nameless railway stop became known as 'Water Tank'[2]

The Lagoon had been dammed to hold more water for the train engines and the top of the dam wall became part of a new road to be known as Glenbrook Road.

This was a link to Great Western Highway for almost 60 years.

Even with the damming there was not always enough.

The pumping site has a significant connection with the early rail transport across the Blue Mountains to the west.

Steam trains required huge amounts of water to be supplied during the trip across the mountains.

Early water supply to the filling point at Glenbrook was gravity fed from Glenbrook Lagoon.

A series of drought periods between 1877 and 1884, combined with the increasing rail traffic brought a rising need for more water. It was in this period that the steam pump was installed.[3]

In 1913 the pump was removed.

Springwood Historians donate $1000 for newspaper digitisation

IN 2007 the National Library of Australia together with all Australian State and Territory Libraries embarked on a program to digitise Australian newspapers for access and preservation purposes.

For those newspapers digitised so far this free online service provides full text searching of newspaper articles published prior to 1955.

Newspapers published after this date may be digitised with the agreement of the publishers.

The cost of digitising is estimated at $2.00 per page plus GST.

Up till now no Blue Mountains newspapers have been digitised.

However, under the State Library of N.S.W. Digital Excellence Project the *Blue Mountains Echo* is being included.

The *Nepean Times* is very nearly ready to being available for searching. (perhaps at the time of publication already is)

Springwood Historians have appreciated the availability of historic information from this source and have recently given the Blue Mountains City Library $1000 to facilitate the digitisation of additional Blue Mountains newspapers.

The Library has added a further $1000. Other history groups might be able to contribute to this worthwhile project.

WALK WITH MEMBERS OFGLENBROOK HISTORICAL SOCIETY

Next walk: Saturday, April 13 --- Eastern zig zag railway, Knapsack viaduct

Bookings are essential. For those wishing to participate in this and other interest filled walks contact Doug Knowles on 4751 3275

FIRE IN THE MINE

Miner Ned Curry with his horse Snow, circa late 1940s.

THE CITY OF GREATER Lithgow Mining Museum Inc is excited to announce the launch of Fire in the Mine, the museum's newest permanent exhibition.

Fire in the Mine, a pepper's ghost interpretation developed by The Shirley Spectra Australia Pty Ltd, tells the story of the coalminer's life in the mid 20th Century.

It is the culmination of a twelve year conversation clearly demonstrating the value of a strategic vision and long-term planning in community museums.

Fire in the Mine relates stories of the working lives of coalminers and the horses they worked alongside through the persona of Marion Curry.

Marion is the wife of Ned Curry who worked as a wheeler at the Lithgow State Coal Mine from 1946.

As coal mining is a very 'blokey' industry, filled with hard working, coal-dusted men it was decided that the story should be told through the eyes of a miner's wife.

"This allowed us to approach the work of mining quite objectively," says Ray Christison

"As a close family member, Marion has as much knowledge of the industry as we need to communicate to visitors."

She far better expresses the dangers of coal mining than her husband, avoiding the temptation for bravado.

For the miners themselves the dangers they faced were not a matter of courage but simply all in a day's work.

Marion's character recounts the dangers of life in the mines and the comradeship of the men and women associated with coalmining.

She also talks of Ned's love for the horses he was privileged to lead.

Her account culminates in the tragic story of an underground fire in 1953 that took the lives of twenty seven 'of the best horses a man could ever have'.

The museum has converted a former shower block in the former Lithgow State Coal Mine bath house to accommodate the pepper's ghost theatrette.

The room has been sealed and carpeted to minimise sound echo but much of its character has been conserved with original wall tiles and soap holders still adorning one wall.

Companion interpretations explain the role of bath houses in collieries from the early 1920s.

These incorporate artefacts related to showering and bathing.

Continued page 21

Pictured is the space in the bath house converted for the theatrette.

Fire in the mine

Continued from page 20

These artefacts include miners' baths donated by various local families, a miners' clothing basket from Kandos Colliery and photographs of showering and change facilities.

A companion interpretation, featuring a miner's pushbike, talks about getting to the pit in all kinds of weather.

The museum's display horse, Socks, completes the companion exhibits.

This project has been a real community collaboration that has been funded through the Mine Workers Trust supported by donations from Biogas Energy, Delta Electricity and Hartley Corporate. Lithgow's wonderfully talented artisans have contributed to the success of this development.

Blacksmith Phil Spark has undertaken all metal fabrication, sculptor Tim Johnman has made models and a coalface bas relief, and cabinet maker Trevor Beutel has crafted a traditional door for the theatrette.

Miners and their horse at Lithgow State Mines circa 1930s

Local trades people have also contributed their skills to the development.

Ancillary décor has been funded through the Museums and Galleries NSW Volunteer Initiated Museums Small Grants Program.

In addition to the theatrette it has been possible to modify the bath house toilets to incorporate an accessible toilet, and to create a new food preparation area within the old bath house ambulance room.

Volunteers have undertaken substantial building works to complete the project.

This project is the springboard for a series of planned multimedia interpretations designed to enhance the capacity and appeal of the museum.

Contributed by Ray Christison, president, The City of Greater Lithgow Mining Museum Inc.

Lithgow's hidden sandstone heritage

LITHGOW Branch of the National Trust will lead tours around the built legacy of Andrew Brown, one of Lithgow's earliest and most famous sons, on Saturday 21 April 21 and Sunday April 22 , between9.30am - 1pm.

This will be a rare and special treat.

Those wishing to participate will meet at Lithgow Visitor Centre, 1 Cooerwull Road, Great Western Highway (The Miners' Lamp) the coach assembly area at 9.30am.

The front of Cooerwull House shows Andrew Brown on the verandah, about 1880, with his wife Christina and daughter Grace in the carriage. Copyright Ian Jack

The tour will allow participants to discover the buildings which are links to the opening up of pastoral development after the Western Crossings of the Blue Mountains in 1813.

Philanthropist Scotsman Andrew Brown (1797-1894) established a great pastoral empire which commenced at "Cooerwull' Homestead (now western Lithgow).

Led by historian Dr Ian Jack, travel by coach to churches, schools, mills, houses, and back in time to the rustic outbuildings of Andrew Brown's once thriving homestead.

COST: $30 per person includes morning tea.
BOOKINGS: Essential
ENQUIRIES: Helen Clements (02) 6353-1501

History and art at Tarella

HISTORIC *Tarella* at Wentworth Falls will be the venue for an art exhibition later this month.

The Blue Mountains Historical Society owners of the 1890s holiday cottage have joined with the Blackheath Art Society to stage the exhibition on Saturday and Sunday, March 23 -24, 1013

Tarella will be open for inspection in the grounds of the historical society's property at 99 Blaxland Road, Wentworth Falls. It will be open from 10am to 4pm

Admission to the exhibition is $5 per person and morning and afternoon tea will be available.

Tarella was built in 1890 by John McLaughlin, a Sydney solicitor, on a 50 acre grant of land awarded to him for his service in the Volunteer Reserve.

The cottage stands in its original state, and is set up in the period of the early 1900s.

John built *Tarella* around 1890 as a holiday cottage for the family to have relief from the summer heat and to escape the smells that pervaded the air in Sydney.

The cottage stands on Cox's original road on a stretch constructed under the watch of Lt Thomas Hobby which Cox observed on his return, *'at the 29th mile is a very handsome long reach, quite strait, which I call, from the layer of it out, Hobby's Reach'.* (*Hobby's Reach* is the name used for the Research Centre of the Blue Mountains Historical Society).

Tarella cottage as it now stands.

WAY FORWARD THROUGH STORIES

Elders knowing - Elders showing - Children watching - Nyree Reynolds.

Way Forward through Stories is a series of art works on Aboriginal cultural and history awareness and art expression from the first in a series of workshops run at Eskbank House during February 2013.

The works exhibited in the Courtyard Gallery at Eskbank House is a collaboration between Lithgow City Council, Lithgow Community Projects and Mingaan Aboriginal Corporation.

The exhibition will be open on Wednesday through to Sunday from 10am to 4pm through March 27 to April 14, 2013.

The workshop series aims to bring Aboriginal and non-Aboriginal communities together through the experience of culture, history and art.

It aims to explain and discuss the wrongs of the past, many a result of the crossing of the Blue Mountains by Europeans, in order to move forward towards a harmonious community with a greater understanding and appreciation of each other.

The first workshop was very successful with participants looking keenly forward to the next one.

"This is such a positive workshop for the community," said Lithgow City Council Mayor Maree Statham.

"Art is such a great way to bring people together. In this workshop participants are able to discuss and express tough topics relating to Aboriginal history in a safe, creative environment."

The response to the workshop has been overwhelming. A group of Lithgow High School students and teachers attended along with community members of both Aboriginal and non-Aboriginal descent.

The first workshop began with the group watching a documentary called "Contact" which tells the story of the Martu community who were removed from the dump zone for the Woomera Rocket Tests in 1964.

Mai-Lynn Elliot from Lithgow Community Projects then led a discussion focusing on the feelings and thoughts the documentary had created.

Kamilaroi artist, Nyree Reynolds, then introduced the medium of acrylics to the group who went on to paint their reflections on the documentary.

These images are currently on display in the Courtyard Gallery at Eskbank House and the exhibition will build over the next few weeks as the workshops continue.

BLUE MOUNTAINS JOURNEY

by Ken Goodlet
ISBN 978-0-646-59522-1

Journeying has always been part of the mountains story, but of particular significance in this bicentenary year.

Local historian, researcher and author Ken Goodlet has written his latest book, *Blue Mountains Journey* to be launched during celebrations of the Western Crossings Bicentennary later this year.

As well as the tale of the wayfinders' traverse of the Blue Mountains barrier two centuries ago, here there are accounts of many earlier and later mountains journeys, coming up to the present time.

Set within a detailed biographical context in many cases, there are journeys by indigenous peoples, colonial explorers and surveyors, fortune-seekers, travellers heading west, wagoners, marauders, rail travellers and workers, holidaymakers, settlers, commuters, trailblazers and ramblers, cyclists and motorists.

There are more or less detailed accounts of the lives and mountains journeys of Matthew Everingham, Gregory Blaxland, Elizabeth Hawkins, Archibald Bell, Robert Hoddle, William Govett, James Backhouse, Charles Darwin, Louisa Anne Meredith, Sophia Stanger, Godfrey Mundy, Edward Hargraves, Chinese prospectors, bushrangers, Rachel Henning, James Hunter, Edwin Fearnside, railway workers, the Countess of Belmore, John and David Heron, George Gascoigne, John Deering, Eccleston du Faur, Myles Dunphy, Paddy Pallin, early motorists, Mark Foy, the Cooee marchers, Ken Cale, the Leeton cyclists, Fish travellers, Adrian Paul, John Seymour, Ken Ames, Ken Groves, Queen Elizabeth II, Gerald Harvey, Harry Van Den Bout, aryy Van Den Bout, Eleanor Dark, Grace Bayley, Oonagh Kennedy, Lynette Stanger, Ian Brown, Andy Macqueen, Bill Davis, Emily Mohr, Randall Walker and Emily Davis.

Continued page 24

Travellers going west, passing Woodford House, a guesthouse at this time, now known as Woodford Academy. 'The Illustrated London News, 16 February 1889, p.212'.

The author --- Ken Goodlet

As a child, the author Ken Goodlet and his family holidayed most years in the mountains.

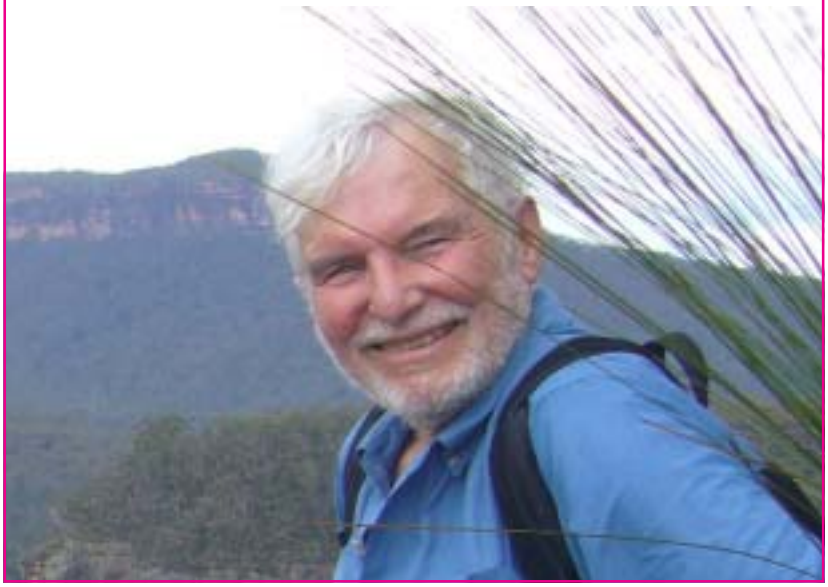
When he and his wife Jan married at the end of 1961, they bought a cottage at Springwood.

After returning from eight years working in Malaysia, they moved to Hazelbrook where they have lived since 1973.

Their four sons, their wives and nine grandchildren have all lived in the Blue Mountains.

Ken has been a teacher and school administrator in Malaysia and Australia, editor for an Australian book publisher, and has written four published community histories, the earliest, published in Malaysia, being his University of Sydney thesis.

His two published histories on the mountains community are *Mountain Springtime: a History of Blue Mountains Grammar School* and the National Trust highly commended *Hazelbrook and Woodford: a story of two Blue Mountains towns*.



Blue Mountains National Trust plans bus tour and to Kelly's Bush and Vienna Cottage

THE BLUE Mountains Branch of the National Trust will be conducting a bus tour to and walk in the Woolwich/Hunters Hill area on Saturday, April 21.

The walk will incorporate a visit to the old graving dock (Mort's Dock), Vienna Cottage and Kelly's Bush which was the site of the first Green Ban in the world.

Vienna Cottage is a rare example of an artisan's home of the 19th century.

Built in1871, it was the home of John and Ann Hillman.

It is a typical tradesman's cottage with 4 rooms in the main building and a detached kitchen and laundry at the back.

The house remained in the ownership of the family until 1984, when it was purchased by the National Trust.

Kelly's Bush was originally inhabited by the Guringai-speaking Wallumedegal clan and rock waterholes, engravings and middens remain within the area.

The tour will be led by two very experienced local guides, who know the area and its history comprehensively.

Participants in this activity should meet at 9am Whitton Park, Glenbrook for the buses to Woolwich. It is anticipated that the party will arrive back at Glenbrook at 4.30pm

The tour accommodates both those who wish to walk and those who don't. An appetising boxed lunch will be provided.

COST: NT members $35, others $40.Those choosing to meet at Woolwich: NT members $25, others $30.

Bookings essential by April 14 - call Sandra 4739 3003 or email **BlueMtsNatTr@gmail.com**

Those wishing to meet at Woolwich should also contact Sandra on 47393003

Vienna Cottage a National Trust owned property is a rare example of an artisan's home of the 19th century.

Blue Mountains Journey

Continued from page 23

We meet in these pages the disinherited custodians and their long search for home, the wayfinder yeoman who sought to recreate in this alien landscape his family tradition of enterprise, the Bathurst-bound settler mother of eight who thought how fortunate she was to be in this new land of opportunity, the Quaker who walked all over Australia on behalf of the disadvantaged, the naturalists whose curiosity and sense of wonder inspired them amidst the shuddering bumps of the road, the 'Celestials' who shuffled across the mountains in search of gold, the travellers who encountered bushrangers and lived to tell that story, the surveyor who championed the reserves for public enjoyment, the conservationists who tramped through the wilderness and sought to preserve it, the royal traveller who thought the mountains the most beautiful place in the Commonwealth, the engine driver who revelled in the might of his 57 class engine, the recent bushwalker who learnt life lessons while enjoying her bush experience.

It is hoped that this A4 book of 240 pages, 140,000 words and over 350 small and a score of large illustrations and maps, some in colour, will enhance and enrich the readers' appreciation of the Blue Mountains. *Blue Mountains Journey* will soon be available from outlets through the Blue Mountains including: Turning Page at Springwood, Lamdha at Wentworth Falls, Megalong Books at Leura and Glee Books Blackheath or from Ken Goodlet at kgoodlet@tpg.com.au

Travelling by coach over the Western Road, a sketch in colour by Mary Martindale, wife of the NSW Commissioner of Roads 1860. State Library of NSW – PXA 2498.

DR JAMES NORTON MLC (1824-1906)

An MP who inherited his love of horticulture and his green thumb

by Shirley Evans - Springwood Historians

JAMES NORTON acquired portions of crown land in the 1880s and purchased more land from John Ellison in Springwood adjacent to the Frazer property of *Silva Plana* .

Here he built his country residence *Euchora* where he pursued his passion for horticulture and botany.

His primary residence in Sydney was *Ecclesbourne* in Double Bay which he had bought in 1857.

The Springwood property Euchora circa 1920 when it was a guesthouse where the owners advertised that they provided fresh milk. Note a cow in the image above.

The garden at *Ecclesbourne* boasted a huge variety of Australian trees and shrubs, ferns and orchids.

Exotics were also planted in abundance – proteas, deodars, palms, agaves, jacarandas, hollies, camellias and more.

He planted camellias although they were not fashionable in the late 1880s and 90s according to the *Australian Town and Country Journal,* October 14, 1899, because of the flowers' lack of perfume', sweet smelling flowers being in vogue at that time.

One of the horticultural features of *Ecclesbourne* was the Sparaxis lawn.

A collection of about a thousand different varieties of this multicoloured South African flowering bulb were naturalised in the lawn and every spring provided a brilliant display.

According to the *Town and Country Journal* "the lawn rivals the richest of mosaic work in colouring". Norton frequently held a garden party at this time.

In Springwood he set about landscaping the *Euchora* garden, experimenting with cold climate trees while not neglecting the abundant native flora in the Springwood bush.

At the time the late Lindsay Paish was working on his book *Hawkesbury Road and the Development of North Springwood* he compiled a list and a plan of the planting of the trees and shrubs still growing in the grounds of Buckland Retirement Village, once the site of *Euchora.*

He listed more than 60 species. Of course we cannot know how many of these were planted by Norton or how many of Norton's original plantings survived.

James Norton was born in Sydney, one of ten children of James Norton, senior and Jane McKenzie.

His father was a successful solicitor who came to Australia from England in 1818.

In 1834 he bought *Elswick*, a 100 acre property in Leichhardt where he planted a beautiful old-world garden complete with roses, peacocks and a pond full of eels.

Son James obviously inherited his love of horticulture and his green thumb.

James, the younger was married twice. His first wife was Harriett Mary Walker, daughter of the late Deputy Commissary-General Walker of Rhodes, Parramatta River.

They had two daughters and a son. One daughter, Gertrude, after her marriage to James Bell, established *Coochin Coochin* homestead garden in Queensland, famous for its horticultural features as well as its important visitors who included members of the Royal Family and Agatha Christie.

Harriett died in 1860 and James married Isabella Stephens, sister of Professor William Stephens, in 1862. Another daughter and son were born. The daughter, Alice, became a well known painter.

James became a very successful attorney, the senior partner of Norton, Smith & Co.

He had the degree of LLD conferred on him by St Andrews University, Scotland in recognition of his services. He was a director of the Australian Gaslight Co., the North Shore Gas Company and the Australian Joint Stock Bank, a trustee of the Australian Museum and the Public Library and a trustee of Hyde, Phillip and Cook Parks.

He was nominated to the Legislative Assembly serving as Postmaster–General, was solicitor to the University of Sydney and had a very special interest in the establishment of the Mitchell Library.

Continued page 26

Continued from page 25
On his death, Mr HCL Anderson, the public librarian (and for a time an orchardist in North Springwood) thought Norton's epitaph should be: *His life was gentle, and the elements so mixed in him that nature might stand up and say to all the world, "This was a man."*

James was a founder of the Linnaean Society of NSW in 1875 and he studied the native flora as well as Australian birds.

Australian Birds. Useful and Noxious.

He wrote a paper, *Australian Birds. Useful and Noxious.* He read this at a conference of fruit and vine growers and it was later published.

He was a friend of Edward Daintree and Robert D Fitzgerald who wrote a book on Australian orchids. Fitzgerald named an orchid for James – Adenochilus Nortonii.

In the 1800s flower shows were very popular, particularly those that featured native flowers.

Whole plants were uprooted and branches lopped for display and set up in elaborate artistic arrangements.

James wrote a number of letters to the *Sydney Morning Herald* deploring these displays and warning of the long term effects of this wholesale removal from the bush of rooted plants and large branches.

The Manly Flower Shows of the 1880s he mentioned in particular.

I have been researching flower shows for a while now and will save my more detailed information for another article.

One of James' projects was to compile for the *Sydney Morning Herald* a list of wild flowers suitable for pot culture but I have not yet been able to find this.

James Norton by an unknown photographer, courtesy State Library of NSW PX D624.

Another letter I found which he wrote to the *Sydney Morning Herald,* December, 15, 1871 was on the subject of women's rights: *I am not an advocate for conferring on women the right of voting at elections, as proposed by a bill now before Parliament, or any such other so-called right, as would not only make them ridiculous, but unfit them for the performance of those duties which laws of nature and of Christianity alike impose upon them*.

This leads us nicely into James Norton, part time resident of Springwood.

The construction of Christ Church of England in Springwood was a time of turmoil and controversy in the little town.

On March 9, 1889, the bishop, when consecrating the church is reported in the *Nepean Times* as having preached a sermon in which he emphasised very strongly that when a church had been consecrated it became the property of the parish and that no contributor to its erection, however generous, had any more interest in it than any other parishioner.

The Hon Charles Moore, a man prone to grand philanthropic gestures, decided opinions and a difficult temper, had set aside for the new church what was known as the Church Acre, adjacent to Mrs Hoare's residence *Homedale*.

Suddenly he changed his mind and set aside a smaller piece of land near his own residence *Moorecourt*.

Although an official church committee had been set up he continued to keep a second bank account in his own name in which he deposited donations.

He built a parsonage for the rector, the Rev Edward Cranswick, but would not hand it over to the church.

He said he would do this in his own good time.

He decided to charge the Rev Cranswick £52 per annum but would put £1 per week in the church collection plate to cover this.

Then he changed his mind and only put half a crown in the collection. He and the Rev Cranswick did not get on so he evicted the Cranswick family from the rectory leaving them homeless.

Moore kept his own key to the church and when he acquired a second hand black reredos (screen) inscribed with the Ten Commandments from St Phillips Church in Sydney which they no longer wanted, he moved it into Christ Church.

He became very angry when the parishioners refused to set it up as it did not fit in with the light decor of the church.

At this time one of the church wardens became so upset he resigned and the Honourable James Norton stepped in.

It is very hard, with the information available, to get a clear picture of what was going on.

What is clear however is that Moore and Norton, aging, wealthy and very important men in the city were not considered so important by the regular townsfolk.

True, they spent money in Springwood and provided some employment but Springwood people were hard working, intelligent, conversant with world affairs and liked democratic processes where everyone was equal and had an equal voice.

The unrest over the church came to a head at a vestry meeting in April, 1891.
Continued page 27

Continued from page 26
More than seventy people attended and the Rev Cranswick took the chair.

James Norton was absent. There was disagreement over the minutes and the accounts and, as stated by the *Nepean Times* correspondent that, 'notwithstanding that a number of ladies were present it must be admitted that their influence did not wholly prevent some unseemly remarks.'

It would appear that a remark made by Martin Olsen about James Norton was reported to him. Olsen was a colourful Springwood character. He had emigrated to Australia from Norway in 1874 and lived in Springwood for nine or ten years.

He was unmarried, about 36 years old, and obviously, from his participation in the Springwood Literary and Debating Society, well educated and took an active part in all local affairs including those of the church, despite acknowledging that he was not religious.

He worked for William Rayner, the general store keeper who was also a well educated and literate man.

James was most annoyed by what Martin was reported to have said so he sent his employee, John Watson, to tell William Rayner that if he allowed his 'man' to attend Church meetings or any other meetings he would not get any more of his custom.

The town folk were outraged and a public meeting was called. It was attended by about 60 people. The headline in the *Nepean Times* read:

An M.L.C. Severely Handled

There were many impassioned speeches about freedom of speech.

William Rayner asserted that his employees' lives outside of their working hours were their own and they could attend whatever meetings they liked.

Mr Robert Anderson, the school teacher, a young energetic artistic man told the meeting that James Norton had reported him to the Minister for Education for holding office in local organisations – he was president of the Springwood Club and secretary of the Springwood Progress Committee – and he was officially instructed by the Department of Education to resign.

Somehow, as part of all this unrest Mr John Huddy's employment at *Silva Plana* was terminated.

The meeting formally extended their sympathy and presented him with a purse of sovereigns and an illuminated address designed and painted by the school teacher, Robert Anderson.

Norton's action…a base attempt at curbing freedom of speech…

A formal resolution was passed: 'That the action of Hon James Norton in threatening to boycott Mr Rayner if he allowed his assistant to attend public meetings is a base attempt at curbing freedom of speech in the community and is deserving of the strongest condemnation, being particularly unworthy of one holding the office of clergyman's churchwarden and a member of parliament.'

James Norton was not present at this meeting. He wrote to William Rayner denying he had given John Watson any such message to deliver.

He wrote, 'Since my residence in Springwood I have always looked upon you rather in the light of a friend than of a mere tradesman supplying me with goods'.

After this, life in Springwood returned to normal.

The Reverend Cranswick and his family went to live in *Silva Plana* while the Frazers had an extended overseas trip, John Huddy found a new and better position,

Martin Olsen attended all the meetings he liked and presumably James Norton returned to his gardens and his work in the city.

James died at *Ecclesbourne* at the age of 81.

Euchora was sold and later became a boarding house offering fresh milk, proximity to the golf course, ideal winter climate and a wireless set.

On May 31, 1907 it was announced in the *Sydney Morning Herald* that Mr Thomas Buckland had offered the property with its 127 acres to the government for a convalescent mental hospital. Today it is the site of a very extensive retirement village.

Ecclesbourne remained in the family until 1931.

In more recent years it was bought by the Cancer Patients' Assistance Society and used for accommodation for patients and family.

It was recently sold again. It is believed that there is little of the garden remaining and no sign of the Sparaxis lawn.

Western crossing commemoration 2013-15

great ideas - thoughts - just being talked about or it's really going to happen!

Support for commemorative coins

BUSINESS and individuals can help sponsor coins free to all school students in the Blue Mountains.

Sponsorship of $500 can ensure that 100 or more students receive this historic memento which can be accompanied by a message from the sponsor' company or business.

Business's and individuals can also make a wholesale purchase of coins at $5 each (minimum order 100 coins). The coins can either be sold at a rrp of $10 each or used as promotional gifts

The coins are also available to individual members of the community at $10 plus postage. Orders for 6 or more are free of postage.

All enquiries to sponsorship@bicenteary.com.au or telephone (02) 4757 1425.

COX'S ROAD WALK

MEMBERS of Blue Mountains Branch of National Trust will conduct a walk from Mt York car park, at the end of Mt York Road to Hartley.

Those participating will walk the road constructed by William Cox and his band of convicts in 1814-15 and follow in the footsteps of Blaxland, Wentworth and Lawson almost 200 years to the day on June 1, 2013

The walk is quite steep and good, strong footwear is required.

Lunch will be provided at the bottom of the road and a bus will take walkers back to Mt York.

Cost including lunch is $30 for National Trust members and $35 for non members.

Enquiries and books to Liz on 4757 2694, Rhona on 4757 2424 or by e-mail to BlueMtsNatTr@gmail.com by May 27

NSW government grants for Western Crossings groups

Blue Mountains MP Roza Sage and RAHS president, Dr Anne-Maree Whitaker soon after announcing the Western Crossings bicentenary grants. Image courtesy Blue Mountains Gazette.

NSW Government grants totaling $40,000 will be issued by the Royal Australian Historical Society to help groups commemorate the Western Crossings bicentenary.

RAHS president Dr Anne-Maree Whitaker announced the grants at the February meeting of the Western Crossings committee.

Recipients of the grants include Ancestral Pathways of the Blue Mountains (Gundungurra Aboriginal Heritage Association), Western Crossings Foundation (Blue Mountains Association of Cultural Heritage Organisations Inc.), Blue Wave reenactment (Blue Mountains Blue Wave), Crossing A Play! (Marian Theatre for Young People).

The grants were the result of a delegation to the NSW Premier by the previous RAHS president, Emeritus Professor David Carment and Blue Mountains MP Roza Sage.

Dr Whitaker has paid tribute to "their hard work on behalf of the community".

Dr Whitaker urged all local residents and organisations to participate in the bicentenary commemorations with diverse activities planned for the whole community.

For more information about Western Crossing events contact: www.bluemountains crossings.com.au

WENTWORTH FALLS CELEBRATIONS

WENTWORTH Falls Chamber of Commerce will the bicentenary with an event around the lake on May 25 .

Smoke signals from the Vatican

NO CHIMNEY in history has been more scrutinised than the simple stovepipe running up through a window in the Sistine Chapel in the Vatican.

In one of the Roman Catholic Church's most sacred traditions, the election of their pontiff, cardinals sequestered among Michelangelo's masterpieces use the iron stove and its narrow metal chimney to communicate with the outside world.

The chimney is not permanent fixture.

Workers scale the roof of the Sistine Chapel and attach the chimney pipe that bellows white smoke to alert the world that a new pope has been elected.

Attached by a safety clip and cable, a worker inches down the tiled roof and uncaps a small top that had covered the chimney.

He replaces it with a tall, thin pipe fed to him by another man in dress pants and a tie who was standing in an opening in the chapel's sloped roof.

The tradition is simple: black smoke means a vote has failed to produce a pope; white smoke means the cardinals have come to agreement.

Locked in the Sistine Chapel, the eligible cardinals conduct a secret ballot until someone receives a vote of two-thirds plus one.

The ballots are burned after each vote.

If a new pope has been elected, the papers are burned with chemicals (it used to be wet straw) to give white smoke.

Otherwise, they give off black smoke

On April 6, 2005, it was announced that, in addition to the white smoke, the bells of St Peter's Basilica will be rung to signal the election of the new pope.

This will avoid any doubt about whether the smoke is white or black.

The first mass in the Sistine Chapel was celebrated on August 9, 1483, the Feast of the Assumption, at which ceremony the chapel was consecrated and dedicated to the Virgin Mary.

BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

REGISTERED OFFICE 1/19 Stypandra Place, Springwood, 2777 (02) 4751 5834
E-mail: committee@bluemountainsheritage.com.au or j.koperberg@bigpond.com
Website: www.bluemountains.heritage.com
ABN 53 994 839 952

THE ORGANISATION Blue Mountains Association of Cultural Organisations Inc. (BMACHO) was established in April 2006 following a unanimous response to a proposal from Professor Barrie Reynolds at the 2004 Blue Mountains Local History Conference which sought from Blue Mountains City Council the creation of a cultural heritage strategy for the city.
BMACHO in its constitution uses the definition: "Cultural heritage is all aspects of life of the peoples of the Blue Mountains which was later changed to cover Lithgow and the villages along the Bell's Line of Roads. It therefore involves the recording, preserving and interpreting of information in whatever form: documents, objects, recorded memories as well as buildings and sites."
The objectives of the organisation are:

i. To raise public consciousness of the value of cultural heritage.
ii. To encourage and assist cultural heritage activities of member organisations.
iii. To initiate and support cultural heritage activities not already covered by member organisations. One of the aims of BMACHO is to bring the various bodies into closer contact, to encourage them to work more closely together and to provide a combined voice on matters of importance within the heritage sector.

AFFILIATIONS BMACHO is a member of the Royal Australian Historical Society Inc.

HERITAGE BMACHO's official newsletter is edited by John Leary, OAM.
Blue Mountains History Journal is edited by Dr Peter Rickwood.

MEMBERSHIP The following organisations are members of BMACHO: Blue Mountains Botanic Garden, Mount Tomah, Blue Mountains City Library, Blue Mountains Cultural Heritage Centre, Blue Mountains Historical Society Inc., Blue Mountains Family History Society Inc., Blue Mountains World Heritage Institute, Eskbank Rail Heritage Centre, Everglades Historic House & Gardens, Friends of Norman Lindsay Gallery, Glenbrook & District Historical Society Inc., Hartley Valley District Progress Association, Kurrajong-Comleroy Historical Society Inc, Lithgow and District Family History Society Inc., Lithgow Mining Museum Inc., Lithgow Regional Library – Local Studies, Lithgow Small Arms Factory Museum Inc, Mt Victoria and District Historical Society Inc., Mt Wilson and Mt Irvine History Society Inc. (including Turkish Bath Museum), Mudgee Historical Society Inc., Mudgee Regional Library, National Trust of Australia (NSW) - Blue Mountains Branch, National Trust of Australia (NSW) - Lithgow Branch, Scenic World – Blue Mountains Limited, Springwood & District Historical Society Inc., Springwood Historians Inc., Transport Signal and Communication Museum Inc., The Darnell Collection Pty Ltd, Valley Heights Locomotive Depot and Museum, Woodford Academy Management Committe, Zig Zag Railway Co-op Ltd. The following are individual members: Ray Christison, Associate Professor Ian Jack, Joan Kent, John Leary OAM, John Low OAM, Ian Milliss, Patsy Moppett, Professor Barrie Reynolds, Dr Peter Rickwood and Dr Peter Stanbury OAM.

COMMITTEE The committee for 2012-13 is: Pamela Smith (president), Ian Jack (vice president), Jan Koperberg (secretary), Judy Barham, Joan Kent, Doug Knowles, John Leary, Dick Morony (public officer), and Scott Pollock.

DISCLAIMER Views and opinions expressed in ***HERITAGE*** originate from many sources and contributors. Every effort is taken to ensure accuracy of material. NEWSLETTER OF THE BLUE MOUNTAINS ASSOCIATION OF CULTURAL HERITAGE ORGANISATIONS INC.

MAY - JUNE 2013 ISSUE No. 27

GOVERNOR CONTINUES HER SUPPORT FOR BLUE MOUNTAINS HERITAGE

HER EXCELLENCY, Professor Marie Bashir, AC CVO earlier this month continued her close support of Australia heritage with yet another visit to the Blue Mountains, when she officially launched Hazelbrook historian and author, Ken Goodlet's latest book *Blue Mountains Journey.*

Professor Bashir said it was a privilege to have been invited to be the bicentenary patron and praised *Blue Mountains Journeys* as a "glorious book" and "a gift to Australia".

She said she was pleased that Australians were embracing their history.

Three years of Crossing events gets underway

THREE GRANITE boulders in the Hartley Valley have been placed in a new position in symbolic preparation for the bicentenary of the first European crossing of the Blue Mountains into Hartley

The boulders were taken from the property of Hartley resident Dick Austen and transported to the grounds of the Hartley School to commemorate the valley's history

Local sculptor Henryk Topolnicki overseeing the placement of the granite boulders.

which includes Blaxland, Wentworth and Lawson's journey through the area in 1813.

The NSW Governor, Professor Marie Bashir will "inaugurate the rocks on June 1, the date when it is thought the explorers passed close to the school's location.

Hartley District Progress Association secretary Ramsay Moodie said the commemorative rocks also acknowledged the special geology of the valley from high sandstone escarpments down to its granite base.

Events big and small, some conceived five or more years ago and some in recent weeks have started to get underway across the region and in other parts of the country to commemorate the bicentenary of the Western Crossing.

The Hartley Valley rocks memorial is only one of many such events ranging from the magnificent re-enactment walk by descendants of the three explorers along the route taken by Blaxland, Wentworth and Lawson, to a mass flyover the region by civilian and military aircraft, fireworks displays and the presentation of holey dollars to school children.

Meantime, 200 years to the day on May 11, 2013, on the site, once the property of Gregory Blaxland in St Mary's, NSW Governor, Professor Bashir farewelled descendants and other participants on a trek --- one of the more innovative activities the Blue Mountains Blue Wave - authentic re-enactment.

Professor Bashir said the first recognised European crossing of the Blue Mountains in 1813 not only provided fresh farmlands for the starving colony and a pathway to future gold, sheep and wheat wealth, it represented the enormous string of achievements throughout Australia's history and the world-renowned "Aussie" quality of mateship.

An opinion from the editor.....

Three years of festivities and commemorations have begun with little help from government

As one of the largest commemoration and celebrations ever to occur in this region gets under way it is worthy to note that the ideas, planning and organisation of most of these events has been the result of dedicated individuals, community groups assisted by the RAHS..

Had it not been for the enthusiasm, dedication and ingenuity of these people there would not have been this iconic series of events to commemorate and celebrate the bicentenary of the first European crossing of the Blue Mountains in 1813 by the party led by Blaxland, Wentworth and Lawson; the subsequent surveying of the route across the Great Dividing Range by Evans in 1814 which lead to the opening of the golden west to allow the nations great pastoral wealth to contribute to the country's economic stability for most of the 19th and 20th century; and the building of the road by William Cox and his party of convicts which allowed Macquarie to travel inland to a site where he proclaimed Bathurst as a town in 1815.

There has so far been a dismal failure of government to contribute more than a token amount of funding to either the overall commemoration or the multitude of events so far planned for the next three years as celebrations roll from St Maryd to Bathurst. It appears so far that the Australian government has contributed very little while the NSW government has done little better and local government despite all its rhetoric was never expected to come to the party with loads of money.

This *Opinion* hastens to be grateful for what government has contributed but far more funding should have been forthcoming for this magnificent opportunity to promote this region. Had government provided funds to say 1/10th of the budget expended on the political advertising under the guise of public information in the run up to an election for just one of its projects, then the economic gain to this region through tourism alone would have been tremendous.

As it is, it has been the generosity of people like Philip Hammon and Tom Colless, those associated with local business houses and other individuals who have so far funded many of the bicentenary activities while groups like Blue Mountains, Oberon and Lithgow Tourism (BLOT) and Business Supporting the Bicentenary (BSB) have made there contribution through entrepreneurial skills. It is not too late for government to accept the challenge of a substantial funding for events planned from now until 2015.

There are many exciting events which are occurring as part of the commemoration and celebration in May and June 2013. However, the prize for sheer guts and determination against all odds for a brilliantly conceived authentic re-enactment which has captured the imagination of large numbers must go the John O'Sullivan and his small group of volunteers.

The NSW government bureaucracy should hang its head in shame for its shambolic attempts to stifle both the participants in the Blue Mountains Blue Wave re-enactment 21 day trek and for ensuring that campsite locations were kept secret for fear that too many people might turn out to meet with the participants, some of them descendants of the three explorers. This over governing of our lives has reached the height of ridiculousness and full marks must go to those who persevered with the pioneer spirit along the pioneer way.

John Leary, OAM - President, Blue Mountains Association of Cultural Heritage Organisations Inc.

New faces, new ideas for BMACHO management committee

NEW FACES often bring fresh ideas to an organisation, as will no doubt be the case with the four new members of BMACHO's management committee.

Following the recent annual general meeting of BMACHO, Kevin Frappell of Glenbrook, Wendy Hawkes of Lithgow, Patsy Moppett of Yetholme and Jean Winston of Mt Victoria became members of the committee.

John Leary, OAM has returned to the presidency following a break due to illness after 5 years as the inaugural president

Associate Professor Ian Jack continues for the 8th year as vice president, while Jan Koperberg was re-elected unopposed as secretary. Others re-elected unopposed for 2013-14 were Dick Morony, Doug Knowles and Scott Pollock.

Former president, Pamela Smith did not seek re-election as she has moved from the region.

Speaking at the annual general meeting, John Leary complimented Pamela on the work she had done during her two years at the "helm"

"I personally was most grateful that Pamela had accepted my invitation to be the president when I stepped down two years ago.

"Pamela certainly deserves credit for many of the things that she and Jan were able to do and which certainly brought credit to the association.

"In particular Pamela's proactive approach to many of the advocacy issues on the periphery of our organisation's aims and objects was most admirable.

"I certainly admired her part in trying to save the Springwood civic centre and her support of the Better Planning Network lobby group.

"I strongly believe BMACHO should be involved in advocacy although it may be in a limited fashion.

"Of course the crowning glory of the two years must be the effort Pamela put into finding speakers for the Blue Mountains History Conference.

"Pamela's work in leading BMACHO will not be forgotten and I do thank her sincerely and hope that through Springwood Historians and Pamela's Blog, she will continue to be associated with the heritage and history of this region," Mr Leary said.

"Few organisations are so fortunate as BMACHO to have as secretary, Jan Koperberg and without her dedication and pleasing manner many of the achievements over recent years probably would not have occurred.

"Jan is well known among members of historical societies and admired for her attention to detail.

"Societies often comment favourably about the up-to-the-minute information over wide range of topics, so promptly conveyed by e-mails to societies which are members of BMACHO.

"In the absence of a treasurer for the past year or more, Jan has also diligently filled this role and for this I am very grateful," John Leary said.

"It goes without saying that any historical or heritage group that has the support of Ian Jack is indeed fortunate.

For many years Dr Jack has been, and remains, an active exponent and promoter of Australian history and of the heritage of the built environment.

"Ian has been described as a consumate scholar, but the free advice and the benefit of his vast knowledge is a living legacy.

"Ian was a long-time serving president of the RAHA and was elected as Fellow of the Royal Australian Historical Society in 2003.

Continued page 4

Jan Koperberg has been elected as secretary a position she has held since 2010 Jan has also been acting as treasurer for sometime

Associate Professor Ian Jack continues for the 8th year as vice president of the Blue Mountains Association of Cultural Heritage Orgnisations Inc.

John Leary , OAM returns to lead BMACHO having been the inaugural president from 2006-11.

New faces join committee

"Ian's dedicated support of BMACHO has brought much credit to this organisation.

"I look forward to continuing to work closely with this pre-eminent Australian historian as he starts off on his 8th year as vice president.

"The incoming committee is well balanced with people like Dick Morony, Doug Knowles and Scott Pollock who have worked on the committee for a number of years.

"Dick has been responsible for membership matters while Doug has been working behind the scenes ensuring meetings and events are organised.

"Scott as the association's webmaster has redeveloped this valuable communication tool and is expected to work closely with newcomer Wendy Hawkes in developing social media for the association in this current year.

"The quiet input into BMACHO's deliberations and the wise counsel of former treasurer, Joan Kent of Kanimbla and that of Judy Barham neither of whom sought re-election, will also be missed," Mr Leary said.

Joan Kent (pictured above) holds an Honours Degree in History from Macquarie University and a Masters Degree in Social Science from the University of Birmingham as the holder of a British Australian Bicentennary Scholarship.

She has worked as a professional historian and as the research historian to the National Parks & Wildlife Service.

In retirement she operates an Alpaca breeding stud with her husband Tom in the Kanimbla Valley and is involved in the 2013 commemoration of the European crossing of the Blue Mountains.

Judy Barham is the new president of Blue Mountains Historical Society having been elected at the society's AGM last month.

Judy has known for about 12 months that she would be taking over the reigns and leading the society in their role as host society for the RAHS State Conference, to be held in Katoomba early November this year.

Both Judy and her husband, Ken, worked in IT.

The four new members of BMACHO's management committee are, Patsy Moppett, Wendy Hawkes, Kevin Frappell and Jean Winston

PATSY MOPPETT

Patsy has worked as a town planner and heritage officer in local government in the central west of NSW for some 22 years, her work including management of heritage programs, heritage advisory service, heritage committee and local heritage funds.

She has also worked in private consulting, undertaking planning, heritage and environmental research and reporting.

She has a Bachelor of Town Planning Degree and a Diploma in Conservation and Land Management, and has completed other courses related to heritage, planning law, property planning, the environment and permaculture.

Patsy undertakes history and heritage research and report writing, having written the book "*A History of Cow Flat*". She is currently working on a history of the Lower Turon goldfields, and various family history projects.

She is convenor of the Cox's Road Project Committee, which was formed to undertake the listing of the road on the State Heritage Register. Under this committee she has assisted in the preparation of reporting for the NSW Heritage Office, addressed a number of

Patsy Moppett

Jean Winston

groups in regard to the history of the road project, undertaken site investigation, and assisted in many other research aspects of this original western crossing.

She lives at Yetholme

JEAN WINSTON

Having been born and brought up in the UK Jean has always been interested in history. Jean says the high school which she attended was the oldest girls' day school in England. It was founded in 1844 and was visited by Charles Dickens.

Soon after Jean moved to Katoomba in 2001 she joined the Mount Victoria and District Historical Society and has been a volunteer at the museum ever since.

Jean has worked as publicity officer for most of that time. Jean says she finds the eclectic collection fascinating and enjoys working in the only general historical museum in the mountains.

Mount Victoria Museum was represented in BMACHO by Jean Arthur until she was unable to continue and Jean said she is proud to follow in her footsteps.

New faces join committee

Continued from page 4

WENDY HAWKES

Having trained as a school teacher, Wendy Hawkes in 2000 started teaching in primary schools in the Blue Mountains and Lithgow areas focusing on special education and emotionally disturbed students before becoming the cultural development officer at Lithgow City Council which includes managing Eskbank House and museum.

Wendy Hawkes

Wendy says her interest in culture began as a child when she moved with her family to Papua New Guinea and spent her childhood and teenage years amongst a culture that values art, dance and music highly.

Returning to Australia at the end of high school Wendy completed a teaching degree.

Wendy began a Masters of Art Administration in 2006 at the College of Fine Arts, UNSW and realised she wanted to pursue a career helping others enjoy art as much as she does, especially in rural areas.

When Wendy moved to Lithgow she added a love of history to her love of art as she began exploring the area with the local photographic group.

"Beginning my new career as cultural development officer at Lithgow City Council is a fantastic opportunity as it allows me to fulfil my ambition of helping others access culture and history, either by creating it or experiencing it, while being surrounded by culture and history myself," Wendy said.

"Eskbank House and museum, at which I am based part of the time, is an excellent venue for storing knowledge and history and from which to share it.

"I hope to make Eskbank House and museum a place that the community calls home and in which it feels a real sense of ownership as well as a place people like to come to visit from outside Lithgow.

"I look forward to forming links with other community cultural organisations.

"There are other exciting cultural projects outside the museum that I will be involved in and I am very much looking forward to sharing in the exciting cultural future of Lithgow," Wendy said.

KEVIN FRAPPELL

A former councillor who served for 4 years on Blue Mountains City Council, Kevin Frappell is the vice president of Glenbrook and District Historical Society.

A resident of the Blue Mountains for 30 years, Kevin spent almost 40 years in the NSW public service dealing with the administration management of Crown Lands.

He retired in 1999 holding a senior position, State Manager - Crown Lands.

Kevin Frappell

Kevin is currently a director of the Catholic Cemetery Board which is responsible for the management of a number of metropolitan cemeteries.

These cemeteries include Catholic cemeteries at Rookwood and Field of Mars, Liverpool, Kemps Creek, North Rocks and Greendale.

Kevin has a particular interest in built history and its preservation for future generations, including the various early rail constructions, buildings, roads, cemeteries etc.

He and his wife Frances have three children and five grandchildren.

Blue Mountain Education and Research Trust a new member of BMACHO

Blue Mountain Education and Research Trust has joined BMACHO as a new member.

The trust is a small not-for-profit organisation located at Lawson.

The objectives of the trust are to publish and promote research and education on Blue Mountains history, archaeology, religious ideas and philosophy.

The chair of the trust is Father Eugene Stockton, DD, PhD and author, biblical scholar and self described "local hermit" .

The trust also auspices the Blue Mountains Aboriginal Archaeology Forum.

One of the better known publications of the trust has been *Blue Mountains Dreaming: The Aboriginal Heritage* which is now published in its second edition.

This second edition has new chapters written by experts in their fields and gathers together the latest research and information about the original inhabitants of the Blue Mountains. It provides a fascinating account of histories, languages, legends and European contact and serves as a model for regional studies elsewhere.

1813: THE FOUR SUMPTER HORSES OF BLAXLAND, LAWSON AND WENTWORTH

by John Low, OAM

WHEN THE EXPEDITION led by Gregory Blaxland (1778-1853) William Lawson (1774-1850) and William Charles Wentworth (1790-1872) left Blaxland's South Creek farm on May 11, 1813 in quest of a passage over the Blue Mountains, their departure was noted quietly in a paragraph on page 2 of the *Sydney Gazette and New South Wales Advertiser* several days later.

Noting their spirit and determination, the writer also made special mention of their "prudentially taking with them four sumpter horses" (Anonymous 1813).

The *Gazette* writer's particular comment on the decision to take packhorses is interesting.

As the "grand narrative of the Blue Mountains crossing (Lavelle 2012, p. 28) developed over the next two hundred years the four horses, along with the four 'servants' and five dogs, slipped into the background, becoming mere decorative appendages to the main story of the "dauntless three".

Little thought and few words have been given to them.

Was the decision to take the horses in fact a prudent one, introducing, as explorer/historian Ernest Favenc argued in 1888, a new era of exploration in which horses would play a significant part or is bushwalker/historian Ross Brownscombe (2004, p. 223), writing over a century later, correct in concluding that the decision to take them was a bad, even stupid, one with the horses proving more of a hindrance than a help?

The four sumpter horses deserve reflection and offer an interesting angle from which to approach the 1813 expedition.

The horse in earlier Blue Mountains exploration: George Caley

While Francis Barrallier (1773-1853) was toying briefly with the idea of using horses as part of a supply chain to provision his November 1802 expedition (Macqueen 1993, pp. 69-70), the botanist George Caley (1770-1829), son of a Yorkshire horse dealer, was also giving thought to the role horses could play in exploration.

The sumpter horse

His correspondence with his employer Sir Joseph Banks gives some insight into his thinking.

Writing to Banks on November 1, 1802, a month or so after Barrallier had made a reconnaissance journey using two horses, Caley made the following remarks:

> "[Barrallier] is upon the eve of setting off again with a larger party, and instead of horses he takes out two bullocks. ... I am so vain as to think that with another man besides myself, and a horse, that I can go further than what this party will, provided the weather is favourable. I have often lamented that being bred a horseman had been all lost labour in forwarding a pursuit in natural history, but at length I am undeceived, for as a traveller in this country it has given me an advantage over all others. When Mr. Barrelier (sic) returned I perceived his loss for the want of the like."
> (Macqueen 1993, pp. 70-71; Andrews 1984, p. 15)

Again, on November 8, 1802, he continued:

> "Mr. Barrelier (sic) set off on his journey on Thursday last. They were 10 or 11 in number, and all had guns [and] a cart with two bullocks. This party, I understand, are likely to go a great way if we credit the report; but in my opinion it will fail, for they cannot go above 2 days' journey before they must part with the bullocks, and then every man must carry his own provisions, and he must be a very strong man that can carry 20lb extra of his gun, ammunition, etc. They talk of making stations in order to have supplies forwarded. Upon a horse I can take 100lb of food extra of all other articles for my pursuit. I am not afraid to travel by having only another person besides myself. By this I have not the encumbrance that will always be found in a large party."
> (Macqueen 1993, p. 71)

Caley's observations proved accurate for, having established his first depot at Nattai, Barrallier's planned supply line of depots failed to materialise and he and his men returned "footsore and short of provisions" (Richards 1979, p. 20) on December 2.

Subsequent letters to Banks suggest Caley may have made a number of Blue Mountains excursions using a horse, though only one appears to have been documented.

Lasting nine days, it occurred in February 1804 when he crossed the upper Nepean River and journeyed some distance into the mountains with one companion and a mare laden with provisions (Andrews 1984, p. 15).

Did Caley meet with Blaxland as early as 1810 to discuss Blue Mountains venture?

Continued from page 6

This was not, however, "the grand mountain journey" (Andrews 1984, p. 15) he was dreaming of and about which he had written to Banks almost a year earlier, on May 13, 1803, telling him that "next spring I mean to visit the ruggedest part of the Blue Mountains" and adding that "this will be a tract impassable for to take a horse".

His opinion on the horse's place in his own plans had clearly changed and the February 1804 expedition (and any others he may have made) did not persuade him otherwise for on August 18, 1804 he informed Banks: "In the course of a month I think of going a journey into the mountains for about a fortnight ... I have already travelled the ground that can be done with a horse." (Andrews 1984, p. 16)

And again on November 1, 1804: "Upon the eve of going a journey ... Having tried every part to the westward for to penetrate into the interior with a horse but always having been prevented by very barren rocky ground I have now fitted myself out as well as the colony will afford for such a journey." (Andrews 1984, p. 17)

A day or two later Caley set out with three companions and a dog, equipped for about 20 days. In his journal he listed in some detail his provisions: biscuits, flour, rice, portable soup, pork, sugar, tea, "two fusees (small muskets] and a brace of large pistols", 20lb of ammunition, cooking utensils, compass, brush clearing implements etc.

The total weight to be divided between Caley and his companions must have been at least 250lb and this was unlikely to have lightened as the expedition progressed because "as the food diminished the natural history collections took its place". (Andrews 1984, pp. 101-102)

When he returned, his comments to Banks (December 16, 1804) on the conditions he encountered were blunt: "My journey to the Carmarthen Mountains was a very rough one. I was out three weeks which was as long as I was able to abide for the want of provisions. The roughness of the country I found beyond description. I cannot give you a more expressive idea than travelling over the tops of the houses in a town." (Andrews 1984, p. 24)

The 1813 Expedition depicted in the Sydney Mail Christmas Supplement, December 25, 1880 (State Library of NSW).

Such conditions certainly seemed to confirm the unpracticality of a horse.

But could Caley have later changed his mind again?

Though his expedition got bogged down in the Devil's Wilderness and failed to re-find the ridge that would have seen them into the Hartley Valley, Caley did report from the top of Mount Banks that "to the eastward very high land is seen" (Andrews 1984, p. 79) and found cause to reflect upon the possibilities such high land might offer for easier travelling (Andrews 1984, p. 81; Cunningham 1996, p. 118).

Could he have thought more on this and not only seen the potential of the ridges but also renewed his faith in the value of the horse?

Though there is no evidence to substantiate it, is it possible that Caley met with Gregory Blaxland and discussed Blue Mountains exploration prior to his departure for England in May 1810? (Richards 1979, pp. 38-39) Sir Joseph Banks, after all, was a mutual friend (Blaxland, in fact, sent Banks a copy of his Blue Mountains journal in 1816).

Blaxland also mentioned Caley by name in correspondence with Commissioner JT Bigge in 1819, though including him with others who had believed that a Blue Mountains crossing was impossible (Richards 1979, p. 175).

While this might suggest that if indeed he had met with Caley their discussion was unfruitful, it should be remembered that by 1819 Blaxland was nursing a grudge against Macquarie.

He was feeling badly treated and ignored and was playing up his achievements to Bigge, a ready listener to complaints against the governor.

It has also been suggested that Caley met with William Lawson while the latter was in London between 1810 and 1812 ostensibly to act as a witness at the court martial of his superior officer, Lieutenant Colonel George Johnston.

The anonymous writer 'X.Y.Z', probably the tobacco merchant Thomas Horton James (Havard 1953), believed this and wrote in March 1827, in an article for Wentworth's *The Australian*, that: "no sooner [had Lawson] arrived from London where he had met Mr Caley, and frequently discussed the practicability of a mountain pass, than he determined to set out on the expedition to find a passage over the Blue Mountains". (Jervis 1954, pp. 74-75)

While there is no record of Lawson ever confirming James' statement, nor did he deny it.

Despite the lack of direct evidence, it is still interesting to speculate that, if such meetings did take place, issues such as ridges and packhorses may well have been discussed.

For Caley's part, it is clear that he never lost his interest in the Blue Mountains, as can be seen from a letter he wrote to his friend George Suttor on August 10, 1812: "Oh! Botany Bay! I wish I could forget you! But this will never be the case as long as your mountains haunt me." (Webb 2009, p. 80)

The decision to take horses in 1813

By 1813 Gregory Blaxland, his pastoral concerns under pressure from the deteriorating conditions on the coastal plain, had clearly been thinking for some time on the possibilities of expansion and had made several earlier trips into the mountains.

The first began as a picnic excursion by boat up the Nepean River with Governor and Mrs Macquarie in November 1810, during which they ventured into the gorge of the Warragamba and would almost certainly have discussed the possibilities of a crossing.

Blaxland was clearly enthused and made a quick return journey a few days later and soon followed this up with a further more rigorous exploration that strengthened his conviction "that it was practicable to find a passage over the mountains ... by the ridge which appeared to run westward, between the Warragomby and the River Grose" (Blaxland 1823, p. 65).

A moment during the 1951 re-enactment of the 1813 crossing (Blue Mountains City Library).

This latter expedition was undertaken in the company of "three European servants and two natives, with a horse to carry provisions and other necessaries" (Blaxland 1823, p. 65).

Blaxland was clearly aware that the length of time an expedition could stay out depended on the provisions it was able to take and that, if on foot, a leader had to balance what each man could carry against his ability to still manage the hard graft of walking and clearing a path.

"Four horses laden with provisions, ammunition and other necessaries"

This was certainly a problem that had plagued earlier expeditions and his use of a horse in his 1810 excursion shows that he was giving practical thought to the matter.

Though discouraging him, mistakenly perhaps, from the use of Aboriginal guides (he felt their geographical knowledge was too limited; (Blaxland 1823, p. 65), he seems to have been satisfied with the role of the horse and when the main expedition left his farm at South Creek on May 11, 1813 it was equipped with "four horses laden with provisions, ammunition, and other necessaries" (Blaxland 1823, p. 67).

It has been suggested by Ross Brownscombe (one of the few historians to give the subject more than a passing thought) that the decision to employ horses in 1813 was a bad one, made simply on the basis of class, that this was "a 'gentleman's excursion' and unlike their predecessors, the 'dauntless three' had no intention of carrying their own provisions." (Brownscombe 2004, p. 223)

This seems to me, however, too cynical and shallow a judgement, down-playing the seriousness of their intent and ignoring their obvious willingness to embrace hard physical labour.

Colonial gentry and driven by economic self-interest, certainly, they were nevertheless, as Lawson's journal in particular makes clear (Lawson 1813), prepared to share the heavy work of exploring and cutting a path with their 'servants'.

The horses seem to have been a deliberate strategy to save all five members of the expedition from the extra burden of carrying their arms and supplies.

Brownscombe states further that the decision to take horses was "not very smart because most of the difficulties the party encountered, particularly the hand cutting of the track ... , were the result of the horses' inability to make their way unaided through the thick bush" (Brownscombe 2004, p. 223).

They proved it possible to get animals over the mountains and open the way to the west

Continued from page 8

While the explorers, as we shall see, did encounter difficulties with the horses this judgement again seems too hasty and misses what I think was another important reason for taking the horses, other than as beasts of burden.

The explorers' journals make it clear that, unlike Caley, they were not primarily interested in "going farther than any person has yet been" (Andrews 1984, pp. 17-18) but, rather, in finding a practical route across the mountains along which both men and livestock could travel.

By taking the horses they were proving that it was possible to get animals over the mountains and, to this end, the labour invested in cutting a path was a necessary imposition.

Towards the end of his account, while admitting that they had not completely crossed the mountains, this was clearly what Wentworth was saying when he wrote (using 'cattle' in its older and broader sense): "we have at all events proved that they are traversable and that too, by cattle – a circumstance which ... has been hitherto deemed impossible". (Wentworth 1813, p. 114)

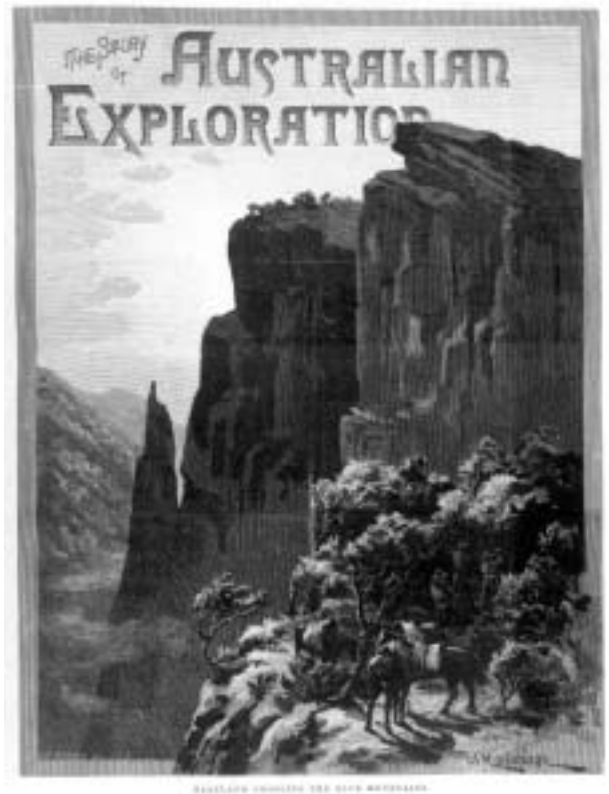
The horse in Australia 1788-1813

When the First Fleet arrived in early 1788 nine horses, purchased from the Dutch colony at the Cape of Good Hope and primarily of Spanish origin, were landed: one stallion, three mares and three 'colts' (1 male, 2 female) plus a further stallion and mare bought privately by two of the marine officers (Binney 2005, p. xvi).

Though a government stud was soon established, the authorities showed little interest in horse breeding in the early years and the better quality Arab, Thoroughbred and Jennet horses that followed were imported largely through the commercial enterprise of the officers of the NSW Corps and various wealthy free settlers ('exclusives').

The importation of large numbers of Spanish Jennet mares during the 1790s and the fact that Arab stallions dominated breeding up to the 1820s meant that the colony's horse population by 1813 was primarily composed of Arab and Arab-cross horses.

Such strong Arab bloodlines, combined with the freedom of open pasture lands, began to produce a local horse of hardy character, strong and with good wind and increasingly suited to the local environment (Kennedy 1992, pp. 12, 80, 84).



The 1813 Expedition as depicted in the Illustrated Australian News, January 1, 1891 (State Library of Victoria).

Even Commissioner JT Bigge, loaned a saddle horse by John Macarthur during his time in NSW 1819 -1821, was impressed with the quality, endurance and speed of the colonial bred horses (Kennedy 1992, p. 85).

The success of early horse breeders such as John Macarthur, D'Arcy Wentworth and Samuel Marsden was founded on Jennet mares and Arab stallions (Kennedy 1992, p. 83).

Because the business practices of these 'privateers' were not always strictly legal and they sometimes operated without official approval it is difficult to track exact numbers of horses in the colony.

Illegal imports did not always appear in official census figures (Binney 2005, pp. xvii-xviii).

By the early years of the 19th century, however, there were probably something like 300 horses in the colony, most owned by officers and wealthy free settlers. Horses were expensive and the preserve of 'gentlemen'.

Their number had increased to almost 1000 by 1808 and by 1815 numbered close to 2,500. (Kennedy 1992, pp. 13-14).

The first officially sanctioned race meeting was held at Hyde Park in October 1810 (at which Wentworth Jnr rode one of his father's horses to victory) and by the time Blaxland's party set out for the mountains horse breeding was a minor (compared to cattle and sheep) but established part of pastoral activity on the Cumberland Plain.

All three of the explorers owned horses and large pastoral properties.

Blaxland had 'Brush Farm' and 'Lee Home' at Eastwood and South Creek respectively, Lawson 'Veteran Hall' at Prospect, and Wentworth 'Vermont' on the Nepean River.
